CATALOGUE

The British species are distinguished from the Foreign by the English names being printed in red ink on the labels.

When the word *Habitat* is used in this Catalogue it refers to the species, and when it is known that the specimen was brought from any particular locality the word *From* is used.

N.B.—It is to be observed that the Council of the Society do not hold themselves responsible for the nomenclature used, or the opinions expressed, in this publication.
