motions not to press them, but to allow the Thursday night to be given up to allow the ground that otherwise it would be impossible to move the omission of the vote for the Supply of Scotland. After some discussion, the Scotch members, the motion was carried on a division by 150 to 45. Mr. CHARLEY moved the necessity of greater accuracy in the department of the Board of Trade, and the present returns were deceptive and more calculated to do harm than good. SHAW-LEFFRE, in reply, said that he had led the Treasury to institute an inquiry into circumstances under which the contract was made with Dr. Salvati's Venice. In a recent debate Mr. LAWRENCE said the contract had been made before the present unpleasant rumours had since been appearing in the original list of shareholders as having transferred his shares. It was to the credit of the House and the Government that these rumours should be cleared up. Mr. LAWRENCE, in reply, said that the contract had been made entirely without the sanction of the Venetian company of Dr. Salvati, and that it ceased to belong on entering into the speculation, but represented a speculation through his active exertions to prevent the glass and mosaic work from being closed. The two passions of the House, Art, and he had acted from a desire to adapt to our climate. After some discussion, W. HUNT and Lord ELPHINSTONE, who had withdrawn. The House then went to Supply, and agreed to the Irish Church Bill (373,950). On the motion for the second reading of the Telegraphs Bill, Mr. W. FOWLER moved terms of the agreements with the Government. Mr. R. TORRENS moved that the Bill be referred back to the Committee for the purpose of examining the evidence as to the calculations on which the Postmaster-General were based. A division the amendment was rejected, and the Bill to 23, and the House went into Committee. Mr. HARTINGTON moved to strike out the words inserted by Mr. HUNT in the Committee, limiting the monopoly of the motion was supported by Mr. LAWRENCE, Mr. BOUVERIE, Mr. WALTER, and carried on a division by 123 to 57. The Bill was agreed to, with some amendments. On Tuesday at a meeting of the House went into Committee on the Parliamentary (Ireland) Bill, and remained in Committee for adjournment arrived, at which the second clauses only had been agreed to. The Municipal Poor Act (1867) Amendment Bill was read a third time and passed. The Lords amendments in the Municipal Franchise Bill were agreed to. At the evening sitting, the House went before any business was done. Mr. GILPIN moved the second reading of the Bill for the Abolition of Capital Punishment. Mr. FOWLER seconded the motion. Mr. LAWRENCE moved as an amendment, that the Bill be read a third time that day three months. Mr. T. CHAMBERS, Mr. SCOURFIELD, Mr. HIBBERT, and Mr. HENLEY supported the amendment; Mr. LAWRENCE, Mr. HENLEY, Mr. HADFIELD, and Mr. M. HENLEY opposed it. On a division the amendment was carried by 118 to 58. The Bill was carried on a division by 118 to 58. The Game Law (Scotland) Bills of Lord LOCH were withdrawn, as was also the Bill of Mr. Hughes, and the Parliamentary (Scotland) Bill. The Seeds Adulteration Bill passed through Committee. On Thursday the ATTORNEY-GENERAL stated, in reply to Mr. W. HENLEY, that the Privy Council had adapted the coronation union of the two Churches when it was proposed to modify its form, the Council was not to make any change in it that might be in consequence of the dissolution of the union. Mr. CHARLEY asked if the recent Act interfered with the Queen's conscience in the coronation oath, whereby she swore to maintain the legislative union between the two Churches. The ATTORNEY-GENERAL denied that Mr. Charley into any discussion as to the serious considerations involved, and that the Government had no intention to break the meaning of that oath. Mr. NORTH, Mr. BAXTER stated that the ground for assimilating the pay of officers serving in Japan to those of other as there were no climatic or other authorise it. The House then went to supply on the Civil Service Estimates, almost without discussion, to the "law and justice." On the vote of the Diplomatic Service, Mr. RYLANDS moved of 10,000l., on the ground that the cost of the service was excessive and unnecessary, and that numerous instances in which economy had been used. Mr. NEVILLE GRENVILLE, Mr. BRISCOE, Mr. SCLATER-BODD, Mr. W. HENLEY, Mr. Alderman CANDLISH supported the motion.

changes it was argued by Mr. Austen that "we have strong *a priori* reasons for supposing that the course of a band of coal measures coincides with and may some day be reached along the line of the valley of the Thames, while some of the deeper-seated coal, as well as certain overlying and limited basins, may occur along and beneath some of the longitudinal folds of the Wealden denudation." After Mr. Godwin-Austen had startled the scientific world with his propositions, the boring was made at Harwich, and Mr. Prestwich, who had previously been confident that the lower greensand was continuous under London, candidly acknowledged that he was at length constrained to "adopt in great part" Mr. Austen's hypothesis, and to acknowledge the probability "that there is under the central part, at all events, of the London tertiary area a tract or ridge of the older rocks immediately underlying the chalk and gault on different portions of which the three wells of Calais, London, and Harwich have touched; the one on the carboniferous series, the other on the new red sandstone, and the last on some slate rock." The idea of a connection between the Mendip Hills and the coalfields of Belgium was also entertained by the late Sir H. T. De la Beche, in one of whose essays may be found the germ of Mr. Austen's theory. Within the last few days Mr. Austen has appeared as a witness before the Royal Commission on the supply of coal. A singular fact connected with this question occurred during the construction of the London, Chatham, and Dover Railway. While a tunnel was being excavated a few miles distant from Dover the workmen came upon a great mass of some black substance, which crossed the line of the tunnel in the very midst of the chalk. The engineers were obliged to cover up the exposed strata speedily, and the discovery could not be made the subject of deliberate investigation; but a specimen of the substance is preserved in the British Museum.

A WINTER CRUISE TO SOUTHERN LATITUDES.—A first-class ship, fitted up in yacht style, is to leave Southampton on the 15th October, and to return to England about the 15th May. To avoid the winter the ship will cruise in the finest latitudes of the North and South Atlantic (from 30° N. to 30° S.), including visits to Oporto, Cadiz, Gibraltar, Madeira, Teneriffe, Cape de Verde Islands, Bahia, Rio, St. Helena, &c. The highest medical authorities recommend the cruise as the best opportunity ever offered for recruiting health, and no expenses will be spared to make it a thorough pleasure trip. The party will be quite select, and the number limited.

DEATHS BY POISON.—In the five years 1863-67 the number of persons who met with violent death by poison in England and Wales was 2097. In 1620 cases the description of poison is recorded thus:—By arsenic, 83; mercury, 58; opium, 114; morphia, 33; laudanum and syrup of poppies, 426; strychnia, 41; prussic acid and cyanide of potassium, 151; essential oil of almonds, 31; oxalic acid, 66; sulphuric acid, 53; nitric acid, 16; muriatic acid, 5; carbolic acid, 5; salts of lead, 242; improper medicine, 17; overdose of medicine, 52; Godfrey's cordial, 56; improper food, 33; aconite, 6; belladonna, 6; alcohol, 35; ammonia, 8; hartshorn, 3; chlorodyne, 4; vermin killer, 20; turpentine, 2; phosphorus, 15; sulphate of copper, 3; colchicum, 3; disinfecting fluid, 3; nitrate of potash, 3; chloride of zinc, 8; spirits of salt, 3; cantharides, 2; fungi, 6; mussels, 8.

HYDROPHOBIA.—Many fatal cases of hydrophobia, with all the frightful agony which accompanies the termination of that malady, have of late occurred in several parts of the West Riding. At Halifax several men who had been bitten by dogs months before have died from hydrophobia, and a case has occurred at Windhill, near Bradford.

THE PUBLIC HEALTH.—The Weekly Return of the Registrar-General states that in the week that ended on Saturday, July 24, 4437 births and 3289 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 26 per 1000 persons living, being 26 per 1000 in London, 32 in Edinburgh, 16 in Dublin, 23 in Bristol, 14 in Birmingham, 27 in Liverpool, 35 in Manchester, 28 in Salford, 27 in Sheffield, 21 in Bradford, 25 in Leeds, 24 in Hull, 20 in Newcastle-upon-Tyne, and 35 in Glasgow. The annual rate in Paris in the week ending Saturday the 24th inst., was 23 per 1000; in Berlin during the seven days ending the 15th inst., 37 per 1000, and in Vienna during the week ending the 17th inst. 31 per 1000. In London the births of 1076 boys and 1043 girls, in all 2119 children, were registered in the week. In the corresponding weeks of 10 years, 1850-68, the average number, corrected for increase of population, was 2030. The deaths registered in London during the week were 1600. It was the 29th week of the year, and the average number of deaths for that week, corrected for increase of population, was 1514. The present return is therefore 86 above the estimated amount.

Provincial.

BIRMINGHAM.—The damages in the action by Mr. Murphy, against the Mayor of Birmingham, are laid at 1000! It is understood that the prosecution is supported by several prominent members of the Protestant party in the House of Commons, and that an effort will be made to have the case tried in London, instead of Warwick. On Wednesday evening Murphy delivered an address on "Popery and Protestantism Contrasted," in his chapel in this town. At the close of his speech he said that if the Protestants of Birmingham had any pluck they would rout every Irish Papist out of Park Street, and out of Birmingham, and send them back to their own land, for here all they did was to reduce wages. He concluded by craving subscriptions for his defence fund, but these come in very slowly.

BRISTOL.—An absconding bankrupt, Mr. W. J. Lamb, partner in the firm of Morris and Lamb, wholesale tea merchants, of this city, was captured about a fortnight since at Rotterdam. Mr. Lamb had landed some days previously at Flushing, with his family, and was at once taken in custody. From Flushing he was sent to Rotterdam, and delivered to the British Consul, who set him at liberty. He thereupon took up his lodgings at the Hotel Verhaeren, and all the endeavours of the English authorities to arrest him proved ineffectual. In the meantime some disguised policemen arrived from England, engaged quarters in the same hotel, and succeeded in making his acquaintance. Various excursions were proposed and agreed to, and one morning Mr. Lamb and his new friends walked together along the river side till they arrived at the spot where the English steamer Waterloo was lying ready to start for London. Mr. Lamb was invited by his friends to visit the steamer. At first he declined, but was eventually got on board. The British standard was at once hoisted, and the vessel started. The Dutch papers protest against the arrest, and demand that the Government of the Netherlands shall ask satisfaction for such a violation of its territory.

CAMBRIDGE.—The general results of the Examination for Women, lately held by the University of Cambridge, are as follows:—In Group A, including Religious Knowledge, Arithmetic, English History, Literature, and Composition, ten ladies were placed in the first class, eight in the second, seven in the third. In Group B (Languages) two were placed in the first class, two in the second, ten in the third. Several ladies obtained special marks of distinction in Religious Knowledge, Arithmetic, English, French, and German. One passed in Mathematics, three in Political Economy, two in drawing, and one in Music. Thirty-six ladies entered their names. Of these, eleven were either absent from the examination or failed to satisfy the examiners.

HERTFORD.—A strange case of obtaining money under false pretences has been before the magistrates in this town. One evening last week two strangers were found prowling about the passages and corridors of Hatfield House, and as they did not satisfy the inquiries of the servants, the police were sent for, and they were taken into custody. One of them, who was dressed like a gamekeeper, and who gave the name of George Burton, had endeavoured to obtain a garden-roller and a mowing-machine of a Hertford iron-monger, under the pretence that he was one of the Marquis of Salisbury's gamekeepers, and had been sent for the articles by his lordship's steward. The second man, who gave the name of Frederick James Moore, said that he was a London cab-driver, and had been induced by Burton to drive him down from London. When they were taken before the Hertford magistrates, the charge of being in Hatfield House for a felonious purpose was withdrawn, and Moore, who proved to be a London cabman, of respectable character, was discharged from custody. Burton was then charged with endeavouring to obtain a garden-roller and a mowing-machine of Messrs. Nunn, ironmongers, of Hertford, on false pretences. He was also charged with obtaining 5s. of an official on the Great Northern Railway at Barnet on the same evening, while he was on his way to Hatfield, on the pretence that he was one of Lord Salisbury's gamekeepers, and had had his pocket picked of 15s. The prisoner, who had nothing to say in his defence, was committed for trial on both charges.

HULL.—The Wesleyan Conference, which is now in session at Hull, elected on Thursday the President and Secretary of that body for the ensuing year. The votes for the President were as follows:—Luke Wiseman, 16, Dr. James 22, Thomas Vasey, 42; John Farrar, 87; Frederick J. Jobson, D.D., 120. For the Secretary the votes were:—Luke Wiseman, 14; Dr. James, 39, John Farrar, 208. The President then declared Dr. Jobson to be the President, and John Farrar the Secretary of the Conference for the year ensuing. Information has been received in this town of a fatal collision in the Baltic between two Hull steamers, the Niobe and the Clie. The former had her bows stove in, and the latter sank so suddenly, that out of a crew of 26 only six were saved.

ISLE OF MAN.—A domestic tragedy has just taken place in Douglas. In a low part of the town a car driver, named Stuart, resided with his wife and one child, aged five years. The family were wretchedly poor, and were obliged to sell their furniture piece by piece, even to the child's bed. The wife, who is said to have been of drunken habits, procured a shoemaker's knife, and cut the child's throat from ear to ear, almost severing the head from the body. She then rushed from her house to the beach and cut her own throat. She lies in the hospital, in an almost hopeless condition.

LINCOLN.—A farmer's son, named John Wigglesworth, has been committed for trial on a charge of shooting, with intent to murder, his mother-in-law, at Kirton Lindsey, on the 17th inst. The affair seems to have arisen out of family differences. The prosecutrix received five wounds, but none of them are considered dangerous.

LIVERPOOL.—During the past week the new church of St. Margaret, Princes Park Road, has been the scene of a series of disturbances. The church was consecrated on the 20th inst., and for eight days there have been services on the highest Ritualistic model twice a day, with sermons by the most eminent Ritualist clergymen. There have been numerous congregations, and large crowds assembled outside, hooting and yelling. On Friday night the preacher was the Rev. Mr. Bennett, of Frome, and his strictures on the Reformation, &c., caused quite a scene in the church, many rising and leaving the building, some of whom called out "No Popery!" One man was arrested for creating a disturbance, and fined 20s. and costs. On Sunday and Monday the preachers, including the Rev. Messrs.

Mackonochie and Stanton, carried out the ceremony to a little hooting from the outside, concluded on Tuesday.

NEWCASTLE-ON-TYNE.—On Monday Joseph Whitfield, cut throat, aged nine years. He had been and had latterly been subject to fits of religious excitement. His family; but he had usually kept up a constant use of that phrase. The returned a verdict of Willful Murder.

NEWMARKET.—In February a poaching affray took place on the Hall, at Weston Colville, near the brook, the head keeper, had the three off. Three men were engaged on the poachers, one of whom was sentenced to 15 years, the other to 15 months, and the third, called Casbah, until Sunday week, when it was determined was a member of the Metropolitan Police, independent Long of the Cambridge Kingsland station last week, and under a warrant dated in 1863, charged with attempt to murder. He was conveyed committed to the assizes for trial.

NEWPORT PAGNELL.—On Thursday a young man, named William Mobbs, Thomas Newbury, were at work in the occupation of Mr. Scott, farmer, of the evening the boy was found with his head being nearly severed from his body, place where the body was lying a frock were found and identified as Mobbs. The police upon going to the clothes which he wore on that evening with blood. He was taken before the Monday, and committed for trial.

OXFORD.—It is stated that the Viceroy of Egypt will commence a course the University, as a member of Christ October term. His Highness will during his three years of residence, and Wales in 1859. In a Convocation held honorary degree of Doctor in Civil Law Mr. Longfellow, the American poet. Not a very short notice, the Convocation nearly filled, a larger number of the University being present than could expected in the midst of the Long name of the poet was received with great

ST. ASAPH.—An important meeting laity was held in this city on Thursday best mode of increasing the efficacy of this diocese. Earl Powis presided, and present were Sir Watkin Wynne, Bishop of St. Asaph, the Dean of St. large number of clergy and laity. An executive committee, appointed by the read, containing a number of suggestions. The session on the suggestions occupied several meeting ultimately resolved that it was the importance of the subjects mentioned but that they were too momentous that meeting, and would be better discussed meeting in October. Much diversity of Church questions was expressed.

UXBRIDGE.—The sentence of death upon William Murray for the murder of Frederick has been commuted by the Home Secretary penal servitude for life, on the express of Lord Chief Justice Bovill, who tried the

VENTNOR.—The foundation-stone of the of buildings designed to form a part of hereafter known as "The National Centre for Consumption and Diseases of the Chest" on Wednesday in a beautifully situated Undercliff, about a mile west of Ventnor, Princess Louisa, acting as the representative. The Princess Louisa arrived from before 3 p.m., in an open landau, drawn by ponies, with postillions and outriders, and the Prince and Princess Christian, and by the President of the hospital. The Governor of the Isle of Wight, the medical general and reception committees, the district, &c., and conducted inside the cottage luncheon had been prepared. After inside the cottages, a procession was Royal Highness, entering the interior of a marquee which had been erected over the foundationstone, Viscount Eversley, presented from the authorities of the hospital. A been offered up by Bishop Ryan, on laid, and a salute of 21 guns, fired from battery on the cliffs below St. Lawrence ladies then advanced to the stone, and it their offerings of "purses" for the hospital. The choir then chanted a from Bishop Ryan followed, and the brought the proceedings to a close. The marquee her Royal Highness made an the interior of the hospital cottages and planted a tree in the ground in the day.

WIGAN.—It has been ascertained that were killed by the explosion at Haydock whom 50 have been brought to bank. Identification was impossible. It is believed explosion was greatly intensified by the large quantity of powder. The inquest Saturday, but did not go beyond the bodies, so that they might be buried.

choicest qualities. The number of Sheep is about the same as on Monday last; the demand is smaller, but prices are not much altered. Lambs are not selling so well as on Thursday. Choice Calves are rather dearer. Our foreign supply consists of 1922 Beasts, 8060 Sheep, 254 Calves, and 30 Pigs; from Scotland there are 7 Beasts; from Ireland, 80; from Norfolk and Suffolk, 50, and 1560 from the Midland and Home Counties.

		Pigs	4 0 — 5 6

THURSDAY, July 29

We have a larger supply of Beasts than on Thursday last; trade is, however, active, and Monday's quotations are freely given. There are not quite so many Sheep, but equal to the demand, and prices remain unaltered. There is more inquiry for choicest Lambs; on the average there is no improvement. Trade is heavy for Calves, and prices are lower. Our foreign supply consists of 257 Beasts, 4620 Sheep, and 460 Calves.

Best Scots, Herefords, &c.	5 2 to 5 4	Best Long-wools	4 10 to 5 2

Small Pork, 4s. 6d. to 5s. 4d.; Large Pork, 4s. 4d. to 4s. 8d. per 8 lb.	

MARK LANE.—MONDAY, July 26.

There was only a moderate supply of English Wheat to this morning's market, for which the reduction of 1s. to 2s. per qr. noted as required by buyers last week was in many instances acceded to. There was a moderate attendance, and the sales of foreign Wheat proceeded slowly at barely the prices of this day's night. Barley, Beans, and Peas were firm. Oats 6d. per qr. dearer. In Flour no alteration.

FRIDAY, July 30.

A few showers have fallen, but with this exception the weather has continued hot and forcing since the 23d inst. The growing crops are reported to progress favourably, and we hear that in some localities early fields of Barley, Oats, and Wheat have been cut, but ten days of fine dry weather will be required before harvest can be general in the counties south of the Humber. The arrivals into Liverpool only have continued large, exceeding 350,000 qrs. of Wheat for the past four weeks, mostly from America; in other ports, and in the agricultural markets of the kingdom, supplies were moderate. The trade has been slow, without leading to a quotable change in the value of Wheat. Spring corn of all descriptions has been a fair sale at former rates, any change in the value of fine Oats, of Beans, or Peas being in favour of sellers. Flour was neglected, and to force sales a reduction of 6d. per barrel and 1s. per sack had to be submitted to. Since Friday last 38 grain and seed-laden vessels have arrived off the coast, of which, with those left over from last week, there remained for sale last night 17 cargoes. The amount of business transacted in cargoes arrived off the coast has not been large, but the tone was steady; Wheat, Maize, and Barley maintained about previous rates. Of July and August shipment of hard Azow Wheat same purchases were made for Portugal, but buyers will not repeat prices paid at present. Rye was very little in demand, and its value remains nominal. Paris, July 29.—The supply of Wheat has continued small, and the demand very limited. Flour quiet but steady. The six marks are quoted at equal to 37s. 9d. per 250 lb. The stock at the Halle is estimated at 7080 cwt.

The arrivals of foreign Wheat and Flour this week have been large, of Oats fair, of other grain small. There was an unusually small attendance at this morning's market, and although we do not alter our quotations, sales were made with difficulty at Monday's prices. Spring Corn was firm, and Oats brought readily the advance of 6d. per qr. established on Wednesday.

			40,700 bbls.
44,270	2350	24,300	

LIVERPOOL, July 20.—We had a fair attendance at our market to-day, and in Wheat a fair consumptive business was done, at a decline of 1d. to 2d. per cental for inferior descriptions of red, white remaining without change. Flour was in slow request, and without quotable alterations from former currencies. Indian Corn steady. Peas very firm, and 1s. dearer. Beans in fair request, and 6d. dearer. Oatmeal, Barley, and Malt as previously quoted.

SEED MARKET.

There is but little passing just now in the agricultural seed trade. All varieties of Clover and Trefoil seeds are held with firmness; but in the absence of business prices remain unaltered. The recent welcome rains have brought a good demand for sowing Mustard and Rape-seed. Several parcels of new Essex dwarf Rape-seed have been sold on our market,

of which the quality has for the most part been very good. Canary seed is firm. Hemp seed we note 1s. per qr. dearer. New Trifolium has advanced 2s. to 3s. per cwt.; there appears to be a fair crop of English. With regard to French Italian Rye-grass, our advices state that the first crop will be of fine quality, but that in consequence of the long continued drought the second crop will, it is thought, be very deficient. French houses apparently expect much higher prices, for just now they seem to be unwilling sellers.

JOHN SHAW & SONS, 16, Water Lane.

DAIRYMAID (first-class).—A respectable middle-aged Woman, who has held similar situations under several Noble Families, and is well up in the profession. References of a high order.—DAIRYMAID, Messrs. Dickson & Sons, 106, Eastgate Street, Chester.

Saturday at the private residence of Mr. Gladstone, on Carlton House Terrace. Another Council was held yesterday.

PARLIAMENTARY MOVEMENTS.—In the House of Lords on Thursday, Earl Granville stated that Parliament would probably be prorogued on Wednesday or Thursday next at the latest. The Speaker of the House of Commons gave his customary dinner, before the prorogation of Parliament, on Wednesday evening, to the principal officers of the House of Commons. The election for Salisbury, vacant by the resignation of Mr. Hamilton, took place on Thursday, when Mr. Alfred Seymour, the Ministerial candidate, was returned by a majority of 13 over Mr. Granville Ryder, the Conservative candidate, the numbers being 562 to 549. Mr. Marsh, the second Liberal candidate, who was formerly member for the city for several years, only polled 82.

TRIALS OF ELECTION PETITIONS.—The Nottingham petition was abandoned on Friday, Mr. Serjeant Parry, on the part of Mr. Digby Seymour, stating that the petition had been presented under a strong belief that the employment of "lambs" was illegal, and that they had hoped to prove that a number of them were voters, but the evidence had shown that none of them were employed as "lambs," because they were known to be voters. They had also been unable to establish bribery, and though it was clear that persons had been intimidated, they had not come forward. It was then announced that Mr. Seely would not ask for costs. Baron Martin expressed his approval of the course adopted by both sides, and said that he should report to the House of Commons that Mr. Seely was duly elected. Mr. Justice Willes has ordered 500*l.* to be paid to Mr. Russell Gurney as his costs of the Southampton petition out of 1000*l.* deposit. The costs of the respondent to the Lynn petition, the Hon. R. Bourke, M.P., which will have to be paid by the petitioners, have been taxed at 107*l.* About 200*l.* was struck off.

THE ELECTION COMMISSIONS.—The Commissioners for inquiry into the Beverley election have fixed Tuesday the 24th inst. to commence the inquiry. The Commissioners are Mr. Serjeant O'Brien, Mr. T. J. Barstow, and Mr. Homersham Cox. The Bridgewater Commission will be opened on the 23d August. The Commissioners are Mr. E. P. Price, Q. C., Mr. Chisholm Anstey, and Mr. C. E. Coleridge.

CONSECRATION OF THE BISHOP OF MONTREAL.—The consecration of the Rev. Ashton Oxenden as Bishop of Montreal and Metropolitan of Canada, in the room of Bishop Fulford, took place on Sunday in Westminster Abbey. The Archbishop of Canterbury officiated, and was assisted by the Bishops of London, Rochester, Ely, Gibraltar, Columbia, and Labuan, Bishop Trower, and Bishop Smith, late of Hong Kong. The sermon was preached by the Rev. G. H. Sumner.

THE DEANERY OF DURHAM.—Mr. Gladstone has conferred the Deanery of Durham, vacant by the death of Dr. Waddington, on the Rev. W. C. Lake, formerly tutor of Balliol, and Fellow of Exeter College, Oxford, a preacher at the Chapel Royal, Whitehall, and a Prebendary of Wells. Mr. Lake was a distinguished pupil of Dr. Arnold, and was a member of the Duke of Newcastle's Education Commission.

ENDOWED SCHOOLS COMMISSION.—The Endowed Schools Bill having received the Royal assent on the 2d inst., a Royal warrant was issued on the 3d appointing Lord Lyttelton, Mr. A. Hobhouse, Q. C., and the Rev. Canon Robinson to be Commissioners, and Mr. H. J. Roby to be Secretary to the Commissioners. The Commissioners held their first meeting on Thursday.

THE DOG TAX.—The dog licences are now issued by the Post Office. In the first quarter of the present year 381,476 licences were issued by the Post Office in Great Britain, viz., 340,613 in England and Wales, and 40,863 in Scotland.

Foreign.

FRANCE.—The Senate assembled on Monday, when M. Rouher, the President, delivered a speech, in which he said that it had been convoked to examine important modifications of the Constitution of the Empire, which had been brought about by a fortunate understanding between the Government and the Legislative Body. No Sovereign had followed the movement of public opinion more faithfully than the Emperor, who had always considered power as being the property of the nation. A continual movement had been going on transforming an authoritative Empire into a Liberal Empire by the initiative of the Emperor himself, as was proved by the amnesty and the reforms of 1860, 1863, and 1867, the whole now terminating in a perfected equilibrium between the powers of the State, and a better distribution of their rights and privileges. The impatience and regrets recently manifested were both equally unjust. To wish that France should remain at a standstill while Liberal doctrines took possession of the whole of Europe, would be to disregard the necessary law of the influence of France throughout the world, and to weaken the sacred ties which united the Napoleonic dynasty to the French nation; but to glide with indifference down a decline which led to an abyss, would be to forget that France had a right to require from the Government absolute security against violent passions, mad wishes, and implacable hatred, for, in the words of Augustus, "The Empire is sufficiently popular to go hand and hand with liberty, and strong enough to preserve it from anarchy." The Senate would, therefore, approach the discussion of these constitutional reforms without experiencing a misplaced timidity, and, at the same time, without yielding to a thoughtless impulse; but with the firm intention of interpreting and consecrating the will of the country. The combined efforts of the Government and of the Senate would establish a more genuine harmony and a

more fruitful solidarity between the powers of the State and the institutions of the empire, and would give them renewed strength, lustre and popularity. A *Senatus Consultum* was then read, proposing the following reforms:—

"The initiative of making laws is to rest with the Emperor and the Legislative Body. The Ministers are to depend only on the Emperor, will deliberate in Council under the presidency of his Majesty, will be responsible, but may only be impeached by the Senate. They may be Senators or Deputies, and will have the right of being present at the sittings of either Assembly. The sittings of the Senate will be public. The Senate will make its own Parliamentary regulations, may indicate any modification of which it may consider a law susceptible, and decide that such law be sent back for reconsideration by the Legislative Body, and may oppose the promulgation of a law by the adoption of a resolution to that effect, accompanied by a declaration of motives. The Legislative Body will make its own standing orders, and will appoint a President, its President, Vice-President, and Secretaries. The Senate and Legislative Body will have the right of 'interpreting' the Government, and may adopt orders of the day with preamble. Such orders of the day must be referred to the Emperor if required by the Government. No contract can be discussed until it has been referred to the Emperor and admitted to the Government. If the Government accepts it the Legislative Body will then distinctively pronounce upon it. The budget of expenditure will be voted by chapter. All modifications which may henceforth be made in the Customs tariffs in the international treaties will only become obligatory on receiving the sanction of law. An Imperial decree will be issued settling the relations between the Senate and the Legislative Body, between the Council of State and the Emperor, and between the members of the Council of State."

The committee appointed to examine the *Senatus Consultum* is composed of MM. Devrenne, Delangle, Boudet, De Maupas, Viscount de Lagueronniere, Bouchard, Lacaze, Behic, De Casabianca, and Suin. It is asserted that an Imperial decree, granting an amnesty to political offenders, will be issued on the promulgation of the *Senatus Consultum*. The rumour that the Empress intends during her visit to the East to support the demands of the Roman Catholics with regard to the Holy Sepulchre is formally contradicted. That question having been settled by an international convention, there is no intention whatever of again broaching the matter. The trial of M. Taillefer, cashier of the Union Assurance Company, on the charge of having embezzled nearly 1,500,000 francs, and of M. Pic, chief Editor of the *Etendard*, on the charge of having received part of that money, well knowing it to have been stolen, terminated on Saturday in a verdict of Guilty. M. Taillefer was sentenced to seven years' penal servitude, and M. Pic to 12 years' hard labour. M. Laferriere, one of the Editors of the *Rappel*, has been sentenced for attacks against the prefect of police to one month's imprisonment, and a fine of 200 francs. The Court of Appeal on Saturday quashed a judgment of the Tribunal of Correctional Police, acquitting the *Rappel*, for publishing false news, and sentenced M. Barbieux, the manager, and M. Lokroy, one of the Editors, to a month's imprisonment, and a fine of 500 francs each. A duel took place on Thursday between M. Paul de Cassagnac and M. Gustave Flourens, in which the latter was wounded three times, the last wound he received being a very serious one.

SPAIN.—It has been currently rumoured this week that Mr. Forbes, an eminent merchant of Boston, who is at present at Madrid, had been empowered to make overtures for the recognition of the independence of Cuba. The terms were said to be that Spain should recognize the independence of Cuba, and receive from the new Government 100 millions of dollars (20,000,000*l.*) in bonds to be secured on the revenues of the island and guaranteed by the United States. As, however, the island yields 2,000,000*l.* sterling per annum to Spain, the amount offered would only amount to 10 years' purchase; it was, therefore, considered very doubtful whether the proposal would be entertained. The rumour has since been categorically denied. General Izquierdo, Captain-General of Madrid, has addressed a long communication to the Regent and General Prim, in which he says:—

"I took part in the revolution of September in the hope of seeing morality, law, and justice succeed to the former abuses. The revolution has now been accomplished since 10 months, but my hopes have been deceived, and great abuses, extensive immorality, and deplorable anarchy prevail—disorders to which it is absolutely necessary to put an end. The Constitution having proclaimed the Monarchy, it is indispensably requisite that a Sovereign should be chosen without loss of time. If the Government does not shortly consider the question, I shall abandon all illusion as to the consolidation of the revolution and shall definitively retire into private life."

This communication was read on Saturday at the Council of Ministers, and created a deep impression. The *Official Gazette* of Sunday publishes a circular of Senor Silvela to the diplomatic representatives abroad, in which the Minister says that the moment has now arrived for completely renewing diplomatic relations with foreign Powers. The Carlists, commanded by Brigadier General Sabareigos, have reached the mountains of Toledo, pursued by the Government troops. Carlist bands have also appeared in Pontevedra and Leon. Toledo and Avila have pronounced in favour of Don Carlos, and several arrests have been made in Navarre. Two Carlist leaders were shot on Tuesday at Ciudad Real, by order of a court-martial. After their execution the band to which they belonged petitioned the Government for an amnesty. The Carlist bands are successively dispersing throughout the country. In consequence of some recent acts of violence on the part of the commander of the Volunteers of Madrid, the *Siglo*, and several other journals of moderate politics, have ceased to appear.

PORTUGAL.—The corvette *Stephanie* sailed from Bordeaux yesterday, to bring back the Queen to Portugal, her health being worse. In the sitting of the Cortes on Saturday the Marquis Sa da Bandeira, President of the Council of Ministers, announced that the Minister of Finance and the Minister of Justice

had resigned. The Chambers have authorized the Government to grant concessions for the construction of submarine telegraph lines from the coast of Norway. The inhabitants of the coast of Norwegian Lapland have received to hold an exhibition of all the industrial productions of Finland. SWITZERLAND.—The Swiss National Council, after a long discussion, has approved, without any measures taken for removing Mazzini from the country, of the good understanding existing between Switzerland and Italy.

SAXONY.—A fearful accident, caused by weather, occurred on Monday in the Burg on the valley called the Plauenscher Grund, near Chemnitz. According to inquiries made by Government, the total number of colliers killed by the accident was 289.

POLAND.—The judicial Commission appointed to investigate the case of the imprisoned nun of the convent in company with an escort of soldiers, in passing through the refectory they discovered a secret chamber containing a whole collection of mediæval instruments of torture. Amongst these were two huge crosses weighing 80*lb.* each, which the guilty nuns had to wear on their backs, and a chest, and a number of "crowns of thorns" and sharp iron nails. There were also several iron fetters worn next the skin by penitents, and a knout for flogging the refractory. The Commission next proceeded to the chapel, and found in the four coffins containing the bodies of four nuns. The corpses were well preserved, and could be seen through the upper surface of the coffins, which were of glass. The inquiry lasted all day, but nothing worth noticing was discovered.

AUSTRIA.—The recent speech of Count Beust, Foreign Committee of the Hungarian Diet, respecting the relations with North Germany, and despatches lately published in the Red Book, have given counter-statements at Berlin and Dresden. It is said that there is no foundation for the report that Count Beust has issued a circular to the diplomatic representatives of Austria abroad, explaining the position of Austria, and reiterating that the Cabinet of Vienna requires itself complete freedom of action. It is said that diplomatic correspondence whatever exists between Austria and the Delegation, is the subject of Count Beust's statements. The Budget of the Reichsrath Delegation discussed by the members of the Ministry of War on Wednesday. The proposed expenditure for the construction of two ships of war for the Danube, and for other war material, were also the estimates for some guns, and other war material. During the debate Count Beust said it was hazardous to promise the maintenance of peace for any considerable length of time. He was of opinion that, if no war broke out in the next four years, the preservation of peace in Europe for a long period might be looked upon as certain.

HUNGARY.—The wife of Prince Karoly, having petitioned the King of Hungary for pardon to her husband, his Majesty, acting on the advice of the Hungarian Ministry, has granted this act of grace, and has ordered the case to be tried by the ordinary tribunals of the country.

MALTA.—An extraordinary accident is reported from Malta. Some officers of the garrison thinking to please the inhabitants of the island on the occasion of great festivals, that of the Madonna of Mount Carmel, added to the illuminations provided by the Catholic authorities by fixing a number of shells to the stores, which were always understood to be for the purpose of lighting up the port in the event of a night attack. The pieces were pear-shaped shells, 2 feet in length, but as soon as they were fired they delivered a storm of grapeshot. Fortunately, there were crowds of spectators, little harm was done. The officers, seeing the mistake they had made, threw forward at the risk of annihilation, and threw the shells into the sea, when they exploded with water with a tremendous noise.

ITALY.—An English iron-clad squadron of vessels arrived at Naples on Sunday. During a religious festival in the cathedral of Trani last week, a large quantity of wood, covered with gauze and lighted by thousands of tapers, which had been erected in the centre of the nave caught fire. A general rush of doors was made, and in the confusion a number of women, and children were thrown down and injured, sixteen of whom were killed, and many seriously injured. The fire eventually was extinguished.

TURKEY.—The *Levant Herald* states that the de-camp of the Grand Vizier was to start for Egypt Tuesday with a letter to the Viceroy, enumerating the grievances of the Porte against the latter, including that, in case no satisfactory explanation given, the Porte will consider itself free to withdraw the privileges granted in the firman of 1861. Hobart Pasha left for England on Tuesday on diplomatic business. The French Ambassador Pacha, who had been appointed Minister of Public Instruction of the Viceroy of Egypt, and Halil Pasha were for Tanta, intending to proceed thence to Ismailia. The hereditary Prince Mechmed Pacha, has been appointed Minister of the Interior with Baghib Pacha as councillor *ad interim*. Mehmed Pacha has been appointed Minister of Public Instruction, Cherif Pacha, Minister of Foreign Affairs, and Hilar Pacha Governor of Alexandria.

CAPE OF GOOD HOPE.—The Cape Mail arrived yesterday, with news from Cape Town to the effect

ment, and it was ultimately withdrawn. Mr. LAMBERT moved a resolution calling on the House to take steps gradually to reduce the National Debt. The CHANCELLOR of the EXCHEQUER, in reply, said that the resolution only affirmed a policy on which Parliament had long been acting, in proof of which he mentioned that between 1859 and 1869 the National Debt had been reduced from 832,813,000*l.* to 795,000,000*l.*, or at the rate of about 3,782,000*l.* a year. The motion was withdrawn. After some conversation on the conduct of the Metropolitan police in a recent case of excess of duty, the House went into Committee on the Parochial Schools (Scotland) Bill, commencing at the 24th clause, with 250 amendments on the paper. After more than two hours had been consumed in a preliminary discussion whether the Bill should be dropped or not, Mr. ELLICE moved that the Chairman should leave the chair. On a division the motion was negatived by 93 to 63. Lord ELCHO then moved that the Chairman report progress. On a division the motion was negatived by 102 to 24. After a third motion by Mr. KNIGHT to the same effect had been rejected by 100 to 24, the Government yielded to a fourth, and at 3.25 consented to progress being reported without the Bill being forwarded a single line. On Wednesday the CHANCELLOR of the EXCHEQUER, in answer to Sir G. JENKINSON, declined to pledge the Government to bring in a measure for dealing with the Malt Tax next year. On the contrary, he hinted that the remission of the tax would, in his view, benefit the landlord interest exclusively, and afford no relief whatever to the agricultural community. Mr. BRUCE moved that the House should go into Committee on the Habitual Criminals Bill, which had come down from the House of Lords. Sir C. ADDELEY, Mr. NEWDFGATE, Mr. HENLEY, and Mr. HADFIELD, opposed the Bill; Mr. G. HARDY and Sir G. JENKINSON supported it. The Bill, except the schedules, then passed through Committee with numerous amendments, the most important of which was the omission from clause 10 of the words, "making seven years' penal servitude an imperative sentence on a third conviction for felony." The Appropriation Bill was read a third time and passed, and several other Bills were forwarded a stage. The Real Estate Intestacy Bill and the Marriage with a Deceased Wife's Sister Bill were withdrawn. On Thursday, in answer to Mr. M'LAREN, Mr. GLADSTONE stated that the Government would make inquiries during the recess, with a view to the appointment of a Parliamentary official to conduct Scotch business in the House of Commons. Mr. WATKIN WILLIAMS gave notice that next session he would move a resolution for the disestablishment of the Church in Wales and the application of her revenues to undenominational education. On the motion for going into committee on the Bishops' Resignation Bill, Mr. GLADSTONE explained that its object was to meet a want long felt by providing episcopal supervision in the event of bishops being permanently incapacitated by old age or mental or physical infirmity. In the event of a prelate resigning on account of these disqualifications, he would be entitled either to 2000*l.* per annum, or to one-third of the income attached to the see, and possibly to the episcopal residence. It also provided for the appointment of coadjutor bishops, with the right of succession, whose remuneration should be paid out of the balance of the salary attached to the see. The Bill, as suggested by Mr. HENLEY, would be limited to two years. Mr. HADFIELD moved, as an amendment, that the Committee on the Bill be postponed for three months, contending that the time was rapidly arriving when bishops would be classed among the useless superfluities of the past, and that their presence in the House of Lords was antagonistic to the interests of the public. Mr. D. DALRYMPLE seconded the amendment, which was supported by Mr. DICKINSON, Mr. BOUVERIE, and Mr. KINNAIRD, and opposed by Mr. MOWBRAY, Mr. ACLAND, Mr. BOWRING, and Mr. M'LAREN. On a division, the amendment was negatived by 112 to 26. The Bill then passed through Committee. Mr. STANSFELD moved the second reading of the Canada (Rupert's Land) Loan Bill, the object of which was to guarantee the loan to be raised by the Canadian Government for the purchase of the Hudson's Bay territory. Mr. MONE moved as an amendment that the Bill be read a second time that day month. The amendment was seconded by Sir C. W. DILKE, who invited the Prime Minister to declare the views of the Government on the subject of colonial guarantees. Mr. GLADSTONE vindicated the transaction both on the grounds of good faith and policy, and said that it was entirely on British considerations that the Bill had been submitted. Mr. CARDWELL, at greater length, explained how the pledge had been given to the Canadian Government in 1866, and urged that it was part of a great act of Imperial policy, from which this country profited as much as Canada. After some remarks from Colonel SYKES, the amendment was negatived by 65 to 10, and the Bill was read a second time. On the third reading of the Metropolitan Board of Works (Loans) Bill, Mr. M'CULLAGH TORRENS renewed his attempt to limit the power of the Board of Works to sell lands acquired for the purpose of parks; but, meeting with no encouragement, he did not go to a division. The Bill was then read a third time and passed. The adjourned debate on the Indian Budget was then resumed by Mr. J. B. SMITH, who pressed on the Indian Government the importance of irrigation works and cotton cultivation. After some remarks by Mr. BAZLEY, Mr. PLATT, Mr. C. DENISON, Sir D. WRDDEBURN, and Mr. KINNAIRD, the usual resolutions declaratory of Indian accounts for the year 1867-68 were agreed to. The Government of India Act Amendment Bill, and the Governor-General of India Bill, passed through Committee. The remaining clauses in the Habitual Criminals Bill were disposed

of in a Committee, and several other Bills were advanced a stage. Yesterday the House again went into committee on the Parochial Schools (Scotland) Bill. On clause 24, Lord ELCHO moved that the chairman do leave the chair. Mr. DISRAELI said it was the duty of every member to support the Ministry in winding up the session, but the House ought not to be called upon to consider what was really a new Bill, after the Appropriation Bill had been introduced. The LORD ADVOCATE defended the Government, and after some remarks by Mr. BRIGHT and others, Lord Elcho's motion was negatived on a division by 99 to 27. The Bill was then proceeded with, and clauses 21 to 45 were passed with several alterations. The House was left sitting.

City Intelligence.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 92½ to 92¾ for Money, and 92¼ to 93 or Account; New and Reduced Three per Cents., 92½ to 93; Bank Stock, 243 to 245; Exchequer Bills, 3s. to 7s. pm. for March, and 5s. to 10s. pm. for June; India Five per Cents., 111½ to 112.—**FOREIGN:** Spanish, 29; Egyptian (1864), 91 to 92; Ditto (1868), 96½ to 97; Viceroy Seven per Cents., 80½ to 80¾; Ditto Nine per Cents., 97½ to 97¾; Turkish Five per Cents., 43½ to 44½; Ditto Six per Cents., 66 to 66½; Argentine, 79½ to 80; Peruvian, 78½ to 79½; Honduras, 83 to 84; Portuguese, 33½ to 34; Brazilian, 84½ to 85½; United States 5-20 Bonds, 83 to 83½; Erie, 20; Illinois, 94½ to 94¾.

Metropolis and its Vicinity.

ACCIDENT TO SIR AUGUSTUS CLIFFORD.—On Sunday evening as Sir Augustus Clifford was proceeding along the passage at the foot of the staircase leading from the House of Lords to the river front, his foot accidentally caught, and he fell heavily on the stone flooring, breaking his kneecap. He was immediately removed to his residence by the Victoria Tower, and surgical assistance was promptly at hand. He is going on as favourably as can be expected under the care of Mr. Prescott Hewett and Dr. Way, but as he is in his 82d year, much anxiety is felt respecting him, and from the nature of the accident some weeks will elapse before he will be able to walk.

THE CHANNEL PASSAGE BETWEEN ENGLAND AND FRANCE.—The report of Captain Tyler to the Board of Trade, on the improvement of the means of communication between England and France, has been published. It says that the steam packet service between England and France, which is in fact a service between Great Britain on the one hand and Europe and the East generally, on the other, is much in need of improvement. There are now, exclusive of the routes by Ostend and Antwerp, 310,000 passengers a year to be provided for, of whom 142,000 travel by Calais as the mail route; and those numbers are capable of great augmentation on greater facilities and increased comfort being afforded. The existing steamers, restricted as to their dimensions for want of better pier and harbour accommodation, are not proportionate to the importance of the service, but the existing harbours at Dover and Boulogne might, with certain modifications, be made available for vessels of larger size and improved construction at a cost of 100,000*l.* at Dover, and 500,000*l.* at Boulogne, if the two Governments are not prepared to adopt the more extensive project of Mr. Fowler, for constructing, at a cost of two millions of money, special harbours for special steamers. It concludes by saying that the immediate object should be to provide an improved fixed service, irrespective of wind and tide, between London and Paris in eight hours; and that the French Government should be invited to concur in the appointment of an international commission to consider the question.

THE VOLUNTEER ARTILLERY AT SHOEBURYNES.—The annual meeting of the National Volunteer Artillery Association commenced on Monday at Shoeburyness. The competitive trials began on Tuesday, and some excellent practice was made. The winners were verified yesterday morning as follows:—Queen's Prize, 7th West York; Lords' and Commons' Prize, 2d West York; Prince of Wales' Prize, 2d Cinque Ports (Sandwich).

PAYMENT OF DIVIDENDS AT THE BANK.—A correspondence has taken place between the Chancellor of the Exchequer and the Governors of the Bank of England on the expediency of transmitting by post the warrants for the dividends on the Government funds, the result of which is that the Bank has agreed to make arrangements to furnish this facility to all holders of stock who may signify their desire for it.

THE NEW LAW COURTS.—The majority by which the Select Committee appointed to consider the site of the New Law Courts reported on Friday in favour of the Carey Street site was 9 to 7. The real majority against the Government proposal, however, was only one, as Lord Stanley, the Chairman of the Committee, did not vote.

SITE OF NEWGATE MARKET.—Mr. Horace Jones, the City architect, on behalf of the Markets Improvements Committee of the City Corporation, has submitted to the Metropolitan Board of Works a plan for utilising the site of old Newgate Market. It is proposed to form streets on the site of the market by the erection of four blocks of buildings, divided by cross streets, one of 20 and the other of 30 feet in width, and surrounded by a narrow passage. The Building Act Committee, considering that by the plan proposed an improvement will be effected, recommended that the plan be approved, and the Board, under the circumstances, set aside their standing orders as to the width of new streets being of 40 feet, and sanctioned the plan.

NEW DRINKING FOUNTAIN IN REGENT'S PARK.—On Monday the Princess Mary of Teck, formally inaugurated a new drinking fountain erected in the

broad walk of the Regent's Park, at the residence of Mr. Cowasjee Johangheer Ready-Money Parsee gentleman. The fountain, which is 10 feet high, and the founts into which the water is reached by rows of octagonal steps. The Princess Mary of Teck, who was accompanied by Mr. W. Cowper opened the proceedings by an address on behalf of the President and the Metropolitan Drinking Fountain and Cessage Association, requesting her Royal Highness, as the Queen, to accept all right and proper honours and distinctions which might be conferred on the public by a member of one of the most distinguished Parsee families of landed proprietors in the country for the protection which he and his countrymen had enjoyed under British rule. At the conclusion of the address the Princess Kinnaird, M.P., requested the Princess Mary to accept an Indian goblet from the Association on the occasion. The Princess having accepted the address read to her, advanced to the fountain, and filled the water, her Royal Highness said, "I think it good." The Princess then said, in a voice which was heard by all those who accompanied her, "I declare this fountain open." The Princess then inspected the details of the structure, and then took the band of the Queen's Westminsters National Anthem. The public were then invited to approach the fountain, and for some time a stormy contest was sustained regarding the precedence.

DECIMAL COINAGE AND THE METRIC SYSTEM.—The second report of the Standards Commission published yesterday. It states that in the opinion of the Commissioners the time has now come when the law should provide, and facilities be granted by the Government, for the introduction and use of metric weights and measures in the United Kingdom. For this object metric standards, accurately related to the primary metric standards at Paris, deposited in the Standards Department of the Board of Trade, should be legalised; and verified copies of official metric standards should be provided for the authorities for inspectors of such districts as require them. The Commissioners think that the nomenclature, as well as decimal scale of the metric system, should be introduced in this country. The general introduction of the metric system should be permissive only, and not made compulsory after any period to be now specified, so far as the use of metric weights and measures for weighing and measuring goods for sale or conveyance. During that during the concurrent use of the metric and imperial systems, it will be expedient to prevent, as far as possible, imperial and metric weights and measures from being accidentally or fraudulently substituted for each other, the Commissioners are of opinion that authoritative regulations should be established, which each series may be readily and easily distinguished, by the adoption of conspicuous forms or marks for the several weights and measures, and by such other mode as may be determined upon after due inquiry. They think it expedient that customs duties should be levied by metric weight and measure, as by imperial weight and measure. That the use of the metric system, concurrently with the imperial system, should be adopted by other public departments, especially the Post Office, and in the publication of the principal results of the statistics of the Board of Trade, as well as for the admeasurement and certification of the tonnage of shipping. As to the introduction of the metric system, the Commissioners say that, even if the difficulties of establishing an international unit of coinage are at present overcome, yet the decimal system of coinage, which is in the power of the Government, would be very useful to the public.

FREE LIBRARIES.—The Hon. Auberon Herbert, who contested Berkshire in the Liberal interest at the last election, has addressed a letter to the proprietors of newspapers, stating that as all the expenses incurred by the Liberal side at the last election were defrayed by Mr. Walter, who cannot be persuaded to accept of the sum as Mr. Herbert's share of the costs, Mr. Herbert proposes to devote that sum to the establishment of free libraries in Berkshire. To Reading, as the largest town in Berkshire, he offers 250*l.*, and 150*l.* to each of the five towns (including Oxford) which are the largest in Berkshire, to comply with the condition that an amount of 1000*l.* that received should be raised by each town. If the plan being done, Sir G. Young, Mr. J. Hibbert, Mr. Eyre, and Mr. G. Palmer, who have conspired to prevent Mr. Herbert, will pay over the amount intended, on being satisfied that the object intended is fairly carried out. Should any doubt or difficulty arise on any point, the decision of those gentlemen to the course to be pursued will be final. Should any part of the 1000*l.* be unclaimed at the end of six months, it will be dealt with as may seem best under the circumstances.

EPPING FOREST.—On Monday a meeting of the inhabitants of Epping Forest, appointed by a public meeting of the inhabitants of the Mile End Old Town, waited upon the Chancellor of the Exchequer to call his attention to the encroachments on Epping Forest, and urge the Government to take prompt measures to preserve the forest from further encroachments. Mr. Samuda, M.P., introduced a deputation, which included Mr. A. Johnston, M.P., Mr. Reed, M.P., Mr. J. Holms, M.P., Mr. G. Palmer, M.P., Mr. E. R. Cook, and several other gentlemen. Mr. Lowe, in reply, admitted the importance of securing places of recreation for the people, and said that the ground of justice and right dealing for the Government would not be fair for him as a Minister of the Crown to advise the Crown to enforce, for another

rights which had been given specially to the chasing of deer. If the copyholders' rights were re-vested upon by the lord of the manor they were re-vested at law, it was not the business of the courts to interfere and protect them; the Courts were to protect them, and they could protect themselves. The purpose of assisting the people he would not be a small sum of money, but he did grudge the Crown, and he could not therefore name these old forestal rights. It seemed the height of tyranny and oppression to revive these old rights in force in order to prevent the lord of the manor from exercising such control as they pleased over this property when the reason for which those rights were granted had ceased. The Rev. Mr. Hansard said that the rights of the manor and others who enclosed this land were just as obsolete as the rights of the Crown. He said that they were not obsolete, though it would be inconvenient. He would, however, answer the question they had brought forward.

THE GUILDHALL.—Sir Moses Montefiore has been allowed to place in the Guildhall a handsome stained-glass window; and at the last meeting of the Court of Common Council the gift was accepted with thanks, and the necessary arrangements for its reception were ordered to be made. The window nearly complete the internal decoration of the Guildhall, and will be placed here about the same time as the large west window, erected by the Corporation in memory of the Prince Consort, and the side window of Alderman Salomons. The stained-glass window now in the great hall were contributed respectively by the Lancashire operatives in commemoration of the liberality of the citizens at the time of the famine, by Alderman Wilson, the senior member of the Court of Aldermen; Mr. Cornelius Lea, Prime Warden of the Goldsmiths' Company; the Weavers' Company, the Saddlers' Company, and Alderman Stone.

DEMOLITION OF CITY CHURCHES.—Two churches in the city of London are to be demolished, and partly to be re-established and disendowed. One is the church of St. Mildred, in the Poultry, where there has been a congregation of more than two or three for many years past, and the other the church of Allhallows Staining, which has not had a vicar during the last three or four years. Both these churches are now to be taken down under the Union of Benefices Act, and to be merged into adjacent parishes. It is not yet generally announced what arrangements will be made in connection with St. Mildred's, Poultry, but the conditions on which Allhallows Staining is to be demolished, are that out of its large revenues three new churches are to be built within six miles of St. Paul's. It was one of the conditions that a new church at Shaper should be built out of the funds realized at the demolition of St. Benet's, Gracechurch Street, the church has yet been heard of in Stepney.

THE WRITWORTH SCHOLARSHIPS AND EXHIBITIONS.—The competition for the practical work for the scholarships of 100l. each, will be conducted by Colonel Reib, R.E., Mr. Manby, secretary of the Institution of Civil Engineers, and Mr. Marshall, secretary of the Institution of Mechanical Engineers. In addition to these scholarships tenable for the present year, Mr. Whitworth has just offered to the Science and Art Department 60 exhibitions of the value of 25l. each, to be awarded to students in the universities, colleges, schools, public and private, in the United Kingdom. These exhibitions are to be held for one year, and the candidates must show an aptitude for mathematics, natural science, and drawing.

THE BERMUDA DOCK.—A telegram has been received from the Admiralty from Admiral Sir Rodney Mundy at Bermuda, stating that the Bermuda Dock arrived safely on the 28th July. The absence of dock accommodation at Bermuda has long been felt, and the war on the North American and West Indian stations can now be overhauled and repaired at Bermuda instead of being sent home for those purposes.

DISCOVERY OF A ROMAN TOMB IN THE CITY.—Mr. Bert, a surveyor in the City, wrote to the *Times* yesterday, stating that in pulling down some houses in St. Dunstons Lane, a Roman tomb of brickwork has been discovered underneath the foundations. On opening the tomb was found, with a lamp at the feet and a hoard of gold coins at the head. He adds that there was a stone on the tomb, which was deciphered as B.C. 407.

YACHTING-CLASS EXCURSION.—The Earl and Countess of Portsmouth have invited the members of the metropolitan working men's clubs to make an excursion to Hurstbourne Park, in Hampshire, on Monday, the 16th inst.

THE LAUNDRY COMPANY.—The prospectus has been issued of the Family Laundry Company, with a capital of 500,000l., in 250,000 shares of 2l. each, fully paid up, of which only 50,000 are to be issued in the first instance, the other shares to be issued as branch establishments are opened. The company propose to devote the public with laundry and bleaching grounds, in various districts round the metropolis, at the sea-side and other places. They state that in many of the seeds of disease are carried into the homes of families in the washing-basket, many of the present laundresses having no means of washing the clothes, especially in wet weather, in their own apartments, which are situated in districts favourable to the encouragement of disease. The company also guarantee that the washing shall be done entirely by efficient labour, and that no chemicals shall be used which, though giving a brilliant appearance to the articles washed, only tend to destroy the material. The list of directors is, to a considerable extent, composed of medical men. The promoters intimate that the laundry bills of the

private families in the metropolis alone amount to no less than 1,581,950l. per annum, irrespective of the outlying parts, and that holders of 10 shares are to be allowed a discount of 5 per cent. on their laundry bills.

ST PANCRAS WORKHOUSE.—On Monday, at the meeting of the St. Pancras guardians the official letter of the Poor-law Board was read ordering the removal of Mr. Blake's suspension, and his resumption of his duties as master of the workhouse, and forbidding the guardians to suspend any other officer during the remainder of their term of office. A stormy debate followed, in which Mr. Goschen was compared to Oliver Cromwell, and it was announced that since they could not "suspend" any offending officer they would go farther next time and "dismiss" him. Eventually a solemn motion was carried, that the letter of the Poor-law Board and Mr. Goschen's order accompanying it, "do lie upon the table."

THE DETECTIVE POLICE.—The Commissioners of Police have appointed 20 sergeants and 160 constables as a divisional detective police, whose duty it will be to make themselves acquainted with all the criminals in their districts, and their associates, habits, and residences. They will also be employed, under the orders of their superintendents, in tracing crimes committed in the division, and generally in the detection of offences which the police have been unable to prevent. The sergeants are to receive a weekly allowance of 35s. each, and the constables 25s., with an allowance of 5l. to each man in lieu of uniform.

FATAL ACCIDENT TO A CLERGYMAN ON THE ALPS.—The Rev. Julius M. Elliott, of Brighton, was killed by a fall from the Schreckhorn on the 27th ult. He was travelling in Switzerland with the Rev. P. W. Phipps, with the object of ascending several mountains together, and were accompanied by Franz Biner, of Zermatt, Mr. Elliott's guide for the last four years, and by Joseph Lauber, of Zermatt, as porter. On Monday afternoon, the 26th July, they left Grindelwald to sleep at the cave under the Kastenstein, taking with them Peter Baumann, of Grindelwald, as an additional porter. On Tuesday morning they commenced to ascend the Schreckhorn, and the first half of the ascent was effected with comparative ease. As the rocks became more difficult, Mr. Phipps and Baumann put on their ropes. Mr. Elliott, however, declined to put on his, as he thought it was unnecessary. He ascended very rapidly, and went on some distance in advance with his two guides. When Mr. Phipps and Baumann reached the Col at the top, Mr. Elliott, with Biner and Lauber, were just leaving the snow about half way up the final peak, and were cutting the last steps to reach the rocks of the summit. They were in great spirits at their success, and the two parties shouted in congratulation one to another. At this moment, in springing from the snow to the rocks, Mr. Elliott slipped and fell. Lauber was on the rocks, but not firmly placed, and could render no assistance. Biner caught him by the arm for the instant, but failed to hold him, and being unroped Mr. Elliott glided rapidly down the steep snow slopes of the north-east face of the mountain, rolling occasionally over until he disappeared from their sight 1000 feet below, near the Lauter-aar glacier. Ten guides, under the direction of Peter Michel, were sent off to discover the body, which they found on the Lauter-aar glacier on the 28th, and took back to Grindelwald on the next day by the Grimsel and Strahleck.

THE BETTING HOUSES PROSECUTIONS.—On Monday the prosecution of Mr. Wright, of York Street, the well-known betting agent and proprietor of "Wright's Racing Telegrams," was brought to a close, so far as the police magistrates are concerned. Sir Thomas Henry inflicted a fine of 100l., and settled a case for the decision of the superior courts.

ARSON IN THE BOROUGH.—On Monday a serious charge of arson was preferred at the Southwark police-court against a publican named Cusack, landlord of the Dolphin, Red Cross Street, Borough. An alarm of fire was given, but before the brigade and engines arrived the flames had burst through the roof, and were raging in every room. Their progress, however, was arrested in time to leave distinct evidence of the premises having been fired in 14 different places. In each of the parlours the furniture had been piled in a heap, and paraffin poured over it, and there were traces in every direction of the same liquid having been used. The prisoner made no defence, and was remanded.

THE PUBLIC HEALTH.—The Weekly Return of the Registrar-General states that in the week that ended on Saturday, July 31, 4313 births and 3453 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 23 per 1000 persons living, being 27 per 1000 in London, 21 in Edinburgh, 20 in Dublin, 21 in Bristol, 22 in Birmingham, 36 in Liverpool, 37 in Manchester, 27 in Salford, 25 in Sheffield, 26 in Bradford, 30 in Leeds, 17 in Hull, 26 in Newcastle-upon-Tyne, and 32 in Glasgow. The annual rate in Paris in the week ending Saturday the 31st ult., was 22 per 1000; in Berlin, during the seven days ending the 29th ult., 38 per 1000. In London the births of 1066 boys and 1076 girls, in all 2142 children, were registered in the week. In the corresponding weeks of 10 years, 1859-68, the average number, corrected for increase of population, was 2101. The deaths registered in London during the week were 1646. It was the 30th week of the year, and the average number of deaths for that week, corrected for increase of population, was 1654. The present return is therefore 8 below the estimated amount.

Provincial.

BIRMINGHAM.—Mr. Josiah Mason, a Birmingham manufacturer, who has amassed a large fortune during a successful career in this town, has just made over to trustees a magnificent building at Erdington, near

Sutton Coldfield, to be used as an orphanage for 300 children. The structure itself, which is situated in extensive pleasure grounds, cost 60,000l., and the endowment, consisting of landed estates in and around Birmingham, yearly increasing in value, is estimated at 200,000l. The total value of this princely donation is thus 260,000l. A set of almshouses for 26 women is employed along with the orphanage.

BRISTOL.—Mr. Lamb, the Bristol merchant, whose recent forcible removal from Rotterdam, under police and bankruptcy warrants, is considered to be a breach of international law, was charged before the borough magistrates on Wednesday with embezzling 945l., belonging to the partnership of Morris & Lamb. When the case was called on the prosecution was abandoned on account of the difficulty of obtaining evidence, and the prisoner discharged. He was then taken before Mr. Commissioner Hill, at the District Court of Bankruptcy, by whom he was committed on the 1st ult. for refusing to sign the statutory declaration as a bankrupt, or to answer any questions. The bankrupt now surrendered, and, on the application of his counsel, concurred in by the counsel for the assignees, he was discharged from custody, and protection granted till the 16th September.

BURY ST EDMUND'S.—The annual meeting of the Royal Archaeological Institute was held in this town last week, under the presidency of the Marquis of Bristol. During the meeting excursions were made to several interesting churches, mansions, and towns in the district, and numerous objects of historical and antiquarian interest were exhibited by the Mayor and Corporation of Bury, the Marquis of Bristol, the Mayor of Ipswich, Lady Cullum, and others.

DEVONPORT.—On Saturday Arthur Skullen, a corporal of the 57th Regiment, was shot in Raglan Barracks, by William Taylor, a private in the same regiment. Taylor was one of the defaulters of the morning, and had been drilled by deceased. During the drill the deceased discovered that, instead of being in marching order, the man had his knapsack empty, and reported this delinquency to the sergeant-major. Taylor, on falling out from parade, secreted a charge, loaded his Snider rifle and shot deceased through the head, killing him instantly. Taylor, after committing the murder, attempted to destroy himself by cutting his throat. An inquest was held on Saturday, and a verdict of Wilful Murder returned against Taylor, who had in the interval been handed over to the civil power. He was taken before the magistrates on Saturday, and remanded until Tuesday.

DUDLEY.—The sentence of death passed upon Fanny Oliver for the murder of her husband by poison has been commuted to one of penal servitude for life, on the recommendation of Baron Pigott, who tried the prisoner.

LEEDS.—On Wednesday night, some men were engaged at Harewood House, the residence of the Earl of Harewood, in Yorkshire, in dragging the river Wharfe for fish, a number of young cormorants being in process of training for fishing. One of his lordship's gamekeepers, named Kane, got out of his depth and was drowned, after gallant attempts by two gentlemen visiting at Harewood House, the Hon. Gerald Lascelles and Major Fursby, to rescue him.

MOLD.—On Monday David Philips, Robert Jones, and Thomas Gibbons, colliers, were charged before the magistrates with combination and conspiracy in driving out of the county Mr. Young, underground manager of the Leeswood Green Coal and Cannel Company, whose name was prominently before the public in connection with the late riots. The magistrates committed the defendants for trial at the assizes, refusing to accept bail. A large number of colliers and others interested in the result were in the town. In anticipation of disturbance the authorities had brought two companies of the 4th Regiment from Chester, but all passed off peaceably. It was expected, however, that disturbances might occur on the removal of the prisoners, and as a measure of precaution a troop of the 1st Dragoon Guards passed through Warrington on Thursday on their way from Manchester to Mold, to convey the prisoners to the assizes for trial.

NEWBURY.—James Heath, a shepherd in the service of Mr. W. H. Dunn, of Inglewood, near Hungerford, was charged on the 29th ult. with attempting to poison his wife. It appeared that prisoner left his cottage for his work early on the morning of the 27th, and that his wife and child, with Mrs. Taylor, a neighbour, sat down to breakfast together. The child and Mrs. Taylor became sick soon after drinking a small quantity of tea, and the prisoner's wife experienced a burning sensation after she had tasted a spoonful, but the effect upon her was less powerful than upon Mrs. Taylor and the child. The sugar used at the meal was afterwards examined, and found to contain small portions of bichloride of mercury, which the prisoner was in the habit of using to destroy insects in his master's sheep. Prisoner denied his guilt, but was remanded in order that the necessary evidence might be procured. On Thursday he was again brought before the magistrates at Petty Sessions, when it was proved that the bichloride of mercury must have been ground before being mixed with the sugar. The prisoner was then committed for trial at the Assizes.

PENZANCE.—The dangerous pile of rocks lying off the Cornish coast, known by the name of the Great Wolf Rock, is now about to be converted from a source of peril into a beacon of warning. The rocks are about eight miles S.S.W. of the Land's End, and are in extent 56 by 38 yards. They are nearly covered at low water and, to add to their dangerous character, the water immediately beside them ranges from 30 to 40 fathoms. Placed at the very commencement of the Channel navigation, and their existence almost completely concealed, they have caused the loss of many strong ships and of many hundreds of gallant sailors. For nearly eight years the Trinity Board has been engaged in the

rection of a lighthouse upon them, but, from the peculiar nature of the foundation, the work has been difficult and the progress slow. The time available for working on each tide has been reckoned by minutes, and in the whole eight years the greatest number of hours during which workmen could land has been 313 in one year, but in some years that number has been as low as 83. Last week the last stone of the lighthouse which now surmounts the Rock was laid by Sir F. Arrow, Deputy-Master of the Trinity House, who followed up his formal task by a brief expression of thankfulness for the completion of a great work, under unfavourable circumstances, without loss of life or serious accident. The lighthouse tower is built of solid granite, and stands 110 feet above high-water level. The lantern and lens have yet to be fitted, but it is hoped that they will speedily be completed.

PRESTON.—The cotton manufacture in this town continues in a very depressed state. There are 16 mills altogether stopped, and at several others either short time has been introduced or a portion of the machinery only is kept at work. The effect upon the labour market is that in the spinning department alone about 1400 fewer persons are required than would be the case if the trade were in a healthy state.

RYDE.—The foundation of a new parish church for this town, which has hitherto been included in the parish of New Church, was laid on Wednesday by the Princess Christian. Her Royal Highness and Prince Christian arrived at the site of the new building at 4.30 P.M., and were met at the entrance to a pavilion by the mayor and corporation of Ryde, the church-building committee, Mr. Morant, High Sheriff of Hampshire, Sir John Simeon, member for the island, the county and borough magistrates, and others. The dedication service was conducted by Bishop Ryan, assisted by Archdeacon Jacob, and the Rev. A. Poole, Vicar of Ryde. Her Royal Highness having adjusted the stone, declared it to be duly laid. A number of ladies then presented purses, after which a luncheon was given at the Town Hall, presided over by the Mayor of Ryde. About 150 persons were present. The church is to be finished within two years from the present time. Mr. G. G. Scott is the architect.

ST. ALBANS.—The annual meeting of the British Archaeological Association was opened in this town on Monday, and has continued daily during the week. On Monday Lord Lytton, as President, delivered an inaugural address, which was followed by a *déjeuner* at the Town Hall, examination of the Abbey Church and Monastery, and a dinner at the Town Hall, at 7 P.M.—the president in the chair. On Tuesday there were excursions to Bedbourne, Knesworth, Markyate Cell, and Dunstable, and an inspection of the Icknield Way. On Wednesday there was an examination of the churches and town and Sopwell Nunnery, followed by a visit to Verulam and Gorbambury. On Thursday there was an excursion to Hatfield House and Knebworth. Yesterday an excursion was to be made to Hemel Hempstead, Berkhamstead, and Penley Manor House. To-day excursions to Abbot's Langley, King's Langley, and Chenies are planned. Evening meetings took place on each evening, except Monday, at the Town Hall, for the reading of papers and discussions.

SCARBOROUGH.—On Tuesday week two men, named Johnston and Williamson, were charged before the magistrates with having wilfully set fire to the heather on the moors near Harwood Dale, on the estate of Sir Harcourt Johnstone, M.P. On the previous Sunday, at about 9 o'clock, two servant men of Mr. Snowball, a farmer in the neighbourhood, saw the prisoners on the moor and a smoke rising from the spot. On approaching they saw Williamson adding furze to the fire that was burning. On being remonstrated with, Williamson began to tread the fire out, but it rapidly spread, and during the day a number of keepers and others were employed in endeavouring to extinguish it. The prisoners, who walked off when they found themselves in a strait, were tracked to a neighbouring wood, where they were taken into custody. At their examination, on Tuesday, it was stated in defence that the men were merely gathering bilberries, and after lighting their pipes the burning match was thrown carelessly to the ground, thus setting fire to the dry heather. Both prisoners were committed to York for trial.

SLOUGH.—The post office at this place was burglariously entered a few nights ago. Mr. Whitfield, the postmaster, had left about 40*l.* worth of postage-stamps and 8*l.* in money in the office when he closed it; next morning he discovered that the stamps and money had been stolen. Nothing has been heard of the thieves.

Ireland.

ELECTION OF LORD MAYOR.—The Corporation of Dublin on Monday unanimously elected a Conservative, Mr. Purdon, proprietor of the *Farmers' Gazette*, and a large practical agriculturist, to be Lord Mayor for the next year.

MEETING OF IRISH BISHOPS.—A meeting of Irish Bishops took place on Tuesday in the Bilton Hotel, Dublin, to consider what steps should be taken in regard to the future of the Irish Church. The Primate presided, and all the Bishops were present except the Bishop of Cashel. The meeting sat five hours, and then adjourned till next day. The proceedings were strictly private. The Conference was resumed on Wednesday, when the Bishops unanimously resolved that a general Synod should, as promptly as possible, assemble, in which the clergy and laity should be fully and equally represented, and that as the existing representation of the clergy in their Provincial Synods was imperfect, it was desirable that these Synods should be convened to consider changes necessary to adapt their representation to the present circumstances of the Church.

THE IRISH CHURCH COMMISSION.—Lord Monck,

Mr. Justice Lawson, and Mr. George A. Hamilton, the three Church Commissioners appointed by the Act which became law last week, will commence their duties without delay. Judge Lawson will vacate his seat in the Court of Common Pleas, and will be succeeded by the present Solicitor-General. Mr. Hamilton will also vacate the permanent secretaryship of the Treasury, but his successor has not yet been selected.

DISMISSAL OF A HIGH SHERIFF.—Captain Coote, the high sheriff of the county of Monaghan, has been dismissed from his office for refusing to comply with the desire of the Lord-Lieutenant that he should dismiss his sub-sheriff for the partial manner in which he prepared the jury panel for the spring assizes of the county.

THE SHOOTING OF CAPTAIN LAMBERT.—Peter Barrett, the London postman, who is charged with shooting at Captain Lambert, has been committed for trial. He was identified by a gunsmith in Tottenham Court Road, as having bought the revolver from him a few days before the outrage.

DESECRATION OF A CHURCHYARD.—A shocking scene has just taken place in Shankill graveyard, Belfast. The Privy Council, having issued an order for closing a part of the graveyard where the bodies had been buried near the surface, a crowd of people, believing that they could evade the order by so doing, assembled and dug up the remains, for the purpose of re-interring them at the required depth. Upwards of 200 graves were opened, and the bones were strewed over the ground. The Mayor and police stopped the proceedings.

THE CORK POLICE.—The Corporation of Cork having received a letter from the Chief Secretary announcing that half the extra police should be charged on the city, have protested against the force as unnecessary, and on the motion of the ex-Mayor have adopted a resolution that the Council should petition Parliament to suppress all celebrations in the north offensive to Catholics.

THREATENING LETTER TO LORD CLONBROCK.—A threatening letter has been received by Lord Clonbrock, through the Ahascragh Post-office, accompanied by the usual coffin, skull, and cross-bones, warning his lordship that in the event of his not dismissing his land-steward and gardener, he had better make the necessary arrangements for their funerals.

THE FENIAN CONVICTS.—Meetings promoted by the amnesty committee were held on Sunday in Limerick and Galway, to take measures for procuring the release of the Fenian convicts. At the latter place the High Sheriff presided. Resolutions of the usual character were adopted.

Scotland.

THE PRINCE OF WALES AND THE SCOTTISH FREEMASONS.—At a quarterly meeting of the Grand Lodge of Scotland, held in Edinburgh on Monday evening, the Earl of Dalhousie, Grand Master for Scotland, moved that the Prince of Wales be elected patron of the craft in Scotland, in succession to his great uncle, the late King William IV. His lordship stated that he had had an interview with the Prince on the subject, and that his Royal Highness had expressed his willingness to accept the honour. The motion was cordially adopted.

JEDBURGH ABBEY.—The Marquis of Lothian has agreed to build the new church entirely at his own expense, instead of accepting the sum of 900*l.* from the heritors towards its erection, as formerly arranged.

GREAT CAPTURE OF WHALES.—A letter from Stornoway says, that on Saturday week an immense shoal of "calfing whales" were seen deporting themselves off the bay. A fleet of 50 boats, manned by about 140 men, immediately put out, and getting to seaward of the shoal, drove them, after twelve hours' labour, into Stornoway harbour, when they were all driven on shore like sheep. Every description of weapon was brought into use, and 185 whales were soon harpooned and ready for finching. The whole of them were sold by public auction, realising 650*l.*, which is to be equally divided amongst the captors. The largest whale measured 20 feet in length, with a girth of 12 feet, and fetched 12*l.*, the rest averaging about 3*l.* each.

MURDER IN GREENOCK.—On Sunday morning the police of Greenock were called upon by two brothers, Morris and Walter Barbour, and informed that a washerwoman had died suddenly on the previous night in their house, at 13, Nelson Street West. An officer of police visited the house, and found on a bed in the kitchen the dead body of Mary Reid, a widow, aged 50. The corpse was fully dressed, and in a half sitting posture. No signs of violence were at first visible, but on examination of the house blood-stains were discovered on different parts of the floor, and a bed and bedclothing in an adjoining apartment were found saturated with blood. The brothers Barbour were at once arrested, and in the course of the day a *post mortem* examination of the body showed that the woman had been violated, and then murdered in a horrible manner. She had been engaged in cleaning the house of the accused. Morris Barbour, aged 32, is a locomotive foreman, and his brother Walter, aged 20, is an assistant druggist. Their object in calling at the police-office was to have the body removed by the authorities. They were brought before the magistrates on Monday, and remitted on the capital charge.

Railways.

COLLISION ON THE NORTH BRITISH.—On Saturday night the express train from Carlisle to Edinburgh ran into a goods train at Portobello station. The engine of the express train was thrown off the rails, and several waggons broken to pieces. Twelve passengers were injured. Among those most severely

hurt were Mr. Evans, merchant of Manchester, had his face injured and was much shaken; Mr. Good, of Leith, who sustained severe injuries to his breast. The danger signals were not observed by the driver of the express train, who was proceeding on that part of the route, though the goods train was having mistaken some ordinary signals, and was taken into custody on Monday morning.

COLLISION ON THE MANCHESTER AND SOUTH SHIELDS RAILWAY.—On Friday a collision occurred at Heath Station of this line. A passenger train belonging to the Cheshire and Manchester Railway, and a goods train which was being shunted, were injured. The damage to the passenger train was considerable.

FATAL ACCIDENT AT NEWCASTLE.—On Monday evening the two last carriages of a passenger train from Sunderland and South Shields to Newcastle, at 5.50 P.M., ran off the rails at the Gateshead high-level bridge. Mr. Heods, one of the drivers of Messrs. T. and W. Smith, steamship company, was killed, and one of the carriages fell upon him, and he was killed. Several other passengers were injured.

THE FATAL COLLISION AT NEW CROSS.—A coroner's inquest on the body of Mr. Bradley, victualler, who received fatal injuries in a collision which occurred at New Cross, between a passenger train returning from a licensed victualler's dinner at the Crystal Palace and a goods train, concluded last week, when the jury returned a verdict of death by misadventure; but recommended the Brighton company to lay down more stringent regulations for the regulation of the traffic between New Cross and New Cross, and to adopt the block system.

ABANDONMENT OF THE WATERLOO AND WESTMINSTER RAILWAY.—The unsightly stacks of wooden piles which were sunk three years ago in the Thames, between Hungerford and Westminster, for the purpose of constructing a tunnel for the use of the Waterloo and Whitehall Railway, will shortly be removed, the company having been dissolved. Out of an estimated cost of 160,000*l.*, the company has expended, up to the present time, about 50,000*l.*

COLLISION ON THE LANCASHIRE AND YORKSHIRE RAILWAY.—On Wednesday afternoon, as the 110 passenger train from Manchester to Preston and Fleetwood, was crossing the Bolton station, a pilot-engine, when crossing the lines, ran into it with great force, and cut it literally in two. One composite carriage was smashed to pieces, while three others were so damaged as to be unfit for further use. The driver and fireman of the pilot-engine jumped from the train, and escaped uninjured, but the passenger-train sustained serious injuries, and several of them had to be removed to the infirmary. Mr. J. Parkinson, oil merchant, of Preston, sustained laceration of both legs and injury to the spine. Mr. Morgan, sailor, of the United States, who sustained laceration of shoulder and knee-cap; and Mr. Addison, factory operative, Openshaw, who sustained laceration of his legs and severe contusions to his chest. Others who were injured but able to return home were Mr. T. H. Winder, solicitor, and Mr. P. J. Foster, accountant, of Preston, both of whom sustained serious injuries to the head. Mr. Winder was just returning from the Manchester assizes, where he had been giving evidence in the case of Mr. Chatwood against the Lancashire and Yorkshire Railway Company.

COMPENSATION CASE.—At the Manchester Assizes on Wednesday, Mr. Chatwood, the safe manufacturer of Bolton, sued the Lancashire and Yorkshire Railway Company for injuries sustained in a collision on the 31st of October, at Windsor Bridge, Pennine. The plaintiff's forehead was cut by the rim of the train, and although no bad effects immediately supervened, it subsequently became evident that his brain had been injured, and partial paralysis had supervened. It was stated in evidence that the accident occurred at least 10 years from the plaintiff's life, and that it affected his mental faculties. His average income was 420*l.* per annum. The jury returned a verdict for the plaintiff, damages 2000*l.* At the same time Mr. Foster, an accountant, recovered 400*l.* from the company for injuries which he received from the same accident.

Law.

SOUTH WALES CIRCUIT, CARDIFF.—*Lyons v. Thomas and Others.*—Alleged Abduction of a Jewess.—This was a case in which a Baptist minister of Cardiff was alleged to have abducted a young Jewess from the house of her parents in March of last year. The plaintiff was Barnett Lyons, and the defendants were Rev. N. Thomas, Laura Emily, and John S. Hollyer, Cecilia Hollyer, Eleanor Kepp, and A. Schwartz. The declaration alleged in the first instance that the defendants wrongfully enticed and procured the plaintiff's daughter to leave her father's house, and to be unlawfully and against the will of plaintiff to depart from her father's house, she being at the time his servant, and that the defendant had detained his daughter. To these counts the defendant had pleaded not guilty as to the latter, and as to the first count, that Esther Lyons was not the plaintiff's daughter. The circumstances of the case are well known, and the trial which the trial excited caused the Town Hall to be daily during its continuance by members of the dissenting congregations of South Wales. When the abduction, it was proved that Esther Lyons was on one day, with a companion, at Mr. Thomas's house, and that she received, returned her, and next day handed her to a friend. That plaintiff called on Mr. Thomas at his house where his daughter was, and that Mr. Thomas had placed her in the belief that she had not been abducted, and that information convinced him that she had been abducted, and he returned and questioned the Thomas's, and they had seen and entertained her, but declared that they not then know where she was. They knew her name, whose charge she was, and could at any time have ascertained her whereabouts by inquiring of the person in whose house she had placed her. Mr. Thomas went so far as to

of 1s. per qr. has been quoted in the value of this article. We have noticed no particular change in the price of Barley; all other sorts of spring corn met an increased demand at improving rates. Flour was not an active sale, but any change of price has been against buyers; at Birmingham an advance of 3s. 4d. per sack is quoted. The arrivals of grain and seed-laden vessels off the coast since Friday last amount to 115, of which, with those left over from last week, there remained for sale last night 43 cargoes. The floating trade has been steady throughout the week. Wheat prices had a continued improving tendency. Maize, in spite of considerable supplies, was held at full rates, and in a few instances a trifling advance was realised in the early part of the week. Barley was in good request. Rye nominal. Wheat on passage and for forward shipment continued in fair demand at higher quotations; Maize, Barley, and Beans were unaltered in value, with very limited transactions.

Of foreign Wheat and Maize the arrivals this week have been good, but short of all other grain. There was a moderate attendance at this morning's market, and English Wheat brought an advance of 1s. per qr.; foreign was generally held for a similar improvement, which in some instances was paid. Barley, Beans, and Peas were firm at late rates. Oats were 6d. per qr. dearer.

ARRIVALS.

	Wheat.	Barley.	Oats.	Flour.
English	930 qrs.	— qrs.	180 qrs.	— sks.
Irish	—	—	—	—
Foreign	23,590 „	1460 „	5580 „	{ 14,130 „ 4440 brls.
	24,520	1460	5760	

MANCHESTER, Aug. 5.—At our market this morning English Wheat was held for an advance of 1s. per qr., and foreign 3d. per cental, but the weather being finer, the demand was only languid. Flour was in some instances 6d. per sack dearer, but generally last week's rates could not be exceeded in the little business transacted. Oats and Beans were fully as dear, while Indian Corn was about 6d. per qr. cheaper.

SEED MARKET.

During the past week we have had some fine showers, which have imparted life to those kinds of seeds sown at this season; consequently we have a brisk demand for sowing Rape at an improvement of 2s. per qr.; also an advance of 3s. to 4s. per qr. for white Mustard. Some sales have been made of new French Italian Rye grass, for present use, at full prices. Our French correspondents write Italian 2s. per bale higher, and Trifolium 5s. to 6s. per bag advance. In red and white Clover at present but little is doing, the high prices demanded having prevented speculative purchases. Trefoil a little new French and Belgian is offered, for which high prices are demanded. All kinds of bird seeds in fair demand, at full rates. On the whole the seed trade presents a very healthy appearance, and holders are very confident in the expectation of much higher prices as the season advances.

JOHN SHAW & SONS, 16, Water Lane.

- W. Yarrell, Esq.
- J. Yeowell, Esq., &c.

NOTES AND QUERIES is published every Saturday, price 4d., or stamped to go by Post, 5d. It is also issued in Half-Yearly Volumes, each with copious Index, price 10s. 6d. cloth boards.

Subscription for STAMPED COPIES for Six Months, forwarded direct from the Publisher (including the Index), is 11s. 4d., which may be paid by Post-office Order, payable at the Strand Post Office to GREIG SMITH.

NOTES AND QUERIES may be procured by order of every Bookseller and Newsmen, or at the Office, 43, WELLINGTON STREET, STRAND, LONDON, W.C.

Works on Botany, by Dr. Lindley.

THE VEGETABLE KINGDOM; OR, THE STRUCTURE, CLASSIFICATION, AND USES OF PLANTS. Illustrated upon the Natural System. In One Volume, 8vo, cloth, price 38s., with upwards of 600 Illustrations.

DESCRIPTIVE BOTANY; OR, THE ART OF DESCRIBING PLANTS correctly, in Scientific Language, for Self Instruction and the Use of Schools. Price 1s.

MEDICAL and ECONOMICAL BOTANY; OR AN ACCOUNT of the Principal Plants employed in Medicine or Domestic Economy. In 1 vol. 8vo, with numerous Woodcuts, price 7s. 6d.

SCHOOL BOTANY; OR, THE RUDIMENTS OF BOTANICAL SCIENCE. In One Volume, 8vo, half bound, with 400 Illustrations, price 6s. 6d.

THE ELEMENTS of BOTANY, STRUCTURAL AND PHYSIOLOGICAL. With a Glossary of Technical Terms, and numerous Illustrations. 12s. cloth.

This completes the series of Elementary Botanical Works by Professor LINDLEY, of which "School Botany," and "The Vegetable Kingdom," form the other parts.

The first two Parts of THE ELEMENTS of BOTANY, comprising Structural and Physiological Botany, and a Glossary of Technical Terms, are published in one octavo volume, price 12s.

These three parts form a complete manual of Botany for Medical and other Students who have made themselves acquainted with the Author's "School Botany."

N.B. The Glossary may be had separately, price 1s. London: BRADBURY, EVANS, AND CO., 11, Bouverie Street, E.C.

Laying Down New, or Improving Old, Grass Lands. FOR THE BEST PRACTICAL INFORMATION ON THE ABOVE SUBJECT SEE

"PERMANENT PASTURES," a New Illustrated Work, by M. H. SUTTON, F.R.S., &c.

"If you want to grow the right sorts of plants, you must sow the right sorts of seed, and you cannot do better than read Mr. Sutton's paper on Laying Down Grass, which you will get by sending to Reading."—Agricultural Gazette

Opinion of Professor Buckman: "I do not know of anything to equal it." SUTTON AND SONS, Reading, Berks.

SOMERSET HOTEL, 162 and 163, Strand, adjoining King's College and Somerset House. This Hotel has been enlarged, and a LADIES' COFFEE-ROOM added. For quietness, comfort, economy, and central situation, is not surpassed. Beds 2s. Breakfasts 1s. Dinners, Luncheons, Suppers, &c., at equally moderate charges. Attendance 1s. per day. A Night Porter kept.

THE GENERAL LAND DRAINAGE and IMPROVEMENT COMPANY.

Directors: Thomas Chapman, Esq., F.R.S., The Right Hon. Viscount Compton, Geo. Thomas Clark, Esq., Edward John Hutchings, Esq., John C. Cobbold, Esq., William Tite, Esq., M.P., Henry W. Currie, Esq.

BAILEY DENTON, Principal Engineer. Agricultural Improvements of any kind are executed by the Company, or the outlay thereon repaid to Landowners who prefer executing the work by their own Agents.

Tenants may also, by arrangements with their Landlords, procure the execution of such improvements. The outlay, with all official expenses, may be charged on the Estate, and paid off by a rent-charge in 31 years, or at the option of the Landowners in a shorter term.

No investigation of title necessary, and no legal expenses incurred. Application to be made to HORACE BROKE, the Secretary, at the Offices of the Company, 22, Waterloo Place, London, S.W.

THE LANDS IMPROVEMENT COMPANY.— (Incorporated by Special Acts of Parliament.)

Directors: John Clutton, Esq., 9, Whitehall Place, S.W.; Frederick L. Dashwood, Esq., Kirtlington Park, Oxford; Henry Farquhar, Esq. (Messrs. Herries, Farquhar & Co.), 16, St. James Street, S.W.

Lord Curzon, M.P., 85, Eaton Square, S.W., and Galloway House, Wiltshire, N.B.; John Horatio Lloyd, Esq., 1, King's Bench Walk, Temple, E.C.; Granville R. Ryder, Esq. (Managing Director), 2, Princess Terrace, Hyde Park, S.W.

Charles Watkin Williams Wynn, Esq., M.P. (Chairman), 2, Lower Berkeley Street, Portman Square, W., and God-y-Moat, Walspool.

The Company advances money, unlimited in amount, for all purposes of Agricultural Improvement, including the erection of Cottages and Farm Buildings, to the Owners of settled and other Estates, and to the Clergy in respect of their Glebe Lands.

The whole outlay and expenses are liquidated by a rent-charge upon the land, redeeming principal and interest, over 25 years. No investigation of title is required.

For Forms and further information apply to GRANVILLE R. RYDER, Esq., Managing Director, 2, Parliament Street, London.

LEGAL and GENERAL LIFE ASSURANCE SOCIETY, 10, Fleet Street, Temple Bar, London, E.C.

Trustees: The Right Hon. the Lord Chancellor; The Right Hon. the Lord Cairnes; The Right Hon. Sir W. Bovill, 1, Essex Street, W.C.; The Right Hon. Sir F. Vaughan Williams; The Hon. Sir George Hoare; Thomas Webb Greene, Esq., Q.C.; John Osborne, Esq., Q.C.; Edward Smith Bign, Esq.; Robert Bayly Follett, Esq., Taxing Master in Chancery.

FINANCIAL POSITION on January 1, 1869. Existing Assurances £4,117,000; Reversionary Bonus thereon £2,000,000; Annual Income 200,000; Invested Funds 1,540,000; Share Capital, fully subscribed 1,000,000; Claims and Bonus paid 1,850,000.

WHOLE-WORLD POLICIES granted for a single extra payment of 10s. per £100, where no special liability to foreign residence then exists. Policies on lives of full age when assured, after five years' existence without having extra charge for foreign license, allow unrestricted residence in any part of the world.

GENERAL CONDITIONS of Assurances printed thereon are specially framed to secure to Policies of the Society, when once issued, absolute freedom from all liability to future question.

LOANS are granted on Life Interests and Reversions. E. A. NEWTON, Actuary and Manager.

RAY SOCIETY.—THE ANNUAL GENERAL MEETING of the RAY SOCIETY will be held at EXETER on FRIDAY, August 30, at 8 p.m.

H. T. STAINTON, F.R.S., Secretary.

Home News.

THE COURT AT OSBORNE.—On Thursday, the 5th inst., the Grand Duchess Marie and Prince Serge of Leuchtenburg visited the Queen, and remained to luncheon. In the afternoon the Queen drove out with Princess Louisa, Prince Arthur, and Princess Beatrice. On Friday morning the Queen walked in the grounds with Princess Louisa and Prince Arthur, and in the afternoon went out with Princess Christian. On Saturday the Queen held a Council at which Viscount Monk, Lord Northbrooke, and Mr. G. A. Hamilton were sworn in as Privy Councillors, and took their seats at the Board. Earl de Grey and Ripon and the Lord Chamberlain had audiences of her Majesty. After the Council the Queen conferred the honour of Knighthood on Mr. William Wright, of Jaggleshorpe Hall, chairman of the Hull Dock Company. The Duke of Argyll was present as Secretary of State, in the absence of the Home Secretary. The Queen afterwards drove out with Princess Louisa, the Duchess of Argyll, and the Duchess of Roxburghe, Prince and Princess Christian, and Prince Arthur, visited Lord and Lady Henry Scott at Beaulieu Abbey. The Dean of Westminster and Lady Augusta Stanley left Osborne. The Duke and Duchess of Argyll arrived on a visit. On Sunday the Queen and Royal family attended Divine service at Whippingham. The Rev. George Prothero officiated and administered the Sacrament. On Monday morning the Queen walked in the grounds with Princess Louisa and Prince Arthur. The Duke and Duchess of Argyll left Osborne. In the afternoon the Queen drove out with Princess Christian, Princess Louisa, Prince Arthur, and Prince Leopold went to an amateur concert at East Cowes Castle, the seat of the Dowager Lady Gort, in aid of the building fund of St. James's Church. On Tuesday morning the Queen walked in the grounds with Princess Louisa, Prince Arthur, and Prince Leopold. In the afternoon the Queen drove out with Princess Christian and Princess Louisa. In the evening Prince Albert of Salm's Braunsfels dined with her Majesty. On Wednesday morning the Queen went out in the grounds with Princess Beatrice, and in the afternoon drove out with Princess Louisa, Prince Arthur, and Prince Leopold. Prince and Princess Christian drove to Shanklin, and visited Prince and Princess Philip of Wurtemberg. The Judge Advocate General had an audience of her Majesty. On Thursday morning the Queen went out with the Princess Louisa, Prince Arthur, and Prince Leopold. Prince Arthur afterwards took leave of her Majesty, on his departure for Canada. The Queen and

Royal family will leave Osborne for Windsor on Thursday next, and on the following evening will leave Windsor for Balmoral.

THE PRINCE AND PRINCESS OF WALES.—The Princess, under the advice of Mr. Paget, Dr. Burckhardt, and Dr. Hausmann, took her first bath at Wildbad on the 5th inst. Their Royal Highnesses and the children can take exercise in the private grounds of the hotel without being incommoded by visitors, and are said to be much pleased with the beauty of the scenery.

PRINCE ARTHUR arrived in London on Thursday evening from Osborne, and left town yesterday for Birkenhead, whence he will sail this afternoon in the Inman Company's steamer City of Paris, for Halifax. His Royal Highness was last night to be the guest of the Hon. Sir Edward Cust, at Leasowe Castle. It is expected that the Prince will visit, previous to his embarkation, the ironclad turret-ship Captain, which has been built for the Royal Navy by Messrs. Laird, at Birkenhead, but it is said that he will not visit Liverpool on this occasion.

THE PRIME MINISTER and Mrs Gladstone left town on Tuesday for Walmer Castle, which Earl Granville has placed at their disposal. Mr. Gladstone is still in much need of repose after the fatigues of a most laborious session, in which more than his own share of the labour necessarily devolved on himself.

THE CABINET.—A Cabinet Council was held on Monday, at the private residence of Mr. Gladstone, on Carlton House Terrace.

PARLIAMENTARY MOVEMENTS.—A new writ has been issued for Caithness, in the room of Mr. Traill, who has accepted the Chiltern Hundreds. Mr. James Traill, barrister, nephew of the retiring member, is at present the only candidate in the field. The nomination for Antrim is fixed for Monday next. The candidates are Sir Shafto Adair and Captain Seymour, the former in the Liberal, the latter in the Conservative interest.

THE BISHOPRIC OF SALISBURY.—Mr. Gladstone has conferred the vacant Bishopric of Salisbury on the Rev. Dr. Moberley, Canon of Chester, and Rector of Brigstone, in the Isle of Wight, the late Head Master of Winchester School. Dr. Moberley is understood to be a sound but moderate High Churchman, and to be free from all Ritualistic tendencies.

THE BISHOP OF LONDON will leave London on Monday next for the Continent, for the purpose of administering confirmation at a few places in Germany, and will be absent from England for a fortnight or three weeks.

MINISTERIAL MOVEMENTS.—It is understood that Mr. Maguire will succeed Mr. G. A. Hamilton as permanent Secretary to the Treasury. This appointment will create a vacancy at Cork. Mr. Stansfeld, of the Treasury, is about to visit Edinburgh, to inquire into the economy and efficiency that would result from the various Boards now sitting in Edinburgh on the Poor Law, Lunacy, and Education, being placed under the direct control and management of a Secretary for Scotland. In the event of such an office being created, it is expected that Mr. Gladstone will confer it on Mr. Baxter. The report that Mr. Chichester Fortescue is to be raised to the peerage, for the purpose of succeeding Earl Spencer as Lord-Lieutenant of Ireland, is contradicted.

Foreign.

FRANCE.—The Emperor is slightly indisposed. His Majesty held, nevertheless, on Wednesday evening, a reception, at which a large number of Senators were present. His Majesty has postponed his departure for the camp of Chalons till to-day. The departure of the Empress for the East has been fixed for the 25th inst. The Prince Imperial will accompany her Majesty as far as Corsica. Queen Isabella left Paris on Saturday for Trouville, where she will spend two or three weeks. The Emperor, on the eve of her departure, paid her a visit which lasted more than an hour. The health of Marshal Niel has become worse, and his life is despaired of. Admiral Rigault de Genouilly has been appointed Minister of War *ad interim*. The Emperor signed yesterday several decrees granting an amnesty to certain persons convicted of press offences and political misdemeanours. The Senate has appointed a committee of ten members to draw up the report on the *Senatus Consultum*, and has elected M. Rouhet as its president. M. Devienne has been appointed its reporter. In the sitting of the committee on Thursday an amendment was moved by Count de Sartiges, proposing that in case the Senate should reject a Bill adopted by the Legislative Body, a mixed committee of Senators and Deputies should be formed to settle the points in dispute. The *Constitutionnel* of yesterday asserts that the project of empowering the *Conseils Généraux* to elect henceforth the members of the Senate has not met with the approval of the majority of the commission. The action against the *Journal Universel* was concluded on Friday. M. Millet, the manager, and M. Ducuing, one of the Editors, were condemned, the former to one month's imprisonment and to a fine of 500f., and the latter to two months' imprisonment. M. Gustave Flourens, who was wounded in a duel last week, is out of danger. A duel with pistols was fought on Monday between M. de la Pennerie, political director of the *Paris* newspaper, and M. Gustave Naxquet, chief Editor of the *Peuple*, of Marseilles. The adversaries were placed at 15 paces: one shot was exchanged, but without effect. The trial of the miners in the Loire district, who took part in the recent riots, has terminated. Sixty-two were condemned to imprisonment for terms varying from one to 15 months; 10 others were acquitted.

SPAIN.—It is said that General Prim intends to offer the crown to King Luis of Portugal. According to this project Spain and Portugal would be united, like

Austria and Hungary, under one Sovereign, the King to reside a great part of the year in Madrid. In consequence of a fresh Carlist conspiracy being discovered in Madrid numerous persons have been arrested, among whom are 3 priests and 17 gendarmes. At Burgos 30 persons, 12 priests, and several canons of the Church, have been arrested. Balenzague, the leader of the Carlist band in Leon, has been shot by order of the sergeant who arrested him; and nine persons have been executed in Barcelona, without trial, on the mere suspicion of having taken part in the movement. A band of Carlists has appeared in Catalonia, but has been dispersed by the Government troops, nine of the insurgents being killed in the encounter. The Carlist leader, Cobecilla Estartus, has since crossed the French frontier, and entered Catalonia, at Pincorda, at the head of a band of 500 men. Other bands of Carlists are expected to enter the country from different points of the frontier. Mr. Forbes, of Boston, who is reported to have instructions from the United States' Government to negotiate with the Spanish Government for the purchase of Cuba, has had several interviews with General Prim and Marshal Serrano. M. Waisweller, the representative of Messrs. Rothschild, has had frequent and long interviews with General Prim and Senor Ardanaz, the Minister of Finance.

PORTUGAL.—The Marquis Sa da Bandeira announced on Wednesday in the Chamber of Deputies that the Ministry had tendered its resignation, which had been accepted by the King. The Duke de Loule was entrusted by his Majesty with the formation of a new Ministry, which has been constituted as follows.—President of the Council and Minister of the Interior, Duke de Loule; War, General Maldonado; Finance, M. A. J. Braancamp; Public Works, M. Lobrouvila; Foreign Affairs, M. Mendez Leal; Marine, M. Biboludo da Silva; Justice, M. Lucciano de Castro.

BELGIUM.—M. Victor Hugo is now at Brussels, paying a visit to his family.

MECKLENBURG SCHWERIN.—The Grand Duchess Marie gave birth to a Princess on Tuesday morning.

AUSTRIA.—In the sitting of the Reichsrath Delegation on Monday, after a general debate on the estimates of the Ministry for Foreign Affairs, Count Beust, the Chancellor of the Empire, contradicted an assertion that he had meddled with German affairs or exercised any kind of pressure for the formation of a South German Confederacy. He reiterated his former assertion that no alliances whatever existed between Austria and other European Powers; but he added that in France Austria had a good friend. It was, besides, a question whether Germany could help her if she required it. The French Government up to the present time had always shown itself friendly towards Austria. France sincerely entertained kindly sympathies for all the peoples of Austria. Most of the disagreements with Prussia arose from the publication of the Red Book, and Baron von Werther, the Prussian Minister in Vienna, was not an impediment to the establishment of better relations between the two countries. The true policy of Austria was one of alliances, not abroad, but at home. In the sitting of Tuesday, after several speakers had demanded the suppression of the Legations in the small German States, and the appointment of a *Chargé d'Affaires* instead of an Ambassador at Rome, Count Beust made a speech, in which he explained the necessity for maintaining the Legations at the small German Courts, and opposed the demand for reducing the Embassy at Rome. He said that Protestant States were now taking up towards the Papal Government the same attitude as the Catholic Powers. The Austrian Government was resolved to allow nothing derogatory to its dignity, and the answer made by it to the last Papal Allocution was decided in tone, though couched in diplomatic terms. A better understanding of the position of affairs was beginning to prevail at Rome. In conclusion, he said that the fact of the Papal posts at the Courts of Vienna and St. Petersburg not being filled up had no political significance. The proposals of the Committee to suppress the Legations at Hamburg, Lubeck, Bremen, Osnenburg, and Brunswick were adopted. All the other amendments were rejected. The expenses for the diplomatic service and the extraordinary expenditure were then approved. In the sitting of Thursday the discussion was closed, and the estimates of the Ministry for Foreign Affairs and Finance were agreed to in accordance with the Committee's report. A commission, consisting of representatives of different ministries, has been appointed to draw up a Bill subjecting convents to the general law on associations, which is to be enlarged in order to bring them under its surveillance.

HUNGARY.—In a full sitting of the Hungarian Delegation on Saturday, in answer to inquiries respecting the frontier dispute with Roumania, Herr Von Orizy, in the name of the Government, said that no violation of the frontier had been committed by Hungary. The Roumanian Government, however, was sending 290 men, with 12 pieces of artillery, to the frontier, a proceeding which under given circumstances would be met by the Hungarian Government with the requisite energetic action. The Delegation afterwards agreed to all the estimates of the Foreign Office. This is considered as a vote of confidence in Count Beust's foreign policy. In the sitting of Monday the Budget of the Ministry for Foreign Affairs, amounting to 1,131,210 florins, was agreed to. The estimates for the consulates in China and Japan were struck out. Herr Orizy, in answer to inquiries, said that the Government would protect the interests of the Protestant Hungarians in Roumania, and that the Government was now engaged in discussing the subject of consular jurisdiction in the East.

ITALY.—It is semi-officially stated that Count Cambray Digny does not intend to make any fresh issue of rentes, and that he will be in a position to

present a satisfactory financial scheme at the opening of Parliament.

RUSSIA.—A new auriferous stratum has been discovered in that part of Siberia traversed by the affluent of the Angara, at a distance of about 200 miles from Teniseisk.

GREECE.—The discussion in the Chamber of Deputies, in reply to the speech from the throne, terminated in the adoption of the address by a large majority. All the country villas around Athens, usually occupied from the month of May, are now empty, in consequence of the general insecurity of life and property from the prevalence of brigandage.

THE PRINCIPALITIES.—Letters from Bucharest state that the persecution of the Jews continues. The Jews are now deprived of the liberty of following their trades, are disabled from acquiring houses, and are not allowed to reside in villages.

EGYPT.—The expected letter from the Porte on Monday. It is reported that the contents are not of such a serious character as was expected, and that the Viceroy will experience difficulty in giving a satisfactory reply. He is to be present at the annual festival of the opening of the Cairo Canal. This step was attributed to the importance to please his subjects, who attach a superstitious surmount this ceremony. It is expected that the Viceroy will afterwards go to Ismailia to be present at the letting of the waters of the Bitter Lakes.

PERSIA.—At the recommendation of the British and Russian Embassies the Porte has come to a provisional agreement with the Persian Ambassador to observe a provisional boundary line until the completion of the Turco-Persian Commission's map, which is expected from London.

INDIA.—Mr. Seton-Karr will go to England in October, and be succeeded in his post as Political Secretary by Mr. Aitchison. A telegram is published in the *Daily Gazette* from Peshawar, asserting that Shere Ali has been shot at and wounded, and that Ismael Khan, Shere Ali's nephew, has escaped. Conflicting reports are current respecting the exact details of this news. The *Delhi Gazette* says that it has received a confirmation of its statement that the news has been wounded, whereas the *Bombay Times* and *Pioneer* declare the news to be a fabrication. The attractions at Agra during the Duke of Edinburgh's visit in January is to be an industrial exhibition, open to the whole army of India. The operations in the Bhandra coalfields have been successful with the most encouraging results. One coal seam has been discovered 30 feet in thickness, and of such extent that it alone could supply all the Indian ways with fuel for 30 years to come.

CHINA.—It is believed at Hong Kong that the Chinese authorities at Peking have officially intimated to Sir Rutherford Alcock that the Duke of Edinburgh cannot be received by the Royal family of China on a footing of equality. Sir Rutherford Alcock has expressed his approval of all Consul Gibson's acts in the Peking affair, including the taking of Ansping. At a meeting of the Hong Kong Association a strong expression of opinion was pronounced against the removal of Consul Gibson from his post. The Yang-tseu export vessels have returned to Shanghai.

AUSTRALIA.—A good deal of discussion has taken place since the arrival of the last mail in reference to the announcement that the Imperial Parliament had been asked to vote Prince Alfred 3500l. in payment of the presents he made in the Australian colonies. It was said that the articles in themselves were of a valuable kind, and that when all the presents to official and other public persons are reckoned up, only a small portion of the 3500l. can be accounted for. A member of the Legislative Assembly has therefore given notice of motion for an inquiry, in order to discover how the bulk of the gifts was disposed of. The Victoria Parliament was engaged in discussing a Land Bill. The session of the Parliament was to meet in September. The question of preserving meat for exportation to Europe was increasing. A number of diamonds, four gold nuggets, and rich quartz reefs had been found recently in Queensland. The Queensland Parliament was sitting, and a proposal had been brought forward for paying the members of the Tasmanian rich quartz discoveries had been made.

NEW ZEALAND.—Accounts from Wellington announce the formation of a new Ministry, which has declared its policy with regard to the rebels to be of a defensive character. Two hundred rebels had been rendered. On the 8th May the rebel force surprised Colonel St. John's troop at Opepe, and wounded two officers and five privates, and wounded the body of the beach at Poverty Bay.

UNITED STATES.—President Grant and Secretary Fish have returned to New York. It is reported that Admiral Porter has been appointed to the command of the West India squadron, and that at a meeting of the Cabinet it has been decided that the Spanish gun-boats shall not be released. The press regard the recent destruction of Spanish gun-boats as indicating that the Administration is about to adopt a policy more favourable to Cuban independence. It is reported that prominent members of Congress are strongly urging the Administration to accord belligerent rights to the rebels. At a meeting of the Cabinet held on Tuesday last, it was resolved to postpone a decision on the Cuban question until the next meeting, to be held a fortnight hence. Important dispatches were looked for in the morning from General Sickles at Madrid. Numerous American journals express satisfaction at the refusal of the British Government to recognise the *Republique Haggerty* as the United States Consul in Cuba. The *New York Herald* denounces his appointment.

as a mark of ignorance, and a wanton insult to Great Britain. The Alabama elections have terminated in the return of four Democratic and two Republican representatives to Congress. At the Tennessee elections on the 5th inst. Mr. Senter, Conservative, was elected Governor by a majority of nearly 40,000 votes. There is now a Conservative majority in the Legislature, and it is almost certain that the late President, Mr. Andrew Johnson, will be returned to the Senate. The Ohio Democracy have nominated Mr. George H. Pendleton as their candidate for the post of Governor. Mr. Pendleton immediately accepted the nomination. General Turbeel, Secretary of the Radical Republican Committee of Mississippi, had an interview in New York with President Grant, from whom he received assurances that the members of the Administration were on the side of the Radicals of Mississippi. The President expressed a wish to trust the Southerners, but declared that the Conservatives of Mississippi were too much connected with the Democrats. The Radical press asserts that the President's expression of sympathy with the Radical branch of the Republican party in Mississippi was intended also to apply to the entire South. M. Mariscal, the Mexican Minister, in presenting his credentials to President Grant, made an acknowledgment of the great obligations of Mexico to the United States, for assisting her to resist European aggression. United States Bonds were depressed on Thursday, in consequence of the renewed agitation of the question of subjecting bonds abroad to taxation. Large orders to sell bonds have been received from Europe. A serious riot between Radical blacks and Democratic whites is reported from Mobile, in which large numbers were wounded on both sides. It is reported that 50,000 Coolie labourers have been actually constructed for by planters in Mississippi, Alabama, and Louisiana. The eclipse of the sun on the 7th inst. was observed to great advantage in New York and the States generally. Great darkness prevailed; and in some parts of the West the sun was totally eclipsed. The phenomenon greatly alarmed the black population.

CANADA.—Reports of the crops in Western Canada are favourable beyond precedent. A meeting has been held at Quebec to adopt measures to check the emigration of French Canadians to the United States.

NEWFOUNDLAND.—The steamer Germania, from New York to Hamburg, was lost in a fog on Saturday night in Trepassy Bay. The passengers and crew were all saved, but the mails and cargo, including \$50,000 dollars in specie, were lost. On Sunday the steamship Cleopatra, from Montreal for London, was wrecked at the same place. The passengers and crew were all saved. Both vessels were totally lost.

MEXICO.—Advices from Mexico state that 10,000 Indians in the Chapas States have revolted against the Government of Juarez. The Mexican member of the Joint Commission for the settlement of pending claims has declared that the claims of Mexico will exceed those of the United States.

CENTRAL AMERICA.—The Government of Nicaragua has offered any aid that may be required by the French engineers for exploring the route of the proposed interoceanic canal. The Cotopaxi volcano in Ecuador is now in active eruption.

Parliament.

In the House of Lords on Saturday the Consolidated Fund (Appropriation) Bill, the Seeds Adulteration Bill, the Nitro-Glycerine Bill, and other Bills were read a third time and passed. On Monday the Royal Assent was given by commission to the Bankruptcy, Telegraphs, and other Bills. The Commons' amendments to the Habitual Criminals Bills and other measures were agreed to. The Duke of Devonshire moved that the Commons' amendments to the Parochial Schools (Scotland) Bill be considered. Lord Mansfield moved as an amendment that the amendments be considered that day three months' on the ground that after the Bill left their lordships' House it had been completely changed by the Commons, and it was now too late to communicate with the House of Scotland in order to ascertain their wishes with respect to it. Lords MELVILLE and SELKIRK expressed the unreasonableness of persevering with the amendments, and Lord COLONSAI insisted that such hurried consideration could not prove satisfactory. Earl GRANVILLE reminded the House that earlier in the session the Bill went through Committee in a single night, and he contended that the Commons' amendments could be considered in a single sitting. On a division, Lord Mansfield's amendment was carried by 55 to 43. The Bill was therefore lost. On Tuesday the House resumed its proceedings, and disposed of a few remaining Bills. Lord REDERSDALE moved that the Parochial Schools (Scotland) Bill be reprinted, with amendments introduced by the Commons, in order to show what it was that each House had agreed to. He said that no member of the late Ministry had taken part in the division of Monday proved that the Commons were not influenced by party motives, and it also showed the inconvenience of delaying so long a measure until within a few days of the close of the session. After some observations from Lord REDERSDALE and RIBON, the motion was agreed to. On Wednesday, the Royal Assent having been given by commission to the Bills, the Commons were summoned to the bar, and the LORD CHANCELLOR read the Queen's speech proroguing Parliament, as follows:—

"We are commanded by Her Majesty to direct your attention to the fact that the Commons have not yet taken part in the division of Monday proved that the Commons were not influenced by party motives, and it also showed the inconvenience of delaying so long a measure until within a few days of the close of the session. After some observations from Lord REDERSDALE and RIBON, the motion was agreed to. On Wednesday, the Royal Assent having been given by commission to the Bills, the Commons were summoned to the bar, and the LORD CHANCELLOR read the Queen's speech proroguing Parliament, as follows:—

"The negotiations in which her Majesty was engaged with the United States of North America have by mutual consent been suspended; and her Majesty earnestly hopes that this delay may tend to maintain the relations between the two countries on a durable basis of friendship.

"Her Majesty has a lively satisfaction in acknowledging the untiring zeal and assiduity with which you have prosecuted the arduous labours of the year.

"In the Act for putting an end to the Establishment of the Irish Church, you carefully kept in view the several considerations which, at the opening of the session, were commended to your notice.

"It is the hope of her Majesty that this important measure may hereafter be remembered as a conclusive proof of the paramount anxiety of Parliament to pay reasonable regard, in legislating for each of the three kingdoms, to the special circumstances by which it may be distinguished, and to deal on principles of impartial justice with all interests and all portions of the nation.

"Her Majesty firmly trusts that the Act may promote the work of peace in Ireland, and may help to unite all classes of its people in that fraternal concord with their English and Scottish fellow-subjects which must ever form the chief source of strength to her extended empire.

"Her Majesty has observed with pleasure your general and cordial readiness to unite in the removal, through the Assessed Rates Act, of a practical grievance which was widely felt.

"Her Majesty congratulates you on having brought your protracted labours on the subjects of bankruptcy and imprisonment for debt to a legislative conclusion, which is regarded with just satisfaction by the trading classes and by the general public.

"The law which you have framed for the better government of endowed schools in England will render the large resources of those establishments more accessible to the community, and more efficient for their important purpose.

"It may reasonably be expected that the Act for the supervision of habitual criminals will contribute further to the security of life and property.

"The measure which has been passed with respect to the contagious diseases of animals will, as her Majesty believes, add confidence and safety to the important trades of breeding and feeding cattle at home, without unnecessarily impeding the freedom of import from abroad.

"By the repeal of the tax on fire insurances you have met a long-cherished wish of the community; and in the removal of the duty on corn her Majesty sees new evidence of your desire to extend industry and commerce, and to enlarge to the uttermost those supplies of food which our insular position in a peculiar degree both encourages and requires.

"Her Majesty trusts that the measure for the purchase and management of the electric telegraphs by the State may be found to facilitate the great commercial and social object of rapid, easy, and certain communication, and may prove no unworthy sequel to that system of cheap postage which has passed with much advantage into so many countries of the civilised world.

GENTLEMEN OF THE HOUSE OF COMMONS.—

"We are commanded to state that her Majesty thanks you for the liberal supplies which you have granted for the service of the year, and for the measures by which you have enabled her at once to liquidate the charge of the Abyssinian expedition.

MY LORDS AND GENTLEMEN.—

"Her Majesty reflects with pleasure that, in returning to your several homes, you may contemplate with thankfulness the fruit of your exertions in the passing of many important laws, a portion of which we have now had it in command to notice.

"During the recess you will continue to gather that practical knowledge and experience which form the solid basis of legislative aptitude; and her Majesty invokes the blessing of the Almighty alike upon your recent and your future labours for the public weal."

The Lord Chancellor then, in her Majesty's name, prorogued Parliament to Thursday, October 23.

In the House of Commons on Friday, after progress had been made with the Parochial Schools (Scotland) Bill, as far as the 49th clause, the Government of India Act Amendment, Governor-General of India, and Habitual Criminals Bills were forwarded a stage. In Committee of the whole House, a resolution was passed authorising the Admiralty to expend the sum of 10,500*l.* on astronomical observations, to be made in various portions of the world, in 1871, on the transit of Venus, Mr. CHILDERS explaining that the opportunity would be a most interesting one for ascertaining the distance of the sun from the earth, and that the expenditure would be extended over five years. Sir R. PALMER called attention to the report of the Marriage Law Commissioners, and asked if the Government intended to introduce next session a Bill establishing a marriage law as nearly as possible uniform for all parts of the United Kingdom, upon principles of equality as between all Churches and religious denominations. Mr. BRUCE admitted the scandal of having different marriage laws in the three kingdoms, but could not promise that the Government would bring in a Bill next session, as they were already deeply pledged in the matter of extradition treaties, foreign enlistment, the Irish land question, and education in England. The subject, however, should have the earliest possible attention. Mr. J. B. SMITH called attention to the report of the Master of the Mint on the condition of our gold coinage, and asked if the Government were prepared to recommend the adoption of any measure extending to this country the advantages of the International Coinage Convention of December, 1865. The CHANCELLOR of the EXCHEQUER, in reply, said that the gold coinage was in a most unsatisfactory condition, and that the waste occurring under our present system was enormous, for of 98,000,000 sovereigns coined since 1850, according to Mr. Jevons' calculation, 44,000,000 had disappeared altogether from circulation. Unlike other countries, we charged nothing for coining bullion, but gave back the manufactured article in exchange for the raw material brought to the Mint without imposing a "mintage" or "seigniorage." As a result of this a regular trade had been established (the chief seat of which was at Brussels) of picking out the heaviest sovereigns and melting them down, and they were also largely exported as bullion. After 18 years' wear, on an average, a sovereign became so reduced in weight as to be no longer a legal tender, but we took no pains to call in our light coinage, and the consequence was that 31½ per cent. of our sovereigns and 40 per cent. of our half-sovereigns were not of the legal weight. To meet

this evil a charge of 1 per cent. should be made at the Mint to repay the cost of coining. This would raise the value of the sovereign in proportion, and arrest the process of depreciation, which had now attained such an extent that the cost of calling it in and recoining it would be 400,000*l.* With regard to an international coinage, the French Mint was about to coin a 25*l.* gold piece, which would be about 2*l.* less in value than our sovereign, and if we were to take 1 per cent. out of the value of our sovereign for mintage, the value of the two would about correspond. As the Spanish doubloon, the American eagle, and the Prussian Frederic would be nearly identical with this 25*l.* piece, the way would be cleared for a general European coinage. He had nothing now to propose, but wished the subject to be ventilated in the country during the recess. Mr. G. H. MOORE complained of representations of cruel treatment suffered by O'Donovan Rossa, at the convict prison at Chatham. Mr. BLAKE gave an account of a visit which he had lately paid to the prisoner in question, and Mr. BRUCE repeated the assurance he had given on a former occasion that the statement of the alleged cruelty was grossly exaggerated, and that there was no truth whatever for the charge that the prisoner had his hands manacled behind his back for 35 days and nights. Mr. H. B. SHERIDAN called attention to the delay on the part of the railway companies in providing a means of communication between passenger and guard in express trains. Mr. BRIGHT explained that the companies were doing all in their power to comply with the law, but they had not yet had time to apply a system of communication to the whole of their rolling stock used for passenger traffic. The House then resolved itself into Committee, and went through the remaining clauses of the Parochial Schools (Scotland) Bill. On Saturday the Canada (Rupert's Land) Loan Bill, as amended, was read a third time and passed. The Parochial Schools (Scotland) Bill, as amended, after a brief discussion, confined almost exclusively to Scotch members, was considered, and ordered to be read a third time. Mr. W. E. FORSTER withdrew the Endowed Schools (No. 2) Bill explaining that its object was to establish a Council independent of the Government, for examining and giving certificates to schoolmasters, and expressing a hope that the subject would be ventilated in the recess. On Monday Mr. T. CHAMBERS gave notice that he would next session call attention to the necessity of some change in the Church of England, consistent with her doctrines and opinions, to bring her more into harmony with the feelings and wants of the great mass of the people. The Parochial Schools (Scotland) Bill was recommitted, for the purpose of introducing several new amendments, and was then read a third time and passed. The Steam Boilers Inspection Bill was withdrawn. In Committee of the whole House, Mr. SHAW LEBEVRE brought in a Bill of 300 clauses to Amend and Consolidate the Mercantile Marine Law, and Mr. M'LAREN brought in a Bill for the Abolition of Compulsory Church Rates in Scotland. Lord ELCHO, in a house of eight members, called attention to a memorial recently presented to the Government, signed on behalf of 30,000 miners, praying for a special inquiry into the causes of recent accidents in coal mines. Mr. BRUCE, in reply, said that he did not agree in the necessity of a special inquiry, as the causes of all these accidents in a general way were perfectly well known. From the pressure of business it had been found impossible to legislate this year, but he hoped to take up the subject next session. On Tuesday the Lords' amendments to the Bishops Resignation Bill and the Titles to Land Consolidation (Scotland) Act (1868) Amendment Bill were agreed to. In reply to Mr. MONK, the CHANCELLOR of the EXCHEQUER stated that no steps would be taken by the Government during the recess with regard to the new Courts of Justice. In answer to Mr. KINNAIRD, the LORD-ADVOCATE expressed his regret at the rejection of the Parochial Schools (Scotland) Bill by the House of Lords, and declined any absolute pledge for next session, though he hoped the Bill might be reintroduced with better hopes of success. On Wednesday Mr. MONSKILL stated, in answer to Mr. M'ARTHUR, that the Government had determined upon introducing the system of religious equality into the island of Jamaica, and that the governor had been instructed to avoid, as far as possible, even the appearance of giving exclusive favour to any one denomination. Mr. VERNON HARCOURT gave notice for next session of a resolution for the abolition of the ratepaying clauses of the Reform Act. The House was then summoned to the Upper House to hear the Queen's Speech, and the session was brought to a close with the usual formalities.

City Intelligence.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 92½ to 92¾ for Money, and 92½ to 93 for Account; New and Reduced Three per Cents., 92½ to 93; Bank Stock, 244 to 245; Exchequer Bills, March, par to 5*s.* 6*d.*, and June, 2*s.* to 7*s.* 6*d.*; India Five per Cents., 111½ to 112.—FOREIGN: Spanish, 29 to 30; Egyptian (1864), 91½ to 92½; Ditto (1868), 77½ to 78½; Viceroy's Seven per Cents., 81 to 81½; Ditto Nine per Cents., 97½ to 97¾; Italian, 55½ to 55¾; Mexican, 12 to 12½; Peruvian, 79½ to 79¾; Russian (1866), 93½ to 94; Orel, 83½ to 84; Charkof, 82½ to 83½; Nicolas, 67½ to 68½; Moscow, 81½ to 82½; Turkish Five per Cents., 44½ to 45; Ditto Six per Cents., 66½ to 67½; United States 5-20 Bonds, 88½ to 88¾; Erie, 19½ to 19¾; Illinois, 94 to 94½.

Metropolis and its Vicinity.

THE NEXT LORD MAYOR.—The ill-health of Alderman Dakin is admitted on all hands as a good reason why he should be passed over for 1869 and 1870. The

alderman next in succession for the Chair is Alderman Besley, who is prepared to undertake the duties of the office, and will ask the Livery on September 29 to return him to the Court of Aldermen as one of the candidates.

THE STAR OF INDIA—On Friday the Companionship of the Star of India was conferred by the Duke of Argyll, as representative of her Majesty, on some of the gentlemen who have been recently considered worthy of being enrolled in the order. At first it was proposed that the decorations should be bestowed in the midst of an imposing ceremonial, but the idea was ultimately abandoned. Only five of those to whom the honour had been awarded appeared in person at the India Office on Friday to receive their badges from the Duke of Argyll. They were Synd Ahmed Khan, Captain Meadows Taylor, Mr. Richard Price Harrison, Mr. G. N. Barlow, and Mr. Richard Vickers Boyle. They proceeded one by one into the Council Room, where the Secretary of State handed them their badges, with a few words of congratulation. The new Companions afterwards lunched together in one of the rooms of the India Office.

THE HOUSES OF PARLIAMENT—On Friday morning, about half-past 12, while the House of Commons was sitting, a loud explosion was heard in the enclosure on the east side of the tower, near the Speaker's landing-stairs. The police, on proceeding to the spot, found an empty canister which had contained gunpowder, and a yard and a-half of fuse, which was on fire at one end. It was immediately extinguished and thrown into the Thames by a gentleman who happened to be on the spot. The canister, which would hold about a pound and a-half of powder, is supposed to have been mischievously dropped from Westminster Bridge, as the grass close to the bridge wall had the appearance of being burnt.

GUSTAVE DORÉ IN LONDON—M. Gustave Doré and Mr. Blanchard Jerrold have been making a systematic exploration of London, from Wapping to Kensington, among high and low, with the view to a great work on the metropolis. It is said that M. Doré has made a most interesting collection of studies.

THE SALMON FISHERIES—The Select Committee appointed to inquire into the present state of the laws affecting the salmon fisheries of England and Wales, and to report whether any and what amendments are required therein, have reported that "in consequence of the late period of the session, they have been unable to complete their inquiry into the matters referred to them, and they have accordingly agreed to report the evidence taken before them, and to recommend to the House the reappointment of the Committee in the next session of Parliament."

SUNDAY TRADING BILL—Mr. Thomas Hughes, M.P., accompanied by a deputation of Lambeth tradesmen, waited on the Home Secretary on Friday, and presented a memorial, signed by upwards of 20,000 persons, complaining of the large increase of selling and hawking goods on Sundays, and of the great difficulty experienced by private members in bringing this subject before Parliament, and praying that during the recess her Majesty's Ministers would take the matter into consideration, with a view of making it a Government question.

NEW ROMAN CATHOLIC CHURCH—On Thursday week the foundation stone of a new Roman Catholic Church in Eden Grove, Holloway, dedicated to the "Sacred Heart," was laid by Archbishop Manning. At the conclusion of the ceremonial, which was of an elaborate character, the Archbishop alluded to the change of public opinion with regard to the Catholic religion, and argued that the current of feeling showed a tendency to Catholic ideas and Catholic practices, and a gradual uprising in favour of unity of faith which would ultimately bring this country under the sway of the Catholic Church. The new church is to be built from the designs of Mr. Pownall, in the early English style, and will be of red brick, with a tower. It is situated in a very prominent position, in the most thickly-populated part of Holloway, and is to have clergy-house and schools attached.

LONDON BRIDGE—The Court of Common Council, at its last meeting, sanctioned a report from one of its committees by which an extensive restoration of London Bridge will be effected. This step has been taken in consequence of repeated complaints from persons who are obliged to cross the bridge daily, and from many members of the Court, who alleged that it is the most neglected public way in the city, and a disgrace to the Corporation. Previously to the report of the committee being brought up, a petition was presented from the season-ticket holders of the London Bridge Railways, urging that further provision should be made for the foot traffic over the bridge. In accordance with the recommendation of the Committee, the carriage way of the bridge will be entirely repaved, the lamps repaired, the gates and railings at the top of the several sets of stairs repainted, and other repairs effected, at a cost of nearly 4000*l*. The carriage traffic across the bridge will be entirely stopped for 10 or 14 days during the progress of the works.

NEW FINSBURY PARK—On Saturday Sir John Thwaites, with most of the members of the Metropolitan Board of Works, formally opened and gave up to public use the new park near Hornsey, which is to bear the name of Finsbury Park. The ceremony occupied but a short time, and appeared to excite little interest in the neighbourhood. The site of the park is on the southern side of the Seven Sisters Road and Wood Green, with the Manor House on the east and the Great Northern Railway on the west. The cost of the whole park was 94,000*l*, of which sum property purchased and compensation absorbed 51,000*l*; works, 26,800*l*; shrubs and trees, 2100*l*. The cost of the freehold land was at the rate of about 17*l* an acre. It contains about 120 acres. St. James's Park is barely 83 acres, and the Green Park is only 71 acres, so that

the new park is more than a third larger than either, and is, in fact, next to Hyde, Regent's, Battersea, and Victoria, the largest park in London. The designs for laying out the park, the planting, and gardening operations generally, were the work of Mr. Mackenzie.

WORKING MEN'S INTERNATIONAL EXHIBITION OF 1870—A deputation of working men last week waited upon Mr. Bright, M.P., at the Board of Trade to ask him to bring in a short Bill early next session to protect the inventions that might be exhibited at the Working Men's International Exhibition to be held next year. Mr. Bright expressed his entire sympathy with the object of the deputation, and promised to comply with the request.

METROPOLITAN WORKING MEN'S CLUBS—The excursion of the London Working Men's Clubs and Institutes, on Monday next, to Hurstbourne Park, near Whitechurch, Hampshire, the seat of the Earl and Countess of Portsmouth, will be joined by a very large number of persons. Among the clubs whose members will join the excursion are the following:—Shaftesbury Hall (Notting Hill) Club, Brixton Hill Working Men's Club, St. Mary Charterhouse Working Men's Club, Clerkenwell Club, Greenwich Club, Hackney Working Men's Institute, Holloway Working Men's Club, London Artisan's Club (Newman Street), Peckham Working Men's Club, St. James's, Soho, Club, St. Anne's, Soho, Club, Southwark Working Men's Club, Bedford Institute (Spitalfields), Stoke Newington Working Men's Club, and Christchurch, Clapham, Club. The members of these clubs, together with those of the Foresters, Hearts of Oak, building, trade, and co-operative societies, who are expected to join the excursion, will probably bring up the number of excursionists to 1500; but Lord and Lady Portsmouth have expressed their readiness to provide tea in Hurstbourne Park for 2000 persons. Special trains will leave Waterloo Station at 9.10 and 9.30 A.M. on Monday for Whitechurch, and the Hon. Auberon Herbert, chairman of the Council of the Working Men's Club and Institute Union, as well as many leading patrons of working men's clubs, will accompany the excursionists.

THE CONDITION OF THE THAMES—The report of the conservators of the Thames for the past year was published on Tuesday. It says that the condition of the river near the main drainage outfalls at Barking and Crossness has continued to receive their anxious attention. Repeated surveys having convinced them that shoals have been created by the deposit from these outfalls, the conservators made a formal complaint to the Secretary of State for the Home Department, and although no further decrease of the depth of water or actual impediment to the navigation has yet been caused, the conservators find that the deposited matter now spreads over an increasingly extensive area of the bed of the river, and this fact must be regarded with considerable apprehension as to the results. The conservators feel it their duty to remark that a considerable portion of the sewage of the metropolis north of the Thames still continues to pass into the river between Chelsea and the Isle of Dogs. The extension of the system of steam-towing has made it obvious that the obstruction to the navigation, caused by Battersea and Fulham Bridges, ought no longer to be permitted. Without the authority of Parliament no effectual improvement can be made, and that authority will therefore be sought in the ensuing session. The conservators have not, they say, omitted any opportunity for improving the condition of the water. They have given the requisite notices to discontinue passing sewage and refuse into the river. In many cases the discharge has been stopped, and in many others non-compliance has arisen from the uncertainty as to the best mode of disposing of the sewage. In nearly every case the local authorities and others have now decided to adopt some practical scheme, so that in a short time the conservators hope they may be able to announce that sewage and other impurities no longer pass into the river westward of the metropolis. A scheme has been approved for the better drainage of the country near Oxford, by deepening and altering the channel of the river, but the conservators find it will be necessary to obtain parliamentary powers to enable them to carry it out satisfactorily.

MEETING ON THE DEPRESSED STATE OF TRADE—On Wednesday evening a meeting of working men was held in the Shoreditch Town Hall "to take into consideration the present critical state of the country, the depression of trade, and the general want of employment consequent on the importation of foreign manufactured goods, and to petition Parliament for a commission of inquiry as to the working of our commercial policy." The chair was taken by Mr. John Owen, who opened the proceedings in a brief speech, and was followed by Mr. Bartlett, Mr. Sangster, Mr. Brooks, and Mr. Rose, all of whom advocated a return to Protection from their own and most dissimilar points of view. They condemned emigration, because Englishmen might be wanted to defend their country; and condemned the French Treaty, on the ground that it gave protection to France, and the products of French industry. They disapproved, in fact, of all commercial treaties, and referred to the example of America to show that what was, whether rightly or wrongly, considered one of the most advanced countries in the world, protected the native manufacturers, or those who sought her shores, with stringent prohibitive duties, in order that their own industries might not be subjected to foreign competition. The present stagnation of trade, the increase in the number of bankrupts, the increase of pauperism, the increase of emigration, were all attributed to the spread of the principles of Free Trade. Most of the speakers admitted that food should be allowed to enter the kingdom duty free, but some recommended that when foreign articles were superior to those of our own production, a strong preferential

duty should be levied, while all were unanimous in denouncing a policy which gave to the foreigner every advantage which was refused to our own manufacturers. One of the speakers, a person called Riddle, declared against the aristocratic owners of the land in England, and, amid continued cries of "Question," went on to inquire why we kept Royal paupers in England, and why is our own real poor. The following resolution was then put to the meeting, and carried unanimously:—

"That the principle of Free Trade should be based upon equality of international exchanges; but other nations in England, and is the cause of the present depression of trade, meeting, therefore, considers it to be the duty of the Government to institute an immediate inquiry into the working of this unreciprocated Free Trade contributes towards producing what extent it may be limited, so as to produce an effectual remedy."

FALSE WEIGHTS AND MEASURES—At the Petty Sessions held at the Islington Vestry Hall on Tuesday 50 persons were summoned for having in their possession false weights and measures. Of these 23 were licensed victuallers; beer-shop keepers, four; warehouse dealers, four; dairymen, three; oilmen, three; chandler's-shop keepers, two; greengrocers, two; mongers, two; butcher, one; coal dealer, one; chandler, one; fishmonger, one; iron merchant, one; grocer, two. Two cases were adjourned, and one offender could not be found. The fines amounted to 20*l*.

PROPOSED FENIAN DEMONSTRATION—A "grand" Irish monster excursion to Hampton is advertised for Sunday, the 29th inst. "The committee," says an advertisement, "request that every intelligent Irishman who loves God and Fatherland will rally around the national banner on this occasion. Every representative of the several London districts will provide his own van, and take charge of his own contingent of patriots. The latter will meet at the central point of assembly, Lincoln's Inn Fields, whence the procession of Irishmen and the noble daughters of Erin, accompanied by bands and banners and outriders, whose duty it will be to open a free way for the assemblage, will proceed to the appointed spot at the charming and interesting village of Hampton. The names of the men who have favoured the excursion with their support and countenance form a sufficient guarantee that the excursion will be carried out in the true and undying spirit of nationality. Its object will be to make the influence and the power of our country visible in the heart of the enemy, and to raise upon English soil that glorious banner which has braved a thousand disasters, only to float victoriously again over the citadel of our tyrants."

FATAL EXPLOSION ON THE RIVER—On Thursday morning an explosion occurred on the river, opposite the Custom House, by which three persons lost their lives. A steam-tug, carrying an engine of 12-horse power, was lying near the Tower Stairs, when, in the absence of the engineer, who had gone ashore to buy fuel, the boiler suddenly exploded. The vessel was shattered into fragments; the boiler, which weighed nearly 2 tons, was driven upwards to a height of 60 feet, and the captain and stoker were blown to atoms. Some portions of the body of the stoker have been recovered, but those of the captain have not been found. Considering the crowded state of the river, and the close proximity of the tug to other vessels, it is remarkable that only one other case of personal injury occurred. This was a sailor on board the Rotterdam steamer Hollandia, lying a short distance off, who was so much injured that he died soon after reaching Guy's Hospital. Many of the surrounding vessels had their rigging much damaged, and several fragments fell on the deck of a Woolwich steamer, but no passengers were unhurt. The boiler was nearly intact, and no cause can be assigned for the accident.

FATAL COLLISION IN THE CHANNEL—On Sunday night the North German Lloyd steamship Deutschland, on her passage from Bremen to Southampton, came into collision off Hastings with the schooner Mary Boltwood, laden with flints from Dieppe. The schooner was cut in two, and sank immediately, the captain, who was on deck at the time, being rescued by the Deutschland, which stood by for upwards of an hour, but could neither see nor hear anything of the remainder of the crew, consisting of two men and a boy. It appears that the schooner saw the steamer not put her helm apart, according to the regulations, while on the part of the steamer it is stated that the schooner's lights were only visible at a short distance when it was too late to avert the accident.

SOLDIER HIGHWAYMEN—At the Woolwich Petty Court on Wednesday, three artillerymen belonging to the B Battalion at Woolwich, named Gault, Lunnan, and Hays, were charged with committing a highway robbery, with violence, on Mr. George Sturges, a man stealing from him a gold Albert chain, in Wood Street, and 10*s*. The prosecutor resides in the Blackheath Road, by Coombe Park, near Charlton, about midday on the 5th, when he saw the three prisoners coming towards him. One of them asked him if he would oblige them with a fusee. He was feeling in his pocket for one, when the prisoners Lunnan and Hays threw him with great force to the ground. Lunnan held him down, and, holding in his hand a large knife or dagger, threatened to murder him if he made any resistance or called for help. Hays then took his money, watch, and guard from his pocket. They then decamped, followed by Mr. Sturges for some distance, and on meeting a constable he gave information which led to their apprehension. The prisoners Gault did not take any active part in the robbery, but was wanted to see if anybody was coming along. Mr. Patten fully committed all the prisoners for trial.

THE HENDON MYSTERY.—As far back as June 28, a young woman called Elizabeth Warburton, a governess at Mill Hill, was found in an insensible condition on the rails of the Midland Railway, at Cricklewood, near Hendon. She was on the up goods line, and being seen by a youth employed in the neighbourhood he managed without assistance to remove her and to place her in a carriage, which he passed over the spot. Rumours and conjectures of all kinds at once started into existence, the most current being that she had been thrown out of the train on the up-line, in the expectation that she would be cut to pieces by the next train. She was taken to St. Mary's Hospital, where some time elapsed before she regained her senses, and it was not until Tuesday that she was well enough to be questioned. It now turns out that she had no fellow-passenger, but that looking out of the window, the door, which was unfastened, gave way, causing her to fall from the train, which must then have been travelling at the rate of from 25 to 30 miles an hour. She stated distinctly that she was not assaulted by any one, and that she never got into the carriage at any part of her journey. With regard to the bruises and other marks on her body, the medical gentlemen stated that all of them might have been caused by a fall from a train going at the rate of from 25 to 30 miles an hour.

STRUCK AT CHARING-CROSS STATION.—On Friday afternoon Captain Bowker, of the 109th Regiment, on his way from India, threw himself from the balcony of the smoking saloon of the Charing-Cross Hotel on the platform of the interior of the station. He was, of course, killed on the spot, his head being completely smashed. At the inquest on Monday it was proved that he had suffered from sunstroke, and was subject to fits of depression and mental derangement, and the jury returned a verdict of Temporary Insanity. One of the witnesses said that he arrived at the hotel a few minutes after the melancholy affair, to keep a dinner appointment with the deceased.

ATTEMPTED MURDER IN SOUTHWARK.—A daring outrage was perpetrated on Monday afternoon, in the neighbourhood of the Old Kent Road. In Trafalgar Road, just opposite the Victory Tavern, resides Mr. Peake, a Controller of Excise, with his family, all of whom had gone out except Mrs. Peake and her youngest daughter, aged about 15. At about a quarter to 10 o'clock Mrs. Peake, who was lying down in the back bedroom, was aroused by a man entering the room, and striking her a violent blow on the left temple with it, and then, supposing the chisel end of a "jemmy." He then turned to leave the room, but hearing Mrs. Peake cry out, he returned and struck her down with another blow, which fractured her skull. The daughter, who was upstairs dressing, on hearing the noise, ran to her mother's help, when she saw the man with the blood-stained "jemmy" in his hand. She rushed back, and having locked the door, ran to the window, and screamed for assistance. Mr. Wrigglesworth, the proprietor of the Victory Tavern, his barman, and others rushed to the place, but were too late to intercept the man, who escaped with a confederate, who was in waiting. No policeman could be found in the neighbourhood until one hour and five minutes after the discovery of the outrage. An examination of the premises showed that an entrance had been effected by breaking a kitchen door in the area, the steps leading to the front door acting as a screen.

PUBLIC HEALTH.—The Weekly Return of the Registrar-General of Births and Deaths in London and 13 other large towns of the United Kingdom, for the week that ended on Saturday, August 7, 4526 births and 3446 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 27 per 1000 persons living, being 27 per 1000 in London, 28 in Edinburgh, 24 in Dublin, 26 in Bristol, 25 in Birmingham, 35 in Liverpool, 33 in Manchester, 27 in Sheffield, 24 in Bradford, 28 in Leeds, 27 in Hull, 27 in Newcastle-upon-Tyne, and 29 in Glasgow. In Paris the annual rate of mortality in the week ending on August 7, was 22 per 1000; the rate in London during the seven days ending August 5, was 45 per 1000, in Vienna, 35 per 1000 during the week ending July 31. In London the births of 1070 boys and 1130 girls, in all 2130 children, were registered last week. In the corresponding weeks of 10 years, the average number, corrected for increase of population, was 2087. The deaths registered in London during the week were 1630. It was the 31st week of the year, and the average number for that week, corrected for increase of population, was 1634. The present return is therefore 4 below the estimated

The magistrates said that additional police officers should be stationed in the district.

BRADFORD.—At the Borough Court, on Wednesday, R. Dixon Smith, a builder and quarry owner, was charged with having unlawfully detained or falsely imprisoned Miss Mercy Wood, who is in a state of unsound mind. An intimacy commenced between the prisoner and Miss Wood many years ago. She was a person of money and property, and resided until late years with her mother in Westgrove Street. Some time after her mother's death her relatives, who knew she was subject to intervals of unsound mind, desired her to leave the house and place herself under their supervision and care, but she strongly persisted in rejecting all advice to this end. One day, when the matter of her removal had been the cause of some altercation and quarrel between Miss Wood and her brothers, the prisoner, on coming to the door and finding it locked, obtained a ladder, entered the house, and finding Miss Wood there, removed her in a cab. Since that time, said to have been more than four years ago, Miss Wood had been in the care of the prisoner, sometimes at his house in Infirmary Street, Bradford, and sometimes elsewhere, and all applications on the part of her sister to see her and speak to her have been refused repeatedly. Latterly the neighbours of the prisoner have been sometimes shocked to see Miss Wood in a state of nudity at the garret window of the prisoner, and it was through their complaints to the authorities that steps were at length taken to remove her from the prisoner's custody. On Friday, March 2, 1866, the prisoner received at the Bradford Banking Company's bank a cheque for 454l. 2s. 8d., payable to Miss Wood, and endorsed first by the prisoner and next by Miss Wood, and a tenant of Miss Wood had also paid her rent to the prisoner for the house which he let to her. On the 7th of July Superintendent Shuttleworth, of the Bradford police, entered the prisoner's house with a warrant, and found Miss Wood in bed in the garret—a room said to measure 2 yards by 4½ yards—crowded with furniture. She seemed much reduced and emaciated, and was removed to the union workhouse, and was afterwards sent as a lunatic to an asylum. The prisoner held the key of the staircase leading to Miss Wood's garret, and unlocked the door to allow the officer to make his search. Two surgeons gave evidence as to Miss Wood being of unsound mind. The prisoner was committed for trial, but admitted to bail, himself in 200l. and two sureties in 100l. each.

CANTERBURY.—The newly-appointed Archdeacon of Canterbury, Dr. E. Parry, in his first charge to the clergy, delivered at his visitation a day or two since, at St. Margaret's Church, Canterbury, said:—

"Few will be found to deny that in these days there is a larger to the Church from within and without. We are threatened by old perils re-appearing in modern forms, as well as by new dangers arising from causes which did not exist, or exist in less degree, and in other combinations, in earlier times. Time was when the Church in this country suffered from a general lack of zeal and earnestness, the traces of which, in spite of all our efforts, may still be detected. In our own day, thank God, those perils are few and far between where the work of God is not being pushed forward with an energy and vigour, the fruit whereof is plainly visible to the most superficial observer. But this very abundance of activity is not without its weak side. Earnest Christian men among the clergy and laity, impelled by a praiseworthy desire to advance the kingdom of Christ, and casting about for means whereby Satan's kingdom may be assailed, have had their hands upon ancient weapons long disused, and have furnished them up afresh. An elaborate and ornate ritual, appealing urgently to the senses, employed at first as it was said specially with a view to attract worshippers—a view with which few cannot cordially sympathise—has been made to centre around the exaltation of doctrines teaching the sacred mystery of the Eucharist, which the formularies of the Reformed Church of England have, I venture to think, wisely refrained from defining too closely on technical or philosophical words of human devising. How far these, our brethren, lay and clerical, imagine it likely that the Church of England would set herself seriously to the business of undoing the work of three centuries since I cannot presume to determine. If they think such a retraction possible, I cannot but think they fail to read aright the lessons of history and to interpret truly the direction of religious thought in this country. On the other hand, it would be equally unwise and ungenerous to ignore the material advantages which have accrued to the Church of England from the efforts of the religious school whose latest developments are thus prominently forced upon our attention. It has been asked by those holding widely differing views, whether we can afford to lose those men—to miss from our body the example of that strong zeal and love of souls? Is the Church in these realms, it is urged, to be narrowed down to the bare dimensions of a sect or party, from which all is diligently to be pared away which does not precisely square with the views of Christian practice and belief held by the majority? How this, one of the uppermost questions of the day is to be answered, time will show. The solution of the problem may be near at hand. Let us pray for the peace of Jerusalem. But not less obvious or real are the dangers from without. History is written rapidly in these days. A seven weeks war changes the map of Europe. A session of Parliament opens a new volume in the annals of the Church. The existence of a Church establishment which less than two years ago seemed founded upon a rock, is openly menaced, even in England, and certainly, if we are to stand when the threatened assault is made, we must be as one amongst ourselves. The common safety demands loudly a certain oneness of action in dealing with the dangers which surround and threaten our national Church."

DEVONPORT.—The Secretary of State for War has acceded to an application that the trial of private Taylor, who shot Corporal Skulha at Devonport Barracks last week, shall take place at the Central Criminal Court instead of at Exeter Assizes. Private Dixon, who shot his corporal at Aldershot, will also be tried at Newgate. In the case of Taylor the plea of hereditary insanity will be put forward for the defence.

DORCHESTER.—Jonah Detheridge, who was convicted at the recent assizes for the murder of a warder called Trevett at Portland Convict Prison, was executed on Thursday within the walls of the county gaol. During his trial his conduct was brutally indifferent, and neither the chaplain nor the Wesleyan minister who

visited him had the slightest effect in bringing him to a sense of his guilt or of the position in which he was placed. After being pinioned in the prison he attempted to run up the steps of the scaffold, but stumbled in the attempt to show his indifference. He was picked up by the warders, and led to the scaffold, where he took his place upon the drop perfectly unmoved. His last words were a fierce refusal to the entreaty of the Wesleyan minister who had attended him, to spend his last moments in prayer.

DURHAM.—The Sisters of Mercy, who have been for some time doing duty in the convent in Framwellgate, have departed in a body, without asking leave of the proper authorities. An insufficient allowance of food is the alleged ground of their desertion.

HONITON.—Great excitement has prevailed in this town during the week, in consequence of the sudden illness, through poisoning, of the rector, the Rev. Prebendary Mackarness, and his family. The rev. gentleman had some Devonshire junket on Sunday evening with his curate, the Rev. Mr. Littleton, Mr. C. C. Mackarness, three young daughters, a son, and two servants. On the following morning the rector was seized with vomiting as from poison, and every one else who had eaten the junket had similar symptoms. Doctors were called in, and the patients suffered severely. Up to Thursday, with the exception of the rector, all were progressing satisfactorily. Mrs. Mackarness and the youngest child, who did not have any junket, were not ill. A pig which ate the remains of the junket is expected to die. The poisoning remains a mystery. No suspicion of foul play attaches to anybody, and the poisoning is supposed to be accidental.

LANCASTER.—A bequest of 5000l has been left by the late Dean of Durham to the Northern Counties' Idiot Asylum, now erecting in this town, and Mr. Titus Salt, of Saltaire, has since forwarded to the committee of the charity the princely donation of 5000l.

LOUGHBOROUGH.—A shocking case of cruelty to a lunatic has just come to light in this neighbourhood. In consequence of information, a gentleman sent by the Commissioners of Lunacy, accompanied by the medical officer of the Leicestershire and Rutland Lunatic Asylum, several magistrates, and a police superintendent, visited a lodge-house in the parish of Sheepshed, near this town, occupied by a small farmer named Henry Black. They there found a lunatic, 74 years old, with his hands fastened in front of him by handcuffs and his feet encircled by manacles, occupying a small apartment, to the wall of which he was chained. From the farmer Black it was elicited that the lunatic's name was Bagley Wild, a relative of the late Mr. Wild, J.P., of Costock, Notts. He had been under Black's care for 30 years, and previously in another man's custody for a like period. During the whole of the time he had been kept chained up in the manner described. Black had been receiving 1l a week for his charge, who was well nourished, healthy, and clean. He was, however, never relieved from his chains, asleep or awake. When taking his meals he was fastened to a chair, and when he retired to bed at night he was fastened by chains to the bed, while the handcuffs encircled his wrists. He has now been removed to the county lunatic asylum.

MARGATE.—During the gale which blew from the W.N.W. on Monday night a vessel, supposed to be a schooner yacht, and having a gilt ball at the masthead, foundered a little to the eastward of Margate Sand head buoy. The name of the vessel has not been ascertained. It is supposed that the crew have perished.

MERTHYR.—The coroner's inquiry into the Ferndale Colliery explosion has been further adjourned for two months. This delay was necessary in order to clear the colliery of water, and to give increased facilities to the Government inspectors and the mining engineers in making a thorough examination of the pit. The bodies not yet discovered are also likely to be found when the water is removed. As far as the inquiry has gone the evidence shows that the management was always considered remarkably good, and that the only complaints were an occasional scarcity of horses, cogs, and rails.

NEWPORT.—A confession of an extraordinary character has just been made in this town by a boy named Charles Gritt, who says that he poisoned Miss Emily Collier, the daughter of Mr. Collier, oil merchant, in Dock Street, on Easter Monday. The boy, who was taken from the Industrial Schools at Caerleon, gave the young lady some wheat, some of which she ate. She told her mother that Charles had given her some wheat, and that it tasted very nasty. She was told to throw it in the fire, which she did, and it was noticed that it emitted a peculiar flame. In the evening the young lady was taken ill, and next day a doctor pronounced her case hopeless, paralysis of the brain having set in, and on the following Thursday she died. Mrs. Collier, it appears, had an idea that her daughter did not die a natural death, but no suspicion ever crossed the minds of the family that she had been poisoned. Mr. Collier had some choice fowls in his possession, all of which died about the same time in a very strange manner. The boy has now confessed that he got some poisoned wheat from the Caerleon schools, which he gave to Miss Collier, and that he also gave some to the fowls. There is no doubt that he attempted to poison Mr. Collier's eldest son by putting poison in his tea-kettle, as the young man was ill for a week about the time his sister died. The boy absconded after making the confession, but was soon captured by the police. On Monday he was taken before the borough magistrates, when he expressed his sorrow for what had happened, and said that he gave the young lady some poisoned wheat in order to see what effect it would have on a human being. He was remanded for a week in order to obtain evidence and the body has since been exhumed.

ORMSKIRK.—On Wednesday Lord Stanley presided

Provincial.

BIRMINGHAM.—At the borough police-court, on Wednesday, William Oram, tool-maker, of Aston Cross, and his wife, were charged with coining. A detective and two other detectives visited the house on Monday, and found there, and on the persons of the wife, a large number of counterfeit shillings and pence, as well as moulds, white metal, a galvanic battery, and all the appliances of counterfeit coinage. The woman was discharged, and the husband committed for trial at the assizes.

GLoucester.—The Rev. Canon Carter a Roman Catholic, attended last week before the magistrates to answer charges of riotous attacks upon the inmates of St. Nicholas Street Nunnery. He said that Sunday before last the nuns had been attacked by rough boys, and from chapel, that on the following Sunday they were surrounded and stoned, and the nunnery itself had been attacked. Stones were thrown over the walls into the garden, and the nuns were taking their exercise, and it was therefore asked for the protection of the bench.

at the annual dinner of the Ormskirk and Southport Agricultural Society, and addressed the meeting at some length on agricultural topics. In the course of his speech he took occasion to refer to the present land system, and to the proposal to substitute for it the ownership of the land by those who cultivated it. He said:—

"There was in the present day a school of thinkers, available and kindly hearted men,—men, no doubt, conscientiously possessed with the truth of the theory they set forth,—who believed that it would be a great gain to this country if the land were to be in general the property of those who worked it with their own hands. In other words, instead of our system of landlord and tenant, they wanted that peasant proprietary which already prevailed in many parts of Europe. Now that system was, in his mind, equivalent to the substitution of hand labour for machinery, and to the separation of the capital of the country from the soil of the country. To his mind, therefore, it involved not progress but retrogression—not going forward but going back. It was like going back from the system of the great factory, with its thousand hands, to the hand-loom weaver. It was ignoring, as he conceived, the entire tendency and all the requirements of modern industry and life. His own opinion was, that our threefold system of landlord, tenant, and labourer was economically the best and the most productive. If the tenant were degraded—he thought he always ought to be guarded, if he desired it—by leases and agreements fairly framed in the interests of both parties, then he saw nothing in the present system which involved any other dependence than the system of, not one-sided, but mutual dependence which must and ought to exist in a civilised country between one class and every other class."

PENDLETON.—A shocking murder has been perpetrated in this town. The dead body of a young factory woman, named Kate Macdonald, was found on Monday night in the canal, covered with wounds and bruises. Both arms were fractured, one in two places, the right collar-bone dislocated, five or six of the upper ribs on both sides were broken; and there were bruises and internal injuries of a frightful character, which had evidently been inflicted before death. At present there is no clue to the perpetrator of the outrage.

RYDE.—An inquest was held on Tuesday in this town on the body of Mr. Cornelius Grinnell, an American yachtsman, of New York, who had come to England for the purpose of taking part in the regattas. He had purchased at Cowes the steam-yacht Hawk, of 142 tons, and had recently been elected a member of the Royal Victoria Yacht Club. Mr. James Gordon Bennett, owner of the yacht Dauntless, said that he had known the deceased about 10 days, since his arrival at Cowes. He had seen him about three years ago in New York. He believed he lived in London, but he did not know his age. On the previous night he dined with deceased, at the Royal Victoria Yacht Club, and left the club with him and Mr. Homans, about 12 o'clock. As they had no rooms, the deceased offered to allow the witness and Mr. Homans to sleep in his sitting-room, at 35, Pier Street. They all three went upstairs together. In a few minutes witness went downstairs, leaving Mr. Homans and deceased upstairs. When he got to the front door he saw a body lying partly on the pavement and partly in the road. Mr. Homans and witness's servant ran downstairs, and said that Mr. Grinnell had fallen out of the window. He assisted in carrying the body upstairs. Blood was streaming from the back of the head. The deceased was quite sober when witness left the room. Mr. Sheppard Homans, of New York corroborated this evidence, and added that after Mr. Bennett went downstairs the deceased had an impression that Mr. Bennett was going to look for another room rather than intrude on his kindness, and he said, "I will see; I will get out on the balcony." He then drew up the Venetian blinds, opened the window, and stepped out. He disappeared, and witness not hearing or seeing anything of him, looked out of the window. Seeing no balcony, the thought flashed across his mind that he had fallen out. He looked out of the window and then ran downstairs and found the body lying under the window. He felt the pulse and found it perfectly motionless. In his opinion death had been instantaneous. He was sure he was quite sober, and wished to state that as strongly as words could convey it. Dr. Ollard said that he was sent for shortly after 2 o'clock, and found deceased quite dead, evidently from a fracture in the base of the skull. The jury returned a verdict of "Accidental death," and appended to it an opinion that the window was in an unsafe condition and required protection. At the request of Sir J. Burgoyne, their foreman, they expressed on behalf of the whole British community, and especially of the yachtsmen, their sorrow at the untoward accident to one of their visitors. The body of Mr. Grinnell has since been embalmed by the new American "Nekrosozoi" process, and will shortly be transmitted to New York.

SALISBURY.—On Saturday the Right Rev. Dr. Hamilton, Bishop of Salisbury, was committed to his last resting place, near the grave of his friend and predecessor in the see, the late Bishop Denison. The ceremony was peculiarly impressive, and both in the cloisters and in the cathedral itself, a vast number of persons were present to witness the proceedings. In the city the tradesmen's shops were closed and business suspended during the time of the funeral. The Mayor and Corporation and 200 of the clergy of the diocese in surplices formed part of the funeral procession, in addition to the Bishop's own immediate family, relatives, and personal friends, among whom were the Bishop of Rochester, Lady Herbert of Lea, Mrs. Gladstone, Sir E. Hulse, Lord Ernest Bruce, Mr. George E. Eyre, Sir F. H. H. Bathurst and Miss Bathurst, Mr. H. Seymour, M.P., Mr. E. Denison, M.P., &c. The pallbearers were Mr. J. Brymer, the Hon. Sidney Herbert, Earl Nelson, Mr. C. Raikes, Mr. J. Floyer, M.P., and Lord Heytesbury; the pall being of a violet colour, with a deep white border, and a large white cross down the centre. The coffin was of polished English oak, with a raised oak cross on the lid, at the foot of which was the following inscription,

engraved underneath a mitre on a brass plate:—"Gualterus Kerr Hamilton, S. T. P., Episcopus Salisburyensis. Obit. die 1 Aug. 1869. Æt. 69. Requiescat in pace." The funeral procession was met at the western entrance to the cathedral by the dean, canons, archdeacons, sub-dean, prebendaries, minor canons, lay vicars, and choristers. On the coffin being placed in the choir, the pastoral staff was laid upon it and the usual service was gone through, the lesson being read by the Rev. Prebendary Fraser, after which an anthem was sung, and a voluntary played on the organ as the procession passed into the cloister-green. The choral service at the grave was very touching, and bouquets and wreaths of flowers were thrown upon the coffin by the younger members of the Bishop's family. After the service had been concluded a hymn was sung by the choir, and joined in by those present, and the organ played the "Dead March" as the procession left the place of burial. At the bottom of the grave there was a cross formed of flowers, and around it, upon the ledge for the coffin to rest upon, were the words "O, death, where is thy sting? O, grave, where is thy victory?"

SHANKLIN.—The picturesque thatched public-house, built under the boughs of an old oak, overlooking the Chine, from which it derived its name, was destroyed last week by fire. On Wednesday night, between 10 and 11 o'clock, the back part of the roof was found to be in flames, which spread with such rapidity that no effectual efforts could be made to stay it. Neither the landlord nor the tenant were insured.

SHEFFIELD.—Another case of rattening has occurred near this town. A scythe-grinder, named Kay, who was in the employ of Mr. Hellewell, of Hackenthorpe, was rattened on the 5th inst. of three grinding bands. Kay is a member of the Grinders' Union, and is not backward in his payments; but it is believed that he works a little under the other men, and that this is the cause of the present proceeding, as well as of his having been rattened about 18 months ago.

USK.—A few weeks ago a forgerman, named Thomas Roper, delivered himself up to the police, stating that on the 15th June, 1867, he murdered a woman named Jane Edwards, at Llanbaddyoh, and threw her body into the Usk. It was said the police had got some evidence which would corroborate the prisoner's confession; but the grand jury at the Monmouth Assizes, on Friday, ignored the bill against the prisoner, who was accordingly not put upon his trial.

WIGAN.—The inquest on the persons killed by the Haydock explosion was resumed on Tuesday, when Mr. Higson, the Government Inspector, called attention to his circular of January last, suggesting discontinuance of the excessive use of powder. He put in another circular on the same subject, asking the colliery proprietors to confer with a view to remedy the evils complained of. The jury then returned the following verdict:—

"We find that the explosion was of fire-damp, caused by a shot igniting the gas brought from a fall in Pilkington Brow to Pilkington's Place; and we are of opinion that this explosion was greatly aggravated, and the loss of life considerably increased, by the great quantity of gunpowder in the mine. If proper care had been taken to remove the gas from the cavity in the fault, we think the explosion would not have occurred. We recommend that the coals be cut on one side, and that all blasting operations be carried on at night during the absence of workmen. We consider it objectionable for the 9-foot air to return through the 6-foot workings."

The coroner asked the jury whether they considered the explosion was a matter of accident, or wished the point to be left open. The foreman said they wished it to be left open, as they thought due care had not been taken about the cavity.

Ireland.

RETURN OF THE LORD-LIEUTENANT.—It was proposed some days ago in the Roman Catholic journals to give Earl Spencer a significant welcome on his return to Ireland, in acknowledgment of his efforts in passing the Irish Church Bill; but on Friday morning, on his arrival at Westland Row, only about 50 persons were present. Among them was the Lord Mayor, who regretted that he had no address to present to his Excellency, but promised to call together the Town Council to adopt one. Earl Spencer replied that he would be happy to receive it.

THE IRISH CHURCH CONFERENCE.—The Standing Committee of the Irish Church Conference held its final meeting on Wednesday in Trinity College. A letter from the Archbishops of Armagh and Dublin was read announcing that all the bishops who attended the recent meeting were of opinion that it was not expedient to re-assemble the Conference, as it would be distasteful to a large body of churchmen. The Committee expressed their deep regret at the decision, and their cordial concurrence with the resolution passed by the prelates on the 4th inst., declaring the desirability of convening the General Synod, representing clergy and laity in equal numbers, and their earnest desire that that object should be as speedily as possible carried out.

THE CHURCH BILL.—The Corporation of Waterford last week passed a vote of thanks to the Premier for the successful passing of the Church Bill.

THE ESMONDE WILL CASE.—At the adjourned Carlow Assizes the trial of the case of "Browne v. Esmonde" was opened before Mr. Justice Lawson. The plaintiffs as executors propounded the will of the late Lady Esmonde, the principal bequest in which was a sum of 30,000*l.* to Trinity College to found a collegiate institution in the county of Wexford in connection with it, to be called "The Grogan College." It will be recollected that the case was tried last year in the Probate Court before Judge Keatinge and a special jury, who, after a trial which lasted nine days, were discharged without coming to an agreement. Judge Keatinge having resigned, Judge Warren declined to hear the case on the second trial, having been counsel for the plaintiffs on the first occasion; and in

exercise of the jurisdiction conferred by the Probate Act he directed a trial before Mr. Justice Lawson. Mr. Dowse opened the case at great length, and said that the will was dated the 17th of 1867, and that by it Lady Esmonde left property (the entire of which, after deducting amount to 21,000*l.*) to Trinity College, for the purpose of founding a collegiate institution in the south of Ireland, to be called Trinity College. In addition to this principal bequest considerable sums for other charitable purposes had disposed of almost all her real property at the time by deed, and settled the greater part on the Countess of Granard, who had been her daughter, but as the Countess had become a Catholic, her mother determined to apply to the personal property to Protestant purposes, and only real estate which she possessed at her death. Consequently the only property in which the Lady Granard were interested, was a small property in Wexford worth about 7*l.* per annum. Her testamentary intentions, the position of the Church, the danger which threatened it, Mr. Butt's motions in Parliament in reference to Trinity and other public events. Mr. Butt addressed the jury for the defendants, and called as his principal witness the Countess of Granard, who deposed that she had prevented from speaking to her mother by her Deane, and that her mother showed no resentment her for changing her religion. Dr. Bowen, on the other hand, made, and the servants were called to show that was under the influence of those around her. Tuesday Dr. Ball summed up for the defendants, and abandoned the charges of undue influence and Mr. Macdonogh replied for the plaintiff. Mr. Justice Lawson, in charging the jury, confined their attention to the question of capacity at the time of the making of the will. The jury, after 18 minutes' deliberation, found a verdict establishing the will.

THE ORANGE ANNIVERSARY.—On Thursday celebration of the anniversary of the relief of Londonderry took place in that city with unusual pomp. It was attended by persons from all parts of the county. The procession was of enormous length, and at intervals stands of colours were displayed. A grand service took place at the cathedral, in which the Bishop of Down took part, and the Rev. Mr. Carpenter preached a sermon. Later in the day Mr. Johnston, M.P. presented with an address, a sash of honour, and a medal. Although great enthusiasm was manifested, the celebration passed off in the most orderly manner.

THE FENIAN OATH.—A Dublin paper professes to be a copy of the Fenian oath, found in a constabulary in a public-house in a county where agrarian crime is prevalent. The initiated, after swearing to be "true and loyal" to the brotherhood, each member of it, declares that he will owe allegiance to any Protestant or heretic Sovereign, prince, or potentate, and will not be "bound by oath delivered to him by them or their subordinates, they magistrate or else." He also pledges himself to aid in every way he can any of the brethren in trial, and, if a witness, "to disregard any oath sworn to him." After binding himself to exterminate heretics, he solemnly swears to "shoot, destroy, or pursue to death, any of the brotherhood who turn informers or traitors, or who may refuse to perform any duty ordered by his committee or officers, or any duty which may fall to him by law, or otherwise to execute."

Scotland.

THE AMERICAN CONSULATE AT GLASGOW.—In consequence of the refusal of the English Government to grant an *exequatur* to Captain James Hignarty, an American Fenian, whom President Grant has appointed United States' Consul at Glasgow, Mr. Motley has named Mr. Eastman, at present United States' Consul at Cork, to be Consul at Glasgow pending instructions from Washington.

THE MURDER AT GREENOCK.—On Saturday the brothers Barbour were fully committed for trial on a charge of murdering Mrs. Reid, in the house occupied by them in Greenock, on Saturday week. Ephraim Barbour, the elder brother, is charged with the crimes of assault, with intent, &c., and is charged with murder, without the aggravation of any other crimes.

Railways.

NARROW VERSUS BROAD GAUGE.—The Western Railway Company have given notice of suspension of their traffic between Hereford and Gloucester from to-night till the 23d inst., in order that the line may be converted from the broad to the narrow gauge. The line between Ross and Grange Court will be converted from the 23d to the 31st inst. for the same purpose.

WORKMEN'S TRAINS.—On Friday night a meeting was held at Silchester Hall, for the purpose of promoting cheap travelling for workmen on the Metropolitan and Great Western Railways. Mr. Stedman took the chair, and the subject was of great importance to the workmen of the surrounding districts, who, to the number of 5000, had signed a memorial to the Government, and he now asked the meeting to adopt. Letters were read from Archbishop Manning, Sir H. A. Hall, M.P., and others; and Mr. Cookson then moved the following resolution:—

"That it is the opinion of this meeting an extension of the plan of running trains at cheap fares, and at such hours as to be convenient to the workmen of the surrounding districts."

consists of 2334 Beasts, 8890 Sheep, and 234 Calves, from Ireland there are 250 Beasts; and 2040 from Norfolk and Suffolk.

Table with columns for s. d. s. d. and rows for Best Scots, Herefords, &c., Best Shorthorns, 2d quality Beasts, Best Downs and Half-breds, Do. Shorn.

There are a few more Beasts than on Thursday last, the trade is very dull for inferior qualities, but choice descriptions fully maintain Monday's quotations.

Table with columns for s. d. s. d. and rows for Best Scots, Herefords, &c., Best Shorthorns, 2d quality Beasts, Best Downs and Half-breds, Do. Shorn.

METROPOLITAN MEAT MARKET.—Aug. 14. Best Fresh Butter .. 16s. per dozen lb. Second do. do. .. 14s.

MARK LANE.—MONDAY, Aug. 9. There was again a very small supply of English Wheat at this morning's market, which was sold at an advance of 2s per qr upon the prices of this day's night.

Table with columns for PRICE PER IMPERIAL QUARTER and rows for WHEAT, BARLEY, OATS, RYE, BEANS, PEAS, MAIZE, FLOUR.

FRIDAY, AUG. 13. We have had changeable weather since the 6th inst., some days having been very wet, and the temperature low for the time of year.

The arrivals of English grain during the week have been very small, of foreign Wheat and Oats good, and of Barley none.

Table with columns for Wheat, Barley, Oats, Flour and rows for English, Irish, Foreign.

LIVERPOOL, August 10.—We had a good attendance at today's market, and for Wheat a good demand, at an advance of 7d. to 8d. per cental on red, and fully 6d. per cental on white descriptions.

SEED MARKET. The past week has witnessed the last touch given to the Seed Adulteration Bill. During the last month the minds of the trade have been so absorbed in watching its varying changes in its passage through both Houses of Parliament, that they have confined their purchases to the sowing requirements of the present moment.

White Mustard, and to note that all seeds required for present sowing are in good demand at very full rates.

Table with columns for AVERAGES and rows for Wheat, Barley, Oats and dates from June 26 to July 31.

WANTED, as FOREMAN, a middle-aged married Man, without children, who can be well recommended.

WANTED, an experienced FORESTER, who can also take charge of a Garden and keep Accounts.

WANTED, a YOUNG MAN, to assist in the Houses, under a Foreman. One accustomed to Grow for Market preferred.

WANTED, a MANAGING SHOPMAN for a Retail Business. Unexceptionable references indispensable.

WANTED, as SHOPMAN, Retail, a thoroughly experienced Man, able to take entire Management.

WANTED, a YOUNG MAN, who thoroughly understands the Care of Cattle, and Milks well; also care and Breeding of Poultry, and to assist in the Garden.

WANT PLACES.—Letters to be Post Paid.

EXPERIENCED GARDENERS (or as GARDENER and BAILIFF), of various qualifications, recommended to Gentlemen.

Gardeners and Under Gardeners. WM. CUTBUSH AND SON beg to state that they have at all times on their books MEN of various qualifications.

MR. WM. PAUL begs to announce that he has made arrangements by which he will be enabled in future to furnish Gentlemen with the NAMES, ADDRESSES, &c., of GARDENERS, and GARDENERS and BAILIFFS, of various qualifications.

To Gardeners and Bailiffs (Head, Foreman, or Under). JAMES CARTER AND CO. having many applications for the above request that those WANTING SITUATIONS send NAME, ADDRESS, and COPIES of TESTIMONIALS for ENTRY in their FREE REGISTER.

GARDENER (HEAD).—A Clergyman strongly recommends a married Man (with one child), age 32, who has a thorough knowledge of Vines, Forcing, Greenhouse uses, and Flower and Kitchen Gardening.

GARDENER (HEAD).—Age 30, married, one child. Has a thorough practical knowledge of Gardening in all its branches; is also well versed in Land and Stock.

GARDENER (HEAD).—Age 39, married, thoroughly understands the profession in all its branches; also the management of Land, if required.

GARDENER (HEAD).—Age 35, married, understands the general Management of Kitchen and Flower Gardens, also Fruit and Plants.

GARDENER (HEAD).—CHARLES ROBERTS, Head Gardener to W. S. Tollemache, Esq., Dorfold Hall, Nantwich, Cheshire.

GARDENER (HEAD).—Age 39; thoroughly practical in every branch of the profession, understands Land and Woods, if required.

GARDENER (HEAD).—Age 38, married, Scotch, thoroughly understands Vines, Stove and Greenhouse Plants, Kitchen and Flower Garden.

GARDENER (HEAD).—Married, no family; thoroughly understands the Management of Pines, Vines, Early and Late Forcing, Stove and Greenhouse Plants, Flower and Kitchen Gardening.

GARDENER (HEAD).—Married, no family; an intelligent, sober, trustworthy Man, with a thorough knowledge of every branch of the profession.

GARDENER (HEAD).—Age 39, married, no incumbence; thoroughly understands Forcing of Vines, Pines, Melons, Cucumbers, &c., and Kitchen, Fruit, and Flower Gardening.

GARDENER (HEAD).—Age 28, has a thorough knowledge of Grapes, Peaches, Cucumbers, Melons, Stove and Greenhouse Plants, and Flower in Kitchen Gardening.

GARDENER (HEAD).—Single, has had 13 years' good experience in the Cultivation of Stove and Greenhouse Plants, Early and Late Forcing, and the Management of Flower and Kitchen Gardens.

GARDENER (HEAD), or FOREMAN in a Gentleman's Garden.—Is an excellent Propagator, and has been most successful in the Cultivation and Management of Vines, Stove and Greenhouse Plants, Fruits, Flowers, &c.

GARDENER (HEAD, WORKING).—Age 31, married; practical experience in England's best (Kew and Chatsworth) Gardens.

SHOPMAN or CLERK.—Fourteen years' experience in all branches of the Seed Trade, good knowledge of Flower and Florist Business.

SHOPMAN.—Respectable; experienced; good character from last situation.

SHOPMAN.—A competent Person; has had knowledge of Plants.

GARDENER (HEAD, WORKING).—Perfectly stands the profession. Wife a good Laundress. Highly recommended.—A. B. Post Office, Epsom.

GARDENER (HEAD, WORKING).—Married, understands Forcing Fruits, Flower and Kitchen, good character.—B. H., Messrs. Laws, Suffolk.

GARDENER (HEAD), where two sons are Peich, Melon, Strawberry, Cucumbers, Parsnips, Greenhouse Plants, and Flowering Plants, good character.—A. P. J., Strand, R. & S. Street, Suffolk.

GARDENER.—Age 35, married, situation.—W. W., Highgate, London.

GARDENER.—D. THOMSON, Drumming Garden, a married Man, of good practice, and where trust is appreciated.

GARDENER.—Age 28; desires situation in Nursery. Thirteen years' experience in industry. Good references.—G. S., West, London.

GARDENER (SINGLE-HAND).—Age 25, in Incumbence; well understands Flowering and Early and Late Forcing. Total Abstinence.—H. G., Seers, London, S.E.

GARDENER (SINGLE-HAND).—Age 23, eight years' experience in Melons, and Cucumbers, Stove and Greenhouse, and Kitchen Gardening.—H. JAMES, Highgate, London.

GARDENER (SECOND).—Married, understands and Greenhouse Plants and Vines, also a knowledge of Nursery.—J. A., 1, Barbara Cottages, Masterman's Park, Leyton, Essex.

GARDENER (UNDER).—Age 20, responsible to pay a small Premium.—F. P., Staple Road, Kent.

GARDENER (UNDER).—A respectable Young Man, no objection to Nursery. Three years' experience in Nursery.—N. S., Green, News Agent, Whitechapel.

FOREMAN, in a Gentleman's Garden. Good experience in all branches of the profession. Vineyard Nursery, Hammersmith, W.

FOREMAN, in a Gentleman's Garden. Good practical experience in all branches of the profession. Coleridge, S.W.

FOREMAN.—Mr. WHEELER would recommend his FOREMAN to any one requiring an energetic Young Man. A situation preferred. Manage the Plants, and gain a knowledge of the business. F. MOULAND, Sir F. H. Goldsmid, Bart., M.P., at the Regent's Park, N.W.

FOREMAN, or FOREMAN and PROPAGATOR. Well up in the Propagation and Growing of Stove and Greenhouse Plants, Ferns, Orchids, &c., and to take the Management of the Office Nursery. Good references from previous employers.—W. M., Walk, Beverley.

PROPAGATOR (FOREMAN, in a Nobleman's Garden). Great experience in the Propagation of Stove and Greenhouse Plants, and all other Plants, and in Nursery work. Good references.—O. Y., Mr. W. R. Red Bear Inn, Marsh Lane, Leeds.

PROPAGATOR (ASSISTANT). Well up in Grafting Rhododendrons, and all other references.—Y. Z., Lewis S. Woodthorpe, Manor, Healding, Essex.

BUCHANAN, David, in a Nobleman's Garden. To recommend an active YOUNG MAN, age 20, doors. Excellent character.—Address as above.

FRUIT FORCING.—FELTON, a Nobleman's Garden, in the parishment, where he could tourney Early and Late Fruit. Large and first-rate scale.—Apply, Birmingham Nursery, Road, Edgbaston, Birmingham.

IMPROVER, in a Nobleman's Garden. No objection to pay a Premium.—Mr. RICHES, Road, Isleworth, W.

IMPROVER, in a Nobleman's or Gentleman's Garden. Age 20, respectable, strong, active. Would give a Premium.—Excellent character.—A. B., Post Office, Epsom, Surrey.

IMPROVER.—A Young Man, who has had experience in Gardening. Would give a Premium.—A. D., 30, Pitt Street, West Street, London.

IMPROVER, in the Seed and Florist Business. Age 17; has had some experience in a Seed Nursery. Destructive of experience in the Garden. Wages not object as improvement.—C. B., Mr. Braden's, Post Office, Smithfield, E.C.

STEWARD, or AGENT, on a Gentleman's Estate. Age 31; thoroughly understands the Breeding and Management of Poultry; can Plan New Buildings and Measure.

AGENT, or ASSISTANT LAND AGENT. The Advertiser has for several years been in the Management of large Estates in Norfolk and is acquainted with the Agriculture of the county. High character will be given.—F. W., care of Solicitor, 17 and 18, New Bridge Street, London.

UNITED STATES.—President Grant has gone on a
 to the interior of the States of New York and
 Virginia. The Radical press claims that President
 recent expression of sympathy with the
 branch of the Republican party in Mississippi
 intended also to apply to the entire South. It is
 that the course taken by the President has
 great discontent in the South, and that one of
 consequences will be that the Conservative Repub-
 of Mississippi will unite with the Democrats
 nominate Mr. Dent as Governor on the
 Democratic ticket. The *New York Herald*
 regret at the President's open avowal
 sympathy with the Mississippi Radicals, as
 interference on his part; and says
 President Grant's intention was good, but
 he is inexperienced and a mere instru-

 Ditto Eight per Cents., 90½ to 91½.

Metropolis and its Vicinity.

THE FORESTERS' FETE AT THE CRYSTAL PALACE.
 —The "Foresters' Fete," one of the events of the year
 at the Crystal Palace, took place on Tuesday. The
 weather was favourable, and nearly 69,000 members of
 the fraternity and their friends attended it. Robin
 Hood, Maid Marian, Friar Tuck, Little John, and
 their companions had many representatives, and the
 revels were brought to a close with a display of foun-
 tains, and an ascent of three balloons.

THE THAMES AT BARKING.—Mr. Rawlinson last
 week closed the inquiry on which he has been engaged
 for some time past on the effect of the metropolitan
 drainage on the river at Barking. The inhabitants of
 that town had memorialised the Home Secretary to the
 effect that the sewage was filling up Barking Creek,
 fouling the river and impeding its navigation. The
 Metropolitan Board of Works in reply, produced
 several engineers, who contended that the sewage
 matter emitted from the large sewers in London did
 not produce shoals, and that the sewage discharged
 from the outfalls was carried out to sea, and did not
 lodge on the banks, or return up the stream. On the
 other hand, it was proved that the sewage had been, at
 least occasionally, discharged when the tide was
 running up, sluices having been opened without
 authority. Evidence was also tendered as to the
 character of the mud deposited in Barking Reach, but
 Sir J. Karlake, on the part of the Board of Works,
 prevented its reception on the plea that he had no in-
 structions as to the line of cross-examination. Mr.
 Lloyd, however, in reply, stated that Dr. Letheby had
 reported that the mud was black and foetid, and in a state
 of active putrefactive decomposition. When examined
 with the microscope he found it to consist of broken-
 up sewage matter, with the remains of myriads of
 animalcules, and a large quantity of carbonate of lime in
 a partly crystalline state. Dr. Letheby further stated,
 "that the accumulation of large quantities of this mud,
 at the sewer outfalls, might be a cause for serious
 alarm, especially as it there met with sea-water, the
 sulphates of which might, by their chemical decompo-
 sition by the putrefying mud, occasion the escape of
 sulphuretted hydrogen, and set up that remarkably
 offensive change which was characteristic of the action
 of sewage upon sea-water." The evidence of Dr. Way
 was also tendered to the same effect. It was further
 stated, that so far from the sewage being annihilated,
 or even imperceptible at half a mile from the
 outfall, the stench was occasionally perceptible as low
 as Erith Reach or six miles and a half below the
 northern outfall; whilst the banks of the river four
 miles down, which used to be tolerably clean shingle,
 were deeply covered with sewer mud.

DR. CUMMING AND THE ECUMENICAL COUNCIL.
 —The Pope having called a General or Ecumenical
 Council for the 8th of December next at Rome, and
 invited the Christians of the whole inhabited world,
 including schismatics and heretics, to attend it, Dr.
 Cumming, of the Scotch Church, determined to accept
 the invitation, but being "in some degree acquainted
 with the subject," he addressed himself to Archbishop
 Manning, in order to discover, if possible, what kind of
 reception he, as a Protestant, was to expect. He stated
 that he was prepared to explain to the prelates in
 Council assembled why he and his brother Protestants
 reject the authority and doctrines of Rome, that
 whatever the Council might decree, he was prepared
 to adduce a contrary decree from the canons of
 previous Councils, or from Bulls or Encyclicals of
 Popes, or from both, having found in the history of the
 Church that Council had decreed against Pope and
 Pope had retaliated against Council, that Pope had
 contradicted Pope, and Council had anathematised
 Council, and that in the Romish Church there had
 been a historic *concordia discors* which rendered it in
 all respects the most disunited Church in Christendom.
 The Archbishop replied that the modes of procedure
 to be observed at the Council would be deter-
 mined by the supreme authority; but he sent Dr.
 Cumming copies of certain works in which he
 might find useful information on the subject.
 In one of these works there was a passage containing
 nothing less than the infallible judgment of a Pope
 on the reception to be accorded to a schismatic or
 heretic appearing and claiming to be heard at a

General Council." From this ordinance Dr. Cumming
 learnt that as a preliminary proceeding he would
 be required to "avail his petition to the tribunal
 and the judge" or, in other words, to recognise
 the authority of the Council according to its own
 pretensions, and to promise submission to its judg-
 ment under penalties exceeding severity. Not being the
 prospect of being consulted in the future, he
 addressed to the Pope an epistle in a state of which the
 following is a translation —

"Holy Father,—You have been pleased to invite to the
 Ecumenical Council the Protestants and those who are
 divided and separated from the Roman Church. We are
 heartily gratified for the invitation, and we are
 desirous to be present at the Council. I have sent many letters to
 you, and I have sent many letters to the Pope, and I have
 sent many letters to the Pope, and I have sent many letters
 to the Pope, and I have sent many letters to the Pope, and

the theory that death had been caused by violence, and not by accident. A verdict was returned of "Wilful murder against some person or persons unknown;" and the Mayor, who was present at the inquiry, stated that a reward would be offered for information on the subject.

PLYMPTON—An inquiry was concluded in this town, on the 12th inst. concerning the alleged ill-treatment of a lunatic named Snawdon, by a man named Horn. The investigation was held in the presence of the district magistrates, Mr. Law, of London, appearing on behalf of the Commissioners in Lunacy. It appeared from the evidence that some time since the lunatic was placed under the care of Horn, who was to receive 15s. per week for his trouble, and was instructed to use handcuffs if his charge became violent. On the 17th ult. Mrs. Crews, who lived in an adjoining house, heard a sound of blows, and some one calling out as if in pain. She ran upstairs and was able to see into a room where Mr. Snawdon was lying on the floor; the defendant had his legs across his neck and was beating him with a stick. Ultimately he was handcuffed and tied to a tree; the handcuffs were tied with some thick rope, which Horn threatened to place around the lunatic's neck if he did anything again. For the defence it was contended that, as the lunatic was amenable to those only who showed themselves his masters, the alleged ill-treatment was quite necessary to control him. The defendant was fined 2l. and costs, with the alternative of two months' imprisonment.

SHEFFIELD—On Monday a great demonstration of colliers belonging to the South Yorkshire Miners' Association, was held in Hyde Park in this town, and was attended by upwards of 5000 miners. Many of the processionists afterwards left the park, and went to the Warren, where a number of non-unionists who work for Mr. Huntsman live. There are six cottages in the row, inhabited by persons named Hadfield, Glover, Ensor, Clark, and Mangles. A crowd of roughs were seen to go up to the houses, followed by a large crowd of men and women. Stones were thrown, and the women in the houses at once closed the doors and fastened the shutters. This, however, proved no protection, for instantly stones of large size were hurled through the doors, shutters, and upper windows. The inmates tried to escape, but were beaten back, and the women had to rush with their children into the cellars and back kitchens. The work of destruction was continued until not a whole door or window-frame remained. A number of the roughs then entered the houses, and smashed everything breakable. The bedrooms were visited, drawers and boxes were ransacked, and various movable articles, including Bibles and other books, were used as missiles, or torn up and scattered about the place. All this could be seen from Hyde Park, and Sergeant Bradbury, who was in command of a force of police officers at the grounds, sent a number of men to the scene of the riot. On the approach of the officers the mob dispersed. In the lower rooms of the houses there was a scarcely a whole article of furniture, while upstairs the beds were covered with large stones. The walls in many places were broken in. The houses of those who were denounced as knobsticks suffered most. The women state that among the mob were many wearing the decorations which appeared in the procession.

WINDSOR—Frequent complaints have appeared in print of the fees levied by the vergers of St. George's Chapel from all visitors. At last the Dean has taken a step to put an end to such complaints by affixing a notice at the north and south doors, stating that the Chapel may be seen every week-day from 12 till 4, and that the officers of the chapel are forbidden to receive any gratuity. The Chapel therefore may henceforth be seen as freely as the State apartments in Windsor Castle, which are under the control of the Lord Chamberlain's department, it being her Majesty's command that the officials who accompany visitors over the Castle shall not receive any gratuity whatever.

Ireland.

GREAT ORANGE DEMONSTRATION IN MONAGHAN.—The Orange demonstration at Clones, county Monaghan, for which great preparations had been making during the preceding fortnight, took place on Saturday. The meeting was convened for the purpose of enabling the Orangemen of Monaghan and the adjoining counties to unite in an emphatic protest against the conduct of the Government with regard to the Irish Church, the administration of justice, the Party Processions Act, and the recent dismissal of Captain Coote from the office of high sheriff. The meeting took place in Hilton Park, the seat of Mr. John Madden, J.P., and D.L., and was attended by about 20,000 persons. A great number of lodges—who marched in military array from their respective districts—mustered on the ground. In spite of the Party Processions Act the lodges marched with flags flying and bands playing, great numbers of the brethren wearing the emblems of the order. Many of them were armed, and at one part of the proceedings, at a signal given by a cannon shot, a continuous discharge of small arms was kept up for nearly two minutes. Great preparations had been made by the authorities to preserve the peace, for which purpose a squadron of hussars, a company of infantry, and a large body of constabulary had been drafted into Clones on the preceding day. A number of detectives were also brought from Belfast, but did not succeed in gaining admission to the grounds, as none but members of lodges were permitted to pass the gates, which were guarded by persons who keenly scrutinised and repelled every intruder. The chair was taken by Mr. John Madden, and, after addresses had been delivered by the Chair-

man, the Rev. Mr. Woodright, Captain Madden, Rev. Mr. Burnside, and other gentlemen, resolutions were unanimously adopted denouncing the Government with reference to the Church Act, the dismissal of Captain Coote, and the Party Processions Act. During the meeting a letter from Colonel Archdall, secretary to the Grand Lodge of Fermanagh, was read, and received with strong expressions of dissatisfaction. It stated that he would neither himself attend nor advise the Orangemen of his district to do so, because he did not see any practical measure proposed in the programme of the meeting, and was of opinion that such demonstrations tended to endanger rather than to promote the cause of Protestantism and the peace and prosperity of the country.

THE IRISH CHURCH.—The Primate and the Archbishop of Dublin have issued an address to the clergy and laity, stating that they have summoned provincial synods to meet in Armagh and Dublin to reform the representation of the clergy previous to the reassembling of a synod, and requesting the laity to prepare a representation of themselves against the time of meeting. They explain that they are slow in offering suggestions, as they consider it the best course not to do so. They seem to court freedom of lay action, and express their readiness to use the parochial system and diocesan conferences if the lay brethren wish it. The Dublin Synod will meet in St. Patrick's on the 14th of September. A synod of the clergy of the diocese of Limerick was held on Tuesday, and a meeting of the clergy and laity of the diocese of Down, Connor, and Dromore was held in Belfast yesterday. The bishop presided, and it was resolved that a diocesan synod, consisting of all the clergy of the diocese and an equal number of elected lay communicants, shall be held on the 7th of September.

THE CHURCH BILL.—The Liberal members of the Corporation of Dublin passed a resolution on Monday that a committee of the whole House prepare an address of gratitude for the Irish Church Act to Earl Spencer, Mr. Gladstone, and Sir John Gray.

MEETING OF THE ROMAN CATHOLIC PRELATES.—On Wednesday the Roman Catholic bishops of Ireland met in conclave at Dublin for the consideration of the questions now before the public, foremost amongst which is that of education, which is understood to be the chief point to which the main efforts of the Roman Catholics will be directed in the next session of Parliament. The present conclave has been assembled in consequence of the position taken by Dr. Ball, on behalf of Trinity College, on Mr. Fawcett's motion in the House of Commons just before the prorogation, the object being to obtain for the Catholic University a share of the revenues of the College and the Queen's University.

THE LAND QUESTION.—The *Irishman*, in an article headed "The Plague of the Landocracy," says that the landocracy in Ireland is a sign of foreign usurpation, and that landlords hold that which is not theirs. Every acre, it says, has been stolen, and is unjustly withheld from the Irish people, who must get rid of the plague. Another article says, "If you desire freedom, you must be prepared, when opportunity comes, to seize it." An article, signed by the Fenian Kicknam, urges the people to get arms.

THE AMNESTY QUESTION.—A great meeting, convened by the General Amnesty Association, was held a few days since at Waterford. It was stated that 10,000 persons were present. Mr. Napoleon Buonaparte Wyse was in the chair, and the first resolution was moved by Mr. Pierce Marcus Barron, D.L. The meeting adopted a series of resolutions similar to those passed in other places. The proceedings were throughout orderly and decorous.

THE LONDONDERRY RIOTS COMMISSION.—The Commissioners appointed to inquire into the riots which occurred at Londonderry during the visit of Prince Arthur, held their first sitting on Thursday. It was stated during the sitting that the Corporation are already negotiating for a change of the police force.

Scotland.

THE STATUE OF MARSHAL KEITH.—The statue of Marshal Keith presented by the King of Prussia to the town of Peterhead, Aberdeenshire, was unveiled on Monday. The statue is a duplicate in bronze of a statue of the Marshal now standing in the Wilhelm Platz, Berlin, and was presented to the town of Peterhead in reply to a request made to the King of Prussia for the original marble statue, which it was erroneously understood had been removed not to be again erected. The day was observed as a holiday in the town, and from the ruins of the old Castle of Inverurie, where the Marshal was born and spent his early days, several banners were displayed. The Earl of Kintore officiated at the removal of the veil, amidst the enthusiastic cheering of an immense crowd of spectators. A banquet was afterwards given in the Town Hall, and in the evening a public dinner, presided over by Provost Alexander, was held in the same place. The proceedings were brought to a termination with a ball in Prince Street Hall. The pedestal of the statue bears the following inscription:—"Field-Marshal Keith, borne at Inverurie, 1696; killed at the battle of Hochkirchen, 14th October, 1758. The gift of William I., King of Prussia, to the town of Peterhead, August, 1868. *Probus viri, fortis obit.*" The statue represents the Field-Marshal in uniform, standing with a scroll in his hand.

MURDER AT GRETNA GREEN.—On Friday morning, an old woman, who keeps a lodging-house at Gretna, went to the police to ask for assistance to remove a basket-maker and his wife, who had been quarrelling with her lodgers, and on her returning alone, the man and woman set upon her and beat and kicked her to death.

Railways.

FATAL COLLISION ON THE GREAT NORTH BRITISH.—A deplorable accident occurred at Barnet, a few minutes before midnight on Monday, to which it occurred were a passenger train empty to Southgate, after delivering its cargo at Barnet, and a goods train on its journey from London, and it arrived at Barnet at 11.30, was then detached, and passed from the rear of the train, to draw the empty carriage whose name is Murphitt, asked the signalman, "Is it right, and the reply was, "When you see Arthur South, said to Murphitt, "Now, Harry, and right away; make haste and jumped into his break, when the signalman A goods train was waiting at Whetstone this the signalman sent the message "ready" and "come on," "line clear" being about a mile off, on the London line ought to have been held over to allow the passenger train into the goods train about half a mile from the engine meeting engine. Murphitt jumped stoker, Casseldean, did the same after he were both so much injured that they had to be taken to the Royal Free Hospital. The engine of the passenger train reared against the other, and in a moment was an explosion of the gasometer in the rear of the passenger train (the train being in the front of the engine, where it burnt the carriages and the van continued to burn daylight. At the inquest on Tuesday a man who examined the body as it lay on the ground that the body was entirely charred, headless, and less. The bones of the legs were all broken but whether the result of a fracture or of a blow could not say. After some further evidence taken the inquest was adjourned.

BREAK-DOWN OF AN EXPRESS ENGINE.—On Friday morning as the night express from London to the east-coast route, was passing between the Preston and Inveresk Stations, it was brought to a stand by the breaking of the crank of the engine. A large number of sportsmen were among the passengers on their way to the north, and the occurrence caused them no slight annoyance, as they had the prospect of losing the trains by which they were to travel from Edinburgh. A disengagement, however, happened at the time to be at Inveresk, and was despatched with the train to Edinburgh, and arrived an hour and 25 minutes after the time. Personal injuries were caused by the accident.

COLLISION ON THE NORTH BRITISH.—On Tuesday morning the London express train, due at 6.5 A.M., ran into a mineral train at Preston siding. It appears that the mineral train was 10 minutes behind time, and that while it was shunting the express dashed into it. Fortunately the driver of the express observed the danger at a distance off, and reversed his engine, thereby lessening the force of the collision. Two waggons were destroyed, and the line was blocked up for an hour and a half. The passengers in the train escaped with little injury.

CHEAP WORKMEN'S TRAINS.—On Wednesday a deputation from the Great Western and Midland Working Men's Association for promoting cheap travel at convenient hours, morning and evening, was received by the directors of the Great Western Railway at Paddington Terminus, Sir D. Gooch, Bart., Chairman of the Company, presiding. The deputation presented a memorial, explaining the benefits that would be derived by working men and their families from being enabled to reside in open and healthy localities, and at a distance from the heart of the City and West-end, at the same time pointing out that such an arrangement would materially add to the financial interests of the railway companies. A requisition, signed by 6000 residents in Notting Hill, Kensal Green, Shepherd's Bush, Hammersmith, and Kensington, was also presented to the board. Sir D. Gooch, in reply, stated that the board would give immediate attention to the memorial, and confer with the directors of the Metropolitan Company on the subject.

COMPENSATION CASES.—At the assizes at Chester a curious railway case was tried before Justice Hannon, the plaintiff, Mr. Jelly, a commercial traveller, living at Bedford Leigh, having been seriously injured in collisions on the same railway within two years. On January 7, 1867, the plaintiff was severely injured in a collision at Warrington, in which a special jury awarded him 2000l. In March 1868, he was able partially to attend to business. On February 15, 1869, while travelling from London to St. Albans, the train in which he was a passenger ran into some coal waggons, and the plaintiff was thrown into the back and head. He was now brought to bed in a litter, and appeared to be in a very bad state. He said that his income before the second collision was between 400l. and 500l. per annum. The jury returned a verdict in his favour, damages 1500l.—At the Shrewsbury Assizes an action was brought against the Shrewsbury and Hereford Railway Company by the father of a Miss Handley, who was killed on the 10th of February close to the Bromfield Station on the 10th of February last. The evidence proved that deceased was walking at the station for a mid-day train to Ludlow, when an express train from Shrewsbury came up at a great pace, and actually smashed her to pieces. She was governess at the parish school at Bromfield, and was 25l. a-year. The damages claimed were 2000l.

business has been slow, and this a further loss. Paris, Aug 19
—Wheat has been less active, with a declining tendency
Flour trade dull. The eight marks are quoted 35s. 9d. per
280 lb. The stock at the Halle is estimated at 4162 cwts.

The arrivals of foreign Wheat are good, of Oats moderate,
of other grain small. There was a small attendance at this
morning's market, and millers were not inclined to purchase
Wheat except at a decline of 1s. to 2s. per qr., and factors not
being willing to comply, but little business resulted. Spring
Corn unchanged in value, except Oats, which are cheaper

ARRIVALS.

	Wheat.	Barley.	Oats.	Flour.
English ..	260 qrs	-- qrs.	1350 qrs.	-- sks.
Irish ..	" "	" "	" "	" "
Foreign ..	31,640 "	1360 "	34,250 "	{ 2430 "
	31,900	1360	35,580	{ 2780 brls.

LIVERPOOL, August 17.—At to-day's market we had an
average attendance, and owing to the change to favourable
weather the Wheat trade has been inanimate, and the few
transactions that occurred were at irregular prices, chiefly at
a reduction of 2d from last market day. Flour in moderate
request, and prices unchanged. Indian Corn met with a
good demand, at an advance of 1s. 6d. per qr. Beans firm, and
rather dearer. Peas in good request. Barley steady.

SEED MARKET.

We have to report an increase of activity in the agricul-
tural seed trade, the recent showers having caused a brisk
demand for sowing Mustard and Rape seed; white Mustard
has advanced 1s. to 2s. per bushel. Essex dwarf Rape seed is
firm. A few samples of new English Mustard and red Clover
seed have been shown in Mark Lane. For new Trifolium on
the spot we have an eager inquiry. We have had a fair trade
for new home-grown Trifolium. Of red Clover seed the stock
held is under the average, and the plant from which the new
must be saved, both in this country and on the Continent,
being confessedly thin and bad, we consider it certain that
values will advance considerably beyond those at present
ruling. Of white Clover seed there is very little left on hand
from last season, and as the area of growth of the new crop is
small, this description will probably be dearer. The quantity
of yearling Trefoil seed in store is large, new seed will, how-
ever, be exceedingly scarce, and of very inferior quality; and
we note an advance of 5s. per cwt. within the last eight or ten
weeks. The use of French grown Italian Rye grass has during
the last few years largely superseded that of other sorts; it is
2s. per cwt. dearer than last week. Of winter Tares the stocks
are entirely exhausted, the reports of the new crop are very
contradictory; we can hardly expect to see prices go so high
as those reached last year; only one sample of new English
has appeared at market, and this was of very poor quality.
On the whole, taking present values and stocks into considera-
tion, we think the seed trade is just now in a very healthy
state, and encouraging to go into stocks.

JOHN SHAW & SONS, 16, Water Lane.

S & C regret having to caution Gardeners and others, but are compelled to do so, in consequence of an imitation, of common quality, having been sold for the genuine one, and which has caused many complaints to be made to them of Knives which were not of their make all of which are warranted both by Sellers and Makers. S & C PRUNING and BUILDING KNIVES are the best and the cheapest in the market. **SAYNOR AND COOK'S KNIVES** are the best and the cheapest in the market. **PAVING WORKS, Southwark.** Established upwards of 125 years.

ORMSON'S NEW PATENT ECONOMIC BOILERS,
 CONSISTING OF
ORMSON'S CONVOLUTED BOILER, ORMSON'S CONCENTRIC SADDLE BOILER,
ORMSON'S TUBULAR BOILER.

MANCHESTER EXHIBITION.

OPINIONS OF THE PRESS—EXTRACTS.

From the "Sheffield and Rotherham Independent."

"What has taken our attention most, however, is the tent and its fittings, belonging to Mr. Ormson, of Chelsea, and we are glad to see it, because of the perfect novelty of the ideas set forth by him. In the first place, Mr. Ormson exhibits a perfectly new construction of boiler to be used in the heating of hothouses and conservatories. There are three forms of the application of the principle, called respectively, the Concentric Saddle, the Convoluted, and the Tubular, and in all the object, so successfully attained, is to present the largest amount of surface to the action of the fire. In most Boilers, the heat is communicated only in a lateral manner, and a large quantity of heat is returned to no purpose. In the new Boilers double the amount of surface is obtained from the same amount of fuel. Being made of wrought iron gives them another great advantage. Cast-iron Boilers are subject to cracking from expansion and contraction, and fearful mishaps have not uncommonly been sustained in winter from such causes. Such accidents are impossible with Mr. Ormson's Boilers."

From the "Scientific Review."

"Ormson's Patent Convoluted Welded Wrought-iron Boilers.—Mr. Henry Ormson, of Stanley Bridge, Chelsea, has recently patented a Hot-water Boiler, the merit of which is the retention of the fire, and consequent exhaustion of its power on the various heating surfaces of the Boiler between the water spaces, allowing it to pass up the chimney.

From the front it not only shows the outer water chamber, forming the boiler in direct contact with the fire; but two convoluted surfaces, between which the flame must pass.

From the "Manchester Guardian."

"Particulars of such as deserve definite mention we must defer to another issue, in order that we may advert to one or two matters accessory to the main object of the Exhibition, and specially to Mr. Ormson's New Boilers for the heating of hothouses and conservatories. The speciality of these boilers is that while made of welded wrought iron, and thus rendered crack-proof (in strong contrast with Cast-iron Boilers), they are so constructed as to utilise the whole of the fire-heat, and give a much larger amount of heat for the same amount of fuel. This is accomplished by there being no lateral waste, as in all or most other Boilers. But those interested in the subject should go and view for themselves. Three forms of Boiler are exhibited, the Concentric Saddle, the Convoluted, and the Tubular. Mr. Ormson also exhibits some very ingenious Plans and Models for Gardens, by which the whole of the fruit-produce is secured, no matter what kind of season it may be. These we shall describe in our next."

"It not only checks the heat from passing away direct, but receives its full force; whilst the inner water-chamber is subjected in every part to the maximum of heat, and so is the inner surface of the other parts of the Boiler. Being set in a chamber of brick-work, it is evident that no appreciable loss of heat can ensue, consequently it must be most economical in consumption of fuel. These Boilers vary somewhat from the illustration, according to their size. They are adapted for heating Horticultural Buildings, Mansions, Churches, Public Buildings, &c., and, being made of Wrought-iron on the most improved system of welding that material, are very safe and extremely powerful Boilers."

HENRY ORMSON, HORTICULTURAL BUILDER TO HER MAJESTY,
 AND HOT-WATER APPARATUS MANUFACTURER TO THE COMMISSIONERS OF HER MAJESTY'S ROYAL PALACES AND PUBLIC BUILDINGS,
 AND TO THE ROYAL HORTICULTURAL SOCIETY,
STANLEY BRIDGE, KING'S ROAD, CHELSEA, LONDON, S.W.

GREEN'S PATENT IMPROVED TUBULAR HOT-WATER BOILERS

THE ABOVE BOILERS ARE

THE MOST EFFECTIVE AND DURABLE EVER INVENTED.

They can be set to work at a nominal cost, inasmuch as no brickwork is required, as will be seen from the above drawing, they are placed upon a Cast-Iron Sole-plate, which answers the purpose of Foundation and Ashpit.

From the peculiar and substantial manner in which these Boilers are made, they are warranted to last for years without getting out of order; in fact, we guarantee them for ten years, but feel convinced that they will serve all the purposes for which they are intended for a much longer period.

They are specially adapted for Heating Greenhouses, Churches, Chapels, Schools, Public Buildings, Entrance Halls, Warehouses, Workshops, &c.

THE FOLLOWING ARE THE ADVANTAGES OF THESE BOILERS:—

- 1st, They require no setting in brickwork.
- 2nd, They are complete in themselves, having perfect means of regulation.
- 3rd, They take up little room, and can be put in places inaccessible to other Boilers.
- 4th, They are economisers of fuel, owing to the great amount of heating surface upon which the fire acts in a direct manner, and the consumption of smoke.
- 5th, The fire can be made to last from 12 to 24 hours without attention.
- 6th, Any number of Flows and Returns can be annexed to the Boilers by means of T-pipes.
- 7th, By means of mud doors, they can be readily cleaned out when required.
- 8th, The Chimney is made of cast-iron, which can either be taken through a roof or turned into a flue, to meet the convenience of the situation that it may be fixed in.

He did not, as a Paris paper asserted, find the Cross of Grand Officer of the Legion of Honour wrapped up in his breakfast napkin, but it was sent to him afterwards by the Emperor, the decoration being one which his Majesty has just won. The Medical Faculty of Paris have just granted, after the usual examinations, the degree of doctor of medicine to three ladies, one of whom is French, one Russian, and the other American. The American Lucas was attacked last week by two of the non-combatants of his performances at the Hippodrome, and died on Tuesday of his wounds. An explosion by fire-bomb has occurred in the Grison coal-pits at Monsteraid, near Ferrara. Fourteen persons were killed.

SPAIN.—General Prim and his family left Madrid for Vichy on Wednesday, and will possibly pass a couple of days at Paris, though that is not certain. Several Carlist bands, numbering altogether 300 men, which had assembled in the province of Castille, have been dispersed; and Tristany and 10 other insurgent chiefs have been arrested at Perpignan in the attempt to enter Spain. The priest Milla, a leader of a Carlist band, who had been sentenced to death by a Council of War, has been amnestied. The bishops have not obeyed the orders of the Government, and will be judicially proceeded against in consequence by the authorities. Admiral Mendez Nunez, who commanded the Spanish fleet at the bombardment of Callao during the late war with Peru, died on Saturday. Six thousand men are about to leave Cadiz for Cuba.

PORTUGAL.—The Chamber of Deputies on Friday voted, by a majority of 30 to 3, the indemnity to the South Eastern of Portugal Railway Company. The Queen has returned from abroad. The Cortes were closed by the King in person with the usual ceremonies. His Majesty delivered a short speech, in which he said that every effort was being made to restore the financial equilibrium and to revive the national credit. He also stated that the Ministers would seriously consider how to augment the imports and diminish the expenditure. His Majesty, in conclusion, stated that the independence of Portugal would be sedulously preserved.

BELGIUM.—Henri Leys, the painter, died at Antwerp on Thursday morning.

PRUSSIA.—The King has returned to Berlin. The Norddeutsche Allgemeine Zeitung, contradicting the rumours which have appeared in several newspapers, states positively that it is not intended to demand of the Parliament the sanction for any supplementary credit for the army budget.

BAVARIA.—The commission for the settlement of the question connected with the fortresses of South Germany was opened on Thursday by a representative of the Minister of War. The commission is composed of representatives from Bavaria, Wurtemberg, and Baden.

AUSTRIA.—The Vienna Gazette of Sunday publishes an autograph letter of the Emperor, dated the 19th inst., to the Minister of War of the Empire, ordering the dissolution of the two border regiments at Warasdin, and the dissolution of the 11th and 12th companies of the border regiment at Szliun, those Croatian military districts coming henceforth under civil administration. The same change is also to be made in the Croatian border-posts at Zengran and Sisseek. In conformity with this letter Count Taaffe and Count Andrassy, the respective Cisleithan and Transleithan War Ministers, are called upon by two other autograph decrees of the Emperor to draw up in accordance with the existing laws such administrative regulations as may be agreed upon between them for the execution of the proposed alterations. Two more Imperial decrees of the same date, addressed to the Minister of War for the Empire, order the latter to forward to the Ministries of both portions of the Empire the necessary information for constitutionally executing the proposed change. An Imperial decree convokes several Cisleithan provincial Diets between September 9 and October 2 next. The Minister of the Interior has addressed a circular to the Governors of the several provinces of the empire, stating that the present legislative system does not admit of an interference on the part of the Government on the question of reducing the number of days observed as holidays in Austria. The circular further states that if certain holidays are to be done away with as superfluous, the matter must be left to the discernment of the people themselves, to be dealt with by them as they think fit. The authorities will see that official business is duly attended to on all days in the year excepting those which are strictly observed as holidays, and will use their influence with the people at large to induce them to follow the same example. Field-Marshal Moering has been appointed Governor of Trieste.

HUNGARY.—The Emperor, who was expected at Pesth on Wednesday evening, was to inspect the Honved Battalions on Thursday, and afterwards proceed to the camp at Bruck. The case of Prince Karageorgevich was to be proceeded with before the Supreme Court on Thursday.

GREECE.—The King returned to Athens on Monday from Corfu. The Chambers have been prorogued for 30 days. A canal through the Isthmus of Corinth is the subject of conversation. It would not be more than three and a-half miles, and the expense is calculated at 12,000,000 fr. If this project were carried out the time between Marseilles and Constantinople would be reduced by about 14 hours.

ITALY.—The Official Gazette of Friday publishes a Royal Decree closing the present session of Parliament. A subsequent decree will shortly appear fixing the date of the opening of the new session. The Nazione contradicts the rumour that Count Cambray-Digny has concluded a financial operation of 300,000,000 liras with certain banking firms, on the security of the ecclesiastical property.

PAPAL STATES.—Accounts from Rome state that the Imperial Court will present two dogmas—the Infidelity of the Pope and the Spiritism and Corporeal Association of the Virgin Mary. It is said that the Pope has expressed a desire to rank his dogmas as articles of faith, and that a Protestant Union of Protestants had refused to take part in the Council.

THE PRINCIPALITIES.—The Countess is to meet on Wednesday for an extraordinary sitting. Advice from Lovitcha state that Prince Constantine received the return visit of the Emperor of Russia, the Crown Prince, and the Prince Alexis.

TURKEY.—Talahout Pasha, First Secretary of the Viceroy of Egypt, arrived at Constantinople on Monday in the Egyptian steamer Fakham, accompanied by the Grand Vizier's aide-de-camp, who had been the bearer of the Minister's letter to the Viceroy. Talahout Pasha proceeded immediately to the Grand Vizier's residence on the Bosphorus, and the latter at once communicated the Viceroy's reply to the Sultan. His Highness is stated to give therein ample assurances of his loyalty to the Sultan. Halil Bey, the Foreign Under-Secretary, was selected last week to proceed to Livadia, on behalf of the Sultan, to compliment the Emperor of Russia on his arrival there, but his mission has since been postponed in consequence of the indisposition of the Czar. Dukat Pacha was expected to return on Thursday, via Valera, with new propositions for carrying out the Roumelian Railway scheme.

EGYPT.—The Viceroy left Alexandria for Cairo on the 19th inst. It is said that he will visit Constantinople, on receiving an intimation that his explanatory letter has been found satisfactory.

RUSSIA.—Madie, Stella Coms, the favourite actress of the St. Petersburg public, who a few years ago was equally well known to London playgoers, has married a Russian gentleman of the name of Corvin-Kroukovsky.

CAPE OF GOOD HOPE.—The Cape Parliament has had a Bill under discussion regulating the relations of masters and servants. It was proposed to inflict on the servants flogging, imprisonment with hard labour, spare diet, and solitary confinement. The masters were only to be fined. Considerable indignation having been manifested by the European class likely to be affected, it was explained that the measure was intended to affect only Kafirs, and that the legislation must be impartial, but it was trusted that the discretion of the magistrates would protect Europeans. One of the members regretted that the farmers were not still allowed to shoot down all thieving niggers. The Basuto question was not yet settled. The colonists were much annoyed at the withdrawal of the troops, and the Cape Standard had published an article stating that when the troops were taken away the Cape would virtually cease to be a British colony, and would have to call upon the British ministry to place it in such a position that it might be able to seek the aid of Prussia, the United States, or some other foreign power. The diamond discoveries continued. Three Portuguese sailors had arrived at Port Elizabeth stating that they were wrecked in the Portuguese brig Nossa Senhora of Cononca, on the 29th of May last year between Delagoa Bay and Port Natal, and that besides the crew a detachment of troops was on board, making altogether 115 persons. All reached shore excepting the ship's doctor, who was drowned. After landing one soldier died from thirst. Four days after the wreck the captain, part of the crew, and the commander of the troops, with his wife and child, and 40 soldiers, left in the ship's long boat and a smaller boat for Delagoa Bay. The Kafirs treated all the rest well, and took them into the bush. Subsequently these three men ran away, and left 42 persons prisoners with the Kafirs.

INDIA.—The Indian Daily News says that, after all that has been said on the subject, it is possible there may be no durbar at Agra in honour of the Duke of Edinburgh, as the prospects of the crops in the adjacent provinces are not good, and there may, perhaps, be a famine. The Khyberis have refused to allow the guns presented by the British to Shere Ali to pass the defile. The Council of India is said to have set itself against the scheme for a railway to Darjeeling. The cattle disease in the Sonderbund has been declared to be identical with the rinderpest. Dr. Atmaram Sudaseo Jayaker, a Hindoo who has studied in England, and who belongs to the Covenanted Medical Service, has publicly abjured the religion of his fathers, and been baptised as a Christian at Ahmedabad. A Hindoo widow marriage has taken place at Calcutta, and caused some excitement in the native community. Two Bengalee ladies of good position have applied for admission to the Matriculation Examination in connection with the Calcutta University. The Hindoos have supplanted the Mahomedans in nearly all the Government offices. Even in the law offices, which the latter formerly monopolised, they have almost ceased to be employed. The natives of the Andaman Islands are said to be following the universal law, and dying out with the introduction of civilised habits. The King of Burmah is reported to have appointed a noble of the highest rank to sit as a court, jointly with the political agent, to hear cases between Burmese and registered European subjects. The old buildings in Fort Agra, some of the finest specimens of Mahomedan architecture in the country, are to be put in repair. A number of metal images, supposed to be upwards of 800 years old, and to be Hindoo idols, have been dug up in the fort of Gwahor. The discovery of a vein of meerschaum at Smla is announced by the local papers. A private of the 23d Welsh Fusiliers, named Green, who was sentenced to death for murdering a sergeant of the regiment, has been hanged at Bombay. A soldier named Gibson, belonging to the 26th Cameronians, has shot a native dead at Calcutta, after having been drinking heavily,

and the coroner's jury returned a verdict of Murder against him.

CHINA.—The Peking Government has definitively refused to ratify the Burlingame Convention with the United States. It appears that the Chinese text of Mr. Burlingame's credentials differed from the foreign version, and appointed him envoy to a tributary nation. Mr. Ross Browne, the American Minister, replying to an address of the British and American communities at Shanghai, emphatically denounced the policy of Mr. Burlingame, which he considered as evidence of the Chinese disinclination to progress. Equality in the relations was impossible, he said, at present, and a yielding attitude on the part of the foreign Powers would tend to produce war, as the revelations made proved the mistaken policy of the British Government. The death of Consul Gibson is announced. It is stated that it was hastened by anxiety, in consequence of the recent troubles. Great ill-feeling against foreigners is said to exist, on the part of the native, literary, and official classes at Foochow. Her Britannic Majesty's Consul at Hankow and a party of friends, when out on a picnic, were driven away by a mob of natives, who insisted that the foreigners were cooking and eating little children. The Chehien of Shanghai was recently mobbed and beaten, in order to force him to exact vengeance on a foreigner who had killed a Chinese. He was rescued by the French police. It is rumoured that some thousands of junkmen, with several hundred coolies, have signified their willingness to join the agitators of rebellion at Soochow. The gasworks at Peking have come into operation, and the Customs yamen is lighted from them. The Peking College is said to be failure. A larger number of pirates have been captured by H.M.S. Bouncer, in concert with two Chinese Imperial gun-boats, which did good service.

JAPAN.—The civil war is ended, and the Daimios are disarming. Mr. Fletcher, the British Consul at Yeddo, is dead. The Hayamaro steamer has been totally lost by striking on a rock in the Inland Sea. Twenty-one lives were lost, including Mr. H. D. Margesson, merchant, of Macao; Mr. Wainwright, Editor of the *Hioyo News*; Mr. Kalle, Mr. Muller, Herr Jachimek, the pianist; Captain Hill, and Mr. Watts, second engineer of the ship; six Chinese and eight Japanese. The vessel went down in seven minutes from the time of striking.

NOVA SCOTIA.—Prince Arthur landed at Halifax from the City of Paris on Sunday morning, after a voyage of less than seven days from Queenstown. His Royal Highness was cordially welcomed by Sir John Young, Sir Hastings Doyle, and other officials, and was escorted to the Governor's House by the 78th Highlanders. At his request, a formal public reception was postponed on account of the day being Sunday. On the following day a public reception was given to his Royal Highness. The Recorder, on behalf of the Corporation, read an address welcoming the Prince to Nova Scotia, and earnestly assuring his Royal Highness of their loyalty, and their deep respect and affection for Queen Victoria. The Prince, in reply, expressed his grateful thanks for the cordial welcome he had received, and his great satisfaction at finding how highly the people of Nova Scotia cherish the memory of his grandfather, who had governed the province. The affectionate allusion to the Queen, and the hearty welcome of her son, would, he said, give her Majesty great pleasure. A large procession of the trade societies and a review of the military by the Prince, followed the presentation of the address. The city was illuminated in the evening. On Tuesday his Royal Highness was the guest of the Bishop of Halifax. Sir John Young, the Governor-General of Canada, has been enthusiastically received at Halifax. At a banquet given in his honour, he disavowed the language attributed to him at Quebec predicting the severance of the Dominion from Great Britain. He declared he only meant that a change in the nature of relations was probable.

UNITED STATES.—President Grant is visiting in New Hampshire. Numerous American journals express surprise and regret at the report that Prince Arthur will not visit the United States. The *New York Herald* says the reception of the Prince of Wales, and the general regard for the Queen throughout the country, were guarantees that the Prince would be cordially welcomed. The Massachusetts Democratic State Convention have nominated Mr. John Quincy Adams as Governor. They have also adopted resolutions denouncing the present system of taxation and the high tariff, and favouring the early return to specie payments, the enforcement of the Monroe doctrine, and complete protection of the rights of naturalised citizens abroad. No mention is made of the national debt. The National Labour Congress is in session at Philadelphia, and delegates are present from all the States, representing various trades and manufacturing interests, regardless of party considerations. The platform adopted contains resolutions denouncing the national banking system, and favouring the payment of State bonds and all debts, both public and private, in currency. A further resolution favours the taxation of bonds and the reduction of the rate of interest of the National Debt, declaring that the present financial system was adopted as a necessity during the war, but is now perpetuated in the interest of the bondholder extortionists, to the detriment of the producing classes. The continued drought is reported to be doing great damage to the corn crops in the western and southern States. A riot occurred on Monday at Macon, Tennessee, between the whites and negroes. Two persons were killed, and a large number wounded, among whom were several officers of the sheriff. The negroes threaten to destroy the town. The disputes of Mr. James Fisk, jun., and Mr. Van Valkenburg, for the possession of the Albany and Susquehanna Railway,

in New York, have at last led to a collision. The traffic having come to a dead lock by Mr. Fisk being in possession of one end of the line, whilst Mr. Van Valkenburg had that of the other, they both started trains filled with their workmen, which ran into each other. The occupants of the carriages, or such of them as were not injured by the collision, then jumped out and fought with knives and pistols, and in the conflict several among them were seriously wounded. The means of transit being thus denied to the public, the governor of the province interfered, by appointing a receiver and superintendent of the railway on behalf of the State, leaving the belligerents to conclude their quarrel in another manner.

BRAZIL.—The allied Corps d'Armée, under General Portucho, is marching against Villarica, and the Brazilian squadron is steaming up the Tebicuary to attack Villarica. Active operations are imminent. The Prince of Saxe, with the Brazilian Princess and family, had left for Lisbon.

SOUTH AMERICA.—Captain Webber, an officer of the British artillery stationed at Gibraltar, left Buenos Ayres, about two months ago, with Lieutenant Wallace of the same corps, to cross the Cordilleras at the pass of Tinogasta, which is reported to be more than 16,000 feet above the level of the sea. When they reached a height of 14,500 feet Captain Webber was attacked with "puna," a disease peculiar to the high regions of the Cordilleras, and due to the effect produced upon the lungs and the circulation of the blood by the great rarefaction of the air. He became delirious, and Lieut. Wallace, who was himself suffering from the same cause, retraced his steps, keeping Captain Webber on his mule in a state of insensibility. Captain Webber died, however, when they had descended about 1000 feet, on May 2, and his body was buried on the side of the mountain. Lieut. Wallace returned to Buenos Ayres, which he reached on the 25th ult., and subsequently embarked for Gibraltar.

SANDWICH ISLANDS.—Advices from the Sandwich Islands state that the Duke of Edinburgh had arrived at Honolulu in the Galatea, on his way to Japan, and had been cordially received.

CUBA.—Accounts from Havannah, from insurgent sources, assert that the Volunteers are again becoming insubordinate, and that a conspiracy, in which several prominent Spaniards are involved, has been discovered in favour of Céspedes, the insurgent leader.

City Intelligence.

MONEY MARKET, FRIDAY.—**BRITISH FUNDS:** Consols closed at 93 to 93½, both for Money and Account; New and Reduced Three per Cents., 93½ to 93¾; Bank Stock, 244 to 246; Exchequer Bills, March, 3s. to 8s. pm., and June, 6s. to 10s. pm.; India Five per Cents., 112½ to 113½.—**FOREIGN:** Danubian Seven per Cents., 90½ to 91½; Peruvian, 79½ to 79¾; Charkof, 83½ to 84½; Orel, 84½ to 85; Egyptian Nine per Cents., 93 to 93½; Italian Tobacco Loan, 87½ to 88½; Turkish Five per Cents., 41½ to 41¾; Portuguese, 31 to 31½; Brazilian, 8½ to 85; United States 5-20 Bonds, 81½ to 81¾; Erie, 22½ to 23; Illinois, 91½ to 95½.

Metropolis and its Vicinity.

THE MAYORALTY.—Since the announcement that Alderman Dakin will not be put in nomination this year, in consequence of ill health, and that Alderman Besley, who is next in rotation, is prepared to serve, if elected, a requisition has been prepared, and is being numerously signed, inviting the present Lord Mayor, Alderman J. C. Lawrence, M.P., to discharge the duties of the office a second time.

MURDER OF MISS TINNE IN AFRICA.—Accounts reached London yesterday of the death of Miss Tinné, the African explorer. On her way from Murzuk to Ghat, on the Abergoush Road, lat. 20°, long. 13°, she fell a victim to the treachery of some camel drivers. Two of her attendants, European sailors, fell at the same time. Some members of Miss Tinné's family have already started from Malta to Tripoli to visit the scene of the disaster. Miss Tinné was hardly 30 years of age.

THE NEW VICAR OF ST. PANCRAS.—The Dean and Chapter of St. Paul's have conferred the vicarage of St. Pancras, vacant by the elevation of the Rev. W. W. Champneys to the deanery of Lichfield, on the Rev. Anthony Wilson Thorold, of Queen's College, Oxford, late Rector of St. Giles's-in-the-Fields, and now minister of Curzon Chapel, Mayfair. The vicarage is worth 1205l. a year.

DISTRIBUTION OF THE ANGLO-BELGIAN PRIZES.—The ceremony of distributing the prizes won at Wimbledon by English Volunteers, under the auspices of the Anglo-Belgian Prize Committee, took place on Friday at the studio of Captain Mercier at Albert Gate, Hyde Park. Lord Sefton presided, supported by a number of Volunteer officers, and the prizes were distributed by the Lord Mayor. At the conclusion of the ceremony, Colonel Labrow, of the 19th Surrey, moved the thanks of the committee to the King of the Belgians for his second donation of 150l. Captain Styan, of the Queen's, seconded the resolution, which was carried unanimously. Mr. Van de Velde, secretary of the Belgian Legation, returned thanks for the honour which had been done his King and his countrymen, and said that though he could promise that the citizens of Liege would give the Volunteers a most cordial welcome on their approaching visit, it must necessarily fall short of the reception given to the Belgian civic guard in this country. Colonel Carter moved a vote of thanks to the Lord Mayor, which was carried with enthusiasm.

THE REMOVAL OF GAS WORKS.—The great City gas companies are preparing to remove their works from the crowded localities in which they are now

placed, and carry them into the country. The Company has secured a site in the northern outfall of the great main, and the City Company at Blackman's...

THE LAND QUESTION.—A meeting of classes was held on Sunday morning at Green, under the auspices of the Reform League, for the purpose of a lecture from Mr. C. Bradlaugh on "The People." There were about 1000 persons present, Osborne being in the chair. The lecturer obtained life and happiness from the removal of all, and if there were any barrier of attention of the people should be removed. The landowners of the country had but 30,000, and while in 1800 the land was worth an amount of 2,300,000l., the rent received by the aristocracy being 22,500,000l., in 1850 it had increased to over 68,000,000l., while the redemption of the land-tax. Referring to a statement that the landed aristocracy were rich while they slept," he said that it was so, for the heads of families being benefited by the law of primogeniture and entail, the tocracy had provided for the younger sons ways out of the country's earnings. The property in land were different from those acquired by labour, and those who owned had no right to shut it up for pleasure, but to produce grain for the starving millions. He reform in the land laws—firstly, because it was lawful; secondly, because whether or not, they could do it, meaning thereby that the wealth of the nation was higher than mere personal attack on the Prince of Wales followed, and the fact that England is a Government was denied, the Government of a landed aristocracy. He did not advocate distribution of land, but he asked that the soil should share in the profits of the nation. The lecture closed with an eulogium of Mr. A vote of thanks was given to the lecturer.

TRADES UNION CONGRESS.—The Trades and Trades Societies Congress commenced on Monday at Birmingham on Monday. The following societies were represented:—Birmingham Amalgamated Society of Basketmakers, Birmingham Organised Trades of Nottingham; Levensham Association, Nottingham; Operative Birmingham (Manchester Order), Operative Society of London; London Working Men's Association, Progressive Society of Carpenters and Joiners, and London Central Society of House Painters and Decorators; United Flint Glassmakers' Society of Great Britain and Ireland; Potteries Trades Co-operative National Ironworkers, Darlington; Operative Society of Carpenters and Joiners; United Birmingham Albion Lodge of Carpenters and Joiners; United Trades Association of Birmingham; United Flint Glass Cutters' Society of Birmingham; Coopers and Casemakers' Society, Operative National Association of Scotland; Iron and Steel Wire Drawers' Society, Birmingham; Operative Nailcasters; Miners' National Association; National Association of Operative Pastors; Amalgamated Trades Council, South London Society of Railway Springmakers; Birmingham Building Company; Operative Bricklayers' Manchester Lodge. Mr. Wilkinson, of Birmingham, was appointed president, Mr. M'Neil, vice-president, and Mr. M'Neil, secretary. On Tuesday Mr. George Potter read a paper under the head of "The Power of Labour," but which was really an exposure of the ruinous consequences of intemperance in the temperance societies. At its conclusion the members expressed their opinion that the somewhat out of place, and Mr. Clare Denham, others condemned the political attack which the paper made upon the name of priestcraft. Mr. Walton, of Birmingham, in view of giving practical effect to the principle that the establishment of courts of arbitration and conciliation will greatly conduce to the peaceable settlement of all disputes between employers and employed, and be a means of preventing strikes and lock-outs, as well as being conducive to the trial and commercial enterprise of the country. Howell (London) seconded the motion, which was discussed at considerable length. Mr. M'Neil were in favour of arbitration and conciliation, but there were complaints that the results had not been in all cases satisfactory. Mr. Connolly, of London, representative of the masons, was strongly opposed to arbitration on the ground that it would tend to the degradation of the working-classes. The motion was carried on Wednesday, Mr. Snorrocks, of Manchester, moved on "Trades Unions and the Communal System." Mr. George Potter (London) moved in support of the congress the time had arrived when the legislation in regard to labour should be placed on the same footing with other legislation. Mr. G. Howell (London) moved the following resolution:—"That in any attempted legislation to trades' unions, the following principles be distinctly recognised—1. The entire repeal of the Combination Laws. 2. Complete protection of the trade funds. 3. No interference with, or attempt to remove, from trade funds. 4. In respect of the removal of the commissioners to compel the registration of

and to open accounts to the registrar, this would be against any exceptional clause from reference to other legal societies in the industry. After a long discussion the amendment was carried by a narrow majority. On a discussion took place on the subject of the number of apprentices that were allowed to enter any trade Mr. Manchester, moved that in trades where labour was in excess of the demand the apprentices was justifiable and fair, the number of apprentices being proportioned to the number of men employed to teach them. Mr. Burton moved an amendment in favour of leaving the matter to the trades most interested. This was afterwards carried in favour of the resolution. Mr. Odger moved an amendment relegating the matter to arbitration, which would apportion the number of youths in each trade to the number of men employed. After some discussion the original motion was carried. Among the papers read during the sitting were by Mr. G. J. Holyoake, on the subject of "Partnerships as one means of gaining the benefits of Trades Unions;" and one by Mr. A. A. Patten on "Co-operative and Industrial Partnerships," which led to a discussion on the co-operative principle.

THE THAMES EMBANKMENT.—It is reported that the Government has been given to the Thames Embankment of a building which shall accommodate both the War Office and the 3rd Guards.

TOMB OF HENRY VII.—The well-known monument in the chapel of Henry VII., in Westminster Abbey, has been cleansed and revived. The tomb itself is seen to be of black marble; the base and other metal adjuncts are gilt. The "builder" says:—"The gilding is for the most part in a excellent state of preservation. The subjects of the circular groups in the circular panels round the tomb are now obvious, and the inscription is legible. The dark metal screen around the tomb would prevent the restored brightness from interfering with the sombre harmony of the chapel as a whole, even were that brightness more garish than it is. Nothing has yet been done to the screen; but doubtless it will be cleaned and the small portions that are gilt brought out. Looking at the tolerably complete appearance of the monument at first sight, it is somewhat startling to hear that 1500 pieces are wanting to make it perfect, yet such we believe is the case."

EGYPTIAN EXPLORATION.—Dr. Gedge, of Bury St. Edmunds, has accepted the post of superintendent of the medical staff in Sir Samuel Baker's expedition to Lake Nyanza. Dr. Gedge is also entrusted by the Government of Egypt with the collection of natural history specimens for a museum about to be established at Cairo. Sir Samuel Baker's expedition, 1700 strong, will start from Alexandria on the 18th inst. for the Nile and Soudan.

THE CHURCH CONGRESS.—It has already been announced that the Church Congress of the present year will meet in Liverpool at the beginning of October. A working man's meeting will be held in connection with it, at which the speakers who are expected to address the meeting are the Archbishop of York, the Bishops of Oxford, Lichfield, and Peterborough, Mr. Gathorne Hardy, M.P., Colonel Akroyd, Mr. R. A. Cross, M.P., and Mr. E. Whitley. Admission will be by tickets, of which about 2500 will be issued, all gratuitous. The *Liverpool Courier* says:—"We understand that when Dr. McNeile, Dean of Ely, saw that the name of Mr. Mackonochie was mentioned as a speaker or reader at the Congress, he endeavoured to protest against the recognition of a man in Mr. Mackonochie's circumstances as a fellow-labourer, in a Church."

NEW LONDON CHURCHES.—A new church is about to be erected close to Finsbury Park, at a cost of 5000l. It will be a handsome structure in the early English style, and will contain between 900 and 1000 seats. The Rev. G. B. Latreille, of King's College, London, is the incumbent. A district church is about to be erected in the parish of South Hackney, of which the Rev. John C. Egan, M.A., will be the incumbent. A new church, to be dedicated to St. Matthew, is to be erected in Masborough Road, Brook Green, a district which is to be out of the parish of St. Paul, Hamstead. The Rev. William Handcock, one of the London Home Missionaries, will be the first incumbent.

NEW CHURCH AT RICHMOND.—On Thursday the Rev. Mary of Teck laid the foundation of a new church for a rapidly-spreading suburb of Richmond. The building to be dedicated to the Holy Trinity. The site was given by the late Lord Justice Mansfield, and the church, which will accommodate 1000 persons, will be erected in the early English style, according to the designs of Mr. Raphael Brandon.

RECTORY OF ACTON.—The valuable rectory of Acton has been conferred by the Bishop of London on the Rev. Charles Masgrave Harvey, curate of Hampstead.

POOR-LAW WORKHOUSE.—The poor-law inquiry into the ill-treatment of the poor in St. Pancras Workhouse was brought to a close on Saturday. Mr. G. B. Latreille, the Poor-law Commissioner, will make his report to the Poor-law Board, whose decision will then be made public.

ALLEGED CORRUPTION IN THE ADMIRALTY.—A letter has been addressed to the Admiralty by 148 persons employed at Somerset House, asking for an investigation into the statements made by Mr. Baxter, Secretary to the Admiralty in the House of Commons, that they consider cast an undeserved stigma upon a body of public servants. The reply from the Admiralty is as follows:—"The Admiralty are anxious that there should be no misunderstanding as to the expressions used by their Secretary on the occasion referred to, or as to the foundation for these expressions. It was stated by him that an extensive system of what is popularly termed 'tipping' had prevailed both at Somerset House and at the dockyards as well as in railways and other public companies, and that a vigorous effort should be made by the country to put an end to these practices. The truth of this statement my Lords have no doubt. The papers found on Mr. Gambier and Mr. Rumble, and information, which has reached their Lordships both before and since the trial, leave it beyond question that the practices they exposed and punished were not isolated, but that for years, in connection with the purchase and delivery of naval stores, large sums of money had been paid by contractors and received by officials under the Board of Admiralty. Their Lordships have endeavoured to follow up some of these cases, but in vain without success. But my Lords have no hesitation in saying that the great body of the service have been entirely free from the remotest suspicion of dishonesty. My Lords would add that, even had their Secretary implied (which was far from his intention) that officers formerly charged with the contract and receipt of naval stores had been generally corrupt, such an imputation could not affect the other branches of the service, to which the great body of the present memorialists belong. Under these circumstances, my Lords are not prepared to institute such an inquiry as the memorialists advise, it would be unnecessary so far as the honour of the department is concerned, and would impede rather than assist the ends of justice. But my Lords desire to reiterate the expression of their conviction that, while corruption of a most serious character has attended some of the transactions of the department, the character of the service generally is beyond suspicion, and they will take occasion to place this communication on record in the most unmistakable terms."

PENIAN EXCURSIONS.—It was announced last week that a Fenian excursion would start to-morrow (Sunday) for Hampton from Lincoln's Inn Fields, where a "procession of Irishmen and the noble daughters of Erin, accompanied by bands and banners and outriders," will assemble. Another excursion, which is expected to rival that with which the village of Hampton is to be infected, has since been announced. The announcement is headed, "The anniversary of the Siege of Limerick.—Grand National Demonstration. Grand river excursion to Gravesend, Sunday August 29, 1869." The manifesto of the committee says that, owing to the great success of the 31st of July excursion, and at the request of hundreds who were unable to attend it, the committee have resolved to celebrate the anniversary of the Siege of Limerick by a grand river excursion to Gravesend. The excursion will be larger, and carried out on a grander principle than any hitherto in London, and will be attended by several distinguished Irishmen. The manifesto concludes by saying:—"The committee, which is composed of representative Irishmen from all quarters of London, appeals to all honest and non-factional Irishmen to rally round them on this glorious occasion and give a hearty and mighty support. The committee only ask the support of the aristocracy of intellect and honesty, not of birth, and will feel content to see themselves surrounded by men with freeze coats and honest hearts—in other words, the 'mob' who are the hope of our nation, although not its *élite*."

COLLISION IN THE THAMES.—On Friday morning the *Hesperia*, of 500 tons, laden with a valuable cargo, for Singapore, was run down while riding at anchor near Gravesend by the steamer *Northumbria*, of 1000 tons, for Cardiff. It was the first voyage of the *Northumbria*, which ran into the *Hesperia* with such force as to bury her bows in her, cutting her down to the water's edge. Fortunately for the crew of the *Hesperia* the *Northumbria* was unable to extricate herself for some time, so that the crew had time to get safe on board, but as soon as she got clear the *Hesperia* went down in deep water. The *Northumbria* put back to the Victoria Docks. The *Hesperia* and her cargo were insured for 30,000l.

THE LATE EXPLOSION IN THE RIVER.—The inquest on the captain and seaman of the steam-tug which exploded a few days since near London Bridge, concluded on Tuesday, when the jury returned a verdict that George Charles Evans and Thomas Williams were killed by the bursting of the boiler, but there was not sufficient evidence to show the cause of such bursting. They added that they entirely exonerated the owners from blame, but felt that they could not separate without calling the attention of the Board of Trade to the inefficient manner in which boilers were tested.

EXPLOSION OF FIREWORKS.—On Thursday afternoon an explosion occurred on the premises of Mr. Darby, fireworks maker, in Regent Street, Lambeth Walk. Mr. Darby's manufactory is in the country, but in a large shed in the yard of this house he keeps a quantity of rockets, squibs, and other fireworks for immediate sale. The shed has been blown to atoms, the doors and windows of the adjoining houses were destroyed, and the windows of many houses in the neighbourhood were broken by the force of the explosion. Some children, who were playing in the street, were knocked down and scorched by the burning squibs. The explosion is supposed to have been caused by the heat of the sun acting on the roof of the shed and igniting its contents.

AFFRAY IN ST. JAMES'S PARK.—For some time past considerable ill-feeling has existed among the Westminster sewerage men and some labourers from King's Cross employed on the works opposite the House of Lords. On Saturday evening, just as people were entering the park to hear the band, a regular fight, which lasted more than 20 minutes, occurred, and, notwithstanding the excitement and the screaming of children, but one policeman could be found, and that not until the men had discontinued from sheer exhaustion. Two of the combatants were injured severely. It was only owing to the protection of several gentlemen that the policeman, when he appeared, escaped ill-treatment.

THE GREAT CITY ROBBERY.—Clement Harwood, clerk to Messrs. Harwood, Knight, and Allen, bill-brokers of Abchurch Lane, a son of the senior partner, was again brought before the Lord Mayor on the charge of stealing bills of exchange of the value of 15,000l. After a considerable amount of evidence had been taken, the prisoner was again remanded.

RELEASE OF ANOTHER PENIAN CONVICT.—It is announced that Martin Hanley Carey, Fenian convict at Millbank, in consequence of his mental condition, is to be at once transferred to Mountjoy Prison, Dublin, with a view to his release.

ATTEMPTED MURDER IN SOUTHWARK.—On Sunday morning a young woman named Eliza Raven, aged 20, residing with her parents in Ripley Street, New Kent Road, was standing with her sister at her father's door, when a young man called William Rauntree, aged 23, who lived next door, came up, pulled out a pistol, and exclaiming, "Take that," fired at her. The weapon does not appear to have been loaded with ball or shot, but the explosion wounded the arm of the girl, and the face and neck of her sister. The prisoner and the young woman had known each other as neighbours for about six years, but although he had not been recognised as her lover, his violence is believed to have been the result of jealousy. On searching him at the Police Station nine bullets and two packets of powder were found on his person, but the bullets would not fit the barrel of the pistol. He told the inspector that he had purchased the pistol on Saturday morning, and that his intention was to kill the young woman, and he was sorry that he had not succeeded. The prisoner was committed for trial on Monday, on the charge of attempting to murder.

THE CANNON STREET MURDER.—William Henry Hall, aged 22, describing himself as a painter, but refusing his address, was charged on Friday, on remand, before Colonel Jeakes, at Highgate, with having, according to his own confession, brutally assaulted a man, name unknown, in the Archway Road. On the previous Sunday the prisoner gave himself into custody at the Fleet Street Station, stating that he had on the previous night struck a man on the head with a brick in the Archway Road, and left him for dead, after quarrelling with him about a game at dominoes. He also stated that he committed the murder in Cannon Street some years ago. The prisoner was brought before Colonel Jeakes on the next day, and remanded to the House of Detention, in order that his state of mind might be inquired into. When brought up on Friday a certificate from the chief warden of the House of Detention was produced, stating that the prisoner had frequently been in custody, and had once undergone a term of six months' imprisonment, but no information was given as to his state of mind. The prisoner asked permission to speak, and on this being granted he said:—"About three years ago I murdered a woman in Cannon Street, and ever since then my conscience has not let me have any peace." Colonel Jeakes expressed his opinion that the prisoner was not in a fit state of mind to be at large, and remarked on the negligence of the Governor of the House of Detention in not causing a certificate to be sent as to the prisoner's mental condition. The prisoner said he was not mad, and urged the magistrate to settle the case of the murdered woman, as he might not see him any more. The police stated that the prisoner had several times threatened to commit suicide. The prisoner was again remanded, in order that he might be examined as to the state of his mind. On Monday he was again brought before the Highgate magistrates, when Colonel Jeakes said that it had been found, on inquiry, that his statements were untrue, and that he was perfectly sane. He was therefore discharged, the magistrate expressing his regret that he had no power to order him a good whipping as a rogue and a vagabond.

THE PUBLIC HEALTH.—The Registrar-General's Weekly Return states that in the week that ended on Saturday, August 21, 4428 births and 3159 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 25 per 1000 persons living, being 25 per 1000 in London, 28 in Edinburgh, 18 in Dublin, 23 in Bristol, 19 in Birmingham, 31 in Liverpool, 29 in Manchester, 29 in Salford, 25 in Sheffield, 25 in Bradford, 27 in Leeds, 21 in Hull, 25 in Newcastle-upon-Tyne, and 23 in Glasgow. In Paris the annual rate in the week was 22 per 1000. The rate in Berlin, during the seven days ending 19 inst., was 35 per 1000; and in Vienna 28 per 1000 during the week ending 14th inst. In London the births of 1065 boys and 1069 girls, in all 2134 children, were registered last week. In the corresponding weeks of 10 years, 1859-68, the average number, corrected for increase of population, was 2012. The deaths registered in London during the week were 1527. It was the 331 week of the year, and the average number for that week, corrected for increase of population, was 1464. The present return is therefore 63 above the estimated amount.

Provincial.

ALDERSHOTT.—It is stated that the Commander-in-Chief has exonerated Captain George, of the 7th Dragoon Guards, from all blame in connection with the late charge at Aldershott, in which one of the men of the Inniskilling Dragoons lost his life.—Another attempt to murder a non-commissioned officer was made in camp on Monday night, but fortunately without a fatal result. Serjeant Stacey, of the 5th Fusiliers, seeing Corporal Greeney coming towards his quarters, fired his rifle at him. The bullet passed close to his head, but without hitting it. Serjeant Stacey was immediately arrested, and said that he had been prompted by a sudden impulse to fire, and was extremely glad that he had missed his aim. On the next morning Quartermaster-Serjeant M'Elea, of the 5th Dragoon Guards, committed suicide by shooting himself with his carbine.

BRISTOL.—The sentence of death passed on William Pullin, for the murder of a policeman, at the recent Assizes has been commuted to penal servitude for life.

The Bishops of Rochester and St. Asaph, situated on the west bank of the river, nearly opposite the Castle, is in the style of the architect of Inverness, and consists of a nave, south aisle, transepts, and apsidal choir. The Chapter House on the north side is flanked by two towers at the intersection of nave and transept, and an ornamental iron screen is placed at the distance of 110 feet from the ground. The internal fittings and decorations are in the style of the 15th century.

MONUMENT.—On Friday afternoon the Duke of Stirling drove to the Abbey of Dryburgh, for the purpose of inspecting the National Monument, preparatory to receiving the Duke of Devonshire, in company with the Lords-Lieutenant of the counties of Edinburgh, Perth, the Sheriffs-Depute, and the Dean of the Guildry and the monument is to be handed over to the Duke of Devonshire on September 11, the anniversary of the opening of the Forth Railway Bridge. Mr. Burns, of Glasgow, the acting committee, stated that the monument already expended 13,000*l.*, and that the total cost would cost nearly 14,000*l.*

OMNIBUS.—A steam omnibus, or, to speak more correctly, an omnibus drawn by a road steamer, is to be introduced on a trip through Edinburgh on the 19th inst. The steamer has been built by Mr. R. V. Bell, a large omnibus proprietor in one of the counties of England, who intends to have his omnibus drawn by steam. The trial of last week was successful, with the omnibuses attached to it, and the rate of seven miles an hour, and ran down the incline to exhibit its speed at the rate of nine. It turned in the road with greater ease than if drawn by horses, was started and stopped instantaneously at the word of command, and ran up hill. It then proceeded from Leith, where the second stage of the trial was held, to the journey from Leith to the west end of the city, starting from Constitution Street, ran at a speed up Leith Walk and Leith Street, and then down Princes Street to the other with- out a stop, where it turned down South Charlotte Street, and on through North Charlotte Street to the top of the hill, where at the steepest point it was brought to a sudden standstill, to show how completely it could be commanded, and how entirely it could disengage itself from any kind of break. This was its final dis- play, when it went rapidly back to Leith. The trial was completely successful, and the dexterity with which it was managed, and the docility with which it obeyed the commands, turned whenever it was required, excited the interest and surprise.

Railways.

CALLING EXPRESS TRAINS TO STOP.—At the County Sessions, on Saturday, Mr. Joseph Hayes, a gentleman residing at Hertingford, was charged with an offence under the Act 31 Victoria, cap. 119, which requires that there be provided means of communication between the stations and guards and drivers of all railway trains of 20 miles without stopping. It appeared in evidence that on the 12th inst. defendant called the 2.45 express to Manchester, which does not stop until it reaches Hatfield. He should have got into a "slip" in the rear of the train, which is placed nearly in the centre of the train, and the driver and guard hearing the engine sound, looked round and saw the defendant at the window of the Bradford carriage, to the effect that he wanted to get out of the train just passed. The guard signalled to the train could not be stopped for such a purpose. Shortly after the train passed the defendant again, and on its being signalled to a standstill the defendant got out. The defence, said he could not find a "slip" at King's Cross, and got into the Bradford carriage under the impression made upon his mind by the time-table that the train stopped at Bradford. The magistrates having consulted for some time, the man said that they were of opinion that the defendant had been committed—that Mr. Hayes had been committed without sufficient cause. As, however, the defendant was the first case of the kind that had been brought before the Bench they would only inflict a penalty of 1*l.* Mr. Webb said he was afraid that the defendant would look upon the offence as a very light one, and that the remarks of the Bench were of more importance than the amount of the penalty. The defendant was committed to the House of Correction for 14 days. At Wakefield, on the 12th inst. a charge was preferred against Mr. Thomas Flockton, of Stockton-on-Tees, for obstructing a similar charge preferred against the same defendant. It appeared that on the

12th inst. the driver of the express from Leeds to London, when he had reached Sandal, 24 miles beyond Wakefield, heard his gong strike, and on looking down the side of the train saw a man gesticulating at a carriage window. In their printed instructions servants are told not to stop the trains out of the protection of station signals unless they perceive any immediate danger, and, beckoning that he would pull up at the next station, the driver went on until he reached Nostell, a short distance further on. At that place the defendant alighted and produced a ticket from Holbeck to Westgate, Wakefield, and said that his intentions were to go to Kirkgate station, in the latter town, and finding that it did not stop there, he thought he was perfectly justified in stopping the train. Mr. Oppenheim said that as the express was leaving Nostell, a pilot engine came in behind, and there was the possibility that had the train been stopped outside the signals a collision might have ensued. The Bench held that the case had been completely made out, but as it was the first which had been brought before them under the Act, they merely imposed a nominal penalty, which, including costs, amounted to 50*s.*

Law.

CENTRAL CRIMINAL COURT.—*Extraordinary Charge against a Detective Officer.*—Thomas Richards, 54, a retired police-sergeant, and one of the detective officers of the Brighton Railway Company, and William Crichtley, 58, jeweller, were charged with unlawfully conspiring together to defeat the ends of justice by endeavouring to induce two police-constables of the metropolitan force, named James Ham and George Ranger, to give false testimony in a charge of felony against two men, named Green and Simpson, in order to procure their discharge from custody. It appeared that in January last an inhabitant of Peckham was robbed of his watch, and that after a time the property was recovered by George Ranger, a sergeant in the metropolitan police. Ranger had seen two men, William Green and William Simpson, come out of a public house, and observed that a watch and chain were passed from Simpson to Green. Upon this he followed Green to a pawnbroker's, and ultimately took him into custody with the watch in his possession, which he had been vainly endeavouring to pledge. Pursuing the clue thus obtained, he went to the house of Simpson, whom he also apprehended, and discovered on his premises a considerable quantity of miscellaneous jewellery. The two prisoners, Green and Simpson, were thus in custody, awaiting their examination, when, on the 22d of May last, James Ham, an officer of the detective police, who had been employed with Ranger in making the arrests, received a letter requesting him to meet the writer at a place indicated. The letter also contained an overture from certain friends of the prisoners, intended to procure their discharge by corrupting the constables. Ham, on proceeding to the place appointed, found the prisoner Thomas Richards, formerly known to him, who, after a little preliminary conversation, made an offer of 20 sovereigns to the two policemen on condition of their getting Green and Simpson "turned up"—that is to say, discharged instead of being committed for trial. It was assumed that the constables on whose testimony the case would depend might so suppress or pervert the evidence as to efface the suspicion resting on the prisoners, and so put their conviction out of the question. Ham pretended to entertain these proposals, allowed Richards to explain himself, and then made a full report of the matter to his superior officer, who directed him to proceed with the affair. Accordingly he and Ranger went together to a certain public-house, where Richards received 20 sovereigns from the prisoner Crichtley, who had it appeared engaged him to tamper with the constables in the manner described. No sooner, however, had Richards handed the money to the policemen than they delivered it to their superintendent, and then proceeded to apprehend the men who had attempted to bribe them. The evidence of the two officers having been given at great length, Serjeant Ballantine, for the defence, reminded the jury that they were asked to convict the prisoners on the testimony of two policemen alone, and the Force might reasonably be supposed to contain members by no means deserving of such confidence; and that men who could put such a "plant" upon others as had been contrived by the constables, could not have any high sense of honour. Mr. Tanner, the late inspector of the detective police, gave the prisoner Richards a very good character during the long period of 30 years that he was in the metropolitan police. The Recorder, in summing up, said that the offence imputed to the prisoners was undoubtedly one of the most serious character, and one that would require their earnest attention. The only defence that appeared to be made on the part of the prisoners was that they were the victims of a conspiracy; but he could not help remarking that if any effect were to be given to such a defence it could only be upon the supposition that the two constables Ham and Ranger had entered into a most wicked compact, that they had procured the sum of 20*l.* in order to carry out their design, and that they had been guilty of the most wicked and deliberate perjury. The jury, after a very brief deliberation, found both prisoners *Guilty*. The prisoners were then placed at the bar with the two men, Green, and Simpson, 56, upon another indictment, which charged the two last with feloniously receiving a gold watch, the property of Henry Drake, and which had been stolen from him, and Crichtley and Richards with feloniously harbouring and aiding the other two prisoners, knowing the robbery to have been committed. The jury found Green and Simpson *Guilty*, and acquitted Crichtley and Richards. Evidence was then given that Green had been previously convicted of felony, and sentenced to 14 years' transportation; that Crichtley had been convicted of felony; that Simpson, whose real name was Miles Henton, had formerly lived at Bradford, and was a notorious receiver of stolen property. The Recorder sentenced Green and Simpson to penal servitude for 12 years; Crichtley and Richards to be imprisoned and kept to hard labour for two years, regretting that for an offence of such magnitude the punishment that the law enabled the Court to inflict was so inadequate. The grand jury having recommended that the police officers Ham and Ranger should be rewarded for the important services they had rendered, the Recorder expressed his concurrence in the recommendation, and ordered that each of them should be paid a sum of 5*l.*

Sporting.

THE INTERNATIONAL BOAT RACE.—The great race between the crews representing Oxford and Harvard Universities, from the crews to Mortlake, took place yesterday afternoon, in the presence of thousands of spectators, and ended in the defeat of the Americans, Oxford having won the race by three boat's lengths. Time, as taken by Benson's Chronograph, 22m. 41*s.*

INTERNATIONAL YACHT RACE.—It is stated that the challenge of Mr. Ashbury, the owner of the yacht Cambria, has been accepted by Commodore Bennett, of the American yacht

Dauntless, and that the race is to take place during the month of September, across the Atlantic, to the Sandy Hook Lighthouse.

Obituary.

THE HON AND REV. THOMAS COVENTRY died on Friday, after a short illness, in his 77th year. He was the eldest surviving son of the seventh Earl of Coventry, and had been M.P. for Severn Stoke, Upton-on-Severn, Worcestershire, since 1855.

THE HON MRS. FRANCIS CROFTON died on the 19th inst., at the Bridge of Allan, near Stirling.

SIR ROGER PALMER, Bart. died on Monday at Cefn Park, near Wrexham. He was born in 1780, and is succeeded by his son, Roger William Henry Palmer, Lieutenant Colonel of the 2d Life Guards, who served with considerable distinction in the Crimea, and was M.P. for Mayo from 1857 to 1863.

GENERAL J. STUART FRASER died on Sunday last at a ripe age. He entered the Madras army, and obtained his lieutenantancy in 1800. He served on the personal staff of Colonel Keating, and was present at the operations that took place in the expedition to the Isle of France, was assistant adjutant-general to the field army of reserve in 1814; and was present at the several actions that occurred during the Coorg campaign until the surrender of the district in 1834. For some years he was resident at Hyderabad. He became a major-general in 1838, and general in 1860.

CAPTAIN SAMUEL T. DICKEY, R.N. died at 25, Tavistock Crescent, Westbourne Park, on the 17th inst., aged 61. He entered the navy in 1799, and served in the Mediterranean, on the home station, in the West Indies, and the coast of Portugal. In 1811, while in command of the Cerberus frigate, he conducted for several weeks the blockade of Corfu in the face of a very superior force. In 1814 he was invalided home. He attained post rank in 1861.

WILLS.—The will of Lord Cranston, of Creeling, Scotland has been sworn under 45,000*l.* personalty; Lady Alexander 7000*l.*; Sir William A. Beckett, late Chief Justice of the colony of Victoria, 9000*l.*; Sir Robert Jukes Clifton, Bart., 5000*l.*; Sir William John Newton, 4000*l.*; Mr. Alexander William Rowland, perfumer and manufacturer of Macassar oil, 33,000*l.*; Mr. Walter Stevenson Davidson, banker, of St. James's Street, 400,000*l.*

Markets.

COVENT GARDEN.—Aug. 28. We have a fair attendance of buyers among wholesale dealers, but the retail trade has declined to quite a nominal figure, and few articles can be cleared at last week's prices. Importations continue heavy, and large arrivals of grapes from the Channel Islands are to hand this week. Flowers chiefly consist of Orchids, Pelargoniums, Gladioli, Calceolarias, Mignonette, Fuchias, Cockscombs, Asters, Kalosanthes coccinea, Liliums, and Dahlias, &c.

FRUIT.

Apples, per doz., 3s to 4s
Cherries, per lb., 9d to 1s
Figs, per doz., 2s to 4s
Grapes, per lb., 2s to 6s
Lemons, per 100, 8s to 14s
Melons, each, 1s 6d to 5s
Oranges, per 100, 8s to 14s
Peaches, per doz., 6s to 12s
Pine-apples, per lb., 3s to 6s

VEGETABLES.

Artichokes, green, p. doz., 2s
Beans, Kidney, p. 3 sieve, 3s to 4s
Beet, per doz., 3s to 4s
Cabbages, per doz., 1s to 3s
Carrots, per bunch, 4d to 8d
Cauliflowers, p. doz., 3s to 6s
Celery, p. bund., 1s to 1s 6d
Cucumbers, each, 4d to 1s
Endive, per doz., 1s 6d to 2s
Garlic and Shallots, per lb., 8d
Herbs, per bunch, 2d to 4d
Horse Radish, p. bund. 3s to 5s
Lentils, per bunch, 2d to 4d
Lettuces, p. score, 1s to 1s 3d
Mint, per bunch, 4d to 6d
Mushrooms, p. pott., 1s 6d to 2s
Onions, green, p. bun., 4d to 9d
Parsley, per bunch, 2d to 4d
Peas, English, p. qt., 2d to 1s
Potatoes, York Regents, p. ton, 80s to 120s
— Flukes, do., 80s to 130s
— New, do. to 6s p. cwt.
Spinach, per bushel, 2s to 3s
Radishes, p. doz., 1s to 1s 6d
Turnips, per bunch, 4d to 6d

HAY.—Per Load of 36 Trusses.

SMITHFIELD, Thursday, Aug. 26.
Prime Meadow Hay 100s to 110s
Inferior do. .. 80 90
New do. .. 80 90
Inferior do. .. 60 70
Straw .. 32 40
Clover, old .. 120s to 130s
Inferior do. .. 90 110
Prime new Clover .. 100 115
Inferior do. .. 80 90
CHARLES JAMES EASTON.

CUMBERLAND MARKET, Thursday, Aug. 26.
Sup. Meadow Hay 105s to 112s
Inferior do. .. 85 92
New do. .. 85 92
Superior Clover .. 120 134
Inferior Clover .. 90s to 118s
New do. .. 90 118
Straw .. 40 44
JOSHUA BAKER.

WHITECHAPEL, Thursday, July 26.
Fine Meadow Hay 98s to 108s
Inferior do. .. 80 95
Prime New Hay .. 80 90
Inferior .. 60 75
Straw .. 33 38
Prime 1st cut Clover 120s to 130s
Inferior do. do. .. 90 110
Prime 2d cut do. .. — —
New Clover .. 100 112
Inferior do. .. 80 95

METROPOLITAN MEAT MARKET.—Aug. 26.
Best Fresh Butter .. 15s. per dozen lb.
Second do. do. .. 13s.
Small Pork, 4s. 8d. to 5s. 4d.; Large Pork, 4s. 6d. to 4s. 4d. per 8 lb.

HOPS.—BOROUGH MARKET, Aug. 27.
Messrs. Pattenden and Smith report that the present hot and forcing weather is greatly benefiting those grounds where there is any possibility of improvement, though a very considerable proportion of the plantation is already too far gone. Trade is quite at a standstill, quotations remaining nominally firm.

ENGLISH WOOL.

There has been an improved inquiry for good fine and half-bred wools, and altogether a more cheerful tone has prevailed; but for the lower grades, and for most descriptions of skin wool, trade still keeps flat. The sales of Colonial Wool now being held in London, and which continue daily up to the 26th proximo, are going off with spirit at enhanced prices.

CURRENT PRICES OF ENGLISH WOOL. per lb.—s. d. s. d.

LEADENHALL POULTRY, &c.
THURSDAY, Aug. 26.
A nominal trade with falling prices. A good supply of grouse, and the accounts of the partridges favourable. The

harvest has rather checked the supply of poultry, but still there is more than enough.

Fresh Butter, 1s. 3d. to 1s. 4d. per lb.

METROPOLITAN CATTLE MARKET.

Monday, Aug. 23. We have a larger supply of Beasts, and a dull trade; prices are lower for all descriptions, and a clearance cannot be effected. There are a few more Sheep; trade is, however, active for them at fully late rates. Trade continues very bad for Lambs. Choicest Calves are rather dearer. Our foreign supply consists of 2605 Beasts, 8250 Sheep, 355 Calves, and 108 Pigs; from Ireland there are 140 Beasts; and 1990 from the Midland and Home Counties.

	s. d.	s. d.		s. d.	s. d.

			Pigs ..	4 0	to 5 8

THURSDAY, Aug. 26.

Although the supply of Beasts is very much smaller, it greatly exceeds the demand. There is scarcely any business doing, and our prices are almost nominal. The number of Sheep is nearly as large as last week; trade for them is much worse, and a considerable proportion remains unsold. Lambs are rather more in request, but it is difficult to obtain any higher prices. Trade is dull for Calves at lower rates. Our foreign supply consists of 247 Beasts, 3600 Sheep, 323 Calves, and 10 Pigs.

MARK LANE, Monday, Aug. 23.

There was a large supply of English Wheat to this morning's market, consisting principally of the new crop, the quality and condition of which were very variable; the best runs of white were sold at 48s. to 52s. per qr. inferior qualities at irregular prices; old was 3s. per qr. cheaper than on this day so on night, and to effect sales in foreign factors were obliged to submit to a similar reduction. There was no change in the value of Barley, Beans, or Peas. Oats were 6d. per qr. lower. Country Flour was 1s. to 2s. per sack, and American 1s. per barrel cheaper.

FRIDAY, Aug. 27.

We have to report, since the 20th inst., dry, hot, and forcing weather, which has enabled our farmers to secure a large part of their Wheat crop in much better order than appeared likely a fortnight ago, and the trade, disregarding now all unfavourable reports formerly current as to the yield and the exhausted stocks of old Wheat, look forward to large supplies of the new crop at once available for the mill. The result is a total absence of business throughout the markets of the kingdom, and where sales are attempted, a reduction of from 2s. to 5s. per qr. on old Wheat, both English and foreign, has been imperative. All sorts of spring corn were neglected, with prices against holders. Flour was unsaleable, although offered at a decline of 2s. to 3s. per sack and 1s. to 2s. per barrel. The arrivals of grain and seed laden vessels off the coast this week consisted of 42 cargoes, of which, with those left over from last week, there remained for sale, last night 36 cargoes. The floating trade has been very dull, under the influence of the fine weather. The samples of the late arrivals are in course of distribution. Wheat has declined about 8s. per qr., without inducing buyers to operate. Maize has barely maintained its value. There was no Barley off the coast in the early part of the week. Some transactions took place in grain for forward shipments and on passage, but, excepting Barley, the value of which remained unaltered, prices were against sellers.

The arrivals of all grain during the week have been small. There was a thin attendance at this morning's market, and scarcely any business was transacted in any description of grain, prices remaining nominally unaltered from Monday.

LIVERPOOL, August 24.—At to-day's market we had only an average attendance of buyers, and in Wheat a very limited business took place, at a reduction of about 2d. to 3d. per cental since Friday, or 6d. per cental on the week. Flour also met with a moderate inquiry, at a decline of 6d. on the rates of last market day. Indian Corn was in fair demand, at a decline of 6d. per qr. from Friday's rates, Oats dull, but

unchanged in value. Beans steady. Peas inactive. Oat meal nominally unchanged.

SEED MARKET.

Owing to the want of rain the seed trade is now in a very quiet state; a few showers would doubtless cause a brisk demand for Mustard, Trifolium, and Rape seed. Prices in the absence of business remain without change. A few samples of new English winter Tares have been exhibited for the purpose of feeling the market, but values are not yet fixed; the yield is said to be small and the quality poor. Bird seeds are scarce and dear. Hemp seed is 1s. per qr. dearer. For Clover and Trefoil seeds holders demand more money; at this quiet time of the year, however, there is no great quantity of seed changing hands. Inactivity, but, at the same time, great firmness, are for the moment the chief characteristics of the agricultural seed trade.

JOHN SHAW & SONS, 16, Water Lane, E.C.

WANTED, a GARDENER and his WIFE, without children, to live in a Lodge in Staffordshire. The Man must be a good Working Gardener, and understand the Management of Vines and Orchard-house. The Wife will be required to attend to the Lodge Gate. Wages, 20s per week, rent free.—Y. Z., Chronicle Office, Wolverhampton, Staffordshire.

WANTED, a good WORKING GARDENER (married, without children), as MASTER of a small INDUSTRIAL SCHOOL; Wife as MATRON. Church people.—Address Miss O., Beckley Grove, near Oxford.

turally old. The Christian clergyman was a dedicated man—their lives were not common lives—something had happened to them—there was a mark, a seal upon them. In speaking of the difficulties of a Christian minister, he said that it was possible for one who had pledged himself somewhat hastily, though with deep conviction, to every one of the Thirty-nine Articles, and to the multiform prayers and creeds, to find himself, as years advanced, less than certain about some of these particulars of doctrine. The service concluded at 10 o'clock, after which Dr. Vaughan and his guests took tea together. On Wednesday morning there was an administration of the Sacrament, and in the evening Dr. Vaughan delivered a private lecture. Before separating the whole party was photographed.

DOVER.—The Archbishop of Canterbury passed last week in this district of his diocese, performing various official acts, and making acquaintance with the clergy and laity of the locality. On Tuesday his Grace was present at the presentation of the new colours to the 91st Highlanders, and addressed the men in the garrison on the heights above Dover. On Wednesday he preached in the parish church of St. Mary, for the new church at Charlton. On Thursday his Grace opened the restored Norman church at St. Margaret's-at-Cliffe, and preached on the occasion. On Friday he consecrated the church at West Landon, near Walmer, and preached the sermon. In the afternoon of Friday he was received at Walmer Castle by the Prime Minister and Mrs. Gladstone, remaining their guest until Saturday morning, when he returned to Addington Park.

NORWICH.—The musical festival of the present year commenced on Monday evening with Mendelssohn's "Hymn of Praise" and Handel's "Acis and Galatea." On Tuesday, Wednesday, and Thursday evenings there were, as usual, miscellaneous concerts. Wednesday morning was devoted to a selection from "Hezekiah," an unpublished work by Mr. H. H. Pierson, and Spohr's "Fall of Babylon," originally brought out at the Norwich Festival of 1842. Thursday morning was occupied with Rossini's "Messe Solennelle," a new sacred cantata by Mr. Horace Hill, and Handel's "Dettingen Te Deum." Yesterday morning the festival was brought to a close as usual with the "Messiah." In the evening there was a dress-ball. The principal vocalists were Madlle. Titiens, Madlle. Ilma di Murska, Madame Talbot Cherer, Madame Patey, Madame Trebelli-Bettini, Mr. Vernon Rigby, Mr. Cummings, Mr. Arthur Byron, Signor Bettini, Signor Foli, and Mr. Santley. Mr. Benedict, as usual, was the conductor.

RAMSGATE.—At the recent regatta at this port the winning yacht, *Enigma*, was designed, built, rigged, and sailed by a working man called Henry Thornton, one of the keepers of a neighbouring lighthouse; who constructed her on an entirely new model of his own invention, working at her between the intervals of his ordinary duties as lighthouse-keeper day and night for the past 18 months, in a shed with only 15 inches clear space above and on either side in which to work. It is said that the yacht combines speed with safety, ample accommodation, and thorough seagoing qualities.

SALFORD.—On Saturday the coping stone of a new bridge over the Irwell at Lower Broughton was laid with some ceremony. The mayor, supported by the aldermen and corporation, Mr. Cawley, M.P., and other local personages, took their places on the centre of a platform which had been erected over the black sewage-laden water of the river, when the spectators from below made what is called "an ugly rush" by which the scaffold was upset, and the mayor, who had just commenced his speech, was precipitated with his friends into the inky liquid and mud beneath. They all, however, escaped without injury to life or limb.

Ireland.

THE IRISH CHURCH.—A meeting of laymen belonging to the Irish Church was held on Tuesday, the Earl of Meath in the chair, when a resolution requesting the Archbishop to convene the laity was adopted with only two dissentients. A number of laymen have, within the last week, pledged themselves to subscribe handsomely towards the re-endowment of the Irish Church, and it is anticipated that their example will be widely followed. The liberality of the laity will, however, altogether depend upon the manner in which the clergy admit them to a share in the reconstruction of the Church. A gift of 100*l.* a year in one instance for the life of a donor, and a donation of 1000*l.* in another, have been mentioned in the Dublin papers; but the most magnificent example is that of Colonel Tighe, of Woodstock, Kilkenny, who has offered to place 10,000*l.* in the hands of the new Church body if the present formularies, doctrines, and discipline of the Church of England be preserved, viz., 5,000*l.* to a sustentation fund, and 5,000*l.* towards providing a resident clergyman, with a salary of at least 300*l.* a year, for the parish of Inistioge, with his approval or that of his heirs.

PASTORAL OF CARDINAL CULLEN.—On Wednesday Cardinal Cullen issued a pastoral, in which he states that he will deprive of the sacraments any parents who send their children to the national model schools.

DEMANDS OF THE IRISH ROMAN CATHOLIC BISHOPS.—The Roman Catholic bishops have promulgated ten resolutions adopted at a meeting at Maynooth College, mainly on the education question. They condemn mixed education, demand a Catholic University or a national University with a Catholic College, access to University emoluments, representation in the Senate, a share in the funds devoted to the support of endowed schools, a re-arrangement of the Queen's Colleges on a denominational system, and also an immediate settlement of the land question.

PARTY PROCESSIONS.—On Tuesday a rumour reached Londonderry, where it caused no little excitement,

to the effect that the Royal Commissioners, who have recently concluded their sittings in that town, will report to the Lord-Lieutenant against party processions, in that part of Ireland especially.

EMIGRATION FROM IRELAND.—The official returns of emigration show that since 1853 one million and a-half of people have emigrated from Ireland.

FATAL ACCIDENT WITH A ROAD STEAM-ENGINE.—On Tuesday evening the Hon. Captain Henry Ward and Mrs. Ward were on a road locomotive steam-engine, with the Hon. Bandal and Clara Parsons, when, on turning a sharp corner of a street in Parsonstown, Mrs. Ward slipped off a stool on which she was seated, and, falling on the ground, the wheel ran over her head and killed her on the spot. An inquest was held on Wednesday at Birr Castle, when the jury returned a verdict of Accidental Death, acquitting all persons concerned in the management of the engine from any blame.

ACCIDENT TO AN EXCURSION TRAIN.—On Friday night a special train, from Tralee to Cork, containing about 100 excursionists, ran into a siding at Killarney Station, instead of stopping at the ticket platform, and ran with such force against the bank pier of a bridge as to smash the engine and a second-class carriage to pieces. The passengers received some cuts and bruises, but no serious injuries were sustained.

AGRARIAN MURDER IN MAYO.—The first agrarian murder in Mayo within living memory, was perpetrated on Sunday evening. A farmer named Hunter, a Scotchman, living five or six miles from Newport, in that county, was shot dead near his own house at 10 p.m. He was driving home on a car, with his wife, son, and servant, and, finding some obstruction on the road, pulled up. Immediately an assassin came out, and, lodging two pistol balls in his body, killed him instantly. The rest of the party were uninjured. It appears that Mr. Hunter had taken the lease of a farm containing bog, on which the tenants of the adjoining farm claimed right to cut turf. He was advised to bring an action of trespass against one of them. He selected a farmer named O'Neill, obtained a decree, and on Friday seized a growing crop. No one, however, would act as bailiff, whereupon he obtained a special warrant, and took charge himself. Several men have been arrested on suspicion. A few minutes after Mr. Hunter was shot, and within 300 yards of the same spot, Mr. Francis P. Vaughan, son of Colonel Vaughan, was fired at, and escaped uninjured.

MURDER AND SUICIDE NEAR WATERFORD.—On Friday evening Dr. Lannigan, R.N., who held the situation of physician to the infirmary at Kilmeador, near Waterford, murdered his wife, and then committed suicide. He was married about two years ago to his second wife, a Miss Lecky, a Waterford lady, of very respectable connections. The marriage did not prove a happy one. The lady was of a rather hot temper, and Dr. Lannigan took to drink. He became at last so intemperate that on the day of the tragedy he consumed 14 pint bottles of porter, besides a quantity of wine. He had several times threatened to take his wife's life, and on one occasion attempted to stab the housemaid. A clerical friend had been invited to dine with them on Friday, and Dr. Lannigan expressed a wish that advantage should be taken of his visit to have their child, a boy six months old, baptized. Mrs. Lannigan opposed this, wishing to have the ceremony performed in church. A quarrel arose, in which the doctor behaved with outrageous violence, putting a dinner knife to his wife's throat, and afterwards presenting a gun at her. She fled with her child to a neighbour's house, but after a short time, hearing that her husband had become quiet, she returned alone, leaving the child behind. What passed between her and her husband is not known, as he had sent the boy out on an errand, and the housemaid was outside in the grounds. About 15 minutes after her mistress's return this girl heard a shot, and soon afterwards another. She informed some of the neighbours, who effected an entrance through a window, and in the parlour found Mrs. Lannigan quite dead, bleeding profusely from a wound in the left cheek, while across her lay her husband, with a bullet wound in his temple from which the brain protruded. A revolver, the instrument of the double murder, was grasped in his right hand. He was then alive, but died within two hours.

SUSPECTED MURDER IN MONAGHAN.—James Criggy, a Roman Catholic, died on Saturday, near Newbliss, Monaghan, under very suspicious circumstances. It is believed that he received a savage and brutal beating. The Coroner, who went to hold an inquest, was stoned, and obliged to leave without holding it. The police were also attacked. The Attorney-General's attention has been called to the matter.

THE FENIAN AMNESTY.—A meeting in support of the amnesty movement was held on Friday in the market-place of Mullingar. About 1500 or 2000 persons attended—a much smaller concourse than the promoters of the demonstration expected. A platform decorated with green leaves was erected for the speakers, of whom the principal were the Rev. Mr. Coyne and the Rev. Mr. Culloch, who extenuated the guilt of the prisoners, and appealed to the Premier to release them, in the full assurance that their liberation would be in reality, and not in name only, a message of peace. Several resolutions were passed in furtherance of the object of the meeting.

FENIAN FUNERAL.—A great Fenian demonstration took place on Wednesday at Glasnevin, at the funeral of a man named Dalton, who was some time ago imprisoned as a "suspect," under the Habeas Corpus Suspension Act. The coffin, festooned with laurels, was borne on the shoulders of eight men, while a hearse, bedecked with green wreaths, followed, empty. About 200 young men, wearing green neck-ties and ruffles, marched in military array after the hearse,

and the procession was closed by about a hundred bearing women and children, many of whom were dressed entirely in green, while all wore the national colour in some portion of their attire.

Scotland.

THE BRAEMAR GATHERING was held at Mar Lodge on Thursday, in the presence of the Prince and Princess of Wales, Prince Leopold, and Prince Alfred, and Prince Leopold, from Balmoral. The gathering was splendid, and the attendance of guests was large. The Prince of Wales attended the Mar Lodge in the evening.

Railways.

COLLISION ON THE GREAT NORTH on Thursday, the 26th ult., the train shortly after 3 p.m., on arriving at Methley and Stanley, came into collision with a train of nine coal waggons and a break, which had broken loose from the engine at Lofthouse. Two coal waggons were smashed, and the coal train broke and the tender of the train engine were much injured. The latter train was severely shaken, but with the exception of a little girl, no injury.

FATAL COLLISION ON THE YORK AND GREAT NORTH BOROUGH.—On Wednesday afternoon a collision between a passenger and cattle train took place at Strensall, seven miles from York, which resulted in the death of a shepherd who was tending sheep to an agricultural show. The passenger train halted at a small station to attach a train for the show when the other train came in despite of the danger-signals displayed. The passenger train escaped without injury, but several of the passengers were much shaken.

THROWING STONES AT A TRAIN.—On Wednesday, 13, and George Puney, 11, were charged at Brentford with throwing stones at a train in the parish of Isleworth. The engine-driver, that at 9.30 p.m. he was passing with the train Sion Lane Bridge, near Woke House, was struck by stones thrown from the bridge, which produced, struck the engine and lodged on board. He saw two boys on the bridge, but about the same size as the prisoners but could not identify them. He picked up the three largest of the stones, and called out to some platelayers in the opposite direction, have caused his train to strike the gauge-glass, when an explosion occurred which might have seriously injured the engine and stoker. A platelayer proved the prisoners and giving them into custody of the constable. The chairman said after this could not allow the prisoners to be at large would be remanded for a week, with a view to them into a reformatory for three years.

Sporting.

THE INTERNATIONAL BOAT RACE.—The details of this race, the result of which was last. The signal for the start was given at 11. The Harvard crew, which had obtained by sides, and had chosen the Middlesex shore into the water first, but the Oxonians were under way, although not to such good advantage did the Americans get their boat off the Head, about half way between the Star and mon's yard, they led by half a length, and advantage to a whole length opposite the house, the cheers of the American spectators, cheers of the multitude, creating a deafening the Bishop's Creek, on the Middlesex side, more to their lead, and when they passed the site of the Old Half-mile Post, they were rowing a stroke of at least 12 to the minute. The Oxonians, on the other hand, were pulling a very steady stroke to the minute, with a Lurry, and with every appearance of keeping it up all the way; but, nevertheless, appeared to be moving so slowly when compared to the Americans, that people began to wonder. At Craven Cottage the two crews, which had been wide of one another, closed together, entering the long reach for the Soap Works, this the Oxford approached the Harvard crew, the coxswain of the latter was compelled to keep out of danger, and a slight touch of his left hand rudder line caused his boat to ground at the same time, the Harvard crew leading by something over a length. At the Harvard coxswain, apparently, struck the slack water under the Middlesex shore, and bared the Oxford crew, the latter giving way at once. This little advantage the American boat a further advantage, at the Grass Wharf, above the Cottage they led, and quarter, or thereabouts. Below Rossbank the two boats were crossing the water for the shore below Hammersmith, the Oxford crew, but the Harvard men once more were in the Crab Tree, and steered well out towards where the flood tide was less spent than the Oxonians were taken. Consequently, it appeared as if the Harvard crew were the Oxford men altogether astern, and the probable race certainly looked anything but favourable to the crew. In rounding the point below the on the Surrey shore, the aspect of affairs an important change, the Oxford crew beginning to hold their own, and, as they breasted the Soap Works, perceptibly the Americans. A tremendous cheer was raised which had gathered on the wharf and its neighbourhood, to be taken up and repeated in throats as the crews came in sight of Hammersmith, which from the water appeared to be a mass of white after passing the Soap Works, and when the boat

SEED MARKET.

There is still very little doing in the seed trade, the want of rain having for the time completely checked the consumptive demand. In the absence of transactions values of all kinds of agricultural seeds remain without change. Winter Tares are in good request, and realised high rates. It is now quite evident that the yield will be exceedingly short; prices, it is thought, will advance considerably. New Mustard seed has come to market at lower terms than those at first demanded, but the quality of the majority of the samples is very poor. We have a fair trade for new English Rye, and also for winter Barley and Oats. A good downfall of rain would, without doubt, cause great activity to prevail in the seed trade.

JOHN SHAW & SONS, 16 Water Lane, E.C.

HOPS.—BOROUGH MARKET, Sept 3.

Messrs. Pattenden and Smith report that the trade continues dull, prices, however, being firm. The accounts from the plantations this week are very unfavourable, the cold weather keeps the Hops back, and red mould is spreading generally throughout the whole plantation.

To the Seed Trade.

WANTED IMMEDIATELY, an experienced and efficient Person to MANAGE an extensive RETAIL SEED BUSINESS, in a large town.—Messrs. FRASER, GOAD, and RATFORD, Seed Merchants, Bishopsgate Street Within, London.

S & C regret having to caution Gardeners and others, but are
 compelled to do so, in consequence of an imitation of common
 quality, having been sold for the genuine one, and which has caused
 many complaints to be made to them of Knives which were not of
 their make all of which are warranted both by Sellers and Makers.
S. & C's PRUNING and BUDDING KNIVES are the best and
 the cheapest in the market.
Faxton Works, Sheffield. Established upwards of 136 years.

T. H. P. DENNIS & COMPANY, PATENTEES.
HORTICULTURAL ENGINEERS AND BUILDERS IN WOOD AND IRON.

T. H. P. DENNIS AND COMPANY beg to direct the attention of Noblemen, Gentlemen, Nurserymen, and Gardeners, to the many and varied improvements they have
 effected in every description of Horticultural Erections. They continue to Manufacture Buildings of the highest order in Wood, Galvanized Metal, and their HIGHLY APPROVED
 Wrought Iron Construction. They have much pleasure in announcing that by the aid of modern appliances, in their Manufactory, all kinds of Horticultural Buildings
 will be supplied at the most moderate prices consistent with the high standard of their workmanship. Every description of Garden Structure arranged, designed, and heated on
T. H. P. DENNIS & CO'S improved system, will be guaranteed to fully answer the purpose for which they are intended.

Gentlemen waited upon by Members of the Firm to advise and arrange for contemplated Buildings.

NEW HOT-WATER BOILER and other Specialities and Patented arrangements are described in other Advertisements and also in our Catalogue, which may be
 had on application.

ANCHOR IRON WORKS, CHELMSFORD.

GREEN'S PATENT SILENS MESSOR,
 OR
NOISELESS LAWN MOWING, ROLLING, and COLLECTING MACHINES.

BY SPECIAL APPOINTMENT,
 MANUFACTURER

TO HER MOST GRACIOUS
 MAJESTY THE QUEEN.

The Extraordinary Success of **GREEN'S PATENT LAWN MOWERS** is an established fact. During the last five years the demand has been unprecedented, which
 is a proof of their superiority over all others. The following are their characteristic features:—

- 1st. Simplicity of Construction, every part being free of access.
- 2d. They are worked with far greater ease than any other Lawn Mower.
- 3d. They are the least liable to get out of order.

T. GREEN AND SON warrant every Machine to give entire satisfaction, and if not approved of can be returned unconditionally.

HAND MACHINES.

VISITORS to the SEA-SIDE, TOURISTS and TRAVELLERS exposed to the Sun and Dust, will find the application of ROWLANDS' KALYDOR both cooling and refreshing to the face and skin.

WHEN the HAIR, through weakness, begins to fall off, or turns grey, no preparation will sooner arrest the progress of these evils, restore the ORIGINAL COLOUR, and produce a healthy and luxuriant growth, than Mrs. S. A. ALLEN'S WORLD'S HAIR RESTORER.

A HANDBOOK of VINE and FRUIT TREE CULTIVATION under GLASS, with carefully prepared Lists of Fruits and Vegetables, and Plans of Glasshouses, Hints for Heating, &c., by S. HERMAN, Chatsworth.

Laying Down New, or Improving Old, Grass Lands. FOR THE BEST PRACTICAL INFORMATION ON THE ABOVE SUBJECT SEE "PERMANENT PASTURES," a New Illustrated Work, by M. H. SUTTON, F.R.H.S., &c.

AN ESSAY on the WASTE and SUPPLY in the HUMAN SYSTEM. By JAMES DEANE, M.A., M.D. "A very interesting Essay on a very interesting subject. Some of his practical advices are in opposition to views now generally entertained. We cannot pretend to decide where doctors differ, but at all events we have found Dr. Deane's Essay agreeable and instructive reading."

PRACTICE with SCIENCE; a Series of Agricultural Papers. Edited by the Rev. J. CONSTABLE, M.A., Principal of the Royal Agricultural College, Cirencester. 1. Laws of Rent Property as affecting Agriculture. By J. Welford

FINANCIAL POSITION on January 1, 1880. Existing Assurances £1,117,000. Reversionary Bonus thereon 539,000. Annual Income 200,000. Invested Funds 1,540,000. Share Capital, fully Subscribed .. 1,000,000. Claims and Bonus paid 1,650,000.

AMMUNITION OF THE ARMY.—In consequence of the recent events at Aldershot, and in some of the garrison towns, the Commander-in-Chief has issued a general order that from henceforth the service ammunition of the army is not to remain in the custody of the soldiers, but be deposited in the regimental magazines.

GRESHAM LIFE ASSURANCE. Realised Assets exceed Annual Income. Payments under Policies Cash Bonus divided.

ROYAL SCHOOL. The SESSION will BEGIN on MONDAY. Prospectuses may be had on application to the TRENHAM HOUSE.

Home News.

THE QUEEN IN SCOTLAND.—The Princesses continue at Inverness, their rival on the 1st inst, her Majesty has excursions in the neighbourhood.

THE PRINCE OF WALES was expected at Abergeldie Castle on Thursday for Marlborough House, on his way to Sandringham.

THE BENGAL PRINCES.—On Friday afternoon the Nawab Nazim of Bengal, with Prince Ali Bahadur, Prince Soliman Kudr Bahadur, and suite, visited Windsor Castle.

MR. GLADSTONE.—The Premier has been expected to visit Whitby, for which borough he is a member; but at present the right hon. gentleman has deferred his visit, and is now staying at Rydale, the seat of the Duke of Cleveland.

CHIEF JUSTICE COCKBURN.—It was reported a few days since, that Sir Alexander Cockburn, in consequence of ill health, intended to resign the Judgeship of the Queen's Bench before the commencement of Michaelmas term.

THE BISHOP OF BATH AND WILLS sent in his resignation, under the new Act, on Monday. THE BISHOP OF WINCHESTER has not made an intention, on resigning his see, to claim a pension of 3500l., instead of the 6000l. to which he was entitled.

THE BISHOP OF LICHFIELD continues to suffer from nervous prostration and loss of sleep, but is to take carriage exercise in the Peak district, where he will probably remain for a few days longer.

KNIGHTHOOD.—The Queen, on the recommendation of Mr. Gladstone, has ordered the issue of Letters Patent under the Great Seal conferring the dignity of Knight of the United Kingdom on Mr. William Drake, of Oatlands Lodge, Surrey, of the firm of Bircham, Dalrymple, Drake & Co., solicitors, Park Street, in recognition of the services rendered to him to the Liberal party.

THE IRONCLAD FLEETS.—The Channel squadron under the Admiralty flag, was joined on the 25th inst. by the Gibraltar by the Mediterranean squadron, under the command of Alexander Milne. On Friday morning the combined fleet steamed slowly out of the bay, the Channel squadron on the starboard and the Mediterranean squadron on the port side.

THE CONTROLLERSHIP OF THE NAVY.—It is understood that Mr. Reed is to be the new Controller of the Navy.

THE RITUAL COMMISSION.—The Archbishop of Canterbury has issued a circular to the bishops, in which he has expressed his regret that the ritual commission should have been appointed at a time when the country was so much afflicted by the late war.

...last week with the clergy of West Darford, at Aldington ... as follows on the Ritual Com-

...well to the appliances and plans ... brought under discussion, ... the education of the clergy ... The clergy have always most carefully kept ... of doctrine are not within its scope. ... it has not before itself to examine what ... is altered so as to further the present work ... increase its usefulness. It may be well ... changes which are likely to be proposed, it ... to consider them, and weigh them, before ... laid open. But, first, let one point be ... Great alarm is expressed on one side lest the ... should act without Convocation; on the ... should interfere with the prerogative ... Now, really both dangers are somewhat ... depend upon it the greatest difficulty will ... to legislate at all; there is a tendency ... to ignore the whole matter; and if Parliament ... will be in consequence of the expressed and ... Church, whether expressed ... any other method. Now it lies, ... to consider well what the weak ... system are, and if they find it wanting, ... the needs of the time, then to let it be known ... modifications in their system. The Ritual ... has been sitting long, and the changes which ... have now been drawn up, and are at ... debated among the divinity professors ... and other dignitaries of the Church. ... up as follows:—1. A new lectionary ... been a idea, assented to edification; some ... A greater elasticity has been given to the ... principal changes are in the daily lessons. ... the ordinary daily service. Evidently, ... the service as it stands at present does ... Even the City churches which have a ... thinly attended. A shorter service there- ... shorter, but strictly based upon the ... Every facility for dividing services, ... different services at different times, according to ... of different congregations. 4. In the burial ... of a difficulty commonly felt will be ... are the chief matters dealt with by the Ritual ... nothing revolutionary need be anticipated. The ... Prayer-book will be preserved intact."

Imperial decree was published yesterday ... the *Senatus Consultum* with the articles

relative to the budget, which formed a schedule to it. M. Ledru Rollin has published a letter stating the grounds upon which he has refused to avail himself of the general amnesty granted by the Emperor. He believes that it would be his duty to be in Paris among those who are fighting the good fight without truce, that he does not delight in the condition of a refugee, and finds no fault with those who struggle to accept the amnesty, but as he was found guilty and condemned by default, to transportation on the charge of complicity in a plot against the Emperor's life, the amnesty would not exonerate him from the necessity of undergoing a criminal trial. He says that he would not shrink from such a trial, but as he could only be acquitted by being brought face to face with the accusers and witnesses of 12 years ago, and as some of these are now expiating their guilt in Cayenne and other distant penal settlements, it would be necessary for him to remain in prison all the time required to send out an order for those men, and to bring them back. He also asserts that "as soon as the amnesty was signed orders were sent to all the outposts that he should be arrested on his arrival."

SPAIN.—The office of the Ministry of the Interior was occupied on Wednesday by the National Guard. The Government had ordered the suppression of a part of the National Guard, which aroused suspicions of some hidden designs on the part of the Government, and during the night the post was occupied—the National Guard remaining under arms. Several deputies belonging to the Republican party tried persuasion, and succeeded in restoring obedience among the mutineers. At five o'clock on Wednesday morning the post was given up and tranquillity re-established. It is rumoured in Madrid that a letter has been written to Dom Fernando of Portugal, by the Duke de Saldanha, expressing regret at his Majesty's refusal to accept the Crown of Spain. The *Official Gazette* of Tuesday publishes a Ministerial decree, ordering proceedings to be taken in the Supreme Court against the Bishops of Santiago, Osma, and Urgel, on the charge of disobedience to the commands of the Government. The last band of Carlists in the province of Gerona has disappeared. The Minister of Justice has proposed that the number of the clergy should be reduced to five archbishoprics and 32 bishoprics.

PORTUGAL.—The health of the Queen of Portugal is not considered satisfactory by her physicians, although improved by her recent voyage. The King has returned from Oporto. The yield of olive oil throughout Portugal is reported as almost a total failure, and the wine crop is very scanty.

SWITZERLAND.—In reply to the circular despatch of Prince Hohenlohe, the Bavarian Foreign Minister, on the subject of the approaching (Imperial) Council, the Swiss Federal Council has declined to take any share in the action proposed, on the ground of its incompetency. Orders have been issued prohibiting recruiting in Switzerland for the Egyptian army.

PRUSSIA.—Prince Frederick of Hohenzollern-Hechingen died on Friday of apoplexy, at the castle of Nettlow. By his death the line of Hohenzollern-Hechingen becomes extinct. The semi-official *Provincial Correspondence* says that there can be no doubt of the fact that the request addressed by the Chief Magistrate of Frankfurt to the Minister of the Interior for the recall of the police measures banishing those persons who have adopted Swiss nationality will not be complied with. The great autumn parade of Prussian troops for the present year was held before his Majesty on Monday week. All the members of the royal family then in Berlin were present. At a quarter to 10 o'clock the troops appeared on the ground, the infantry in columns, the cavalry in regimental columns and squadrons, and the artillery and train in line. Prince August of Wurtemberg, General of the Guard, commanded. The troops were drawn up in two lines. At 10 o'clock his Majesty arrived with a brilliant suite, including all the foreign generals and officers now in Berlin, and the military plenipotentiaries of foreign Courts. When the first line had passed, the second was inspected, commencing from the left wing. In the meantime the first line formed for a march past. After they had performed this evolution twice the troops left the ground. The soldiers appeared in their parade uniform, the infantry with their cooking apparatus strapped on their knapsacks. The non-Prussian German officers present and the Prussian officers of other regiments took their places among the troops on parade. The weather was fine, and a large crowd had collected to view the spectacle.

BAVARIA.—The ex-King and Queen of Naples have been in Bavaria for the last few days, on a visit to King Louis. For three years the ex-Queen had not visited her native country, and only went there in 1865 to re-establish her health, gravely compromised by the fatigues and privations of the siege of Gaeta. Her Majesty is sister to the Empress of Austria, the Countess de Trani, and the Princess Maximilien de la Tour et Taxis.

BOHEMIA.—The festival in commemoration of John Huss took place at Prague on Saturday, and partook more of an anti-German than an anti-clerical character. Many Russians, Slavs, Frenchmen, and Englishmen were present. A letter sympathising with the object of the festival was received from Garibaldi.

HUNGARY.—The Hungarian Diet will probably not be opened before the middle of October. Prince Karageorgewicz has been set at liberty on bail.

RUSSIA.—Accounts from Livadia state that the Emperor has been suffering for some days from indisposition, but is now completely recovered. The Empress also, in consequence of having taken cold, has been slightly unwell. The Minister of Finance has made a speech at the Council of the Credit Establish-

ments, in which he stated that the public debt has been reduced in 1862 by 400,000,000. The sum of the *Trésor* of Bokhara, valued at 14,000,000, has been sent to St. Petersburg to complete the redemption of a loan made to the Russian Court. The Emperor has been visited by a present from his father-in-law, the Emperor of Austria.

ITALY.—Cabinet Councils have been held daily since the return of the King, to consider the question of re-organising the *Senatus Consultum* of the Italian Parliament. Serious differences of opinion are still in progress on the subject. Senator Ferrero, who opposes the dissolution, was favoured by the President and Senator Marini, and has gone over to take the same step.

THE PRINCIPALITIES.—Prince Charles of Romania, the Viceroy of Transylvania, on his way to the Emperor of Austria and will probably return to Switzerland to visit his family. His Highness will afterwards go to Paris, Brussels, and Berlin, to visit the Sovereigns representing the protecting Powers of Rumania.

TURKEY.—A panic prevailed in the money market on Tuesday, in consequence of the apprehensions respecting the illness of the Emperor Napoleon. Great anxiety was also felt in Government circles on the subject. The newly appointed Armenian Patriarch, Monsignor Ignatius, died on the 24th inst., from the effects of an operation performed for a carcinoma. He was buried with great pomp on the very day on which he was to have been presented at the Porte to receive the *berat* confirming his election.

PERSIA.—Intelligence from Teheran states that the Turco-Persian frontier question has been arranged at Constantinople, and the ratification of the treaty on the subject is expected shortly.

EGYPT.—It is understood that the settlement of the dispute between the Sultan and the Viceroy is mainly due to the good offices of England, France, and Austria. The Viceroy has telegraphed his assent to the conditions contained in the Grand Vizier's second letter, and was expected to arrive at Constantinople on Monday on a visit to the Sultan.

ABYSSINIA.—Prince Kassa, of Tigre, will, it is believed, take vengeance on the murderers of Mr. and Mrs. Powell and the Swedish missionaries.

CAPE OF GOOD HOPE.—The Cape Parliament had refused to pass the proposed income tax, and asked the Government for a scheme of further retrenchment, to balance the expenditure with the income. Governor Wolhouse, in reply, proposed to reduce the two existing Houses of Parliament to one legislative Chamber, the members of Parliament to 15, 12 elective for five years, to abolish 14 fixed divisions; to reduce salaries in governmental departments by 7000*l.*, and withdraw 5000*l.* annual grants to agricultural societies, libraries, museums, and botanical gardens. Sir Walter Currie had driven the Korthams, who lost heavily in kudu and wounded, out of their island strongholds in Orange River. The Tatin gold fields were reported to prove satisfactory to Sir John Swinburne, who was about to return to England to develop his company. The diamond discoveries continued. The Griquas were successfully searching their streams for gems. A warrant had been issued against Dr. Twells, Bishop of Orange Free State, charged with committing an undiscussable offence. The bishop was absent on a visitation tour to the Transvaal, and his friends asked the public to suspend their judgment until the case had been heard. His chaplain, who has been closely associated with his daily life for years, speaks with the utmost confidence of the bishop's perfect innocence.

INDIA.—A plot against the Ameer Shere Ali has been discovered at Cabul. His nephews, Sirdar Ismail Khan and two brothers, were the instigators, and were arrested and sent to British territory, to be kept under surveillance by the Government of India. Sirdar Ismail Khan escaped from his Afghan escort, but his brothers will be detained at Lahore. The Shah of Bokhara has thought it more prudent to pay the arrears of his tribute to Russia than to run the risk of another struggle. He has consequently imposed a tax on all the cultivated land of his dominions, and engaged, as soon as it is realised, to make over his arrears to the Russian agent at Bokhara. The King of Burmah has at last consented to carry out the treaty in full. Several Brahmins who took part in the late Hindoo widow remarriage at Bombay have been excommunicated from their caste.

CHINA.—The reported refusal of the Peking Government to receive the Duke of Edinburgh is confirmed.

AUSTRALIA.—The release of Mr. Kenealy, the Fenian convict in Western Australia, by order of the home Government, has been the cause of a difficulty between the colony of Victoria and the mother country. After his release, Mr. Kenealy made his appearance in Melbourne, and as he was to be followed by 30 or 40 accomplices similarly situated, and a considerable sum of money had been forwarded from Ireland to be paid to them on arrival, the colonial Government was urged on all sides, and by men of all parties, to enforce the laws of the colony, by which any person convicted of felony by any Court of the Empire can be forbidden to reside in Victoria, and ordered to depart under severe and summary penalties. The Land Bill had passed through Committee of the House of Assembly with but few alterations. A Committee of Inquiry into the alleged corrupt administration of the public lands had been appointed. The estimates had not been passed, but an additional supply had been granted. The South Australian Parliament was sitting. The Governor of New South Wales had returned from his northern tour. Diamonds had been found at Echuca, South Australia, and it was stated they exist there in large numbers. Six tons of pearl had been brought to Adelaide from the Western Australian fisheries, valued at 35*l.* per ton.

NEW ZEALAND.—Accounts from New Zealand state that the rebellion is increasing, and that great alarm

prevails. The 18th Regiment had been detained in the island. Fresh hostilities with the natives had occurred on the East Coast. It was reported that Rowi was plotting a union of the Hau-Haus with the friendlies, whilst 200 Arawas had marched against Te Kooti. The Wanganui papers mention the capture of the rebel chief Tauroa and 122 men, women, and children. A new Ministry has been formed, under the presidency of Mr. Fox, consisting of Mr. Gisborne, Colonial Secretary; Mr. Carrill, Postmaster-General; Mr. Vogel, Treasurer; Mr. M. Lean, Minister of Defence. The policy of the new Ministry is to be in some matters diametrically opposite to that of its predecessor. It proposes to withdraw the forces now in the interior, and convert them, as far as possible, into a purely defensive force, and to send commissioners to England to obtain the assistance of two regiments going home, the colony paying 40*l.* per man annually for the services.

UNITED STATES.—Mr. John A. Rawlins, Secretary of War, died on Monday, aged 38, and Senator Fessenden died on Thursday. President Grant has appointed General Sherman acting Secretary of War until Mr. Rawlins' successor should be appointed. The Vermont election on Tuesday resulted in Mr. Peter T. Washburn (Republican) being elected Governor by a majority of 20,000. The New York journals state that at an interview held on Tuesday between Mr. Fish, Secretary of State, and several foreign Ministers, it transpired that the Administration has determined to recognise the belligerency of the Cuban insurgents before Congress should meet. Such recognition was only temporarily delayed through the exertions of Senor Roberts, the Spanish Minister, who has urged the Administration to consider the serious consequences which were likely to follow, as Spain would exercise the right to search American vessels under the treaty of 1795, stating further that, in case of war, which probably would follow, Spain would not be bound by the stipulations of the treaty of Paris prohibiting privateering. The departmental offices have been closed from Monday to yesterday out of respect to the memory of Mr. Rawlins, the late Secretary of War. Mr. Hoare, the Attorney-General, has given an opinion to the effect that the members of the New Virginia Legislature are not obliged to take the test oath, but that the Legislature cannot enact laws until it ratifies the suffrage amendment. A Cuban filibustering expedition has been intercepted on the Apalachicola River, Florida, and prevented sailing. In Wisconsin the Republican Convention has nominated Mr. Lucian Fairchild for Governor, and declared in favour of a revision of the tariff and taxation to cause them to fall equitably on all classes; it has also favoured the payment of the national debt in gold. The California election has resulted in the return of a small Democratic majority in the Legislature. The last Legislature was Democratic. The Cotton crop of the United States will, it is said, be almost certainly an average crop, and probably a crop considerably above the average. General Butler has written a long letter condemning the charges published by Mrs. Stowe in "Macmillan's Magazine" against Lord Byron, and exposing their gross inaccuracy in regard to the dates. A dreadful calamity occurred on Monday in the coal region of Avondale, at Plymouth, in Pennsylvania. The colliery had not been in use for some time, on account of the labourers being on strike, but they resumed work on Monday, when a shaft more than 300 feet deep caught fire at the bottom, from the ventilating furnace timbers being dry. In a few moments the entire shaft and buildings above were in flames. The fire continued for some hours, and rubbish fell down and choked the shaft; 202 men and boys who were in the mine were believed to have been suffocated. Two men sent down the shaft on Monday night were suffocated. On Tuesday efforts were made to force air down the shaft by a steam fan. An attempt was also made to effect an entrance to the colliery from an adjacent colliery by drilling a hole from one gallery to another. On Thursday, after much hard work, the explorers penetrated the inner chamber, and found that every collier in the workings had perished. The bodies were brought to the surface, when it was found that they numbered 202, and had all evidently died from suffocation. Several persons were overcome by the carbonic acid gas during the explorations, but all of them were resuscitated. Great distress was manifested at the pit mouth, which was surrounded by hundreds of weeping relations. A hurricane occurred at Boston on Wednesday evening. The Colosseum was partially destroyed, several buildings were injured, and steeples blown down. One man was killed. The hurricane also deranged the telegraph land lines, and prevented any messages being received from New York.

CANADA.—Governor-General Sir John Young returned to Ottawa on Tuesday. Prince Arthur left Picton on Monday for Shadiac, New Brunswick. His Royal Highness arrived at St. John's, on Tuesday, and was enthusiastically received. At a levee, held on Saturday, at St. John's, Newfoundland, Sir John Young made a speech in which he stated that opposition to confederation was rapidly subsiding. He praised the energy and industry of the people of the province, and predicted that the Dominion, led by Great Britain, would rapidly attain to a condition of virtuous prosperity. The strike of the ship labourers at Quebec has been compromised, and order is restored.

HAYTI.—Advice has been received from Hayti announcing that Sainave has been defeated and badly wounded at Aux Cayes. He is said to be preparing to abandon the contest. The Cacos have captured Gonaives.

CUBA.—A telegram from General Caballero de Rodas, Governor-General of Cuba, announces the dispersion of the insurgents in the central district.

City Intelligence.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols are 92½ to 92¾ for delivery, and 92½ to 93; New and Reduced Three per Cents, 91½ to 91¾ ex div.; Bank Stock, 243 to 245; Exchequer Bills, March, 2s to 6s. pm, and June, 6s. to 10s. pm.; India Five per Cents, 113½ to 114. — **FOREIGN:** Egyptian (1884) Bonds, 90 to 91; Ditto (1868), 74½ to 75½; Viceroy's Seven per Cents, 79½ to 79¾; Ditto Nine per Cents, 96½ to 97½; Turkish Five per Cents, 40½ to 40¾; Ditto Six per Cents, 64½ to 64¾; Charkof, 80½ to 81½ ex div.; Mexican, 11 to 12; Italian, 51½ to 51¾; Argentine, 79 to 79½; Peruvian, 78½ to 79; United States 5-20 Bonds, 82½ to 83½; Erie 23½ to 24; Illinois, 94 to 95.

Metropolis and its Vicinity.

THE MAYORALTY.—A deputation of Liverymen waited on the Lord Mayor, Alderman J. C. Lawrence, M.P., on Wednesday, and presented him with a requisition, signed by 1336 Liverymen, asking him to allow himself to be again nominated for the mayoralty. His lordship acceded to the request, and a committee was thereupon formed to promote the Lord Mayor's re-election. On the same day a meeting of the Ward of Aldersgate was held in favour of the return of Alderman Besley. Resolutions condemning the attempt to secure the re-election of the present Lord Mayor, as an act of manifest injustice to the other Aldermen who had not yet filled the office, were unanimously carried, and Alderman Besley, who was present, expressed his intention to fight the principle to the end, and to poll to the last elector.

OPENING OF THE NEW MANSION HOUSE STREET.—On Wednesday morning that portion of the new street lying between the Mansion House and Queen Street, Cheapside, was thrown open for foot passengers. The portion of the street now open intersects the former thoroughfares of Bucklersbury, St. Pancras Lane, Size Lane, and Queen Street, in each of which a few houses, not being in the direct line of street, are left standing. In the course of a few days the whole length of street, from the Mansion House to Earl Street, Blackfriars, will be paved and thrown open for foot and carriage traffic.

THE ALBERT ASSURANCE COMPANY.—Another meeting of policy-holders has been held in Manchester, at which a resolution was passed against approving of any arrangement until Mr. Kirby was dismissed from the office of provisional liquidator. Another meeting of policy-holders was held on Monday at the Cannon Street Hotel, and was attended by representatives of some of the London banks, and of the Calcutta and Bombay policy-holders. Arrangements were made for securing united action in behalf of the policy-holders and annuitants. On Tuesday, in the Chancery Chambers, an application was made for an appointment to inspect the books. The chief clerk refused to interfere, and remitted the whole question to the Vice-Chancellor, who will sit on the 17th inst., at Lincoln's Inn, to hear the petition and other applications in the matter. On Wednesday the Manchester committee of the policy-holders met and passed two resolutions—one of confidence in Mr. S. P. Price, if he will act as liquidator for the policy-holders, and recommending Mr. David Chadwick, M.P., to be joined with him; the other recommending reconstruction under new management, or that efforts be made to get a first-class office to take the Albert's business. On Thursday a stormy meeting of the London policy-holders was held, Lord William Hay in the chair, at which neither the provisional liquidators, the solicitors, nor any party supposed to be connected with the directors, could obtain a hearing. Ultimately it was resolved to reject the scheme of reconstruction proposed by the provisional liquidators, to appoint an independent committee to confer with the provincial committees on the best mode of saving the wreck of the property, and to take all necessary steps for testing the liability of the shareholders in the amalgamated companies to make good the losses on the policies of their respective companies. The following gentlemen were appointed as the committee—Mr. Bell, representing Indian interests; Mr. Bird, Mr. Cundy, General Cunningham, representing interests of upwards of 100,000*l.*; Mr. Edlin, Q.C.; Mr. Matthews, of Grindley & Co.; Mr. Webster, Q.C.; Mr. Omanney, and Mr. Wyld, late M.P. for Bodmin.

THE VOLUNTEER VISIT TO BELGIUM.—At a meeting of the Anglo-Belgian committee, at the offices of the Belgian Vice-Consulate, on Tuesday, the executive committee, who have just returned from Belgium, reported that all arrangements for the reception of the English volunteers, and the shooting at the Liege and other *filles*, have been completed satisfactorily. The report showed that nearly 1200 names of English riflemen intending to be present had been received, and notwithstanding the restriction to 600 for the banquet and medals at Liege, there is no doubt that the aggregate number will reach 1300 or 1400, representing about 160 or 170 regiments. The shooting will take place at Liege and Spa. The Burgomaster of Brussels has announced a grand entertainment in honour of our countrymen on their return home.

OPENING OF THE SOUTHERN EMBANKMENT.—The Southern Embankment, as far as it is possible to carry it, is now opened to the public from Westminster Bridge to the point where it terminates in High Street, Vauxhall. The only difficulty which presented itself in constructing the second portion of the Embankment—from Lambeth Bridge to the Potteries—was in the bridge itself, which at one time seemed to be a great obstacle in the establishment of through communication for foot passengers, from the fact that the foot of the bridge lay right across the Embankment, and

consequently prevented a continuation of the road going from the Embankment round the river on to it again, and the difficulty was overcome by a slight incline.

THE NEW PALACE OF WESTMINSTER.—To give more light to the central portion of the Houses of Lords and Commons, the windows in the Peers' corridor were replaced by plain glass. A large number of workmen were engaged in removing the old windows, the place of which temporary glass was put. **THE TEMPLE CHURCH.**—The church will be re-opened on the 31st of October, by which time that the alterations in progress in the building will be completed.

CHURCH OF ST. MARY-LE-STRAND.—This church was re-opened, after having been closed some weeks. Some months since Dr. Lushington, Sir Travers Twiss, the judge of the High Court, for a faculty to pull down the high part of the church, and to reconstruct the interior of the church. The application, and the faculty was granted. Ignatius preached in the church on Wednesday evening, in connection with the Society for the Propagation of the Gospel.

NEW TELEGRAPH TO INDIA AND CHINA.—The prospectus has been issued of the India and China Submarine Telegraphs Limited, of 350,000*l.* in shares of 20*l.* The telegraphic system of British India, Java, and the Straits Settlements, and China, and the capital now asked for the cable from Ceylon to Penang. The cable, of 1800 fathoms length, is proposed to be of the gutta-percha patented by Mr. Varley, and is to be laid by the India-rubber, Gutta-percha Works Company for 325,000*l.*

NEW STEAMBOAT PIERS.—Two new piers, similar in design and dimensions to those on the Thames Embankment, will be opened in a few days at Hungerford and Westminster. These are the only stations on the river which are placed.

IMPROVEMENT OF LONDON BRIDGE.—The proposals proposed by Mr. Hamilton Fyfe will be further considered by the Council during the present month. Mr. Fyfe proposes that an additional width of 21 feet should be placed on it wrought-iron cantilevers, and bolted in the face of the bridge, so that there be no danger of the cantilevers falling. The greatest weight that can be brought on the present width of the carriage-way of each of the footways 9 feet. By the proposed carriage-way would be increased to 12 feet, so that each of the footways to be increased by 21 feet.

THE DOCKYARDS.—It is stated that the Government are in favour of the abolition of Sheerness dockyard, and that requisite arrangements can be carried out at Chatham, Portsmouth, Devonport, and Plymouth. The abolition of Woolwich, Deptford, and other dockyards is in accordance with the report of the committee which sat some time since, and the concentration of all the naval resources proposed that Sheerness dockyard will be reserved for the deposit of naval stores.

BRIXTON MANOR HOUSE.—This ancient well-known to all who are acquainted with the southern suburbs of London, is about to be sold.

VELOCIPEDE EXHIBITION.—On Monday a national velocipede exhibition was opened at the Crystal Palace, and has been continued for a week. Several English and foreign machines were exhibited their machines, and had agents to point out the advantages claimed for their inventions, and to show their capabilities. A velocipede circus was formed under the management of Mr. Hook, the velocipede champion, and for nearly two hours the performance of M. Moret and M. Michaux, of Paris, and of the champion rider of Belgium, and of Mr. J. C. Geo, as the "jockey" excited much interest and applause. The performance of Mr. Hook, the velocipede champion, formed on the bicycle by M. S. N. Master Barber, aged respectively 15 and 16, principal features of the entertainment. Hon. R. Lowe, the Chancellor of the Exchequer, is frequently to be seen practising on a velocipede at his residence at Warlingham, was an old hand on Monday, and watched the operation with an evident interest. The number of velocipedes on hand is said to be 100.

DESTRUCTIVE FIRE.—A destructive fire occurred on Friday night at Day and Martin's houses in Holborn. It occurred in a block of buildings occupying the centre of a block of buildings, between two large shops, with a passage between them, which is a large clock known to all as the "clock" in Holborn. The fire was not subdued until Day & Martin's central store was destroyed. Accidents occurred during the fire. Mr. M. a metal chaser, who was standing on a platform, was killed by the fall of an iron beam. A policeman had his hands cut by a beam as he was trying to cut a piece of timber. A watchman at the factory was burnt by the fire. An inquest on Mr. Evans was held on Monday, and a verdict of Accidental Death was returned. **SALE OF SHAW BUSINESSES.**—At

a man named Edgington, calling himself an agent for the disposal of businesses, and a woman called Mrs. Cox were charged with conspiracy to defraud. It appeared that the male prisoner sold a cigar business named Day for 70*l.*, representing its profits for a week, and giving her a guarantee, signed by a man who was put forward as the proprietress of the business, to refund the premium at the end of a week. The takings were not found as stated. The takings were next to nothing, varying from 1*l.* to 2*l.* On attempting to recover the 70*l.* a married woman, pleaded coverture, and she was separated from her husband, and held out of protection against him, she was thus unable to defeat the action. Nine previous examinations had taken place; and Alderman Dakin had taken Mrs. Cox and Edgington for trial on a charge of conspiracy to defraud.

LATE CHARGE OF FORGERY IN THE CITY.—The Mansion House on Tuesday the prosecution against the late Harwood, clerk in the house of Harwood, Knight & Allan, bill brokers and of Abchurch Lane, who absconded to New York with 15,000*l.* belonging to the firm, but was withdrawn by the prosecutors, in consequence of a son of the leading partner. The 11,600*l.* which was found on the prisoner when arrested at New York was ordered to be handed over to the firm.

WOOLWICH ARSENAL ROBBERIES.—On Tuesday, at the Woolwich Police Court, William Dabery, John Arthur Jones, and Thomas Wright were brought up for final examination on the charge of stealing a quantity of goods from the Royal Arsenal, and of having entered into a conspiracy to defraud her Majesty of the goods in question. It was shown that within a brief period 112 cwt. of waste paper had been accounted for, while 660 cwt. had actually been sent to the stores, the difference being, as stated by the prosecution, not waste, but uncut reams of paper, which might be resold as new. The prisoners were committed for trial, bail being refused.

THE MURDER OF MDLLE. TINNE IN THE INTERIOR OF AFRICA.—The Malta correspondent of the Times writing on the 30th of August, says:—

Accounts have been received from the interior of Africa by Baron de Testa, Dutch Consul at Tripoli, respecting the murder of Mdle. Tinne and two Dutch attendants, her only European attendants. The melancholy event took place in the Ouadi Berdjoudj, one day's journey from Scharaba, and five days to the west of Mourzouk. The last letter from Mdle. Tinne, who left Tripoli for the interior on the 30th of January, was dated from Scharaba, and received at the same time with the account of her murder, which was written soon after the occurrence by one of the Arab servants of the deceased, Mohamed Ben Hassan el Bannar. The party, escorted by an Arab, El Hadj Ahmed Bu Selah, sent by El Hadj Ikhenoukhen, the chief of the Touaregs, who was waiting at Tabarat to meet her, fell in with a party of Arabs and eight Touaregs, headed by El Hadj Escheikh Bou Bekar, another Touareg chief, who disputed the right of escort, alleging that he had been ordered by El Hadj Ikhenoukhen to conduct her to Mourzouk. I may here mention, by way of parenthesis, that El Hadj Ikhenoukhen visited Paris in 1863, with Dr. Meyer, the author of "Les Touaregs du Nord." Ultimately the two parties agreed to go on together. Mdle. Tinne had seen El Hadj Escheikh Bou Bekar about a fortnight previously at Mourzouk. The party had received presents from her. The evening, Sunday, August 1, the six Arabs and eight Touaregs pretended to dispute among themselves as to who should carry the palanquin of Mdle. Tinne. The Touaregs were armed with lances and sabres. The Arabs, on the pretence of defending themselves, seized the arms of Mdle. Tinne's attendants, which were lying on the ground while the attendants were being loaded. Mdle. Tinne and the two Dutch sailors advanced to separate the combatants. One of the sailors, named Ootsmans, was immediately wounded through by a Touareg with a lance, which also wounded a negro who was behind him. Mdle. Tinne was stretching out her right arm in a commanding attitude when a Touareg struck off her hand with a sabre, and an Arab shot her in the breast, causing instant death. The other sailor, Jacobsi, who had reached to her help, was then shot dead by an Arab. The responsibility of the crime was ingeniously divided between the members of the two tribes. All the attendants, consisting of Arabs and negroes, were allowed to escape, except a young negress named Jannina, who was carried off by the Touaregs. It appears that Mdle. Tinne proposed making a tour in the Touareg territory, while awaiting supplies and fresh camels from Tripoli, and intended to return to Mourzouk, to start thence for Bournou. She had met at Mourzouk Dr. Nachtigall, a Prussian traveller, who was charged with presents from the King of Prussia to the King of Bournou, and who had left on a short journey eastwards to the country of the Tibous, also intending to return to Mourzouk for supplies before proceeding to Bournou. Baron de Testa has sent orders for the survivors of Mdle. Tinne's party to return immediately to Tripoli. The Ouadi Berdjoudj is, according to Barth, in the territory of Fezzan, and consequently within Turkish jurisdiction; but the Pacha holds to the contrary, and it is well known that he raises tribute there where he can do so. He promises to do his utmost to punish the offenders to justice, but as he had previously confessed his inability to protect travellers beyond Mourzouk, he is scarcely responsible for the catastrophe. The sad news reached Tripoli on August 18, and was despatched at 12.40 by telegraph, and was received by Mdle. Tinne's family in Liverpool at

9.30 P.M. of the same day. The intelligence was confirmed on the 21th by a second despatch. By the first steamer leaving Marseilles two of the nephews of the deceased lady arrived at Malta, en route to Tripoli, in order to take the necessary steps, if possible, for the recovery of the bodies, orders for the interment of which had been sent from Mourzouk by the Turkish authorities, who had also directed that all papers and effects found on the scene of the murder should be carefully collected. M. O. Houdas, Professor of the Lycée d'Alger, a friend of the late Mdle. Tinne, has arrived here from Tripoli, and to this gentleman I am indebted for many of the particulars of this lamentable event."

MORE MILITARY SUICIDES.—An order for removing the service ammunition from the soldiers' pouches arrived at Pembroke Dock on Tuesday, but before the order was carried into effect another military suicide had occurred—Sergeant Little, of the 36th Regiment, having blown his brains out with his rifle. On the following day another suicide was perpetrated at Hounslow barracks, by Quartermaster Seggie, of the 9th Lancers, who cut his throat with a penknife.

THE PUBLIC HEALTH.—The Registrar-General's Weekly Return states that in the week that ended on Saturday, Sept. 4, 4472 births and 3179 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 25 per 1000 persons living, being 23 per 1000 in London, 26 in Edinburgh, 25 in Dublin, 18 in Bristol, 26 in Birmingham, 35 in Liverpool, 29 in Manchester, 24 in Salford, 29 in Sheffield, 24 in Bradford, 29 in Leeds, 37 in Hull, 22 in Newcastle-upon-Tyne, and 26 in Glasgow. In Paris the annual rate in the week ending September 4 was 25 per 1000. The rate in Berlin during the seven days ending the 2d inst. was 31 per 1000, and in Vienna 25 per 1000 during the week ending the 28th ult. In London the births of 1128 boys and 1028 girls, in all 2156 children, were registered last week. In the corresponding weeks of 10 years, 1859-68, the average number, corrected for increase of population, was 2072. The deaths registered in London during the week were 1391. It was the 35th week of the year, and the average number for that week, corrected for increase of population, was 1353. The present return is therefore 38 above the estimated amount.

Provincial.

ALBESHOT.—On Saturday the finding and sentence of a court-martial on Private Niel, of the 1st Battalion 12th Regiment, on a charge of wantonly, and without justifiable cause, loading his rifle in his barrack-room, were read before the battalion. The Court found the prisoner guilty, but, in consideration of his good character, sentenced him to undergo an imprisonment, with hard labour, for a period of 12 months. On Monday the finding and sentence of a court-martial on Private Charles Hill, of the 2d Battalion 2d Queen's, for loading his rifle, and threatening to "die for" a man in the same regiment, named John Keen, was read on parade in presence of the battalion. The prisoner was found guilty, and sentenced to 672 days' imprisonment with hard labour in the divisional military prison. On account of the prisoner's youth and former good character, the Commander-in-Chief, in confirming the proceedings, remitted half the term of imprisonment. On Friday a court-martial was held on Sergeant Stacey, for attempting to shoot Corporal Greenley. Both men belong to the 2d Battalion 5th Fusiliers, were quartered together, and were apparently good friends. The defence was, that the prisoner, who was subject to fits, and had that evening been allowed to fall out at drill on account of sickness, was not in his right mind. The result will not be known until the finding of the Court has been submitted to the Commander-in-Chief.

BADMINTON.—The annual dinner of the Badminton Farmers' Club was celebrated on Wednesday. About 300 ladies and gentlemen sat down. The Duke of Beaufort had been announced to preside, but being called away on important business, the Duchess undertook to supply his place, and when she entered the tent in which the dinner was served she was received with loud and ringing cheers. At the conclusion of the repast the Duchess proposed the usual loyal and patriotic toasts, and that of "Success to the Club," in admirable speeches. The enthusiasm of the farmers knew no bounds, and their delight reached its climax when Lady Blanche Somerset, her grace's daughter, rose and responded to the health of the younger branches of the Beaufort family.

BRISTOL.—The Social Science Congress will be held in this city from the 29th inst. to the 6th October. On the first day a special service will be held in the afternoon at the Cathedral, and a sermon preached by the Bishop of Gloucester and Bristol, and in the evening the inaugural address will be delivered by the President, Sir Stafford Northcote. Mr. G. W. Hastings will preside over the department of jurisprudence, the Rev. Charles Kingsley over that of education, Dr. Symonds over that of health, and the Right Hon. Stephen Cave over that of economy and trade. During the sitting there will be a conference of ladies interested in educational, sanitary, and other social subjects, under the superintendence of Miss Mary Carpenter. A working men's meeting is also organised, and evening soirées are to take place. There will also be excursions to Cheddar, Tintern Abbey, and the training ship at the mouth of the river. The following are some of the special questions to be discussed:—

Municipal Law Section.—1. What ought to be the legal and constitutional relations between England and the colonies? 2. What is the most expedient mode of introducing into England a system of public prosecution? 3. What limits ought to be placed by law to charitable endowments? **Reformatory Section.**—1. Can infanticide be diminished by

legislative enactment? 2. What have been the results of the Industrial and Reformatory Acts of 1866? **Educational Department.**—1. Is an unsectarian scheme of education inconsistent with religious teaching? 2. How may the State best promote the education of the destitute and neglected portion of the population? 3. In what way can the Endowed Schools Bill be worked so as to bring the educational endowments within the scope of the Health Department.—1. Can Government interference limit the spread of infectious diseases? 2. What legislative measures might be proposed to diminish the prevalence of infectious diseases? 3. Is it desirable that State should interfere in the management of the poor-law? 4. In what respects may the administration of the poor-law be improved? 3. How may the condition of the agricultural labourer be improved? **Jurisprudence.**—1. The Relations between England and her Colonies. 2. Charitable Endowments. 3. The Ownership and Occupation of Land.

—The Lords of the Admiralty have granted to the Bristol Training Ship Association the loan of H.M.S. Formidable, the late flagship at Sheerness, as a training ship for houseless and destitute boys, and Commander Poulden, R.N., has been appointed Captain Superintendent.

CARNARVON.—On Tuesday the yacht of Mr. Griffith, of Lansair Hall, while sailing through the Straits with a party of servants on board, was suddenly capsized in a squall near the Menai Bridge. Two sailors managed to swim ashore, but the butler and a lad were drowned. Half an hour previously the yacht of the Mayor of Carnarvon, with a party of friends on board, was driven ashore on the Anglesey coast, and had an extremely narrow escape.

CHESTER.—On Tuesday an intimation was received that the Prince and Princess of Wales will pay a visit to this city about the middle of October, and be present at the opening of the new town hall, which has just been completed at a great cost.

COWES.—The proposed yacht race from England to America has been abandoned. The owner of the Cambria accepted Commodore Bennett's challenge to race the Dauntless from Cowes to New York, starting on the 1st inst.; this date was afterwards extended to the 7th or 8th, but it was stated the Dauntless could not be got ready until the 16th, and as there was no doubt this would run the yachts into the equinoctial gales, it was ultimately arranged that the match should be abandoned. The American yacht, Meteor, with Mr. Lorrillard, her owner, and a party of friends on board, which has been expected to arrive at this port for some time, put into Bermuda on the 25th ult. Great anxiety had been felt for her safety, as she had been 25 days at sea on her way from New York to Cowes.

LIVERPOOL.—Dr. James Seaton Smith, of Rodney Street, who died after a short illness on Friday night, has left by will the sum of 10,000*l.* for the Liverpool Hospital for Cancer and Skin Diseases, of which he was the founder.

MANCHESTER.—On Sunday morning the Rev. Michael Gallagher, minister of the Protestant Reformed Church in this city, followed by his congregation, went to the church of St. John the Baptist at Hulme, where the ritual is said to be extremely high. They were refused admission, and eventually Mr. Gallagher took his departure, leaving a crowd behind. Soon afterwards, on the Rev. J. M. Bromhead, the curate, quitting the church, he was roughly handled by the mob, and was forced to take refuge in a cab, the windows of which were broken, and a chorister was severely injured. One of the rioters was apprehended by the police in the act of throwing stones, and a warrant was issued by the magistrates for the apprehension of Mr. Gallagher. On Tuesday the rev. gentleman was brought up at the borough police court, and remanded on bail until Wednesday, when he was sentenced to pay a fine of 5*l.*, or be imprisoned for two months. An application to bind him over to keep the peace was refused, on the ground that it could not be complied with under the statute. The man apprehended in the act of stone throwing was sentenced to pay a fine of 30*s.* and costs, or to be committed for a month.

MOBBUBY.—The parish church of this town, where Ritualist services have been performed, was entered a few nights ago and stripped of all the furniture which might be associated with "high" service. The altar cloth, candles, flowers, and decorations were carried away, and vases and other ornaments were smashed. The perpetrator of the outrage has not been discovered.

NEWPORT.—The examination of the boy Charles Gritt, who stands charged on suspicion with having poisoned Miss Emily Amelia Collier, was resumed by the borough magistrates on Thursday of last week. Mrs. Collier described the symptoms which were shown in her child's illness before she died, and more particularly the languor and contractions of the legs. Not long after this some of the fowls, which it was the prisoner's duty to feed, were attacked in a similar manner and died. This tended to throw suspicion on the prisoner, and Mrs. Collier threatened to send him back to the Caerleon Industrial School, when he confessed that he had given Miss Collier poisoned wheat. On Friday the inquest was resumed, when a report was read from Professor Taylor, stating that he had analysed the whole of the stomach, the greater part of the intestines, one half of the liver, one kidney, the spleen, one half of the heart, and one fourth of the lungs, all of which were carefully submitted to all the usual tests and processes for the detection of mineral and vegetable poisons, with the result that no trace of poison was found in any one of these organs. The poisons specially sought for were arsenic, antimony, mercury, copper and other metals, as well as phosphorus, the vegetable poisons—such as strychnine and morphia—Butler's vermin killer, &c., and the results were that no poison was present in the viscera of the deceased. The inquiry was again adjourned in order that another analysis might be made by Dr. Letheby. On Thursday

the inquest was resumed, when a letter was read from Dr. Tidy, of the London Hospital, stating that Dr. Letheby was abroad, and that Dr. Tidy would conduct the analysis in his absence. A letter was also read from Professor Taylor, expressing his belief that the child died, not from poison administered to her, but from latent disease of the brain and that if a post mortem examination had been made at the time of death, and the brain inspected, it was most probable that the cause of death would have been discovered. The inquest was again adjourned.

OXFORD.—The statement made some time since that the eldest son of the Viceroy of Egypt would commence a course of study at Christ Church, in October, is confirmed by the fact that Alderman Randall's residence, known as Grandpont House, and situated over a tributary of the Isis, has been taken for his Highness, and that preparations have already been commenced for his reception.

PENDLETON.—A short time since the body of a girl, with the ribs and limbs broken, was found in the canal, and a verdict of "Murdered by some persons unknown" was returned. It was identified as that of a young woman, who was some days afterwards found to be alive. Since then the inquiries of the police have resulted in the discovery of the real name and parentage of the deceased. The body has been exhumed, and the surgical testimony now inclines to the supposition that the injuries and broken bones might have been caused after death by boats passing over the corpse at the bottom of the canal.

ROCHDALE.—The Right Hon. J. Bright, M.P., has addressed the following letter to Mr. Leonard Kaberry, jun., of this town:—

"Dear Sir,—I thank you for the newspaper. There are knives in the world, and there are sharp points, and the one class preys on the other. The Tory party is always driven to these tricks; they cannot otherwise appeal to the multitude. If they explain that many Customs duties have been repealed, they will perhaps kindly tell the working men what duties they will put on again. Is it the duty on corn, or cattle, or do they wish a duty on imported cotton? If a foreigner will not buy cheaply from us, will it mend the matter if we refuse to buy cheaply from him or from some other foreigner? If wages have risen from 2 to 5 per cent. since 1840, is this consistent with a wrong policy as to our foreign trade? The pamphlet to which you refer bears the marks of having been written in Bedlam; it is a mere confusion of figures, and is wholly without logic or sense. The good harvest will tend to restore health to the general trade of the country, and when we have a sufficient supply of cotton Lancashire will recover from its present distressed condition. It is more cotton we want, and not more tax on imports. I suspect the people of Lancashire will not fail to understand this."

ROYSTON.—It is proposed to erect at this place a small hospital for the treatment of such of the sick poor as cannot receive proper attention at their own homes. Lord Dacre has given a site, and the Hon. Mrs. Vernon Harcourt heads the subscription list with a donation of 200l. Others of the local gentry have put their names down for sums of 100l.

SHEFFIELD.—The Cutlers' Feast for the present year took place on Thursday the 21st inst., Mr. Mark Firth, who has held the office of Master Cutler for three years in succession, in the chair. After the usual loyal toasts Mr. Roebuck proposed "The Army, Navy, and Volunteers." He said:—

"It was pitiful economy to pinch and make miserable the men who served them. His belief was that no money could be so well spent as in making them happy and comfortable and contented in their condition, and that those who would say that the brave men who sacrificed health and life to their service ought to be looked upon as mere labourers and hirelings, were not England's friends. What they ought to do was to link the army to them by the bonds of strong affection; and they could only do so by dealing with them justly, and dealing with them justly meant dealing with them generously. The next service was the navy. Why, the navy of England had saved England—had made England what she was. In the last great war with France, where would England have been had it not been for the great victory of Trafalgar? Therefore, he said that they owed the navy their deepest consideration, and they ought to deal with them as he had said they should do with the army. They ought to make them comfortable, make them enlightened, make them their friends, and not to treat them as they have been treated in times past—as the slaves of the country. But an English army and an English navy were expensive defences. To maintain an English army and an English navy would not cost more than it would to maintain a horde of barbarians under the command of a despot, and an English army turned out would cost as much as would bring a horde of barbarians from the north of Europe to invade the country. Recollect, then, that they could not compete in numbers with the large bodies of the nations around them; but they had in their own people a body of the path and strength of the country, which was in reality the chief defence of the nation—he meant the Volunteer force. They were a supplement to the army—but not the army; and while the Volunteer spirit remained it would be a check upon everybody who intended to invade England. Therefore he said that, as they ought to be generous to the army and to the navy of England, so they ought to be to the Volunteers. In them they had a body of men drawn from all ranks of society, the peasant shoulder to shoulder with the peer's son, and every man standing in his rank knew that he was fighting for the same thing. What was that thing? It was England, and the enthusiasm that led the gentlemen forward led the peasant forward; and it was to maintain the home and sanctuary of his father."

In returning thanks for the Navy, Mr. E. J. Reed, C.B., the chief constructor, made the following remarks on the iron-clad fleet in relation to the general expenditure of the Navy:—

"Since the first ironclad ship of war was laid down, the nation has expended upon the construction of ironclad ships 10 millions sterling. Ten millions since May, 1859, and no more! During the same period the country has expended upon its navy alone in other ways 106 millions, the total expenditure in the 10 years being 116 millions, of which 10 millions alone have found their way into the construction of armour plated ships, and I may say that it is impossible to study the political circumstances of Europe at this moment without feeling that that is a very important fact, because the 100 millions which may have been and no doubt have been, very properly expended, may be said at this moment to have passed away. The 10 millions only remain in the form of the powerful ironclad fleet of which the First Lord of the Admiralty has a fractional part in his hands at the present moment. I may say it does appear to me to be of supreme

importance that as large an amount as possible of that fleeting and passing expenditure that leaves no result after the termination of a short period shall be reduced, that the greatest possible economy shall be practised, in order that we may be able to expend liberally upon that navy which is our abiding strength, and upon which we must rely in the time of our difficulty and need. My own opinion is that very great economy indeed may be practised, and will be practised, from year to year so long that the limits of our naval expenditure goes upon objects other than the construction of iron-plated ships. The navy was never equal in strength to what it is now, when our Government has not neglected to apply to it the test of economy. They have shown great boldness in the changes they have made, and I am glad that these changes have occurred, because they will tend to produce results, the abolition of that vilest of imposters—red tape, resulting from the immediate action taken by the responsible officers of the Crown."

The Marquis of Hartington responded to the toast of Her Majesty's Ministers, Lord Wharncliffe responded to that of the House of Lords, Mr. H. F. Beaumont, Mr. Hildfield, and Mr. Mundella to that of the House of Commons. The Marquis of Hartington spoke as follows on the labours of the past session and on the prospects of the next:—

"We have just risen from a long and most laborious session. I suppose, though I speak in the presence of many members of Parliament, none can remember a session more lengthy or more laborious. And the task of the Government has not been lighter than that of the House in which it has sat. But we have had the advantages and the support, the cordial support, of a stronger majority than has supported any Government in 100 years—a majority, strong not only in its numbers, but in the energy and definite faith with which it came back from the new constituencies to Parliament, in the wisdom, in the true wisdom, of the principal measure which the Government had to bring forward. I do not wish to trespass upon your time in talking of the past. I fear that the future does not present lighter labours for us to look forward to. It never was our ambition to limit the work which we had undertaken to the destruction of any institution, however necessary we might think that that part of our task was. Our hope is, if possible, not only to destroy, but also to build up, to raise in our sister kingdom of Ireland a structure of confidence, a structure of good feeling between ourselves and our Irish fellow countrymen, and of good feeling between the various grades and sections and classes of those Irish fellow countrymen themselves. How far we are from the accomplishment of any such object, though I say it with the deepest regret, almost every account now coming from Ireland shows. I think I may say that the task which lies before us in the future is one not less arduous but far more arduous than that through which we have just passed. We have undertaken, as you know to attempt to deal in the next session of Parliament with what is called the Irish Land question. Might I here speak in the presence of an assembly of mixed political opinions, an assembly, the majority, perhaps, of whom do not agree with the political opinions which I hold—might I venture to express a hope, and an earnest hope, that that question, when it comes to be debated in Parliament next year, may be debated with as little as may be of party political feeling. And why should it not be so? This particular question has never yet been made the battle ground of party feeling; men are not tied and bound by watchwords and ancient professions of faith, which they find it often so difficult to maintain, and yet so much more difficult to get rid of. Men are comparatively unpledged upon this question. It is a subject, to state the fact, to state the fact, to state the fact, and I will say in honest indignation, to try to grapple with it. Therefore, I have some hope that they may be disposed in the next session to treat this, as it is called, as one of the greatest and most important questions affecting our future, and for once to abstain from making it a mere stalking horse, or battle horse of party. When we think of the enormous interests which are involved when we think that on the one side may be involved the future pacification of Ireland, and the immense gain not only to our national strength but to our national happiness, which would be involved in such a change as that, and when we think, on the other hand, of the enormous damage which might ensue to the interests of property of all kinds, not only in Ireland, but throughout this country, if this question is settled, or attempted to be settled, on principles which are unsound or ill conditioned, then I say we have another reason for hoping and for earnestly imploring men of all political parties if possible to put away for a time all party feeling, and to discuss this subject like statesmen and patriots. It is not only the property of Irish landlords which is at stake, it is not only the property of English landlords, but it is property of all kinds which will be at stake; for do not suppose for a moment that any discussion will arise next year, or that any measure can be passed, without principles and doctrines being enunciated equally hostile not only to the interests of landlords but of capitalists of every description. I invite, therefore, the cordial co-operation not only of parties but of all classes when the question is brought forward next session."

WINCHESTER.—The execution of William Dixon, a private in the 7th Fusiliers, for the murder of Corporal Bratt, took place on Monday within the walls of the county gaol. The culprit, since the commission of his crime, exhibited a most contrite state of mind, and left behind him an appeal to his fellow soldiers and others to shun the love of drink which led him to commit the crime. He ascended the scaffold with fortitude and resignation, and died almost instantaneously without a struggle. A black flag was hoisted on the prison gate as the drop fell, and remained there for an hour; but not more than 50 persons were outside the gaol during the execution. An inquest on the body was held in the afternoon, in accordance with the new law.

WORCESTER.—The 14th meeting of the three choirs of Worcester, Hereford, and Gloucester commenced in this city on Monday, and has continued during the week. Monday was devoted to rehearsals, and on the four succeeding days there were eight performances. During the mornings oratorios or sacred selections were given in the cathedral. The evening concerts, which consisted of miscellaneous selections, took place in the College Hall. The oratorios were Mendelssohn's "Elijah," a new oratorio composed expressly for these festivals, by Mr. Arthur L. Sullivan, entitled "The Prodigal Son," selections from Handel's "Judas Macabean," Rossini's "Messe Solennelle," Mendelssohn's "Hymn of Praise," and Handel's "The Messiah." The concert of Tuesday evening included Mr. J. F. Barnett's cantata "The Ancient Mariner," which was produced for the first time at the Birmingham Festival, and a prize glee by Earl Beauchamp. The principal

singers were Mdlle. Titiens, Madame Trosch, Mr. Sims Reeves, Mr. Stanley, Madame Sherrington, Madame Patey, Signor Vernon Rigby, and Mr. Lewis Thomas. Mr. led the band, which with the chorus numbered 350 performers. Mr. G. Townshend Smith was the organist, and Dr. Wesley at the piano was the conductor.

Ireland.

ELECTION OF A REPRESENTATIVE Peer, in room of the late Lord Castlema.

EXPECTED VISIT OF THE CHANCELLOR OF EXCHEQUER.—The Mayor of Cork has received communication that the Channel Fleet of the Admiralty on board, will visit the 27th inst., when the First Lord of the Admiralty will lay the foundation-stone of the naval docks at Haulbowline. The Council have resolved to invite the Lord and Lady Spencer to be present at the ceremony. An objection was made to this invitation, that it might be regarded as implying a Government's refusal to release the Peer, but the objection was overruled.

THE REORGANISATION OF THE CHURCH.—The preparation for the forthcoming Synod of the Church of Ireland, which has been invariably adopted, approving the association of the laity with the clergy in the government of the Church, and protesting against the admission to the Synod of the future Church of any members, except the Archbishops and Bishops. A clerical meeting held at Kildare on Monday, the Rev. J. M'Cormick, rector of Geashill, met Lord Digby, the patron of the living, had an intention of allocating towards the future of the parish the 5000l. or 6000l. which he received as compensation for the surrender of the endowment thus provided by the building charge, for which amount he has his life. Long conferences have also been held at Limerick, Dunmanway, and Skull County. The purpose of electing representatives to the diocesan synods. At the Limerick meeting the opinion was strongly expressed that the laity should be represented in the proportion of three to two of the clergy. Several influential speakers also appeared to carry the meeting with them. The Church required very great reform, that the book should be revised, and all passages which seemed to inculcate doctrines opposed to the Bible; that the Church Body should remove clergymen preaching heretical doctrines; that no one should be ordained to the ministry who did not by his life and conduct manifest a true regard for the office. On Monday the Archbishops of Dublin and Dublin were presented with the resolutions passed at the recent meeting of the laity. The Archbishop intimated their willingness to accede to the resolutions, that they should take the initiative in representing the laity by requesting the Bishop of each diocese to issue a circular to the officiating ministers, or congregation, for the purpose of suggesting the convening of a meeting of delegates to a diocesan meeting. Of these delegates one in every five will be chosen at the diocesan meeting as delegates to attend the Lay Conference held in Dublin on the 5th of October.

CARDINAL CULLEN ON THE CHURCH BILL.—Cardinal Cullen has ordered a three day's thanksgiving in the chapels of his diocese for the passing of the Church Bill. He praises Mr. Gladstone as an eloquent and provident statesman, and announced during the ceremonial a relic given by Pope Pius IX. to be exposed for the veneration of the faithful.

THE ORANGE ANNIVERSARIES.—At the opening of an Orange hall in Antrim on Monday Mr. Johnston, M.P., said it had been stated that 5000 Roman Catholics had sworn to put down the anniversaries of the Battle of the Boyne, but the Orangemen, if necessary, would turn their lodges into rifle clubs, and man the walls of Derry once more. He declared that those who were trying to sow disunion between the Protestants of Ireland and England were Jesuits, seeking to divide England by engaging the Protestants of the north in a fratricidal contest. The cry had been, to put all in a position of religious equality, and that would be contended; but was she now, Cardinal Cullen and his followers, were now wanted ascendancy in education. They now wanted ascendancy in education. They trusted that Great Britain would sternly resist their claim.

THE LAND QUESTION.—Sir John Gray has made an urgent appeal to Mr. Johnston, M.P., as the champion of the Orangemen, to join the movement of the land question, on the ground that the tenantry in the north are as much interested in reform of the land laws as those in the south.

THE ATTEMPTED MURDER OF CAPTAIN LAMBERT.—It is stated that the Special Commission for the trial of Barrett on the charge of attempting to murder Captain Lambert will be opened at Galway on the 27th inst.

THE FENIAN CONVICTS.—A meeting was held at Bray a few days since for the purpose of aiding the movement to procure the release of the Fenian convicts, or, as they are described at such gatherings, the "political prisoners." As Bray is only a half hour's drive by rail from Dublin, and is a favourite holiday resort, the meeting was attended by about 200 persons, at least half of whom were women. All sported "the green" more or less. A large number of brass bands kept up the entertainment. Resolutions of the usual character were adopted.

Markets.

COVENT GARDEN - Sept. 11.

Trade has been very slack here during the past week. Foreign importations are very heavy, consisting of the usual sorts of Apples and Pears at this season, with little or no demand for them.

FRUIT.

Cherries, per lb., 9d to 1s; Figs, per doz., 2s to 4s; Grapes, per lb., 2s to 6s; Lemons, per 100, 8s to 14s.

VEGETABLES.

Artichokes, green, p. doz., 2s to 4s; Beans, Kidney, p. 1/2 sieve, 3s to 4s; Beet, per doz., 2s to 3s; Cabbages, per doz., 1s to 2s; Carrots, per bunch, 4d to 8d; Cauliflowers, p. doz., 3s to 6s; Celery, p. band, 1s to 1s 6d; Cucumbers, each, 4d to 1s; Endive, per doz., 1s 6d to 2s; Garlic and shallots, per lb., 8d; Herbs, per bunch, 2d to 4d; Horse Radish, p. bund, 3s to 5s; Leeks, per bunch, 2d to 4d.

HAY. - Per Load of 36 Trusses.

SMITHFIELD, Thursday, Sept. 9. Trade very slow for meadow hays, first cut Clovers in demand.

CUMBERLAND MARKET, Thursday, Sept. 9.

Sup. Meadow Hay 100s to 110s; Inferior do. 70 90; New do. 70 90; Superior Clover 112s 135.

WHITECHAPEL, Thursday, Sept. 9.

Fine Meadow Hay 98s to 108s; Inferior do. 80 95; Prime New Hay 80 90; Inferior do. 60 75; Straw 33 38.

ENGLISH WOOL.

We have had a steady market, but without change in price. The very marked rise, however, in Colonial wools, which are now 10 to 15 per cent. above the prices current last May, is not unlikely, we think, sooner or later, to produce a favourable impression.

CURRENT PRICES OF ENGLISH WOOL. per lb. - s. d.

FLEECES - Southdown hoggets 1 1 to 1 2; Half-bred ditto 1 2 - 1 2 1/2; Kent Fleeces 1 3 - 1 4; Southdown ewes and wethers 1 0 1/2 - 1 1; Leicester ditto 1 2 - 1 3; SORTS - Clothing 0 10 - 1 6; Combing 1 0 - 1 8.

LEADENHALL POULTRY, &c.

THURSDAY, Sept. 9. Geese each 5 0 - 6 0; Pigeons each 0 6 - 0 8; Goslings 5 0 - 6 0; Tame Rabbits 1 0 - 1 8; Turkeys 2 0 - 2 6; Wild Rabbits 0 6 - 1 0; Turkey pullets 4 0 - 5 0; Partridges, young 1 0 - 1 6; Ducks 2 0 - 2 6; Pheasants 2 0 - 2 6; Ducklings 2 0 - 3 0; Hares 2 0 - 2 6; Surrey Fowls, couple 6 0 - 9 0; Grouse 2 0 - 3 0; Do. chickens 5 0 - 6 0; Quails 2 0 - 3 0; Barn-door Fowls 4 0 - 7 0; English Eggs, p. 100 8 0 - 10 0; Leverets each 2 0 - 2 6; Foreign do 8 0 - 9 0; Fresh Butter, 1s. 0d. to 1s. 3d. per lb.

METROPOLITAN MEAT MARKET. - Sept. 11.

Best Fresh Butter 16s. per dozen lb.; Second do. do. 14s.; Small Pork, 4s. 8d. to 5s. 4d.; Large Pork, 4s. 0d. to 4s. 8d. per 8 lb.

METROPOLITAN CATTLE MARKET.

MONDAY, Sept. 6. The supply of Beasts is about the same as on Monday last; the trade is very dull, and, except for choicest descriptions,

prices are lower. The number of sheep is about the last week. Prices of the average are not better than in the last week. The number of sheep is about the last week. Prices of the average are not better than in the last week.

Table with columns: a. d. s. d. and rows for Best Long wools, Do. Short, Ewes & 2 1/2 quality, Do. Shorn, Lambs, Calves, Pigs.

Beasts, 4742; Sheep and Lamba 10,000; Calves 10,000; Pigs, 60,000.

We have a large supply of Beasts and a very limited supply of sheep. The number of sheep is about the last week. Prices of the average are not better than in the last week.

Table with columns: a. d. s. d. and rows for Best Long wools, Do. Short, Ewes & 2 1/2 quality, Do. Shorn, Lambs, Calves, Pigs.

Beasts, 1125; Sheep and Lamba, 11,245; Calves, 500; Pigs, 30,000.

The weather since the 31st inst. was fine, with occasional showers. The recovery in prices of Wheat noted last Friday made some further progress during the early part of this week, but it appears to have been too rapid, as the extreme rates realised in some markets could not be sustained, and we have now, under the influence of large foreign arrivals from the South of Europe, to report a dull trade, at an advance in the value of new English Wheat of 1s. to 2s. per qr., which must be chiefly attributed to the improved condition of Barley which is difficult to sell, and fairly 1s. per qr. cheaper.

Table with columns: a. d. s. d. and rows for WHEAT, Essex, Kent, Suffolk, White, Red, Foreign, BARLEY, OATS, RYE MEAL, BRAW, PEARL, MAIZE, FLOUR.

ARRIVALS.

Table with columns: Wheat, Barley, Oats, Flour and rows for English, Irish, Foreign.

The arrivals of English grain this week have been small, of foreign moderate. There was a poor attendance at this morning's market. English Wheat brought Monday's prices; for foreign the demand was limited, and but little business transacted. Spring corn was unchanged in value.

LIVERPOOL, Sept. 7. - We had an average attendance at today's market, and for Wheat only a moderate request, at a decline of 1d. to 2d. per cwt. since Friday. Flour dull, and 6d. per sack easier, Indian Corn quiet, and about 6d. per qr. lower. Oats and Oatmeal quiet. Peas held firmly. Barley rather dearer.

Table with columns: Wheat, Barley, Oats and rows for July 31, Aug. 7, 14, 21, 28, Sept. 4.

SEED MARKET.

In consequence of the recent acceptable showers we have more doing in the seed trade, a fair demand having sprung up for those kinds of seeds required for immediate sowing. Trifolium incarnatum is scarce, and sells freely at an advance of 1s. to 2s. per cwt. White Mustard seed is in good request,

on somewhat easier terms. Essex Rape seed is without change. New English winter Tares are in exceedingly short supply, and must be quoted 9d. to 1s per bushel dearer on the week. Winter Barley, Oats, and Rye move off steadily at recent currencies. Bird seeds are firm. In Clovers and Trefoils there is for the moment no speculation, all descriptions are, however, held with much firmness. More rain would be very welcome.

JOHN SHAW & SONS, 16, Water Lane, E.C.

HOPS—BOROUGH MARKET, Sept 10

Messrs. Pattenien and Smith report that a few small parcels of the new growth have arrived at market, which move off slowly at about the following quotations—Weald Kents, 80s. to 100s.; Sussex, 70s. to 84s. Picking will not be general for at least another week. Growers already complain that the Hops come down very short of expectation. The quality is likely to be good this year.

WANTED, as HEAD GARDENER, a steady Young Man, single, to live on the place. Must be experienced in Fruit and Plants.—H. MEE, Prescott Nurseries, near Liverpool.

WANTED, a first-class FOREMAN, in a first-class Garden, where the Owner is his own Head Gardener. Must have a knowledge of all necessities to a first class garden. Terms, £1 per week, free furnished house, fuel and milk, at 1 use of vegetables.—For full particulars, send references, apply to H. MERVYN LARRY IRVINE, Castle Irvine, Irvinestown, County Fermanagh, Ireland.

WANTED, a NURSERY FOREMAN and PROPAGATOR (Indoors).—Apply by letter only, stating previous engagements, expected salary, and age, to S. GLENDINNING AND SONS, Chiswick, W.

WANTED, a steady industrious Man, as FOREMAN and PROPAGATOR in a Nursery. Must have skill and experience in both indoor and outdoor departments.—Address, stating age, qualifications, and salary required, Mr. THORNHILL, Nurseryman, Sale, Cheshire.

It is with great gratification that we announce our permission to refer upon any occasion to the various

HEATING APPARATUSES at the above, where our "ONE BOILER SYSTEM"

HAS FOR YEARS BEEN SUBJECTED TO THE MOST CRITICAL TESTS WITH EVERY SATISFACTORY RESULT.
IT IS MATCHLESS FOR EFFICIENCY, AND IS WORKING THE LARGEST APPARATUS ON RECORD.

These are no theoretical statements, but positive facts, and it is not too much to add, that no boiler in Great Britain

For List of Details, see "ILLUSTRATED BOOK of DESIGNS" (12th Edition), which can be obtained by addressing a note to
JOHN WEEKS AND COMPANY, HORTICULTURAL ENGINEERS, &c., KING'S ROAD, CHELSEA, S.W.

GREEN'S PATENT IMPROVED TUBULAR HOT-WATER BOILERS

OBLONG BOILER.

SQUARE BOILER.

THE ABOVE BOILERS ARE

THE MOST EFFECTIVE AND DURABLE EVER INVENTED.

They can be set to work at a nominal cost, inasmuch as no brickwork is required; as will be seen from the above drawing, they are placed upon a Cast-Iron Sole-plate, which answers the purpose of Foundation and Ashpit.
From the peculiar and substantial manner in which these Boilers are made, they are warranted to last for years without getting out of order; in fact, we guarantee them for years, but feel convinced that they will serve all the purposes for which they are intended for a much longer period.
They are specially adapted for Heating Greenhouses, Churches, Chapels, Schools, Public Buildings, Entrance Halls, Warehouses, Workshops, &c.

THE FOLLOWING ARE THE ADVANTAGES OF THESE BOILERS:—

- 1st, They require no setting in brickwork.
- 2nd, They are complete in themselves, having perfect means of regulation.
- 3rd, They take up little room, and can be put in places inaccessible to other Boilers.
- 4th, They are economisers of fuel, owing to the great amount of heating surface upon which the fire acts in a direct manner, and the consumption of smoke.
- 5th, The fire can be made to last from 12 to 24 hours without attention.
- 6th, Any number of Flows and Returns can be annexed to the Boilers by means of T-pipes.
- 7th, By means of mud doors, they can be readily cleaned out when required.
- 8th, The Chimney is made of cast-iron, which can either be taken through a roof or turned into a flue, to meet the convenience of the situation that it may be fixed in.

PRICE LISTS ON APPLICATION.

THE MAIL STEAMSHIP CAENATIC.—On Saturday the Peninsular and Oriental Company's steamer, Carnatic, while on her voyage from Suez to Bombay, ran on the Island of Shadwan, at the mouth of the Red Sea from the Gulf of Suez. It was seen that she must have run on the island at full speed...

safety, but lost everything they possessed. Another of the company's steamers the Sunda, rescued them from the island on the following day, or they might have all perished. The Carnatic had on board the mails for India. The following are the names of the passengers and officers lost:—

LOSS OF THREE YACHTS.—The schooner yacht Creusa, of 180 tons, belonging to Mr. W. J. R. Bout, was driven from her anchorage in Cherbourg harbour during the hurricane of Saturday night, and drifted on the rocks under Fort Hamade where she continued bumping until daybreak the men-of-war in the harbour taking no notice of the blue lights which she burnt as signals of distress...

ANOTHER FIRE IN THE STRAND.—Early on Saturday morning a fire broke out in a house in the Strand, opposite the Adelphi Theatre, occupied by Messrs. Innes & Co., wine merchants, and Messrs. Grey & Eskell, dentists. In a few minutes nine or ten steam and manual engines and 47 firemen were on the spot, but the fire was not extinguished until the premises had been gutted...

THE RELEASE OF THE FENIAN PRISONERS.—A preliminary demonstration of "Republicans of all nations" was held on Monday night on Clerkenwell Green, preparatory to the holding of a "grand demonstration of Republicans" in Trafalgar Square on Monday next. The object of the movement is described as being "to promote the release of the political prisoners."

ATTEMPTED MURDER AND SUICIDE.—On Sunday morning a young man named James Gobey, 21 years of age, living in Schoolhouse Lane, Stepney, attempted to murder a girl named Mary Anne Chambers, 17 years of age. They had been living together until a few weeks ago, and had one child about seven months old; but he treated the girl with such brutality, that some weeks ago she returned to her mother. On Sunday the man went to the mother's, and, after some altercation, seized the child and took out his knife to murder it. Two women prevented him from accomplishing his purpose, and at that moment the girl herself came in, upon which he stabbed her in two places, and then rushed into a back room and cut his own throat...

MURDER AND SUICIDE AT POPLAR.—On Tuesday morning the neighbours of a mechanic named Jonathan Judge, residing at St. Leonard's Road, near the East India Docks, finding that the shutters were closed at nearly 10 o'clock, broke into the house, and found the whole family very dead in the bedroom, suffocated by the fumes of gas. The wife and her two children, with their bodies on the floor, and the man across the bed. A tin tray was on the floor with a tin pan upon it, containing the expiring embers of the charcoal. The windows and every crevice were stopped by paper pasted over them, and in the room were two chairs of paper furniture. The furniture to read yes, and one of them was staked with the cushions of both, fastened, and was shown that she was a party to the crime. A fact which, was used to frighten her children being distressed. As the report on Wednesday it was stated that the husband, who had served in the 24th Foot in India and was considered a sober steady man, had been out of work for three weeks, and that the whole family had been in great poverty. The jury, after deliberating for an hour, returned a verdict of Willful Murder against Jonathan and Clara Judge for destroying their two children, and of Suicide while in a state of unusual mind in regard to themselves.

THE PUBLIC HEALTH.—The Registrar-General's Weekly Return states that in the week that ended on Saturday, Sept. 11, 1876 births and 3561 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 27 per 1000 persons living, being 20 per 1000 in London, 24 in Edinburgh, 22 in Dublin, 21 in Bristol, 25 in Birmingham, 31 in Liverpool, 20 in Manchester, 24 in Salford, 27 in Sheffield, 26 in Bradford, 22 in Leeds, 33 in Hull, 24 in Newcastle-upon-Tyne, and 27 in Glasgow. In Paris the annual rate in the week ending September 11 was 21 per 1000. The rate in Vienna during the week ending the 14th inst. was 25 per 1000. In London the births of 1069 boys and 1058 girls, in all 2127 children, were registered in the week. In the corresponding weeks of 10 years, 1859-68, the average number, corrected for increase of population, was 2055. The deaths registered in London during the week were 1601. It was the 36th week of the year, and the average number for that week, corrected for increase of population, was 1332. The present return is therefore 269 above the estimated amount.

Provincial.

ALDERSHOT.—On Saturday morning Inspector Smith, of the metropolitan police, arrested three men in the act of robbing one of the Government forage barns at Aldershot. For some time past suspicions had been excited, and a watch set over several of the stores. The men arrested on Saturday were Stephen Chandler, agent for Mr. Harry Loney, of Norwich, contractor for the supply of oats and hay to the troops at Aldershot; James Spring, carrier in the employ of Chandler; and Corporal Henry Jones of the Cammussariat Staff Corps. It appeared that Sergeant Luscombe, of the metropolitan police, who was watching the East Cavalry Barracks forage barn on Saturday morning, saw Chandler and Spring drive up to the barn, at the door of which they were met by Corporal Jones, the non-commissioned officer in charge, who unlocked the door, and helped the others out with the sacks of oats, which were put into the cart. The door was then locked again, and Jones was in the act of going away when the arrest was made. Subsequently a search-warrant was obtained, and Chandler's house at Ash examined, when 19 sacks of oats, of the presumed value of 157, were discovered. Later in the day the prisoners were taken before the chairman of the petty sessions, and remanded until Thursday, when they were all committed for trial at the quarter sessions, but admitted to bail.

BIRMINGHAM.—On the new burgess roll for this borough there are the names of upwards of 2000 women, and for Edgbaston, 475.

BOLTON.—On Saturday night the Hon. Algernon Egerton, M.P. for South-east Lancashire, laid the foundation stone of a new school at Hawkshaw, and spoke at some length on the public questions of the day, making special reference to the Irish Church, the land question in Ireland, and the French treaty. In speaking of the latter he said that he had always been a free trader himself, and differed in that respect from a great many good Conservatives, but he was bred up in free trade notions in the school of Sir Robert Peel. This question of the French treaty, however, was a different thing, and though Mr. Bright had told them that those who had notions upon free trade contrary to his own must be knaves or fools, yet he (Mr. Egerton) ventured to dissent from him. There were no doubt many flagrant anomalies and injustices contained in the French treaty. It pressed to a certain extent upon the silk trade of this country, and he believed to some extent also upon the importation and exportation of bleached cloth, both in this country and out of it; and in other cases there were minor regulations which ought to be altered.

BRISTOL.—The Formidable, 78 guns, which has been granted by the Government as a training ship for destitute boys of this city, arrived on Saturday from Sheerness, and anchored off Portishead. She left Sheerness on the previous Monday, and was towed round by a Liverpool steam tug-boat. She encountered a rough passage, and did not reach Portishead till Saturday afternoon.

COVENTRY.—At the annual meeting of the Warwickshire Agricultural Society on Tuesday, Mr. Newdegate, M.P., made the following remarks on the Irish land question.—

"I come from the atmosphere of the House of Commons, and all that I can say of it is that at the close of last session the members of the House appeared to me to have suffered from it very severely. There was a general wash-out. The limits of these islands would not confine the members. They went by flocks to the German baths as though they needed some system of purification. Mr. Gladstone himself was not

offer are soft and in bad condition. Essex dwarf Rapeseed is without alteration. We have had a brisk demand for winter Tares, these are in very short supply, and must be quoted 1s. to 1s. 6d. per bushel dearer. We have some new foreign Canary seed just to hand, the quality of which is very good. Hemp seed continues scarce and dear. As yet there is little if any inquiry for Trefoils and Clovers, no doubt a speculative demand will soon spring up. In winter Barley, Oats, and Rye we have no change to report.

JOHN SHAW & SONS, 16, Water Lane, E. C.

PAUL begs to announce that he has made arrangements by which he will be enabled in future to furnish Gentlemen with the NAMES, ADDRESSES, &c., of GARDENERS, and GARDENERS and BAILIFFS, of various qualifications, who are open to Engagements. The fullest particulars as to services required and wages given should be forwarded with application.—PAUL'S Nurseries, Waltham Cross, London, N.

To Gardeners and Bailiffs (Head, Foremen, or Under).

JAMES CARTER and CO. having many applications for the above request that those WANTING SITUATIONS will send NAME, ADDRESS, and COPIES of TESTIMONIALS for ENTRY in their FREE REGISTER. Only those who can send unquestionable references need apply. Any Lady or Gentleman requiring GARDENERS or BAILIFFS may rely upon J. CARTER & Co. adopting the most stringent regulations in reference to testimonials as to ability, honesty, &c. JAMES CARTER and CO., 237 & 238, High Holborn, London, W.C.

To NOBLEMEN, GENTLEMEN, and NURSERYMEN.

A Nurseryman and Market Gardener, who is relinquishing Business, will be at liberty to engage on October 11. Having had several years' practical experience in the above capacity, any one requiring a person of strict integrity and honesty, combined with a good education, may rely on the Advertiser as a suitable person. Testimonials of the highest character.—Communications addressed to A. B., Mr. Glyde's, St. Matthew's, Ipswich, will be promptly attended to.

TRAVELLER, COLLECTOR, &c.—Mr. CHARLES J. CLARKE, late of the Windmill Hill Nursery, Gravesend, begs to inform his numerous friends and others that he is entirely disconnected with the late Firm of C. J. Clarke & Brother. Such being the case, he is desirous of a situation as TRAVELLER, COLLECTOR, CORRESPONDENT, SALESMAN, &c., in all of which, and other capacities, he has had considerable experience. He would be happy to make himself useful, and to employ his extensive influence and connection in favour of any Firm employing him. Character and references the very best.—All letters on any matter intended for him, please address, Mr. CHAS. J. CLARKE, 2, Zion Place, Gravesend.

GARDENER (HEAD).—Has had thorough experience; good character.—J. B., Post Office, Woolstone, near Southampton, Hants.

CURES of ASTHMA, COUGHS, and BRONCHITIS. THE CHEST by Dr. LOCK'S WALKER'S PAIN EXPELLER, F.R.S.N.A., and F.S.A.S., Author of "Shakespeare's Times, &c." Stokesley, York, Feb. 8, 1890.—I have used them to give immediate relief to myself, my wife, and others, who were suffering from the difficulty of breathing, coughs, and affections of the chest. I witnessed their good effects on friends who were unable to prevent doubt, all testimonials to this medicine have been forwarded to me. Price 1s. 1/4d. per Box. Sold by all Druggists. Address of the sender in full.

THE MARVEL of SCIENCE.—Cure of NERVOUS AFFECTIONS, SELF-ADJUSTING CURATIVE and MAGNETIC. Sufferers from nervous debility, indigestion, weakness, &c., now cure themselves by the only "Guaranteed Remedy" protected and sanctioned by the Faculty. Free for One Stamp, by H. JAMES, Esq., Medical Director, the London Hospitals, Percy House, Bedford Square, London, N.B.—Medicine and Fees superseded. A Testimonial in details. Established 1840.

GOUT and RHEUMATISM.—The excruciating pain of Gout or Rheumatism is quickly relieved in a few days by that celebrated medicine, BLAIR'S RHEUMATIC PILLS. They require no restraint of diet or confinement during the cure. They are certain to prevent the disease attacking any of your joints. Sold by all medicine vendors, at 1s. 1/4d. and 2s. 9d. per box, obtained through any chemist.

FEW PEOPLE LIVE LONG ENOUGH. OLD AGE. They succumb to one or other of the diseases beset, but which are not the inevitable result of old age. Thousands and tens of thousands are cut off in the first instance by neglect. The stomach is the organ in, and is at the same time, from numerous causes, frequently disordered, and thus begins more than half the troubles to which humanity is subjected; it is important to pay constant attention to the state of the bowels, and there is no medicine so valuable as PARR'S LIFE PILLS, for preserving regularity, and assuring long life.

The Gardeners' Chronicle Newspaper.

STEAM CULTIVATION.—IMPORTANT TO AGRICULTURISTS.

AMIES, BARFORD, & CO., PETERBOROUGH,

BEG TO ANNOUNCE THAT THEY HAVE MADE ARRANGEMENTS FOR A

PUBLIC EXHIBITION OF STEAM CULTIVATING APPARATUS,

On land near to the City of Peterborough, on WEDNESDAY and THURSDAY, September 29 and 30.

The Direct Double Engine System of Messrs. J. Fowler & Co. will be represented, and all the most recent
improvements introduced.

In the Round-about System will be exhibited, for the first time in public, Campaign's New Patent Self-acting
and Self-moving Anchors, by which anchor-men are entirely dispensed with, and the working staff reduced to three
men and two boys—thus effecting an immense saving upon the old plan.

At the same time and place will be worked Pirie's Patent Double Furrow Plough, and A. B. & Co.'s New Patent
Combined Hay, Corn, and Straw Elevator.

Further particulars on application.

POST ADDRESS—QUEEN STREET IRONWORKS, PETERBOROUGH.

WINTER and SPRING on the SHORES of the MEDITERRANEAN, or, the Rivers, Meadows, Corn, Sicily, Algeria, Spain, and Biarritz, as Water Colours.

By J. HENRY BENNETT, M.D. JOHN CHURCHILL AND SONS, New Burlington Street.

the civil lists, the palaces, all the armies, and not a single people; who reigned, governed, and organised at the present moment." He called upon them to "look at the future; to think of the day certain, inevitable, near at hand perhaps, when the whole of Europe would be cultivated like that noble Swiss country which welcomed them at that moment. That little people had its grandeur, it had a country which was called a Republic, it had a mountain which was called the Virgin. Like Switzerland, let them have a Republic for citadel, and may their immaculate and inviolable liberty be, like the Jung-frau, a virgin peak in full light. He saluted the future revolution!" This speech was received with a storm of enthusiasm.

PRUSSIA.—The Prussian Diet, in accordance with a Royal ordinance, is convoked for October 6, when it will be opened by the King in person. The King of Prussia was to pay a visit to Mecklenburg yesterday, to be present at the christening of the infant daughter of the Grand Duke. The Crown Prince and Princess, with their eldest children, will leave Berlin for Italy on October 5. The Crown Prince will subsequently proceed, by way of Brno and Constantinople, to Egypt, to be present at the opening of the Suez Canal, the Crown Princess, with her children, proceeding in the meanwhile to Switzerland. The 15th anniversary of the death of Blucher was celebrated on the 12th inst. with some solemnity at Kriebowitz, where his body is buried. The Humboldt Centenary Festival began at Berlin on the 14th, with the inauguration of the new park, which is to be called the "Humboldt-Hain." During the ceremony a telegram was received from the Crown Prince and Princess stating that Berlin honoured itself in celebrating the memory of its great citizen, the hero of science, the friend and faithful servant of his Sovereign, the man whose heart beat warmly for the people, and who merited, as few had done, the gratitude of his own age and that of posterity. The upper classes of Prussian society, however, testified their resentment at the advanced opinions of Humboldt, and the revelations of his friend Varnhagen, by absenting themselves altogether from the ceremony.

FRANKFORT.—The removal of the young men of this city who have been banished on account of their having adopted Swiss nationality commenced on Friday. Among others a son of one of the citizens, 16 years of age, was taken by the police to Offenbach.

SAXONY.—The Court Theatre at Dresden was totally destroyed by fire on Tuesday. The firemen were successful in preventing the fire spreading to the adjacent Museum, containing the celebrated gallery of pictures.

BAVARIA.—The Government recently requested the theologians of the University of Munich to inquire and report whether the relations between the Church and the State would be seriously affected by the Pope's Syllabus being adopted pure and simple by the forthcoming Ecumenical Council at Rome. The professors have rather evaded the direct question; but have expressed their opinion that some of the articles of the Syllabus are scarcely reconcilable with themselves, and that the Jesuit Father Schrader, who is its official exponent, has perhaps not thoroughly comprehended its real purport. At the same time a joint address has been issued by 19 German bishops who have recently met at Fulda, in which they say:—

"Never can, and never will, an Ecumenical Council establish a dogma not contained in Scripture or in Apostolical traditions, or proclaim doctrines in contradiction to the principles of justice, to the right of the State and its authorities, to culture, to the true interests of science, or to the legitimate freedom and well-being of nations."

AUSTRIA.—The State revenue during the first half-year exceeds the estimates by several millions of florins. This surplus is obtained both from the direct and indirect taxes. Field-Marshal the Archduke Albrecht has addressed a letter to the Emperor, proposing to form a fund for granting loans to officers of the army in poor circumstances, and presenting 110,000 florins as a first donation for this purpose. The Austrian Government has returned to the Italian Government all the Venetian manuscripts and books which belonged to the archives of the Venetian public library, and which were carried off by the Austrians when they left that city. It is said that among them there are some very curious volumes relating to the Inquisition.

GALICIA.—In the sitting of the Galician Diet on Tuesday the proposal of Herr Smolka, not to send members to the Reichsrath, was discussed on the first reading, and the motion to refer it to a committee was rejected. The proposal, therefore, has fallen to the ground.

GREECE.—King George and the Royal family returned to Athens on Sunday, after a stay of five months at Corfu.

ITALY.—The report of the official committee appointed to inquire into the causes of the grist-tax disturbances in Central Italy last January was published on Monday. The committee recommends an amnesty for all persons implicated through ignorance, the redistribution of the land-tax in the provinces of Reggio and Modena, the exemption of peasants from active service in the National Guard, the construction of a railway between Parma and the seaport of Spezzia, and the redistribution of the movable property-tax among the agricultural population in general. With reference to the grist-tax, the committee advises that ample facilities should be afforded to the Administration to make use of a mechanical teller, or to introduce constant personal supervision. Annexed to the committee's report is one by Signor Ferraris, who considers the railway referred to unnecessary. In other respects he says the Government is well disposed to support the recommendation of the committee. A report of Count Cambray-Digny is also appended, stating that the grist-tax is now being levied everywhere. He says:—

"Although the revenue budget of the current year be unsatisfactory, there is no ground for uneasiness for the future. The Government has only to pursue the course marked out

for them in order to obtain from the grist-tax the sum necessary for securing an equilibrium of the budget, which it would be impossible otherwise to obtain. The amount of the tax collected to the end of August was 9,959,944 lire, and the amount due 19,732,764."

In addition to the loan of 60,000,000 of lire, concluded with certain foreign banking establishments, Count Cambray-Digny has negotiated a loan of 7,000,000 lire with the Bank of Naples. General the Maréchal Cadogan was present at the military manoeuvres at Borgo San Lorenzo on Sunday and Monday. Signor Luigi Poletti, the most celebrated Italian architect, has just died at Milan, aged 77. His last work was the reconstruction of the church of St. Paul at Rome, which the Pope desired to have terminated by the period fixed for the opening of the Council.

TURKEY.—A telegram from Constantinople states that the difficulty between the Porte and the Viceroy of Egypt remains unsettled. It is stated that the French, English, Austrian, and Italian Governments are in favour of the withdrawal of the demands as to the budget and foreign loans, but the Porte remains firm. Under these circumstances, the Viceroy's visit to Constantinople is postponed for the present. The Porte has received an intimation that the Crown Prince of Prussia purposes visiting the Sultan in the course of October next. The Sals-Bazaar Palace will be prepared for his reception. An Arab tribe has revolted between Fao and Bagdad, and has cut the telegraph lines. Indian messages are telegraphed to Bagdad, and thence forwarded by estafette to Fao.

EGYPT.—The Viceroy has countermanded the preparations for his departure for Constantinople. The Italian squadron, under the command of the Duke D'Aosta, arrived at Alexandria on Monday. Prince Hassan left on the 14th for England, to pursue his studies at the University of Oxford.

CAPE OF GOOD HOPE.—Bishop Twells has left for Natal, after placing his resignation in the hands of the Bishop of Cape Town as metropolitan. The condition of some parts of the colony is deplorable, from the want of rain. News from the frontier states that the gold diggings were proving very successful. A large number of seekers were on the way to the diamond beds near the Vaal river. The Portuguese had ceded the southern part of Delagoa Bay to the Transvaal Republic.

INDIA.—The hulls of the Thunderer and Morayshire, which were lost in the cyclone that swept over the Bay of Bengal in 1867, have been discovered by some fishermen among the Sunderbunds. The Thunderer had 165,000*l.* in her bullion hold, and hopes are entertained that it may be recovered. Experiments have been successfully tried at Darjeeling and Calcutta, by which it has been proved that a brilliant gas can be got from sewage. It is now proposed to apply the process to some of the larger cities. The proceedings thus far have given so much satisfaction that the Indian Government has granted a sum of 4000 rupees for further experiments. The inventor of the process is sanguine that "the sewage of towns will turn out to be a great benefit, instead of remaining a singular nuisance."

CHINA.—The Austrian Embassy to China arrived at Peking on the 14th August. The iron ship Hamilla Mitchell, from Glasgow to Shanghai, has been totally lost on the Leuconna Rock, within 130 miles of her destination, with a cargo valued at 130,000*l.*, and specie to the amount of 50,000*l.* The crew saved themselves in the ship's boats, and reached the port in safety.

JAPAN.—The Duke of Edinburgh arrived at Jeddo on the 29th ult. Some of the principal Japanese priests are memorialising the Government to oppose Christianity.

UNITED STATES.—The members of the Cabinet have all returned to Washington. President Grant was expected at the White House on Wednesday. The Washington correspondent of the *New York Herald* states that the Administration will repudiate the action taken by General Sickles at Madrid with regard to Cuba. According to the *World*, Mr. Fish, the Secretary of State, insists on the recall of General Sickles. The remainder of the New York Press and numerous other journals, on the other hand, state their belief that the Administration approve the course taken by General Sickles and will soon recognise the belligerency of the insurgents. Mr. Walker was installed on Tuesday as Governor of Virginia, with the usual ceremonies. The New York Democratic Convention has adopted resolutions favouring the fullest protection of the rights of American citizens abroad, especially in Great Britain and Cuba, and charging President Grant's Administration with prolonging disunion for partisan purposes. The Massachusetts Republican Convention has renominated all the present State officers, and, on the motion of Senator Sumner, has adopted resolutions affirming that the United States suffered incalculable injury during the rebellion by the aid and encouragement given by Great Britain to the rebels, but that the question of the reparation to be offered or accepted was a matter for further consideration; the settlement of the American claims by the transfer of Canada to the United States being impracticable, inasmuch as Canada was already gradually approaching union with the United States.

CANADA.—Prince Arthur was cordially welcomed at Montreal on Saturday, at Toronto on Monday, and at London on Tuesday, on which day he visited the Industrial Exhibition at that place. The American Press continue to publish articles urging his Royal Highness to pay a visit to the United States.

BRAZILS AND PARAGUAY.—Accounts from Asuncion to the 15th ult. state that the allies had gained an important victory. Comte d'Eu, with the allied army, had taken Piribebin and Asourra. Lopez and Mrs. Lynch had fled. The Brazilian General, Mena Baretta, was killed in the battle. The Provisional

Paraguayan Government was formally installed on the 15th, and the war was at an end. There was much excitement in Buenos Ayres and Montevideo on account of the news.

City Intelligence.

MONEY MARKET, FRIDAY.—**BRITISH.**—Consols are 92½ to 93½ for Delivery, and 92½ to 93½ Account, New and Reduced Three per Cent. 2s. to 6s. pm.; June, 6s. to 10s. pm.; India 5 per Cent., 114½ to 114½—**FOREIGN.**—Argentine 80½; Brazilian, 83 to 83½; Egyptian (1864) 79½ to 79½; Ditto Nine per Cent., 79½ to 79½; Ditto (1868), 74½ to 75½; Viceroy's Seven per Cent., 52 to 52½; Ditto (Tobacco Loan), 79½ to 79½; Italian, 78½ to 79½; Portuguese, 33½ to 34½; Spanish, 27½ to 27½; Moscov, 83½ to 83½; United States 5-20 Bonds, 81½ to 82½; Illinois, 92 to 93.

Metropolis and its Vicinity.

FUNERAL OF LADY PALMERSTON.—On Friday afternoon the body of Viscountess Palmerston was buried in the grave of her illustrious husband in the north transept of Westminster Abbey. The procession consisted of a hearse and four boxes, and three mourning coaches containing the members of her ladyship's family. The first contained her son, the Right Hon. W. Cowper, her grandsons, Earl Cowper, the Hon. Henry Cowper, M.P., and the Hon. W. Cowper. In the second were her son-in-law, the Earl of Shaftesbury, with his sons, Lord Ashley, the Earl Evelyn Ashley, and the Hon. Cecil Ashley. In the third were her grandsons, Lord Jocelyn, Lord Sudley, Lord G. Jocelyn, Dr. Prothero Smith, and Dr. Drape. They were followed by a large number of private carriages among which were those of the Austrian, Russian, and Turkish Ambassadors, the Duchess of Inverness, the Duchess of Wellington, the Countess of Sutherland, Baron Rothschild, the Dowager Duchess of Somerset, Mrs. Lane Fox, Sir George Shee, Hon. F. B. St. John, Henry Bulwer, Sir George Bowyer, Mrs. Baker, &c. The service was performed by Lord John Thynne, sub-dean, assisted by Archdeacon Jennings and a Rev. Canon Nepean. The attendance of strangers at the Abbey was very limited; about 100 tickets for the north transept had been issued to the domestic staff of the family and their friends, while the few of the general public who were present as spectators were admitted to the nave. Before the arrival of the procession a startling incident occurred. A gentleman, who had entered the transept, and on passing the monument the head of the grave, the gentleman not perceiving the gloomy light, fell heavily into the open grave. He was at once extricated, with no further injury than a severe shake and a cut in the head.

REPLY OF THE POPE TO DR. CUMMING.—Archbishop Manning has received the following letter from the Pope, in reply to a letter recently addressed to the Holy See by the Rev. Dr. Cumming, asking for an invitation given to Protestants to attend the forthcoming Ecumenical Council was to be considered as allowing him to address the Council on doctrinal questions.—

"POPE P IUS IX. TO OUR VENERABLE BROTHER H. S. B. ALBISHOP OF WESTMINSTER.
"Venerable Brother,—Health and the Apostolic blessing. We have seen from the newspapers that Dr. Cumming, of Scotland, has inquired of you whether leave will be given to the approaching Council to those who dissent from the Catholic Church to put forward the arguments which they think can be advanced in support of their own opinions; that, on your replying that this is a matter to be decided by the Holy See, he has written to us upon the subject, and if the inquirer knows what is the belief of Catholics with respect to the teaching authority which has been given to our Divine Saviour to His Church, and therefore with respect to its infallibility in deciding questions which belong to dogma or to morals, he must know that the Church cannot permit errors which it has carefully considered, judged, and condemned to be again brought under discussion. This is what has already been made known by our letters when we said 'I cannot be deceived or deceived.'"
"Heath, in order that He might apply to all generations the fruits of His redemption, He has given to His Church—Peter His only Church—that is, the only holy Catholic and Apostolic Church—and gave to him all power on earth, so that for whatsoever he shall bind on earth, it shall be bound in heaven, delivering the same faith to all peoples, and tribes, and nations, we thereby signified that the primacy, both of jurisdiction, which was conferred upon Peter and his successors by the Founder of the Church, is placed upon a hazard of disputation. This, indeed, is the king upon which the whole question between Catholics and all who dissent from them turns, and from this dissent, as from a fountain, all the errors of non-Catholics flow. For, if the Church, which teaches mankind especially the things of faith and the rule of morals, and which also directs and governs them in whatever relates to eternal salvation, and which has varied in its teaching, if there be a change and instability never cease. If therefore an inquirer will consider either the primacy which is held by the Church as to the infallibility of its judgment, or what we have written respecting the primacy and teaching authority of Peter, he will at once perceive that no room can be left at the Council for the defence of errors which have already been condemned, and that we can, I do not have to say, Catholics to a discussion, but have only urged them to themselves of the opportunity afforded by the Council, which the Catholic Church, to which they themselves belonged, gives a new proof of its close unity and moral vitality, and to satisfy the wishes of their souls, by withdrawing them from a state in which they cannot be sure of their salvation. If, by the inspiration of Divine grace, they shall perceive their own danger, and shall seek God with their whole heart, they will easily cast away all preconceived and adverse opinions, and, laying aside all desire of personal glory, they will return to the Father from whom they have long

* The Letters Apostolic of September 13, 1868, addressed to all Protestants and other non-Catholics.

We, on our part, will joyfully run to... and embracing them with a father's charity, we... and the Church will rejoice with us, that our... were dead have come to life again, and that they... have been found. This, indeed, do we earnestly... have been found. This, indeed, do we earnestly... have been found. This, indeed, do we earnestly...

THE EUROPEAN ASSURANCE SOCIETY.—The... assurance collapse, that of the European... has been apprehended for some weeks, and is... to prove more disastrous than that of the... has been announced. Two petitions were... on Wednesday before Vice-Chancellor James for... up the society, and it was ordered that the... stand over until Saturday week, all receipts... of premiums being meanwhile kept separate... The outstanding policies of the society are stated... for an amount of between nine and ten millions... to which they are under contract... payment of annuities amounting, according to... statement, to 16,000l. per annum, but which... now to be considerably beyond that sum. The... revenue was more than 350,000l. The... was started in 1853, and the subscribed... about 900,000l., of which less than a... has been paid up. The company has taken... business of 33 other companies, and was... empowered by special Act of Parlia... with "the Royal Naval, Military, and East India... department as under the especial patronage of... Most Gracious Majesty the Queen," and also as... specially authorised by Parliament to guarantee... of Government officials."

ALBERT ASSURANCE COMPANY.—On Friday, on... the petitions to wind up this company, Vice-... Chancellor James, on the resignation of Mr. A. R. Kirby... Mr. Price sole provisional official liquidator... at Marlborough Street Police-court, Mr... on the application of Mr. Straight on behalf of... and other policy-holders, granted summonses... to-day, against the directors and managing... for conspiring together, between the years 1864... to defraud certain persons of various sums of... On Tuesday a meeting of the shareholders... on adjournment from a meeting held on the... which was intended to bring the company... the operation of the Joint-stock Companies'... This, however, has been rendered impracticable... the proceedings taken in Chancery, and the meeting... the appointment of a committee of five to... with the committee of policy-holders. Mr. Price... official liquidator, who attended the meeting, said... to a question, that he believed there had... an improper abstraction from the funds of the... and that every penny had been honourably... and expended. He thought the accounts would... the expenditure of every penny that had come... the hands of the directors.

GREENWICH HOSPITAL.—The final arrangements... the last batch of in-pensioners to leave Greenwich... under the new system of augmented pensions, a... minimum being 36l. 10s. per annum, were con... on Monday; and on Tuesday all the inmates, with... the exception of 10 or 20 of the aged and helpless... were removed from their wards in chairs, and... in omnibuses to be conveyed to the nearest... for places they had chosen as their future... in different parts of Great Britain and Ireland. Some... who thus accepted their discharge on the... allowance, left on the understanding that the... will be open to them in the event of failing... but seeing that they will in future be so widely... in different parts of the country, the re... are likely to be very few. Many of them are of... old age, and the inhabitants of a house in... where one of them had chosen his place of... refused to receive him, and he had to be taken... to the Hospital, where he was readmitted, as was... another extremely aged man, who had given the... of a street not in existence, where his friends, he... It is understood that those now under... treatment will be removed to other naval... establishments.

GREENWICH DOCKYARD.—On Friday this dockyard... after being open for about 300 years. Every... had been taken by the Government to render the... productive of as little local injury as possible.

HOUSLOW POWDER MILLS.—No less than... were suspended at the powder mills of Messrs... on Friday for having in their posses... and lucifer matches, each being searched as... on the premises. The men are provided with... of rules, and orders are posted in all parts of the... cautioning those employed not to carry either... matches.

LARGE FEETS.—About 500 English Volunteers... through Ostend on Friday, on their way to... They were met at the place of debarkation by... magistrates and other civic authorities, and by... Civic with a band playing. The whole town... out to see them. The *vin d'honneur* was pre... them at the railway station, and they departed... amid a scene of great enthusiasm. They... arrived by the same route on Saturday and... On Tuesday the handsome vase subscribed... English volunteers was presented to the... at the Hotel de Ville, in the presence of... of officers and men, who were received... entrance hall by a guard of honour of the fire... The King of the Belgians visited the... on the same day, and welcomed the Volunteers... which was received with great enthusiasm. On... the Burgomaster of Liège, and Alderman and... Cotton. It had been arranged that the Lord

Mayor should fire the first shot, and a Henry rifle was... handed to his lordship, but after tugging away at the... trigger for some minutes, he handed the rifle to the... burgomaster, who fired, and got the bull's eye which... was intended for the Lord Mayor. There is a deal of... grumbling at the arrangements; men say they do not... get their right scores, and though they are delighted... with Spa, they are disgusted with the shooting. It is... also said, that in consequence of the extortionate... charges of the hotel and lodging-house keepers of Lige, many of the Volunteers have returned to England, being unable to bear the expense of a longer stay.

INTENDED EMIGRATION OF FINLEN AND BROAD-HEAD.—Mr. Finlen having, according to his own statement, "failed during his 20 years' advocacy of political and social reform to free England of her aristocratic oppression," has resolved to sail for the New World, and an entertainment was given on Tuesday night, at the New Hall of Science, Old Street, St. Luke's, with the view of raising the necessary funds for him to pay his passage. A varied programme was provided for the occasion, and between 700 and 800 of the "friends of freedom," which included a large number of women and children-in-arms, responded to the appeal. Mr. J. P. McDonnell, who presided during the evening, eulogised the patriotism of Mr. Finlen, denounced the veal Press of England, and declared his everlasting adherence to the Republican cause. The performance then proceeded in the most orderly manner, in accordance with the arrangement of the programme, the crowning feature being a recitation, "The Jacobins of Paris," and a farewell address by Mr. Finlen himself. In the course of his speech he expressed himself strongly against the Press of England and Scotland Yard detectives, promised to work in America for the cause of England, and expressed a hope that the day was not far distant when England and America would walk hand in hand to sweep away the "odious aristocracy." The notorious Broadhead, of Sheffield, has also resolved to emigrate. Some months ago the magistrates declined to renew his license for the sale of spirits, and under the new Act for the regulation of beer-houses they have also taken away his beer license. A "Broadhead Emigration Fund" has been started, with the Rev. J. F. Witty, vicar of St. Matthew's, Sheffield, as the hon. sec. 20l. has been already subscribed, and money is said to be coming in liberally.

APPREHENDED HIGH TIDE.—Captain Saxby, R.N., about eight months ago addressed a letter to the papers, expressing his belief, founded on meteorological theory, that the period from October 5 to 7 will be marked by "high tides and destructive storms." The prediction has excited great alarm along the coast, and while Captain Saxby himself has been adjured to give assurances that the Channel Islands, and Jersey in particular, with the levels of Southsea, Portsmouth, &c., will all be in existence after October, the residents in the eastern counties have applied to the Astronomer Royal for information. In reply, Mr. Airy states that he has received more inquiries on the subject than he can answer, and refers all persons interested in the subject to the "Nautical Almanac," published by the Admiralty, in which are predicted the positions of the principal heavenly bodies for two or three years in advance, as well as the height and times of high water at numerous ports for the two tides on every day in the year. On examining these tables, says the Astronomer Royal, it will be seen that, though the tide of October 6 is the highest of the year, it is only 1 inch higher than the tide of February 28, which, he believes, did no mischief. "There is not, therefore," he adds, "the smallest ground for alarm in the height of this tide, as depending on the positions of the sun and moon. The most injurious tides are usually those which follow a continuance of heavy westerly or north-westerly winds on the Atlantic."

THE LOSS OF THE CARNATIC.—The Peninsular and Oriental Steam-ship Company have received the following telegram, dated Suez, Sept. 18:—

"Carnatic struck reef two miles north of Shadwan. When left part of starboard bow and after foretopmast nearly level with water and only visible. Ship supposed to have parted amidships, and after part sunk in deep water. Specie and mails forward; hope to recover. Cargo hopeless. Further appliances unnecessary."

The only mail that was on board was the Indian mail which left London on Sept. 3. Captain Pope, one of the passengers lost, was on his way to join his regiment in India, as was also Ensign Cuppage, son of Brigadier Cuppage. Mr. T. A. Thompson was a surgeon in the Peninsular and Oriental service, and was proceeding to Bombay to join his ship. Mr. Warren was also in the company's service. A special officer of the London Salvage Association, Captain Grant, left London last week with two divers, for the scene of the wreck, to recover, if possible, the 40,000l. specie, or part of it.

THE FENIAN PRISONERS.—On Monday evening a demonstration, organised by the "International Democratic Association" for the purpose of promoting the release of the Fenian prisoners, was held in Trafalgar Square. As usual on such occasions the speakers addressed their audience from the platform of the Nelson monument, which was duly illuminated by a few lamps suspended from a pole. At half-past 7, when it was quite dark, Mr. G. H. Moore, M.P., began to address the meeting, which was insignificant as an expression of the opinion of the metropolis. He said that he had been taken to task for what he had said some time ago, but he now repeated in England the words he had enunciated before his constituents across the Channel. The English people were generous and merciful, but the Government was cruel, barbarous, and bloody. Having sketched the history of penal legislation in England, where he said not very long ago scores of people were sent to the scaffold for trivial offences, he repeated what he had said some days ago in Ireland, that the diadem of England had been the black cap, and its throne had been the gallows. England

had been the greatest country in the world for effecting the demoralisation and degradation of man. The government of Ireland had been beyond all extenuation. He trusted not in the English Lords and Commons, but in the justice of the English people for the redress of the grievances of which he complained. How were the criminal statutes to which he had referred wiped out? The Lords, Commons, and clergy were willing to offer the ghastly oblation to the devil, but the juries, consisting of Englishmen, were unwilling to be parties to the homedial cruelty of the judges. He hoped that every town in England would show forth its moral strength, and would assert that the strong should not oppress the fallen. The prisoners for whom he pleaded had engaged in a fatal enterprise. He had warned them in vain against entering on it. They should consider at the same time that the Government had been bad and their objects had been honourable. They had not stained their purpose by a single act of violence or plunder. They had been convicted of treason-felony. He admitted the treason-but he denied the felony. The following resolutions were then unanimously carried:—

1. That while this meeting fully recognises the right and the duty of the Executive to repress and punish all illegitimate resistance to its authority, it is of opinion that such punishment should be limited by the nature and extent of the insurrection and the personal guilt of the insurgents.
2. That in all these circumstances it is the duty of the Government to extend to the prisoners still confined for political offences have been more than sufficiently punished, and that the extension of a full and unconditional amnesty to these men would advance the cause of good government throughout the empire.

Messrs. Weston, Johnson, Bligh, Bradlaugh, Hennessey, and Murray, subsequently addressed the meeting, some of them in very violent language. The meeting occupied upwards of two hours and a-half.

THE PUBLIC HEALTH.—The Registrar-General's Weekly Return states that in the week that ended on Saturday, Sept. 18, 4321 births and 3109 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 25 per 1000 persons living, being 23 per 1000 in London, 25 in Edinburgh, 25 in Dublin, 29 in Bristol, 23 in Birmingham, 30 in Liverpool, 28 in Manchester, 21 in Salford, 26 in Sheffield, 31 in Bradford, 27 in Leeds, 21 in Hull, 28 in Newcastle-upon-Tyne, and 25 in Glasgow. In Paris the annual rate of mortality in the same week was 23 per 1000. The rate in Berlin during the week ending the 16th inst. was 20 per 1000, and in Vienna 27 per 1000 during the week ending the 11th inst. In London the births of 957 boys and 937 girls, in all 1944 children, were registered in the week. In the corresponding weeks of 10 years, 1859-68, the average number, corrected for increase of population, was 2087. The deaths registered in London during the week were 1409. It was the 37th week of the year, and the average number for that week, corrected for increase of population, was 1306. The present return is therefore 108 above the estimated amount.

Provincial.

BARNSELEY.—A fire broke out on Monday at the bottom of the cupola shaft of the High Style Colliery, and has since assumed such alarming proportions, that it has been determined, as the only means of extinguishing the flames, that some stoppings shall be built quite close to the bottom, for the purpose of excluding the air. As there is a communication from the High Style to the Mount Osborne Collieries, where upwards of 600 men and boys are employed, the fire has thrown nearly the whole of them out of work. The bodies of four of the persons who had been so long entombed in the workings of the Oaks Colliery, were recovered last week. All of them were identified by the little clothing left on them.

BROMLEY.—A young man named Davis was arrested on Monday for having discharged a loaded gun at a girl named Whiteman, to whom he had been paying his addresses, but who wished to break off the connection. Little hope is entertained of the girl's recovery, the whole charge of large shot having lodged in the left breast.

CAMBRIDGE.—Professor John Robert Seeley, Fellow of Christ's College, Cambridge, now Professor of Latin in University College, London, and well-known as the author of "Ecce Homo," has been appointed to the chair of Modern History in this University, vacant by the resignation of Canon Kingsley.

CARDIFF.—The steamship Golden Fleece, of 2000 tons, which left this port on the 10th inst. for Alexandria with a cargo of coals, sprung a leak, while riding at anchor off Barry Island, and sunk before she could be run ashore. She has since broken in two, and become a total loss. The whole of the crew were landed in safety, with the exception of one man, who assisted to get the boats off, but was missed shortly after. The Golden Fleece cost her original owners over 100,000l. She was built originally for the East India and Australian service, and she was also largely employed during the Crimean War.—The Marquis of Bute has signified his intention to celebrate his approaching birthday by paying the whole of the debt that still remains on the Cardiff Infirmary; and his agent has written to the treasurer of the institution to know the exact amount of the debt, that he may send a cheque for its discharge at once.

CONISTON.—On Sunday morning a lady and gentleman, visitors to the lakes, hired two ponies and a guide, in order to ascend Coniston Oldman, a mountain much visited by tourists in this district. Soon after ascending it, they were overtaken by a violent storm of wind and rain, accompanied by a dense mist. Unable to proceed further they arranged to return, but in consequence of the obscurity in which everything was wrapped, and the danger of the descent, the

lady and gentleman were obliged to proceed on foot, the guide taking charge of the ponies. After travelling some distance the ponies became restive, and the guide was obliged to stop. The party, consequently, became broken, and the lady and gentleman had to proceed alone to Coniston, where they arrived at a late hour after much danger, and many hours' exposure to the storm. The guide, however, did not return, and as nothing had been heard of him on Monday, searchers went out, and in a short time found him lying dead upon the mountain side, with the two ponies standing beside him. It is supposed that he was starved to death during the storm, which was one of the most violent ever experienced, even in this wild region.

FEVERSHAM.—An explosion occurred on Tuesday at Messrs. Hall & Son's powder works at this place. One man was seriously injured, and three mules were destroyed.

KENILWORTH.—A considerable portion of the ruins of Kenilworth Castle having shown signs of falling, the Earl of Clarendon, the owner, is repairing and strengthening the great hall, Leicester's buildings, and parts of the external walls on either side. His lordship is also restoring some of the doorways, windows, and fire-places. In the course of the repairs excavations have been made, and underground apartments, cells, and passages revealed which had been hid for centuries. The great hall, 90 feet by 45 feet, still retains several of its fine gothic windows, and some of the towers yet rise 70 feet high.

LANCASTER.—At the borough Police Court, on the 14th inst., Henry Butler, a man of gentlemanly appearance, from Seaforth, near Liverpool, was charged with forging a bill of exchange for 1500*l.*, with intent to defraud Mr. G. M. Simpson, of the firm of Hennings & Simpson, bill discounters, of Jermyn Street, London. It appeared, from the statement of the prosecutor, that the prisoner had represented himself to be Lieutenant Cooke, of the 17th Lancers, and had been in communication with Mr. Simpson, respecting the bill of exchange, from Lancaster. A bill was forwarded, and on the 1st of September Mr. Simpson received a telegraphic message, dated from the Vicarage, Lancaster, stating that Lieutenant Cooke had signed the bill, and requesting Mr. Simpson to forward the money. Having some suspicion, Mr. Simpson went to Lancaster on Friday, and then discovered that no such person was staying at the Vicarage. From subsequent inquiries made by the police, it transpired that prisoner had been at the telegraph office, and had left instructions for any telegram from Mr. Simpson to be sent to the post office at Lancaster, the officials at which place had also been desired to keep his letters till called for. It was also proved that Lieutenant Cooke had neither written nor signed any of the letters or the bill. On the 13th he presented himself at the post office, and was handed over to the police. He was remanded for a few days, when he was committed for trial at the next assizes, bail being refused.

MANCHESTER.—A meeting of the executive committee of the National Reform Union was held on Tuesday, when Mr. George Wilson, who was in the chair, showed the great advantages derived from free trade, in answer to the revivers of protection. He said that he would be no party to asking for reciprocity, if retaliation was meant by it. He proposed rather to have a congress of free-traders of all nations to carry out still further its advantages. Reciprocity gained by such means would be more lasting. Mr. Jacob Bright, M.P., was for the reciprocity of freedom, not of restraint and trammels on trade. He contended that by putting 25 per cent. on the Chinaman's tea, while our cottons were charged 5 per cent., we had denied reciprocity, and that to lay all the fault on foreigners was to put the saddle on the wrong horse. To say that the people should work hard, and then not have the freedom to lay their wages out in the cheapest market might be Tory reciprocity, but was not his. He traced a good deal of the suffering of trade to the recent American and German wars, and suggested that stupendous crimes must be expected to be punished by great suffering and disaster.

NEWPORT.—The inquiry into the cause of the death of Emily Amelia Collier, daughter of Mr. H. Collier, oil merchant, who was supposed to have died from the administration of poison by a boy named Charles Gritt, now in custody on the charge of wilful murder, was concluded on the 16th. Some further evidence was given, showing that no poison could be found in her body, or in the fowls which were also supposed to have been poisoned; after which the jury unanimously returned a verdict that there was no evidence to prove that Miss Collier came by her death otherwise than naturally from inflammation of the membranes and substance of the brain.

SHEFFIELD.—In consequence of the continuance of the fire in the East Kettford Pit, it was determined on Friday to fill up the shaft, with a view of extinguishing the flames. A large body of men were set to work, and on Saturday the work was accomplished, several hundred tons of rubbish being thrown down the shaft. The bodies of the two men who could not be reached when the fire broke out had not been recovered when the work of sealing the shaft had commenced. What time will elapse before the pit will admit of being reopened is very doubtful. In the similar accidents at the Wombwell Main and the Oaks Colliery, nearly a year elapsed before those in charge were able to reopen the shafts.

SHIELDS.—On Tuesday, the 14th, the Duke of Northumberland, who was accompanied by the Duchess, the Dowager Duchess, and Earl and Countess Percy, laid the foundation-stone of a new school in connection with St. John's Church, Percy Main, near North Shields, one of the five district churches built and endowed by the late Duke. The schools, which will be built on a site given by the Duke, will be of stone.

SOUTHAMPTON.—The passengers and crew of the West India Mail steamer *Atrato*, which was sent to the Motherbank last week, were released from quarantine on Sunday.

STAFFORD.—The Chain pit of the Clough Hall Colliery, in North Staffordshire, has been burning for several days, and up to Saturday morning the flames had not been extinguished. The cause of the fire is said to be a large "blower" of gas. The seam of coal now being worked ordinarily gives off a large quantity of gas, and a large blower being added to it a flame was created which spread to the coal and set it on fire. The manager and the men used every endeavour to put out the fire, but without avail. At length the horses and men were brought out of the pit for safety, and the water-engine was stopped, in order that the water might accumulate and exclude the air. There have been several explosions, and the accumulated water has acted as a buttress. The amount of the damage has been considerably lessened by this means. The latest accounts state that the fire has not been subdued, but it is confined to one pit.

STALYBRIDGE.—On Monday a shocking discovery was made at Micklehurst, near this town. A woollen weaver, named James Schofield, resided with his wife at The Cotes, a lonely place among the hills near the junction of Lancashire, Cheshire, and Yorkshire. Of late they have not lived together very happily. On Monday the bodies of both were found in the house, the head of the woman being nearly severed from the body. Both were dead, and it is supposed that the husband first cut his wife's throat, and afterwards his own. They were between 50 and 60 years of age.

TYNEMOUTH.—On Tuesday, the 14th, the Prudhoe Memorial Convalescent Home was opened at Whitley, near North Shields. This fine building has cost about 20,000*l.*, and commands a view of the north-eastern coast. The structure is arranged upon the pavilion plan, which has prevailed in Germany and France so many years, and which Miss Nightingale and the Crimean Commissioners have so strongly recommended. It consists of a central block, containing the administration department, while from a corridor running at right angles with this various rooms project both at the back and front, which leave open spaces between them for air and sunshine. The exterior of the building is very imposing. The home has been erected by public subscription as a memorial of the late Duke of Northumberland. At the opening ceremony the chair was occupied by Mr. Orde, Chairman of Quarter Sessions; and the home was declared open by Eleanor Dowager Duchess of Northumberland. The speakers were the Duke of Northumberland, Earl Percy, Sir W. J. Armstrong, Sir Walter Riddell, the Right Hon. T. E. Headlam, the Mayor of Newcastle, Archdeacon Bland, the Under-Sheriff of Northumberland, and Dr. Bruce.

WORCESTER.—The accounts of the pecuniary results of the recent musical festival state that in spite of the success of the festival in a musical point of view, and the large sum raised by the sale of tickets, the amount collected at the doors of the cathedral was below that of the preceding festival by nearly 300*l.*, and less than the amount collected at Hereford by 150*l.*

Ireland.

THE CHURCH SUSTENTATION FUND.—The Archbishops of Armagh and Dublin, and the Dukes of Leinster and Abercorn have issued a circular stating their readiness to receive contributions for the Church Sustentation Fund. Mr. Evelyn Philip Shirley, the owner of very extensive estates in County Monaghan, has announced his intention of purchasing the tithe rentcharge from the Government, and immediately handing over to the Church Body a new rentcharge equal to the old one. Mr. Thomas Cook Trench, of Millicent, County Kildare, has subscribed 3000*l.* to the sustentation fund of the Irish Church.

TENANT-RIGHT CONFERENCE.—On Thursday, the 16th, a Tenant-Right Conference, which may be regarded as the formal opening of an organised agitation on the subject, was held at Cork. The chair was occupied by Mr. Timothy Dorgan, president of the Cork Farmers' Club, and among those present were Mr. Maguire, M.P., Mr. Murphy, M.P., Mr. Shaw, M.P., the Mayor, and Mr. Butt, Q.C. The Limerick, Clare, and Tipperary Farmers' Club and the Macroom and Mallow Farmers' Club were represented by deputations. Mr. Butt, Q.C., spoke at great length, and said that the meeting would inaugurate a tenant league that would never relax its exertions until every tenant in Ireland could say he had a home upon which no landlord dared intrude so long as the tenant fulfilled his obligations; a hearth that no bailiff or agent dared despoil as he paid his rent. Mr. Maguire, M.P., said so long as there was not security of tenure there could be no true loyalty in the breasts of the people. Mr. Shaw, M.P., said he had only one opinion on the question—namely, that the tenant right of the North should be legalised and made general throughout Ireland. Resolutions in favour of the extreme views of fixity of tenure propounded by Mr. Butt, were unanimously adopted. Leases for any term were scouted, as also was compensation for improvements in any form. It was also resolved to found a Tenant League for the better agitating of this claim between the present time and February next; and the Ministry were formally warned that no "half-measure," no "peddling Bill" will answer.

THE TURRET SHIP SCORPION.—Last Friday an order was read on board the turret ship *Scorpion*, lying in Cork harbour, directing that she should immediately sail for Bermuda. The officers and crew protested against her putting to sea in such weather, or proceeding on a long voyage at all, as in the gale off this coast she had proved unseaworthy. The sailing

is now countermanded, and when the

THE FENIAN PRISONERS.—An inquest was held in Clonmel on Sunday, and was attended by about 25,000 persons. The Government was received with a "but justice." A collision took place between a party of Fenians and a party of Orangemen, who were proceeding from Lurgan to Clonmel for the purpose of escorting home from Clonmel to Lurgan just undergone three months' imprisonment. The Fenians were travelling, and brought it to a triumph.

ROBBERY OF ARMS.—On Wednesday a house of a respectable farmer, near Mallow, Cork, was entered, in the owner's absence, with blackened faces, who took away the arms are supposed not to be strangers, but persons likely to lead to their discovery.

AGRARIAN MURDER IN MEATH.—On Monday night, a man named Thomas R. was a pensioner, who owned about 40 acres of land in the market. On coming into possession of the land two years ago, he found five or six tenants, each of whose holdings he cut off a portion of the farm for himself, compensating them with a year and a half's rent. This, however, excited resentment against him, and he was a "marked man." On Saturday he was returning from market in a cart, and about 10 o'clock he was attacked within a few miles of his home by two men who were lying in wait. One of the men ran away, and the murderer struck the head to atoms with a stone hammer. The same name as the deceased, and the two men were as well as a man named Quinn, had been under suspicion. The jury at the inquest returned a verdict of "Wilful Murder by some persons unknown."

Scotland.

MYSTERIOUS DISAPPEARANCE OF THE JUSTICE CLERK.—The Lord Justice Clerk (Mr. Patton) has been missing since Monday. He went to his estate at Glenalmond, Perthshire, on Saturday, and it appears that on Monday he went out before breakfast for a walk, and did not return. During Monday and Tuesday he made for his lordship, but no trace of him was obtained, and it is feared that, as he was walking in the direction of the Ayr, he accidentally fallen into the river, where he has been drowned. The river was drizzled on Monday and Wednesday, and about 200 persons were sent into the moors in search of him. The Procurator-General's county arrived at Glenalmond on Thursday, but up to midnight on Thursday he had not been discovered. During the day, however, a silk necktie and an empty razor-case, slightly stained with blood, were found on the banks of the river, and were thought to belong to his lordship, while an ash splinter bent over the stream was distinctly impressed with finger-marks in blood, as if some one had assisted himself into the water. From these instances it has been inferred that his lordship, at the moment of temporary insanity, has committed destruction. Great excitement prevails in Perthshire where his lordship has long been highly respected.

MONUMENT TO ROBERT BRUCE.—At a meeting held in Stirling it has been resolved to erect a monument to King Robert Bruce at Bannockburn.

VALUE OF LAND IN SCOTLAND.—The Duke of Portland bought the estate of Caithness. The estate was put up for sale, and after competition was knocked down at 9140*l.* Less than 20 years ago it was valued at 2425*l.*

UNIVERSITY OF GLASGOW.—Mr. James the proprietor of the paraffin oil works presented 10,000 guineas for the permanent endowment of a chair of technical chemistry in the University, Glasgow, with liberty to found bursaries in connection therewith.

Railways.

ACCIDENT TO THE SCOTCH LIMITED MAIL.—Thursday the 16th inst., at about 10 o'clock, a mail from the north to London was running at a rapid rate between Banbury Lane and London, when suddenly came upon some wagons on the line belonging to a goods train. The steam engine and the breaks applied, but the mail was brought to a stand. The driver and the engine, and received severe injuries. The goods train was smashed up, two engines were broken, and the front of the mail was damaged. The darkness of the hour, and the nature of the collision occasioned much alarm to the passengers, several of whom were shaken, but none of them sustained any injury. The mail was delayed for four hours.

THE LATE COLLISION ON THE GREAT NORTHERN.—An inquest was held at Barrhead on Monday, the 16th inst., on the body of Arthur South, the guard of a goods train on the Great Northern, who was killed on the 15th inst. by his train coming into collision with a passenger train on the Great Northern, the passenger train being on the wrong line. The jury returned a verdict that the deceased was accidentally killed—that the train being on the wrong line was due to the

RENDLE'S PATENT GROUND VINERIES AND PLANT PROTECTORS.

From the "JOURNAL OF HORTICULTURE, COTTAGE GARDENER, AND COUNTRY GENTLEMAN," conducted by GEORGE W. JOHNSON, Esq., F.R.H.S., and ROBERT HOGG, Esq., LL.D., F.L.S., F.R.H.S., Thursday, August 19, 1868.

RENDLE'S PATENT GROUND VINERIES AND PLANT PROTECTORS.

The same Mr. Rendle who rendered this service to horticulture in his earlier days, invented a mode of protecting tender crops, which ought to obtain all the popularity which its merit demands. The contrivance consists in glazing Rendle's patent protecting bricks, low structures which may be called without the aid of putty, by merely slipping the sheets of glass into a notch. We cannot better explain the principle than by referring our readers

to the accompanying woodcuts. The length to which these little structures may be carried is limited only by the extent of ground at command, and their width by the strength and length of the glass employed to glaze them. The uses of these structures are similar to those of the ground vinerias, and although applied to the culture of the Vine, they are equally applicable to that of other crops, such as early Peas and Salads; the propagation, by cuttings and grafting, of valuable plants in pots, and also for the protection of less hardy plants during winter.

Fig. 1

PATENT GROUND VINERY, as now in use at Mr. Rivers', at Sawbridgeworth, 10 FEET for ONE GUINEA.

In Fig. 1 we have the representation of a ground vinery. The drawing, which is supplied by Mr. Rendle, is not quite to our mind, as it represents the walls of the structure solid, whereas we would suggest that they be pigeon-holed so as to admit of the circulation of air necessary in so small a space to ensure health and vigour

to the plant enclosed. We have seen at Mr. Rivers' an experiment with these tiles erected after this fashion, and it succeeds admirably. The Vine is the picture of health and vigour, and under the glass there is the needful amount of humidity to secure health and keep down red spider. Fig. 2 shows its application to the protection and hastening of Strawberry crops.

Fig. 2.

STRAWBERRY GROWER and FORCING FRAME, 12 FEET for ONE GUINEA.

We would strongly urge Mr. Rendle to adopt the pigeon-hole principle. It is for the general hardy use of the "protectors;" but it admits also of their being used for forcing. When so employed heat may be applied by a lining of heating pipes placed all round them. As yet this is but the initiation of an idea which is of great development, and we see in it a fund of interest and usefulness in the eyes of horticulturists. The great recommendations of this plan of Mr. Rendle's

are cheapness, durability, disuse of putty and paint, and the total dispensation with the services of what are called "skilled workmen" in their erection. The material of which they are made is also an important element in the question, for the heat absorbed by bricks during the day will be given off at night, and in this respect bricks have the advantage over such structures made of wood and glass only.

RENDLE'S PATENT GROUND VINERIES AND PLANT PROTECTORS.

PRICES:

Patent Ground Vinerias	2s. to 2s. 6d. per running foot.
Strawberry Growers and Protectors	1s. 6d. to 2s. " "
Protectors for growing Early Peas, Asparagus, Lettuces, Cauliflowers, Potatos ..	8d. to 1s. 6d. " "
Protectors for raising Flower Seeds, choice Garden Seeds, small Salad, &c. ..	8d. to 1s. 6d. " "

ADDED TARIFF, WITH PRICES OF ALL THE DIFFERENT KINDS NOW MANUFACTURED, CAN BE HAD ON APPLICATION.

LARGE SHEET OF ENGRAVINGS, WITH PRICES, CAN ALSO BE OBTAINED POST FREE FROM THE PATENTEE.

All Orders above £5 will be delivered carriage free at 3d. per running foot extra.

ALL ORDERS ABOVE £20 CARRIAGE FREE TO ANY RAILWAY STATION IN ENGLAND. FRIENDS JOINING TOGETHER IN A LOCALITY CAN OBTAIN THIS ADVANTAGE.

PATENT GROUND VINERY, 10 FEET LONG, COMPLETE WITH GLASS, FOR ONE GUINEA.

The same size as now in operation at Mr. Rivers' at Sawbridgeworth.

In consequence of the large demand for these Protectors, it will be necessary TO GIVE ORDERS AT ONCE, in order to ensure a supply for the Autumn. All Orders executed in strict rotation.

These Protectors have been exhibited at the Exhibitions of the Royal Horticultural Society at Leicester and Manchester; at the Royal Botanic Society, Regent's Park; at the Royal Horticultural Society, South Kensington; the Bath and West of England Horticultural Society, at Southampton; and at various Provincial Horticultural Societies. Specimens will also be exhibited by the regularly appointed Agents throughout the country—a List of whom will be shortly published.

AGENTS are IMMEDIATELY REQUIRED.—Only one will be appointed in each City or Town. Applications should at once be made to the Patentee.

Mr. Rivers has kindly consented to allow the Patent Ground Vinerias to be seen at Sawbridgeworth.

Mr. Rivers has kindly consented to allow the Patent Ground Vinerias to be seen at Sawbridgeworth.

SPECIMENS can be seen any day at the Gardens of the Royal Horticultural Society, South Kensington, on application to Mr. J. C. Fox.

FOR PRICES AND FURTHER PARTICULARS, APPLY TO THE PATENTEE.

MR. W. E. RENDLE, 68, WELBECK STREET, CAVENDISH SQUARE, LONDON, W.

A NEW LITERARY REVIEW.

On Saturday, October 9, demy 4to (32 pp.), PRICE SIXPENCE,

THE ACADEMY:

A MONTHLY RECORD OF LITERATURE, LEARNING, SCIENCE AND ART.

The First Number will contain Papers by the following Writers, amongst others:—

MR. MATTHEW ARNOLD.
PROFESSOR CONINGTON.
PROFESSOR HUXLEY, F.R.S.
SIR JOHN LUBBOCK, BART., F.R.S.
MR. GUSTAVE MASSON.
PROFESSOR MAX MÜLLER.

M. ADOLPHE NEUBAUER (of Paris).
PROFESSOR NOLDEKE (of Kiel).
REV. H. N. OXENHAM.
REV. MARK PATTISON.
MR. G. A. SIMCOX.
PROFESSOR WESTWOOD, F.S.A.

And a hitherto unpublished document, written by LORD BYRON at Venice in 1816, relating to his separation from LADY BYRON.

Also the only true account of the destruction of LORD BYRON'S AUTOBIOGRAPHY.

Orders received by all Booksellers and News Agents.

JOHN MURRAY, ALBEMARLE STREET, W.

SHAW'S PATENT IRON
For Samples and Prices apply to
J. SHAW AND CO., 29, Oxford Street, Manchester.

IRON HURDLES
(Silver Medal of the Royal Agricultural Society):
SHEEP, 3s. 6d.; CATTLE, 4s. 2d.; OX, 5s. 11d.
List by post. GATES and FENCING of every description,
St. Pancras Iron Work Company, Old St. Pancras Road, London, N.W.

FOWLER'S PATENT STEAM PLOUGH
and CULTIVATOR may be SEEN at WORK in every
Agricultural County in England.
For particulars apply to JOHN FOWLER and CO., 71, Cornhill,
London, E.C.; and Steam Plough Works, Leeds.

Heating Apparatus.
J. MEREDITH continues to supply and fix
HOT-WATER APPARATUS in VINERIES, and every
description of HOTHOUSE BUILDINGS, &c.
The Vineyard, Garston, near Liverpool.

CRANSTON'S PATENT GLASS BUILDINGS for
HORTICULTURE. Plans and Estimates free.
Just Published, free for 30 stamps, Third Edition, DESCRIPTIVE
BOOK, splendidly illustrated from existing Buildings. By the
Author and Patentee, JAMES CRANSTON, Architect, Temple Row
West, Birmingham.

Heating by Hot Water.
W. J. HOLLANDS, IRON MERCHANT,
51, Backside, S.E.

HOT-WATER PIPES, from stock—p. yard	2-inch. 1s. 6d.	3-inch. 1s. 6d.	4-inch. 2s. 0d.
ELBOWS for ditto each	1 6	2 3	3 0
TEES	2 3	3 6	4 6
SYPHONS	2 3	3 6	4 6
THROTTLE VALVES	10 0	11 6	13 0

Cash remittance with order.
N.B. All Goods of first-class manufacture. No second quality kept.
Estimates given, and orders punctually attended to the same day.

GREENHOUSE, GROTTO, ROCKERY, AQUARIUM,
and RUSTIC ORNAMENTS.—Quantity of large MOTHER-
O'-PEARL SHELLS, of fine prismatic colours, for Sale, in bags
containing 250 Shells, at the low price of 20s. per bag, delivered to
carrier in London. One or more bags forwarded on receipt of Post
Office Order, payable to JOHN B. ADAMS, Commission Merchant,
40, Great Tower Street, London. Usual allowance to the Trade.

The New Vade Mecum (Invented & Manufactured by
CHARLES H. VINCENT, OPTICIAN, of 23, Windsor
Street, Liverpool), consists of a TELESCOPE well adapted for
Tourists, &c., to which is added an excellent MICROSCOPE of great
power and first-class definition, quite equal to others sold at ten
times the price. Wonderful as it may seem, the price of this in-
genious combination is only 3s. 6d.; and Mr. Vincent sends it
(carriage free) anywhere, with printed directions, upon receipt of
Post-office order or stamps to the amount of 3s. 10d.

On the First of every Month, price One Shilling,
THE ZOOLOGIST, a Popular Journal of Natural
History, for recording facts relating to Quadrupeds, Birds,
Reptiles, and Fishes. Conducted by EDWARD NEWMAN, F.L.S., F.Z.S.,
&c. JOHN VAN VOORST, 1, Paternoster Row, E.C.

Second Edition,
JEMMETT'S ANNUAL FARM ACCOUNT BOOKS.
Opinions of the Press on application to the Author, Binfield,
Berks. SIMPKIN, London; LOVEJOY, Reading.

To Agricultural Implement Makers and other
Advertisers.

JOHNSON AND SHAW'S FARMERS ALMANAC and
CALENDAR for 1870, will be published as usual on November 1.
Advertisements will be received up to October 11. They must be
sent direct to the publisher
WILLIAM RIDGWAY, 169, Piccadilly, London, W.

Works on Botany, by Dr. Lindley.

Lately Published,
THE VEGETABLE KINGDOM; OR, THE STRUCTURE,
CLASSIFICATION, AND USES OF PLANTS. Illustrated upon the
Natural System. In One Volume, 8vo, cloth, price 36s., with up-
wards of 500 Illustrations.

DESCRIPTIVE BOTANY: OR, THE ART OF
DESCRIBING PLANTS correctly, in Scientific Language, for Self
Instruction and the Use of Schools. Price 1s.
London: BRADBURY, EVANS, and CO., 11, Boulevard Street, E.C.

Third Edition, enlarged, post free, 13 stamps,
A HANDBOOK OF VINE and FRUIT TREE
CULTIVATION under GLASS, with carefully prepared Lists
of Fruits and Vegetables, and Plans of Glasshouses, Hints for
Heating, &c., by S. HAZEMAN, Chatsworth.
HEREMAN and MORTON, 7, Pall Mall East, London, S.W.

Just ready, Fourth Edition, much enlarged, with Forty Engravings
on Wood, Coloured Frontispiece, and Six Panoramic Maps,
post 8vo, cloth, 12s.

WINTER and SPRING on the SHORES of the
MEDITERRANEAN; or, the Riviera, Mentone, Italy,
Corsica, Sicily, Algeria, Spain, and Biarritz, as Winter Climates.
By J. HENRY BENNETT, M.D.
JOHN CHURCHILL and SONS, New Burlington Str

A COMPLETE SECOND-HAND COPY of
HENDERSON'S splendid work, THE ILLUSTRATED
BOUQUET, to be sold, cheap; it contains 85 beautifully Coloured
Floral Plates; in three vols., handsomely bound in green morocco.
Published price, unbound, £12 12s. For price and particulars

CHEAP PRINTS.—A Job Lot of ENGRAVINGS and
LITHOGRAPHS, suited for Framing, Screens, Retelling, &c.;
various sizes, Plain and Coloured mixed, at per gross of 156, all
different, post free for 3s. 6d. stamps. Not less than a gross supplied
J. REYNOLDS, 174, Strand, W.C.

ROYAL SCHOOL of MINES.

Director—
Sir Roderick Impey Murchison, Bart., K.C.B., F.R.S., &c.
During the Nineteenth Session 1869-70, which will commence on
the 4th of October, the following Courses of Lectures and Practical
Demonstrations will be given:—
1. Chemistry. By E. Frankland, Ph.D., F.R.S.
2. Metallurgy. By John Percy, M.D., F.R.S.
3. Natural History. By T. H. Huxley, LL.D., F.R.S.
4. Mineralogy. } By Warrington W. Smyth, M.A., F.R.S.
5. Mining. }
6. Geology. By A. C. Ramsay, LL.D., F.R.S.
7. Applied Mechanics. By T. M. Goodove, M.A.
8. Physics. By Frederic Guthrie, B.A., Ph.D.

Instruction in Mechanical Drawing, by the Rev. J. Haythorne
Edgar, M.A.
The fee for Students desirous of becoming Associates is £30 in
one sum, on entrance, or two annual payments of £15, exclusive of
the Laboratories.

Pupils are received in the Royal College of Chemistry (the
Laboratory of the School), under the direction of Dr. Frankland, and
in the Metallurgical Laboratory under the direction of Dr. Percy.

Tickets to separate Courses of Lectures are issued at £3 and £4 each.
Officers in the Queen's Service, Her Majesty's Consuls, acting
Mining Agents and Managers, may obtain Tickets at reduced prices.
Certificated Schoolmasters, Pupil-Teachers, and others engaged in
education, are also admitted to the Lectures at reduced fees.

His Royal Highness the Prince of Wales grants Two Scholarships,
and several others have also been established by Government.
For a Prospectus and information apply to the Registrar, Royal
School of Mines, Jermyn Street, London, S.W.

TRENHAM REEKS, Registrar.
PROFESSOR HUXLEY, F.R.S., will COMMENCE a
COURSE OF EIGHTY LECTURES ON NATURAL HISTORY,
at the ROYAL SCHOOL OF MINES, Jermyn Street, on MONDAY
NEXT, October 4, at 2 o'clock; to be continued on every week day
but Saturday, at the same hour. Fee for the Course, 5s.

TRENHAM REEKS, Registrar.

PROFESSOR TENNANT, F.G.S., will DELIVER a
COURSE OF LECTURES ON MINERALOGY applied to
GEOLOGY and the ARTS, at King's College, London, on
WEDNESDAY and FRIDAY Mornings, at 9 o'clock, during October,
November, and December, commencing October 8. Fee £2 2s.

A COURSE OF LECTURES ON MINERALOGY and GEOLOGY
will also be DELIVERED on THURSDAY Evenings, at 8 o'clock.
These begin October 14, and will be continued to Easter, 1870.
Fee £1 11s. 6d. Professor TENNANT gives Private Instruction in
MINERALOGY and GEOLOGY, illustrated by a large number
of Specimens, at his residence, 149, Strand, W.C.

Home News.

THE QUEEN IN SCOTLAND.—On Thursday, the 23rd
ult., the Queen, accompanied by Princess Louisa and
Prince Leopold, went to the Glassalt Sheil, and
returned to Balmoral on Saturday. Mr. Gladstone left
the Castle on Saturday for Dundee. On Sunday the
Queen and Royal family attended Divine service in the
parish church, Crathie. The Rev. Andrew Gray, of
St. John's Church, Glasgow, officiated. On Monday
the Queen drove out, accompanied by Princess Christian
and Princess Louisa. The Queen gave a ball in the
evening to the servants, tenants, and gillies on the
Balmoral and Abergeldie estates. On Tuesday morning
the Queen visited Braemar Castle, accompanied by
Prince and Princess Christian and Princess Beatrice,
and in the afternoon drove out with Princess Louisa.
Her Majesty and the Royal family are expected to
leave Balmoral about the 5th or 6th of November for
Windsor.

THE PRINCE AND PRINCESS OF WALES, with
their children, Prince Albert Victor, Prince George,
Princess Louisa, and Princess Victoria, arrived at
Marlborough House on Thursday morning from the
Continent. Their Royal Highnesses arrived in Paris
on Sunday from Wildbad. On Monday the Princess
was slightly indisposed. On Tuesday their Royal
Highnesses paid a visit to the Emperor and Empress
at St. Cloud. On Wednesday the Prince de la Tour
d'Auvergne, the Minister for Foreign Affairs, paid a
visit to their Royal Highnesses, who left Paris in the
evening for London. On Thursday the Duke of Cam-
bridge visited the Prince and Princess at Marlborough
House. Their Royal Highnesses have accepted an
invitation to visit the Earl and Countess Spencer at
Althorp. The Prince has engaged to shoot with the
Earl of Derby and Lord Lonsborough during the
season.

PROPOSED ABDUCTION OF PRINCE ARTHUR BY
THE FENIANS.—The New York papers state that the
Fenian Brotherhood have just held two meetings at
the Fourth Street head-quarters, and that it had been
ascertained from authentic sources that the committee
had under consideration the abduction of Prince Arthur
either in Canada or in the United States should he pay
a visit to that country.

THE SAXE-COBURG FAMILY.—The Grand Duke
Ferdinand and Duchess Clementine of Saxe-Coburg
left St. Leonards on Wednesday for Twickenham, on a
visit to the Duke and Duchess d'Aumale. The Prince

and Princess Augusta of Saxe-Coburg, with their
youthful family, left St. Leonards on Tuesday for
Vienna. The Duke Ferdinand and the Duchess
Clementine will leave Twickenham for Balmoral
on a visit to her Majesty.

THE VACANT LORD JUSTICESHIP.—It
has already been announced that the Government had
expressed Lord Westbury to accept the vacant
Lord Justice. When the same offer was made in
November last his lordship declined to accept it,
stating that he was of more use to the public
capacity in the House of Lords. On the 23rd
by Lord Granville and Mr. Gladstone. On the
subject, he agreed to refer the question to the
Chancellor, on the understanding that the Chan-
cellor considered he would be of more use to the
Justice he would accept the office, and if he
refusal would rest solely on public grounds. It
stated that the Lord Chancellor, after referring
the question, has decided that it would be in the
public interest that Lord Westbury should be
away from the appellate tribunal of the House
of Lords.

NEW BARONETCIES.—Mr. Gladstone has
granted baronetcies to Mr. William Jackson, of
formerly M.P. for North Derbyshire, to Mr. John
man Earle, of Allerton Towers, near Liverpool,
Major-General Francis Seymour, C.B., and
waiting to the Queen, and formerly equerry to
Prince Consort.

PARLIAMENTARY MOVEMENTS.—There
is a prospect of the representation of the Universities
and Aberdeen, caused by the promotion of Mr. John
Gordon, the late Lord Advocate, is announced
as the Liberal candidate; and Mr. Smith, of
Sheriff has fixed Wednesday, October 6, as the
nomination for East Cheshire, and the day of
for the Saturday following. A requisition is
of signature in Dudley, calling upon Mr. Gladstone
resign his seat in Parliament, on account of his
connection with the Albert Assurance Office.

MR. GLADSTONE arrived on Saturday at
on a visit to his brother, Sir Thomas Gladstone,
left Balmoral on that morning, and was met at
Bauchory by the road across the Cairn of
Fasque, a distance of about 17 miles. On Sunday
attended divine service in Fasque chapel, and
wards visited Fettercairn. On Monday he arrived
Dundee, and immediately drove to campden,
Wednesday he visited Perth, and on Tuesday
accompanied by Mrs. Gladstone and daughter,
arrived at Hawarden Castle, Flintshire, where he
remain four or five weeks.

THE REVENUE.—The Revenue Returns for
year and quarter, ended Sept. 30, were published
yesterday. They show an increase of 2,952,000
year, and an increase of 107,735l. on the quarter.
year's account shows an increase in the
843,000l.; Stamps, 177,000l.; Property-tax,
Post Office, 80,000l.; Crown Lands, 15,000l.;
lancous, 515,205l.; and a decrease in the
259,000l.; Taxes, 41,000l. The quarter's
an increase in the Excise of 142,000l.; Stamp
Taxes, 18,000l.; Property-tax, 68,000l.;
10,000l.; Crown Lands, 1000l., and a decrease
Customs of 155,000l.; Miscellaneous, 71,250l.

THE MASTERSHIP OF THE MINT.—It is
that Dr. Lyon Playfair, M.P. for the University of
Edinburgh and St. Andrew's, is a candidate for the
office of Master of the Mint, vacant by the death of
Professor Graham.

THE ARMY.—Major-General Whistler has
appointed Colonel Commandant of the Royal Artillery
in the room of the late General Conran. The
of the 6th Foot, vacant by the death of the late
Charles Gore, has been conferred on Major-General
Crofton; and the colonelcy of the 95th Foot
by this promotion, has been conferred on Major-
General Robe.

THE CHANNEL SQUADRON.—The Agincourt
the vessels forming the Channel Squadron anchored
Queenstown on Monday morning. The Inconstant
been sent on to Pembroke to repair damage done
The Agincourt anchored off the Cork Yacht Club
and the other ships in the roads.

Foreign.

FRANCE.—The Emperor, who is announced to be
excellent health, presided at a Council of Ministers
St. Cloud on Saturday. On Sunday the Empress
Empress attended the races at the Bois de Boulogne
and were very warmly received. The preparations for
the journey of the Empress to the East are complete
and it is stated that her Majesty will leave for
Constantinople. The French Imperial yacht
arrived at Venice on Tuesday, to await the arrival
of the Empress. As matters are at present arranged
Majesty will visit the King and Queen of Greece
Corfu, where the Ambassador of the Porte
will be waiting for her on board an Imperial yacht.
She is to arrive on the 15th at Constantinople. Great
preparations are making by the Porte for the
which are likely to be permanent advantages to the
environs of Constantinople, for they include a
Buzykderé, and other substantial improvements.
From Constantinople the Empress will visit
Egypt, will visit Alexandria, Cairo, and
will not wait for the opening of the canal
for Nov. 17, before which date, probably about
her return to Paris is expected. The rumors are
Emperor will proceed to Vichy or Biarritz, and
be entirely devoid of foundation. The Empress
Princess of Wales paid a visit to the Emperor
Empress on Tuesday afternoon. On Wednesday
Prince de la Tour d'Auvergne paid a visit

declines the mediation proffered by the United States with reference to Cuba. A telegram from Washington, dated Tuesday, states that in consequence of the explanations which have been exchanged between the Spanish and American Governments, the latter has declared that it had never had any intention of offering to mediate in Cuba, and had been actuated solely by humanitarian motives. M. Catacasy, the new Russian Minister, was officially received by the President on Friday, and M. de Bille the new Danish Minister, was officially received on Saturday. The New York Convention met on Wednesday, and adopted resolutions in favour of gold payment of the Debt, equalisation of taxes, and negro suffrage; sympathising with Cuba, and favouring the acquisition of the island when its people should desire it. The Radical Republicans of Mississippi have nominated General Alcorn as Governor, and a negro as Secretary of the State. The Indians of Wyoming territory are renewing hostilities. The following is a summary of the speech delivered last week on the Alabama question by Senator Sumner, as chairman of the Massachusetts Republican Convention:—

"America has suffered fearfully at England's hands on the Alabama question. This he said not bitterly, but sadly; but, in view of England's complicity with rebellion, he would not attempt to set any price on the debt England owed to the United States, and he would not make any formal demand for a dollar of money or a word of apology, but would leave it to England, after due consideration of the subject, to offer what reparation she deemed to be proper, it remaining to America to decide what reparation she required. The question had been asked, why not lay claim against France for injuries done; but the reply was, while France and England alike sinned in according belligerent rights to rebels, the damage was not done openly to American commerce by an enemy's blockade runners built under the shelter of the French Government, as in the case of England. As to the proposed annexation of Canada to the United States, he was certain the day was coming which would see the whole land joined under the Government of the United States."

WEST INDIES.—Several severe shocks of earthquake occurred at St. Thomas on the 17th ult. No lives were lost, and there was no serious damage done.

HAYTI.—President Salnave has been shot in an assault on Aux Cayes. He had proceeded to that place in his war-vessel Galatea for the purpose of carrying out the final arrangements for reducing it. He effected a landing, and commanded the assault in person, when, in a skirmish, he received two bullet wounds in the chest. He was immediately taken on board the Galatea, and conveyed back to Port-au-Prince for surgical treatment; but it was believed that his wounds were mortal.

BRAZILS AND PARAGUAY.—Further details of the fighting in Paraguay have been received. On Aug. 16 there was an engagement at Curuguaty, in which 5000 Paraguayans were defeated with a loss of 20 guns. On the 17th there was another engagement, when 1600 Paraguayans were again defeated and 12 guns taken. Lopez fled after the battle, with the remnant of his troops, who were almost without arms, Count d'Eu pursuing him. The Paraguayans had abandoned their last six steamers in the river Mandevira. Forty-four British subjects had been liberated. Communication had been established with the Allies by the river Mandiensa. The Provisional Government at Asuncion had declared Lopez an outlaw.

CHILI AND PERU.—The fears caused by the prediction of Mr. Falb, that the west coast of South America was to be destroyed about the 1st October by some convulsion of Nature, had been raised to extreme terror by the occurrence of severe earthquakes along the coast, which was rapidly losing its inhabitants, and business of all descriptions was at a standstill. Severe shocks had been felt at Copiapo and at Iquique, which was consequently deserted. At Arica 40 shocks had occurred, all more or less strong. Similar reports of earthquakes have been received from Tacno and Arequipa. Much apprehension was felt of the forthcoming 1st of October.

City Intelligence.

MONEY MARKET, FRIDAY.—**BRITISH FUNDS:** Consols are 92½ to 93, both for Delivery and Account; New and Reduced Three per Cents., 91½ to 91¾; Bank Stock, 238 to 240 ex div.; Exchequer Bills, March, par to 5s. pm.; June, 7s. to 11s. pm.; India Five per Cents., 114 to 114½.—**FOREIGN:** Argentine, 81½ to 82; Brazilian, 83½ to 84; Egyptian (1864), 86 to 87 ex div; Ditto (1868), 76½ to 76¾; Viceroy's Seven per Cents., 80½ to 81; Ditto Nine per Cents., 97 to 98; Italian, 52½ to 53; Ditto Tobacco Loan, 84 to 86; Peruvian, 79½ to 80½; Portuguese, 33 to 34; Orel, 84 to 84½; Nicolas, 67½ to 67¾; Moscow, 83 to 83½; Charkof, 80½ to 81; Spanish, 28 to 28½; Turkish Five per Cents., 42 to 42½; United States 5-20 Bonds, 84½ to 84¾; Erie, 24 to 24½; Illinois, 94 to 95.

Metropolis and its Vicinity.

ELECTION OF LORD MAYOR.—On Wednesday, being Michaelmas Day, the Livery assembled in Guildhall for the election of a Lord Mayor for the year ensuing. The Common Hall was a very noisy one. The Lord Mayor and Alderman Besley were both put in nomination, Alderman Wilson being adopted as the nominal colleague for both parties. The feeling of the Livery was clearly in favour of Alderman Besley. The show of hands was largely in his favour, and at the close of the poll for the day it was found that he had polled 324, while only 149 voted for the Lord Mayor. On Thursday Alderman Besley not only maintained but increased his majority, the numbers voting for him being 1083, against 437 for the Lord Mayor. At noon yesterday Alderman Besley had polled 1202 votes, and the Lord Mayor 510, being a majority for Alderman Besley of 692. The Lord Mayor afterwards retired from the contest, but the polling must be continued, as a matter of form, for four days longer.

PRESENTATION TO THE LORD MAYOR.—On Monday the citizens of the ward of Walbrook presented to the Lord Mayor a full length portrait of himself, painted by Mr. Williams. His lordship, in acknowledging the compliment, defended some of his acts as a magistrate, but made no allusion to the contest for the mayoralty.

INTERNATIONAL EXHIBITION FOR 1871.—At the meeting of the Council of the Liverpool Chamber of Commerce, on Wednesday, a letter was read from the Commissioners of the Exhibition of 1871, announcing that an International Exhibition will be held in London in 1871.

THE FRANKLIN EXPEDITION.—A telegram from New York states that Dr. Hall, the Arctic explorer, has arrived at New Bedford, this week, from Repulse Bay, after an absence of five years. He discovered the skeletons of several of Sir John Franklin's party at King William's Land, and brings numerous relics of the Franklin expedition. Lady Franklin immediately telegraphed to New York, inquiring, "Has Hall brought journals or any writings?" The message returned by Mr. Grinnell was "None."

THE POPE AND DR. CUMMING.—Dr. Cumming, in reply to the Pope's communication, has published a long letter combatting the Roman claims put forth in behalf of the supremacy of St. Peter. Dr. Cumming says:—It was my earnest and pure desire, as invited, to "avail myself of the opportunity of the council" to be allowed to prove to the assembled council that the dark and hopeless picture of coming perdition for all who are separated from the Church of Rome, sketched by the venerable Pontiff in his address to us, is neither warranted by the Word of God nor borne out by general councils held during the first 500 years of the Christian era; and that our distinctive doctrines, such as justification by faith alone in the Redeemer's righteousness, and the way to Heaven—neither Pope, prelate, nor priest, but Christ alone, open to the worst, the oldest, and wickedest, without priestly absolution, or penance, or pay; and our salvation, not by anything done by us, but what was done for us on a Judean hill 1800 years ago—are clearly stated, often and in various forms, in that Book which the Church of Rome and the Protestant Church both hold to be divine.

MR. JEFFERSON DAVIS, late President of the Southern Confederation, left Southampton for the United States on Saturday in the steamer Baltimore.

ARRIVAL OF THE FIRST TEA SHIP.—The Thermopylae, owned by Messrs. G. Thompson & Co., has arrived off the Lizard in 88 days from Foochow, with the new season's tea. This is the quickest passage ever made. The average is 95 to 100 days against the monsoon.

THE ALBERT LIFE OFFICE.—On Saturday the directors of the Albert Life Assurance Company were brought before Mr. Knox, at Marlborough Street, on a charge of defrauding the shareholders by issuing false reports representing the condition of the company to be other than it was. Mr. Straight, who appeared for the prosecutor, applied for an adjournment of the case till he could examine the books of the company, but this the magistrate refused. The case, therefore, went on, and two witnesses were called, one of whom was a Mr. Leo, the leading prosecutor, who deposed that he had recently bought in the open auction rooms 240 shares, expecting from the reports that they would yield him a large profit; the other being Mr. Price, the provisional liquidator, who explained the affairs of the company, and stated that he had found in the books no trace of fraud on the part of the directors. The case was then adjourned for three weeks, the directors being admitted to bail on their own recognisances of 10l. each, leave being given to the prosecution to examine the books. The joint committees of the policy-holders appointed by the various London and provincial meetings have agreed to recommend to Vice-Chancellor James the appointment of Mr. W. J. White, of King Street, and Mr. A. Young, of the firm of Turquand, Youngs & Co., as the liquidators of the company. A movement has since been initiated by the Manchester, Birmingham, and Hull committees for the appointment of Mr. Chadwick and Mr. Price.

THE EUROPEAN ASSURANCE SOCIETY.—Mr. Lake, the general manager of the European Assurance Society, has telegraphed to the local agents of the Society that "the petition in Chancery is most treacherous and unexpected, and that the directors are determined to resist to the uttermost." A numerous meeting of the shareholders was held on Monday at the Langham Hotel, Sir Frederic Smith, K.H., in the chair, when, after full explanations from the accountant, resolutions were passed, deprecating the attempt to enforce a liquidation, and urging the directors to oppose the petition for winding-up by every means in their power.

NEW TELEGRAPH COMPANY TO AMERICA.—A prospectus has been issued of the Great Oceanic Telegraph Company (Limited), with a capital of 600,000l., for a cable from Ireland to Nova Scotia direct. The proposed charge is 1s. 6d. per word, or half the rate charged by the existing companies.

TELEGRAPH TO THE SCILLY ISLANDS.—A telegraph line, in length 31 miles, was completed on Tuesday from the Land's End to St. Mary's, one of the Scilly Islands, by which means the receipt of shipping intelligence will be much accelerated. The undertaking has been effected by a few private subscribers.

TELEGRAPHIC NEWS COMPANY.—A prospectus has been issued of the Home and Foreign Telegraphic News Company (Limited), with a capital of 20,000l., in 4000 shares of 5l. each, for the collection and supply of news to the various London and provincial news rooms, chambers of commerce, and the Press. This has hitherto been done by the telegraph companies, but when all the telegraphs are taken over by the Post Office this department will be abandoned, the authorities, under

the advice of Mr. Scudamore, confining their operations to the transmission of messages alone, leaving the collection and supply of news to others.

INJURY TO THE ATLANTIC TELEGRAPH.—An accident has occurred to one of the cables of the Atlantic Telegraph Company, about the locality of Heart's Content, near the locality of the accident. The injured cable is the one last used for communication between the two countries, and was interrupted by the accident.

THE ABYSSINIAN EXPEDITION.—Mr. M.P. for Sunderland, and chairman of the Committee, left Sunderland last week for London, with Captain Beaumont, M.P. for North Devon, proposes to make further inquiry into the expediency of an expedition to Abyssinia.

ANOTHER POLITICAL DEMONSTRATION.—A metropolitan demonstration is announced for Sunday in Hyde Park on Sunday, October 22, in connection with the movement for the unconditional release of Fenian political prisoners. It is stated that several Irish gentlemen of influence will be present. The demonstration is promoted by the London Amalgamated Society and Clerkenwell Reform League, and the Labourers' Society, a body numbering several thousands of men, and strictly composed of Irishmen. A committee has been appointed to attend to the arrangements, no effort is to be spared to make the demonstration imposing one, both in regard to influence and numbers. Several deputations from Ireland are also expected.

PROPOSED DIVISION OF THE DIOCESE OF WINCHESTER.—The Dean of Winchester, the Dean of Jersey, the Dean of Guernsey, the Archdeacon of Surrey and Winchester; the Rectors of Lambeth, Olave (Southwark), Streatham, Abbotts Risclosure, Holy Rhood (Southampton), Epsom, and beneficed clergy in the diocese of Winchester, have forwarded a memorial to the Prime Minister, that as the Bishop of Winchester has expressed an intention of resigning his see in October next, and is convinced that the occasion is such as to require consideration of a division of the diocese, and the consequence of the large revenues of the see which will be placed at the disposal of the Ecclesiastical Commissioners when the resignation of the present Bishop is completed, there seem to be peculiar advantages in carrying out such an arrangement. The memorial adds that it will be deemed sufficient ground for the present step to state that the population of Hampshire in 1861 was 481,515, that of Surrey exceeded 1,267,794, spread over an area of above a million and a half statute acres, and that the number of parishes exceeds 1000.

PROPOSED EXTENSION OF THE METROPOLITAN RAILWAY TO THE MANSION HOUSE.—An application was made by the Metropolitan Railway Company to carry the railway under the street to the Mansion House, instead of a station intended, stopping at Queen Street. The Company said that he had been consulted on the subject by Mr. Devon and Mr. Baxter, but that looking at the fact which the company had thrown in the way of the Board, owing to their not having been enabled to complete their works within the time originally contemplated, he was of opinion that they would accede to the proposition. He thought that the question whether it would be policy to discontinue large numbers of passengers at a point where the street was already congested, and that a station 200 yards from the Mansion House would be of no practical purposes for public use. Mr. H. L. Collinson hoped that the Board would not entertain the proposition. The company would require Parliamentary powers to go to the Mansion House, and the consent of the Board alone would not enable them to carry out the scheme. He moved that the proposition should be entertained. Mr. Collinson moved as an amendment that as the proposition involved matters affecting public convenience, it be referred to the general purposes committee for consideration. Mr. Cyrus Legg seconded the amendment, and after discussion it was carried by a large majority.

THE WIDENING OF PARK LANE.—At a meeting of the Board of Works a letter was read from a solicitor, stating that if the Board would repeal of the Act to open up Hamilton Place, it would widen Park Lane and pull down the Mansion House instead, a lady, whose name did not appear, would contribute 50,000l. for the purpose. The Chairman said that the provisions of the Act had no interest in the property, but simply to preserve the ornamental gardens of Hamilton Place, which she had enjoyed for the last 31 years. The Chairman said that the provisions of the Act had been obtained from Parliament which had been obtained most expensively, and therefore the offer, which was a most extraordinary one, could not be entertained. A clerk was therefore ordered to return a certificate of acknowledgment of the offer, and state the probability of its acceptance.

THE SOUTHERN EMBANKMENT.—It has been stated in some of the local journals that the Southern Embankment had been opened. It is now announced by the authority that this is not the case, but that the works are of opinion that it is not ready for opening to the public one month from the present date.

THE STATUE OF MR. PEARODY.—Mr. P. has addressed a letter to the committee who are in charge of Mr. Story's statue erected to his memory near the Royal Exchange, expressing his objections to the Prince of Wales, the American Minister, and others who took part in the inauguration, and stating

international character which was given to the... had been especially gratifying to him, the... had ever been which could tend to con-... the two great nations of England and... both of them very dear to him, and... at the present time. In conclusion

hope that the course of my life, now drawing... may justify when finished all the honours... have been so freely bestowed on me, of which this... and I cannot more strongly express my... to say that I do not believe there could be found... a kingdom a man of any rank, however high, wh... honoured by such a noble testimonial as you... to a humble American citizen."

FACTORY OF STEPNEY.—The Bishop of Lon-... appointed the Rev. Joseph Bardsley, Secre-... the London Diocesan Home Mission, to the... of St. Dunstan, Stepney, vacant by the death... of R. Lee.

REGISTRATIONS.—At the City Registration... on Friday a point was raised before the Revising... of considerable practical importance. A... claimed for his counting-house in Biliter... of two rooms, communicating inter-... each other, and entering from a door in a... stair, for which he paid a rent of 657. It was... these premises were not structurally... from the rest of the building. A long argu-... and the barrister took time to consider... it is said that about 800 other claims... this decision. At the same sitting the... barrister decided that a solicitor occupying... a house without structural severance, ... was not also described as a money scrivener, ... to be on the register, inasmuch... only specified counting-houses, and... was no dictum of any judge to say that... could be considered a counting-... Monday, however, a case was brought... which the Lord Chief Justice had in 1863... very point in favour of the solicitors. On... barrister annulled his former decision, ... that he would reinsert on the lists all... that had been struck off in consequence of... judgment. Mr. Gupin, M.P., was disallowed... on the premises of the National Freehold... Society. In most of the Metro-... Courts a good deal of trouble has been caused... understanding respecting the lodger claims, ... were on the list for last year not being... was too late that they must renew their... registration. In East Surrey a difficulty... arose as to overseers put on the lists those... the 127 franchise which were new, omit-... that had before been on the registrar, while... that the list of such voters shall be... from year to year. The Revising Barrister... to retain the names thus omitted, but as the... was important he offered to grant a case.

POOR-LAW BOARD AND THE ST. PANCRAS... —At a meeting of the St. Pancras... Monday, a letter was received from the... Board, embodying the substance of Mr. Bere's... late inquiry into the charges against... and the guardians, and giving the final... thereon. The Poor-law Board agreed with... in his opinion that the charges were due to... Mr. Herley's strong opinions, and strong but not... unworthy desire to carry his opinions into... Mr. Herley was very injudicious in the... he used, which conveyed a different meaning... which he intended. The Board acquitted him... motives, but did not agree with his opinion... ordinary patients should correspond in descrip-... of the in-patients of an hospital, and all the... ward-patients with the out patients. The letter... report were referred to the visiting committee... upon. Dr. Ellis was then called in, and... introducing the names of guardians into... his medical report-book. He was also... chairman that the Board was very anxious... resign. Dr. Ellis made no reply either... or the request, but simply bowed and... A resolution was passed, thanking Dr... for the reports he had drawn up in defence... and condemning Dr. Markham, Poor-law... whose conduct," it said, "towards Mr... of his own profession, they denounce as... unprofessional, and deserving of the severest... of the Poor-law Board."

EXTRACTION OF GAS FROM SEWAGE.—At the... meeting of the Metropolitan Board of... the present season on Monday last, Sir... alluded to a paragraph which had... in a new-paper to the effect that gas was... in India from sewage, inferring that the... might be obtained from metropolitan... He said that the writer ignored the fact that... sewage consisted principally of solid matter, ... which would render the cost of... too heavy to be of practical utility. At the... the Board would give very facility to... of the experiment upon the subject.

OF THE CARNATIC.—A letter from Cap-... of the Carnatic, which was wrecked on the... on the 12th ult., ascribes the loss of the... current off Jubal Island, which must... ship to the westward. He was on deck... ran on the reef, and though it would... on the islands in the ship's boats all... the vessel seemed so safe while she... among the rocks, that a committee... on inspecting the condition of the... with the request of the captain, ... that they would rather remain where they

were than attempt to go ashore. During the whole of... the 13th, therefore, all hands remained on board. Not... till the morning of the 14th were they piped away... The captain tells us that at 10 A.M. on that day he was... assisting some ladies into a boat, and the remaining... passengers were leaving the vessel in a quiet and... orderly manner, when she "suddenly slipped down... stern foremost, heeling over, and leaving the forepart... only out of the water." Concerning the manner in... which those who were lost came by their death the... narrative is very obscure, but a heavy surf appears to... have been beating on the shore, and some of the boats... were capsized in going through it.

FATAL FIRE AT BAYSWATER.—About three o'clock... yesterday morning a fatal explosion took place at 69, ... Moscow Road, Bayswater, occupied by Mr. Titheredge, ... dealer in fireworks and confectionery, which resulted... in the immediate death of two adult persons and five... children. The persons killed were three children of... Mr. Titheredge, Mrs. Jack, a lodger, her two sons and a... daughter, and the eldest son, who was a parochial... schoolmaster in the country, having come to town to... spend the holidays with his mother. Mr. Titheredge, ... who is an invalid, was severely burnt, but was rescued... by the next-door neighbour and taken to St. Mary's... Hospital, where he lies with little hope of his recovery... The house was entirely destroyed.

MURDER IN THE BOROUGH.—On Sunday morning... a murder and attempt at suicide was perpetrated in... Little Suffolk Street, Borough. A married man named... Martini, a Spaniard, with five children, made the... acquaintance of a young married woman named... Johnson, who had separated from her husband. It... seems that the girl was transferring her favours to a... third man, which so enraged Martini that he cut her... throat in her sleep, attempted ineffectually to cut his... own, and then went and gave himself up at the police-... station. The inquest was held on Tuesday, and as the... murderer had sufficiently recovered to appear before... the magistrate, the charge was also investigated at the... police-court. The evidence adduced was much the... same in both cases. The coroner's jury returned a... verdict of Wilful Murder, and the magistrate com-... mitted him for trial on the same charge.

THE PUBLIC HEALTH.—The Registrar-General's... Weekly Return states that in the week that ended on... Saturday, Sept. 25, 4720 births and 2982 deaths were... registered in London and in 13 other large towns of... the United Kingdom. The annual rate of mortality... was 24 per 1000 persons living, being 22 per 1000 in... London, 19 in Edinburgh, 24 in Dublin, 21 in Bristol, ... 23 in Birmingham, 23 in Liverpool, 25 in Manchester, ... 24 in Salford, 27 in Sheffield, 25 in Bradford, 28 in Leeds, ... 26 in Hull, and 24 in Newcastle-upon-Tyne. In... Paris the annual rate, in the same week, was 23 per... 1000. In London the births of 1144 boys and 1108... girls, in all 2252 children, were registered in the... week. In the corresponding weeks of 10 years, ... 1859-68, the average number, corrected for increase... of population, was 2110. The deaths registered in... London during the week were 1362. It was the 58th... week of the year, and the average number for that... week, corrected for increase of population, was 1282... The present return is therefore 80 above the estimated... amount.

Provincial.

ATHERSTONE.—At the Warwick Assizes in March... last Michael Adkins, a miner, was sentenced to death... for the wilful murder of his wife at Baddesley Endors, ... near this town. A petition praying for a respite of the... capital sentence was presented, and on the eve of his... execution the prisoner was respited during her Ma-... jesty's pleasure. The governor of Warwick Gaol has... now received a communication from the Secretary of... State, commuting the sentence of death to 12 months'... imprisonment, with hard labour, from the date of the... conviction.

BIRMINGHAM.—On Monday evening Mr. C. Dickens... delivered the inaugural address at the opening of the... winter session of the Birmingham and Midland... Institute, in the Town Hall. The hall, which is... capable of containing 3000 persons, was densely... thronged, the majority of the audience being ladies. ... Mr. Dickens, on taking his seat on the platform at eight... o'clock, was loudly cheered. In the course of his address... he dwelt in eloquent terms on the advantages which... had been conferred by the institution, referring to... several instances in which distinction had been attained... by its pupils. He exhorted the students to have the... courage to be ignorant of a great number of things, in... order that they might avoid the calamity of being... ignorant of everything; adding that such imagination... and invention as he happened to possess would never... have served him as they had done had they not been... accompanied by the habit of commonplace, humble, ... drudging attention. A vote of thanks to Mr. Dickens, ... moved by Mr. Dixon, M.P., having been unanimously... passed, Mr. Dickens, in reply, said that he would take... that opportunity of discharging himself of his whole... political creed, which was that his faith in the people... governing was infinitesimal; his faith in the people... governed was illimitable.

BRISTOL.—The 13th annual meeting of the National... Association for the Promotion of Social Science was... opened in this city on Wednesday, under the pre-... sidency of Sir Stafford Northcote, M.P., and will be... continued until the 6th inst. The Bishop of Gloucester... and Bristol preached the opening sermon in the... Cathedral, after which Sir S. Northcote delivered his... inaugural address, in which he dilated on the improve-... ment of the law, the promotion of national education, ... and the better care of the people's health—subjects, he... said, on the right method of doing which the public... mind was not made up, and on which public opinion... was apt to be largely influenced by the discussions of... the Conference. On Thursday the Congress divided

itself into four departments, in each of which special... questions were brought forward for discussion, intro-... duced by papers selected for the purpose by the Council. ... The first department—Jurisprudence and Amendment... of the Law—was under the presidency of the founder... of the Association, Mr. G. W. Hastings, and had a... section on the reformatory question, presided over by... Sir J. Eardley Wilmot. The second, or educational... department, was presided over by the Rev. Canon... Kingsley, and dealt with the various questions relating... to education, whether of the upper, middle, or lower... classes of society. The third, or health department, ... under Dr. J. A. Symonds, was devoted to the various... questions relating to the public health. The fourth... department related to economy and trade, and was... presided over by the Right Hon. S. Cave, M.P. Excursions... have been planned to the Bristol training-ship, the cliffs... and caverns of Cheddar, the Wyndoliff and Tintern Abbey.

BOLTON.—On Saturday a man named Henry... Whittle, aged 48, a weaver at Westhoughton, five miles... from this town, murdered his daughter-in-law, with a... hatchet, and then cut his own throat. He had been... residing at the house of his son, a collier, in Chapel... Walks, and since the marriage of the latter, on New... Year's Day, he had frequently quarrelled both with his... son and his daughter-in-law, and a fortnight ago had... threatened to murder them. They had consequently... told him to seek a home elsewhere, and in revenge he... murdered the woman in his son's absence. He then com-... mitted suicide. He bore a bad character in the village, ... and had been sent to prison for assaulting his wife, ... from whom he had lived apart for several years. At... the inquest on Tuesday the jury returned a verdict... that Ellen Whittle was murdered by her father-in-law, ... Henry Whittle, and that the latter afterwards com-... mitted *felo de se*.

EXETER.—On Friday the remains of the Bishop of... Exeter were interred by the side of his wife, in the... churchyard of St. Mary's Church, near Torquay. Upwards... of 150 of the clergy of the diocese, besides several... thousand spectators, were present. The cere-... mony was performed by the Dean of Exeter, and the... funeral was of a very simple character. The coffin was... borne to the grave on the shoulders of six old men, who... were in the employ of the late prelate. Archdeacon... Phillpotts was the chief mourner, and was accom-... panied by his brothers and sisters and other members... of the family.

HOUNSLOW.—On Saturday afternoon William... Smith was brought before the magistrates, at petty... sessions, charged with the wilful murder of his wife. ... It appeared that the man had been away from home... for several weeks in search of work, and that during... his absence his wife had been carrying on an intrigue... with some of the soldiers in Hounslow barracks. When... he returned he found his wife drinking with some... soldiers in a beer-house kept by her sister. This... led to a quarrel, and on her attempting to run upstairs... he followed, and struck her on the head with some... heavy weapon. She fell to the foot of the stairs, and... when picked up was found to be dead. The prisoner... then ran out of the house, but was afterwards captured... by the police. The magistrates committed the prisoner... for trial for Wilful Murder, and expressed themselves... with great severity against the deceased's sister and her... husband, who allowed the dead body to lie at the foot... of the stairs for three hours without sending for either... a doctor or a policeman, while they went on drawing... beer and serving their customers as if nothing had... happened. At the inquest on Tuesday it appeared... from the medical evidence that the injury to the skull... was probably the result of a fall, and not of a blow. ... Ultimately the jury returned a verdict of "Man-... slaughter against William Smith under circumstances... of great provocation."

JERSEY.—Considerable excitement has been caused... in this island by the prediction of a great tidal wave... for the 6th inst. Numbers have prepared to leave the... island to avoid the threatened catastrophe. These... apprehensions have been in some measure shared by... the military authorities, who felt anxious about the... safety of the troops occupying Elizabeth Castle, which... stands many feet above high-water mark. A com-... munication made to the Board of Trade for informa-... tion on the matter, was forwarded to the Meteorological... Office, whence an assurance has been transmitted to... Jersey that no danger need be apprehended, as there... was no reason to believe that the tidal wave would... attain a greater height than a few feet above the... ordinary spring tides. The Lieutenant Governor... caused the communication to be published, which had... a somewhat reassuring effect on the minds of the... public.

KINGSTON.—The Home Secretary has granted a full... pardon to Archibald Brown, who was sentenced at the... spring assizes in 1863, to five years' penal servitude for... forgery. The prisoner, who was only 16 years of age, ... was the son of a deceased gentleman at Surbiton, and by... means of forged cheques obtained a considerable sum... of money from Messrs. Shrubsole's bank in this town. ... The condition of the pardon is that the prisoner shall... immediately quit England, and remain abroad during... the remainder of the five years.

LEDSHAM.—On Monday week, after a harvest... thanksgiving at the parish church, a man named... Richard Kellett, foreman to Mr. Morrett, a farmer in... this place, was attacked with such violence by a number... of Irish labourers or harvesters, that he was found... dead in a footpath of the road leading from Ledsham... to Leeds. Three Irishmen were taken into custody... on suspicion of being concerned in the outrage. The... jury, however, at the inquest on Tuesday, returned a... verdict of Wilful Murder against some person or... persons unknown.

LEEDS.—An inquest was held at the Town Hall on... Monday on the body of Priscilla Sunter, the wife of a... miner and beer-house keeper at Whitkirk, near this

town. The deceased had only been married to the prisoner about two years, and had been so systematically beaten and ill-used that she had been obliged to leave his house on several occasions, and in one instance appealed to the magistrate for protection, when her husband was sent for three months to prison. Numerous witnesses were called to testify to the complaints the deceased had made to them of the brutal conduct of her husband, and the jury having returned a verdict of Wilful Murder against him, he was committed for trial at the assizes.

LIVERPOOL.—On Tuesday, in the large hall of St. George's Hall, the Mayor inaugurated a statue of the Earl of Derby, executed by Mr. Tneed, at a cost of 1000*l.*, for the Corporation, as an acknowledgment of his lordship's gift of the Derby Museum to the town. The statue is of heroic size, executed in Carrara marble, and is an excellent likeness. At the same time the Mayor also unveiled a statue of Mr. Joseph Mayer, of Liverpool, which has been executed for the Corporation in Carrara marble by Fontana, and placed in the hall in commemoration of Mr. Mayer's gift of his valuable museum of historical art to the town.

PONTYFRIDG.—A conference of miners was held in this town on the 16th ult., and was fully attended by delegates from Glamorgan and Monmouth. Mr. Pickard, agent for the South Lancashire Miners' Union, urged the formation of a union for the defence of the miners' interests. He said that what was wanted was an understanding between masters and their men. Competition was now so great that the interests of the working man were thrown aside. A compulsory mines inspection now was needed, and an extension of the provision of the Factory and Workshops Regulations Act should be made applicable to the children of the miners. The only effectual way of obtaining these things was by combination. The whole of the 52 delegates, representing 11,000 men, reported a general disposition to combine, and a union was then formed and an executive appointed.

STALEYBRIDGE.—At the inquest on the bodies of James and Alice Schofield, who were found dead at Micklehurst last week, the jury found, as regarded the death of the woman, a verdict of Wilful Murder against James Schofield; and with regard to the latter a verdict of *felo de se*.

WATFORD.—The Earl of Clarendon, Minister of Foreign Affairs, was present on Monday at the annual dinner of the West Hertfordshire Agricultural Association, and spoke as follows on the Irish land question, and the prospects of peace:—

"There is coming on a great occasion on which the two Houses of Parliament may unite in harmonious action. The question of the tenure of land in Ireland is a momentous, a vital, and not a party question. I do not say that it is not a party question by way of modifying opposition. The party that is in power always preaches to the party out of power moderation and not to be factious. That is a very old system, and one that is systematically disregarded. But I say that it is not a party question, because each successive Government, Liberal or Conservative, has faithfully promised, has sincerely attempted, and has signally failed to legislate for Ireland upon the question. The necessity still exists. It is not a party question, it is acknowledged here and more every day, and I therefore do not see why men of all parties, with honest purposes and calm moderation, should not unite together to produce a measure that would be perfectly satisfactory. There is no evil without a remedy; and there are evils connected with the tenure of land in Ireland that must be abated. The great problem to solve is to do justice to the many and to do injustice to no one. I admit that the solution of such a problem is difficult, but it is not impossible. Indeed, I think that the word 'impossible' should be erased from the vocabulary of every public man when remedial measures are in question, and more especially when the question is the application of them to Ireland. You will not expect to learn from me what course the Government intend to pursue, and, indeed, I think that if I told you that their minds were made up and that there was a Bill ready, you would receive the information with surprise and dissatisfaction, because you would feel sure that in the two months which have passed since Parliament was prorogued the amount of information, of statistics, and of data necessary for the formation of a judgment could not have been collected, and that if any determination had been taken already it would be crude and imperfect. But, although I will not tell you what the Government will do, I will tell you what they will not do. They will not adopt any of those wild and subversive schemes of which we have heard so much during the last few days. I cast no blame upon those who bring them forward. They, likely enough, may believe in the possibility of the accomplishment of what they propose; but I say that they are enemies of equitable settlement, which is the only settlement we can look forward to; and those who strive and labour to excite expectations that are extravagant and cannot be realised are no friends of the Irish people. But the Irish people, whatever may be their faults, are not fools. They are a quick-sighted people, and when the time comes I shall expect they will be amenable to reason, if that which is just and practicable is offered to them. I have now the honour of addressing practical men, and I would ask any gentleman here present to take a farm at will on which the landlord never did, and never intended to do, anything. Then, suppose he built upon that farm a house and a meadow, erected fences, and drained it, and was then turned out at six months' notice by the landlord, who took to himself the whole benefit of the tenant's labour and expenditure. I ask if there could be language strong enough in this country—in those meetings that are now being held, and in the Press—to condemn the felonious act of such a landlord as that. Far be it from me to say that any such proceedings are resorted to on the large and well-managed estates in Ireland, of which I could give you a long list. But the power does exist. It is too often exercised, and it ought to be abated, because so long as it exists there can be no confidence between landlord and tenant. I do not say that exceptional legislation may not be necessary with reference to the wants, the wishes, and the usages of an agricultural people like the Irish; but I believe that if the rights of property are scrupulously upheld, and its duties rigidly enforced by law, a measure will be produced which will entitle the Government and Parliament to say they have fulfilled their obligations and entitle them to the support and praise of every honest man. Before I sit down I ask your leave to be an exception to the prohibition of alluding to political matters, but at the same time I promise you it shall produce no dissent and not call for any reply, because the word I wish to say is not upon domestic, but upon foreign politics. In the office I have the honour to hold, I am not only enabled but compelled to know much of what passes in foreign countries and in the councils of foreign

countries. I have been for some time on the Continent, and I returned last week. I had there the opportunity of collecting opinions, and I have seen some persons who exercise no little influence on the destinies of Europe, and, although I have not the gift of prophecy, though I do not pretend to see farther into futurity than other men, yet I cannot help, on this occasion, expressing my belief that at no time within the last three years—at no time since the war between Prussia and Austria—have we had a fairer prospect of maintaining the inextinguishable blessings of peace."

WINDSOR.—The Prince of Wales has intimated his intention of discontinuing to keep his pack of harriers. In making, through Lord Bridport, this announcement to the farmers in the neighbourhood, over whose grounds the harriers have principally hunted, his Royal Highness has expressed his warm thanks for the courtesy they have always shown him, as well as for the liberal feeling they have evinced for so long a period by permitting the hounds to hunt over their land.

Ireland.

THE LORDS OF THE ADMIRALTY AND THE LORD-LIEUTENANT AT CORK.—The Channel fleet with the Lords of the Admiralty arrived at Queenstown on Monday. They had weathered the gale, but the Northumberland lost two men overboard. The Lord-Lieutenant also arrived at Cork on Monday, and was cordially received. The Corporation presented an address praying for the release of the Fenians, to which his Excellency replied that the petitions were receiving consideration from the Government. The Lord-Lieutenant then drove to Fota, the residence of Mr. Smith Barry, M.P., where he remained on a visit during his stay in Cork. On Tuesday the Cork Farmers' Club presented an address to the Lord-Lieutenant, praying for the release of the Fenian prisoners, and also for legislation on the land question, which, while securing a fair rent to the landlord, would enable the tenants to live on their farms and not compel them to emigrate. In the evening the Corporation entertained his Excellency at a banquet, at which he spoke of the facilities of Cork Harbour and the enterprise of its citizens, and said that for the development of the country's resources they should depend less on the expenditure of the public money than on self-reliance. Relative to the Fenian conspiracy, and replying to amnesty addresses, his Excellency said their grievances were not to be redressed by acts of violence, but in Parliament. During the day a deputation of the Queenstown Town Commissioners waited on the Lords of the Admiralty, and presented an address, urging the speedy completion of the docks. Mr. Childers replied that the Government had spent the full proportion of the aggregate estimate for such works on Haulbowline Dock. On Wednesday the Lord-Lieutenant, with the Mayor, visited the Exchange. His Excellency, accompanied by Countess Spencer, the Mayor, and others, then went down the river and inaugurated the naval docks at Haulbowline. A banquet was afterwards given by the Lords of the Admiralty on board the *Agincourt*.

THE MARQUIS OF HARTINGTON ON THE LAND QUESTION.—At the dinner of the Lismore Farming Society, on Friday, the Marquis of Hartington, who presided, spoke on the land question. He said:—

"While carefully disclaiming any intention of speaking for the Government, tenant-farmers should look at the question not only from their own point of view, but from that of land-lords, labourers, and the general public. Englishmen would never consent to deprive, without adequate compensation, persons of rights legally acquired, which they have not palpably misused. Tenant-farmers should be prepared to show how they propose to compensate landlords or guard their rights. Parliament would not legislate on the question unless satisfied that it would be for the advantage of labourers as well as farmers, who should show that the legislation proposed would be as good for labourers as themselves. It was to the public interest that land should be most effectively cultivated, and farmers solvent, and farmers should show that under the proposed legislation Ireland would be made to produce as much as under the best system of agriculture. If farmers did not view the question thus, they would find by bitter experience that Parliament would be less disposed than ever to legislate for the benefit of one class alone."

CARDINAL CULLEN ON THE LAND QUESTION.—Cardinal Cullen arrived at Wexford on Tuesday, and was presented with several addresses. In replying to one he said:—

"By remaining united, by so moderating our demands that, founded on justice, and not interfering with the legitimate rights of any class, they may tend to the well-being of the State, we may rest assured that the day is not far distant when the industrious tenant may enjoy in undisturbed tranquillity the honest earnings of his labour, and the Catholic parent have the means of educating his children according to the teaching of his own Church, without sending them to model schools or Queen's colleges, and exposing them to the dangers of imbibing pernicious doctrines."

THE LAND QUESTION.—A meeting, attended by 2000 persons, was held on Wednesday in the Market Hall, Tipperary, to discuss the land question. The Rev. Dr. O'Connor, C.C., presided. Very violent speeches were delivered by Dean O'Brien and Mr. Butt. An address to the people was adopted, denouncing landlord power of eviction as fatal to the peace of the country, and destructive to property; perpetuating war of classes; admitting landlords' right to increased rent when the circumstances of the country, tested by the price of produce, warrant it; and calling on all classes to join in an effort to emancipate the people from the slavery of the present land tenure.

THE ATTEMPTED MURDER OF CAPTAIN LAMBERT.—The Lord Chief Justice on Monday opened the special commission at Galway for the trial of Barrett, charged with the attempt to murder Captain Lambert. The town was greatly thronged. Upwards of 200 jurors were summoned. The Chief Justice, in charging the grand jury, said he believed that this and all similar outrages originated from an agrarian spirit, and that the instigators and perpetrators designed to drive landlords

away by terror, in order that they might have the land free of rent. He counselled the grand jury to be dismayed, but to remain in the protection of Government. The trial proceeded with. The array was returned, and the challenge of Attorney-General stated the case. We insist on evidence was given. The effect that prior to the array Barrett reached Athlone another in Captain Lambert's grounds, being recalled, swore that he was fired at. The Solicitor-General's court rose. On Thursday the jury being discharged with a verdict after being locked up three days for acquittal and three for a verdict was adjourned to the 14th of next month will again be put on his trial. A juror called Jackson, who was one who dissented from acquittal, was pelted with stones. He took refuge in barracks, the sentry of which was shot through the town had their carriage with stones. Nobody was injured. The town was quiet. Captain Lambert was guarded during the trial by a large force of two disguised constables have been

THE FENIAN PRISONERS.—On Monday a meeting was held at Cork, to demand amnesty for the Fenian prisoners. The meeting was headed each by a band and banner, and a military array to the City Park, each with a green sash or rosette. Mr. Brian O'Connell presided, and there were five towns on the platform, including ex-Mayor O'Sullivan. Resolutions, which were of the usual nature, were passed unanimously. A similar meeting was held at Inchicore, near Dublin. About 1000 persons said to have been present, accompanied by bands, and followed by large crowds. The speakers were:—Dr. Waters, of the *Irishman*; Mr. J. Reilly, barrister-at-law; Mr. Eagan. Resolutions were passed in favour of the release of the prisoners. On Monday the Abstinence Society, which recently presented Gladstone a memorial to the Queen for the release of the Fenian prisoners, received a letter from Gladstone's private secretary, acknowledging the memorial and engaging on Mr. Gladstone's part to pledge the Government to any proposal which "felt bound in justice to render his terms loyal and becoming terms in which the Government had approached the Throne, and the true character to the offences and appearance of the persons now in confinement."

Scotland.

THE LORD JUSTICE CLERK.—All doubts as to the fate of the Lord Justice Clerk are at an end. The worst apprehensions have been realised. The body was found on Friday in the River Clyde, a little below the Bridge of Buchanty, and was drawn from a pool in which it was at the bottom. It would be found. The body was drawn from a creper, which had caught hold of the right hand. There was a deep gash in the forehead of the deceased, showing that he had been struck on his own hand. The body, which was dressed in black clothes, was at once removed to the House.

THE COURT OF SESSION.—Mr. Moncrieff, advocate, has been appointed to the office of Lord Justice Clerk of Scotland, in room of the late Mr. Clerk.

RESIGNATION OF BISHOP TERROT.—The resignation of Edinburgh (Dr. Terrot) has resigned his office. The election of his successor must take place in a few weeks.

THE WALLACE MONUMENT.—On Saturday last the national monument to Sir James Wallace, erected on the Abbey Craig, near Stirling, was handed over by the committee of subscription to the Provost, magistrates, and Town Council. The future custodians of the structure were the magistrates and other officials mentioned in the resolution from the Corn Exchange, and proceeded to the Wallace Street and Stirling Bridge to the monument where they met the monument committee. A ceremony was performed in the afternoon in the presence of about 1000 persons, Lord Jerviswoode presiding. Mr. Moncrieff, secretary, read a report, which stated that the cost of the monument was resolved upon and that the foundation-stone was laid in June. After many difficulties had been overcome, the monument had at last been completed, at a total cost of 1*l.* 8*s.* 8*d.* The amount subscribed was 1000*l.* leaving a deficiency of nearly 1000*l.* The estimate of the cost of the monument was 1000*l.* The committee, in concluding their report, said:—"We have had no other object in view than to carry out our countrymen's wish and to share to the long-neglected but illustrious memory of the great champion of Scotland—William Wallace." On the same day a committee was appointed to deal with the remaining business affairs connected with the monument. Lord Jerviswoode, the convener of the committee, then formally handed over the monument

Obituary.

PATTON, Lord Justice-Clerk of Scotland, whose death and suicide has been noticed in our columns, was born in 1793. He was educated at the University of Oxford. In 1828 he was called to the Scotch bar, where he soon obtained a high reputation, being especially noted at one time for his success in cases in which he was engaged...

weeks, having been elevated to the bench as successor to Lord Robertson. Lady Augusta Westmoreland, sister of the Marquis of Ailesbury, died on the 29th inst., at Westworth Castle, near Bathurst, in her 74th year. The ladyship was born in 1794, and married in 1816, Mr. Frederick William T. Vernon Westmoreland of Westworth Castle, Yorkshire.

GENERAL PHILIP HARRIS, commanding the Allahabad division, died suddenly on the 31st ult., of cholera, brought on by the labour and exposure he had undergone in providing for the health and comfort of the troops of Allahabad, during the recent long and severe visitations of cholera. He visited one or more hospitals (often distant several miles from the station) every day, and on these visits addressed kind and cheering words to every suffering patient in hospital. He was attacked at 4 in the morning, and died a few minutes to 10 in the afternoon.

MAJOR JOHN JESSOP, C.B., of Butterley Hall, died a few days since in his 90th year. He joined the 44th Regiment as ensign in 1799, served through the Egyptian campaign, was at the landing at Aboukir, and at the battle of Alexandria when Abercrombie was killed. He afterwards served through the Peninsular War, and was present at the action on the Coa, at Fuentes d'Onor, and at Barba del Puerca. He also served in the campaign in Holland, being on the Staff of Lord Lynedoch, and was Assistant Quartermaster-General at the battle of Waterloo, where he was wounded. Soon after the peace he retired from the army. He married in 1818 the second daughter of the Rev. T. de Burg, by whom he had a daughter, who died in 1844, and two sons, Mr. William Jessop, of Butterley Hall, and Mr. John Jessop, both of whom survive him.

THE REV. CANON BLOOMFIELD, M.A., one of the oldest clergymen in the diocese of Peterborough, died a few days since. He was educated at Sidney Sussex College, Cambridge, where he took his B.A. degree in 1808. He was ordained in 1809, and having served various offices in the Church, was nominated in 1814 by the Duke of Rutland to the vicarage of Bisbrooke, near Uppingham, which he held to the time of his death. In 1854 he was nominated by Bishop Deane to an honorary canonry in Peterborough Cathedral. He was the author of a well-known edition of the Greek Testament.

THE REV. DAVID EMERTON, for many years principal of Hanwell College, and lately chaplain of the Galignani Hospital, and acting chaplain to the British Embassy, died in Paris last week. He was a man of considerable literary attainments, and had devoted much time and attention to the subject of international education.

WILLS.—The will of Lord Taunton has been sworn under 140,000l. personality; Mr. David Jones, late M.P. for Carmarthen, 60,000l.; Mrs. Harriet Richardson, of Lombard Villas, Greenwich, 25,000l.; Mr. Richard Greaves, of Warnford Court, stock and sharebroker, 20,000l.; Thomas Holdsworth Brooking, of New Broad Street, merchant, 50,000l.; Mr. Benjamin Edgington, of Duke Street, Southwark, and the Elms, Upper Tooting, marquee, tent, rickelath and improved tarpauling manufacturer, 120,000l.

Markets.

HAY.—Per Load of 36 Trusses. SMITHFIELD, Thursday, Sept. 30. Trade firm. Supply short. Prime Meadow Hay 80sto 90s 120s to 132s Inferior do. 60 70 90 100 New do. 80 90 100 110 Inferior do. 50 60 70 80 Straw 30 38 CHARLES JAMES EASTON. CUMBERLAND MARKET, Thursday, Sept. 30. Sup. Meadow Hay 90s to 100s Inferior Clover 100s to 115s Inferior do. 65 84 New do. 80 90 Straw 34 40 Superior Clover 112 135 JOSHUA BAKER. COVENT GARDEN.—Oct. 2. Stocks have accumulated to a great extent, and a thin attendance of buyers renders it necessary to force the trade, especially in articles not in general consumption. Good Lisbon Grapes can now be had, at prices varying from 6l. to 1s. per lb. Pears comprise the sorts named last week. Choice varieties of Apples are somewhat scarce. Flowers

chiefly consist of Malagoutana, Mignonette, Pacheta, Litheme, Aetosa, Nodium spectabile (Familiar of garden) Valeriana purpurea, and a few Primulas.

FRUIT.

Apples, p. 3 sieve, 1s to 1s 6d. Pigs, per doz., 2s to 4s. Filberts, per lb., 6d to 1s. Grapes, per lb., 1s 6d to 2s. Lemons, per 100, 2s to 3s.

VEGETABLES.

Artichokes, green, p. doz., 1s to 2s. Beans, Kidney, p. 4 sieve, 3s to 4s. Beet, per doz., 2s to 3s. Broccoli, p. bunch, 1s to 1s 6d. Brussels sprouts, p. 4 sieve, 3s to 3s 6d. Cabbages, per doz., 1s to 1s 6d. Carrots, per bunch, 6d to 8d. Cauliflowers, p. doz., 1s 6d to 2s. Celery, p. bunch, 1s to 1s 6d. Cucumbers, each, 6d to 1s. Endive, per doz., 1s 6d to 2s. Garlic and Shallots, per lb., 8d. Herbs, per bunch, 2d to 4d.

LEADENHALL POULTRY, &c.

Geese 4s to 6s. Goallings 4s to 6s. Turkey 4s to 6s. Turkey pullets 4s to 6s. Ducks 2s to 3s. Ducklings 2s to 3s. Surrey Fowls, couple, 7s to 8s. Do. chickens 8s to 10s. Barn-door Fowls 8s to 10s. Leverets 1s to 2s. Pigeons 1s to 2s. Tame Rabbits 1s to 2s. Wild Rabbits 1s to 2s. Partridges 1s to 2s. Hares 1s to 2s. Green 1s to 2s. Quails 1s to 2s. Fuglish Eggs, p. 100, 9s to 10s. Foreign do 8s to 9s. Fresh Butter, 1s 6d to 1s 8d per lb.

METROPOLITAN MEAT MARKET.—Best Fresh Butter 16s. per dozen lb. Second do. 15s. Small Pork, 5s. 6d. to 6s. 6d.; Large Pork, 4s. 6d. to 5s. 6d. per 8 lb.

METROPOLITAN CATTLE MARKET.

MONDAY, Sept. 27. We have a larger supply of Beasts and a dull trade; prices for all descriptions are lower and several lots remain unsold. The number of Sheep is about the same as on last Monday. The demand has increased, and prices on the average are lower. The trade is very much worse for Calves. A few choice Lambs make about the same as on Thursday last. Our foreign supply consists of 2100 Beasts, 2010 Sheep, 222 Calves, and 20 Pigs, from Ireland there are 230 Beasts and 2500 from the Midland and Home Counties. Best Scots, Herefords, &c. 4 8 to 5 0. Best Shorthorns 4 6 to 4 10. 2d quality Beasts 2 8 to 3 4. Best Downs and Half-breds 5 0 to 5 4. Do. Shorn 4 0 to 5 0. Beasts, 4734; Sheep and Lambs, 19,640; Calves, 800; Pigs, 100.

MARK LANE.—Monday, Sept. 27.

There was only a moderate supply of English Wheat to this morning's market, and the sales made were at a reduction of 1s. to 2s. per qr. on last Monday's rates. The attendance was good, but the business transacted in foreign Wheat was very small, at 1s. per qr. decline on the week. Barley of all descriptions was steady in price, but a slow sale. Beans and Peas were without change. Oats were 6d. per qr. lower. Flour was dull of sale, at a decline of 1s. per sack for country marks, and 6d. per barrel. New Mustard seed sold at 12s. to 12s. 6d. per bushel, according to condition.

PRICE PER IMPERIAL QUARTER. WHEAT, Essex, Kent, Suffolk, White 45-50 Red 41-45. Foreign 47-54. BARLEY, grind. & dist., 3s to 3s 6d. OATS, Essex and Suffolk 25-33. RYE, Foreign 39-41. BEANS, Mazagan 39s to 41s. PEAS, White, Essex, and Kent 40-42. MAIZE, Foreign 29-30. FLOUR, best marks delivered per sack 43-47.

FRIDAY, Oct. 1.

Millers and dealers expecting a further reduction of Wheat have deferred purchasing, and as the deliveries were in excess of the consumption the trade has been dull, and where sales were forced a reduction of 1s. per qr. on old and 2s. on new Wheat, both homegrown and foreign, has been admitted to, but during the last day or two less pressure to force sales has been manifest. The value of spring corn of all descriptions has given way, but the reduction has been small.

and hardly in any case more than about 6d. per qr. on Barley, Beans, Peas; new Oats, however, declined 6d. to 1s. per qr. in several markets. Flour was much neglected, and 1s. per barrel and sack cheaper, with a very slow sale. Birmingham quotes a reduction of 3s. 4d. per sack. Since Friday last 92 grain and seed-laden vessels have arrived off the coast, of which, with those left over from last week, there remained for sale last night 82 cargoes. The floating trade, owing to the increased supply, showed depression during the preceding week, and arrived Wheat sold at 1s. to 2s. per qr. less money. Maize was about 6d. to 1s. per qr. cheaper. Barley a quiet sale. In Rye there was nothing doing. In cargoes on passage and for forward shipment but very little business has been done, and prices remain nominal. Paris, Sept. 30.—Wheat is in very limited demand, and prices lower. Flour a dull trade. The eight marks are quoted 3s. 6d. per 250 lb. The stock at the Halle is estimated at 4215 cwts.

The arrivals of all descriptions of English grain this week have been small, and of foreign to a fair extent. There was a very poor attendance at this morning's market, and scarcely any business transacted; prices are nominally the same as on Monday, but to effect sales a decline of fully 1s. per qr. would have to be submitted to. With the exception of prime malting Barley, which was in fair demand, all descriptions of spring corn must be quoted rather lower. New Oats sold at 6d. to 1s. per qr. less money.

MANCHESTER, Sept. 30.—Since our last report the trade has continued inactive, and prices have ruled generally in favour of buyers in the limited business passing. From abroad the imports into Liverpool have again been large of Wheat, Flour, and Indian Corn, and fair of Beans. From Ireland the receipts of Oats and Oatmeal have increased. At our market this morning English Wheat met a slow sale, at a decline of 1s. per qr., and foreign must be noted 2d. per cental lower. The demand for Flour was limited, at a reduction of 6d. and 1s. per sack. Oats receded 1d. to 2d. per 45 lb., Egyptian Beans 6d., and Indian Corn 6d. per qr.

SEED MARKET.

The seed trade still rules very quiet, excepting for those few kinds required for present use. Winter Tares are in fair demand at high rates. For Trifolium incarnatum small orders come to hand, which are executed at the late advance. Canary seed, owing to the arrivals of new foreign, is a little easier. Of Hemp seed the stocks are now quite exhausted; a supply of new Dutch will, however, be on the market in the course of a few days. There has lately been more doing in Clover seed, and several parcels of fine quality have changed hands. Red Clover and Trefoil seeds excite just now but little attention. We have a good inquiry for old feeding Tares. Foreign Linseed sells steadily, without change in value. New French Italian is in fair request. Mustard, Rapeseed, winter Barley, Oats, and Rye are without alteration. New garden Peas and Beans are now beginning to come to market.

JOHN SHAW & SONS, 16, Water Lane, E.C.

ENGLISH WOOL.

We have had a very quiet market, without any improvement in prices.

THE BISHOPRIC OF EXETER, vacant by the death of Dr. Phillpotts, has been conferred on the Rev. Dr. Temple, Head Master of Rugby School, one of her Majesty's Chaplains, and the author of the introductory essay in the two celebrated volumes of "Essays and Reviews" and more recently of some "Sermons," preached in the chapel at Rugby.

THE BISHOPRIC OF CARLISLE.—It is stated that the bishopric of Carlisle has been offered to Archdeacon Durnford, Archdeacon and Canon of Manchester, and Rector of Middleton, Lancashire.

THE VACANT LORD JUSTICESHIP.—It is understood that Vice-Chancellor James will be appointed successor of the late Lord Justice Selwyn as one of the Lords Justices of Appeal in Chancery.

THE COMMAND-IN-CHIEF IN INDIA.—It has been announced that Lord Napier of Magdala will succeed Sir William Mansfield as Commander-in-Chief in India. The latest news from India says that the Government have asked Sir W. Mansfield to retain his office for another year.

SCOTTISH LAW APPOINTMENTS.—Mr. Moncrieff, the Lord-Advocate, has been appointed Lord Justice-Clerk, in the room of the late Mr. Paton, and Mr. George Young, M.P., Solicitor-General for Scotland, has been appointed to succeed him as Lord-Advocate. Another vacancy has occurred on the Scotch bench this week, by the sudden death of Lord Maner.

PARLIAMENTARY MOVEMENTS.—The Gazette of last night contained a proclamation further proroguing Parliament till December 23 next. The nomination Parliament took place at Maccolesfield on Wednesday, when Mr. Cunliffe Brookes and Sir E. Watkin were proposed, the former in the Conservative, the latter in the Liberal interest. The show of hands was declared to be in favour of Sir Edward Watkin, and a poll was demanded for Mr. Brookes. The Scottish Universities Union, on Saturday, resolved unanimously to invite Mr. John Stuart Mill to become a candidate for the Universities of Glasgow and Aberdeen, and to bring forward Dr. Prosser James for the Universities of Edinburgh and St. Andrews, in the event of Dr. Laonel Playfair being appointed Master of the Mint. The Liberal party in Glasgow are desirous of bringing forward Mr. Arolabald Smith, of Jordan Hill, as a candidate for the Universities of Glasgow and Aberdeen, but have postponed a final decision till after consultation with the Liberals of Aberdeen. The Conservative element in London have formed a committee to promote the election of Mr. Gordon, the late Lord-Advocate, for these universities. There is a vacancy for Waterford caused by the appointment of Mr. Blake to be a Commissioner of Fisheries. Mr. J. Stuart Mill is mentioned as a candidate for Tipperary.

THE ELECTION COMMISSIONS.—The Cashel and Sligo Election Commission was opened on Tuesday. The Bridgewater, Norwich, and Beverley Commissions are still sitting. At Bridgewater, on Wednesday, Mr. Westropp, who on the previous day refused to disclose the names of two ladies who furnished money to the "Man in the Moon," gave in the names in writing, which proved to be those of his wife and her sister. The Commissioners decided that the ladies must be examined. They were accordingly summoned by telegraph, and on Thursday Mrs. Westropp and her sister deposed to furnishing £5000 for the election of 1866, but stated that Mr. Westropp knew nothing of it until after the trial of the petition. During the sitting Mr. Ansley, one of the commissioners, stated that he had received an anonymous letter, informing him that his life was in danger, and warning him not to leave the town alone. He treated the communication with contempt, and expressed his determination to punish the writer if he could discover him. Mr. Thompson gave evidence as to supplying £1500 for Mr. Paton's election.

THE CHANNEL FLEET.—Rear-Admiral Chads has been appointed second in command of the Channel squadron. The Lords of the Admiralty returned to Whitehall on Wednesday, having visited Pembroke, Plymouth, and Portsmouth since they left Cork. The fleet, which is now under the command of Sir T. M. Symonds, is ordered to fill up with coal at Pembroke, and to sail about the 10th inst. on a cruise, possibly to Lisbon or Madeira and back.

THE ALABAMA QUESTION.—The Hon. William Beach Lawrence, Editor of Wheaton's "International Jurist," and believed to be one of the ablest of living authorities on that subject, made a speech on Monday night at the Social Science Congress, in which the following important passage on the Alabama question occurred: "What I am going to say on this question now understood to be pending between the United States and Great Britain will be said as a publicist, and not as a citizen of my country. I am strictly a private individual, and I am responsible for my own opinions. This is not to be taken as a pledge to any party. As for the Alabama question, I will only say that I believe it to be the construction of the law of nations, as it was given by the United States, and that it is a violation of the treaties of 1794, for vessels captured by French privateers fitted out in our ports, and for vessels captured within our waters, and which it was not in our power to return, do not form a precedent entitled to weighty consideration. On the other hand, as far as respects the complaint for reparation on the belligerent rights of the Confederates, I cannot use too strong language in pronouncing its utterly baseless character. No treaty in international law is ignorant that belligerency is a staple question of fact. With the late Sir Cornwall Lewis, we may ask, if the array of a million of men on each side does not constitute belligerency, what is belligerency? But what was the proclamation of the President, followed up by the condemnation of your ships and cargoes for a violation of the blockade which is established, but a recognition of a state of war? At this moment the United States, in claiming the property of the late Confederate Government, place before your tribunals their title on the fact of their being the successors of a Government. I repeat that, however valid our claims may be against you on other grounds, there is not the slightest pretext for any claim against you based on the public admission of a notorious fact, the existence of which has been recognized by every department of the Federal Government."

Foreign.

FRANCE.—The Emperor presided at a Council of Ministers on Saturday, and on Sunday an Imperial decree was issued convoking the Senate and the Legislative Body for November 29. This delay in the meeting of the Chambers has been received by a storm of indignation and discontent on the part of the Republican and Opposition journals, which demand the immediate convocation of the Corps Legislatif, and declare that it is unconstitutional to postpone it beyond the 26th inst., on which day Messrs. Keratry, Raspail, Gambetta, Bancel, and other ultra Republicans declared their intention of "opening the session" on their own responsibility. On the other hand, although many habitual staunch supporters of the Empire and the public generally are of opinion that the Government has made a mistake in postponing the meeting of the Legislative Body until November 29, the Government organs assert that the delay will give the Emperor two months for choosing his new Ministry and preparing the way for the practical application of the constitutional reforms. They also assert that the absence of the Empress has in no way influenced the Government in fixing the date for the meeting of the Chambers, but they do not notice the statement of the Vienna Presse, that the Emperor, in his speech at the opening of the Chambers, will be able to announce that "an agreement has been arrived at between the Powers for a general and simultaneous disarmament." With regard to the declared intention of MM. Keratry, Raspail, Gambetta, and others of the ultra-Republican party, to attend at the Palais Bourbon on the 26th inst., and declare the session of the Legislature to be opened, in spite of the Government, it appears that the project has been so strongly denounced that M. Keratry has at length deferred to public opinion, and announced that he "abandons the idea of an isolated

manifestation; the interests of the country requiring that the contest which is being carried on between the representatives of the nation and personal power should not end in a popular riot." In the *Avenir National* of Thursday, M. Peyrat, the chief Editor, combats the project of a manifestation for the 26th inst., which he looks upon as fatal and inopportune, adding that most of the members of the Democratic party entertain the same opinion. The Empress left Paris on the evening of Thursday, the 30th ult., on her journey to the East. Her Majesty arrived at Venice on Saturday, and embarked immediately on board the Imperial yacht *Aigle*. In the evening the Empress visited the Piazza di San Marco, which was specially illuminated. Her Majesty also received the city authorities. King Victor Emmanuel, attended by the Ministers General Menabrea and Signor Minghetti, arrived at midnight, and was much cheered. On Sunday the King paid a visit to the Empress on board the Imperial yacht. At night a serenade was given to her Majesty on the Grand Canal, which was magnificently illuminated, and crowded with richly decorated gondolas. On Tuesday and Wednesday the Empress visited various objects of interest in the city, and left on Thursday morning for Greece. Her Majesty received a farewell visit from the authorities on board the *Aigle*, when she decorated the mayor with the cross of the Commander of the Legion of Honour, and warmly expressed her thanks for the cordial manner in which she had been received during her stay. Prince Charles of Roumania arrived in Paris on Wednesday morning, and was received by the Emperor at St. Cloud in the afternoon. Baron de Talleyrand-Perigord, formerly French ambassador at St. Petersburg, has been created a senator. A letter has been sent to Father Hyacinthe by the General Superior of the Carmelites, ordering him to return to his convent within 10 days, under penalty of major excommunication, and of a note being issued declaring him to be dishonoured in the eyes of the Church. The rumour that the body of Kinck, sen., had been discovered is without foundation. A telegram from Guebwiller, announces the arrest of Traupmann's father. His mother arrived in Paris on the 30th ult. Another great fire broke out at Bordeaux on Tuesday night in the ship-building yards near the harbour, and destroyed property to the value of a million francs.

SPAIN.—An insurrection of a very serious character broke out last week in Catalonia, Andalusia, Murcia, Galicia, Saragossa, and part of Arragon. The Republican headquarters in Catalonia were at Mauresa, and in Andalusia at Medina-Sidonia. In Galicia the insurgents captured the civil Governor, the military commander, and other authorities at Orense, and ransacked the revenue offices. In Murcia they proclaimed the Republic, and were supported by the neighbouring localities. In Reuss the Republicans issued a pronunciamento in favour of the insurrection, committed several assassinations and robberies, violated nuns in the convents, and levied forced contributions upon the inhabitants. In Santander an understanding was established with Torrela Vega, Laredo, and Castro to cause a rising in those places on a fixed day. In Valladolid also a rising was threatened, with the view of cutting off communication with France. The Republic was proclaimed at Gandesa la Carolina and other places. The Mayor of Tortosa took the command of an insurrectionary band which started from that town. In all these places there was great destruction of telegraph wires, bridges, viaducts, and other railway works. Some of the Republican Deputies left Madrid to raise the provinces in the north and centre of Spain, their plan being to raise all the provinces, and afterwards to attempt a *coup-de-main* upon Madrid from various points at once. In this emergency the Government took immediate measures to suppress the movement. Several thousand insurgents who had left Reuss, in obedience to the orders they had received, which were to avoid all engagements with the troops, are said by the Ministerial journals to have been defeated on Monday by General Baldrich, with a loss of 80 killed and 300 wounded. Other accounts assert that these statements are unfounded. The Republican bands at Orense and Murcia, and several bands in Andalusia and Catalonia, have been completely dispersed. The chief of the band at the former place had been taken prisoner, and the authorities who had been captured by the insurgents have been released. The insurgents, in other provinces, are also flying, after having committed great havoc. At the opening of the Cortes on Friday the Government brought in a bill suspending the guarantees of personal liberty throughout the Peninsula, and authorising the proclamation of martial law. The Bill was vehemently opposed by the Republican Deputies Castelar and Orense, and supported by the Minister Sagasta, who delivered a forcible speech against the Republicans, accusing them of awful atrocities. The debate was continued on Monday, and was of a very animated character. In reply to the attacks of Senor Garrido, Admiral Topete defended the policy of the generals of the Liberal Union, and said that when the proper moment arrived he should energetically support the candidature of the Duke de Montpensier. Senor Castelar condemned the endeavour to raise an Italian prince to the throne of Spain. When the Republican members signified their intention of withdrawing from the Chamber, and of taking no part in the vote, General Prim endeavoured, first persuasively, and then more sternly, to dissuade them from adopting this course. Castelar replied that they might yield to persuasion, but not to menace. The Bill was then carried. No division on the question was taken, as the Republican party left the house before the vote was called for. The new law was published in the official *Gazette* of Thursday. The Volunteers of Madrid have formally tendered their support to the Government to sustain order, and some battalions have left this week for the

scene of operations. The American Government has withdrawn its offers of friendly mediation in the affairs of Cuba, but the note presented by General Sickles has not been withdrawn. It is said that the Ministry is convinced that there is no chance of a majority of the Cortes voting in favour of the Duke of Genoa. Notwithstanding the disturbances in the country, the troops destined to proceed to Cuba are being embarked daily.

DENMARK.—The Rigsdag was opened on Monday by the King in person, who delivered the speech from the throne. His Majesty said:—

"The joy which has been universally manifested at the marriage of the Crown Prince is a guarantee of the sympathy which exists between the nation and the Royal family. Through the national representatives I thank the whole people for their testimonies of attachment. The same sentiments have shown themselves beyond the frontier among the Danes of Schleswig, who addressed to us and to the newly-married couple affectionate proofs of their sympathy and devotion. As our joy has been theirs so is their sorrow ours. We firmly believe with them that those who are and wish to remain Danes will be once more united to Denmark. The Prussian Government, it is true, has not in the present circumstances a sufficient motive for the renewal of negotiations relative to this question, but our convictions, so far as the justice and the well-understood interests of the two countries are concerned, is so immovable that we cannot relinquish the hope of seeing similar views adopted by the Prussian Government, and a solution thereby brought about which shall restore relations of durable friendship between Denmark and the North German Confederation. The nation continues to progress in the path of material and intellectual development. Important lines of railway have recently been opened, and other great public works are being prosecuted. The agricultural districts have been blessed with a plentiful harvest, and the improvement in commerce is lightening the burdens which had been necessitated by the works undertaken for the development of the country and the defence of its independence."

The sentiments expressed by the King in reference to Schleswig were loudly cheered by the Assembly.

SAXONY.—The small town of Frauenstein, near Chemnitz, was almost entirely destroyed by fire on Saturday night.

SWITZERLAND.—The federal Government has refused to interfere in any way in the affair of the banishment of Frankfort citizens, excepting in cases where a whole family may have acquired the rights of Swiss nationality.

PRUSSIA.—The Prussian Chambers were opened on Wednesday by the King in person. In the speech from the throne his Majesty touched upon various home questions which required legislation, and, in referring to the financial position of the country, said that the endeavours of the Government to equalise the revenue and expenditure had not met with the desired success, and that additional taxation would therefore be necessary. His Majesty concluded his speech with the following remarks on the foreign policy of the Government:—

"The unremitting endeavours of my Government for the maintenance and consolidation of peace, for guarding our relations with foreign Powers from being disturbed in any way, have, by God's help, been crowned with success. I fully trust that also in future the foreign policy, which will be directed by me in the same spirit, will be followed by the same good result—viz., the establishment of peaceful and friendly relations with all foreign Governments, the development of traffic, and the maintenance of the authority and independence of Germany. I had lately the gratification of receiving in several provinces of my monarchy manifestations of loyalty and confidence which gave me much pleasure. In that spirit which dictated these manifestations I recognise a fresh security for the steady and hopeful prosperity of the Fatherland, and it will be my unceasing endeavour to further the same in all directions to the best of my abilities. Success greatly depends upon your cordial co-operation with my Government, and I rejoice to be able to express my confident hope that also during this session this co-operation for the welfare of the country will not be found wanting."

The King will shortly return to Baden-Baden, and will remain there with the Queen until the end of October. The Crown Prince left Berlin on Sunday for Baden and Vienna. The semi-official *Provincial Correspondence* says that this visit of the Prince to the Austrian Court is rightly regarded everywhere as an important indication of the value which both the Prussian and Austrian Governments attach to the renewed realisation of friendly relations. A fourth German Protestant Congress was opened at Berlin on Wednesday by a sermon from the chief Court chaplain, Herr Schwarz, of Gotha. Professors Bluntschli, of Heidelberg, and Holtzendorf, of Berlin, have been elected Presidents.

BADEN.—The Lower House of the Baden Diet adopted on Tuesday, with only six dissentient votes, the Address proposed by the National Liberals. The counter-draught of an Address moved by the Ultramontanes was rejected. The latter advocated the formation of a South German Bund, the dissolution of the Chambers, and the dismissal of the Ministry. During the debate there were several violent "scenes" between the members of the Ministry and the clerical deputies.

BAVARIA.—The voting for the election of a President of the Lower House of the Diet has now lasted four days without result. Six ballotings have been held, and each time Herr Edel, the Progressist candidate, and Herr Weisz, the candidate of the Ultramontanes, obtained 71 votes each. On Wednesday the Lower House was dissolved by Royal decree.

AUSTRIA.—The Crown Prince of Prussia arrived at Vienna shortly after 9 P.M. on Wednesday, and was received by the Emperor and the highest military and civil authorities. On the Prince leaving the train, the Emperor advanced, and a most cordial greeting took place. The Emperor wore the uniform of the colonel of a Prussian regiment, while the Crown Prince of Prussia was dressed as an officer holding a similar rank in the Austrian army. The military bands struck up the Prussian national anthem. The Prince having reviewed the guard of honour appointed to escort his Highness, proceeded with the Emperor and his suite

in court carriages to the Imperial Hofburg. Count Beust has received from Admiral Petz, announcing the Chinese treaty of commerce was signed September, and that the Austrian expedition for Japan.

ITALY.—The King has signed a decree reorganising the tax-collecting department of the financial administration. His Majesty went to Venice on Monday to receive the Empress of the French. In the afternoon he attended the Ecumenical Council at Rome, of which the King of Italy is President. The King of Italy, stating that the Italian Government will not attend the Ecumenical Council at Rome, it expressly and absolutely reserves to itself the liberty of action under any circumstances which might be necessary, in order to maintain the kingdom and the rights of the Italian people. The King arrived at Brindisi on Sunday for Alexandria in the Italian steamer *Amadeus*. Several shocks of earthquake were felt at Santo Gemignano, in the Maremma, on the 26th ult. and the following day. The levelled to the ground, and many churches, museum and the churches of the Maremma, felt less severely at Sienna, Cortona, Grosseto, Volterra, Certaldo, and Poggibonsi.

THE PRINCIPALITIES.—Prince Charles of Saxe-Coburg and Gotha left Brussels on Sunday to continue his tour. In consequence of Queen Victoria's illness, the Prince before leaving Belgium was appointed the Minister of War, to London with a letter addressed to her Majesty. He is also charged with the mission of expressing the English Government sentiments of cordiality on the part of the Roumanian people.

TURKEY.—The Grand Vizier and other Ministers, left yesterday in the Sultan's yacht for the Dardanelles, accompanied by three ironclads to receive the Empress Eugenie on her arrival at Athens. Djemil Pacha has arrived from Constantinople on the 22d inst., and will be accompanied to the Dardanelles by the Prussian squadron now in the Bosphorus. The palace occupied by the Sultan at Wales is being prepared for the reception of the Empress. Twenty thousand troops have been ordered by the Sultan at the camp of Hunkar. A grand review will be held in the presence of the Empress of the French. His Majesty has ordered 30,000 to be distributed as largesse among the troops. A second cargo of American cotton, by the Porte from the American Government, has been converted into Sniders, has arrived. The Sultan's policy which has been favourable to the Viceroy in the Egyptian controversy, has been approved by the Sultan. The decree ordering the suspension of general considerations, and specifies in article 1st, that upon those who sustain the professions of tapha Fazyl Pacha. It is, however, understood that the question is on the eve of a settlement. The Viceroy will come to Constantinople on the 10th inst. The Empress, and that the Sultan will be present in person at the inauguration of the Canal. Medjid Pacha, the Director of the Canal Bureau, and nephew of Fuad Pacha, has been named as the political testament of the Sultan. The *Levant Herald*, and alleged to have been written by Fuad Pacha to the Sultan, to whom it contains several fundamental reforms. The Sultan maintains its belief in the authenticity of the document. A local loan has been procured by the Sultan to meet immediate liabilities, and that the large loan of eight millions sterling point of being concluded. Messrs. Camille de Witt, of the Abyssinian Expedition, have arrived at Constantinople. They left on Wednesday into the alleged irregular purchase of mules at Constantinople, and will be in a few days for Smyrna, Alexandria, and so on. The Bishop of Gibraltar will hold a conference at Constantinople next week. Telegraph communication between Bagdad and Fao is expected to be re-established shortly.

INDIA.—The statement that Lord Mayo would visit Simla in October for a tour through Kashmir, has been confirmed. It is confidently asserted that the deficit of 2,000,000 in the ordinary budget for the present year, and that a further deficit of 2,000,000 is expected for the present year. It is reported that a rebellion has broken out on the Persian Gulf, and also said to have occurred between the British and the Turks near Bagdad. Civil war continues in the Punjab. It is generally believed that no further progress will be made in the Punjab. Agra, the festivities being confined to the celebration of the Government has requested the Viceroy to continue in office for a second year. Lord Napier, Governor of Madras, has written a minute, showing the position and the necessity of irrigation in the Madras Presidency, and the water supply of the city. Impertinent attacks have been made by Captain Cole in the Punjab on the perpetration of unsuspected atrocities by the Rajah of that State. The latest reports from the Punjab are of a most gloomy nature. The province is increasing suffering and darker prospects are before it. A victory has been gained in Turkestan by the British. The Ameer Shere Ali. His Highness has been defeated in the field. It is believed that the Ameer of Bokhara will visit India next year. Cholera has broken out at Subathoo, and the Majesty's 11st Regiment at Subathoo, and some of the Lancers at Lucknow. Endeavours are being made to establish an Indian Society upon the ruins of the Albert Assurance Company.

... Duke of Edinburgh ... August 29. It is understood ...

Accounts from Melbourne state that a remarkable event in the way of diamond mining has yet occurred has been the finding of a diamond, of the extraordinary weight of ... The stone was discovered in August last ... between Bendemeer and Armidale, England district of New South Wales, size about as large as a turkey's egg, and ... ELECTION OF LORD MAYOR.—The polling for ... of Lord Mayor was brought to a close on ... when the number of votes recorded were ... For Alderman Besley, 1501; the Lord ... Alderman Wilson, 588; Alderman ... The official declaration was made yester- ... which the sheriffs proceeded to the Court of ... for the purpose of returning the names of ... candidates at the head of the poll, in order ... the Aldermen might choose one of them to be ... for the year ensuing. The sheriffs after- ... announced that the election had fallen upon ... Alderman Besley stood forward ... the Livery for the high honour they had ... upon him, and said that the Livery had

achieved a great triumph on the occasion. A resolu- ... tion of thanks to the Lord Mayor was then moved and ... carried by a large majority.

SAFETY OF DR. LIVINGSTONE.—A missionary, who ... landed at Falmouth on Wednesday from Zanzibar, ... brings important intelligence concerning the safety of ... Dr. Livingstone. He states that letters had been ... received at Zanzibar by Dr. Kirk from the great ... traveller himself, dated Lake Tanganyika, February, ... 1859. At that time Dr. Livingstone was well, but ... short of provisions. He had been deserted by all the ... Europeans who had accompanied him, and was then ... living on rice and fruits supplied by Arabs. Mr. and ... Mrs. Lee, two missionaries who left Zanzibar in ... June, have also arrived at Falmouth, and bring ... intelligence of Dr. Livingstone, but not of so late a ... date as that given above. Dr. Livingstone was ... seen about 14 months since by an intelligent and ... apparently trustworthy Arab at Lake Tanganyika, ... when he was making his way to the western part of ... the lake. No doubt of his safety existed at Zanzibar ... It was expected that he would be first heard of at ... Congo, or some other place on the West Coast of ... Africa.

THE HIGH TIDES.—A tidal wave of considerable ... magnitude swept up the English Channel on the 29th ... ult., but though it was particularly felt in narrow ... estuaries, it caused little damage. At Plymouth the ... tide swept in suddenly to a height of 2 or 3 feet above ... its previous level, and as quickly receded. This was ... repeated several times, each time with diminished ... force. At Penzance it receded and came in about every ... 20 minutes, running out of the harbour at about ... five miles an hour, and returning at the same speed ... At Truro, fully an hour before any flow of the tide ... was due at Truro Quay, a "bore" tide, about 18 inches ... high, ran rapidly above Boscawen Bridge, and retreated ... in about 10 minutes. In less than an hour there was ... a similar occurrence, followed by others like it during ... the forenoon. At Haverfordwest, on the coast of ... Pembrokeshire, it flowed and ebbed five times, rising ... about 2 feet in a quarter of an hour, and after pausing ... a minute or two ran out rapidly. The first, but not ... the highest, of the predicted tides of the present week ... occurred on Tuesday evening. The wind was light ... and blowing off the land and down the Channel. On ... the South Devon and Cornwall coasts the water only ... rose a few inches above the ordinary spring tides, but ... in the rivers and estuaries on the north coast it rose ... much higher, and at Truro it was 2 feet higher than ... computed by the tables. At Brixham, which is open ... to the wind, it rose 3 feet; and at Bideford, on the ... North Devon coast, even more. On Wednesday large ... numbers of persons assembled on the Thames Embank- ... ment and on London, Southwark, and Westminster ... bridges, in expectation of the fulfilment of the prediction ... of an unusually high tide. It did not, however, rise ... more than a foot above the average spring tides, and no ... damage was done in London. Accounts from the coast ... state that, in anticipation of seeing a great phenomenon, ... visitors from the inland districts arrived during ... Wednesday in great numbers to swell the crowds of ... residents who assembled on the shores. The tide no- ... where rose much above its ordinary height, and the ... people separated with feelings of disappointment ... mingled with thankfulness. The highest rise took ... place in the Bristol Channel, the rise at Cardiff being ... 35 feet 3 inches, as against 36 feet 6 inches during the ... high spring tide of last March. The strong south- ... easterly winds blowing off the French coast from ... Biarritz to Brest, and off our own shores from Penzance ... to Liverpool, acting adversely to the flow of the Atlantic ... tidal wave up the British Channel, rendered any very ... unusual phenomenon either at London or along the ... southern coast improbable. On Thursday the excite- ... ment in the Metropolis was less marked, and not half ... the number of persons assembled on the banks of the ... river. The first full tide in the morning occurred ... shortly before three o'clock, when the water at the ... new entrance to the London Docks rose to a height of ... more than 29 feet, but no damage was done. Many ... people living in the lower parts of Lambeth and ... Southwark suffered much anxiety during the night, ... and were afraid to go to bed, expecting their houses ... to be inundated. They were much relieved when the ... time of high water had passed and the ebb commenced. ... The tide in the afternoon was timed to reach its ... extreme height at London Bridge at 20 minutes past ... 3; but long before that time numbers of persons were ... assembled on the Custom House Quay, the Embank- ... ment, and the various bridges, to witness its rise. ... Favoured by a light easterly breeze it ran up very ... swiftly, and by two o'clock not only covered the abut- ... ments of Waterloo and Vauxhall bridges, but was on a ... level with the pathway of the Embankment. It did ... not rise more than a few inches higher, and no ... damage was done. Accounts from the coast state that ... at some places the tide during the day was a little ... higher than ordinary, but nowhere was the rise suffi- ... cient to cause any alarm.

OPENING OF THE HOLBORN VIADUCT AND BLACK- ... FRIARS BRIDGE BY THE QUEEN.—At a meeting of ... the Common Council, held at Guildhall on Thursday, ... it was intimated that the Queen, in compliance with ... the wishes of the citizens of London, expressed through ... the Corporation, will attend the ceremony of opening ... the New Bridge at Blackfriars, should her health and ... strength permit. This announcement was received ... with acclamation, and a committee was appointed to ... make the necessary arrangements for the auspicious ... occasion. The day on which the ceremony will take ... place has not yet been definitely fixed, but it is under- ... stood that the new bridge will be opened early in next ... month, and that the Holborn Valley Viaduct will be ... inaugurated on the same day.

PROPOSED RAILWAY EXTENSION TO THE MANSION ... HOUSE.—The question of extending the Metropolitan ... District Railway to the Mansion House was again

brought before the Metropolitan Board of Works on ... Friday, when Sir W. T. ... all the great ... bankers in the City were unanimous in favour of the ... extension, and moved that it be referred to the works ... and general purposes ... Mr. Westerton ... seconded the motion. Mr. H. L. Taylor strongly con- ... demned the proposal, and said that if the Metropolitan ... District Railway were allowed to pass, the Exchange ... would never rest satisfied until they got within the Exchange ... itself and upset the statue of the Queen. After ... some discussion the motion was carried by a one ... dissentient. On Thursday, at the Court of Common ... Council, a communication from the Metropolitan ... Board of Works was read, requesting to be informed ... of the views of the Corporation with regard to the ... railway company's proposal. Mr. Deputy Lowman ... Taylor said that there could scarcely be a greater ... nuisance than to erect a railway station in the very ... centre of the City, and in close contiguity to the ... official residence of the Lord Mayor, and then to ... carry a subway thence to the Royal Exchange. He ... moved that the communication from the Metropolitan ... Board be referred to the Commissioners of Sewers. ... Mr. Lawley, chairman of the General Purposes Com- ... mittee, seconded the motion, although he thought it ... was the duty of the Corporation to afford every ... facility to the public in connection with railway ... communication, and so relieve their overcrowded ... thoroughfares. Sir Wm. Rose understood that the rail- ... way company had no Parliamentary powers to do what ... they contemplated, and for such a company to come into ... the City of London, to a point within 200 or 150 yards ... of the Royal Exchange, and ask that court to give ... them what Parliament had not granted them the power ... to do, was a monstrous proposition. He moved an ... amendment to the effect that the Metropolitan Board ... of Works be respectfully informed that the subject ... referred to in their communication could not be enter- ... tained by that court, unless a direct application was ... first made to it by the railway company. Mr. Deputy ... Jones seconded the amendment. Mr. J. E. Saunders ... opposed it, and particularly dwelt upon the necessity ... of a subway from the proposed terminus at the Mansion ... House to the Royal Exchange, as a convenience to ... merchants and bankers living at the West End of the ... town. On a division the amendment of Sir William ... Rose was carried by a majority of 16 in a court of 110 ... members. On that becoming, in point of form, the ori- ... ginal question, another discussion took place, in which Mr. ... M'George urged that there was no responsible body ... before the court, and that in its then shape it was one ... of the crudest suggestions ever submitted to a public ... body. Mr. Isaacs, chairman of the City Lands Com- ... mittee, replied that the court had not said that they ... would not entertain the question, but that the appli- ... cation should be made to them by the proper parties ... and in a proper way. He argued also that the Commis- ... sioners of Sewers, to whom it was proposed to refer it, ... had no authority in the matter, inasmuch as the new ... street was not yet under their control, and that this ... was an attempt to enlist the co-operation of the court ... by a side wind. The proposal of the railway company ... was strongly opposed by Mr. Medwin and Mr. Knight, ... and ultimately the motion of Sir William Rose was ... adopted.

THE NEW PALACE OF WESTMINSTER.—Four more ... statues of Kings and Queens have been placed in the ... Royal Gallery leading from the Victoria Tower to the ... House of Lords: those of Queen Elizabeth, James I., ... Edward I., and Queen Anne. They have been sculp- ... tured by Mr. J. B. Philip in Caen stone, but are ... intended to be gilt. The statues which had previously ... been placed there were those of Richard I., Edward ... III., Alfred the Great, and William the Conqueror. ... Only four niches now remain to be occupied.

RE-OPENING OF THE TEMPLE CHURCH.—On ... Sunday last the Temple Church was re-opened for ... Divine service, after having been closed for two months ... for repairs.

ARCHBISHOP MANNING ON THE PAPAL SYLLABUS. ... —On Sunday Archbishop Manning delivered a dis- ... course on the Pope's Syllabus at the pro-cathedral in ... Kensington. He expressed his belief that if the Pope ... had confined himself in the Syllabus simply to faith ... and morality in the ordinary personal sense of the ... word, very little would have been heard of it, but ... because his Holiness had pointed out and condemned ... all those errors in political philosophy which lay at the ... root of morals the world had been in uproar. He then ... went through the several points of the Syllabus, ex- ... plaining and defending each of them. "The meaning ... of modern civilisation," he said, "was a state of political ... society founded upon divorce, secular education, ... infinite divisions, and contradictions in matters of ... religion, and the absolute renunciation of the supreme ... authority of the Christian Church. Could it, then, be ... matter of wonder that when the Roman Pontiff ... published the Syllabus all those who were in love with ... modern civilisation should have risen in uproar against ... it? Or could it be wondered that when the world, with ... great courtesy sometimes, with great superciliousness ... at another time, and great menace always, invites ... the Roman Pontiff to reconcile himself to liberalism, ... progress, and modern civilisation, he should say— ... 'No; I will not, and I cannot. Your progress ... means divorce; I maintain Christian marriage. Your ... progress means secular education; I maintain education ... intrinsically and necessarily Christian. You maintain ... that it is a good thing that men should think as they ... like, talk as they like, preach as they like, and propagate ... what errors they please. I say that it is sowing error ... broadcast over the world. You say I have no authority ... over the Christian world, that I am not the vicar of the ... Good Shepherd, that I am not the supreme interpreter ... of the Christian faith. I am all these. You ask me to ... abdicate, to renounce my supreme authority. You tell ... me I ought to submit to the civil power, that I am the ... subject of the King of Italy, and from him I am to

receive instructions as to the way I should exercise the civil power. I say I am liberated from all civil subjection, that my Lord made me the subject of no one on earth, king or otherwise, that in his right I am sovereign. I acknowledge no civil superior, I am the subject of no prince, and I claim more than this—I claim to be the supreme judge and director of the consciences of men—of the peasant that tills the field and the prince that sits on the throne—of the household that lives in the shade of privacy and the Legislature that makes laws for kingdoms. I am the sole last supreme judge of what is right and wrong. Your progress is departure from Christian civilisation; in that path you may have many companions, but me you will not find." Dr. Manning concluded by saying:—

"And now one word by way of illustration as to a state of Rome and of London. Rome is the proof of the supernatural society of which I have spoken. Long years of residence in Rome and an intimate knowledge of it, still longer years of residence in London and a more complete intimacy with the metropolis of my own country, enable me to declare that in point of piety, of morality, of public order, of true civilisation, which makes charity, courtesy, justice, and goodwill between man and man, Rome is incomparably beyond London. London, with 2,500,000 of men, of whom two-thirds never set their foot in a place of Christian worship—2,500,000 men of whom I know not how many have never received the sacrament of Christian baptism—2,500,000 men of whom I know not how many have never sanctified their life by Christian marriage—this is a subject too deep and too large; I cannot enter upon it; and I end with these words. There is but one name given under heaven whereby we may be saved, namely, Jesus Christ; one faith, one baptism for the remission of sins, one fold under one shepherd, and there is one Chief Pastor who represents him, the Vicar of Jesus Christ, of whose supreme authoritative declarations I have spoken to you to-day."

SCIENTIFIC INSTRUCTION FOR WOMEN.—An important experiment is about to be tried at the South Kensington Museum to promote the instruction of women in science. By permission of the Lord President, Professors Huxley, Guthrie, and Oliver, will next month commence a course of lectures on natural science. The fees will not exceed a shilling a lecture, with voluntary examinations, and the terms will be even lower to schools and governesses. The Duchess of St. Albans, Mary Marchioness of Salisbury, the Countesses of Tankerville, De Grey, and Granville, Lady Northcote, and many other ladies have expressed their willingness to assist this experiment. The Hon. and Rev. F. Byng, of Onslow Gardens, is the treasurer and secretary.

THE MEMBERS FOR MIDDLESEX AND THE IRISH LAND QUESTION.—A meeting of the Middlesex Agricultural Society was held on Friday at Bedford, and the members afterwards dined together at Hounslow. The members for the county were both present. Lord George Hamilton, who was in the chair, adverted to the Irish agitation on the land question, and said that while he did not believe they would ever get fixity of tenure, for then their next equally clamorous demand would be for release from rent, he thought a tenant-right rent, such as exists in Ulster, might probably be carried. Lord Enfield expressed his hope that Ministers would bring forward a complete scheme on the question, and would stand or fall by the second reading of the Bill.

GREENWICH HOSPITAL.—The question of converting a large portion of this hospital into a naval museum is now under the consideration of the Admiralty; and it has been suggested that the Victory, Nelson's old ship, now in Portsmouth Harbour, should be moored in the Thames, opposite the building, with easy access from the shore for visitors.

THE LONDON GAZETTE.—The editorship of the *London Gazette*, vacant by the death of Mr. Behau, has been given by Mr. Gladstone to Mr. Thomas Walker, for many years connected with the London newspaper press.

WOOLWICH DOCKYARD.—On the 30th ult. this Dockyard ceased to exist as a naval establishment. The official dwellings are mostly empty, and Rear-Admiral Edmonstone, C.B., whose flag was hauled down on Friday, has vacated the residence occupied by the Superintendent. The staff of clerks, with the exception of three, have also ceased their duties.

THE POST OFFICE TELEGRAPHS.—The office of engineer in the new department of the Post Office Telegraphs has been conferred upon Mr. R. S. Culley, the present engineer of the Electric and International Telegraph Company.

NATIONAL EDUCATION LEAGUE.—The first general meeting of this body is to be held at Birmingham on the 12th and 13th inst., and will be attended by Messrs. G. Dixon, M.P., Jacob Bright, M.P., Professor Fawcett, M.P., A. J. Mundella, M.P., Edmund Potter, M.P., George Melly, M.P., Archdeacon Sandford, Professor Thorold Rogers, Hon. Auberon Herbert, Dr. Hodgson, Mr. Odgers, and by deputies from the branch societies which have been formed in London, Birmingham, Manchester, Liverpool, Leeds, Bradford, Sheffield, Nottingham, Leicester, Bristol, Southampton, Bath, and other large towns. The Association, which has for its object to secure the education of every child in England and Wales, was projected in January last by a few gentlemen in Birmingham, and has already made such rapid progress that it consists of 1400 members in different parts of the country, and this number increases daily. Among those who have already signified their adhesion to the principles of the league are 40 members of Parliament, including the Earl of Portsmouth, Mr. Jacob Bright, Mr. Carter, Sir C. W. Dilke, Bart., Professor Fawcett, the Hon. Captain Grosvenor, Sir H. Hoare, Mr. Thomas Hughes, the Marquis of Lorne, Mr. Melly, Mr. Miall, Mr. Mundella, Dr. Lyon Playfair, Mr. Edmund Potter, and Mr. P. A. Taylor. In the circular issued by the league the means by which the object is to be attained are stated as follows:—"1. Local authorities shall be compelled by law to see that

sufficient school accommodation is provided for every child in their district. 2. The cost of founding and maintaining such schools as may be required shall be provided out of local rates, supplemented by Government grants. 3. All schools aided by local rates shall be under the management of local authorities, and subject to Government inspection. 4. All schools aided by local rates shall be unsectarian. 5. To all schools aided by local rates admission shall be free. 6. School accommodation being provided, the State or the local authorities shall have power to compel the attendance of children of suitable age not otherwise receiving education."

MEETING OF ALBERT POLICY-HOLDERS.—At a meeting of the London and provincial committees of Albert policy-holders, at the Cannon Street Hotel, on Thursday, Lord William Hay, Mr. Webster, and Mr. Bird were appointed a committee to negotiate with the Alliance for the working of the Albert business on the terms proposed by the secretary of that company.

PARISH OF ST. PANCRAS.—The St. Pancras guardians are still at variance with their staff. The clerk has resigned; Mr. Blake, the master, was dismissed on Monday on the charge of insolence to one of the visiting committee. Dr. Ellis, the medical officer, was invited at the last meeting to resign; but as he has not done so the board on Monday declared his office vacant.

THE AUSTRALIAN MEAT QUESTION.—On Wednesday a meeting, composed chiefly of artisans, was held at the Edmonton Institute, with the object of practically testing the Australian preserved meat for which the colonies are desirous of creating a market in England. The test applied was that of giving the wives of a very large number of artisans instructions how to prepare a dinner, and then supplying them with the means of publicly cooking a dinner for themselves and husbands. The meat experimented upon was the salted and boneless mutton and beef of which the first importations reached this country a few months since. The curing was then not so good as it is now, and the meat now supplied is "prime," looks well, and eats well. About 180 artisans and their wives sat down to the experimental dinner, attended by the Rev. Arthur Hall and the committee of the Institute. The women received their instructions from Mr. D. Tallerman, the manager of the agency in England, and they set the meat before their husbands, not in joints, but in Irish stew, meat dumplings, meat and potatoes, mince-meat pies, and in other forms whereby the salt of the meat was absorbed. A meeting was afterwards held, at which several gentlemen spoke of the importance of the English meat supply being added to by an importation which was at once cheap and wholesome, the meat being from the best lands in Australia, and the price being below the cheapest "cag-mag," as the working population term the "wet" meat of London. Mr. Tallerman also cooked some food after the usual fashion of London wives, and showed that they threw away in the water the best part of the meat by cooking it alone. He pointed out the great saving the artisans' pockets would experience if this meat, cooked with vegetables, and so forming a pleasant and wholesome dish, were adopted by the operative classes of this country, and said that assistance would at the same time be given to Australia in finding a market for her flocks. He stated that in Norton Folgate "penny dinners" were given of this meat daily, and the prejudice previously existing among the classes in that district against all preserved meat was rapidly disappearing. A discussion followed, after which the working men, by a vote, pledged themselves to use the Australian meat, whether they at first liked it or not, for a period of six weeks, as a portion of their meat food.

IMPROVED CABS.—The Council of the Society of Arts, with a view of effecting an improvement in the construction of hackney carriages suited to the metropolis, has announced its intention of offering the society's gold medal for the best and most convenient open carriage for two persons; a silver medal for the second best ditto: a gold medal for the best closed carriage for two persons; a silver medal for second best ditto: a gold medal for a carriage for four persons, open or closed, or both; a silver medal for second best ditto. In making the awards, lightness of construction and durability will be especially considered, and the awards will be made after actual trials of carriages extending over a certain period. In these trials the small amount of vibration and noise will be duly considered by the judges. The Council also offer the society's silver medal for the best instrument, "to be affixed to a cab or other hackney carriage, for indicating the fares between the passenger and the driver, whether by registering the distance travelled or otherwise, and which instrument shall also indicate, for the convenience of the cab-owner and of the driver, the total distance travelled during the day, and the total amount earned."

FATAL ACCIDENT TO AN ALLEGED FENIAN.—At a fire which took place in Bear Yard, Clare Market, on Thursday week, a cab, which came up in the confusion, was driven against the kerb and overturned, throwing a man who was inside upon his head. He was taken up insensible, and conveyed to King's College Hospital, where he was recognised as "Colonel Kelly," the Fenian prisoner who was rescued at Manchester with Burke when Serjeant Brett, who was in charge of the police van, was murdered. It was said that he had been working for the past two years, in fact, almost ever since the rescue, as a "reader" at a printer's office in Chancery Lane, under the name of Martin, but that he still kept up his intimacy with his old Fenian associates, and was on his way to a Fenian meeting when the accident took place. Some scraps from Fenian newspapers were found in his pockets, but no document or criminatory article of any kind was found at his lodgings. The detective officers, however, persisted in declaring that he was the rescued Fenian who at Manchester went under the name of

Deasy, though his real name was supposed to be Martin. He died in King's College Hospital on Saturday week. From the injuries he had sustained, and on the positive declaration that it was not that of the man rescued by the mob at Manchester, the inquest on Tuesday the evidence clearly showed that the detective officers were mistaken, that it was Edward Martin, a compositor, who had been steadily working at the Queen's College, Dalston, from January, 1867, till he met his death. The Coroner having remarked that the deceased had been clearly proved as having been the man rescued by the mob at Manchester, the jury returned a verdict of "Accidental Death."

THE FATAL FIRE AT BAYSWATER.—On the seven persons who perished in the fatal fire at Bayswater, which broke out on Monday, the witnesses were examined, was a witness who was examined, Mrs. Titheridge, her eldest daughter, and her neighbours with the policemen and the firemen, but none could throw any light upon the cause of the fire; for the wife knew nothing of it except that some were in the shop, and that she always sold them under the direction of her husband. It appeared that only 45 minutes elapsed between the commencement and its extinction, and that the alarm reached the station. The fate of the fire was much commiserated, especially that of the poor Jack, who had returned that very evening from his mother from a long residence in Australia.

ROBBERY OF A POOR-BOX AT CHARING CROSS HOSPITAL.—On the night of the 30th ult. a box of Charing Cross Hospital, placed in a conspicuous position at the corner of King William Street, facing the Strand, and immediately in front of a lamp, was broken open, by means of a crow-bar, and its contents abstracted. A waterman is on duty at a cab-stand in front of the hospital till 10 o'clock morning, and it is, therefore, presumed that the robbery was effected after that hour.

THREATENING A MAGISTRATE.—On Thursday, Arthur Brown, a foreigner, was examined at the Westminster Police Court, on remand, charged with threatening to murder Mr. T. J. Arnold, one of the magistrates of the Court, threatening to murder him, and to take his money. It appeared from a statement made by a prisoner to Inspector Humphreys, that he had told Mr. Arnold, who, he said, had fined him 16s. ten years ago for being drunk. He denied sending the threatening letters, but stated that they were written by a man named Jackson, who lived at Pleasure Street, Jersey. The prisoner was committed to the House of Detention.

CHARGE OF VIOLATION OF DUTY BY A POLICE-SERGEANT.—On Thursday, at the Marlborough Street Police Court, Inspector Tierney, of the City of London Police-Sergeant Mackenzie were charged with being guilty of a violation of duty. The complaint was made by Rose Burton, the keeper of a house in Jermyn Street, who complained that the police would not allow her to conduct her business in peace. The officers, it was alleged, entered her house and behaved in a very improper manner, and entered her bath-room when she was absent. It was stated that the officers continued to loiter at the bath-room door for five hours. The defence was that the complainant used every means in her power to defeat the object of the officers, and that the officers acted as they did in the discharge of their duty. Mr. Tyrwhitt said the case was of considerable importance. When he saw a woman so eager to convict a woman because she had been convicted before, he must look very closely at the law, to see if there was any authority for the conduct themselves as they had done. The complainant had been convicted, and it was proper for the officers to look after the house, but it was rather hard to be persecuted on that account. He would refer the case to the magistrate, and give judgment in a few days.

DOUBLE MURDER AND ATTEMPTED MURDER.—On Monday afternoon a terrible crime was committed at Wood Green. A man named Hinson, a soldier who had been in the army, lived in a cottage in Truro Road, Wood Green, but had emigrated to Hendon, to which he went every Monday, and returned only on Saturday night. He had for some time been separated from his wife, and had been a long time with a young woman called Maria Death, a governess, whom he had three children. Adjoining the cottage was a villa called Elder Cottage, which was owned by Mr. William Douglas Boyd, who had recently returned from Japan, and had a business in the City of London. From some cause Hinson suspected that the woman was carrying on an intrigue with Mr. Boyd, and on Monday morning he left home as if to go to work as usual, but in fact concealed himself in the garden. The woman left Wood Green for London, and returned with Mr. Boyd on Tuesday, which arrived at 5 o'clock. Hinson was at the station, evidently expecting that they would come. When they left the train he made a most desperate attack on Mr. Boyd outside the station. Mr. Boyd's standers went to Mr. Boyd's assistance, and Mr. Boyd then went home with the woman. As soon as Mr. Boyd got inside the cottage Hinson took down a revolver, which was loaded, and shot her in the breast, causing immediate death, after which he beat her head against the stock of the gun. He then went in search of Mr. Boyd, whom he found in his stable, and with the word struck him on the temple with the stock of the gun and killed him on the spot. He was afterwards taken into custody, when he refused to say his own name, but not a severe one, and was immediately lodged in the police-station. At the inquest which was opened on Tuesday, one or two of the servants of Mr. Boyd, said that they did not know there was any illicit connection between the

English Church Union; and he firmly expressed his conviction that every man who did not wish to see our churches turned into warehouses, and the preaching of the Gospel over-riden by long processions of groaning and muttering priests, would join the Church Association, and help them by their purses and prayers to stand firm upon the rock upon which the Reformation had placed them, and that, whatever might be done to the Church, and to those, they would not let it live and die in the plain simple Gospel truth, and ceremonial of the reformers of 500 years ago. Those who had troubled the diocese of Carlisle, by introducing into it little heresies, had no little to do with accelerating the Bishop's sufferings and illness. The subject most in the Bishop's heart was his diocese, and he feared there were wolves coming to devour the flock.

CHESTER.—The Prince of Wales has intimated to the Mayor his intention to be present at the opening of the new Town Hall, in that city, on the 14th inst. In consequence of the state of her health the Princess will be unable to accompany him.

CROYDON.—Mr. Robert Parnell, of Bishopsgate Street, has expended 10,000l. on a new church, which was opened last week, near this town.

GLOUCESTER.—A conference of clergy and laity was opened yesterday in the Shire Hall of this city, under the presidency of the bishop of the diocese. The subjects discussed were—1. The best mode of promoting and maintaining the spiritual efficiency of the National Church. 2. Church organisation in the diocese, present and future. 3. Middle-class education in town and country. The subjects were introduced by the Earl of Ducie, the Rev. Canon Powell, and the Rev. J. W. Sherningham.

HANLEY.—At the Revision Court for North Staffordshire on Friday, a question was raised as to the right of pew-owners in St. John's Church to vote as freeholders. It was stated that there had been a regular traffic in the pews, some of which had been sold for 150l. each, the purchasers being desirous of acquiring votes. Mr. Sheelen, the barrister, said it was inconsistent with the rights of the Church that a person should have such an estate in a pew in the church as would entitle him to a vote for knights of the shire. There had been a conveyance, under a special Act, of a right to sit in a certain pew, but no right to vote. The vote was disallowed.

HYTHE.—It is said that the sea is encroaching so rapidly on the coast line at Hythe, Sandown, and other points, as to excite serious fears for the safety of Romney Marsh. Lydd Point is steadily increasing from the accumulation of beach which is swept from other places, and as the old castle of Sandown is supposed to interfere with the movement of the shingle which would form a natural defence to the coast, steps are being taken to memorialise the Government to remove it.

LIVERPOOL.—The Church Congress for the present year was opened in this town on Tuesday. The proceedings commenced with a sermon by Dr. Howson, Dean of Chester, who enforced the duty of forbearance and patience among the different schools of Churchmen, and of a generous treatment of Nonconformists, whether Protestant or Romanist. The inaugural address was afterwards delivered in St. George's Hall, by Dr. Jacobson, Bishop of the diocese, followed by papers and addresses on "diocesan organisation," and "clerical education and our ancient universities." After the discussion of these papers, a protest, signed by 30 clergymen of Liverpool, and by two readers of papers, Mr. Garbett, of Surbiton, and Mr. James Bardsley, of Manchester, was presented against the Rev. Mr. Mackonochie being allowed to read a paper, or take any part in the Congress, on the ground that though he had been condemned by the Privy Council for illegal practices at St. Alban's, Holborn, he had impugned the judgment of the Council, and had not even professed to submit to it, except under protest, and in the barest possible manner. It was also stated that two members, Dr. McNeile, Dean of Ripon, and Mr. Ryde, had withdrawn themselves from the Congress on account of Mr. Mackonochie having been allowed to take part in it. On Wednesday the subjects were—"Phases of Unbelief, and how to meet them;" "Recreations of the People;" "Education, including Sunday School;" "Church work among Seamen;" and "Capabilities of our Cathedrals." On the first subject papers were read by the Rev. E. Garbett, Canon Woodgate, Mr. R. Lowndes, and Mr. R. H. Hutton; and on the second by the Rev. J. Erskine Clarke. On Thursday the subjects were—"Improvement of the Church's Service: How to increase the Attendance on them: Revision of the Rubrics;" "Church Patronage, and Superannuation of the Clergy;" and "Eastern Churches." Yesterday was devoted to—"The Church's Work in Large Towns;" Weekly Offertory and Almsgiving: "Sinai and Palestine." Among those who took a part in the proceedings were the Archdeacon of Ely, Mr. J. M. Clabon, Rev. Canon Gray, Rev. D. Salmon, Archdeacon Ffoulkes, Earl Nelson, Bishop Ryan, Mr. G. E. Street, A.R.A., Rev. P. H. Stern, Mr. H. Birley, M.P., Rev. W. D. MacLagan, Rev. Canon Trevor, Rev. A. H. Mackonochie, Mr. Morrison, M.P., Mr. Raikes, M.P., Right Hon. J. R. Mowbray, M.P., Rev. W. Saumarez Smith, the Dean of Durham, Alderman Hubback, the Dean of Cashel, Hon. Charles L. Wood, Mr. Antonio Brady, Mr. Collins, M.P., and Rev. Dr. Tristram. On Thursday evening there was a working men's meeting in St. George's Hall, the speakers being the Archbishop of York, the Bishops of Chester, Oxford, Rochester, Lichfield, Peterborough, Sodor and Man, Rev. Dr. Taylor, Mr. Cross, M.P., Mr. Edward Whitley, &c. Yesterday evening there was a *soirée* in St. George's Hall, and a seamen's meeting, under the presidency of Earl Nelson. This morning there will be a morning service at Chester Cathedral, at eleven o'clock, and a sermon by the Archbishop of York, on behalf of the Sinai and Palestine Exploration Fund.

LEEDS.—The late Mrs. Burton, of Roundhay, who was a member of the Wesleyan body, has left the large sum of 32,000l., free of legacy duty, in aid of several

religious and benevolent institutions. Of this sum 15,000l. is to be expended on the erection of chapels and schools for Wesleyan Methodists in Cumberland and Scotland.

MALDEN.—The county of York has marked its respect for the memory of the late Earl of Carlisle by two distinct monuments. A chapel to the Castle Howard Reformatory has been erected by those who differed from the proposal to adopt a work of art, and a Grecian column has been erected by others on the summit of Bulmer Hill, at the southern edge of the Howard demesne, about six miles from this town. The work was designed by Mr. F. P. Cockerell, of London, and was selected by a committee from a series of competitive designs. The monument bears the following inscription—"In memory of George Wm. Frederick, seventh Earl of Carlisle, Viscount Morpeth, K.G." Upon the Castle Howard face of the pedestal is the inscription—"He to whom this monument was raised, AD. MDCCLXIX, in private life was loved by all who knew him. By his public conduct he won the respect of his country, and left the bright example of a true patriot and earnest Christian." On the York face is the following—"He to whom this monument was raised, by public subscription, during 12 years represented in the House of Commons—firstly, Yorkshire, secondly the West Riding; and, during eight years, was Viceroy of Ireland." The cost of the column is estimated at over 2000l. The site is so well chosen that the column is visible to the whole Vale of York, the greater part of the Vale of Derwent, the West Riding hills, the Yorkshire Wolds, and a large part of the North Riding.

MALVERN.—An institution of a novel character has been established near this town, the object of which is "to afford to the working clergy opportunities of refreshment to body and soul at the lowest reasonable cost." The institution is under the direction of a "Council of Reference," consisting of Lord Lyttelton, the Earls of Glasgow and Strathmore, Lord Eliot, Lord Richard Cavendish, the Hon. C. L. Courtenay, Sir H. E. F. Lambert, the Hon. H. Watpole, Hon. C. L. Wood, Hon. and Rev. H. Douglas, Hon. and Rev. R. Liddell, Mr. R. Brett, Mr. R. Few, Dr. Gully, and other gentlemen; and the Rev. James Skinner, M.A., vicar of Newlands, has been appointed warden provisionally.

MANCHESTER.—Mr. Robert Barnes, of this city, has intimated his intention, not only to purchase the Cheadle Hall estate and present it to the trustees of the Royal Infirmary, for use as a convalescent hospital, but to supplement the purchase money to the extent of 10,000l., for the purpose of rendering the place thoroughly suitable.

NEWCASTLE-UPON-TYNE.—It is intended to hold a conference in this town next month, to consider the question of education, when papers on the denominational and secular systems will be read and discussed.

PLYMOUTH.—On Friday morning, at 1 o'clock, the brig *Sea Spray*, with wheat for Cork, had a collision with the Italian barque *Nicolo Secondo*, with coals for Genoa, 16 miles off the Lizard. The barque sunk, and the captain and seven seamen were drowned. The mate, three seamen, and the owner's son, were saved. Both vessels had left the Sound on the previous morning.

PORTSMOUTH.—Sir James Elphinstone, M.P., attended a dinner of his constituents on Tuesday, and spoke as follows on the state of the Navy—

"He believed that they had a cheering future before them in Portsmouth. There had recently been a cruise of the Channel fleet; and the result of that cruise had been to reduce the navy of England to one ship. In the gale of wind which the fleet experienced, if the Monarch had put forth her powers as a belligerent instead of a friend, the whole fleet would have been at her mercy. From the very commencement he had advocated the turret system, and placing the weights in ships in their right places, and he maintained that the navy of England was now confined to the Monarch, and to the ship that was to succeed her. They would have to reconstruct the fleet at a cost of about 10,000,000l., and having reduced one dockyard and knocked up that at Woolwich, there was a future for Portsmouth, which he hoped would be the port which would produce the future navy of England. The turret system, which would soon be adopted throughout Europe, was the only principle on which ships should be armed; and they now had a practical solution of the question. The First Lord of the Admiralty took a vessel constructed on this principle to sea, and in a gale of wind the whole fleet was practically at the mercy of the only turret ship, which could have sunk every other ship in the squadron. This was something for Portsmouth to look to.

READING.—The Hon. Auberon Herbert, the unsuccessful Liberal candidate for Berks at the last election, having offered 1000l. towards the establishment of free public libraries in that county, the matter has been discussed in several towns. Mr. Walter, M.P., declined accepting from Mr. Herbert any contribution towards the expenses of the contest, and under these circumstances the offer of 1000l. by Mr. Herbert was made, on condition that Reading should receive 250l., and five other towns 150l. each, provided that each of them shall raise an equal sum towards the same object. The libraries so established are to be maintained and regulated by the Public Libraries Act of 1855, which enacts that the expenses shall be paid out of the borough fund, and that the rate to be levied for the purpose shall not exceed one penny in the pound. At Windsor it has been resolved to adopt the Act, and accept Mr. Herbert's offer. At Reading the corporation have asked Mr. Herbert to devote the 250l. towards the fund now raising to establish a new grammar-school in that borough. The inhabitants of Wallingford have raised a sufficient sum to secure the amount promised, and propose to incorporate the new library with the Mechanics' Institution. A public meeting in connection with the same object has been held at Newbury, under the presidency of the mayor, when the feeling of the meeting was adverse

Provincial.

BIRMINGHAM.—On Monday Lord Stanley visited the works of Messrs. Clay, Inman & Co., at which place, which have been built by the Industrial Development Company, the majority of whose shareholders are working men. On Tuesday he presided at their celebration of the completion of the works, and in the evening he delivered the inaugural address at the new Operative Trades' Hall, intended for the use of the various Trades' Societies.

BIRMINGHAM.—At the Police Court on Monday, Watson, aged 16, was charged with being a vagrant. She was found wandering about the streets on Sunday morning, and stated that she had been detained as a prisoner during the past three weeks in the Roman Catholic convent in Lowe Street. Having been made, it was ascertained that she had been recommended into the convent about three weeks ago, on the recommendation of Father Dowling, to whom she stated that she had attended the ritualistic services at St. Alban's, Holborn, and wished to become a Catholic. It was also found that she had been taken through the window, on being reprimanded for the impropriety of conduct by the lady superior; and it was stated that there was any necessity for her being taken that way, and she was said to be perfectly sane when she pleased. The case was remanded for Tuesday, when it was stated to the magistrates that her brother had agreed to look after her, and take her home. The charge of ill-treatment was then dropped, and the girl left the court with her friends.

BIRMINGHAM.—On Monday four men, named Wilson, Mather, and Kay, were charged with having unlawfully assaulted police-constables Barber and Croft while in the execution of their duty. About 100 men on Saturday morning the prisoners, with a view to their escape, were seen coming out of Sir W. Croft's home preserves, heavily laden with bags and bundles. A fearful struggle ensued, in which police-constable Barber was left for dead on the ground; two other constables were disabled; one of them was taken to the hospital, and the fourth contrived to get away. The deposition of Barber was taken by a county magistrate, and all the prisoners but Croft were taken to his home, and he has identified them. They were committed for a week.

BIRMINGHAM.—At the recent annual meeting of the Birmingham Branch of the Church Association in this city, Mr. Crose, who presided, made the following remarks on the English Church Union:—

"The object of the English Church Union in promoting the English Church, but what he should call Popish, and called the Church Association into existence; and he would define himself simply to the last three authentic documents of the society—the monthly circular of that society, and August—to ascertain what their authentic documents were, and see from the most reticent of them—Dr. Pusey—whether they could not gather sufficient evidence to show that there was a deep design to inflict and insinuate into the Church of England. He thought there was evidence to show that the English Church Union was the head-quarters, and fountain of the ritualistic movement in this country. Except the recognition of the Pope as the head of the Church, there was not a single doctrine that was held by Papists, but might be found in the writings of members of the English Church Union, and members of the Church of England. So far he was in agreement with 'externals.' Passing to 'essentials,' Dr. Pusey's opinions on the doctrine of the Trinity, and on the Reformation was a fiction, a sham, and a blessed reformers might justly distinguish with a difference. But they might be distinguished from the spiritual presence of Christ in the Eucharist, and His actual presence. Let them, then, distinguish between the doctrines and opinions upheld by the English Church Union, and which they were prepared to defend before a court of law. He cordially repeated what he had said before the Bishop of St. David's, that no Churchman should desire the subversion of the Reformed Church of England, or too strongly oppose the proceedings of the

to an increase of the local burdens by levying a rate for the maintenance of a free library, and it was resolved to ask Mr. Herbert to present the money to the Working Men's Institute.

SHREWSBURY.—In November, 1867, a German Jew, named Zusman, travelling for Mr. Cohen, watchmaker and jeweller, of Birmingham, was murdered and robbed of a large quantity of watches, gold chains, seals, and other articles of jewellery, at a lonely spot not far from Oaken Gates. In 1868 suspicion fell upon two men named Harris and Hart, living in the neighbourhood. They were apprehended, and after a very long examination before the magistrates Hart was discharged, and Harris committed on the capital charge. He was tried at the Shrewsbury Assizes, but the evidence failed to satisfy the jury, and he was acquitted. A few days since part of a watch, which was undoubtedly one of those which Zusman had in his case at the time of his murder, was discovered in a manure-pit at the Old Post Office Inn in this town. It had evidently been wrenched off from the other parts, and bore the name of I. Cohen, Birmingham, upon the dial plate. It is a significant fact that both the accused individuals had more than once previous to their apprehension lodged at the Old Post Office Inn, where the portions of the watch were found.

SUNDERLAND.—The trustees of the Hudson Annuity Fund have completed a contract with the North British Assurance Company for the purchase of an annuity for Mr. George Hudson of 520*l.* by an investment of 4000*l.* at the rate of 13 per cent. Of this sum the York treasurer has provided 1500*l.*, and the London, Newcastle, and Sunderland treasurers have raised the remaining 2500*l.* The residue of the subscriptions, estimated to produce the sum of 1000*l.*, when realised will be invested by the trustees.

WIGAN.—On Tuesday week a farmer named John Brown, residing at Dig Moor, Upholland, described as remarkably quiet when sober, but the opposite when drunk, killed one of his farm servants, named George Ashton, in a fit of madness from drink. On the previous day they had been with Brown's wife and daughter to the ceremony of laying the foundation-stone of a Primitive Methodist chapel at Dig Moor, and had attended the tea party which followed, after which they adjourned to a public-house, where they remained drinking till midnight, when they went home. They there obtained more drink, though they were all completely intoxicated, and at last Brown became wild and threatened to kill the whole of them. He thereupon seized the poker, and beat Ashton unmercifully about the head until he died. He then obtained a white sheet, which he threw round him to represent a surplice, and taking a book pretended to read the Burial Service over the remains. He was taken into custody, and the coroner's jury on Monday, after a few minutes' deliberation, returned a verdict of Wilful Murder against him.

YORK.—The Archbishop of York has taken the first formal step in the Chancery Court of this city against the Rev. Charles Voysey, rector of Healaugh, near Tadcaster, for heresy contained in sermons preached by him, letters of request having been lodged by the archbishop in the registry. The articles, which will be forthwith filed, set out the specific charges which Mr. Voysey will have to answer. An appearance has been entered on behalf of Mr. Voysey, and the case will in all probability be tried in the forthcoming term.

Ireland.

VISIT OF THE LORD-LIEUTENANT TO WATERFORD. The Lord-Lieutenant and the Countess Spencer paid a visit to Waterford on Monday. His Excellency was presented with addresses from the Chamber of Commerce and the Mayor and Corporation of the city. The address of the latter contained an allusion to the land question, in noticing which, in his reply, his Excellency said that he need not point out the difficulties of the question. They might be sure that every endeavour would be made by the Government to introduce and carry a measure which would be fair and equitable to all whose interests were concerned. If they succeeded one more difficulty would be removed which, while it remained unsettled, must retard the progress of the country.

THE IRISH CHURCH.—The arrangements for the assembling of a National Synod of the Irish Church are proceeding satisfactorily. Diocesan conferences have been held in various places, and delegates elected. A lay conference will assemble in Molesworth Hall, Dublin, on the 12th inst. Viscount Powerscourt has announced his intention to purchase the tithe rent-charge on all his estates, and place it in the hands of the governing body of the Church, which is equal to a gift of 19,000*l.* Captain Richard Cooper has announced his intention to purchase the rent-charge on his estate, and re-endow the Church. Another gentleman, formerly a parishioner, on learning that the Rev. Dr. Foley intended to purchase his own glebe-house and hand it over to the Church, has promised to do the same in his own parish. Among the first contributions paid in to the Sustentation Fund were 2000*l.* from the Earl of Derby, and 2000*l.* from Mr. Peek, M.P. for Mid-Surrey.

AMNESTY MEETINGS.—The agitation to obtain a release of the Fenian prisoners is spreading over the country, and daily acquiring increased strength. At a meeting held at Ennis, on Sunday, from 15,000 to 20,000 persons walked in procession, and 2000 mounted men formed part of the array, all of them wearing green emblems. The Rev. Mr. Kenny, C.C., presided, and the principal speakers were the Rev. Messrs. Quaid and Vaughan. A resolution was passed declaring that the unconditional release of the exiled and suffering convicts would do more for the peace and harmony of the Irish people than has yet been done by the present

Liberal Government. Another resolution pointed to the example of France and America, and expressed an opinion that any further confinement of the prisoners would be "a stain on the Constitution under which we live, and dishonourable to the civilisation of our age." On the same day a still larger meeting was held at the Devil's Bit, in Tipperary, the numbers being estimated at 10,000. The procession was headed by the clergy of the town, well mounted, and wearing green favours, followed by a host of well-mounted farmers. The Rev. Mr. Kerman, C.C., of Templemore took the chair, and Mr. P. Gill, of Kenagh, the Rev. Mr. Power, and others addressed the meeting. Mr. Gill said that they had met to let the British Government know they wanted justice and reform, not revolution; but if progress emanated not from reform it should from revolution. On the same day a meeting was held at Hannahstown, near Belfast, at which the principal speaker was Mr. A. J. Kenna, who said that England had always acted on the principle that where nothing would be yielded to magnanimity or justice it could be made to yield to pressure. He was proceeding, as an illustration of this, to show that one king went down upon the block to give place to the man who deluged their country with blood, when a voice cried out, "There will be no more of them," a remark which was received with cheers. Another meeting was held on the same day in Newry. It was feared that the Orange party would interrupt the proceedings, and a large force of police was mustered in the town to prevent disturbance. No opposition, however, was offered, Mr. Johnston, M.P., having advised the Orangemen not to interfere. About 5000 people attended the meeting, which was held in a large field, and 20,000, it was stated, were collected in the town. The trades marched in procession, with banners bearing such mottoes as "Release our Heroes," "Tenant Right," "Justice, not Mercy," and green arches with "national" flags were suspended across the streets. The Rev. Mr. O'Hagan occupied the chair. Resolutions, more temperate than at some of the earlier meetings, declaring that it would be just, wise, and politic of the Government to release the prisoners, and that the policy of conciliation would be considered incomplete while one remained in penal servitude, were adopted unanimously. On Monday a meeting convened by the Mayor, in compliance with a requisition signed by a number of members of Parliament, magistrates, and respectable citizens, was held in Cork. The Mayor presided. Mr. Murray, the High Sheriff, moved the first resolution, to the effect that the liberation of the Fenian prisoners would be received with satisfaction by all classes of the Irish people. He eulogised the present Administration for its liberal policy towards Ireland, and as an evidence of this referred to the passing of the Church Bill. The mob exclaimed that the Fenians were the means of passing the measure, and after Mr. Maguire, M.P., and others had in vain attempted to address the meeting, the proceedings closed amid great excitement. At all these meetings the "crownless harp" has been a favourite symbol, and at Ennis the absence of the royal emblem was peculiarly remarkable.

GREAT PROTESTANT DEMONSTRATION.—An important meeting is to be held on the 21st inst., at Belfast, to give "Protestants the opportunity of expressing their views on the religious, educational, and social condition of the country." The Duke of Abercorn is to preside, and the Earl of Erne, the Earl of Lanesborough, Viscount Massereene, Viscount Templetown, Viscount Crichton, Mr. William Johnston, M.P., Sir Thomas Bateson, M.P., and other noblemen and gentlemen, will be present. Resolutions approving of "the practice of tenant-right as it exists in Ulster" are to be proposed, and the meeting will pledge itself to "support any equitable measure calculated to improve the relations between landlord and tenant, and to insure to the industrious tenant-farmers of Ireland compensation for all their improvements." On the evening of the meeting there will be a grand banquet.

RIOT AT NEWRY.—A serious disturbance occurred at Newry on Monday night, caused by a report being circulated that the Orangemen were attacking the convent. The Catholics turned out in large numbers to defend it, and the police were obliged to charge to prevent a collision. Some persons were injured.

ATTEMPTED MURDER IN MEATH.—On Monday Mr. John Armitage Nicholson, of Balrath House, near Kells, was fired at in open day, while driving from the Kells Petty Sessions, accompanied by a lady and an armed policeman. A slug grazed his face; the coachman and the lady were so seriously wounded that the coachman has died. This is the second attempt on Mr. Nicholson's life within a month. Nine men are in custody.

THE LAND QUESTION.—A meeting to discuss the land question was held on Sunday at Kingstown, and was attended by about 4000 persons, chiefly of the working class, most of whom wore green leaves or ribbons in their hatbands. Mr. D'Arcy, M.P., and Sir John Gray were the principal speakers. The former thought that the landlord who refused fair terms to good tenants should be done away with; and the latter expressed his conviction that the people ought to be rooted in the soil of the land which God had given them, and that the hands of landlords, who had stolen the property of the people, should be so tied that they could steal no more. A resolution was adopted to the effect that the laws at present governing landlord and tenant in Ireland are unjust, and require the interference of the Legislature.

THE CASHEL MURDER.—A man named Ryan, who was arrested a few days ago on a charge of complicity in the murder of an old man, named M'Grath, near Cashel, a few weeks ago, has committed suicide in Cashel Bridewell. Dwyer, who was arrested at the time of the murder, is still in custody.

Scotland.

COURT APPOINTMENTS FOR SCOTLAND.—The Queen has appointed the Rev. Dr. Archibald Charteris, D.D., to be one of her Majesty's Justices in Ordinary in Scotland, in the room of William Muir. The Queen has also appointed Laycock, Professor of the Practice of Medicine in the University of Edinburgh, to be one of her Majesty's Physicians for Scotland, in the room of James Begbie.

FLORE MACDONALD.—It is stated that a biography of Flora Macdonald, the heroine of the Jacobite cause, carefully kept in the family repository, is to be published in Edinburgh. The biography is being edited by her last surviving descendant, and contains some anecdotes hitherto unpublished, of the escape of the Prince.

TRAINING SHIP FOR THE CLYDE.—A line-of-battle ship Cumberland having been sent from the Admiralty as an industrial training vessel for the destitute and homeless boys of the West coast, the ceremony of her commissioning vessel took place last week in Row Bay, near Greenock, under the presidency of the Lord Provost of Glasgow. The *Glasgow Herald* states that the fever has broken out on board the vessel on Monday evening 20 of the boys were taken to the Hospital in a prostrate condition. The disease is a very virulent type, and the sufferers were not favourably.

STEAM OMNIBUSES FOR GLASGOW.—At a meeting of the Glasgow police board Monday night Mr. Man & Drummond obtained the sanction of the authorities to run steam omnibuses by way of experiment, on the streets of Glasgow.

TRIAL OF TWO BROTHERS FOR MURDER.—At Glasgow Circuit Court, on Tuesday, two brothers named Barbour, were indicted on a charge of murdering a poor washerwoman at Greenock. The outrage was one of a peculiarly atrocious nature. The elder pleaded guilty to the minor part of the homicide, and escaped with 15 years' penal servitude, and the younger escaped punishment, on the ground that he had merely concealed his brother's crime.

Railways.

TRAM RAILWAYS.—A prospectus has been issued by the Tram-Railway Company of Great Britain (Limited), with a capital of 100,000*l.*, in which the company proposes to purchase the patent of Thomas Page, C.E., the engineer and architect, of Westminster Bridge, and of Mr. Haworth, of the purpose of bringing, by properly constructed tram or roadrails, into direct communication with existing railway systems, outlying towns and villages, without building costly viaducts, embankments, bridges, or making tunnels and cutting, for the purpose of constructing and working the same. It is stated that the cost per mile of a tram railway, the company's system will average about 1000*l.*, the cost per mile of the railways already in existence, including purchase of land, &c., has averaged 10,000*l.* A locomotive, invented by Mr. Page, will be used, where required: it will ascend steep gradients, make no noise; and, by incorporating with it the characteristics of Allen's economic engine, will be worked at a cost of about one-third of an ordinary locomotive. Among the first districts to be selected for its introduction are those of the Great Northern Railway in Devonshire, the vicinity of the Cambridge and of Bolton in Lancashire and the iron and coal fields of Yorkshire. The experiment will be watched with interest by shareholders of existing railways and by the trading and agricultural classes at present removed from direct access to the chief lines of traffic.

Sporting.

THE INTERNATIONAL SCULLING MATCH.—The match between Walter Brown, the American champion, and the English crew did not take place on Thursday, as previously expected, in consequence of Brown's suffering from an acute attack of fever, which prevented his sitting in his boat. Sadler was substituted, and Brown and his friends have returned to their homes.

Miscellaneous.

SANITARY REFORM.—The immense progress made in sanitary legislation in this kingdom in the last few years is well known. Mr. Simon, the member of the Privy Council, maintains that the sanitary law now affirmed in our statute-book are such as to put into full effect, would soon reduce to quite a negligible amount our present very large proportions of the population affected by the disease. But when we mark the degree to which the intentions of the Legislature are required to be carried out, the contrast presents itself. Mr. Simon has pointed out that not only have permissive enactments been unapplied, but even nuisances which the law relatively declares intolerable have, on an enormous scale, been suffered to continue; and diseases which mainly represent the inoperativeness of the law still occasion, he believes, fully a fourth of the entire mortality of the country. The main reason for this will be found in the complexity and the obscurity of the law and the division of the legislative power. The Legislature meant to proceed in these matters cautiously and tentatively, and the impulse which has come from many different quarters, from two or three departments of the Government, has led to the confusion and incoherency of result, such as has been attained if all had originated from or proceeded to a single chief ministry for the subject-matter.

have again to report dull markets throughout the kingdom, leading to a further reduction of 1s. to 2s. per qr. We must ascribe this decline chiefly to the large arrivals of foreign Wheat and Flour, which consumption was unable to take off, while importers being disinclined to land, pressed sales. Spring Corn was equally neglected. Oats, except fine old, were 1s. per qr. cheaper. Beans, Peas, and Barley declined 1s. to 2s per qr., excepting at a few markets on the East coast, where feeding Barley was in good demand at late rates. Flour was sold slowly, at a decline of 1s per barrel and sack. Since Friday last 101 grain and seed-laden vessels have arrived off the coast, of which, with those left over from last week, there remained for sale last night 102 cargoes. Best samples of Wheat off the coast have been held firmly; inferior sorts, however, met with a very slow sale, and as at the end of the week the arrivals increased, prices tend down wards. Maize commanded better attention, at an advance of about 6d. per qr., whilst Barley was easier to purchase. For Rye the bids made from the Continent are at declining rates. Linseed was easier to buy. Business in cargoes on passage and for forward shipment was at a standstill, excepting a chance transaction in Barley.

There are large arrivals of foreign Wheat and Oats this week, but small of Barley and English grain. There was a poor attendance at this morning's market, and English Wheat met with scarcely any demand, but millers showed no disposition to purchase foreign, excepting at a decline, and as Sellers were not willing to submit to any reduction, prices remain nominally the same as on Monday. New Oats were 6d. per qr cheaper, and other descriptions of spring corn unchanged in value.

SEED MARKET.

Our market is still quiet, no speculation having yet sprung up for any kind of seed; the consumptive demand, as is usual at this time of the year, is now very limited. Winter Tares are in fair request at high rates. A supply of new Dutch Hempseed has now reached us, which meets with a brisk demand. Canary and all other seeds are without alteration in value. JOHN SHAW & SONS, 16, Water Lane, E.C.

ENGLISH WOOL.

A fair amount of business has been done, and there appears a more general disposition to purchase, at fully late rates, though an advance is only very reluctantly given.

Foreign.

The Emperor left St. Cloud on Tuesday
 where the Ministers joined him on
 Government have given notice, in the
 that in consequence of the disorders
 from several meetings, it has
 putting in force the law investing the
 Police with power to stop any meeting
 consider likely to disturb the public
 meeting was held at Belleville on
 the presidency of M. Lissagaray, at
 the dissolved, but the crowd resisted the
 struggle ensued, during which a few
 One, pretending to be wounded,
 the Boulevard de Belleville, shouting,
 "I am being murdered." This person was
 being examined by the doctors it was
 he had received no wound at all. On
 Tuesday evenings there were other meet-
 ings, and some disturbances were expected,
 but passed off quietly, the authorities having
 taken precautions against any disorder. The *Rappel*
 publishes a letter from M. Victor Hugo, in
 which he encourages the idea of a manifestation
 on the 10th inst., and advises the deputies
 not to declare themselves absolved from
 duty. The letter says—"On the day when I
 am elected I will be with you. This
 I cannot do." The *Moniteur de l'Armée*
 says the Emperor has not deemed it necessary
 to fill the vacancy in the command of the 6th
 corps, and that the Staff of that corps will
 be reorganised. A meeting was held at Rouen on Satur-
 day for the purpose of protesting against the renewal of
 commercial treaties with England and other
 countries. M. Puygarbier was elected president
 of the meeting. Another meeting was held on Tuesday,
 at which 200 persons were present. M. Puygar-
 bier was president, who was received with great
 enthusiasm in the abrogation of the commercial
 treaties compatible with the government of the
 country. The Bishop of Ajaccio and
 M. Bave, the poet, critic, and Senator, died on
 Tuesday. Disturbances of a serious character
 occurred at St. Aubain, Aveyron, on Thursday and
 Friday week, in consequence of a strike among
 the workmen employed by the Compagnie d'Orleans. The
 rioters attempted to drown the chief engineer of
 the railway, and wounded the Sub-Prefect and his
 family. They also burnt the general stores and ware-
 houses of the company. On Friday morning an actual
 riot occurred, during which the mob attacked the
 railway station upon their assailants, killing ten and
 wounding several more of the rioters. On Sunday
 the rioters remained at the furnaces by the men on
 the others employed at the forges followed
 the strike as soon as a supply of coals had
 been obtained. At Decazeville the men are at work, and
 in a peaceful disposition. On Tuesday work was
 resumed, and M. Callon received full powers
 from the workmen on strike in a conciliatory
 spirit. The interest in the Pantin tragedy has been
 revived by the report that the body of Kinck, the
 murdered child, had been found in
 the garden, between Olwiller and Wattwiller,
 and that wounds had been found on the body, and
 that the murder had occurred about six weeks back.
 However, it has proved to be without foundation.
 The Emperor has made up his mind to brave the
 "note of infamy," the "penalties decreed against him by the
 Carmelites in the event of his not
 leaving his convent within ten days. On the day
 the ten days' grace expired he sailed from
 Paris towards the end of the year, by which
 the Imperial Council may be expected to have
 the real business before it.
 The telegrams from Spain continue to
 be alarming in the provinces. In Saragossa
 the Volunteers attacked the troops who
 were some prisoners, and a sanguinary fight
 lasted 21 hours, and ended in the defeat
 of the Volunteers, each party having lost a large number
 of men. Government artillery having played heavily
 against the Volunteers. On Friday and Saturday the
 Volunteers of Valencia attacked the troops with such
 energy that the Government was compelled
 to send reinforcements. On Sunday there was
 a general attack on the city, in order that
 the Volunteers might collect their dead and wounded. On
 Monday the Government troops, who had been waiting

for reinforcements, were to have recommenced the
 attack, but it was delayed in consequence of the rebels
 breaking up the railways. A frigate was stationed off
 the town, ready to assist in the attack. The Volunteers
 had then some 40 pieces of artillery and occupied the
 principal places in the town. The Government troops
 attack the town, when the Volunteers, swayed by these
 terms, prepared to surrender, and on the 10th inst. they
 must surrender at discretion, and without any
 conditions. Sundry defects of rebel banners, and
 their consequent dispersion, are reported from
 Andalusia, Granada, and Catalonia, where the
 Government state that the disturbance is reduced
 to small groups of insurgents, who avoid encounters
 with the troops and employ themselves in destroying
 railways and telegraphs. In Catalonia the band of
 Suer, comprising 1000 men, is reported to have been
 defeated at Junquera, close to the French frontier, and
 to have turned against the chiefs, who fled across the
 frontier. In the same province 1500 insurgents are
 said to have laid down their arms. About 6000
 insurgents have submitted themselves in the pro-
 vinces of Tarragona, Gerona, Lerida, and Barcelona.
 Bejar, in Old Castile, is in insurrection, and the
 peaceful inhabitants have abandoned the town
 to the insurgent population. The Municipality
 of Ternel, aided by the Volunteers de la Libertad,
 have proclaimed the Republic. At Valencia and
 Grenada the Volunteers resisted the order for their
 disarmament, and, after a struggle, occupied the
 the fields. The two insurgent leaders, Paul
 and Salvochea, have fired the town of Cartha-
 gena. Cabeilla and Carbajal have been shot at by
 Senor Saler, a member of the Cortes, has been killed at
 Saragossa. Senor Castelar, the deputy, has been
 threatened with assassination by Republicans, and has
 left the country for Portugal. The other Republican
 Deputies are secreting themselves, owing to a rumoured
 intention on the part of the Government to arrest
 them by virtue of the Liberties Suspension Act. The
 Cortes have nominated a committee to report upon
 what course shall be adopted respecting the Republic.
 Deputies actually in the field—over 20 in number.
 On Wednesday, on the recommendation of the com-
 mittee, the Cortes authorised legal proceedings against
 those Deputies who have joined the insurrection. A
 great number of Republican papers have been
 suppressed by the authorities. Senor Pruneda,
 one of the members of the Cortes compromised
 in the outbreak at Saragossa, has been arrested.
 General Prim on Saturday held a grand review of
 the troops in the capital, mustering 8000 to 10,000 in
 number, evidently with the intention of showing his
 real military strength, and to disprove the current
 rumour that the garrison had been reduced by detach-
 ments to 3000. Except in Madrid, the Volunteers in
 all the principal towns of the provinces have been dis-
 armed, and martial law has been proclaimed in Cata-
 lonia, Aragon, Old Castile, Valencia, and Murcia, and
 Cordova. The inhabitants of Madrid have been in-
 structed to arm their servants, if they believe them faith-
 ful, in order to defend their houses from pillage in case
 of a riot, and precautions have been taken against a
 surprise of the offices of the Ministry of the Interior,
 which would put the insurgents in possession of the
 telegraph wires. The Republican clubs have also been
 ordered to be closed. Numerous families have taken
 alarm in the south of Spain, and have sought refuge at
 Tangier.
 PRUSSIA.—The *Provincial Correspondence* of Wed-
 nesday says that the friendly reception which the
 Crown Prince of Prussia met with during his late
 visit to Vienna entirely confirms the belief that the
 Court of Austria is quite as much alive as is the
 Prussian Government to the importance of drawing
 closer the friendly ties which formerly existed between
 the two Courts. The Prussian Budget was presented
 to the Diet on Friday, and shows a deficit of nearly
 five million and a half thalers. In the sitting of the
 Lower House of the Diet on Tuesday Herr Lowe put
 a question to the Ministers relative to the concession
 of the premium loan of 100 millions to the Discount
 Company in Berlin. Herr Braun proposed that the
 Government should be requested to introduce a Bill
 abolishing the principle of premium loans within the
 North German Confederation. The Finance Minister
 stated in reply that the Government were occupied
 with the legal settlement of the question, but that it
 had no longer any objection to the premium loan, since
 thereby a foreign market could be opened to the
 Prussian funds. Nevertheless, the vote of the Diet
 would be duly taken into consideration. A shock of
 earthquake was felt along the Rhine in the night
 between the 21 and 23 October. It was but slightly
 felt at Boppard and Cologne, but in the intermediate
 localities of Bonn, Coblenz, and Neuwied, it was very
 alarming. In some places the inhabitants rushed into
 the street, believing their houses were about to fall on
 them, domestic fowl left their roosts, and a low rumbling
 noise was heard. The undulation at Remagen was
 from north-west to south-east, and lasted about
 two seconds.
 BADEN.—In the sitting of the Second Chamber on
 Monday, the treaty with the North German Confederation,
 whereby the subjects of the Grand Duke will be
 allowed to serve in the North German army, and vice
 versa, was discussed. The treaty was adopted, only
 three dissentient votes being given by members of the
 Ultramontane party.
 AUSTRIA.—The Crown Prince of Prussia left Vienna
 on Saturday morning for Venice. The Emperor pre-
 sented several of the suite of his Royal Highness with
 decorations. The Emperor Francis Joseph will start
 for his journey to the East on the 24th inst. His
 Majesty, according to present arrangements, will pro-
 ceed from Pesth by rail to Basiasch and thence by
 steamer to Rustchuk and Varna, where the Austrian

squadron will be waiting to receive him. He will then
 embark with V. Admiral Togo on board the
 yacht Graf von Constantinople, where he will stay a few
 days, and will proceed thence, with the Emperor of the
 French and the Sultan, to Jaffa, a combined fleet of
 Austria, Prussia, and France, and a combined fleet of
 escort. From Jaffa their Majesties will continue their
 journey to Jerusalem, and afterwards re-embark at
 Jaffa for the Suez Canal. The Emperor will visit
 Athens on the return journey, and will pass through
 upon Italian soil, in which case an interview with
 King Victor Emmanuel will certainly result. The
 Austrian Government has replied to the offer of the
 Prince of Montenegro to use his good offices with the
 refractory inhabitants of Bocche-de-Catara, to the
 effect that it knows perfectly well how to put down
 any disturbance that might arise, and that the
 waves and children of the insurgents would be
 allowed to return to the neighbouring territory of Mon-
 tenegro. The recruitment in the district of Ragusa is
 proceeding without any opposition.
 HUNGARY.—The Catholic Congress at Pesth was
 closed on Wednesday after arranging the mode of
 election. The Plenum Commission has finished its
 labours. The Hungarian Diet will commence its
 session to day.
 SWITZERLAND.—The international conference on
 the St Gothard railway question have concluded
 their deliberations on the draft of the treaty, and the
 final protocol has been signed.
 GREECE.—The Empress of the French arrived at
 Athens on Sunday evening. During her stay her
 Majesty visited the most celebrated antiquities of the
 city, and dined at the Royal palace. On Monday
 evening her Majesty left for Constantinople.
 RUSSIA.—General Fleury, the new French Am-
 bassador, has arrived at St. Petersburg with the
 Emperor Napoleon's reply to the invitation of the
 Czar to visit the International Exhibition in 1876. The
 Emperor of the French expresses his thanks for the
 invitation and promises to resume his health and the
 state of politics do not prevent his journey. The
 Ambassador of Bokhara has applied to Russia for assist-
 ance against Sher Ali, and proposes the payment of
 the payment of a tribute. He has also proposed his
 son with an embassy to the Czar in order to secure his
 succession to the throne through the protection of
 Russia.
 ITALY.—The Crown Prince arrived at Venice on
 Sunday morning, and was received by the Royal
 delegates, Signor Nigra and Cortina. The Prince
 proceeded on board a Royal gondola to the Doge's
 Hotel. On Tuesday evening his Royal Highness
 visited the Apollo Theatre, which was specially ad-
 mitted. An immense crowd of people surrounded
 the Prince, and the band played the Prussian Anthem.
 On Thursday his Royal Highness left for the
 Prince Humbert and the Princess Margherita arrived
 at Naples on Friday.
 PAPER STATE.—Some of the papers of the
 Emperor Napoleon, the excavations executed by his Majesty's
 orders and at his cost have produced most valuable
 results for archaeology, and for the history of ancient
 Rome. The works directed by Chevalier Pietro Rosa,
 member of the Paris Academy of the Fine Arts, have
 lately brought to light nearly the whole extent of the
 Palace of the Caesars, and a description of them will be
 included in the supplement which Signor Rosa is
 preparing for the purpose of issuing to his great work on the
 Palatine edifices.
 THE PRINCIPALITIES.—On Saturday an explosion
 of gunpowder took place in a shop at Braza, and
 caused great destruction. Several persons were killed
 on the spot, and others severely injured.
 TURKEY.—The Imperial yacht Aigle, with the Em-
 press Eugenie on board, preceded by the Sultan's
 yacht, and attended by English, French, Italian, and
 Russian despatch-boats carrying the ambassadors, and
 the Turkish iron-clad squadron, under the command of
 Ibrahim Pasha, following in the rear, arrived in the
 Bosphorus on Wednesday afternoon, and proceeded to
 the Palace of Beglerbey, on the Asiatic shore. On the
 arrival of the Empress in the Bosphorus the girls from
 the Catholic schools of Constantinople, who were on
 board a French steamer, sang a hymn of welcome, and
 the Empress warmly bowed her acknowledgments. The
 yacht Aigle dipped her flag when the squadron arrived
 at the Palace of Beglerbey, and the Sultan went off in an
 elegant caïque specially constructed for the Empress.
 On landing his Majesty gave his arm to the Empress,
 and escorted her up the avenue to the Palace, whilst
 royal salutes from the Asiatic and European sides of
 the Bosphorus were fired, and the bells of Constantinople
 were rung. The Sultan then returned to the Palace
 of Dolma-Bakera, and a general amnesty was proclaimed.
 After sunset the vessels at the Golden Horn and
 in the Bosphorus, and the minarets and mosques
 were lighted up, and a general illumination took
 place, and fireworks were displayed from the Sea
 of Marmora to the Black Sea. The Emperor
 of Austria will arrive on a visit to the Sultan early
 in November. Fud Pacha's political testament
 is now positively ascertained to be apocryphal.
 Messrs. Candlish and Beaumont have finished their
 inquiry at Constantinople, and left for Smyrna.
 Several witnesses gave evidence of extravagant expen-
 diture for the Abyssinian expedition in Constantinople.
 There was a heavy gale last week in the Black Sea,
 attended by several shipping disasters. The English
 steamer Capri, from Odessa for England with wheat,
 foundered at the entrance of the Bosphorus and the
 captain, chief officer, engineer, and 14 men were lost,
 seven were saved.
 EGYPT.—The Viceroy is at Cairo, and there is no
 appearance of his intending to leave for Constantinople.
 His Highness has engaged all the vacant bed-rooms in
 Cairo, as well as all the disposable vehicles for the open-

ing of the Suez Canal. The price he is to pay for the former is 2l. 10s. a day, and for the latter 4l.—so that his guests will be lodged, boarded, and driven about for nothing.

CAPE OF GOOD HOPE.—Accounts from Cape Town to September 5 state that the Parliament was engaged in retrenching the public expenditure. The Bill for making all religious support voluntary had been rejected, as had also the Paper Currency Bill. Bishop Twells was alleged to be on his way to England, under an assumed name, in a sailing ship from Natal. The drought had entirely broken up, and there had been large falls of snow in the eastern and western provinces. The Tatin goldfields were turning out very satisfactorily. Several new diamond discoveries had been made.

INDIA.—The projected Durbar has been abandoned, in consequence of the prevailing scarcity and the famine in Rajpootana. The Duke of Edinburgh is expected at Calcutta on December 20, and many Indian princes and nobles will be invited to meet him. The Viceroy will leave Simla on the 19th inst., will visit Nynceetal Halls (?), and reach Calcutta on Nov. 8.

AUSTRALIA.—A parliamentary crisis has arisen at Melbourne, and a vote of want of confidence in the Government is pending in consequence of their having nominated Mr. Rolfe (who is not a member of Parliament) to the post of Commissioner of Customs. The supporters of the Ministry are indignant at this appointment. The Legislative Assembly has resolved to abolish the State aid grant in five years, diminishing the amount by 10,000l. in each year. Mr. Fawcner, the founder of the colony, is dead. Kenealey and the other pardoned Penians have been expelled the colony under the Criminals Influx Prevention Act. In New South Wales a postal treaty has been arranged with Queensland, in accordance with which a monthly mail is to be established by way of Torres Straits, to alternate with that by King George's Sound. The captain of the United States steamer Kearsage has been fitted at Sydney. It is reported that the Fiji Islands have solicited an American protectorate. In South Australia a telegraph line is about to be laid from Adelaide to the north-west coast. The Queensland Parliament has passed the estimates, and is about to be closed. The electors of Kennedy, in North Queensland, have elected, by a majority of one, the Right Hon. John Bright as the representative of that district in the Queensland Parliament, because he had expressed himself in favour of separation from the south, on the alleged ground that the northerners are ground down by taxation for the sole benefit of the southern part of the colony.

NEW ZEALAND.—The colonists have agreed to offer England subsidies for 1500 soldiers for five years. The rebels are quieted, and no further massacres are reported. Earl Granville, in his last despatch to Sir George Bowen, refusing the aid of Imperial troops, states that there are three alternative principles on which the relations between the colony and the Home Government might be settled if the loan of troops were to be prolonged. Firstly, the Home Government might manage the war according to its own views of justice and expediency; but to this the colony would not consent. Secondly, the Home Government might lend its name and let the colony drag it through whatever doubtful byroads of policy it pleased; but to this the Home Government could not agree. Thirdly, there might be Imperial troops subject to orders from the Horse Guards, and colonial troops subject to the Governor and his Cabinet, but the probable effects of this division of authority may be conjectured even from the experience of the former Maori war. Lord Granville therefore says that there is no alternative between making this war an Imperial war, and keeping the Imperial resources out of it entirely. He says that it is doubtful whether, under any circumstances, the Government would be justified in taking back the conduct of New Zealand affairs, which it yielded up at the colony's own desire. If it did resume the burden, it would certainly do so only on condition of the colonists consenting to let it act on its own policy, and not on theirs, and the colonial overtures betray not the faintest symptom of willingness to accept any control by the Home Government.

UNITED STATES.—Ex-President Franklin Pierce died on Friday at Concord, of dropsy, aged 65. President Grant has appointed General William M. Belknap, of Iowa, Secretary-of-War, in the room of General Sherman. At the Pennsylvania election, on Wednesday, Mr. John W. Geary, Republican, was re-elected Governor by a majority of about 5000. At the Ohio election on Tuesday Mr. Rutherford B. Hayes, Republican, was re-elected Governor by about 7000 majority. At the Iowa election Mr. Samuel Merrill, Republican, was re-elected Governor by about 25,000 majority. The vote was smaller than usual in both States. No returns from Indiana or Nebraska have been received. The New York Republicans have nominated General Sigel as State Secretary, and Mr. Horace Greeley State Comptroller. Ex-President Phillimore has been elected President of the National Commercial Convention now sitting at Nashville. Mr. Boutwell, the Secretary of the Treasury, made a speech on Saturday night at Philadelphia, in which he urged the people to support the Administration of General Grant, who fully deserved their confidence. He deprecated any expansion of the currency, and declared that the national debt should be paid honestly and manfully in coin or its equivalent. Since March 1 the debt had been reduced by 56,000,000 dollars; this reduction, while the country was still crippled by the late war, showed the ease with which, in view of the rapidly increasing wealth of the country, the entire debt could be paid. The present system of taxation would permit an annual reduction of the debt by 100,000,000 dollars. He believed that the increasing confidence throughout the

world in the capacity and honesty of the United States would enable the Government to fund the debt at a rate of interest not exceeding 4½ per cent. He favoured a greater taxation of luxuries and accumulated property, in order to relieve the taxation of the poorer classes; and he hoped that the coming elections would result in the triumph of the Republican party, as the success of their opponents would injure the credit of the Government abroad. Mr. Jefferson Davis arrived at Baltimore on Friday. The Cuban privateer Hornet put into Cape Fear River, North Carolina, on Sunday, short of coals. She was sold to the Cuban insurgents at sea after leaving Halifax, her name being changed to that of the Cuba. The Government authorities seized her on Monday, and took her to Wilmington, where the Government has ordered an adjudication by the Courts, and has held the officers to bail, preparatory to their trial for violation of the neutrality laws. The commander has since demanded the release of his vessel on the ground that she cleared from a British port for Cuba. The decision of the authorities on the subject will be given to-day. Eastport, Maine, was entirely destroyed by the recent high tides.

CANADA.—His Royal Highness Prince Arthur was enthusiastically received at Montreal on Saturday.

NEW BRUNSWICK.—Great damage was done on Monday week by storm and high tides at New Brunswick. The loss is estimated at several million dollars.

PERU AND CHILI.—Great consternation existed at Lima in consequence of news having arrived of very severe earthquakes in the southern provinces on August 20, 21, and 24. A large quantity of property had been destroyed, and on the latter day the shocks were frightful. At Iquique and Arica the sea receded with fearful velocity, and returned 6 feet beyond the usual level several times. Business was totally paralysed, and Arica was deserted. Several shocks of earthquake had been felt in Chili, but they were nothing like so severe as those that were occurring almost daily in the south of Peru.

City Intelligence.

MONEY MARKET, FRIDAY.—**BRITISH FUNDS:** Consols are 93½ to 93¼ for Delivery, and 93¼ to 93½ for Account; New and Reduced Three per Cents, 91½ to 91¼; Bank Stock, 236 to 238 ex div.; Exchequer Bills, March, par to 5s. pm.; June, 7s. to 11s. pm.; India Five per Cents, 113½ to 114½.—**FOREIGN:** Argentine, 81½ to 81¼; Brazilian, 83 to 83½; Egyptian (1864), 85½ to 86½ ex div.; Ditto (1868), 76½ to 77; Viceroy's Seven per Cents, 81½ to 81¼; Ditto Nine per Cents, 98½ to 99½; Italian, 52½ to 52¼; Ditto Tobacco Loan, 84½ to 85½; Peruvian, 79½ to 80½; Portuguese, 33 to 34; Orel, 84½ to 85½; Nicolai, 68 to 68½; Moscow, 83½ to 83¼; Charkof, 80½ to 81; Spanish, 26½ to 27½; Turkish Five per Cents, 42 to 42½; United States 5-20 Bonds, 81½ to 82 ex div.; Erie, 23 to 23½; Illinois, 93½ to 94.

Metropolis and its Vicinity.

THE CONTEMPLATED VISIT OF HER MAJESTY TO THE CITY.—A special meeting of the members of the Bridge House Estates and Improvement Committees of the Corporation of London was held on Friday, at Guildhall, to take into consideration the correspondence laid before the Court of Common Council on the previous day, on the subject of the contemplated visit of the Queen to the City, for the purpose of opening the new Blackfriars Bridge and the Holborn Viaduct. The correspondence which has taken place between Mr. Gladstone and the Lord Mayor was discussed, and although it cannot be said that her Majesty has definitely signified her pleasure on the subject, there can be no doubt that the Queen is disposed to be present at the opening of the new bridge, if her health will permit. The City authorities are desirous, in the event of her Majesty being able to attend the opening of the new bridge, that she should also be present at the opening of the Holborn Viaduct, which is considered to be the more important public work of the two, and there is a strong feeling that both should be opened to the public on the same day. At the meeting on Friday Mr. J. Paterson and Mr. Deputy Fry were elected joint chairmen of the committees, but all definite arrangements were postponed until the wishes of her Majesty were known. It is rumoured in the City that the opening of the Bridge and Viaduct will take place on Friday, the 5th, or Saturday, the 6th of November, in which case they will be in the mayoralty of Alderman J. C. Lawrence, M.P. for Lambeth, the present Lord Mayor.

SAFETY OF DR. LIVINGSTONE.—A telegram from Bombay states that a letter of Dr. Kirk to the Bombay Government has been published, stating that a caravan which had reached Zanzibar reports Dr. Livingstone's arrival at Miya. The road between the coast and Miya was open and safe. Small parties of men and another caravan were expected. Another telegram says that Dr. Kirk has received a letter from Dr. Livingstone, dated Lake Banglewo, July 8, 1868, saying:—"I have found what I believe to be the sources of the Nile, between 10° and 12° south." Dr. Livingstone was in good health and spirits when the letter was dispatched.

OPENING OF BUNHILL FIELDS CEMETERY TO THE PUBLIC.—On Thursday this time-honoured place of sepulture, called by Southey the "Campo Santo of the Dissenters," was formally opened to the public, with much ceremony, under the auspices of the Corporation of the City of London, for purposes of peaceful recreation. For the last 17 years it has ceased to be used as a burying-ground, and was at one time threatened with appropriation to secular uses. The Lord Mayor officiated at the ceremony, assisted by the Sheriffs, the principal officers of the Corporation, the Earl of Shaftesbury, Mr. Reed, M.P., Mr. S. Morley, M.P., and a large number of clergymen of various denominations. Several of the speakers alluded to the

large number of eminent Nonconformists among whom were John Bunyan and General Fleetwood, Cromwell's Secretary of State, Erskine and Lady Maria Pugh; Mrs. Quaker; Dr. Isaac Watts; Danton; Ritson, the antiquary; Stothard and Thomas Hardy and John Horne; David Nasmith, the founder of the Rev. Joseph Hughes, founder of Dr. Thomas Goodwin; the Rev. D. of the Puritans; Dr. Abraham "Encyclopaedia;" and many more.

OPENING OF THE HOLBORN Viaduct.—On Thursday morning this viaduct was thrown open to foot passenger traffic, and continued to be used six o'clock in the evening. During the day an immense number of people passed over it, and for some hours at mid-day so dense was the traffic that locomotion was extremely difficult. The completeness and strength of the work was admired, and the carved stonework of the buildings erected at each corner of the viaduct, Farringdon Street was the source of great admiration. The handsome iron gates and stonework at the front of St. Andrew's Church also attracted a number of spectators.

COURT OF COMMON COUNCIL.—On Wednesday the Court of Common Council was held, at which the office of Lord Mayor. A resolution to approach to the new Poultry and Meat Market widening Long Lane, was adopted. A committee on the improvement of London was read, the conclusion of which was that no alteration could be determined on till it was known what effect the other improvements in the city have upon the traffic. The bridge, however, was closed for a fortnight for repairs, after which the Bridge is opened, though pedestrians will be unable to pass.

ROYAL MILITARY ACADEMY AND COLLEGE.—An official inquiry as to the policy of the Royal Military Academy at Woolwich with reference to the Military College at Sandhurst has terminated. The commissioners have resolved not to recommend the adoption of the plan, although it is believed that various improvements will be carried out with reference to the training, and the standard of elementary education required from candidates before admission to the Academy.

THE HIGH TIDES.—The fate of the trial record was sealed on Friday. There is no record on record. The tide at London Bridge in the morning was 2 feet lower than the spring-tide in March, and on the southern coast it was even lower than was on the previous Wednesday. At Jersey, so much apprehension had existed, it only exceeded that of an ordinary spring-tide by 1 foot 7 inches. Although, however, the tides were so high on the coasts, they committed great ravages on the Atlantic seaboard. At New Brunswick, on the 4th and 5th, property estimated at several million dollars was destroyed, and Eastport, Maine, was entirely ruined.

MERCANTILE MARINE PENSIONS.—The Mercantile Marine Pensions Bill, which was introduced on Friday contains regulations with reference to the pensions payable by the Board of Trade to the support of Greenwich Hospital. To be eligible for pensions applicants must prove at least 25 years of service prior to January 1, 1835; must not be over 55 years of age, and must have been incapacitated from age. The amount of pension is limited to the sum of 3l. 8s. a year. The amount applicable to these pensions, and paid by the Board to the Board of Trade, is 4000l. per annum.

PROPOSED RAILWAY EXTENSION TO THE MANSION HOUSE.—On Tuesday the committee of the Metropolitan Board of Works considered the application of the Metropolitan Railway Company, for permission to construct a railway terminus in the new Mansion House Street, which was referred by the City Commission of Sewers, who stated that they could give no opinion on the merits of the application till they were furnished with more information with respect to it. This report was unanimously agreed to by the board.

HARVEST HOME IN THE CITY.—On Tuesday the church of St. Edmund the King and St. Dunstons, Lombard Street, was crowded to excess by the Rev. Stephen E. Gladstone, the son of the late Minister, and the curate of St. Mary the Lamb, deliver a discourse on the harvest home, giving. Every available spot was filled long before the hour announced for the commencement of the service. The church was tastefully decorated, the chancel being placed in the recesses of the west end, either side, while the chancel rails and pulpit were adorned with pears, apples, and other fruits. At the commencement of the service a procession, headed by the Rev. P. G. Hill, the curate, and the Rev. S. Gladstone, emerged from the choir, and took their seats in the choir. The service was choral, was then proceeded with, and at its conclusion, Mr. Gladstone, who wore the Order of the Bath, preached from the 15th chapter of the 1st Epistle to the Corinthians.

CESSATION OF THE "MORNING STAR."—The Morning Star and Evening Star ceased to appear on Wednesday. The proprietors, in making the announcement, stated that when the journal was first published, 14 years since, one of its objects was the propagation of political principles which were then counted extreme in their Liberalism; the other was to establish the feasibility of providing journals of the best sort under what were then the untried conditions of a penny newspaper. The latter has been proved to be the success of the enormous number of contemporaries in London and the provinces which have repeated

and the former has been justified by the political ideas which the *Star* was founded on. It is now accepted and organic articles of the creed; and causes which seemed forlorn and seemed impossible to have achieved a triumph. Under these circumstances, they say no longer any sufficient reason for dividing the strength of the Liberal party.

THE SERPENTINE.—In consequence of the operations which have been going on for the greater portion of the bed of the Serpentine exposed to view, a pool of water of an extent alone remaining. This is not only for the benefit of the fish, but for the purification of the Serpentine, as any water remains, the fish are to be removed. The process was completed on Monday under the supervision of Mr. Frank Buckland, inspector of the other gentlemen. Several hauls of the bream, carp, Prussian carp, tench, and perch. There was also taken a lake of 2 inches, which had been put into the Round Pond in Kensington Gardens.

HOME FOR LOST DOGS.—On Saturday an order for the removal of the Home at Islington. Mr. Pavitt, the manager of the Home, was summoned before Mr. Mansfield on a complaint made against him by a Mr. Baker, of Islington, the substance of which was, that the Home was an intolerable nuisance, and injurious to the health of the person who removed the dead dogs to carry away any number not exceeding in the whole three tons a week. After hearing the evidence on both sides, the magistrate said that until something was proved he should refrain from ordering the removal of the Home.

EMBEZZLEMENTS IN THE CITY.—At the Mansion House, William M'Lachlan, a stockbroker, was charged on the charge of embezzling and converting to his own use Maryland Bonds and other securities belonging to General Sir John Douglas and amounting to more than 10,000*l.* The prisoner represented himself to be a stockbroker, and that capacity had been entrusted with bonds amounting to the amount of about 110,000*l.*; of which he had sold 100,000*l.*, paying to the proprietor about 97,000*l.*, while of the remaining 10,000*l.* was alleged that he had appropriated the same to his own use. After evidence had been given on the subject the prisoner was remanded. On Monday a young foreigner, named Buchler, was brought before the Lord Mayor on a charge of having uttered a bill of 1857*l.*, with intent to defraud. There was much dispute about the facts; but the defence contended that the fraud, if there was one, was against a Prussian bank and not against Messrs. Worms, before the Court had no jurisdiction. The Lord Mayor took a different view of the matter, and intended his intention to commit the prisoner for trial.

SUPPOSED FENIAN COLONEL KELLY.—In consequence of the fact that the coroner's jury at King's Hospital last week returned a verdict that the deceased Colonel Kelly was a printer's reader, named Martin, the police authorities and persons connected with the Government still believe that Colonel Kelly was in reality Colonel Kelly. Kelly and Martin were similar in height, weight, size, looks, and every particular. Both had a scar on the cheek, and received a bayonet wound in the abdomen. Kelly was a new Kelly and went to the bedside of the deceased Martin and then looking at the photograph of Kelly, Kelly and Martin were one and the same man.

It was ascertained that Martin was in the office of getting leave of absence from the Queen's office, Dalston, and he was absent for three weeks towards the end of 1867, during which the rescue of Colonel Kelly occurred. That Kelly is still the belief not only of detectives and others who knew him well. A Kilkenny correspondent of the *Daily Express* states that Edward Kelly was the son of a licensed victualler in Upper Street, Dublin, and that when the *Irish People* was first published, he was employed, was seized he escaped France, and then came to England. The correspondent positively that he was none other than the reported "Colonel Kelly," the latter having assumed the name. At the funeral, which took place on Monday morning at Leytonstone cemetery, there was a Fenian demonstration, which afforded evidence that the deceased, whether Kelly or Martin, must have held a high position in the Fenian brotherhood. As early as 10 o'clock crowds of all ages began to assemble in Lincoln's Inn Fields and the adjacent streets. Up to 12 o'clock the crowds continued to augment until the square and the neighbouring streets were blocked up by a mass of people. The greatest order, however, was observed. No more than the ordinary number of persons were to be observed. Shortly after 12 the procession was to take part in the procession were in order in Lincoln's Inn Fields. The members of the United Society of Labourers mustered 1000 strong; the members of St. Patrick's were numbered nearly 3000, while unions and organisations numbered in the aggregate 10,000. The marshals and officers of the various unions wore green silk scarves, with a black crape and green rosettes on the left arm, while every man and woman in the procession wore a green rosette or riband with a piece of black

crape attached. At least 90 per cent of the processionists were Irish, including the better class of mechanics, artisans, and labourers, and were all becomingly, and many of them respectably, attired. Meantime the funeral cortege was being marshalled in Strahope Street, Clare Market. It consisted of a hearse, drawn by four horses and two mourning coaches, with two horses each. The hearse, consisting of several well-known Fenian leaders, having taken their places in the coaches, the coffin containing the body was brought out of the undertaker's shop in which it had been placed since the funeral, and instead of being placed inside the hearse, was carried in front of it, on the shoulders of two men. The hearse was of oak, covered with black cloth, and studded with white nails and plates. The cortege proceeded with great difficulty, owing to the narrowness of the street. Great Wyld Street, and Great Queen Street, into Lincoln's Inn Fields, accompanied by 100 delegates from the lodges in the Brotherhood and the other societies. On arriving in Lincoln's Inn Fields it halted, when the coffin was placed inside the hearse, with the cry of "Hats off" which was responded to by nearly all present. The procession then took the following route to its destination:—Carey Street, Chancery Lane, Fleet Street, St. Paul's Churchyard, Cheap-side, Cornhill, Leadenhall Street, Whitechapel, Mile End Road, Bow, and Stratford. There was no hostile interference on the part of the police, both the metropolitan and city force doing all in their power to facilitate the progress of the procession. As it passed through the city the procession comprised fully 6000 persons, walking six deep. At Whitechapel Church it was joined by a contingent of at least 1000, and by other large bodies at Mile End, Bow, and Stratford, from which place the road to the cemetery was lined with crowds of people. So great was the crowd at the gates of the cemetery, that it was with the utmost difficulty the mourners and others immediately concerned could obtain admittance. A full Catholic service was then performed, in the presence of between 5000 and 6000 persons. At the conclusion of the service the crowd dispersed in a quiet and orderly manner.

PROPOSED AMNESTY TO THE FENIAN PRISONERS.—A meeting, consisting of about 4000 persons, was held a few nights since in a field adjoining Lancaster Road, Notting Hill. According to the placards and handbills which were circulated, the object of the meeting was "to promote the release of incarcerated and exiled patriots, and to urge upon the Government the necessity of granting an immediate and unconditional release of all political prisoners who are now pinning in British prisons." A resolution to the following effect was carried:—"That it is impolitic on the part of the Government to detain the Fenian prisoners longer in custody; that no concession of justice to Ireland shall be deemed satisfactory unless accompanied by a free and unconditional pardon to the Fenian prisoners, and that their free pardon would be the best means of conciliating the feelings of the people of Ireland."—On Wednesday night a meeting, composed of about 1000 persons, was held in Union Street, Borough, to promote the release of the Fenian prisoners. Resolutions were carried to the effect that the Government will act wisely as well as generously by granting an immediate and unconditional release to all the political prisoners, and pledging the meeting to support the great amnesty demonstration in Hyde Park on Sunday, the 24th inst. Some details were given of the arrangements for the procession on the 24th. The different organisations will march from their respective localities and meet in Trafalgar Square at 1 o'clock. The "ladies' procession" will form on the National Gallery side of the square. The procession will be headed by five horsemen, followed by the central body; after which will come the "ladies' procession," followed by the district bodies, trades, benefit societies, &c. There will be bands and banners in the procession.

THE LATE FIRE AT BAYSWATER.—The adjourned inquest on the persons who were killed by the recent fire and explosion at Bayswater was held on Monday, when Mr. Titheridge, the occupant of the shop, was examined, but he could throw no light on the origin of the fire. Other witnesses suggested that it might have been an explosion of gas. The jury returned a verdict that there was no evidence to show how the fire originated, and suggested that a more efficient fire station should be maintained in the neighbourhood.

FATAL FIRE AT NEWINGTON.—On Sunday morning, shortly before 6 o'clock, a fire was discovered at Newington Butts, on the premises occupied by Mr. Alfred M'Micken, a tailor, and his family, consisting of his wife, an adult son, two young children, and a female servant. They retired to rest at midnight on Saturday, when all appeared safe. About 6 o'clock next morning Mr. M'Micken suddenly opened the door of his house and raised a cry of fire. Engines were promptly in attendance, with an escape, and the fire was speedily extinguished. The conductor of the escape succeeded in rescuing Mr. M'Micken, Alfred M'Micken, a child, and Louisa Woodward, the servant; all three were much burnt, and were unconscious when rescued. Mrs. M'Micken and the eldest son were found dead. The persons rescued were placed in a cab for the purpose of being taken to St. Thomas's Hospital; but Mr. M'Micken died in the cab from the effects of the injuries he had received, and the child Alfred died in the hospital in the course of the afternoon, making four deaths in all. The servant girl was not so much injured as at first supposed, but is still in the hospital. The fire is supposed to have originated in the smouldering of some hot ashes in a dust bin, where, among other refuse, waste slips of cloth had been thrown. The inquest was opened on Wednesday, but was adjourned to obtain the evidence of the servant, who was on that day too ill to be examined.

THE MURDERERS OF MIDDLE TINNÉ.—Accounts

from Tripoli to September 30 have been received at Malta, announcing that the Turkish Government have succeeded in capturing the assassins of the late Mlle. Tinné, and recovering the young negress Justina and some of the stolen property. The Turkish chief Ibrahim claims any connection with the escort which betrayed Mlle. Tinné, and has associated in bringing the murderers to justice. He has placed the young negress and the recovered effects under the protection of the chief who was to have escorted Mlle. Tinné, and they will be shortly sent on from Malta to Marseilles and Tripoli, where the negress and servants are expected to arrive in the first week in November.

THE WOOD GREEN MURDERS.—It has been discovered that 16 years ago Boyd, the man who was murdered at Wood Green, was a Fenian, and married a widow lady who had 2000*l.*, which her former husband had left her. Boyd spent the whole of the money, treating her very badly, and at length deserted her, leaving her almost penniless. She had not heard of him for seven years until she saw the account of the murders in the papers a few days ago. A marriage which Boyd contracted in Japan four years ago is therefore bigamous, and the person whom he then married will lose all claim upon any property he may have left. The murdered woman was buried on Saturday afternoon at the Tottenham Cemetery, in the presence of a large number of people. The funeral was fixed for the previous day, but it was delayed in order to have the parish coffin covered with cloth, the expense being defrayed by public subscriptions. On Sunday Wood Green presented a very remarkable appearance. Thousands of people poured into the park from about nine in the morning until dusk, to visit the scene of the murders. There were cabs, carriages, and other vehicles crowded to an enormous extent, while the omnibuses that came down were quite filled both inside and out. The public-houses were all open, and were frequented by vast numbers of people. Before 1 o'clock drunken men, and women too, were seen struggling through the crowd on their way to or from Bound's Green Road. About mid-day the whole neighbourhood was as busy as a fair. Elder Cottage was sold by auction at Garraway's on Wednesday. It was described as "with gardens in front and in the rear, and good detached stabling, very pleasantly situated in Bound's Green Road, facing the Alexandra Park Palace, let to Mr. Boyd at a rental of 33*l.* per annum." The iron house where the Hinsons lived is to be taken away, or the practice of letting it for a dwelling, which had been pursued for the last 14 years, discontinued.

MURDER AND SUICIDE NEAR HOUNSLOW.—On Monday morning a shocking tragedy was enacted near Hounslow, the victim being a gentleman of position and influence in the neighbourhood. About midway between Twickenham and Hounslow is the little village of Whitton. A great deal of the small house property in the hamlet is owned by a Jewish family named Kyezor, the principal of whom, Mr. Louis Kyezor, about 83 years of age, was the representative of his parish on the Twickenham Local Board, Quartermaster-Sergeant of the local Volunteer Corps, and a supporter of most of the institutions of Hounslow, Twickenham, Isleworth, and Brentford, where he had made himself very popular by his energetic advocacy of what he called "justice to the working people." His speeches delivered at the various public gatherings were always animated, and at times extremely humorous. With the members of the rifle corps he was also very popular, and he encouraged good shooting by presents of many handsome prizes. Adjoining his residence is a row of cottages known as Kyezor's Place, at No 13 in which lived an old gentleman named Thomas Hyden Green, aged 82. For nearly 50 years he had been employed as a stamper at Somerset House, but for the last few years he had been living on a pension at Whitton, being a tenant of Mr. Kyezor's. The latter for some time had reason to complain of a nuisance caused by Mr. Green, and had threatened to obtain the assistance of the magistrates unless the nuisance were abated. Mr. Green paid no attention to these threats, but as Mr. Kyezor had no wish to resort to extreme measures, he wrote to Mr. Green's friends, asking them to use their influence to persuade him to remove what was an eyesore to the neighbourhood. These letters having been ineffectual, Mr. Kyezor gave him notice to quit. On Sunday night Mr. Green was observed to take down three old horse pistols which he kept in the house, and to set about cleaning them. He then loaded two of them with heavy charges of large shot, and put them aside. His housekeeper asked what he intended to do with them, but he told her to mind her own business. It had been customary with Mr. Kyezor to leave his house soon after 8 o'clock every morning, and to take a short walk round the village. On Monday morning at 8 o'clock Mr. Green posted himself by the side of the road, about a dozen yards from Mr. Kyezor's villa, having a loaded pistol in his pocket. Mr. Kyezor came out at about 20 minutes past 8 o'clock, and had scarcely proceeded half-a-dozen yards when Mr. Green took the pistol from his pocket, levelled it at Mr. Kyezor, and shot him in the abdomen. Mr. Kyezor immediately dropped to the earth as if dead. Mr. Green, with the smoking pistol still in his hand, rushed into his own house before any one could stop him, snatched up the second pistol, discharged the contents into his own heart, and fell to the ground a corpse. Mr. Kyezor lingered in great agony until Tuesday morning, when he died from the wounds he had received, his recovery having been pronounced hopeless from the first. At the inquest on Wednesday the jury, after a short deliberation, found that Thomas Hyden Green killed Mr. Kyezor wilfully, feloniously, and with malice aforethought, and in a second verdict, found that he committed suicide while in a state of temporary insanity. It was stated at the inquest that Green's real name was Edwards,

and that he gave Lord Harrowby notice of the Cato Street conspiracy, and was advised by his lordship to change his name to Hidon. It appears, however, that Hidon was the name of the man who gave the information, and there is no doubt that this was Green's real name. The funeral of Mr. Kyezor took place on Thursday at the Jewish Cemetery, at Mile-end. Every mark of respect was shown by the inhabitants of Whitton to his memory, and there was a large gathering of people from the neighbouring parishes, including the local Volunteers. The funeral procession was nearly half a mile in length.

THE PUBLIC HEALTH.—The Weekly Return of the Registrar-General states that in the week that ended on Saturday, Oct. 9, 4113 births and 2870 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 23 per 1000 persons living, being 22 per 1000 in London, 25 in Edinburgh, 21 in Dublin, 18 in Bristol, 21 in Birmingham, 25 in Liverpool, 23 in Manchester, 26 in Salford, 24 in Sheffield, 24 in Bradford, 27 in Leeds, 20 in Hull, 22 in Newcastle-upon-Tyne, and 25 in Glasgow. The annual rate of mortality in Berlin during the seven days ending the 7th inst. was 27 per 1000. In London the births of 1119 boys and 1099 girls, in all 2218 children, were registered in the week. In the corresponding weeks of 10 years 1859-68, the average number, corrected for increase of population, was 2081. The deaths registered in London during the week were 1867. It was the 40th week of the year, and the average number for that week, corrected for increase of population, was 1312. The present return is therefore 55 above the estimated amount.

Provincial.

BIRMINGHAM.—The first general meeting of the members of the National Education League was held in this town on Tuesday. There was a large attendance both of ladies and gentlemen, the latter including many of the most forward promoters of the educational movement in all parts of the country. Mr. George Dixon, M.P., chairman of the Provisional Committee, was called to the chair; Mr. John Jaffray officiating as treasurer, and Mr. Jesse Collings as the honorary secretary. The "list of members" included residents in every county. On Wednesday evening a crowded and enthusiastic meeting was held in the Town Hall, the Mayor in the chair. Mr. Dixon, M.P., proposed a resolution recommending the scheme of the National Education League as the one best adapted to secure the education of every child in the country. The motion was seconded by Professor Fawcett, M.P., supported by Mr. Mundella, M.P., and carried unanimously. Mr. Joseph Chamberlain, of Birmingham, moved the next resolution, requesting the executive committee of the National Education League to prepare a Bill, based upon the principles of the League, for introduction into the House of Commons during the next session of Parliament. Mr. Cremer seconded the motion, which was supported by Alderman Carter, M.P. for Leeds, and Mr. Lloyd Jones, and carried.

BLACKBURN.—On Monday morning at an early hour Mr. James Eastham, a respectable farmer, brother of the town clerk of Clitheroe, was on the New Bridge, Hurst Green, near Stonyhurst, when three rough-looking men, with a dog, came along the bridge. Suspecting that they were poachers, he said, "What's your game?" The poachers thereupon kicked and struck him, and then raised him on the side of the bridge, and pitched him into the brook, a depth of about 12 yards. A constable on duty in the neighbourhood at 2 A.M., heard Mr. Eastham's groans, and on going down to the brook found him bleeding about the legs and face, and dreadfully injured. The constable carried him on his back to the Sherbines Arms, where it was found that one of his legs was broken, and his ribs, back, and face much hurt. He was taken to his farm at Mytton, but faint hopes are entertained of his recovery. Three men were apprehended, and charged with the attempted murder; but as Mr. Eastham was not able to identify them, they were discharged.—On Monday the county magistrates committed for trial the five men implicated in the murderous poaching affray on the morning of the 2d inst., and in which two policemen, named Barber and Higgins, who displayed extraordinary courage, were seriously maltreated.

BOLTON.—On Monday morning a desperate encounter took place between eight gamekeepers and 16 poachers, at Longworth Moor, Belmont, near this town. The poachers had been previously suspected, and as they were passing along the road, with three dogs, shortly after midnight, the gamekeepers rushed out upon them with truncheons. The poachers retaliated, using as weapons, it is supposed, the hatchets employed in the manufacture of laths. Four of the gamekeepers were dreadfully cut about the head, and one of them is not expected to live. One of the poachers was left behind insensible, but he was carried off by the others while the keepers were removing their wounded comrades. Four men have been apprehended, and on Thursday they were remanded until the wounded gamekeepers are well enough to identify them.

CARDIFF.—There seems to be no doubt that the Red Jacket, which sailed from this port on the 11th ult. with a cargo of coals for Bombay, foundered in the Channel during the heavy gales which swept the English and French coasts about the middle of last month. A large vessel was seen to founder suddenly off Brest, and a great quantity of wreck has been washed ashore on the coast of Devon, some of which had the letters "Red Jacket" painted on it. The Red Jacket was a very fine vessel of nearly 2400 tons, and at one time was the crack ship of the celebrated White Star Line of Australian clippers.

CHESTER.—The Prince of Wales arrived in this city on Thursday evening shortly before 6 o'clock. There were present on the platform to receive him, Mr. Gladstone, Earl Grosvenor, Lord de Tally, and the Bishop of the diocese. His reception by the population as he proceeded to the Grosvenor Hotel was of the most enthusiastic description. There was an effective torchlight procession, with illuminations.

DARLINGTON.—On Sunday night a man named Owen Hanlon, who has long been suspected of Fenianism, and who was apprehended some time since in connection with the murder of Philip Trainer, drew a loaded revolver on five policemen outside a beerhouse in this town, but was seized so suddenly that he was prevented from firing the weapon. He was brought before the magistrates on Tuesday, and remanded until Thursday, when he was committed for trial.

DONCASTER.—Dr. Vaughan, while positively declining any personal gift from his parishioners on the occasion of his departure from this town, asked one favour of the mayor and town council, which he said he should value above any other recognition of his services. This favour was the authoritative closing of the Saturday market at a somewhat earlier hour of the night, in order to prevent the neglect of the Sunday consequent upon the indefinite extension of business on the eve of the day of rest. No step has yet been taken in consequence of this request.

EXETER.—The nomination of Dr. Temple to the see of Exeter has been received with great dissatisfaction by the High Church party in the diocese. A meeting of the English Church Union was held in this town on Monday night, Lord Eliot, the late Liberal M.P. for the borough, in the chair. Dr. Temple's nomination was strongly condemned, and the chairman and the other speakers strongly urged the dean and chapter to refuse their consent to the nomination, and dare the Minister to put in force the penalties of *premunire*. A resolution was unanimously adopted asking the rural dean to convene a meeting for the purpose of memorialising the dean and chapter of Exeter to refuse to sanction the appointment. On Thursday a rural diocesan synod to consider the subject was held at Plymouth, and was attended by 40 clergymen. After a long discussion a motion was proposed approving the appointment, but it was received with much laughter, and was not seconded. A second motion, asking Dr. Temple to disavow the opinions expressed in "Essays and Reviews," was lost by a small majority. A third motion, recommending the chapter to refuse to elect the new bishop, was afterwards proposed, but negatived by a majority of two. Several of the clergymen present abstained from voting. The last proposition was opposed by the Low Church party, but supported by the members of the High Church. A memorial against the appointment of Dr. Temple is in progress, but the clergy will sign it as private individuals. It is reported that the election of Dr. Temple will be opposed in the chapter.

On Monday morning William Taylor, the soldier who was sentenced to death at the recent sessions of the Central Criminal Court for shooting his corporal at the Devonport barracks, was executed inside the Devon county prison. During his imprisonment the convict had shown great penitence, and paid marked attention to the ministrations of the chaplain. A black flag was hoisted outside the gaol when the drop fell. Only a few stragglers collected in the road which runs alongside the prison. An inquest was afterwards held on the body before the county coroner. This is the first execution which has taken place in the West of England under the new Act.

LIVERPOOL.—The Church Congress was brought to a close on Friday evening by a grand *soirée* and musical performance in St. George's Hall. Votes of thanks were given to the Bishop of Chester for presiding over the Congress; to the Mayor and Corporation for the use of the Hall, and the ample accommodation it had furnished to the inhabitants for their hospitality; and to the local committee for the admirable arrangements they had made for the Congress. It had previously been resolved, on the motion of Earl Nelson, seconded by the Dean of Ely, that the next year's Congress should be held at Southampton. On the previous day there was a long discussion on the weekly offertory, during which the Rev. A. H. Mackenzie was the principal speaker. He was received with great and long-continued applause, which showed that the signers of the protest against his appearance at the Congress were in a woeful minority. In the evening of the same day a working men's meeting was held in St. George's Hall, under the presidency of the Bishop of Chester, at which the Archbishop of York, the Bishop of Oxford, the Bishop of Sodor and Man, the Dean of Ely, the Rev. Dr. Taylor, Archdeacon Denison, Mr. Cross, M.P., and Mr. Graves, M.P., were the speakers. The Bishop of Oxford was received with cheers mingled with hisses, which prevented his making himself heard for a few moments; but Archdeacon Denison was unable to obtain a hearing until the Archbishop of York succeeded in inducing the meeting to hear him patiently.

MAIDENHEAD.—This town has been thrown into a state of excitement this week by the fact that a nurse had mysteriously disappeared with a little girl, the daughter of Colonel Hickie. Late on Saturday night, when the discovery was made, many rumours were afloat of the supposed insanity of the nurse, of the ditches in the neighbourhood being searched, rivers dragged, and nothing found. The police suggested the propriety of searching the box of the missing nurse, when it was found that she had taken all her things with her, but no clue could be found at either of the railway stations. On Monday a reward of 100*l.* was offered to any person who shall restore the child alive and unhurt to its parents at Kidnells Park. The nurse is said to be an Irishwoman, and had received

notice to quit, for which she had threatened to be revenged. It is supposed that she walked to the four or five hours, and it is believed she was in Hammersmith.

Ireland.

PROPOSED VISIT OF THE QUEEN.—It is stated that the wish entertained by the Queen to visit this country next year, is likely to be carried out, and that arrangements are in progress at the royal Lodge, with a view to a visit from the Queen next.

THE IRISH CHURCH.—The lay delegates of the Irish Church held their first General Synod on Tuesday, the Lord Primate presiding. The attendance of the laity from all parts of the country was large. After some discussion it was carried by a large majority, that while the two orders of the Church in the future Church body should be kept together, yet, in case of a vote, it should be left for members to require that the vote should be taken in each order separately, so that no important resolution could be adopted without the consent of both of the clergy and laity. It was also agreed that the laity should be represented in the process of the two to one of the clergy.

THE ATTEMPTED MURDER OF CAPT. LAMBERT.—On Monday the Attorney General moved in the Queen's Bench, for a writ of *certiorari*, to be granted next month, to move for the removal out of the Galway of the trial of Barrett, for attempting to assassinate Captain Lambert. The writ was granted.

AMNESTY MEETINGS.—The Fenian demonstration in Dublin in favour of an amnesty to the prisoners took place on Sunday, and passed off quietly in consequence of a police notice prohibiting the procession by a devious and unnecessary route, and no general procession through the city, but the trades, with their banners and insignia, met at points, and proceeded to the place of meeting near to the Phoenix Park. Every person in the procession, as well as those who lined the streets, wore green scarfs or ribbon, and nearly all the ladies played had the Irish harp on them without exception. It is estimated that from 80,000 to 100,000 were assembled at Cabra. Mr. Butt presided, and the attempt to stop the procession had completely frustrated the demonstration, and made it more successful. They were assembled to declare the will of the people. Their voice would echo in the ears of the members of the council of the Government, the organs of the whole civilised world, proclaiming the necessity of thunder that the political prisoners must be released. He believed the time for argument had passed, that the question had gone beyond the mere release of a few prisoners. Mr. G. H. Moore denounced what he called "that vile, effeminate, tyrannical national self-conceit and national vanity that called itself English public opinion, which did not represent either the instincts or the interests of the people of England, which was an adulterated compound of sanctimonious hypocrisy and secret infidelity, outward swagger and half inherent funkiness, was at once arrogant and servile, overbearing and infirm of purpose, which was not born of the genius of the English people, but was the spawn and the gabbler of the weakest and vainest representatives of the English social system." He assailed the "barking hounds of the English press" for their comment on his recent speech in Trafalgar Square, and denounced "the mongrels, and the turpits who were barking at his heels." He said that it was the duty of Irishmen to differ from their masters, and that until their masters condescended to open their minds. When Englishmen showed that their religion it was seditious in Irishmen to theirs, when Englishmen expelled their king from the throne it was disloyal in the Irish people to defend his cause; when they elected a man to be their king, and limited the throne to a German family, it was seditious in the Irish people to laugh at their presumption.

It was concluded by moving a resolution to the effect that unconditional release of the political prisoners be an act eminently calculated to promote peace and to satisfy the people. Mr. H. Essey seconded the resolution, which was carried. Mr. Leverett, Roman Catholic priest, moved a second resolution, declaring that the imprisonment of the prisoners, in disregard of the feelings of the people of Ireland, was calculated to bring the strongest discontent. Mr. G. Russell, of the Trades' Association, moved the next resolution, to the effect that the release of the prisoners would be an effect that the Irish people as a great concession to the Irish nation. Mr. J. Collins seconded the resolution, which was adopted. The chairman then presented a petition to Mr. Gladstone, which was unanimously adopted. The trades then marched round the streets afterwards passed through the city, flying and bands playing, but everything was done quietly. Mass meetings were also held on Sunday in two county towns—Kanturk and Bandon. The unconditional release of the Fenian prisoners. The streets were paraded by men and women, the procession, accompanied by bands and banners, people wore green rosettes and sashes. In the town several triumphal arches with mottoes were erected in the streets. The principal speakers at both demonstrations were priests, who led the processions, the majority of whom came from rural districts.

FRIDAY, Oct 15

Stocks of warehoused Wheat and Flour have considerably increased in some of our larger ports during September, and as the supply from abroad has this month been large (a portion going direct to the millers), great dullness has continued to prevail in the trade, causing a further reduction of fully 1s. per qr. in the value of Wheat, while business was most restricted, but during the last day or two we noticed less inclination to force sales. The reduction in the value of warehoused Wheat since the middle of August is about 6s. per qr., but for floating cargoes the decline has in some cases been much heavier. With the exception of fine malting Barley, which is 1s. per qr. dearer, Spring Corn of all descriptions has been neglected, at a further reduction in value. Flour continued a slow sale, and must be written 6d. per barrel and 1s. per sack cheaper. The arrivals of grain and seed-laden vessels off the coast this week consisted of 102 cargoes, of which, with those left over from last week, there remained for sale last night 111 cargoes. Arrived cargoes of Wheat, after having been in good demand at the commencement of the week, have, owing to increasing arrivals off the coast, been a dull sale at 1s. to 2s. per qr. less money. Maize fluctuated, and closes fractionally cheaper. Barley was a quiet trade, and Rye barely maintained its late value. There was nothing doing in cargoes on passage and for forward shipment, except a transaction in East India Rape seed.

With the exception of Barley, the arrivals of foreign grain are good, of English small. There was a poor attendance at this morning's market, and the little English Wheat on offer was taken at the full prices of Monday. For foreign the demand was very limited, and the few sales made were at that day's quotations. Oats brought an advance of 6d. per qr., but other descriptions of spring corn were unchanged in value.

MANCHESTER, Oct. 14.—The trade has remained in a dull state throughout the week, with prices still tending in favour of buyers. At Liverpool the arrivals from abroad have been less extensive of Wheat, liberal of Indian Corn and Flour, and fair of Beans. Moderate supplies of Oats and Oatmeal have come to hand from Ireland. Our market this morning was fairly attended. Wheat and Flour were, on the whole, less pressed than previously, but the demand was limited, at barely the currency of this day se'nnight. Oats moved off slowly, at a further decline of 1d. to 2d. per bushel. Egyptian and new English Beans were each 1s. and 2s. per qr. cheaper. Indian Corn must be quoted 6d. per qr. lower.

SEED MARKET.

In the continued absence of all speculation there is but little passing just now in the agricultural seed trade. We have a limited consumptive demand for seeds required for autumn sowing. Winter Tares are in diminished request, and can now be bought for less money. Small orders still come to hand for Trifolium incarnatum. New English Rye for seed is offering at a low price. White Mustard seed is advancing in value. English Rape seed is firm, at recent currencies. Linseed, both imported and home-grown, is steady at late rates. Hemp seed we note 2s. per qr. dearer. Our Dutch letters state that in consequence of the deficiency of the crop values for this article are rapidly advancing. New Canary seed meets with a ready sale at the low rates now current. There has been some inquiry during the past week for Alsike seed. Windsor and Longpod Beans and also garden Peas are now offering. French Italian is in fair demand; values on the other side appear to be on the rise.

JOHN SHAW & SONS, 16, Water Lane, E.C.

WANTED, a GARDENER.—Apply by letter, with full particulars, addressed to HENRY NEWBERRY, Esq., Docklands, Ingatestone, Essex.

WANTED, a GARDENER, who has been used to Market Work, or to Rose Growing.—Apply, The Orchard Nursery, Mortlake, Surrey, S.W.

GRAY'S OVAL TUBULAR BOILER.

INTERNATIONAL EXHIBITION, CLASS IX., No. 2119.

Mr. GRAY begs to call the attention of the Nobility, Gentry, Nurserymen, Gardeners, &c., to his **NEW OVAL TUBULAR BOILER**.

Acknowledged by practical judges to be a great improvement on every form of Tubular Boiler yet introduced. It has proved itself superior to all other Boilers for quickness of action and economy of Fuel, doing its work with one-third less the amount required by any other.

Extract from Report in GARDENERS' CHRONICLE of International Exhibition, May 24, 1862, page 476.

"The upright form of Boiler is usually made on a circular plan, rather than a square, it seems possible that the makers on the oval plan should bring the tubes more closely together during the burning fuel, and thus being a, the change, though a slight one, with the fire. The usual form of a furnace being a parallelogram, it is no doubt an improvement."

They are made of all sizes, which, with prices, may be had on application.

JAMES GRAY, HORTICULTURAL WORKS,
DANVERS STREET, PAULTON'S SQUARE, KING'S ROAD, CHELSEA, S.W.

T. H. P. DENNIS & COMPANY, PATENTEES, HORTICULTURAL ENGINEERS AND BUILDERS IN WOOD AND IRON.

T. H. P. DENNIS AND COMPANY beg to direct the attention of Noblemen, Gentlemen, Nurserymen, and Gardeners, to the many and varied improvements they have in every description of Horticultural Erections. They continue to Manufacture Buildings of the highest order in Wood, Galvanized Metal, and their HIGHLY APPROVED Wrought Iron Construction. They have much pleasure in announcing that by the aid of modern appliances, in their Manufactory, all kinds of Horticultural Buildings are constructed at the most moderate prices consistent with the high standard of their workmanship. Every description of Garden Structure arranged, designed, and heated on T. H. P. D. & CO.'S improved system, will be guaranteed to fully answer the purpose for which they are intended.

Gentlemen waited upon by Members of the Firm to advise and arrange for contemplated Buildings.

See NEW HOT-WATER BOILER and other Specialities and Patented arrangements are described in other Advertisements, and also in our Catalogue, which may be had on application.

ANCHOR IRON WORKS, CHELMSFORD.

BY HER MAJESTY'S ROYAL LETTERS PATENT.

ORMSON'S NEW PATENT ECONOMIC BOILERS.

ORMSON'S PATENT CONCENTRIC SADDLE BOILER.

ORMSON'S PATENT CONVOLUTED BOILER.

ORMSON'S PATENT TUBULAR BOILER.

From the Construction of these Boilers, it will be at once seen that the object of the Inventor is to economise fuel, by concentrating its entire force and vertical action on the surface of the Boiler, and not wasting it by Heating Brickwork and Chimneys, a fault common to the great majority of Boilers now in use. These Boilers are made of the best Welded Wrought-iron, of good substance, having no overlapping plates, holes, or rivets, and are therefore perfectly secure against expansion and contraction of the metal, an occurrence so frequent and fatal to all forms of Cast-iron Boilers. Please to state diameter and length of Pipe to be Heated.

HENRY ORMSON, HORTICULTURAL BUILDER TO HER MAJESTY,

AND HOT-WATER APPARATUS MANUFACTURER TO THE COMMISSIONERS OF HER MAJESTY'S ROYAL PALACES AND PUBLIC BUILDINGS, AND TO THE ROYAL HORTICULTURAL SOCIETY,

STANLEY BRIDGE, KING'S ROAD, CHELSEA, LONDON, S.W.

ITALY.—A Ministerial crisis occurred last week at Florence. All the Ministers, with the exception of Signor Ferraris, the Minister of the Interior, declared in favour of reassembling the Parliament and obtaining a vote for a provisional budget, and then dissolving the Parliament. Signor Ferraris, on the other hand, advised that the Cabinet should go before Parliament with a programme likely to obtain a majority, and that it should only be dissolved if defeated. In consequence of this difference of opinion Signor Ferraris and Signor Piranti, Minister of Justice, tendered their resignations. The King accepted them, and nominated Signor Rudini, Prefect of Naples, to the office of Minister of the Interior, and Signor Vigliani to that of Minister of Justice, and it is considered certain that they will accept portfolios in the new Cabinet. The King has invited the Emperor of Austria to visit Italy on his return from Egypt, and it is considered probable that the invitation will be accepted, and that the scene of the interview will be Naples, where the Empress of the French is also expected on her return home from the East. The accouchement of the Princess Marguerite, wife of the Crown Prince, will take place at Naples about the same time.

GREECE.—The Crown Prince of Prussia arrived at Athens on Wednesday evening, and was received at the railway station by the King.

THE PRINCIPALITIES.—Prince Charles of Roumania and the Princess Elizabeth of Neuwied were betrothed at Neuwied, near Coblenz, on Saturday. The marriage will be solemnised between the 10th and 15th of next month at the Castle of Wied. The Prince and his bride will immediately afterwards leave for Roumania. The House of Wied belongs to the Evangelical creed, whilst the branch of the House of Hohenzollern to which Prince Charles belongs is Roman Catholic. The Princess is 26 years of age, and the Prince 31.

TURKEY.—The Empress of the French, accompanied by her ladies of honour, visited the Sultana Validé, on the 13th inst., and afterwards dined with the Sultan and chief Ministers at the Palace of Dolma-Baktchi, returning to the Palace of Beglerbeg at night. On the morning of the 14th her Majesty visited St. Sophia and other mosques, as well as the principal objects of interest at Stamboul, salutes being fired during the whole time of her passage to and from Beglerbeg. In the afternoon the Empress received the return visit of the Sultana Validé. On the 15th her Majesty witnessed, from a window of the Dolma-Baktchi Palace the Imperial procession to mid-day prayer at the Mosque of Behiktach. The Sultan was on horseback, attended by a brilliant escort. Subsequently the Empress received the members of the diplomatic body and their wives at the Beglerbeg Palace, and then steamed up the Bosphorus in the Sultan's yacht to witness the promenade to the Sweet Waters of Asia. The weather was splendid, and the scene very interesting. There were innumerable caïques and yachts on the water, all gaily decorated, and thousands of persons assembled on the shore, including the cream of the female Turkish aristocracy and Turkish women of the middle classes in brilliant costumes, on foot and in carriages, besides many Arabs and Europeans. The Empress and her suite landed in a State caïque at the Sultan's kiosk, and there was a military reception, music being played by the band. Her Majesty, who was dressed in a yellow and lilac dress, and wore a yellow plumed hat and a black lace mantilla, then appeared on the balcony of the kiosk, and afterwards passed several times round the sward and up the valley in an open carriage, preceded by high Turkish dignitaries on horseback. She afterwards went on foot amongst the Turkish ladies, and, after remaining several minutes in conversation with them, embarked with her suite in a State caïque, rowed by 14 men. On the return to the Beglerbeg Palace the grounds were lighted up, and the ironclads and men-of-war up the harbour were illuminated. On Tuesday afternoon the Empress left for Alexandria, taking the direct route. The Sultan bade her Majesty farewell at the palace of Beglerbeg. The Imperial yacht *Aigle* was accompanied by the French men-of-war *Ajaccio* and *Forbin*, and by the Sultan's yacht and four Turkish ironclads. Troops lined both sides of the Bosphorus, and the forts fired a parting salute. During the whole day the weather, previously bad, was uninterruptedly beautiful. The Emperor of Austria is expected to arrive at Constantinople on the 28th inst., and will probably remain five days. The Crown Prince of Prussia will arrive on the 26th inst. In honour of both Imperial and Royal guests a grand review will be held on the shores of the "Sweet Waters." The English Ambassador will leave in the *Antelope* on November 5 for an excursion in Syria, and proceed thence to Suez for the inauguration of the Canal. The question of opening the Dardanelles and the Bosphorus for navigation at night by merchant vessels has been solved by the Porte having consented to allow in future outward bound vessels to pass through both Straits at night.

THE HOLY LAND.—A Jerusalem letter reports the expected arrival of the Duchess d'Aosta, in the fulfilment of a vow made by her Royal Highness during her recent illness. She will, it is said, bring with her a magnificent offering to the Church of the Holy Sepulchre which she then promised to the Virgin, and which consists of an emerald of great value, that has for several centuries formed an heirloom in the family of the Pozzi della Cisterna.

EGYPT.—The Empress of the French arrived at Alexandria yesterday morning at daybreak in the Imperial yacht, *Aigle*. No salute was fired on her arrival, in accordance with her request. The Empress disembarked at half-past 10, and proceeded direct to Cairo, accompanied by the Viceroy, who had arrived on the previous day from Cairo to receive her Majesty. The Viceroy has invited the principal repre-

sentatives of science, art, and literature in the great Universities of Europe to be present at the opening of the Suez Canal. He will pay their expenses there and back, and they are to be his guests during their stay in Egypt. Professor Max Müller has been invited from Oxford. The Viceroy's liberal invitations has caused such a demand for the necessaries of life that the price of beefsteaks at Cairo is said to be 15 francs a pound.

ABYSSINIA.—Messrs Powell and Jenkins, the relatives of Mr. and Mrs. Powell, who were murdered in Abyssinia a few months back, have arrived at Suez from Massowah. With the assistance of 3000 men, placed at their disposal by Kassa, they invaded the hostile tribe's territory, captured the chief perpetrators of the crime, burned three villages, and carried away 1400 head of cattle as a present to Kassa. They brought away the remains of Mr. and Mrs. Powell, and recovered all their property, with the exception of their jewellery and money, but they could obtain no traces of their son, as his body was not found buried with those of his parents; and whether he was also killed or carried away is not known.

COAST OF AFRICA.—Advices received from French settlements at Senegal, state that a military post on the frontier of Cayor was threatened by the native chief Laddier. A convoy had been set from St. Louis to provision the garrison and put the place in a complete state of defence. The troops serving as an escort to the convoy have already had two engagements with several bands of fanatics who are Laddier's followers.

INDIA.—The Supreme Government contemplates a legislative prohibition against the indiscriminate killing of useful and ornamental birds (which supply good and wholesome food) during the breeding season, and has called upon the subordinate Governments for expressions of opinion. The Begum of Bhopal has just established a school of industry to be called the "Prince of Wales School." The Maharajah of Jodhpore has requested the British Government to construct a metalled road through his territory, employing British engineers at his expense, and further, has consented to bear all the expense of constructing the portion of the proposed railway from Agra to Ahmedpore which passes through his territory. Cholera of a virulent type is said to be prevalent at Peshawur, and a number of European cases are reported. It is remarked that the disease appears to be spreading as it did two years ago in the direction of Cabul and Cashmere, and to gather strength as it goes.

CHINA.—A wing of the Emperor's palace at Peking has been destroyed by fire. It contained the printing blocks for most of the works issued from the Imperial press, and the loss is said to be incalculable.

JAPAN.—The Mikado has entrusted all the important posts in the empire to Satsuma, Chosiu, Tossa, and Nadjena, ignoring altogether the claims of the other princes, many of whom are very influential. He has further ordered all the Daimios within a certain period to deliver up their war material, receiving payment for the same in paper. The punishment of the rebel chiefs is not yet decided upon. It is said that the British fleet are to congregate at Yedo, and that the Mikado will visit the vessels.

CANADA.—Accounts from Ottawa of the 20th inst. state that Prince Arthur had gone upon a hunting excursion in the Ottawa Valley.

UNITED STATES.—President Grant has written a letter to the editor of the *New York Ledger*, in which he emphatically declares that he had no connection with the recent gold excitement at New York, as was insinuated by certain journals and irresponsible persons. He has also denied the report, published by the *New York Herald* and *Baltimore Sun*, that he had had an interview with an agent of Messrs. Rothschild relative to a loan for the redemption of the public debt. The pastors of the Evangelical churches of Boston have tendered Father Hyacinth a public reception. The privateer *Hornet* has been liberated by the United States Courts of Wilmington, but was thereupon seized by the naval authorities, and her officers held prisoners. The crew were put ashore. The Virginia Legislature has elected Lieut.-Governor Louis and Judge Johnson to be members of the United States' Senate. The steamship *Trade Wind* went down at sea on the 24th ult. on her way from New Orleans to Belize, Honduras. The passengers and crew took to the lifeboats. One of these, having on board the captain and Mr. Corner, Chief Justice of British Honduras, was picked up, and taken to New Orleans. They had been three days without water. Some of the men became delirious, and one of them jumped overboard and was drowned. A steamer was sent from New Orleans in search of the other boats.

CUBA.—Intelligence from Cuba states that three steamers, with heavy reinforcements, arrived at Havannah on Sunday from Cadiz. The Captain-General has transmitted to the home Government documents proving the existence of an understanding and conspiracy between the insurgents on the island and the Republicans in Catalonia and Andalusia. In accordance with this understanding the Cuban insurgents were to assist with money the Spanish Republicans, in return for which, should a Republic be established, the independence of the island was to be recognised.

NEWFOUNDLAND.—It is said that the rock on which the steamships *Germania* and *Cleopatra* were wrecked off the Newfoundland coast has been ascertained to have been lately upheaved by volcanic agency. The British Government are about to send out a surveying party to mark and buoy all the dangerous rocks.

BRAZILS AND PARAGUAY.—The Brazilian Chambers had been prorogued until the 30th September. A modification of the Ministry is probable. Advices from Paraguay to the 5th ult. state that Lopez was at St. Estanislau. An expedition was leaving for the river Jeju upwards of 100,000 Paraguayans were

said to be making their way to Asuncion in a vessel the greatest misery and starvation. The Paraguayan provisional Government, and asked for protection.

City Intelligence.

MONEY MARKET, FRIDAY.—BRITISH CONSOLS are 93½ to 93¾, both for Delivery and New and Reduced Three per Cent. Consols, 236 to 238 ex div, Exchequer B. Consols, 114 to 114½. FOREIGN—Argentine 82 to 83; Brazilian, 83 to 84; Egyptian, 1804, 82 to 83; Ditto (1878), 70½ to 71; Viceroy's Consols, 81½ to 81¾; Ditto Nine per Cent., 100 to 100½; Italian, 52½ to 52¾; Ditto Tobacco Loan, 33½ to 34; Orel, 82 to 82½ ex div, 82½ to 83; Moscow, 83½ to 84; Charkof, 80½ to 81; States 5-20 Bonds (1865), 81 to 81½ ex div, 20½ to 21.

Metropolis and its Vicinity.

THE QUEEN'S VISIT TO THE CITY.—It is announced that her Majesty will visit the City on Saturday, November 6, for the purpose of opening a new bridge at Blackfriars, and the Holborn Viaduct. On Tuesday afternoon the joint committees appointed by the Corporation to make the necessary arrangements in connection with the approach to the bridge, assembled at Guildhall. Her Majesty will be accompanied by Mr. Gladstone and several other Ministers. A procession will then be formed, and will proceed from the bridge, along Bridge Street, Farringdon Street, Farringdon Road, and then along Charterhouse Street to the Holborn Viaduct, where her Majesty will declare open to the public, and take her leave. An address of welcome to her Majesty will be presented to her Majesty by the Corporation, and a Royal reply will be made. There will be no further pageant or ceremony, and her Majesty will probably pass in one of the Royal carriages from the bridge to the viaduct, and afterwards proceed to Windsor. It was decided on Thursday by the Council of Common Council, at a sitting with closed doors, that the proposed celebration of the event by a grand banquet should be abandoned. The arrangements to be carried out by the City are not yet determined on. With respect to the new bridge, the roadway is all but finished, and approaches are in progress, the ornamentation is advanced, and the structure, which is in all respects imposing, will be in complete work in order by the time her Majesty sets foot upon it, though a section of the intended decoration will afterwards remain to be carried out. The Holborn Viaduct is also nearly finished, and the arch which carries the new roadway over Farringdon Street, now that it can be seen to proper advantage from below, strikes the eye as being all that is graceful and elegant in design, consistent with the requisite strength and solidity.

VISIT OF SIR MOSES MONTEFIORE TO PRINCE CHARLES OF ROUMANIA.—At the instance of the Board of Deputies of British Jews, and in accordance with resolutions agreed to at a meeting held last week, Sir Moses Montefiore has consented to undertake a journey to the Continent, in order to confer personally with Prince Charles of Roumania, and bespeak his Highness's favourable consideration on behalf of the Roumanian Jews, whose condition has aroused the sympathy of the chief European Governments. Sir Moses left for Paris last week, and Prince should have left that city before his departure, was his intention to continue his journey, in the hope of meeting his Highness in some other capital.

THE NOMINATION OF DR. TEMPLE.—A very interesting and influential meeting of clergy and laity was held on Wednesday at the British Hotel, Cockspur Street, in protest against the appointment of Dr. Temple to the see of Exeter. The number of laity present from all parts of the country was very remarkable. The meeting was taken by the Rev. C. W. Page, perpetual curate of Christ Church, Westminster, and senior student of Christ Church, Oxford. After considerable discussion as to the exact terms of the motion, in which the Dean of St. Paul's, the Rev. Mr. Williams, the vicar of Kingston, and others took part, it was resolved to appoint a committee of clergy and laity to memorialise the Dean and Chapter of Exeter and the Crown against the nomination, and otherwise to take such steps as may be advisable in the matter. At the urgent request of the meeting the Rev. Dr. Pusey addressed them, and said that he could not refrain from expressing his opinion as to the horrible scandal which would be caused by this appointment. Bearing in mind the soul-destroying influence of "Essays and Reviews," to which he could bear witness from his position at Oxford, he could not bear witness from his position at Oxford, he could not admit the miserable excuse pleaded in favour of the bishop-nominate that the essays were independent of each other, and he could not help feeling that those support of the appointment were preferring party to Almighty God and the souls of men. In fact, the other essays were but commentaries on Dr. Temple's essay. He felt that their first step should be to strengthen the hands of the Dean and Chapter of Exeter, the moral weight of whose refusal would be intensified if from different parts of England a feeling on the subject was expressed, and thereby they might avert what in the sight of Europe would be so horrible a scandal. It was then resolved unanimously to request the Earl of Shaftesbury to be chairman, and Dr. Pusey to be vice-chairman, and the following were appointed members

the Earl Nelson, the Deans of St. Gloucester, Ripon, and Carlisle, the Right Hon. Gathorne Deshayes, Mr. S. W. Parquhar, Mr. J. G. Talbot, Mr. E. Brett, Mr. B. C. L. Bevan, the Rev. C. D. Wilson, D. Moore, and J. W. ... to add to their number. The ... Mr. John Boodle were appointed, and Mr. G. Noel Hoare treasurer. ... of the Earl of Shaftesbury having ... the *Record*, declining to act in ... a deputation consisting of the ... Dean Mansel, Mr. Fitz Roy, and ... on Thursday ... and asked him to reconsider his ... and to act with the High Churchmen ... as Dr. Temple. Lord Shaftesbury ... the deputation very courteously, ... a positive answer then, saying that he ... to sleep over a matter of importance.

HIGH HUNT.—On Tuesday afternoon a bust created by public subscription, in memory of Leigh Hunt, in Kensal Green Cemetery, was unveiled by Lord Houghton, in the presence of relatives, and of a small party of literary gentlemen. His lordship delivered an address on the occasion in one of the little side rooms on the ground, the day being too cold and the outdoor orations. The bust, which is of marble, was executed by Mr. Durham, R.A., and successfully portrayed Leigh Hunt's kindly features. The following quotation from his works was placed beneath the bust—

"Write me as one
That loves his fellow-men"—

by the statement that "James Henry Leigh Hunt was born October 19, 1784, and died August 28,

PROPOSED RAILWAY STATION AT THE HOUSE.—At the meeting of the Metropolitan Board of Works on Friday a report from the solicitor was read, on the proposition of the Metropolitan District Railway Company to carry their line the entire length of the new street to the Mansion House, and to construct a station at its termination opposite the Mansion House, in lieu of carrying the line to the Tower, and constructing a station on the street as originally intended. The report stated that the railway company had no power by any means to make the deviation and station as proposed, and that the Board, in the present state of the law, had no power to give effect to the application, without the concurrence of the Commissioners of Sewers of the City of London. The Board stated. At a meeting of the Common Council on Thursday, a letter from Lord Devon, chairman of the railway company, was read, inviting the Council to assist in carrying the line to the Mansion House and placing the City station there instead of on the street. The letter was referred to a committee.

THE ABBEY.—It is stated that the whole of the fees now paid for the maintaining and showing and protecting the chapels and tombs in the Abbey is under the consideration of the Chapter.

HOUSE STREET.—On Monday morning the thoroughfare, which has but recently been completely opened for traffic. For some days the street has been opened to foot-passengers. After the opening, and throughout the day, the vehicles passing through it were very numerous, and the Poultry and Cheapside were somewhat relieved, a large number of the vehicles from the West End to the Bank having crossed them in preference to the new street, thus necessitating the necessity of proceeding round St. Martin's Lane. There is now a complete street from the Mansion House, almost as far as Blackfriars.

EASTERN CABLE.—It is expected to leave the day with the electric cable for the line between Bombay and Suez. On Wednesday the chairman, and friends of the company dined at the Albion Tavern in honour of the event. The chairman, who presided, in proposing the toast of the "Indian Submarine Telegraph Company," said he hoped that the cable between Bombay and Suez would not be completed until after the opening of the Falmouth and Malta cable in the following June, thus completing our telegraphic communication with India. The Right Hon. Mr. Gladstone, late Finance Minister for India, in the evening announced that on that very day the principal Chinese ports, by means of the cable, were to be opened to Singapore, and thence also to Australia.

TEA-SHIP RACE.—It is understood that the race has been won by the *Sir Lancelot*, which left Foo on July 18, and arrived in the Straits on the 11th inst., after a passage of 21 days, the shortest on record. The *Sir Lancelot* was first in the tea trade, and lost it last year only by a few hours.

PEAN LIFE ASSURANCE COMPANY.—The court on Friday gave judgment in favour of the Pean Life Assurance Company. After Mr. Glasse, Q.C., and Mr. Dickinson, Q.C., had addressed the court in favour of the petitioners. The Vice-Chancellor, after commenting on the novelty of the case, said that from the important interests involved, he had granted a stay in vacation, and for the same reason he had refused to give judgment. He reviewed the evidence on both sides, and concluded that the petitioners had failed to satisfy him that the company had not been shown to be unable to pay its

debts, for no creditor appeared to have been sent away from its doors unpaid. Nor was it just or equitable for him to stop authoritatively the progress of a business which had, in his judgment, assets which covered its liabilities, the actuaries who had given adverse testimony having, in his opinion, omitted to take account of the fact that the company had a reserve readily available in the form of uncalled capital. He therefore dismissed the petitions, with costs.

THE ALBERT LIFE OFFICE.—The prosecution of the directors of the Albert Assurance Company was dismissed by the magistrate on Saturday. Mr. Lee, the prosecutor, was to have been cross-examined on the evidence he gave at the first hearing of the case, as well as upon various incidents of his previous life and character, but when the case was called on he was not in court, though, in addition to the usual notice of adjournment, he had on the previous day received a summons to be present. Mr. Straight, his counsel, however, admitted that he had been bankrupt in 1868, only a few months before he bought the shares which gave him a *locus standi* to prosecute, and that he had gone to Southampton to collect a debt on the very day on which he had been summoned to appear in court, and that his real name was not that under which he had proceeded against the directors. The magistrate said that after his experience of cases which had broken down through the absence of important witnesses, "who dared not come forward," he had "the worst opinion of the proceeding on account of the absence of Mr. Lee," and that he "presumed everything against the *bona fides* of a person who ought to be in court, but who was, in fact, somewhere else." Under these circumstances it was not fair to the directors of the company to keep the charge hanging over their heads, and he dismissed the summons, intimating at the same time that if Mr. Lee wanted to go on he could take out fresh summonses, which would be heard on Saturday. On Thursday Mr. Bromby appeared in court with Mr. Lee, and applied for fresh summonses, but Mr. Knox refused to entertain the application unless it was made by Mr. Straight, who had previously appeared as counsel, and an assurance given by that gentleman that he had carefully looked into the case, and was satisfied there was *bona fide* ground for a prosecution. He did not, he said, consider that Mr. Lee was a *bona fide* shareholder, and therefore did not feel himself justified in bringing the directors to that court again on his application.

DISTRIBUTION OF PLANTS.—It is announced that the First Commissioner of Her Majesty's Works intends to have distributed this autumn among the working classes and the poor inhabitants of London the surplus bedding-out plants in Battersea, Hyde, the Regent's, and Victoria Parks, and in the Royal Gardens, Kew. The clergy, school committees, and others interested, on making application to the superintendents of the parks nearest to their respective parishes, or to the Director of the Royal Gardens, Kew, will receive early intimation of the number of plants that can be allotted to each applicant, and of the time and manner of their distribution.

REPORTED DEMONSTRATION OF UNEMPLOYED WORKMEN.—It is rumoured that the working classes of London intend, on the Queen's visit to the City to open the new Blackfriars Bridge and Holborn Viaduct, to parade before her Majesty a double line, two or three deep, of unemployed men, as an evidence of the large amount of distress and compulsory idleness existing among them. On Wednesday a handbill of a very violent character was circulated in the districts where the working classes mostly reside, calling on the men of London to attend in tens of thousands on the day of opening the bridge by the Queen, and to "let their cry be for work." It is stated, however, that some prominent members of the unemployed league who took part in the agitation of last year are opposed to the demonstration, on the ground that it will be perfectly futile and inefficacious as regards the unemployed, and will only mar the harmony of the great City ceremonials.

THE FENIAN PRISONERS.—An open-air meeting was held on Sunday afternoon, on a space of ground near the Middlesex end of new Chelsea Bridge, to demand from the Government the release of the Fenian prisoners. It was estimated that between 2000 and 3000 persons were present. A Mr. Hogan was in the chair, and the speeches were of the usual violent character. On Thursday a crowded meeting of the general committee and delegates for conducting the demonstration in Hyde Park to-morrow, in favour of the release of the prisoners, was held in Brook Street, Holborn. Mr. J. Merriman took the chair, and said he had attended the meeting in consequence of the appearance of the letter addressed by Mr. Gladstone to the Limerick Amnesty Committee. He had considered that letter seriously, and the conclusion at which he had arrived was that it would be most advisable, in the interests of the prisoners themselves, that the proposed demonstration should not take place, or that it should be postponed. A long discussion ensued, many speakers opposing the views of the chairman. Ultimately the following resolution was put:—"That the proposed demonstration be adjourned until a future day, to be decided upon by the committee." There being no seconder to the resolution, it fell to the ground. The chairman then said, that as it appeared to be the unanimous feeling of the committee that the demonstration should take place, he should be at his post on Sunday to perform the duty he had undertaken. In spite of this decision, it is doubtful whether the meeting will take place; the more moderate party considering that it would be impolitic to hold the meeting after the letter which Mr. Gladstone has addressed to the Irish committee.

GREAT STORMS.—On Monday and Tuesday the metropolis was visited by a violent gale, which caused a large amount of damage in the river, and loss of several

lives. Small craft were swamped and sunk by the force of the wind and tide, and several large vessels broke from their moorings and ran in collision with others. Accounts from various parts of the coast also indicate sudden and violent storms, shipwrecks, and loss of life. Since Monday night a disastrous gale has been raging on the north-western and southern coasts, and upwards of 100 vessels have been wrecked or damaged. A large Prussian brig, called the *Moritz Keuchenheim*, was lost off Scilly, with only one of the crew saved, the others being drowned. The pilots at that port affirmed that they saw the *Leith* passenger steamer *Britannia* founder, but the statement has proved unfounded, as she withstood the storm, and reached Leith in safety. The barque *Josephine* was driven ashore near Dunbar and four of the crew drowned. The ship *Frank Shaw*, of 1000 tons, was wrecked on Monday afternoon on the Goodwin Sands, when 11 hands were lost. Something like the long expected great tidal wave is also reported to have deluged several of the northern harbours, and done much damage.

THE PUBLIC HEALTH.—The Weekly Return of the Registrar-General states that in the week that ended on Saturday, Oct. 16, 4221 births and 2870 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 23 per 1000 persons living, being 21 per 1000 in London, 21 in Edinburgh, 21 in Dublin, 21 in Bristol, 21 in Birmingham, 26 in Liverpool, 27 in Manchester, 31 in Salford, 23 in Sheffield, 27 in Bradford, 23 in Leeds, 23 in Hull, 21 in Newcastle-upon-Tyne, and 21 in Glasgow. In Paris the annual rate in the same week was 21 per 1000. The rate in Berlin during the seven days ending the 14th inst. was 21 per 1000, and in Vienna 21 per 1000 during the week ending the 9th inst. In London the births of 1009 boys and 1041 girls, in all 2053 children, were registered last week. In the corresponding weeks of 19 years 1859-68, the average number, corrected for increase of population, was 2102. The deaths registered in London during the week were 1405. It was the 11st week of the year, and the average number for that week, corrected for increase of population, was 1324. The present return is therefore less by 19 than the estimated amount.

Provincial.

BIRKENHEAD.—At the Police Court on Monday, two men named Duncan, father and son, were sent to prison for wrecking the cargo of the ship *Empress*, which was stranded near Liverpool. They had been employed in removing the cargo. The stolen property was found in their house.

BRIGHTON. An alarming accident occurred on Sunday to one of the large pleasure yachts which make daily trips from this town. The *Sun Park* started about noon on the last excursion of the season, with 20 passengers on board, and on returning to the station ran upon a pile connected with the Western Outfall Works, and knocked a large hole in her bottom. The yacht was discovered to be settling rapidly, and all sail was set for the land. Attracted by signals of distress, a number of passengers were taken off by the boats which went to their rescue. At a short distance from the West Pier the vessel sank, fortunately in shallow water, and the remainder of those on board were picked up and taken ashore.

CAMBRIDGE.—The Rev. W. G. Cox has resigned the office of Public Orator, which he has held since 1857.

CHESTER.—The opening of the new Town Hall, the main object for which the Prince of Wales visited Chester, took place on Friday, and the general joy of the inhabitants. The first event of the day was the presentation of addresses. The first was presented by the lord-lieutenant and magistrates of the county; the second by Lord de Tabley and the Freemasons of the city. Shortly after 12 o'clock a procession was formed from the Grosvenor Hotel, through the main thoroughfares of the city to the new Town Hall. Two open carriages were drawn up at the hotel, in the first of which were the Mayor, Recorder, Sheriff, and Town Clerk; and in the second the Prince, the Countess Grosvenor, Lord Egerton of Tatton, and Earl Grosvenor. The procession advanced along Foregate Street to the principal entrance of Grosvenor Park, then made the round of the park, and returned into Foregate Street by the same gateway. In the park were placed in long succession the school children of the city, numbering about 7000. After leaving the park the *cortege* passed through the principal streets, which were crowded with spectators. Within the barriers were the members of the various Friendly Societies, wearing their sashes. The new Town Hall is a fine stone building in the Victorian Gothic style, with an imposing front to the open market space. From the centre of the front rises a square-pointed tower of great elevation, which gives considerable architectural pretensions to the whole pile. After the cathedral, it is the finest edifice in the city. The internal arrangements are good, and the decorations ample; it contains a number of rooms, including the council chamber, the public hall, and the ball-room. The scene in front of the building was remarkably effective. The City Volunteers mustered in strong force, and looked well. The galleries on either side and in front of the hall were filled with ladies, bands played, and the church bells rang their merriest peals. Shortly after 1 o'clock the Royal procession arrived. The Prince received a flattering ovation from the immense assembly, and repeatedly bowed his acknowledgments. His Royal Highness was received at the entrance of the Town Hall by the Mayor and Corporation, when an address from the mayor, aldermen, and burgesses, in which the Prince was addressed as the "Earl of Chester," was read by the Recorder. In reply, the Prince said that he was not less proud than his predecessors were to hold the

lower prices are submitted to. Sheep are also more plentiful; on the average prices are lower, although a fair clearance is effected. Choice Calves are scarce and dear. Our foreign supply consists of 748 Beasts, 1260 Sheep, and 230 Pigs.

MARK LANE.—MONDAY, OCT. 19.

The supply of Wheat from Essex and Kent to this morning's market was small, and mostly sold at an advance of 1s per qr upon the prices of this day se'night. There was a fair attendance, and some sales of American Wheat were made at the above improvement, but in Baltic qualities very little business was transacted, and such we cannot raise our quotations. Barley was quiet trade at late rates. Beans and Peas were unchanged in value. For Oats there was a fair demand, at an advance of 6d per qr, on new and 1s per qr on old. Flour was rather dearer.

FRIDAY, OCT. 22.

During the past week we have experienced severe storms and frequent rain, in the northern districts snow has fallen. The arrivals of foreign produce since the 15th inst. have been on a more moderate scale than of late, and as the colder weather stimulated consumption, causing at the same time some fear of an early closing of the navigation of the Baltic, we have to report an increasing disposition to purchase Wheat, which has led to an advance of 1s. to 2s. per qr in many of our leading markets. In the value of Spring Corn of all sorts we have noticed no quotable change, excepting in Oats, which have been a better sale at about 6d. to 1s. per qr. advance in Newcastle and in this market. Flour was easier to quit, with slight improvement in value for American barrels and country marks. The arrivals of grain and seed laden vessels off the coast, which in the last six weeks averaged about 1000 tons per week, have since Friday last, considerably fallen off, they consisted of 7 cargoes, of which, with those left over from the preceding week, there remained for sale last night 44 cargoes. With the decrease in supplies the trade for all articles has assumed a better tone at improving prices; arrived Wheat commanded from 1s. to 2s. per qr. more money, fine qualities being principally in request. Maize was 1s. to 1s. 6d. per qr. dearer. Barley and Rye participated in the advance, higher bids having been made for the latter on a continental account. A large business has likewise been done in Wheat and Maize on passage and for forward delivery, at improving rates.

The arrivals of English grain are small, and moderate of foreign. There was a poor attendance at this morning's market, and the English Wheat on offer was partly sold at an advance of 1s. per qr.; for foreign the demand was limited at the extreme prices of Monday. Barley, Beans, and Peas were unchanged in value. Oats were a slow sale at late rates.

LIVERPOOL, Oct. 19.—There was a good attendance at today's market, and Wheat sold freely at an improvement of about 3d per cental on the prices of last Friday, or from 4d. to 5d. per cental on the week. Flour also met with a good demand, at an advance of about 9d. since last market day. Indian Corn was in very fair request, prices being about 6d. to 1s. in sellers' favour. Oats and Oatmeal neglected. Beans in better request, at an advance of 6d. per qr. from Friday.

SEED MARKET.

The transactions at our market are still very limited, no speculation having yet sprung up, and the consumptive demand being at present quite small. Winter Tares meet with less inquiry, and are obtainable on lower terms; as the stocks remaining on hand are very light, a revival of demand would doubtless give a decided check to the downward tendency. New English Rye for seed can now be bought at a very low figure. Mustard and Rape seed are firm. We have a brisk demand for New Dutch Hemp seed, the quality of which is this season very fine. New Canary seed moves off steadily, at the low prices now current. Linseed is without change in value. There has been some inquiry during the past week for fine red Clover seed; no great quantity of seed has, however, changed hands. Windsor and Longpod Beans are now in fair request. We have had some business passing in new French Italian at a slight advance on previous currencies. JOHN SHAW & Sons, 16, Water Lane, E.C.

W. M. DILLISTONE, Horticultural Architect and Valuer, Sible Hedingham, Essex.

WANTED, a PARTNER, in a small NURSERY, FLORIST, and JOBBING BUSINESS, in Islington. Cash required, £50. G. R., 32, Rotherfield Street, Islington, N.

It is with great gratification that we announce our permission to refer upon any occasion to the various

HEATING APPARATUSES at the above, where our "ONE BOILER SYSTEM"

HAS FOR YEARS BEEN SUBJECTED TO THE MOST CRITICAL TESTS WITH EVERY SATISFACTORY RESULT. IT IS MATCHLESS FOR EFFICIENCY, AND IS WORKING THE LARGEST APPARATUS ON RECORD.

There are no theoretical statements, but positive facts, and it is not too much to add, that no boiler can boast a parallel.

For List of Details, see "ILLUSTRATED BOOK of DESIGNS" (12th Edition), which can be obtained by addressing a note to

HENRY WEEKS AND COMPANY, HORTICULTURAL ENGINEERS, &c., KING'S ROAD, CHELSEA, S.W.

BY HER MAJESTY'S ROYAL LETTERS PATENT.

ORMSON'S NEW PATENT ECONOMIC BOILERS.

ORMSON'S PATENT CONCENTRIC SADDLE BOILER.

ORMSON'S PATENT CONVOLUTED BOILER.

ORMSON'S PATENT TUBULAR BOILER.

From the Construction of these Boilers, it will be at once seen that the object of the Inventor is to economise fuel, by concentrating its entire force and vertical action on the surface of the Boiler, and not wasting it by Heating Brickwork and Chimneys, a fault common to the great majority of Boilers now in use. These Boilers are made of the best Welded Wrought-iron, of good substance, having no overlapping plates, holes, or rivets, and are therefore perfectly secure against rupture from expansion and contraction of the metal, an occurrence so frequent and fatal to all forms of Cast-iron Boilers. Please to state diameter and length of Pipe to be Heated.

HENRY ORMSON, HORTICULTURAL BUILDER TO HER MAJESTY,

AND HOT-WATER APPARATUS MANUFACTURER TO THE COMMISSIONERS OF HER MAJESTY'S ROYAL PALACES AND PUBLIC BUILDINGS, AND TO THE ROYAL HORTICULTURAL SOCIETY,

STANLEY BRIDGE, KING'S ROAD, CHELSEA, LONDON, S.W.

THE GENERAL LAND DRAINAGE and IMPROVEMENT COMPANY.

Directors.
 Thomas Chapman, Esq., F.R.S. The Right Hon. Viscount Combermere.
 Geo. Thomas Clark, Esq. Edward John Hutchings, Esq.
 John G. Cobbold, Esq. William Tite, Esq., M.P.
 Henry W. Currie, Esq.
J. BAILEY DENTON, Principal Engineer

Agricultural Improvements of any kind are executed by the Company, or the outlay thereon repaid to Landowners who prefer executing the work by their own Agents.
 Tenants may also, by arrangement with their Landlords, procure the execution of such improvements.
 The outlay, with all official expenses, may be charged on the Estate, and paid off by a rent-charge in 31 years, or at the option of the Landowners in a shorter term.
 No investigation of title necessary, and no legal expenses incurred.
 Application to be made to **HORACE BROKE**, the Secretary, at the Office of the Company, 22, Whitehall Place, London, S.W.

THE LANDS IMPROVEMENT COMPANY.
 (Incorporated by Special Acts of Parliament.)

Directors.
 John Clutton, Esq., 9, Whitehall Place, S.W.
 Frederick L. Dishw, Esq., Kirtlington Park, Oxford.
 Henry Farquhar, Esq., Messrs. Hernies, Farquhar & Co., 16, St. James Street, S.W.
 Lord Gifford, M.P., 85, Eaton Square, S.W., an 1 Galloway House, Wigtownshire, N.B.
 John Horatio Lloyd, Esq., 1, King's Bench Walk, Temple, E.C.
 Granville R. Ryder, Esq. (Managing Director), 2, Princes Terrace, S.W.
 Hyde Park, S.W.
 Granville R. H. Somerset, Esq., Q.C., 4, Park Street, Westminster.
 Henry W. West, Esq., Q.C., M.P., 10, King's Bench Walk, Temple, E.C.
 Charles Watkin Williams Wynn, Esq., M.P. (Chairman), 2, Lower Berkeley Street, Portman Square, W., and Coed-y-Llaen, Welshpool.

The Company advance money, unlimited in amount, for all purposes of Agricultural Improvement, including the erection of Cottages and Farm Buildings, to the Owners of settled and other Estates, and to the Clergy in respect of their Glebe Lands.
 The whole outlay and expenses are liquidated by a rent-charge upon the land, redeeming principal and interest, over 25 years.
 No investigation of title is required.
 For Forms and further information apply to **GRANVILLE R. RYDER**, Esq., Managing Director, No. 1, Great George Street, Storey's Gate, Westminster, S.W.

Home News.

THE COURT IN SCOTLAND.—On Wednesday, the 20th inst., the Queen went out in the morning with Princess Beatrice, and in the afternoon drove out with Prince Leopold. On Thursday, the 21st inst., the Queen went out with Princess Louisa and Prince Leopold. The Dowager Duchess of Athole and Miss Moray arrived at the Castle on a visit. On Friday the Queen walked and drove in the morning with Princess Beatrice, and in the afternoon went out with the Duchess of Athole. The Right Hon. Edward Cardwell left the Castle. On Saturday the Queen drove out with the Marchioness of Ely. On Sunday the Queen and Royal family attended Divine service at the parish church of Crathue. The Rev. Dr. Taylor officiated. On Monday the Queen went out in the morning with the Marchioness of Ely, and in the afternoon with Princess Louisa and Princess Beatrice. According to present arrangements the Queen and Royal family will leave Balmoral for Windsor on Wednesday next.

THE PRINCE AND PRINCESS OF WALES.—On Saturday the Prince arrived at Marlborough House from Gunton Park. The Princess, with Prince Albert Victor, Prince George, Princess Louisa, and Princess Victoria, returned to Marlborough House from Chiswick. It is announced that the Prince will visit Scarborough on Monday next, on his way to Grimston, on a visit to Lord Londesborough.

PRINCE AND PRINCESS CHRISTIAN left Floors Castle on Tuesday on a visit to the Earl and Countess of Minto at Minto House, and are expected to arrive at Frogmore this evening from Scotland.

THE KING AND QUEEN OF THE BELGIANS will arrive in England next week on a visit to the Queen. As an acknowledgment of the hospitality shown to English Volunteers in Belgium a committee has been formed for the purpose of giving their Majesties a hearty national English reception, and the Lord Mayor has accepted the office of president.

THE CABINET.—A Cabinet Council was held on Tuesday at the official residence of the First Lord of the Treasury in Downing Street. Another Council is summoned for to-day.

THE MADRID EMBASSY.—The Right Hon. H. A. Layard, First Commissioner of Works, has been appointed to succeed Sir J. Crampton as her Majesty's Minister at Madrid.

MINISTERIAL CHANGES.—Mr. Ayrton, M.P. for the Tower Hamlets, has succeeded Mr. Layard as First Commissioner of Works, and Mr. Stansfeld, late third Lord of the Treasury, has been appointed Financial Secretary of the Treasury.

PARLIAMENTARY MOVEMENTS.—The accession of Lord Stanley to the peerage, consequent on the death of the Earl of Derby, has caused a vacancy for Lynn. Lord Claud John Hamilton, son of the Duke of Hamilton, is the Conservative candidate for the vacant seat. The appointment of Mr. Layard as British Minister at Madrid has caused a vacancy in Southwark. Several candidates have been spoken of for the vacant seat, but it is understood that Mr. Milner Gibson will be the Government candidate, Mr. Morgan Howard the Conservative candidate, and either Mr. Robert Coningsby or Mr. William Allen the working men's candidate. Mr. Bernal Osborne is a candidate for Waterford, in opposition to Sir Henry Barron and Mr. Malcolmson.

BISHOPRIC OF SALISBURY.—The confirmation of Dr. Moberly as the Bishop of Salisbury took place on Wednesday, at Bow Church, Cheapside, with the usual ceremonies. The consecration took place on Thursday at Westminster Abbey. The Archbishop of Canterbury officiated, assisted by the Bishops of London, Oxford, and Chester.

THE BISHOPRIC OF EXETER.—The Gazette of Tuesday contained the official announcement that the Queen had ordered a *congé d'elire* to the Dean and Chapter of Exeter, empowering them to elect a Bishop, in the room of the late Dr. Phillpotts, and recommending the Rev. Dr. Frederick Temple, D.D., to be by them elected Bishop of the said See.

GARTER KING AT ARMS.—The Gazette of Tuesday announced that the Queen had directed Letters Patent to be passed under the Great Seal, granting to Albert William Woods, Esq., Lancaster Herald, the office of Garter Principal King of Arms, vacant by the death of Sir Charles George Young.

ILLNESS OF MR. PEABODY.—Mr. George Peabody is lying dangerously ill, at 80, Eaton Square. He was in a state of unconsciousness from Tuesday afternoon until Wednesday night. He was somewhat better yesterday morning, but is still in a critical state.

THE CHANNEL SQUADRON.—Under the command of Vice-Admiral Sir T. Symonds, left Milford last week for an experimental cruise to Lisbon, Gibraltar, Madeira, and the Canary Islands. The squadron arrived in the Tagus on Wednesday, and it is expected that it will winter there.

THE ELECTION COMMISSIONS.—The Beverley Commissioners last week committed to York Castle, on an alleged charge of contempt, Messrs. Flint and Fitzgerald, two tradesmen of that town, who refused to be sworn, on the ground that there had been inquiry enough. They were sent to York handcuffed, in charge of a police officer. On Wednesday an application for writs of *habeas corpus* was made to Mr. Justice Hayes in Chambers, and after a long argument on the question whether the Court had been legally adjourned by two of the Commissioners only, the judge ordered the writs to be issued, and to be made returnable to the full Court on the second day of term.

Foreign.

FRANCE.—The Emperor returned to Paris on Monday in order to be on the spot in case there should be any disturbance on Tuesday. The Prefect of Police issued a notice cautioning the public against taking part in any demonstrations; and the Government made every preparation to prevent, and if necessary to repress, a riot. In the evening the Emperor was present at the opera, and was much cheered. On Tuesday a heavy rain fell during the whole morning, and there were no demonstrations whatever on the part of the Republicans, M. Raspail, at the last moment, having published a letter advising his friends to stay at home. There were well-dressed crowds in the Place de la Concorde, but the absence of blouses was conspicuous. M. Gagne was the only member of his party who kept his appointment before the Obelisk; he addressed the crowd, and read some verses suitable to the occasion. The mob jeered and hooted, and a serjeant of police having interfered, M. Gagne immediately desisted. At 2 o'clock the Emperor, who, when in Paris, usually enjoys his after-lunch cigar in the small reserved garden of the Tuileries, strolled thence by the terrace along the quay, in order to see the Demonstration for himself. He was recognized by the mob as he was looking down from the terrace which overlooks the Place de la Concorde. A crowd of 2000 people, in the Place and in the Gardens, loudly cheered his Majesty, and the only cry heard during the day was that of "Vive l'Empereur." There was a total absence of the working population from the streets. No meeting of any kind took place in any quarter of Paris, and the day passed in perfect tranquillity. In the evening the Emperor was present at the Théâtre Français, where he was received with cheers. On Wednesday his Majesty presided at a Council of Ministers, and returned to Compiègne in the evening. In spite of the general absence of demonstrations in the streets on Tuesday, it is well known that there is a strong undercurrent of revolutionary feeling in Paris, and that a large number of people are ripe for mischief. On the 21st a meeting of the electors of the circumscription was held in the Rue Lyon, at which M.M. Jules Simon and Garnier Pages were admitted. M. Simon said, "We shall not go to the Place de la Concorde on the 26th inst. We all here swear to fight, but only when we have prepared our batteries." M. Simon added that the Left would cause an inquiry to be instituted by the Chamber relative to the events of St. Aubin. Applause followed M. Simon's speech, and the meeting separated shouting "Vive la Republique." Several persons who attended this meeting subsequently went the round of the workshops of the Faubourg St. Antoine, endeavouring to persuade the workmen to get up a manifestation for the 26th inst., but the latter refused to entertain the suggestion. The *Constitutionnel* says that in the recent deliberations at Compiègne there has never been any question of convoking the Legislative Body for any other date but that originally fixed, —namely, November 29. In reply to a recent article in a London newspaper, expressing apprehension of a secret *entente* between France and Russia, the *Patrie* says:—

"The Government of the Emperor does not want war, and has no desire to enter into any adventurous enterprise. Satisfied with our pacific relations with the different nations of Europe, we endeavour neither to disturb those relations nor to render them in any particular way more intimate. We wish, in the interest of the peace of the world, to see Prussia and Austria, Count Bismarck and Count Beust, live together on good terms."

The Crown Princess of Prussia, with her five children, and her sister, the Princess Alice of Hesse, have arrived at Cannes to pass the winter. The interrogation of Traupmann, the Pantin murderer, by the examining magistrate, M. Douet d'Arcq, was resumed on Monday, and continued on Tuesday, each time lasting several hours. Nothing new was elicited, the criminal persevering in his former statements.

SPAIN.—The Republican insurrection having been entirely suppressed, the Government and the Cortes on Friday entered on the consideration of the questions connected with the clergy, and the Monarchical or Republican form of government. The Cortes appointed a committee of five deputies from each of the three prominent parties, Progressists, Unionists, and Demo-

crats, for the purpose of drawing up a resolution on these questions, but neither the Ministers were able to come to any decision on the subject. In the Cabinet also the same subjects under consideration. M. threatened to resign the Regency. A take place between the Unionists and the General Prim made great efforts to threatened rupture of the Coalition. the Ministerial crisis was tided over sent by mutual concessions. The agreed to suspend other differences. the question of the choice of a monarch. ings of members of the Cortes were held day night, to discuss the question. Many of gressist party did not think the Duke of suitable choice. The Unionists, on the other were unanimously in favour of the Duke pensier. Very animated discussions took no decision was come to. The Republican Figueras was present at the sitting of the Republican deputy Calvo has been sent by a council of war. Senor Orense, the minority in the Cortes, who was committed to custody while preparing to take refuge. The Protestant Bishop, Dr. Alhama, and Protestants, have been arrested in the Church at Granada, it is supposed, for reasons. General Prim has declared that if the (Ecumenical Council at Rome) decisions contrary to the Spanish law Belgian law on public order has been basis of the Spanish law.

PORTUGAL.—The British fleet, consisting of iron-clad steamers, arrived in the Tagus from Milford Haven; all well.

DENMARK.—The Chinese Embassy has been received at the Court of Copenhagen, on Monday for the Netherlands.

SWEDEN.—The King of Sweden arrived on Monday, and was received by the Imperial family and the civil and military authorities. He was decorated with flags, and a hearty welcome given to the Royal visitor, who afterwards lodged at the Danish palace at Fredensborg.

BELGIUM.—The Communal elections took place on Tuesday, and were attended with considerable interest. At Brussels the retiring Bargeinist Councillors were re-elected; and on a second ballot to decide between the three other retiring Councillors and the oppositon, the three old Councillors were rejected, and the Opposition candidates elected instead. At Antwerp, Namur, and Louvain the candidates were all elected, except in a few cases where a second balloting will be required. M. Hubert, the candidate of the Moderate Catholics, was elected by 1200 votes against M. Vervy, the candidate of the Progressives. Liberal candidates were successful at Tournai and Bruges. The results of the elections in the country, so far as they are known, are increasing influence of the coalition between the Radical and Radical parties in the large towns, therefore, weakened the Ministerial party. A double murder was discovered last week. Madame Van de Poel, a widow lady, 75 years of age, her daughter, about 40 years of age, were found in their own house murdered in a most brutal manner. All the signs of a fearful struggle having been by the unfortunate ladies with their hands. They were last noticed alive on the 15th. On the 15th a card was found on the door with the word "Absent" and six days elapsed before suspicions were entertained. All was not right. The door was then opened and the crime discovered. It has since been ascertained that the ladies had sold out an investment in the morning before the murder. That sum is in the amount of 500 francs in gold and silver were found in the room where the murders were committed. The artificer whom they had employed to repair the house has been apprehended on suspicion. His face is scratched, his clothes are bloody, and he cannot account for his whereabouts on the night of the murder. While Brussels has been by the discovery of these murders, a man named Moustier has been apprehended in the village of near Mons, charged with the murder of three sheep farmers, brothers, called T. whom he had dealings in business. The man was the eldest of the brothers, who were returned; a second went to inquire after the fate of the third, and was also disappeared; the third went, and was found dying made disclosures which led to his apprehension. Bodies of the three brothers were found in a pit in the prisoner's garden. He has confessed his guilt, and inculpated an old man, who had been as an accomplice.

PRUSSIA.—The King returned from Cannes on Monday. Herr von der Heydt, late Minister of Finance, on Monday tendered his resignation to the King, by whom it was accepted. Herr von der Heydt, President of the Ocean Trading Company, has been appointed his successor. The Lower House of the Diet commenced on Friday the preliminary deliberations on the resolution of Herr Ebert, that all cases of political and press offences should be tried by the jury. The resolution was agreed to by a majority of 158 to 121. In the sitting of Monday the House adopted a resolution declaring that a session for a lottery loan of 100,000,000 francs should be issued by the Discount Company.

the welfare of the State. A resolution was passed calling upon the Government to refer to Federal legislation, the whole of the lawfulness of lottery loans.

The Emperor Francis Joseph started on his Eastern tour. Measures were taken with the Italian Government with the insurrectionary movement. The resignation of M. Wenkeim, of the Interior, has been accepted. M. has been appointed to fill the vacant post. He was well known in 1849 as the mover in the insurrection, has been tried before a jury on a charge of inciting to revolt, and sentenced to six months imprisonment.

A column of Austrian troops under General Schuler had an engagement on the 20th with the insurgents, who were repulsed with considerable loss. Imperial forces only suffered a loss of two men. During the night between the 20th and 21st the insurgents surprised, through the desert and convent of Stagnavich, killing the Austrian commander and a number of the garrison. Buzina was also threatened by them. In the forts Trinita and Gorazda were the insurgents, who were repulsed with considerable loss, and driven back beyond fort Trinita. The gunboat Sxreiter successfully captured the insurgents before Budua, when the latter capitulated. The forts of Gragati and Budua have been strengthened and provisioned, but while on the march between those forts and Budua severe encounters with the insurgents took place on both sides during these engagements are reported. Colonel Javanowich is reported to be in command of the insurrection forces part of the army. It is said that a general rising of the Southern Slavians has for some time been in preparation. The insurgents have received reinforcements from Montenegro and Herzegovina, and fight under the banner of the Southern Slavians. In view of this state of things, the Governor of Bosnia has reported that it is necessary that the Austrian forces should operate on Turkish territory, especially on the Montenegrin frontier. In view of this report, the Minister for foreign affairs has applied to the Sublime Porte to permit to cross the Turkish boundary.

The King arrived at Florence on Friday the 14th, and signed a decree convoking Parliament on November 16. The official journals confirm that an interview will be held between the King and the Emperor of Austria, but the place of the projected meeting are not known. It is asserted that Garibaldi intends to visit the King early in December. The Official Gazette has announced the appointment of Signori Rudini and Visconti as Ministers of the Interior and of Justice. A commission has been organised by the Neapolitan Government to offer to the ex-Queen of Naples a pension of 100,000 francs for the child of which she is to be confined. The sums contributed have reached a large amount, and about 50,000 francs will be required for the purchase of the cradle alone. The Neapolitan Government are also preparing a similar manifestation in favour of the young Duchess of Parma, who is in an interesting situation.

ALBANIA AND THE HERZEGOVINA.—It is said that the Government has discovered a wide-spread conspiracy in Albania and the Herzegovina, in connection with the rising in Dalmatia, and that 1300 Christian volunteers of the province of the Herzegovina are to make common cause with the Dalmatians. The conspirators of the movement were arrested on the coast, and depots of arms and ammunition have been seized. It is also said that Austria and Turkey are to hold a convention, providing for collective operations against the insurrection.

EGYPT.—The Sultan is said to have abandoned his intention to visit Egypt for the opening of the Suez Canal, chiefly on account of the expense it would cost. The Crown Prince of Prussia and Prince Hesse arrived in the Bosphorus on Sunday the 10th, on board the Sultan's yacht, attended by the Prussian corvette Hertha, and the Turkish battleship. The Grand Vizier and the Turkish Ministers went on board to compliment the Prussian and Hessian monarchs. The Sultan and suite awaited their Royal Highnesses at the entrance of the palace of Beglar, and gave them a cordial greeting. Subsequently the Crown Prince of Prussia returned the visit of the Sultan at the palace of Dolmabahatche. On Monday evening the Sultan gave a grand dinner in their honour. The Crown Prince of Prussia, in an Italian yacht, arrived at Constantinople on Monday, and was cordially received. His Highness proceeded to the Sultan's Kiosk at the Bosphorus. The Emperor of Austria, Prince Rustchuck on Wednesday morning, and was expected to reach Constantinople on Thursday. On the Bosnian frontier and at Gurgevo great preparations had been made for his reception. A definite arrangement has been granted for Roumelian railways, to open direct communication between Thrace and the ports of Salonica, Enos, and Constantinople. The Empress Eugénie, previous to her departure for Egypt, received the wives of the Egyptian Ministers, and gave the Grand Cross of the Legion of Honour to the Seraskier, and minor Orders to other officers. Her Majesty also conferred the Cross of the Legion of Honour on Admiral Pasha, for the services he rendered in the Adriatic during the Cretan crisis, and also for his attendance on her Majesty with the squadron of the Mediterranean during her stay at Constantinople.

TELEGRAPHIC.—Telegraphic communication between Constantinople and Fao is still interrupted, the Arab insurgents continuing masters of the field and preventing

the telegraph workmen from repairing the wires. As soon as the insurrection is suppressed communication will be at once restored.

COAST OF AFRICA.—A great battle has been fought at Bonny between Ako Jumbo and Ja-Ja. The fight lasted 36 hours, and there was immense slaughter. Ja-Ja's forces were completely defeated, and the town of Bonny was nearly destroyed during the battle. Ako Jumbo captured 70 guns, ranging in calibre from 36 to 63-pounders. Bodies were lying on the beach in large numbers, and many were floating in the creek. The bush also was filled with fugitives.

EGYPT.—The Empress of the French was received with great enthusiasm on her entry into Cairo, and illuminations and fêtes were given in her honour. On Monday her Majesty, accompanied by the Khedive, left for Upper Egypt. The International Commission on the Jurisdiction Question commenced its sittings on Thursday.

CAPE OF GOOD HOPE.—Accounts from the Cape to September 11 state that the Parliament had been in session 87 days, and that the verdict of the country was that the session had been more barren of fruitful results than any of its predecessors. On August 23 the Paper Currency Bill was rejected by the Council by a majority of 11 to 10 votes, and the Voluntary Bill was lost on the same day in the House of Assembly by 35 to 28. On August 30 the Assembly determined to consider the Estimates of 1869, for the purpose of retrenchment; and on September 11, after many protracted debates, the report of the Committee was adopted by the House, and sent by address to the Governor. The most exciting discussion which occurred on the Estimates was relative to the 10,000*l.* required by the Imperial Government for payment of the troops. On September 7, Mr. Molteno moved resolutions declaring that the colony could not continue to pay the colonial military allowance of 10,000*l.* per annum. After a discussion, which lasted the whole afternoon, and till past 10 o'clock at night, the resolutions were adopted by a majority of 23 to 20. The excitement throughout the colony when the vote became known had been unprecedented since the establishment of its Parliamentary institutions; and so general a demonstration of feeling had not been seen since 1861, when the Legislative Council, in the absence of some Eastern members, agreed to disallow the same allowance. The newspapers, with only one or two exceptions, condemned in the strongest terms the action of the Parliament. Mr. Pinous, of Bloemfontein, who had been on a diamond-hunting expedition to the Vaal River, had returned with four diamonds—one of 7*1*/₂ carats, found on an island in the Vaal River; one 3*1*/₂ carat; one of 2*1*/₂ carats, found on the bank of the Vaal, on the Free State side; and one quite small. The second and third are of the first water. Mr. Charles Kuypers Mons has taken seven diamonds to Hope Town, one of which weighed 22 carats. The Free State Church has elected Archdeacon Merriman as the future bishop.

INDIA.—The Gazette of India publishes a Government despatch to the Duke of Argyll, which confirms the news that a reduction of 1,250,000*l.* has been ordered in the expenditure on public works next year, and of 800,000*l.* during the current year. Large savings in the civil and military estimates are also contemplated. Mr. Seton Kerr left on the 9th for England. A cyclone occurred near Saugor on the night of the 7th inst. Azim Khan died on the 6th inst. at Arood, midway between Meshed and Teheran.

JAPAN.—The Duke of Edinburgh has been received by the Mikado publicly, as well as privately, and with marked cordiality, an event considered as unprecedented and of a highly gratifying character. His Royal Highness proceeds by the Tien-tein route to Peking. A complimentary dinner has been given by the foreign residents of Yokohama to Admiral Keppel, at which the Duke of Edinburgh was present. The French Consul at Yokohama has announced that appeals from the Consular Courts of Siam and Japan will henceforth be made to the Imperial Court at Saigon instead of Pondicherry.

UNITED STATES.—President Grant has appointed George H. Butler, nephew of General Butler, United States Consul-General for the British East Indies. The Tennessee Legislature has elected Mr. Henry Cooper, Democrat, as Senator, defeating Mr. Andrew Johnson by one vote. It is considered probable that Mr. Brownlow will resign the Senatorship, and that Mr. Johnson will be elected to fill the vacancy. The Democrats of California have succeeded in electing 11 out of 14 district judges. A severe shock of earthquake was felt at 5 A.M. on the 22d, from Boston to St. John, New Brunswick. No material damage was done.

CUBA.—A decree was promulgated at Havannah on Monday establishing unrestricted religious liberty in Cuba and Porto Rico. The document is of a very liberal character, declaring that Spain cannot remain isolated from the general movement in Europe and the world, and that this consideration is more powerful for the Antilles because of their lying so near America, where religious liberty is recognised by law. No one is to be prevented from holding office because of his religious belief. A Protestant Church will probably now be established at Havannah. The Captain-General has suspended all the magistrates of Havannah for abuses of their judicial functions.

HAYTI.—The first Haytien naval engagement has taken place off Cape Hayti, between the President's steamers Salmave and Alex Petion, and the insurgent steamers Quaker City and Florida. The Salmave was badly damaged, but the action was indecisive.

PERU.—A general panic has seized all the inhabitants at Callao. The city was deserted, and soldiers and police were patrolling it to prevent robbers from taking formal possession. The entire southern seaboard of Peru had been abandoned by the population, and all business was paralysed. The schools were

virtually closed, parents dreading to let their children out of their sight, every one was hurrying forward with fear to the days between Sept. 30 and Oct. 5 for the realisation of Albe's predictions, and even the mercenary-war in the bay of Callao had retired behind the line of shipping in anticipation of coming events. The panic was expected to last through the first fortnight in October, even if the predictions were not realised. Strong shocks of earthquake continued in the south of Peru. Three heavy shocks were felt in Guayaquil on Sept. 27, and great alarm prevailed also in Ecuador.

City Intelligence.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols are 93½ to 93¼, both for Delivery and Account; New and Reduced Three per Centa, 91½ to 91; Bank Stock, 287 to 289; Exchange per 100*l.* March, par to 5*1*/₂ p.m.; June, 5*1*/₂ to 10*1*/₂ p.m.; India Five per Centa, 114½ to 115½.—FOREIGN: Argentine, 84½ to 84; Brazilian, 83½ to 84; Egyptian 1864, 87 to 87½ ex div., Ditto (1863), 77½ to 77; Viceroy's Seven per Centa, 82½ to 82½; Ditto Nine per Centa, 99 to 99½; Italian, 53½ to 53½; Ditto Tobacco Loan, 84½ to 85½; Mexican, 13½ to 13½; Peruvian, 82½ to 83; Portuguese, 84 to 84½; Orel, 81½ to 82½ ex div.; Nicolai, 68 to 68½; Moscow, 83½ to 84; Charkof, 80½ to 81; Spanish, 27½ to 27½; Turkish Five per Centa, 42½ to 42½; United States 5-20 Bonds, 82½ to 82½ ex div. —FIVE PER CENTA: Illinois, 98 to 99.

Metropolis and its Vicinity.

THE APPROACHING VISIT OF THE QUEEN TO THE CITY.—The members of the joint committee appointed by the Court of Common Council to make arrangements for the opening of Blackfriars Bridge and Holborn Viaduct met at Guildhall on Monday, when it was resolved that as the King and Queen of the Belgians will probably arrive in England on November 4, they should be invited to accompany her Majesty. It was resolved that seats should be erected on the eastern side of new Blackfriars Bridge to accommodate 3000 persons, and a like number on each side of the viaduct. It has not yet been determined whether there will be a procession to escort her Majesty from the bridge to the viaduct, as the Queen's wishes will be consulted upon the subject; but it is the wish of many members of the Corporation that there should be a procession, and that the bridge and viaduct, as well as the houses in the line of route, should be decorated. The committee have not yet determined the part to be taken in the ceremony by the various public bodies connected with the metropolis, or the number of seats to be appropriated to the members and their friends. They have however resolved that the Court of Common Council shall be represented by 18 members, consisting of six aldermen and 12 commoners.

THE DEAN OF EXETER.—The Dean of Exeter, in conjunction with Dr. Pusey, has replied that, with all respect for the distinguished members of the committee appointed to oppose Dr. Temple's appointment to the Bishopric of Exeter, he declines to act as president or to become a member of it. Dr. Close, the Dean of Carlisle, has also declined to act upon a committee of which Dr. Pusey is the vice chairman, on the ground that he cannot see the wisdom and candour which would lead him to endeavour to put down one class of error by the aid of another. Bishop Fowler, who has been lately administering the diocese of Exeter, has appended his name to the memorial against the appointment of Dr. Temple, accompanied by a subscription to the funds of the committee. His Lordship claimed a vote in the Chapter as a sub-dean, the Chapter, however, declined to allow the vote, but after taking counsel's opinion they have reversed their judgment, and summoned the sub-dean. Thus the greater Chapter will elect. It is thought probable that Bishop Fowler will move in the Chapter the election of Prebendary Mackarness. The Council of the Church Association have memorialised Mr. Gladstone not to recommend the Queen to sanction the proposed nomination until Dr. Temple has satisfied the clergy and laity by "purging himself of his complicity in the erroneous opinions on account of which 'E-says and Reviews' were condemned by the two archbishops and 24 bishops." The Dean of Exeter and the Archdeacon of Totnes, on the other hand, have made known their determination not to oppose the election, partly from a feeling that Dr. Temple has not been fairly treated, and partly from a conviction that the refusal to elect would be both a breach of the law and ineffectual to prevent the appointment. The clergy of the diocese of Carlisle, and those of the rural deanery of Sutton, near Maidstone, have memorialised the Dean and Chapter of Exeter against the election. The Council of the English Church Union has resolved that it would be premature on their part to recommend any action by the Union in its collective capacity at the present stage of the case. In answer to a memorial from the deanery of East, in the county of Cornwall, requesting Dr. Temple to disavow his participation in the extreme opinions advanced by the other essayists, he has addressed to the rural dean the following letter:—

"Rugby, October 22, 1869.

"Rev. Sir,—I have the honour to acknowledge your letter of the 20th, enclosing a memorial from the rural deanery of Exeter. I regret very much the anxiety and excitement described by the memorialists as caused by my nomination to the bishopric of Exeter, and I should be glad if I could rightly do anything to allay these feelings. But to allow that a bishop designated or a rector designate, or any other person appointed to officiate in the Church, should after nomination, be liable to be called on to make declarations other than those required by law, would seem to me to be so serious an infringement of the lawful liberty guaranteed to all ministers of the Church of England, that I really dare not take the responsibility of giving it a sanction in my own case. My regret at being driven to this decision is much diminished by the confidence that I feel

that personal intercourse will rapidly dissipate most of this uncomfortable feeling, and that the result to be desired will come of itself, though I am not at present able to hasten it. Will you be kind enough to assure the memorialists that it is not from want of concern, but from a sense of duty, that I am unable to answer them, and believe me, yours faithfully,
"F. TEMPLE."

THE LATE EARL OF DERBY AND THE COURT OF COMMON COUNCIL.—At a meeting of the Court of Common Council on Thursday, the following resolutions in reference to the late Earl of Derby were carried, after some opposition on the part of some present to the expressions implying approval of his lordship's statesmanship—

"That this Court has received with the deepest feelings of sorrow and regret the mournful intelligence of the death of the Right Hon. Edward Geoffrey Stanley, Earl of Derby, K.G., &c., her Majesty's late Prime Minister. That this Court regards the decease of this eminent statesman as a great loss to the nation, and, in expressing its high admiration of his abilities as a scholar and a legislator, desires to convey to the Countess of Derby its heartfelt and sincere sympathy with her on the irreparable loss she has sustained."

THE MIDDLE TEMPLE.—It is announced that Dr Vaughan, the Master of the Temple, will read the Greek Testament daily, except Saturday and Sunday, during the Law Term, beginning on Tuesday, November 2, in the Lecture Room under the Library of the Middle Temple, at 8 o'clock A.M. Any graduates, whether laymen or clergymen, will be admitted, if their names are sent to Dr. Vaughan beforehand by letter. The subject for this Term will be the Epistle to the Colossians.

THE PROPOSED RAILWAY STATION AT THE MANSION HOUSE.—At the meeting of the Metropolitan Board of Works on Friday, a deputation from the vestry of St. George-in-the-East presented a memorial against the amended scheme of the Metropolitan District Railway Company, and opposed the abandonment of the line to Tower Hill, on the ground that that district is almost entirely destitute of railway accommodation. The memorial was referred to the General Purposes Committee. Mr. Newton subsequently moved that the railway company be informed that the Board will strenuously oppose any project which will prevent the railway being carried to Tower Hill, and the inner circle from being completed by them according to the original scheme. Mr. Roche opposed the motion, and moved the "previous question," urging that this was a subject with which the Board had nothing to do, and deprecating any spending of the ratepayers' money in a Parliamentary contest. After a long discussion the original motion was agreed to.

DEPARTURE OF THE GREAT EASTERN FOR INDIA.—On Saturday the Great Eastern, laden with the Anglo-Indian cable, left Sheerness, and proceeded down the harbour at 2½ knots speed, using her screw only. The wharves of the dockyard were crowded with the artizans, who greeted the ship with loud cheers as she passed, the compliment being returned by the crew of the Great Eastern. On passing the Pembroke, flagship of Admiral Warren, similar courtesies were exchanged by both crews, the men of the Pembroke afterwards manning the rigging, while the admiral's band played an appropriate air. The paddles were then set in motion, and the speed increased to five knots, at which rate the ship proceeded two miles below the Nore, where she brought up to take in her stores. On Sunday she left the Nore for Portland, where she will complete her coaling, and leave the first week in November for Bombay, touching at St. Vincent and the Cape of Good Hope.

THE AMNESTY DEMONSTRATION.—On Sunday, notwithstanding the recommendation of the chairman of the Amnesty Committee, the great demonstration in favour of releasing the remainder of the Fenian prisoners was held in Hyde Park. It had been arranged that the various processions should leave Charing Cross at 1 P.M., and before that hour Trafalgar Square was crowded. Along the terrace under the National Gallery was drawn up the first part of the procession, a body of 500 women, which was afterwards increased by further arrivals to above 1000. These were headed by a young female dressed in green, and bearing a small green banner embroidered in gold, with a harp and the words "God save Ireland." On the arrival of the committee at half-past 1 the procession started, headed by six horsemen, after whom were borne, side by side, the American flag and a large green banner, similar to that which headed the women's procession. Next came the Amnesty Committee and a brass band, followed by the "Ladies' procession." Banners with the inscriptions "Release our brethren," "Let the captives free," &c., were borne in this procession. Next came the St. Patrick's Brotherhood, the United Labourers, some friendly societies, and the district processions. The general procession moved through Pall Mall, Regent Street, Grosvenor Square, and Audley Street into Oxford Street, and so to the Marble Arch, where a dense crowd was already assembled. The greater number of the processionists were respectably attired, each wearing a green rosette, or green branch to imitate yew. Along the whole route crowds of spectators accompanied the procession, and in the park many thousands of people, who took no part in the demonstration, assembled to witness it. The contingents from Holborn, Finsbury, Clerkenwell, and the eastern districts did not arrive at Charing Cross in time to accompany the first part of the procession, and they took the route along Piccadilly, entering by Hyde Park Corner. In this procession marched the "Pioneers of Liberty," displaying a banner with the words "Disobedience to tyrants is a duty to God;" and an orange banner with the words in blue letters, "Put your trust in God, but keep your powder dry." Another motto was "Release the prisoners, or retract the pledge to govern Ireland in accordance with Irish opinion." Hyde Park presented an aspect in some degree similar to that which it displayed during the late Reform agitation. A fragment of a tree was made

use of as a platform, round which the roughs kept up a constant pressure, which in some measure disturbed the business of the day. The trees in the vicinity were occupied as usual by boys and men. In another place was a crowd closely packed together to listen to two men going through a burlesque of the Litany, the burden of which was the land laws. At other spots might be seen a couple of men arguing some political question, who thus also attracted a number of listeners. But save the few hundreds who surrounded the chairman and those round the banners alluded to, a very large proportion of those in the park had evidently come out to see the crowd, former experience having shown that little was to be feared. The Chairman (Mr. J. J. Merriman) having, not without some difficulty, made his way to the platform, commenced his address by stating that he was there simply as a member of the great English Liberal party, and that neither he nor the 100,000 people who had signed the memorial in favour of releasing the prisoners were either Fenians or quasi-Fenians. He entered at great length into the question of the prisoners' guilt, and into the general question of mercy to political prisoners, and described Mr. Gladstone's recent declaration as a lamentable mistake. He concluded as follows:—

"The Government cannot shirk the serious issue, and must determine for themselves whether Ireland shall be to the Gladstone Ministry what it has been to every previous Whig and Tory Government for many generations, an unconquerable difficulty, or an easy and pleasant task to govern. Up to the present moment no rational and well-informed man will deny that Mr. Gladstone's Irish administration has been a failure. Able and sincere as we know him to be, he has shown himself an improvident political husbandman in the management of his Irish estate. He has sown precious seed on a rocky, or at least an unprepared soil; and if the crop has turned out unsatisfactory, who is to blame? If the same course be pursued no better result can be looked for. The Irish Church Bill has failed to touch the Irish heart, or heal the wounded conscience of the nation. Those other measures of 'conciliation and justice' to which Mr. Gladstone refers will fail to realise those objects unless preceded by an amnesty. Some of our critics observe this, and blame the Irish people for it. I do not join in this denunciation. If the mind and heart of the Irish people had been appealed to by the Reformed Parliament and the Cabinet of Mr. Gladstone in proper time, by a broad and generous exercise of the royal prerogative of mercy, no one would have cause of complaint or grief at the manner in which these matters were received. It is no threat on my part. I do not understand the language of menace. It is but a fact I state when I say that, blame the Irish people as you may, rail at them till the present Ministry ceases to exist, and you will only discover in the end that you have increased the evil you wished to cure. The desires of the people must then be taken into account. What an unwise policy is that which turns a deaf ear to a nation's prayers. Oh, let us yet, for the sake of England as well as Ireland, indulge a hope that this concession to the will of a people may not be postponed until the alienation of their sympathies has been completed."

Mr. Clapham, town councillor of Leeds, representing the Leeds Amnesty Committee, moved the first resolution as follows:—

"That this meeting considers the political condition of Ireland renders it expedient that the whole of the political prisoners should be liberated, and that their further detention is liable to engender prejudice and ill-feeling against the Government and people of England."

He urged that if the Government would not release these men, they ought to be placed in a special prison and not treated as burglars or pickpockets. Mr. Ryan seconded the resolution, which was passed unanimously. Mr. M'Donnell then read a memorial to the Queen founded upon the resolution, and concluding with the expression of an opinion that the exercise of her Majesty's prerogative at the present time, by which the prisoners would be restored to liberty and their families and kindred, would awaken a strong sense of gratitude towards her Majesty's crown and person among all classes and creeds in Ireland, and would greatly tend to facilitate the task of government in that country, and to strengthen its attachment to Great Britain. Mr. Robinson then moved a vote of thanks to the committee, which was seconded by Mr. Kelly, and passed. Mr. M'Donnell replied, and a vote of thanks to the chairman brought the proceedings to an end. At the place where the Holborn and Clerkenwell division had halted, speeches in favour of the amnesty were made to a considerable crowd by Mr. Osborne and others. The speaking at the first platform commenced at three, and the whole of the proceedings terminated at about a quarter past four. The utmost good order was observed throughout, and the police in the park were so few as to be scarcely observable. There was, however, a strong reserve of police at hand, but no occasion presented itself for calling them out.

ENDOWED CHARITIES OF THE LONDON COMPANIES.—The digest compiled by the Charity Commissioners states the gross income of endowed charities vested in the City companies at 99,027*l.* No less than 53,912*l.* is applicable to the support of almshouses, their inmates, and pensioners, 1369*l.* to distribution of articles in kind, 112*l.* to distribution in money, 182*l.* to the general uses of the poor; 19,008*l.* to education, 5647*l.* to apprenticing and advancement, and 903*l.* to the clergy. Sums amounting to 17,983*l.* are paid to other parishes and schools. The Drapers' Company administers as much as 15,182*l.* of these funds, including the Bancroft Charity Estate, producing nearly 4500*l.* a year, the Howell Charity, producing 3819*l.* for schools, and various small endowments, including such items as 8*l.* for preachers at St. Paul's, 40*l.* for the Arabic professor at Cambridge, sums for poor prisoners, sermons, &c. The Mercers' Company's endowed charities have a gross income of 13,148*l.*; including 6547*l.* for Whittington's almshouses, 1800*l.* for the Mercers' School in which the company educate 70 boys, Lord Camden's charity of 1083*l.* a year for apprenticing and advancing, and Sir T. Bennett's trust fund of 1042*l.* a year, against which stands "company's dinner," 153*l.* The company have also the control of St. Paul's School, and claim the estates as their own property, but the question whether this is a charity under the Act had not been

decided when the return was compiled. The moneys of the moneys' Company administer 8412*l.* a year applicable for education. The Goddard endowments produce 7301*l.* the M. Bowes's almshouses, with more than 1000 scholars. The Skinners' Company administer a School and exhibitions absorbing 6000*l.* workers' Company administer 6000*l.* Taylors', 6333*l.*; the Haberdashers' charities vested in other companies amount; but some endowments are expended. The Haberdashers' Jones's "Golden Lectureship" has an income of 400*l.*, applicable for a series of lectures.

ST. PANCRAS AND THE POOR-LAW BOARD.—St. Pancras guardians sent a deputation to the Poor-law Board last week, to procure a withdrawal of the suspension order, which deprives them of the officers of the workhouse. Mr. G. Jones, avenging themselves on officials who were adverse to the guardians at the late meeting, he said, the guardians showed a conciliatory spirit, and the Poor-law Board would reconsider the order of the 200th clause. On Monday, at the meeting of the Board of Guardians, the report was read, when it was almost unanimously resisted the authority of the Board, and suggestions made by the President.

NEW COUNTY PRISON FOR MIDDLESEX.—At a meeting of the Middlesex magistrates, the question of a site for the new prison was discussed, and it was resolved to erect a new prison in the neighbourhood of Clerkenwell, approved by a large majority. An agreement was opened with the Home Secretary with a view to the present gaol prisoners confined for more than a year, and thus render a new prison unnecessary. On Wednesday evening a public meeting, in the vestry, was held at St. Pancras Vestry Hall, against the erection of the new prison at a cost of 130,000*l.*, and to urge upon the Poor-law Board the necessity of a fair representation of the ratepayers in controlling the expenditure of county rates, as proposed by a Bill brought into Parliament during the past session. Mr. Chamberlain occupied the chair, and Mr. W. Turner moved the first resolution, deprecating the new prison at a cost of about 130,000*l.*, an additional cost of 20,000*l.* a year maintenance, notwithstanding that the cost of the county amounts to 570,000*l.*; and the desirability of postponing the further consideration of the subject with a view of seeing whether the prisons in the country and not fully occupied prevent an additional burden being thrown upon ratepayers of the county, who are already suffering from a great depression, partly in consequence of the increase of local taxation. Mr. Hoppey seconded the resolution, which was carried unanimously.

THE EVANGELICAL ALLIANCE.—The conference of the Alliance for the present year will be held on Tuesday, November 23, with a business meeting on Wednesday, November 24, morning at 10 o'clock, and a devotional meeting, at which the annual address will be delivered by the chairman; praise and prayer, reading and exposition of the Scriptures. The meeting to commence at 12. 1, Chairman's address; 2, appointment of secretaries of conference; 3, the order of business; 4, the practical resolutions adopted in 1846 will be read and discussed; 5, abstract of annual report to be read by the chairman; 6, cash account, by the treasurer; 7, Chairman to nominate a committee to propose the list of resolutions for the ensuing year; 8, Address—The Doctrine of Protestant Reformation; their basis of union, and the importance of a common testimony to them in all countries at the present time; 9, resolutions thereon; sermons to be preached at St. Paul's Church, and the Wesleyan and Central chapels in the evening. Thursday, November 24, Morning—1, Chairman's address; 2, review of the progress of the Alliance; 3, addresses on the following subjects:—The relation of Christianity to modern science; the true and proper basis of union, its manifestation and intimate progress of Christ's Kingdom on earth. Evening—Addresses by foreign gentlemen and pastors of churches on the following subjects:—The progress of the Gospel in the different nations of the world; the importance of strengthening the bond of union between true believers in this and foreign lands. Friday morning, November 26, public breakfast for members and visitors, at which resolutions submitted; at 11.30, business meeting—1, Chairman's address; 2, appointment of executive committee for the ensuing year; 3, addresses on the following subjects:—1, Next general conference of Christians in all countries to be held in New York in September; reports will be presented of arrangements and addresses of delegates from the American Alliance; 2, Home missions; Christianity among the infidel population of our great cities; 3, public meetings.

THE CRIMEAN WAR.—Mr. Kinglake has been several weeks in the Crimea, preparing observations and examinations of the whole of the conflict, for the conclusion of his work on the Crimean War. All the Russian authorities, and especially

room in the house of the resident priest. There was a large attendance of clergy and laity, and many of the artillerymen stationed at Shoeburyness were also present. The new church, which is situated in Cliff Town, is a Gothic building, in the early English style, is brick and stone mixed, with some excellent carving. It is 85 feet long by about 30 feet wide, and it is so arranged that, if required, it can be enlarged. The architect is Mr. Goodman, of Southend. The Archbishop preached the sermon, and expressed the pleasure which he felt at opening that beautiful church in a place where hitherto there had been none, and he thanked those who, though not members of his church, had kindly and generously assisted the congregation. The music was executed by the choir of St. Aloysius, London, the members of which went down for the occasion. Professor Barnett conducted. In the afternoon Dr. Manning held a confirmation in the new church.

UTTOXETER.—Lord Vernon has recently erected at Sudbury several model cottages for farm labourers. Each cottage contains a living-room, three bed-rooms, entrance-porch, scullery, pantry, fuel-store, piggery, privy, cesspit, and ashpit. The cottages have been built with bricks made on the estate.

WINDSOR.—All the efforts to continue the harriers as a Royal pack having failed, it was resolved at a meeting held at the Castle Hotel on Saturday to present a requisition to Sir Robert Bateson Harvey, of Langley Park, inviting him to accept the mastership of the hounds on their becoming a subscription pack. In the short space of an hour not only was the requisition numerously and influentially signed, but 15 gentlemen put their names down as guarantors for the expenses to be incurred. Sir R. Harvey accepted the requisition, and on Monday the hounds, when sold at Tattersall's, were knocked down to him at 130 guineas, being 10 guineas above the reserve price, all competition having been withdrawn. The Prince of Wales has since requested the committee to accept the pack as a present.

Ireland.

THE VACANT LAW OFFICES.—It is believed that Mr. Gladstone will offer the Irish Solicitor Generalship, vacant by the appointment of Mr. Serjeant Barry to the Attorney Generalship, to Mr. Dowse, M.P. for Londonderry.

THE FENIAN PRISONERS.—Mr. Gladstone's letter refusing the amnesty demanded for the Fenian prisoners, has not produced the sensation which might have been expected. There is but one opinion among all the loyal and well-disposed classes, no matter what their politics—that no other course was left open to the Government, and that the time had come when such a declaration was absolutely required in order to check a mischievous agitation. The "National" journals, however, denounce Mr. Gladstone and threaten vengeance. The *Irishman* charges the Premier with having violated his promise to "abandon for ever the policy of conquest," and says, "that if England desire civil war she shall have it." *Ireland*, it says, "now stands before the world a nation. England has left us little to lose by civil war, save mud cabins and growing crops. A little labour and a genial sun would soon repair our losses, but more than sunshine would be necessary to restore London and Manchester. Ireland seeks not war, but justice. If England prefer war, the choice is her own." This article is followed by a republication of an essay by Mr. Kickam on the "Use of Arms," and by articles appealing to the Protestant spirit of resentment on account of the Disestablishment of the Church, and recommending a strictly logical application of the doctrine of "felonious" landlordism by contending for the right to resist by force the intrusion of landlord "felons" into the tenant's property, and to shoot them in self-defence. The *People of Ireland* prefaces its cry of indignation with the words, "The Gaeler's Reply: What shall Ours be?" After a good deal of angry writing, it says that a higher issue than the release of the political prisoners is involved in Mr. Gladstone's reply. "He has ignored the solemnly expressed wish of the Irish people. He has defied Ireland. We wait the reply of the Irish nation." The *Flag of Ireland* declares that the constitutional demand of an earnest and united nation has been contemptuously flung back in their teeth, and it thanks England for the lesson; adding that "it is the last constitutional appeal that will come from this land." The *Nation* says that the opportunity for a splendid act of policy and justice has been passed blindly by, and asks what is it, after all, but a continuance of the policy of British rule in Ireland since Ireland first endured the curse of foreign sway, and another proof that though time may bring its changes to all the lands of the earth, the fatal principle of British rule for Ireland remains unchanged. Mr. Isaac Butt has transmitted to Mr. Gladstone an address, in which the Premier was entreated to release the Fenian convicts, on pain of forfeiting the glory he won by his two famous letters to Lord Aberdeen in favour of Poerio and his companions. The address pointed out that if Mr. Gladstone was sincere in denouncing the treatment of the Neapolitan State Prisoners as a barbarous injustice, he could not, without recanting his doctrine of 18 years ago, advise the continued detention of the Fenians. Mr. Gladstone has replied in a letter to Mr. Butt, from which the following is an extract:—

"I should be sorry, indeed, to suppose myself capable of advising, or desiring, that a severer measure of justice should be applied to my misguided, yet, I hope, not irrecoverable fellow-countrymen than I was led to ask on behalf of any persons suffering elsewhere. Permit me, however, to observe that, saving the fact that in each case the persons concerned were within prison walls, in no particular can the two cases be said to correspond. In due course of justice, as fixed by the law of the land, the Fenian prisoners received a free and open trial, under a lawful Government, and they were found

guilty by juries of their fellow-countrymen. The prisoners in the kingdom of Naples were arrested and imprisoned without due legal process, were, in a vast proportion, not tried at all, and when they were tried, were tried largely by exceptional, not regular, tribunals. When they were condemned they were condemned not by the free verdict of a popular jury, but by sentences of judges dependent on the Government for their bread; on a Government, moreover, of which the title rested on a flagrant breach of the most solemn oaths, and of the written legal constitution of the country. The acquaintance, sir, which you possess with Italian history and affairs, in addition to your many other distinctions, renders me glad to have the opportunity of addressing to you this reference to the facts."

VISITATIONS OF THE TWO ARCHBISHOPS.—The Archbishops of Armagh and Dublin held their visitations on the 19th inst., and addressed the clergy on the present circumstances of the Church. Their charges derived more than usual interest from the opinions expressed at the recent lay conference, to which their Graces were expected to give some response from the episcopal bench. The Lord Primate in his charge deprecated the weakness and folly of spending in recriminations and complaints the little time which remains for preparation to meet the coming change. He reminded the clergy that many who took different views from them are as warmly attached to the Church as themselves, and have given to it liberal contributions and assistance. He expressed a hope that no alteration except what was unavoidable would be made in the Liturgy, observing that to make the Church the Church of a party would be to defeat the catholicity of its mission, while to extend it unduly would be fatal to the orthodoxy of its creed. He declined to enter into the question of commutation in the absence of sufficient information, and exhorted them to exercise an unprejudiced judgment, to cultivate a spirit of moderation, to avoid the discussion of proposed changes until they should have got over the pressure of their immediate difficulties, and especially to guard against the formation of parties. He regarded the system of voting by orders as a great protection to their independence. Both clergy and laity were thereby invested with the power of preventing any party changes, and the Bishops could also exercise a salutary control. He deemed it a happy circumstance that the laity had adopted this system. The Archbishop of Dublin commenced by reviewing the passage of the Church Act through Parliament, and complained bitterly of the conduct of the House of Lords, which had promised so much, and done so little, to mitigate the severity of the measure. He entered into a long argument on the subject of commutation, the tendency of which was to abate any undue expectations of pecuniary advantage to the Church from its direct action. The hints and statements that a vast sum being realised, something like a re-endowment would be obtained from commutation would, in his opinion, come to nothing. Any attempt to encroach upon the fair liberties of the clergy, to impose upon them any other condition of faith, or any active agitation for the revision of the Prayer-book or Articles, would bring about a jealousy on their part in the matter of giving to any body that increased hold upon them which ultimately commutation would give to the Church Body. He went further, and said that not only must there be the absence of agitation on these points, but reasonable securities that nothing of the kind shall be attempted. He believed, however, that the laity had as little desire as the clergy to lift their anchors and drift. He pointed out the risk of forfeiting, through innovations, the sympathies of their brethren in England, and reducing the Church of Ireland to a provincial level and rent into fragments. For himself he declared that the Church cannot afford to part with, and would be at a most unhappy strife with its own usefulness if it attempted to part with, either of the great theological tendencies which are making themselves felt within it. His Grace expressed satisfaction at the adoption by the laity of the plan of voting by orders, and advised the clergy to agree to the recommendation of the late conference that the lay representatives should be twice as many as the clerical. He earnestly urged, especially upon those in foremost positions, the duty of giving liberally to the Church, and that the assistance of those who advocated disestablishment ought not to be rejected, as some proposed.

AMNESTY MEETINGS.—Notwithstanding Mr. Gladstone's letter, the amnesty mass meetings were repeated on Sunday. The gathering in the county of Cork was at Carrigaline, eight miles from the city, the contingent of which was conveyed by railway train. There were bands, banners, and party rosettes as usual. The chair was taken by a Roman Catholic parish priest, the Rev. Mr. M'Swiney. Ex-Mayor O'Sullivan and Town Councillors Beardon and O'Brien, and others, addressed the meeting, and denounced the letter of Mr. Gladstone, whose name was received with groans, and hissed vigorously. Resolutions were adopted to the effect that no measure will be satisfactory to Ireland until the prisoners are released. When a resolution on the land question was tendered the people would not listen, and dispersed. An amnesty meeting was also held at Tralee on Sunday, which was attended by about 1000 people, among whom there was not one person of any social position superior to the small farmer or cottier, not a single magistrate, and, strange to say, not one priest. On Wednesday evening a crowded meeting, convened by the Amnesty Association, was held in the Mechanics' Institution, Dublin. Resolutions were passed expressing regret at Mr. Gladstone's refusal, declaring a determination to continue the agitation, and to form local amnesty associations throughout the country.

OUTRAGE ON COUNT DE JARNAC.—One of the most popular of the resident proprietors of the county Tipperary, the Count de Jarnac, received last week the following threatening letter:—

"Take notice: If you are determined to bring about another Ballycohey affair, you'll be met with by a watchful antagonist,

who will point at you with the back prostrate upon Thostown plain. This shall value your days in this life.—To Count de Jarnac, Count de Jarnac immediately assembled the yard of Thomastown Castle, the tenants and labourers on the property, and the letter to them addressed them, and stated that the letter referred to town village, which fell in in America of Thomas Burns, the A farmer named Ryan had tilled crops for the two preceding years, to give up possession of the land ultimately promised to do so, or should be allowed to take away. After he had removed the crops, however, he still declined to give action for ejectment was brought Ryan called on Mr. Butler, the subject of his conversation was that he up possession. On the following morning ing letter was received through the post de Jarnac.

ATTEMPTED MURDER IN MEATH.—An attempt was made on Sunday night of Mr. Gargan, steward of Mr. John J.P., of Moynalty, near Trim. Mr. Gargan where near his own house, in the second attempt which has been made two years.

AGRARIAN MURDER IN LEITRIM.—O'Brien, of Mohill, was found brutally Friday morning in a ditch within his own house, and within sight of the Currateriff. It is supposed that he was shot gunshot wound in his neck; but he was beaten to pieces with stones, presented and shapeless mass, that no distinct traces, and it was nearly impossible was fired at or not. The agrarian, as Mr. O'Brien, in the capacity of his cousin, Mr. Cornelius O'Brien, the estate in Sligo, had had some difficulty with the tenants, and obtained ejectments against three families at the Quarter Sessions of now just ended. He was generally well liked by all. Nine persons were on suspicion, and the police have succeeded in clothes stained with blood in the house them.

ANOTHER ATTEMPTED ASSASSINATION.—On Tuesday night the county surveyor of John H. Brett, was fired at through the window of his residence at Bathkeale, and wounded. A man named Bourke has been The cause of the attempt is unknown.

Scotland.

THE BISHOPRIC OF EDINBURGH.—The Bishop of Edinburgh, recently announced his intention to resign his see on account of the names of several eminent clergymen mentioned in connection with it. The bishop, however, reconsidered his determination, and not to resign, has issued a commission of Moray and Ross to administer the diocese of Edinburgh is now, therefore, in position, that whereas it had until late Dr. Terrot and Dr. Morrell, who resigned a few weeks ago—it is now placed under the direction of another see.

THE FACULTY OF ADVOCATES.—On Gordon, Q.C., was unanimously elected Faculty of Advocates, in room of Mr. appointed Lord Justice Clerk.

FREEDOM OF EDINBURGH TO SIR JAMES.—On Tuesday Professor Sir James presented with the freedom of the city. The Lord Provost, in presenting the referred to the respect held for Sir James of his chloroform and acupuncture.

THE TELEGRAPH TO SHETLAND.—The of another step in the northward extension graphic communication is reported. The of the Orkney and Shetland Telegraph, Wick to the Pentland Frith, was opened inst. As the greater part of the cables lines connecting the islands have been expected that communications will soon be throughout.

Railways.

FATAL ACCIDENT ON THE GREAT On Sunday night, as the 8 o'clock train to Peterborough was approaching Weymouth, 22 miles from King's Cross and two from several of the carriages ran off the rails. of the accident is said to have been some points, which prevented their being properly that the wheels of one of the carriages them, the carriage and those which thrown off the line. Two passengers, Walden, a farm bailiff, and his wife, the spot, and a third—Charles Wells, Welwyn—was so injured that he morning. Several other persons were seriously. The inquest was opened and adjourned.

FATAL COLLISION ON THE NORTH. Friday evening a collision took place between passenger train and several coal wagons between Auckland and Durham. The fireman were killed on the spot, and 12 passengers slightly injured. The jury at the inquest

land there are 6 Beasts; from Ireland, 570; and 2180 from the Midland and Northern Counties.

		Pigs	.. 4 0 - 6 0

THURSDAY, Oct. 28. The number of Beasts is very much smaller than on Thursday last; trade is not brisk, yet prices are rather higher than on Monday. The supply of Sheep is very small, so also is the demand; choicest descriptions being scarce make rather higher rates. Choice Calves are also dearer. Our foreign supply consists of 249 Beasts, 475 Sheep, and 110 Calves.

Best Scots, Herefords, &c.	5 4 to 5 6	Best Long-wools	5 4 to 5 6

ENGLISH WOOL. We have had a quiet but steady market. Supplies of English Wool being still ample, prevent any improvement as yet, but Colonial grades, both here and abroad, are in good demand, with decreasing stocks and decidedly higher prices; this probably will, sooner or later, affect the English demand also.

CURRENT PRICES OF ENGLISH WOOL. per lb.—s. d. s. d.

MARK LANE.—MONDAY, Oct. 25. The supply of English Wheat to this morning's market was small, but the little improvement noted on Friday was lost, and factors accepted the prices of last Monday. There was a fair attendance.

limited to a few needy purchasers at the prices of this day so'night. Fine malting Barley was scarce, and fully as dear, but there was no alteration in other descriptions. Beans and Peas were unchanged in value. The Oat trade was quiet at the rates of this day week. Flour meets with little inquiry, and prices are unaltered.

FRIDAY, Oct. 29. The first two days of the past week have been very fine; since then it has been cold, with some snow, and severe frost for the time of year. The improved demand for Wheat and Flour noted last week has not been long sustained; the foreign arrivals and home deliveries competing with increased warehoused stocks, could not be taken off by consumers, and where sales were pressed the late small advance has been lost again. We find no quotable change in the value of spring corn, but malting Barley meets more general attention, while Beans are neglected. Flour has been a difficult sale at prices in favour of buyers. Since Friday last 19 grain and seed-laden vessels arrived off the coast, of which, with those left over from the preceding week, there remained for sale last night 22 cargoes. The trade in floating cargoes during the past week has been very quiet, and the animation lately observed has gradually disappeared. Arrived cargoes of Wheat met with a slow sale, at a reduction of 1s. per qr. Maize was about 6d. per qr. cheaper. Rye and Barley were but little inquired after. Business in cargoes on passage and for forward shipment was limited, sellers of Wheat holding for late rates. Maize was about 6d. per qr. easier, and in other articles no transactions were recorded.

The arrivals of English grain are small, but fair of foreign. There was a moderate attendance at this morning's market, and the little English Wheat on offer brought Monday's quotations, and in foreign only a limited business was transacted at that day's rates. Spring corn was steady, without alteration in value.

MANCHESTER, Oct. 28.—A dull feeling has prevailed in the trade since our last report. Wheat and Flour have both been

difficult of sale, at prices in favour of buyers, but in other articles no material change in value has occurred. Our market this morning was numerously attended. English Wheat met a slow sale, and all but the finest qualities were 1s. per qr. lower; foreign, at the same time, being offered at a reduction of 3d. per cental, without leading to more than a limited business. Flour was neglected, and 6d. per sack cheaper. Oats, being less plentiful, brought 1d. per 45 lb. more. Beans and Indian Corn ruled steady.

SEED MARKET. There is but little to report concerning the London seed trade, the business transacted during the week having been very limited in extent, and no material change in values having taken place. Winter Tares, with less inquiry, are noted 6d. per bushel cheaper. Hemp seed continues very scarce and dear; our letters from Rotterdam quote an advance of 2s. per qr. In Canary seed there has been a fair trade passing at moderate rates. As the Borough houses are just now giving their sole attention to Hops, Clovers and Trefoils are for the moment neglected. The Rape seed trade is firm. Windsor and Longpod Beans are now on sale in our market, and values are beginning to be fixed. Feeding Linseed, owing to the cold weather, is in improved demand. Königsberg spring Tares for future delivery are now offering at very low prices. For new French Italian Rye-grass higher rates are demanded on the other side.

JOHN SHAW & SONS, 16, Water Lane, E.C.

METROPOLITAN MEAT MARKET.—Oct. 30.

Best Fresh Butter	18s. per dozen lb.
Second do. do.	16s. "
Small Pork, 5s. 0d. to 5s. 8d.; Large Pork, 4s. 4d. to 4s. 10d. per 8 lb.	

WANTED IMMEDIATELY, a MAN of thorough business habits, to take the Management of a Country Nursery near a large town, where Plants, &c., are grown (not propagated) for Market, &c. A Small Seed Business connected therewith. The strictest integrity indispensable.—Apply by letter, stating wages required, &c., to WM. DILLISTONE, Horticultural Agent, &c., Sible Hedingham, Essex.

To Gardeners. WANTED, for the Country, a HEAD WORKING GARDENER, who has a thorough knowledge of Forcing and Conservatory work.—Apply, by letter only, to B. B., Mr. Henry Flanders, 43, Newgate Street, London, E.C.

WANTED, a HEAD WORKING GARDENER.—Must be thoroughly acquainted with the Culture of Stove and Greenhouse Plants, good Grape Grower, and an efficient Flower and Kitchen Gardener. Cottage found.—Apply, stating all particulars, wages required, &c., to J. B. S., The Laurels, Taunton.

WANTED, a WORKING GARDENER and Wife (without children preferred), as MASTER and MATRON of an Industrial School. Church people.—Miss C. Beckley Grove, near Worcester.

WANTED, a Man and his Wife, without incumbrance, to live in the house. Man as good WORKING GARDENER, Wife as good PLAIN COOK. All found except beer. Good character indispensable.—Apply, stating wages required, and other particulars to J. W., Mrs. James, Fishmonger, Broad Street, Worcester.

WANTED, a Man and his Wife (Catholics).—The Man as GARDENER, and to take the Management of Sheep in the Lambing season; he will also be required to Sing in a Choir. The Woman must be a thorough good LAUNDRESS.—Apply by letter to Mr. COLLINS, at Messrs. Burns, Oates & Co.'s, 17, Portman Street, London, W.

WANTED, a GARDENER (single), to live in the house, and make himself generally useful. Will have to Milk Cows.—Apply R. B. JORDISON, Esq., South Ockendon, Essex.

WANTED, a first-class PROPAGATOR of CONIFERÆ, RHODODENDRONS, &c.—State age, qualifications, and all particulars, by letter only, to R. R., *Gardeners' Chronicle* Office, W.C.

WANTED, an intelligent, active MAN, of experience in the Plant and Seed Trade, to assist in taking and executing Orders.—Apply to JOHN MITCHINSON, Seedsman, Truro.

WANTED, for a Nursery, a CLERK (under 25), well up in Botanical terms.—Apply in own handwriting, stating age, salary, and references, to N. M., *Gardeners' Chronicle* Office, W.C.

WANT PLACES.—Letters to be Post Paid.

EXPERIENCED GARDENERS (or as GARDENER and BAILIFF), of various qualifications, recommended to Gentlemen.—Further particulars given on application to Messrs. E. G. HENDERSON and SON, Wellington Nursery, St. John's Wood, London, N.W.

To Gardeners and Bailiffs (Head, Foremen, or Under). JAMES CARTER and CO. having many applications for the above request that those WANTING SITUATIONS will send NAME, ADDRESS, and COPIES of TESTIMONIALS for ENTRY in their FREE REGISTER. Only those who can send unquestionable references need apply. Any Lady or Gentleman requiring GARDENERS or BAILIFFS may rely upon J. Carter & Co. adopting the most stringent regulations in reference to testimonials as to ability, honesty, &c. JAMES CARTER and CO., 237 & 238, High Holborn, London, W.C.

DAVID MITCHELL, NURSERYMAN and SEEDSMAN (late Head Gardener, Hamilton Palace), can with confidence recommend to any Nobleman or Gentleman some first-class HEAD GARDENERS. Highest references can be given.—Apply, in first instance, to DAVID MITCHELL, 3, Hanover Street; or Dean Park Nurseries, Edinburgh.

Gardeners and Under Gardeners. WM. CUTBUSH and SON beg to state that they have at all times on their books MEN of various qualifications, whose characters will bear the strictest inquiry. Any Gentleman making application would save time by clearly stating the duties to be undertaken, wages offered, &c., so that suitable Men may be selected.—Highgate Nurseries, London, N.

MR. WM. PAUL begs to announce that he has made arrangements by which he will be enabled in future to furnish Gentlemen with the NAMES, ADDRESSES, &c., of GARDENERS, and GARDENERS and BAILIFFS, of various qualifications, who are open to Engagements. The fullest particulars as to services required and wages given should be forwarded with application.—PAUL'S Nurseries, Waltham Cross, London, N.

GARDENER (HEAD).—Age 39, married, no family; has just left one of the leading places in the county, and is at liberty to re-engage with any Nobleman or Gentleman requiring the services of a thoroughly practical Gardener whose personal character and qualifications are highly recommended to give every satisfaction.—Apply firstly to N. B., Post Office, Thirsk, Yorkshire.

GARDENER (HEAD).—Age 38, married, no family; practical in every department. Good knowledge of Flower and Kitchen Gardening. Good knowledge of Stock, and the general work of an Estate. Can be recommended.—S. J., West Street, Somerton, Somerset.

GARDENER (HEAD).—Middle-aged, no incumbrance; has a thorough knowledge of all its branches, and can undertake the Management of Farming, Plantations, Laying out of Grounds, and the Buildings if required. Satisfactory references on application. Wade's Library, 13, High Street, Kensington, W.

GARDENER (HEAD, or SINGLE-HANDED).—No incumbrance. Wife a good Landlady. Can be recommended.—B. W., Mr. Newbury, 164, Friars Street, London, E.C.

GARDENER.—Married, a practical man. Hants. H. H., Mr. Adams, Victoria Road, Hants.

GARDENER (SECOND).—A responsible position. Has been used to the House. Not particular as to place.—A. R., Post Office, Caterham.

GARDENER (SECOND, or OTHER).—Fruit and Flowers is extensively cultivated. Has experience in other large establishments.—B. C., The Gardens, Wokingham, Berks.

GARDENER (UNDER), in a Nursery.—A respectable Young Man. Six years' experience in various places.—J. B., Post Office, Didsbury, near Manchester.

GARDENER (UNDER), in a Gentleman's Garden.—Age 22; has been used to Glass, but wishes to be in Plant and Fruit Growing. Three years' good experience. The Gardens, St. Giles's, Cranborne, Dorset.

FOREMAN, in a Nobleman's or Gentleman's Garden.—Age 25, has a thorough practical knowledge of all its branches. First-class references. A Premium given for a long time for the highest character.—A. B., 24, Cochrane Terrace, St. John's Wood, W.

PROPAGATOR (INDOOR).—Ten years' experience in London and Provincial Firms in the Propagation of General Nursery Stock.—B. C., *Gardeners' Chronicle* Office, W.C.

AGENT and ESTATE BAILIFF.—A man wishes to recommend a thorough, trustworthy man who has been in his employ for 13 years in the above capacity. He is an excellent Farmer and most efficient Accountant. He receives the highest character.—A. B., Messrs. J. & W. Booksellers, Cockspur Street, Charing Cross, W.C.

LAND AGENT.—The Advertiser, who has good testimonials and references, is in want of a Salary moderate.—B., Mr. Gibson's, Land Surveyor, 24, Terrace, York.

INDOOR SERVANT (SINGLE-HANDED, or OTHER).—Age 29; thoroughly understands the business up in Hunting appointments. Can be well recommended.—31, Morford Street, Bath.

To the Seed Trade. SHOPMAN and TRAVELLER, or MAN.—Wm. COCKER, for many years Manager of the late James Veitch & Son, of Exeter, wishes to recommend as SHOPMAN and TRAVELLER for a Wholesale and Retail Establishment.—WM. COCKER, Veitch & Sons, Royal Exotic Nursery, Chelsea, S.W.

To Seedsmen and Nurserymen. SHOPMAN.—Age 23; six years' experience in knowledge of Nursery Business; first-class references. Unexceptionable.—C. J., 7, Mill Place, King's Cross, London, W.

SHOPMAN, or ASSISTANT.—Age 21; six years' experience in London and Provincial Houses. Good references from last employers.—SEEDSMAN, 61, Bowyer Lane, Finsbury Square, London, W.

SHOPMAN, or ASSISTANT.—Age 21; six years' experience in the Seed Business. Good references from good Houses.—E. W., 1, Warrington.

SHOPMAN (ASSISTANT), or WAREHOUSEMAN.—Age 21; six years' experience. Good references.—1, Pembroke Street, Cork.

COWMAN, &c., to look after two or three cows. Married, is a good Miler, and thoroughly understands the Management of Stock, and can assist in the General Management of a Farm and Chase. Good character. Can look after a Horse and Chase. Good character. Employer.—H. GORDON, 7, Shakespeare Terrace, Road, Stoke Newington, London, N.

THE DECAY of the TEETH and GUMS. Various causes, but principally it may be attributed to neglect, ill-health, and the use of tooth-powders containing other deleterious acids, which gradually corrode the teeth, while they corrode the enamel. It is hard to point out MESSRS. ROWLANDS' ODONTALGIC DENTIFRICE, as a preparation free from all such ingredients, and eminently calculated to embellish and preserve the structure; to impart a grateful fragrance to the breath; and to perpetuate the graces of the mouth.

DINNEFORD'S FLUID. The best remedy for Acidity of the Stomach, Headache, Gout, and Indigestion, and the best for delicate constitutions, especially adapted for Ladies and Infants. DINNEFORD and CO., 172, New Bond Street, London, and of all Chemists throughout the World.

CORNS and BUNIONS.—A Gentleman, who has been tormented with Corns, will be happy to afford information by which he obtained their complete removal, without pain or any inconvenience.—Forward name on stamped envelope to F. KINGSTON, Esq., Water, Barn.

COCKLE'S ANTIBILIOUS PILLS. THE SAFEST FAMILY APERIENT. In boxes at 1s. 1 1/2d., 2s. 6d., 4s. 6d., and 11s.

COCKLE'S ANTIBILIOUS PILLS. In use the last 69 years for INDIGESTION. In boxes at 1s. 1 1/2d., 2s. 6d., 4s. 6d., and 11s.

COCKLE'S ANTIBILIOUS PILLS. In use the last 69 years for BILIOUS AFFECTION. In boxes at 1s. 1 1/2d., 2s. 6d., 4s. 6d., and 11s.

COCKLE'S ANTIBILIOUS PILLS. In use the last 69 years for LIVER COMPLAINTS. In boxes at 1s. 1 1/2d., 2s. 6d., 4s. 6d., and 11s.

COCKLE'S ANTIBILIOUS PILLS. THE OLDEST PATENT MEDICINE. In boxes at 1s. 1 1/2d., 2s. 6d., 4s. 6d., and 11s.

NOVEMBER FOGS are COMING. In-door. Here, and many are suffering from COUGHS, ASTHMA, INFLUENZA, &c. Immediate relief can be obtained by the use of SPENCER'S PULMONIC ELIXIR. Every property which can be beneficial in cases of Croup, Asthma, and all complaints of the Chest and Lungs.

Gardeners' Chronicle
Newspaper.

FRIDAY, NOVEMBER 6, 1869.

Heating Apparatus

EDDITH continues to supply and fix HEATING APPARATUS in VINERIES, and every kind of GREENHOUSE BUILDINGS, &c. The Vineyard, Garston, near Liverpool.

H O T - W A T E R P I P E S.

	per yard	CASH PRICES		
		2-inch	3-inch	4-inch

J. JONES AND SONS,
6, Bankside, Southwark, London, S.E.
Price Lists, with terms for credit and for delivery at country stations, will be sent on application.

JAMES BOYD AND SONS, HORTICULTURAL BUILDERS, PARKY, N.B. Manufacturers of CONSERVATORIES, GREENHOUSES, VINERIES, and every description of HOT WATER HEATING APPARATUS for Horticulture, Burrows, Churches, Mansions, Warehouses, &c.

JAMES BOYD & SONS beg to call attention to the superior facilities they possess for executing all orders entrusted to them, in a first-class style, at a moderate price, and with despatch. Their works are fitted with the most improved machinery, especially adapted for the trade. Their system of ventilation gives the most perfect result, and is superior to any other system in use. It is adapted to all kinds of buildings, and is secured during wet weather, without admitting the rain. Plans and Estimates on application.

BY HER MAJESTY'S ROYAL LETTERS PATENT.

ORMSON'S NEW PATENT ECONOMIC BOILERS.

ORMSON'S PATENT CONCENTRIC SADDLE BOILER.

ORMSON'S PATENT CONVOLUTED BOILER.

ORMSON'S PATENT TUBULAR BOILER.

The construction of these Boilers, it will be at once seen that the object of the Inventor is to economise fuel, by concentrating its entire force and vertical action on the interior of the Boiler, and not wasting it by Heating Brickwork and Chimneys, a fault common to the great majority of Boilers now in use. They are made of the best Welded Wrought-iron, of good substance, having no overlapping plates, holes, or rivets, and are therefore perfectly secure against expansion and contraction of the metal, an occurrence so frequent and fatal to all forms of Cast-iron Boilers. The diameter and length of Pipe to be Heated.

HENRY ORMSON, HORTICULTURAL BUILDER TO HER MAJESTY,

HOT-WATER APPARATUS MANUFACTURER TO THE COMMISSIONERS OF HER MAJESTY'S ROYAL PALACES AND PUBLIC BUILDINGS, AND TO THE ROYAL HORTICULTURAL SOCIETY,

STANLEY BRIDGE, KING'S ROAD, CHELSEA, LONDON, S.W.

GREEN'S PATENT IMPROVED TUBULAR HOT-WATER BOILERS.

OBLONG BOILER.

SQUARE BOILER.

THE ABOVE BOILERS ARE

THE MOST EFFECTIVE AND DURABLE EVER INVENTED.

They are set to work at a nominal cost, inasmuch as no brickwork is required; as will be seen from the above drawing, they are placed upon a Cast-Iron Sole-plate, the purpose of Foundation and Ashpit. In the peculiar and substantial manner in which these Boilers are made, they are warranted to last for years without getting out of order; in fact, we guarantee them for a much longer period. They are adapted for Heating Greenhouses, Churches, Chapels, Schools, Public Buildings, Entrance Halls, Warehouses, Workshops, &c.

THE FOLLOWING ARE THE ADVANTAGES OF THESE BOILERS:—

- 1st, They require no setting in brickwork.
- 2nd, They are complete in themselves, having perfect means of regulation.
- 3rd, They take up little room, and can be put in places inaccessible to other Boilers.
- 4th, They are economical of fuel, owing to the great amount of heating surface upon which the fire acts in a direct manner, and the consumption of smoke.
- 5th, The fire can be made to last from 12 to 24 hours without attention.
- 6th, Any number of Flows and Returns can be annexed to the Boilers by means of T-pipes.
- 7th, By means of mud doors, they can be readily cleaned out when required.
- 8th, The Chimney is made of cast-iron, which can either be taken through a roof or turned into a flue, to meet the convenience of the situation that it may be fixed in.

PRICE LISTS ON APPLICATION.

THOMAS GREEN AND SON, SMITHFIELD IRON WORKS, LEEDS;
and 54 & 55, BLACKFRIARS ROAD, LONDON, S.E.

Ministers to his presence, and strove, by every argument, to induce Admiral Topete to remain in the Government. The latter remained in the Government for 24 hours for the first time. On Thursday the Admiral, in writing, and personally visited the Emperor, and declared that after mature reflection it was his duty to persist in his resignation, but he would, however, that he would remain in the Government, and that Marshal Prim would be the Regent with the firm intention of maintaining the situation. The Progressists and Democrats yesterday to consider the situation at Madrid in consequence of the Emperor's resignation. In the Cortes on Tuesday the Emperor explained that the cause of the resignation was the question of the candidatures to the throne. Every effort to solve that question had failed, on account of the attitude of the Government, however, would be to the principles of the revolution, and Artanaz of the Unionist party, proposed the Government. The Cortes then held a private meeting of the majority of the Cortes on Saturday night, and sat till 2 o'clock on Sunday. Several speeches were made, and a conciliatory attitude on the question of the Duke of Genoa, and 64 votes in favour of a second balloting of the Duke, and those against him 52. On Monday 134 members of the majority gave in their candidatures, 65 members still in opposition, 141 Deputies have since given in their candidatures, and there are now only 100 members of the Republicans. Marshal Prim, however, can carry the Duke's election, and he has Royal Highness will ultimately give him 180 votes, which would give him a majority of more than half the number of Deputies to vote in the Cortes. Senior Ardanaz, who was Minister of Finance in the Provisional Government, has resumed the duties of his office, and has accepted the portfolio of Foreign Affairs. Senior Ardanaz made his financial statement on Saturday, and estimated the revenue of the coming year at 656,966,035f., and the expenditure at 656,966,035f. A tax of 20 per cent. will be imposed on the bonds of the External and Internal Debt, and other classes of securities. The redemption of the bonds is postponed, except with regard to mortgages. There is to be a reduction of 20 per cent. in the salaries of all civil servants, and of 30 per cent. in the salaries of the clergy.

PORTUGAL.—The Commercial Association of Lisbon will meet shortly to deliberate on the question of the differential duties on imports. The steamer *Estephania*, having on board the representatives of the Portuguese Government to be present at the opening of the Suez Canal, sailed last night for Alexandria.

RHINE.—On Sunday evening, and again on Monday night, severe shocks of lightning were felt at Frankfort, Darmstadt, Wiesbaden, and the neighbouring localities. At Wiesbaden on Monday night 21 distinct oscillations were felt. On Wednesday evening severe shocks were felt at Frankfort, Darmstadt, and Grossgerau, and a large number of inhabitants of Darmstadt were obliged to take refuge.

RUSSIA.—The *New Prussian Cross Gazette* of Berlin says that there is no foundation for the report that Count Bismarck will shortly return to the same paper announces that the deputation of the Schleswigers charged with the presentation of a memorial to the King of Prussia has not been received by His Majesty, and that the address has been referred to the Minister of the Interior. In the sitting of the Lower House of the Diet on Friday, the preliminary discussion on the estimates for 1870 commenced. At the outset of the debate the new Minister of Finance, Herr Camphausen, made a speech in which he expressed his hope that the House would support the Government in its earnest endeavour to restore order to the finances, and showing the utmost possible regard to the resources of the country. On Thursday the House having moved a resolution that the expenditure should be reduced, and that the House of the Diet should call upon the Government to advocate a general disarmament, Herr Lasker, of the National Liberals, gave notice of his intention to move, in lieu of that resolution that the House should pass a modified order of the day, that the Military Budget of the North German Confederation for 1871 is already determined by the Government.

RUSSIA.—In the sitting of the Lower House of the Diet on Thursday, the preliminary debate on the estimates for 1870 commenced. The Minister of Finance, Herr Camphausen, proposed that the whole of the 4 per cent. debt existing in the old Prussian Empire should, by a voluntary arrangement, be converted into a 4½ per cent. Rente Debt, the interest of which the State would not be bound to pay. The Minister also stated that with the sanction of the House the Government would increase the taxation by 25 per cent. The official journals publish a telegram from Constantinople stating that the Porte has granted permission to the Austrian troops to march through the Turkish territory.

The note of the Porte states expressly that in consequence of the suzerain relations existing between the Porte and Montenegro, the Montenegrin and Turkish territories will be placed on the same footing as regards the Austrian troops.

DALMATIA.—After an engagement, which lasted four hours, the Austrian troops on Tuesday drove back the insurgents beyond Serravalle. General Dornik advanced as far as Poberoja, without meeting with any opposition. The Imperial troops afterwards occupied several important strategic points near Sisse, the result of which was the mission of a deputation of 10 persons from the Zuffa to the Governor of Dalmatia, with an offer of submission on the part of the insurgents. The deputation admitted that the new Austrian regulations were not the cause of the insurrection which they attributed, on the contrary, to the Serbo-Slavonian agitation. The Popen and other fanatics had excited the people, to whom they held out hopes of foreign assistance. The deputation represented the insurgents as discouraged, and divided amongst themselves.

HUNGARY.—The trial of Prince Karageorgewicz, for complicity in the assassination of the Prince of Serbia, continues. The Public Prosecutor asks the Court to condemn the Prince to death, on the ground that morally he was the responsible originator of the crime. The statutes for the election of the Catholic Congress have been sanctioned.

GREECE.—The Emperor of Austria arrived at Athens on Wednesday morning, on his way from Constantinople to Egypt.

RUSSIA.—St. Petersburg is threatened at this moment with total inundation. At the last advice the Neva had already overflowed its banks, and guns had been fired to warn the tenants of ground floors to remove themselves and their families to higher storeys, or to abandon the city. This is the first flood that has taken place at St. Petersburg for 15 years. The last was in 1824, when 462 houses were destroyed, and 3800 seriously damaged. 20,000 people were then left without shelter, and 600 drowned.

ITALY.—The King, on Monday, caught a severe cold, accompanied by fever, at his hunting seat at San Rossore, near Pisa. On Wednesday morning a great improvement took place in the condition of His Majesty, who is expected to return to Florence very shortly. The interview of the Emperor of Austria with King Victor Emanuel will take place at Brindisi on the 37th or 28th inst. The King will be accompanied by the President of the Council of Ministers. The Duchess of Genoa has left for Naples, in order to be present at the approaching confinement of Princess Margherita. A Royal decree was issued on Sunday, convoking the Senate and Chamber of Deputies for the 18th inst. A Circular Note has been addressed by the Government to its diplomatic agents abroad, explaining the attitude of Italy in regard to the Commemorial Council. The Government declares that it reserves to itself the right to reject any decisions of the Council which may be in opposition to the laws of the kingdom and the spirit of the age. Among other conditions brought forward against the meeting of the Council, the Note lays stress upon the fact of the occupation of the Papal States by foreign troops. General Garibaldi is expected to arrive in Florence early in December, in order to appear in the Chamber of Deputies and demand an account from the Government regarding the arrest of his friends, and particularly of his son-in-law, Canzio, detained many months in prison, and afterwards set at liberty by a declaration of "no ground for accusation." Two Government engineers and a contractor have been captured by brigands in the province of Aquila. Letters from Sardinia state that murders and robberies are frequent, and that widespread brigandage prevails in that island.

THE PRINCIPALITIES.—The President of the Ministry, M. Ghyka, in the absence of Prince Charles, opened the Bucharest and Gurgevo Railway, on Sunday, in the presence of all the members of the Ministry and other guests of distinction.

TURKEY.—The Emperor of Austria arrived at Constantinople on Friday from Varna, and alighted at the Palace of Dolmabahatche. The ships in the bay were all gaily decorated, and the city was illuminated in the evening.

EGYPT.—The Empress Eugénie reached Luxor on the 1st inst. Her Majesty there met the French and German savants who have been invited by the Khedive to be present at the inauguration of the Suez Canal. The International Commission on the jurisdiction question, consisting of the Consuls of England, France, Austria, Russia, Prussia, and Italy, commenced its sittings on the 28th ult. M. de Lesseps has announced that the Suez Canal will be ready throughout for navigable purposes by the 15th inst., and that at the inauguration on the 17th a Turkish vessel, drawing 21½ English feet, with a number of other vessels, will pass through it from Port Said to Suez. Within a fortnight afterwards the depth of water will be increased to 24 feet.

INDIA.—The Viceroy was to return from Simla on the 9th inst. All idea of a Durbar at Agra on the arrival of the Duke of Edinburgh has been given up. A camp will be formed there, but on a far smaller scale than was originally contemplated. A *Gazette Extraordinary* was published on the 4th ult., containing a detailed account of the financial position of India. It states that instead of having a surplus of 213,500l., as was estimated in the Budget for 1868-69, the actual result for that year showed a deficit of 2,273,380l. The chief items of increase in the expenditure were the Civil Charges, which had risen by 700,000l.; public works (exclusive of railways), by 816,631l.; home charges, by 856,276l.; and railways, by 456,645l. In parts of Rajpootana, Sind, and Guzerat, there have been immense swarms of locusts, such as

have never been known before, and very serious devastation has been the consequence. The foundation stone of a Protestant church, the cost of which is to be paid by the King of Burmah, has been laid at Mandalay. Her Majesty's steamer *Porto* ran aground near Cape Guardafui whilst cruising in quest of whale shows, and sustained considerable damage. It is stated that the Arabs have fired upon her Majesty's gunboat *Clrde* near Muscat. It is expected that her Majesty's steamer *Daphne* will shortly proceed to the Persian Gulf.

CHINA.—An English missionary has been murdered near Pientsin. The Rev. J. W. Morrison, of the Missionary Society, in company with Mr. Hedges, were in a boat anchored in the Great Canal, and during the night of August 25 the boat was attacked by armed robbers, and Mr. Morrison was killed, whether from personal violence or from falling into the water in the scuffle, is not known. Five robbers injured no one else seriously. The body was recovered from the canal some days afterwards.

AUSTRALIA.—The great "diamond," the discovery of which caused so much excitement last summer, has been ascertained to be a mere mass of rock crystal. The Supreme Court of Victoria, after argument, confirmed, on September 1, the order of the justices requiring Kennedy, one of the Panamas who was pardoned by the Queen and who went from Western Australia to Victoria, to leave the latter colony within a week. He thereupon took his departure, it was supposed, for South Australia. The Hon. John Pascoe Fawcett, founder of the colony of Victoria, died a few weeks ago, aged 76. It was only a little more than 34 years ago that he sailed up the Yarra and commenced a colony the growth of which has been unexampled in history, and which, in all probability will never be surpassed.

UNITED STATES.—At the elections in New York on Tuesday the Democrats carried the elections for State officers. Mr. Nelson being returned as State Secretary over General Sigel, and Mr. Allen his State Comptroller over Mr. Horner. Governor. They also secured a majority in the State Legislature. The Republicans also carried Massachusetts electing the State Comptroller with Mr. Chaffin as Governor by a majority of 10,000 over Mr. Adams. They also carried Wisconsin, electing Mr. Fairchild as Governor by a majority of 10,000, and the State of Minnesota electing Mr. Austin Governor by a majority of 1,000, and secured a majority in the West Virginia Legislature. The Democrats have carried the elections in both Houses of the New Jersey Legislature. They have also carried Maryland, by a majority of 25,000, electing every member of the Legislature. Governor Holden, of North Carolina is enrolling negro militia to assist the civil officers of Orange and Chatham counties to enforce the laws. The steamer *Storowal* was burnt on the Mississippi, near Cairo, on the 27th inst. Of the 258 passengers and crew on board only 88 were saved. Two of the stokers were burnt, nearly all of them being drowned.

CANADA.—Prince Arthur left Ottawa by special steamer on the morning of the 19th ult. for the hunting grounds on the Lower Ottawa. At Montreal the Prince had a magnificent greeting. His reception at the great Lacrosse tournament was probably one of the most unique and striking he ever experienced. Two rows of Lacrossists—one Indians, the other whites—all in full costume, with crosses in their hands, were waiting to receive his Royal Highness, and as he rode up between, the Indians gave him an original war-whoop, while the whites responded with a genuine British cheer. He then accepted an address from the Lacrossists, a gold-mounted cross, and a copy of the first book ever published on the game, written by Dr. Beers, a member of the Montreal Lacrosse Club.

BRAZILS.—The Chamber of Deputies has been prorogued until the 15th inst. The Ministerial difficulty continues, differences of opinion existing among the members of the Cabinet. The Government has announced that warlike operations will be prosecuted until the clauses of the triple alliance are fulfilled. Count D'Eu, the commander-in-chief, is still engaged in preparations for continuing the pursuit of Lopez, who is either at San Estanislau or San Ysidro.

City Intelligence.

BANK RATE OF DISCOUNT.—The Directors of the Bank of England on Thursday raised their rate of discount from 2½ per cent. to which it was lowered on August 19, to 3 per cent.

BARNED'S BANKING COMPANY.—On Thursday Messrs Charles and Lewin Mozley, two of the directors of Barned's Banking Company, were charged at the Mansion House with the issue of a false and fraudulent prospectus, and conspiring together to defraud the shareholders of 2,600,000l. Mr. Lewis stated the case for the prosecution in a lengthy address, and the further hearing was then adjourned until the 12th inst.

MONEY MARKET, FRIDAY. — BRITISH FUNDS: Consols are 93 to 93½ for Delivery, and 93½ to 93½ for Account; New and Reduced Three per Cents., 91½ to 91½; Bank Stock, 237 to 239; Exchequer Bills, March, par to 5s. pm.; June, 5s. to 10s. pm.; India Five per Cents., 114½ to 115½; — FOREIGN Argentine, 83 to 83½; Brazilian, 83 to 83½; Egyptian (1871), 8½ to 8½ ex div.; Ditto (1868), 76½ to 76½; Viceroy's Seven per Cents., 81½ to 82½; Ditto Nine per Cents., 98½ to 99½; Italian, 53½ to 53½; Ditto Tobacco Loan, 84 to 85½; Mexican, 13½ to 13½; Peruvian, 81½ to 81½; Portuguese, 33 to 33½; Orel, 81 to 81½ ex div.; Nicolas, 65 to 65 ex div.; Moscow, 83½ to 83½; Charkof, 80½ to 81; Spanish, 26½ to 26½; Turkish Five per Cents., 42½ to 42½; United States 5-20 Bonds, 83½ to 83½ ex div.; Erie, 20 to 20½; Illinois, 98 to 99.

Metropolis and its Vicinity.

THE QUEEN'S VISIT TO THE CITY.—It was announced yesterday that the Queen's visit to the City this morning, for the purpose of opening Blackfriars Bridge and the Holborn Valley Viaduct, will be made in State. The Royal progress, moreover, has been so planned that the fullest opportunity will be given to the citizens of witnessing the procession in various parts of the metropolis. The arrival of the Royal train at Paddington station has been so timed as to enable the procession, after traversing the intervening streets and spaces, to reach Blackfriars Bridge at 12 o'clock. On leaving the Great Western terminus the Queen will drive through the Parks to the Horse Guards, and passing under the arch into Whitehall, will proceed by Parliament Street, Westminster Bridge, York Road, Stamford Street, and Blackfriars Road to the Surrey side of Blackfriars Bridge, where the City authorities will be in waiting. Having arrived at the centre of the bridge, where a pavilion has been erected, the royal carriage will halt, and the Lord Mayor, having alighted from his carriage, will approach her Majesty with the Corporation address of welcome to the City. His lordship will be accompanied by the sword and mace-bearers, the principal City officers, and the six aldermen and 12 commoners appointed to form the deputation. Subsequently the Lord Mayor will present the chairman of the Bridge House Estates Committee, who will hand to her Majesty an emblazoned description of the new bridge, prepared by Mr. Joseph Cubitt, the engineer of the work. After her Majesty has formally declared the bridge open, a procession will be formed, consisting of the members of the deputation in carriages, the sheriffs' and Lord Mayor's carriages following; and in this way her Majesty will be escorted along Bridge Street, Farringdon Street, Farringdon Road, around New Charterhouse Street, past the western side of the Meat Market, through Smithfield, and along Giltspur Street to the eastern end of the Holborn Viaduct. At the pavilion which has been erected in the middle of the viaduct the Lord Mayor will again leave his carriage, and present to her Majesty Mr. Deputy Fry, chairman of the Improvement Committee, under whose superintendence the work has been completed. He will also hand to the Queen an emblazoned description of the work, prepared by Mr. William Haywood, the engineer. As soon as this ceremony has been completed, her Majesty will declare the viaduct open to the public, and will then return to Paddington along Holborn and Oxford Street, making a *détour* through Margaret Street at the point where the main thoroughfare of Oxford Street is for the time interrupted. The arrangements which have been made on the bridge and viaduct will accommodate 6000 visitors. Great preparations have been made by all the leading inhabitants along the line of route, and the day will be kept as a general holiday in the City.

DR. LIVINGSTONE.—A letter was received by the Bombay Government, on the 5th ult., from Dr. Kirk, Acting Political Agent at Zanzibar, dated September 7, 1869, in which he states that he has received a letter from Dr. Livingstone, dated Bangwelo, July 8, 1868. In that letter Dr. Livingstone says:—"I may say I have found what I believe to be the sources of the Nile, between 10° and 12° south, or nearly the position assigned to them by Ptolemy." The sources of the river appear from the letter to consist of a number of large lakes, and Dr. Kirk, in writing of these lakes, says "they are probably 10 days' march in length, and, like the Nyasa-Tanganyika and the Albert Nyanza, overhung by high mountain slopes, which open out in bays and valleys." This description of the appearance of the lakes and mountains appears to have been obtained from the Arab traders who brought the doctor's letter to Zanzibar. Dr. Livingstone was in good health and spirits when he wrote this letter from Bangwelo. A letter has since been received at the *New York Herald* office in London from a relative of the United States Consul at Zanzibar, which says that in this letter Dr. Livingstone states that he has heard that two sets of supplies had reached Ujiji from Zanzibar for his use, but that he had not yet been there for them; that he asks that a further supply might be sent there—and among the articles he wishes to be included are nautical almanacs for the years 1869 and 1870—which looks as though he purposed remaining in the country yet a long time. He gives no hint as to his intention for the future.

THE VOLUNTEER VISIT NEXT YEAR.—The National Guards of Paris propose to invite the Belgian Civic Guard and the English Volunteers to a rifle competition next year in the vicinity of Paris. It is said that the Emperor Napoleon and Lord Clarendon, having been consulted, have expressed themselves as favourable to the project.

THE NOMINATION OF DR. TEMPLE.—Mr. Gladstone has addressed the following letter to the Hon. and Rev. E. V. Blich:—

"Rev. Sir,—I am truly sorry that I cannot concur in the objection which in your letter you have stated to Dr. Temple's appointment, but I fully recognise the transparent sincerity of purpose with which it is written. Indeed, your candour induces me to suggest that you might relieve your own mind in some considerable degree by a perusal of Dr. Temple's sermons, or some of only the first among them on Good Friday. I do not learn that the highest and most responsible authorities of the Church are dissatisfied with the nomination of Dr. Temple. At the same time, I do not seek to transfer to them any portion of the responsibility which belongs entirely to myself. You are at liberty to make any use of this letter which you may think proper. I cannot, however, close it without congratulating you in the sense and courage you have shown in labouring to dissipate the powerful and useful agency of the offertory from the mischievous conceptions of religious parties, with which it has in truth no connection whatever.—I have, &c., W. E. GLADSTONE."

ST. PAUL'S CATHEDRAL.—On Tuesday morning, the conclusion of the service, the Rev. Canon Gregory expressed his sorrow at the disgraceful manner in

which the services of the cathedral were attended by the vicars-choral and their assistants. He said that the performance of the services had become a public scandal, and that it was a question whether the services should not be entirely discontinued. On All Saints' Day, he said, one of the greatest festivals of the Church, there were only two gentlemen present at either service, and there were only three that morning. He did not particularly single out the gentlemen present, as they were the most regular in their attendance, but there were others who were systematically lax in the performance of their duties. These remarks were answered by one of the singing men, who said that their attendance was as regular as they had engaged to make it, and that they should be happy to attend more services if they were paid better, for the miserable stipend they at present received compelled many to seek other engagements to keep them from starving. Canon Gregory then said that the service of God and the public service were above the convenience of the individual, and that the present was not the time and place to discuss the question of pay. He then announced that the time of the services would in a short time be altered to suit the public convenience, and stated that he would make all England ring with the story of the disgraceful performance of the services at St. Paul's; and if that, his public remonstrance, had no effect in procuring a better administration, he would invoke the power of the visitor of the cathedral.

THE RECTORY OF BARNES.—The Rev. Henry Melvill will resign the rectory of Barnes at Christmas. The living, which is in the gift of the dean and chapter of St. Paul's, will be conferred upon the Rev. Henry Holme Westmore, M.A., minor canon of Manchester.

NEW ROUTE TO AUSTRALIA.—A new line of communication for the Australian trade is likely to be established between Milford Haven and a North American port, thence by the Union Pacific Railway to San Francisco, and thence by a new line of steamers to Australia, China, and India. The Great Western Railway Company have undertaken to afford every facility for the transport of this new traffic over their line.

THE OPEN SPACE NEAR THE MANSION HOUSE.—A deputation of the bankers, merchants, &c., of the City of London had an interview with the Metropolitan Board of Works on Friday, and presented a memorial praying the Board to preserve the ground opposite the west side of the Mansion House as an open space. Mr. Joseph addressed the Board at great length in support of the memorial. Mr. Saunders moved that it be referred to the Works and General Purposes Committee for consideration and report. Mr. Newton said it was his opinion that the deputation had come to the wrong place in asking them to sacrifice land to the value of upwards of 200,000*l.* If it was desirable to open up and beautify the Mansion House, the City of London ought to contribute something towards the expense of doing so. The motion of Mr. Saunders was then agreed to.

WIMBLEDON COMMON.—The question as to the right to enclose Wimbledon Common is likely to form the subject of very expensive litigation. Earl Spencer, the lord of the manor, has leased 140 acres of the common for farm cultivation, and the inhabitants and others who have common rights dispute his lordship's power to enclose any portion of it. A bill in Chancery has been filed by Mr. H. Peek, M.P., on behalf of a committee, and an answer has been put in. A very strong party feeling prevails on the subject around Wimbledon.

TECHNICAL EDUCATION FOR THE WORKING CLASSES.—On Thursday evening a largely-attended meeting of the masters and members of the Livery Companies of the City of London was held in the Mansion House. The Lord Mayor took the chair, and said that he had convened the meeting for two reasons—firstly, because he had taken the greatest interest in the subject of technical education; secondly, because about the middle of June last year a request was made to him to preside over a meeting, called by the committee of the Common Hall, of all the various companies of the City, to take into consideration the subject of technical education. In studying the history of the City companies, it would be seen that each of them had exercised a considerable influence in the education of their working people, in training the latter up in the knowledge of that which was used by them in the various arts with which they were connected. The necessity for the employment of the various branches of art was the same as of old. The manufacturers of England had to yield lately to foreign competition, and although the same spirit and capability existed in English manufactures as formerly, still they had to contend with much foreign rivalry, which it was their duty to oppose. The Government had acknowledged the necessity of technical education, and had established schools of art and design at Kensington, but these had failed to reach the masses of the people. It was therefore the duty of the various livery companies to take the matter into their own hands. The object of the meeting was to elicit opinion as to the best mode of applying the system. He would suggest that the companies should try the experiment for a period of three years. They should, firstly, have classes formed for the study of drawing; secondly, they should hold exhibitions annually of the various works wrought, and offer a premium for the best. They should also hold examinations in the arts and in drawing. Alderman Cotton, Mr. Stoddart, Mr. Watney, and others, then addressed the meeting, advocating technical education. Mr. Wickmaster, of the School of Science and Art, Kensington, stated his opinion that, although a theoretical knowledge of the process of manufacture might be imparted by oral instruction, still it was inferior to mechanical training. A resolution was passed pledging the livery companies of London to support the project.

THE ALBERT ASSURANCE COMPANY.—The liquidators of this company have on Monday next, to consider a scheme with the approval of the Board of an assurance society, under which policies on lives now assured will be placed on equitable and advantageous arrangement, if adopted by the opinion of the liquidators on the liabilities of the Albert.

THE NEW LEAGUE.—The third meeting of the new League was held at Old Bailey, on the 27th ult. Mr. H. H. Weston moved that the programme be adopted without any change, leaving it to the executive committee appointed to put them into shape. The main points of the resolutions are:—The present owners out of the national debt to be liquidated of the national debt to be "The Political and Social Reform League" a name that would cover everything for and against the name. Those in favour of the name would express their objection to a long name. Mr. H. H. Weston seconded the proposition. There were two great parties in the League, the upper and middle classes, and the labour party. The labour party was seconded by several. Mr. Weston moved that neither "social" nor "political" anything definite. The greatest objection carried on under the name of social reform term "Tory" was identified with the land, and "Liberal" were identified with money. "Labour League" would be the most definite name for a working-men's party. After some further discussion the original proposition for amendment was rejected by 32 against 17. Then proposed that the name should be "The Labour League." This met with general approval and was carried by a large majority as an amendment. When put as a substantive resolution it was held up against it. The next question was should be the president. The promoter of the movement proposed Mr. Odger, others proposed Mr. Bradlaugh, and some thought that the presidents should be done away with. Mr. Weston declared that he would not accept the proposal and was of opinion that the League could not exist without a president. The Chairman of the International went on very prospectively president, every council meeting appointed a man for the evening, and the council of the League could not do better than follow the example then moved and seconded that no president be appointed; the proposition was carried. A council of about 40 members was then appointed, the following were unanimously appointed:—Mr. Weston, treasurer; Mr. Boon, secretary; Mr. Eccarius, assistant secretary. A vote of thanks to the promoters of the movement and another to the man concluded the proceedings.

THE COLONIES AND THE UNEMPLOYED.—The Queen is in course of signature of a proclamation to see that measures are taken to employ the large number of persons at present unemployed and willing to work to go to her Majesty's dominions where their labour and where they may prosper and increase the wealth of the whole empire. The petitioners also state they have heard "with alarm and indignation" that her Majesty has been advised to consent to the Colonies, "containing millions of unemployed which might be employed profitably, both by the Colonies and ourselves, as a field for emigration in order to discourage and defeat a disunion, they humbly pray that England and her Colonies and dependencies may be incorporated into one British Empire, and that it be made that her Majesty is Sovereign thereof in manner as she has been proclaimed Queen of the Colonies. The petitioners also ask her Majesty to send Parliament without delay, that they may be enabled to discuss the causes of the present distress and seek a remedy.

HIGH TIDES.—On Wednesday afternoon the river rose to a height far exceeding that in the early part of last month, and as much as 10 feet was done to property on both sides of the river. The wind during the day was N.W., but fortunately not high, or the result might have been very disastrous. As it was, the first indications of an unusual rise were apparent about 1 o'clock, at which time the tresses of all the bridges on the river were under water. As the tide had then still some distance up, tradespeople in the low-lying districts of Elms, Battersea, and Wandsworth, became alarmed, and at once set about barricading the houses. At last the water washed over the roadways, and in Nine Elms Lane reached the footways. Great damage was done to houses and market gardens, and numbers of boats were carried away. At Chatham the tide rose 21 feet above the yard, which is a foot and a half more than the rise at the beginning of last month. At Ramsgate it rose much higher than has been known for many years, covering the landing-stage, submerging the

penetrating into the lower part of the house, and other premises. On Thursday, it was high water at London Bridge, and the water assembled on the Embankment and in the districts most with its rise, and in the districts most from floods the doors were barricaded with timber. The wind blew with the full force from the north-west, but the water did not rise above Trinity mark, and therefore but little of the way into the thoroughfares, and no damage was done. It is stated that to-day and to-morrow the water will be very high, more especially if the present

LOSS OF AN EMIGRANT SHIP.—The last week respecting the foundering of the emigrant ship, *Weser*, with 346 persons on board, has proved to be unfounded. The Lloyd's have traced their shipping and have been unable to find such a vessel, nor any ship missing.

ACCIDENT AT HORNSEY.—On Tuesday a fatal result resulted from larking with three carpenters, at half-past 8, left off breakfast. For that purpose they went to a house next to that in which they were a loaded gun had been left by a Potter. One of the three, named Tucker, pointed it at another, named May, and told him to prepare to die, and pulled the trigger. May's heart and left lung, killing Tucker, who was greatly distressed at the "lark," was taken before the magistrate, and a large of man-laughter, and remanded. On Thursday the jury returned a verdict on "Misadventure," with a censure on the conduct of the three, and a severe censure on Potter, by whom the gun was left loaded.

FATAL FIRE AT NEWINGTON BUTTS.—The circumstances of the fatal fire at Newington Butts was resumed on Friday, when it was given to show that the charges of inattention against the fire brigade and police were unfounded. After a long inquiry of 16 hours the jury returned a verdict that the fire and loss of life were accidental, and that the conduct of the firemen, Watling, as well as that of the police and the public generally, were highly praiseworthy.

CHARGE OF EMBEZZLEMENT IN THE CITY.—Richard, the stockbroker, charged with fraudulently converting to his own use a large amount of railway stock, was again brought before the magistrate at the Mansion House on Tuesday. It was stated that securities to the value of £10,000, the property of the executors of Dunlop Douglas, of Ayrshire, who died last year, were entrusted to him, some for safe custody and some for sale; that he had paid £8,500 on account of the securities, and that the estate would be reduced by his default to the extent of £15,000. He was charged with a similar misappropriation of £100,000 and other securities, belonging to Major Douglas. After several witnesses had been examined in support of these charges, the prisoner was committed for trial.

FORGERY AND EMBEZZLEMENT IN THE CITY.—A series of forgeries has been discovered in the City amounting to many thousands of pounds. William Lindon, described as of 21, Walcott Street, Craven Street, Strand, and for whose apprehension a warrant has been issued, is the party implicated. The forgeries have been committed in relation to bills of lading upon large quantities of corn and other commodities, and two persons, connected with the Corn Exchange, are alleged to have been defrauded to the amount of about £10,000. On Tuesday an adjudication of bankruptcy was made against the accused on the petition of a creditor. He has not yet been apprehended. On Wednesday a banker's clerk, named George Hyde, aged 25, was charged before Sir Robert Carden, at the Mansion House, with stealing a 500*l.* note, and embezzling £100*l.*, the property of his employers, Messrs. Hoare & Co. Evidence in proof of the theft of the money was given, and it was stated that the note, which was stolen in October, 1867, was found at the Bank of England six months afterwards in the gambling rooms of Monaco. The prisoner was committed for trial.

SCUTTLING A SHIP.—On Monday, James B. Boman, the captain and part owner of the ship *England*, and Thomas Helbern, the carpenter, were brought up at the Mansion House for examination on the charge of scuttling the ship on the high seas, for the purpose of defrauding the ship's owners. The witnesses were the cook, the steward, who deposed that they saw the carpenter and the carpenter down in the after hold with a quantity of augers; that the ship had been previously water-tight, but began to fill soon afterwards, and the crew then took refuge on board a Portuguese vessel. The witnesses admitted that no secret was kept from the crew, that the ship had been leaking, and that the crew were tired with pumping. The Lord Chief Justice committed both the prisoners for trial.

MYSTERIOUS DEATH AT PENGE.—The death of Mrs. Emily Fowler, who died by strychnine poisoning, under very suspicious circumstances at Penge a few days ago, was concluded on Saturday. The coroner, in summing up, said that there was not a shadow of evidence against the husband, and the jury returned an open verdict, to the effect that deceased died from the effects of strychnine, but by whom or how it was administered there was no evidence to show. It is doubtful whether the police authorities will think it necessary to institute a further inquiry.

PUBLIC HEALTH.—The Weekly Return of the Registrar-General states that in the week that ended on Saturday, Oct. 30, 1466 births and 3279 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 26 per 1000 persons living, being 25 per 1000 in London, 22 in Edinburgh, 21 in Dublin, 23 in Bristol, 25 in Birmingham, 32 in Liverpool, 31 in Manchester, 29 in Salford, 27 in Sheffield, 24 in Bradford, 24 in Leeds, 21 in Hull, 32 in Newcastle-upon-Tyne, and 27 in Glasgow. In Paris the annual rate in the same week was 21 per 1000, the rate in Berlin during the seven days ending the 28th ult. was 26 per 1000. In London the births of 1077 boys and 1102 girls, in all 2179 children, were registered in the week. In the corresponding weeks of 10 years 1859-68, the average number, corrected for increase of population, was 2181. The deaths registered in London during the week were 1536. It was the 131 week of the year, and the average number for that week, corrected for increase of population, was 1372. The present return is therefore 164 above the estimated amount.

the Registrar-General states that in the week that ended on Saturday, Oct. 30, 1466 births and 3279 deaths were registered in London and in 13 other large towns of the United Kingdom. Provincial.

BAENSLEY.—Considerable excitement was caused in this town on Tuesday by the announcement that the mail cart which carries the letters and remittances from Wombwell and Hoyland had been stopped and the contents stolen. It appears that the driver of the mail gig was emerging from Wombwell Wood, which is a very lonely road, when four men sprang upon him, dragged him off his seat to the road, where one of them covered his eyes, whilst the two others robbed the mail of its contents. The driver was kept in this state until the two had decamped with their booty, when the other released him and took to his heels. The horse made off, but the driver overtook it, and drove with all speed to the nearest police-office. Upon searching the wood and the adjoining fields two private bags, belonging to the Darfield Main and the Wombwell Main Coal Companies, were found unopened; but another bag, containing a sum of money, besides letters, has not been found; nor have the thieves.

BELPER.—On Wednesday night a man named Hitchcock, while out with his wife, kicked her savagely till she became insensible, and then dragged her home, inflicting additional injuries. She died on Thursday morning, and shortly afterwards her husband, who had been taken into custody, committed suicide in the lock-up, during the absence of the superintendent at Derby, where he had gone to make arrangements for holding the inquest. The prisoner hung himself to the bars of the cell window by his neckerchief.

BIRMINGHAM.—At the borough sessions, on Saturday, Fanny Letitia Baker was convicted of swindling and bigamy, and sentenced to penal servitude for seven years.

BOLTON.—On Tuesday evening an aggregate meeting of the supporters of the strike was held. The meeting was a very excited one, and some of the speakers were for resisting the masters' reduction of 5 per cent. At the close a vote was taken by ballot, when the numbers for the strike were 213, against 397. Work was resumed on Thursday.—John Ramsden, Edmund Ramsden, John Harwood, and Henry Marsden were charged before the county magistrates last week with poaching on Mr. Hick's estate, and committing a murderous assault on his keepers. The prisoners were identified by the wounded gamekeepers, and were committed for trial at the assizes.

BROWLEY.—The young man Davis, who is charged with shooting his sweetheart, Frances Whittington, at this place, was brought before the magistrates on Wednesday. The evidence of the prosecutrix, who, though in an extremely weak state, was able to attend, proved that the act of the prisoner was deliberate and intentional. The defence was that the gun went off by accident. The prisoner was committed for trial.

BLACKPOOL.—Since Tuesday night a great storm has been raging in this town, and at noon on Thursday it appeared to culminate. For many hours the wind had been blowing at a hurricane pitch, and between 11 and 1 on Thursday the tidal water rose to a greater height and with more violence than the oldest inhabitant could remember. At noon it ran "mountains high;" many houses were flooded to the depth of 2 feet or 3 feet, and in spite of closed doors fastened up with clay, and drawn shutters, the violence of the sea broke in upon several, sweeping round, and coming in at the back with immense fury; the spray of the waves dashed over the houses, and some persons were apprehensive that the whole of South Shore would be washed down. The water between the Manchester and Fox Hill Hotels rushed over the walls, and flooded the Blackpool and Lytham Railway, a portion of which was washed away. No trains were able to run between Blackpool and Lytham, and travellers had to pass to and fro by other conveyances. The two piers stood the storm well, though considerably shaken at times. Fortunately, the wind blew from the N.N.W.; if it had come from the S.W., terrible destruction would have been caused. The tidal water had not been cleared out on Thursday evening, and if the gale continued, great destruction was anticipated. Some persons, fearing the tide of Thursday night, removed their furniture, and abandoned their dwellings entirely.

BRISTOL.—On Thursday night, the Avon steamer, trading between Newport and Bristol, came into collision with the steamer *Athlete*, off Pill, a few miles below this city. The Avon sank in five minutes. Twenty passengers were on board, and were all rescued with difficulty in the steamer's own boats. The crew swam ashore. Hundreds of pigs, sheep, and other animals were drowned.

CAMBRIDGE.—The election of public orator took place on Tuesday in the Senate House, the Vice-Chancellor presiding. There were only two candidates, the

Rev. A. Holmes, M.A., Fellow of Clare, and formerly of St. John's, and Mr. R. C. Jebb, M.A., Fellow of Trinity. It was understood that Mr. Holmes was actively supported by St. John's, and Mr. Jebb by Trinity. At the close of the poll the numbers were, for Mr. Jebb, 527, for Mr. Holmes, 383. Mr. Jebb was therefore declared duly elected. The University was in a state of excitement throughout the day.

CANTON.—An annual meeting of gentlemen from different parts of the town was held on this city on Friday, under the presidency of Mr. Russell, of Dalaman, chairman of quarter sessions, to consider a proposal to erect a memorial to the late Bishop Wallbridge. After different suggestions had been discussed, it was decided that a fund should be raised, the first object of which should be the erection of a monument in *Catharine Cathedral* to the memory of the late prelate, the remainder of the money to be applied to the completion of the new parish church of St. Mary's Without.

ETON.—The authorities of Eton College have proposed various important alterations in the constitution of their governing body. It is to consist for the future of the Provost of Eton and King's, of three members elected respectively by the Hebdomadal Council at Oxford, the Council of the Senate at Cambridge, and the Eton Masters, who are not, however, to elect one of their own body. Further, the Lord Chief Justice and the President of the Royal Society are each to nominate a member, and the seven persons thus chosen are to elect colleagues, who are not to be fewer than two or more than five. This is considered a very fair representation of the various interests concerned in the system of education pursued at Eton, and henceforth the Universities, the professions of the Church, the Law, and Natural Science will each be able to assert the claims of those subjects of study in which they are chiefly interested.

LIVERPOOL.—Miss Rye sailed from the *Mersey* last week for Quebec, with 100 female emigrants, 70 of them being orphan girls, from five to eleven years of age, chiefly from the Liverpool Industrial Schools. On arriving at Quebec Miss Rye will take the girls to a "Home" she has provided for them at Niagara, where they will be carefully trained, up to the age of 15, for domestic service.

MANCHESTER.—The Congress of the National Education Union, which has been sitting in this city for several days, after long discussions on the denominational system in all its bearings, was brought to a close on Thursday by the adoption of the following resolutions:—

"That this Congress desires to record its general approval of the scheme of the National Education Union, and is of opinion that it ought to foster the best and further legislation for the comprehensive extension and completion of a national system of education." "That the Congress earnestly invites the friends of the existing system of national education to enrol themselves members of the Union—to meet together in their respective localities to form themselves into local unions for united action, and to sustain the cause of national education by subscribing to the journal of the Union, and to invite the clergy and ministers of religion to use their influence in this behalf." "That the best thanks of the Congress be respectfully tendered to the Earl of Harrowby, Mr. Hugh Birley, M.P., the Hon. Algernon E. Egerton, M.P., and the Right Hon. W. P. Cowper, M.P., for their kindness in presiding, and to the readers and speakers of the respective sessions of Congress."

MARGATE.—The Australian packet ship, *Swiftsure*, of 1400 tons, from Melbourne to London, with a cargo of wool, several boxes of specie, and about 120 passengers, went ashore on Margate sands about half-past seven on Wednesday evening, but as there did not appear to be any immediate danger she made no signals of distress. The crew tried their utmost to get the vessel off, but without success, and on the tide falling they desisted. On Thursday morning a lugger brought ashore about a dozen passengers, including two or three ladies, with a quantity of luggage. Other passengers had previously landed at Dungeness. At spring tide she floated, and was towed off by the steam-tugs. It is believed that she has not sustained much damage.

NEWARK.—A shocking suicide was committed on Wednesday night, the 27th ult., by the Rev. Herbert R. Hand, second master of the grammar school in this town. Deceased, who was about 25 years of age, only entered on his duties on the previous Saturday week. He was observed to be depressed, but the head master, the Rev. H. Plater, thought it arose from a violent cold from which he was suffering. He had been at Oxford, and lived at Exeter, and had the best testimonials, one, from the Dean of St. Paul's, speaking highly of his mental qualifications and goodness of heart. At the inquest a porter on the Great Northern Railway deposed that deceased came up to him on Wednesday night, and asked, "Which side does the express run?" He replied, "This side, sir," whereupon deceased said, "Thank you." He appeared quite rational and free from excitement. The guard of a goods train stated that in passing he saw something like a man lying across the metals, and at first thought it was a dog. The body was subsequently found on the spot indicated, completely cut in two. No letters were found upon him, only three pieces of lead pencil and 2*d.* The jury returned a verdict of "Temporary insanity."

OXFORD.—A convocation will be held on Friday, the 12th inst., for the purpose of electing a Chancellor in the place of the late Earl of Derby. It is generally understood that the only candidate who will be put in nomination is the Marquis of Salisbury.

PRESBURY.—The funeral of the Earl of Derby took place on Friday in the church of St. Mary's, Knowsley, distant a mile and a half from Knowsley Hall. This church was erected by the late Earl himself, and the mortuary chapel beneath was constructed under his superintendence. His father, the 13th Earl, was buried in the parish church of Ormskirk, with all the predecessors of his race from 1573, when that church was

first erected. Before then, the burial-place of the Stanleys was the ancient monastery of Burscogh, which seems to have been demolished at the time of the dissolution of the religious houses. The admission to the church was by ticket, but from its limited size, after places had been reserved for the members of the family and the servants from Knowsley Hall, accommodation remained for barely 250 persons. Applications were made to Admiral Hornby, upon whom the arrangements devolved, for four or five times that number of tickets. In the distribution of these a preference was invariably given to the tenantry or others connected with the household, in accordance with the Earl's wish that only those should be present to whom he had been intimately known. All who were provided with tickets were required to be in their places by half-past 11 o'clock, but the funeral procession did not move from Knowsley Hall till after 12. The hearse, drawn by six horses, and having on its panels the armorial bearings of the Stanley family, was preceded by a servant carrying the coronet of the late Earl upon a velvet cushion. Eight mourning coaches followed the hearse, each drawn by four horses. The first of these was occupied by Lord Stanley, the Hon. F. Stanley, the Hon. Colonel Stanley, and Captain Stanley, his son. In the other mourning coaches were Colonel Long, the Hon. W. Wilbraham, brother of Colonel Long, the Hon. W. Hopwood, the Rev. F. Hopwood, Mr. Arthur Hopwood, Mr. Charles Hopwood, the Earl of Wilton, Lord Grey de Wilton, Mr. Penrhyn, the Rev. Mr. Penrhyn, the Hon. Colonel Talbot, the Rev. P. Champayne, Lord Skelmersdale, Admiral Hornby, the Rev. E. Hornby, Mr. Edmund Hornby, Lord Hyde; Dr. Miller and Dr. Gorst, medical attendants of the late Earl; Mr. W. Laurence, solicitor; and Mr. Hale, Mr. Molt, Mr. Slatter, Mr. W. Molt, and Mr. Holme, officers of the estate. Following the mourning coaches, on foot, were about 70 servants, members of the household and of the outdoor establishment, wearing scarves and hat-bands. The route of the procession lay for a mile through Knowsley Park, and for the entire distance no one but members of the family and immediate dependents of the late Earl were permitted to join the ranks. The remaining half-mile, however, intervening between the park gates and the church was crowded with occupants, who made their way to that point, some on foot, others on horseback, in vehicles of every description, many from the nearest railway station, the majority of them being in mourning. The funeral service was read by the Rev. W. L. Feilden, the incumbent, and at its conclusion, and after the chief mourners had retired, the members of the congregation were allowed to enter the vault, which contains a family tomb, 10 feet in length, about 14 feet wide, and 11 feet high, and designed for the reception of 24 coffins, of which the first was that of the late earl. The body was enclosed in three coffins: the first made of oak grown upon the estate, the second of lead of unusual strength and weight, and the third also of oak, covered with crimson velvet and gilt furniture. Both the second and third coffins bore plates with suitable inscriptions. That upon the outer coffin was as follows:—

"The Right Hon. Sir Edward Geoffrey Stanley, 14th Earl of Derby, Baron Stanley of Bickerstaffe, and a Baronet, K.G., P.C. Born March 29, 1799, died October 23, 1869."

ROCHESTER.—The Earl of Jersey, who is the owner of Rochester Castle, having offered to the Corporation the castle and adjacent grounds on lease for a long term of years at a nominal rental, a meeting of the citizens was held in the Guildhall on Friday, the mayor presiding, for the purpose of considering the desirability of accepting the offer, in order that the castle grounds might be laid out as a public park and pleasure grounds for the use of the inhabitants. The proposal was strongly opposed by Mr. W. Manclank, a magistrate of the city, who now rents the castle grounds from the Earl of Jersey, but the meeting unanimously decided on accepting his lordship's offer, and authorised the Corporation to levy a rate to maintain the grounds as a public park, a proposition by Mr. Manclank that the offer be not accepted not finding a seconder. About 1000*l.* has been raised in subscriptions among the inhabitants to lay out the grounds, and it was stated that 2000*l.* would be forthcoming for the purpose.

SHEPHERNESS.—On Wednesday afternoon a frightful accident occurred on board her Majesty's gunboat *Thistle*. Her engines were on trial when one of her boilers, a high-pressure one, suddenly split down a crack which had not been observed in one of the plates, and discharged such a volume of steam that 10 men were killed, viz., four engineers, three stokers, two fitters, and an engineer student. Eight others were severely scalded, and one at least lies in an extremely dangerous state. The ship, which was a double screw composite gunboat of 465 tons and 120-horse power, afterwards anchored off the Mouse Light. The cause of the accident is not known.

SHEFFIELD.—William Broadhead, on Friday evening, took his farewell of Sheffield at a music-hall, in the presence of a very large audience. He was dressed in deep mourning, and had all the appearance of a dissenting preacher. He delivered a speech, in which he expressed the belief that rattening and outrages would continue, and represented himself as leaving the town in order that the finger of suspicion might no longer point at him as the instigator of such crimes, while he regarded himself as the instrument of an imperative necessity.

WOLVERHAMPTON.—On Monday evening a fatal fire broke out at the works of Messrs. William Evans & Son, iron braziers and japanners, in this town. By the carelessness of one of the japanners the plug from a barrel of spirit of tar had been mislaid, and the liquid allowed to run to waste. A lighted paper was brought to look for the plug, and the spirit was thus fired. A number of workpeople, including several women, were

instantly enveloped in flames. Two persons were burnt to death, and seven others were so seriously injured that they were removed to the hospital, where one of them died on the next day. Two of the deceased were young women, and the other was a lad, all of whom were engaged in the workshops. One of the women was observed burning to death in the midst of the spirits, but could not be saved; the other leaped into the burning spirits in which the first was dying, and broke her leg by the jump, and the boy was found suffocated in the japanning stove, where he had taken refuge.

YARMOUTH.—Intelligence received at this port up to Saturday leaves little doubt of the total destruction of at least 10 smacks, and the consequent loss of about 30 men and boys. Portions of Yarmouth smacks have been washed up on the Dutch coast, while other portions have been seen drifting in the North Sea.

Ireland.

TENANT-RIGHT DEMONSTRATIONS.—On Monday a tenant right meeting, convened by the high sheriff of the county of Limerick, which was expected to prove an imposing demonstration, was interrupted by the Fenian amnesty party, and entirely prevented. The platform was pulled down and destroyed, and numerous rough scenes occurred, in which a policeman was injured. On the same day a demonstration in support of "fixity of tenure and an equitable adjustment of the land question" was held in Cavan, and was numerously attended. Resolutions condemnatory of any Land Bill which would not embrace fixity of tenure were agreed to. Previous to the meeting an attempt was made, by the removal of a rail, to throw off the line to Cavan a train which was conveying about 190 farmers and five priests to the meeting. There is reason to believe that the Fenian party were the perpetrators of the outrage, which was fortunately discovered in time. A more extraordinary outrage, however, took place afterwards. While the Rev. James Dunne, parish priest of Belturbet, was returning from the meeting in the evening, in company with a number of his parishioners, near Drummullure, they exhibited green flags and uttered party cries, which greatly irritated the Orangemen. At length shots were fired at the car by a party in ambush. A man named Edward Morton was shot dead, and several others were wounded. The horse in the car, in which the priest and curate were seated, was shot dead. At the inquest held on Wednesday on the body of Morton, a verdict of Wilful Murder was returned against one of the prisoners named White, and six others as accessories, all of whom were committed for trial. The funeral of the deceased was attended by an immense concourse of people. At the tenant-right meeting in Sligo last week about 1500 were present, most of the humbler class wearing green in their hats; some green flags were displayed. The chair was filled by Mr. Denis M. O'Connor, M.P. Bishop Gilooly was present, and a few Conservative gentlemen. Resolutions were adopted declaring that tenure of land should be so altered as to give encouragement and security to tenant's industry, secure continuous occupation of holding at equitable rents, and full compensation for improvements; the tenant to be bound not to waste the soil or sublet against the landlord's wish, and the rent to be settled by the fluctuation of the markets; and the new Land Bill to encourage mixed husbandry and reclamation of waste land. The resolutions were prepared at a conference held on the previous day, at which representatives from some county landlords were present. On Monday a meeting of tenant-farmers of the county Londonderry was held at Magherafelt, at which resolutions were carried to the effect that no settlement of the land question in the county of Londonderry would be just or satisfactory which did not legalise the right of the tenants to the continuous occupation and enjoyment of their farms; and that it was their firm conviction that the establishment of a class of peasant proprietors by Government loans would greatly conduce to the peace and prosperity of Ireland.

CARDINAL CULLEN'S PASTORAL.—Cardinal Cullen has issued another pastoral letter to the clergy of his diocese. After a long exposition of the doctrines of his Church, he renews his attack on secret societies, including the Freemasons, the godless system of education, and other kindred topics. He denounces the fabrications of the Protestant press regarding the aims of the Ecumenical Council, and warns all good Catholics that it is their duty not to inquire what the general council intends to do, but patiently to await its infallible decisions, and to bow their heads submissively when they are authoritatively promulgated. He declares that the independent Catholics, who have refused to practise this submission, are enemies within the bosom of the Church, "carried away by the corrupt spirit of the age." He laments the prevalence of assassination, and concludes by desiring his clergy to pray for their Protestant brethren, who are now engaged in reconstructing their Church, and to ask the Author of Light to give them knowledge of the truth and lead them into the bosom of the one holy Catholic and Apostolic Church, which is not, he says, the work of man, or owes its origin to Acts of Parliament or to mixed meetings of clergy and laity, but was founded by Christ and the Apostles.

THE LATE OUTRAGE IN TIPPERARY.—The tenantry of the Count de Jarnac have held a meeting and denounced in indignant terms the outrage committed on their landlord; and, in order to assist in detecting the author of the threatening letter, they subscribed, before separating, the sum of 125*l.* as a reward for such information as shall lead to his discovery. Since then another landlord in the county has received a similar missive.

THE FIFTH OF NOVEMBER.—It was announced on

Saturday in Belfast that the Fifth of November was celebrated by a grand *soirée* in Uster House, under the auspices of the Grand Orange Lodge, which was presided over by Mr. Wm. Johnston, M.P.

THE LATE ATTEMPT ON MR. BRETT.—The late attempt on the life of Mr. Brett, who was removed from the county of Wicklow, has been removed from the county of Wicklow, as there is reason to believe that upon his life would be repeated. His father, who is now in Wicklow, proposed to go down to receive information that he was to the same risk, although he has had any one, and his only offence is that he is going on favourably, and the Roman Catholic Bishop, Lord Monsell, M.P. When he was applied to the Government to remove the county, but some difficulties were still kept at the post of danger, ever, be removed. Another county has had to be sent to the police. Their only crime is that they certificates to road contractors for properly executed. A man, whose party who fired at Mr. Brett, or for plicity with a road contractor called outrage. It is said that the prisoner than one occasion hovering about Mr Brett previous to the attempt being made on

Scotland.

ADMISSION OF LADIES TO MEDICAL STUDY.—At a meeting of the University of Edinburgh, the Rev. Dr. Phin, of Galashiels, disapproved the resolution of the University to admit ladies to medical study. The motion was seconded by Dr. Andrew Masson, seconded by Professor Bennett, resolution admitting ladies be approved. Professor Masson's motion was carried by a majority.

MEDICAL MAN FOR BALMORAL.—It is settled that a medical man will be appointed to the office of Medical Officer to Her Majesty at Balmoral for the benefit of the district. Dr. Marshall, practitioner at Balmoral, is spoken of for the position.

STEAMBOAT COLLISION IN THE GULF OF GOSWOLD.—On Saturday morning a collision took place between the screw steamer *Tern*, from Glasgow, and the *William Connal*, from Havre, in which the latter sunk within minutes of the occurrence. The only persons sustained was in one of her bow pates. The *Connal* was a steamer of 550 tons, and had a general cargo on board.

PROPOSED STATUE TO DR. CHALMERS.—A subscription is to be opened in Edinburgh for erecting a statue in that city to the memory of the late Rev. Dr. Chalmers.

Railways.

COLLISION ON THE LONDON AND NORTH-WESTERN RAILWAY.—On Saturday morning a serious collision took place between two goods trains near Dudley. One train was coming down the Dudley branch, and the other was coming up towards a siding at Dudley Port. The goods from Birmingham to Liverpool, without stopping. By some mishap the wheels of the Dudley train got off the rails at a point of junction with the main line, and across the metals, rushed into the centre of a pool goods train, of which five trucks were overturned, and 11 others considerably damaged. Goods destroyed were a large consignment of cartridge cases for the Russian Government.

ACCIDENT ON THE NORTH-EASTERN RAILWAY.—On Friday night as a heavy coal train from Colliery was running along the Towson Viaduct towards Gateshead, it was run into by a lighter train which had been taken out from the Gateshead Viaduct on a trial run, and was returning. The collision and several heavily laden coal trucks were thrown over the embankment, and others were smashed. The only person injured was the driver of the coal train, who was pitched over the embankment, but his injuries are not expected to prove fatal.

THE SOUTHERN COMPANIES.—In the House of Commons, on Friday, a Bill was presented by the southern railway companies for the amalgamation. That Bill was thrown out of the House by the strong expression of public opinion against the raising of the fares contained in the Bill. At a meeting of the directors of the Eastern and Chatham and Dover Companies, on Friday, it was decided not to renew the amalgamation Bill in the forthcoming session.

THE FATAL ACCIDENT ON THE GREAT NORTH-WESTERN RAILWAY.—The adjourned inquiry on the fatal accident near Welwyn railway station on the 22nd ult. resumed on Monday at Hatfield. The inquiry lasted nearly seven hours, but no satisfactory explanation of the actual cause of the carriage running off the rails was obtained. The foreman of the locomotive was under examination four hours, and the signalman at the Welwyn Junction was under examination four hours, from whom he had at first thought guilty of the accident, but he was afterwards absolved from all blame, and confidently believed after a full examination of the locality of the accident

carriages, that the catastrophe was brought about by the breaking down of one of the carriages, the spring of which he had found to be fractured. The inquiry was again adjourned for a week.

Law.

Case of Queen's Bench—(ittings in Banco before the Lord Chief Justice and Justices Mellor, Lush, and Hannet.)—The case of the Queen's Bench, sitting in Banco before the Lord Chief Justice and Justices Mellor, Lush, and Hannet, was adjourned for a week. The case concerned the powers of the Commissioners of the Court of Chancery, and the question of whether they could hold meetings without the assent of the State.

Shaw v. The Rev. W. J. E. B. — This case concerned the view of Prome, at the instance of the Association, for alleged heretical doctrines promulgated in certain publications. The case excited much interest, as it will form a leading case on the subject of the prosecution against Mr. Mackonochie. The only question to be decided was whether he was bound to admit Article V. as to the presence in the Holy Eucharist. That charge was not admitted by the commissioners when the inquiry was made, and in the letters of request sent by the bishop to this effect, the charge was directed against the defendant, who had been charged with heresy in the criminal charges.

Case of a Threatening Letter to a Magistrate. — A man, of the name of Brown, a respectable dressed man of age, was indicted for feloniously sending a threatening letter to James Arnold, Esq., one of the magistrates of the Westminster Police Court, demanding money with interest, and with intent to extort money from him. In July, 1869, the prisoner was convicted at the Westminster Police Court of an assault at Cremorne, and fined £100. The money was paid, and nothing more was heard of the case until, on the 1st of June last, Mr. Arnold received a letter, threatening his life unless he paid a certain sum of money. The letter was headed "Compensation for the loss of my property, which had resulted to an innocent man by your conviction and exorbitant fines. Mr. Arnold, I demand the matter over to the police, who will require advertisement, and thus discovered the author of the letter. He was convicted, but sentence was deferred until next session.

Sporting.

THE GREAT RACE FOR THE CHAMPIONSHIP.—The first of the great races between the picked men of London and the representative crews of the Thames and the Trent took place yesterday afternoon, over the course from Mortlake to Mortlake, and was won by the Tyne crew by three minutes. Time of race, 29 minutes 43 seconds. The return race will be rowed on the 13th inst., from the High Level to the High Level, on the Tyne.

Obituary.

MARQUESS OF WESTMINSTER, K.G., died on Sunday at Bath, Wilts, after a few days' illness, in his 75th year. His lordship was born in 1795, and received his education at Westminster School, which half-a-century ago was the chief place of education for the sons and grandsons of the Whig Houses—such as the Russells, the Grosvenors, and the Grosvenors. He was there a schoolfellow of the late Archbishop Longley, who were his seniors, and who maintained the friendship of his life. He afterwards kept his house at Christ Church, Oxford, where he took his Bachelor's degree in 1815, and proceeded M.A. three years later. While bearing the courtesy title of Lord Belgrave, he entered Parliament at the general election of 1818—now more than 50 years ago—as one of the members for Chester, a city in which, at that time, the Grosvenor influence was even more absolute

than it is now. He was chosen on this occasion without opposition, and, though opposed at the election of 1820 by one of the Berrons, he shared the opposition of Chester with his cousin, the late General Grosvenor, for 12 or 13 years. He failed to obtain the office of the House of Commons, but Chester has since then been the seat of the Grosvenor family, if not two, to St. Stephen's. At the dissolution consequent on the late Reform Bill in 1832, Grosvenor was elected into the House of Commons, and he held the office of Secretary of State for the Colonies, and of Secretary of State for the Home Department. He was created Earl Grosvenor in 1834, and he held the office of Secretary of State for the Colonies, and of Secretary of State for the Home Department. He was created Earl Grosvenor in 1834, and he held the office of Secretary of State for the Colonies, and of Secretary of State for the Home Department. He was created Earl Grosvenor in 1834, and he held the office of Secretary of State for the Colonies, and of Secretary of State for the Home Department.

MR. GEORGE PEABODY died on Thursday night in Eaton Square, in his 75th year. He was born at Danvers, in Massachusetts, in February, 1795. His father, though originally in Lumbic circumstances, was descended from Francis Peabody, one of the old Puritan stock, who emigrated from Northamptonshire, or Hertfordshire, generations back, and settled in New England. He found a home at Topsfield, a small town in the heart of Essex, Massachusetts, where he built the first man in the neighbourhood, and became an independent man. At 11 years of age George Peabody was apprenticed to a Mr. Silvester Proctor, who kept a "grocery store" at Danvers. He there spent four years, until at the age of 15 he felt anxious to try his hand at business on a larger scale. With this object in view, after a year spent with his grandfather in Vermont, he joined his brother David in 1811 in a dry goods shop which he had opened at Newburyport, but their house having been destroyed by fire in 1812, he joined an uncle, John Peabody, who was settled in the District of Columbia, and soon became the leading spirit and mainstay of the business. War with England was soon afterwards declared, and two months later a British fleet ascended the Potomac, and menaced the capital and its neighbouring ports. In this emergency, the young clerk, though not yet of age, joined a volunteer company of artillery, and did active duty for some months at Fort Warburton. Having spent two years in his uncle's service he attracted the attention of a Mr. Elisha Riggs, who invited him to join him in the dry goods trade, for which Mr. Riggs found the capital. This partnership proved a most successful and satisfactory arrangement. In 1815 the house was removed to Baltimore, seven years later its operations were such as to justify the opening of branches at Philadelphia and New York, and about the year 1820, by the retirement of Mr. Riggs, George Peabody found himself the senior partner, and the virtual director, of one of the largest of mercantile firms. Having spent several years in managing the house in Baltimore, he resolved in 1827 to take up his abode in England. In that year he came to London, and, within a few years later, from the American firm, he established himself in the City as a merchant and banker. He had not been long in England when those untoward events occurred which shook American credit abroad, and his adopted State of Maryland was in sore pecuniary straits. Mr. Peabody at once came forward and repaid the State for having afforded him a home by negotiating a loan for it free of cost. When the American Department at the Great Exhibition was in danger of appearing on the day of opening a mere chaos of unassorted goods, he advanced £50,000 to save his countrymen from mortification. When a faint hope awoke in America that survivors of Sir John Franklin's expedition might be rescued, his purse enabled Mr. Grinnell to undertake the generous enterprise of sending out an expedition to search for them. His vast gifts of millions of dollars for the formation of institutions at Danvers, Baltimore, and other places in America, and for various other purposes from 1836 downwards, dazzled the world. But the deed by which his name will be longest remembered in this, his adopted country, was his noble gift of a quarter of a million to the poorest classes of London, which has already borne fruits by the erection of homes for the working classes in various parts of the Metropolis. This act of "princely munificence," as it was styled by the Queen in an autograph letter which she addressed to Mr. Peabody, was wholly without parallel, and was, in her Majesty's words, "an act which will ever carry its best reward in the consciousness of having contributed so largely to the assistance of

those who can so little help themselves as the poor of London. All sorts of honours were offered to Mr. Peabody in recognition of his generosity, among others that of either a baronetcy or the title of Viscount of the City of London. The Queen, however, declined both offers, and contented herself with the title of Baron Peabody, which he received in 1845. He was also created Viscount of the City of London, and was appointed one of the lords of the Treasury in 1845. He was also appointed one of the lords of the Treasury in 1845. He was also appointed one of the lords of the Treasury in 1845.

THE REV. J. C. BADES, Precentor of Westminster Abbey died on the 29th ult., at Chalfont St. Giles, aged 64. He was appointed in 1831 to the office of precentor in ordinary to King William IV., and continued in the same office during the reign of her present Majesty. In the same year he was appointed to a minor canonry in St. Paul's Cathedral, and while discharging his duties in that capacity, he was, during one of the week-day services, fired at by a person in the body of the church, but escaped unhurt. In 1839 he was nominated by the dean and chapter of St. Paul's to the rectory of Harton, and in 1841 was appointed to a minor canonry, with the precentorship of Westminster Abbey.

MR. FREDERICK NORTH, M.P. for Buntingford died at his residence, Hastings Lodge, on Friday. He was son of Mr. F. F. North, of Hastings, and Rowley, Norfolk, and was born in 1801. He received his education at the school of St. John's College, Cambridge, where he was senior optime in 1822. He was afterwards admitted a student at the Inner Temple. Having considerable business interests in the borough previous to the Reform Bill, he was in 1831 elected member for Hastings, and represented the borough from 1832 to 1857, when he was unsuccessful. He supported the Whigs in their great measure of Reform, and opposed the Irish Tithe Bill. In 1847 he was re-elected without opposition, and he was also in 1857. In 1859 he was elected to the House of Commons, but was defeated in 1860. At the last general election he was returned for Hastings, but he was defeated in 1860. He was a member of the House of Commons from 1859 to 1860. He was a member of the House of Commons from 1859 to 1860.

GENERAL COLES, Colonel of the 65th Regiment, died on the 27th ult. He was upwards of 80 years of age. He entered the army in 1803, and served in India under Lord Lake in 1804, and in the campaign of 1805 and 1806. On the termination of the war in India he returned to England, and served in the Spanish campaigns of 1808 and 1809. He was promoted to the rank of Major-General in 1810, and served in the campaign of 1810, and in the campaign of 1811. He was promoted to the rank of Major-General in 1810, and served in the campaign of 1810, and in the campaign of 1811. He was promoted to the rank of Major-General in 1810, and served in the campaign of 1810, and in the campaign of 1811.

MAJOR-GENERAL MITMAN, Commander of the forces at the Mauritius, died on the 24th ult. at The Old Palace, Richmond. He entered the army as ensign and lieutenant in the Coldstream Guards in 1835, and served with the Guards in the Canadian Rebellion in 1838. He also served in India during the mutiny, and commanded a field force in the Ghazipur district in 1857, and at Azinghar in 1858, where he commanded the left wing of the 37th Regiment, until relieved by Ligard's force. He afterwards held a bridge on the Benares Road with a small picket against a large force of mutineers, and secured the passage of a large convoy of stores and ammunition into the Azinghar entrenchment. For this service he received a medal. He was appointed major-general on the Staff at the Mauritius in 1866.

MR. JOHN BRUCE, F.S.A., Treasurer of the Camden Society, and formerly Director and Vice-President of the Society of Antiquaries, dropped dead in Montagu Square on Thursday evening, the 24th ult. He had for many years been engaged in the important work of calendaring the Domestic State Papers preserved in her Majesty's Record Office. The period to which he devoted his attention was the reign of Charles I., with all the history of which he was intimately conversant. He was the author of many valuable contributions to the Archaeologia of the Society, and edited several of the volumes published by the Camden Society, of which he was one of the founders. For some time past he had suffered from difficulty of breathing, but was nevertheless in a, pleasant health on the evening of the 24th ult. His death, a post-mortem examination showed that he was lying on his back on the pavement, apparently in a fit. A doctor was directly sent for, and by his direction Mr. Bruce was taken to St. Mary's Hospital, Paddington, and on admission was pronounced dead. A post-mortem examination showed that the cause of death was fatty degeneration of the heart. The jury at the inquest returned a verdict of "Death from natural causes."

WILLS.—The will of Major-General McGregor, Bengal Army, has been sworn under £9,000 personality. Lieut. Colonel Atchison, of Rose Hill, Barking, £2,000; Mr. George Jones, R.A., of 6, Park Square, Regent's Park, 25,000; Mr. W. H. N. Myers, of Leeds, stockbroker, 30,000; Mr. Richard S. Butterfield, of Wakefield, 181,000; Mr. Francis Bligh Hooper, of Kent, 30,000; Mr. James Hewitt, of Durham, 10,000.

Markets.

COVENT GARDEN.—Nov. 6. The markets remain without much improvement, but the supply of foreign goods has been more limited, except in Oranges and Lemons, the latter article being much more freely attainable at less rates. Peas consist of Chaumontel, Marie Louise, and Gion Moreau, with common varieties.

Flowers chiefly consist of Pelargoniums, Mignonette, Fuchsias, Chrysanthemums, Primulas, Heaths, Veronicas, and a few Cyclamens.

FRUIT.

Apples, p. 1/2 sieve, 1s to 1s 6d; Cobs, per lb., 9d to 1s; Filberts, per lb., 6d to 9d; Grapes, per lb., 1s 6d to 5s; Lemons, per 100, 8s to 14s; Melons, each, 1s 6d to 5s; Oranges, per 100, 8s to 14s; Pears, per doz., 2s to 3s; Pine-apples, per lb., 4s to 6s.

VEGETABLES.

Artichokes, p. doz., 3s to 4s; Beet, per doz., 2s to 3s; Broccoli, p. bundle, 1s to 1s 6d; Brussels Sprouts, p. 1/2 sieve, 2s to 3s; Cabbages, per doz., 1s to 1s 6d; Capsicums, p. 100, 2s to 2s 6d; Carrots, per bunch, 4d to 8d; Cauliflowers, p. doz., 1s 6d to 3s; Celery, p. bund., 1s to 1s 6d; Cucumbers, each, 6d to 1s; Endive, per doz., 1s 6d to 2s; Garlic and shallots, per lb., 8d; Herbs, per bunch, 2d to 4d; Horse Radish, p. 100, 3s to 5s; Leeks, per bunch, 2d to 4d; Lettuces, p. score, 1s to 2s; Mint, per bunch, 4d to 6d; Mushrooms, p. pott., 1s 6d to 2s; Onions, green, per bun, 4d to 9d; Parsley, per bunch, 2d to 4d; Potatoes, York Regents, p. ton, 60s to 105s; Flukes, do., 80s to 120s; Salsafy, per bundle, 1s to 1s 3d; Scorzonera, do., 1s to 1s 3d; Seakale, per lb., 4s 6d; Spinach, p. bushel, 2s to 3s; Radishes, p. doz., 1s to 1s 6d; Tomatoes, per doz., 9d to 1s 6d; Turnips, per bunch, 4d to 6d.

POTATOS.—SOUTHWARK, Monday, Nov. 1.

During the past week the arrivals coastwise and from abroad have been very small, but more plentiful by rail; the prices are very various, owing to the great difference in the samples that are coming to this market, many being much blighted, and the consumption small for the season. The following are this day's quotations:—York Regents, per ton, 70s. to 100s.; Kent and Essex do., 60s. to 90s.; Lincolnshire do., 60s. to 90s.; East Lothian do., 70s. to 100s.; Perth, Forfar, and Fife do., 70s. to 80s.; French and Belgian Whites, 60s. to 80s.

HOPS.—BOROUGH MARKET, Nov 5

Messrs. Pattenden & Smith report there has been a general clearance made of almost the entire growth of new English Hops, prices for which are daily advancing. Importations from the Continent are very small, and from America not so large as anticipated.

ENGLISH WOOL

We have had a firm market, and though prices are not much better, still the impression gains ground that English Wool cannot much longer form an exception to the general improvement in the article.

Table with columns for FLEECES (Southdown hoggets, Half-bred ditto, Kent Fleeces, Southdown ewes and wethers, Leicester ditto) and SORTS (Clothing, Combing) with prices in s. d. and s. d.

HAY.—Per Load of 36 Trusses.

SMITHFIELD, Thursday, Nov. 4.

Table with columns for Prime Meadow Hay, Inferior do., New do., Inferior do., and Straw, with prices in s. d. and s. d.

CUMBERLAND MARKET, Thursday, Nov. 4.

Table with columns for Sup. Meadow Hay, Inferior do., New do., Superior Clover, and Inferior Clover, with prices in s. d. and s. d.

WHITECHAPEL, Thursday, Nov. 4.

Table with columns for Fine Meadow Hay, Inferior do., Prime New Hay, Inferior do., and Straw, with prices in s. d. and s. d.

METROPOLITAN MEAT MARKET.—Nov. 6.

Best Fresh Butter .. 18s. per dozen lb. Second do. do. .. 16s. Small Pork, 5s. 0d. to 5s. 6d.; Large Pork, 4s. 4d. to 4s. 8d. per 8 lb.

METROPOLITAN CATTLE MARKET.

MONDAY, NOV. 1.

We have a shorter supply of Beasts than on Monday last, yet the number is considerable; trade is slow, and it is difficult to maintain Thursday's advance. The number of Sheep is also smaller, but the demand has very much decreased, and prices on the average are lower. There are very few choice Calves on offer. Our foreign supply consists of 2543 Beasts, 1670 Sheep, and 275 Calves; from Scotland there are 23 Beasts; from Ireland, 549; and 1990 from the Midland and Northern Counties.

Table with columns for Best Scots, Herefords, &c., Best Shortboms, 2d quality Beasts, Best Downs and Half-breds, Do. Shorn, and Best Long-wools, Do. Shorn, Ewes & 2d quality, Do. Shorn, Lambs, Calves, Pigs.

THURSDAY, NOV. 4

The number of Beasts is small, yet it exceeds the demand; choicest qualities are making about the same as on Monday, otherwise trade is exceedingly dull. The supply of Sheep is about the same as on Thursday last; the demand is very small, and Monday's quotations are not realised throughout. Calves are lower. Our foreign supply consists of 136 Beasts, 180 Sheep, 212 Calves, and 10 Pigs.

Table with columns for Best Scots, Herefords, &c., Best Shortboms, 2d quality Beasts, Best Downs and Half-breds, Do. Shorn, and Best Long-wools, Do. Shorn, Ewes & 2d quality, Do. Shorn, Lambs, Calves, Pigs.

MARK LANE.—MONDAY, NOV. 1.

There was a poor supply of English Wheat to this morning's market, which was sold at the rates of this day's night. The attendance was good, but foreign met with little inquiry, and in some instances rather less money was accepted, the business transacted being to a moderate extent only. There

was no change in the value of Barley, Beans, or Peas, but Oats met a dull sale at a decline of 61. per qr. Flour was quiet at late rates.

Table with columns for WHEAT, BARLEY, OATS, RYE, RYE MEAL, BEANS, PEAS, MAIZE, and FLOUR, with prices in s. s. and s. s.

FRIDAY, NOV. 5.

Excepting some heavy storms off our coasts, the weather since the 29th ult. has been fine. We have no improvement to report in the Wheat trade during the past week, the deliveries continuing in excess of the demand; business has been slow, and in some instances an allowance has been made to effect sales of new Wheat, but the value of fine old has been generally maintained in the markets of the kingdom. Maltng Barley has brought an advance of 6d to 1s. per qr.; the price of other descriptions, as well as that of old Oats and of Peas, has been well sustained, but now Oats and Beans were cheaper to sell. Flour moved off very slowly, and prices were in buyer's favour. Since Friday last 19 grain and seed-laden vessels arrived off the coast, of which, with those left over from the preceding week, there remained for sale last night 32 cargoes. The trade in cargoes arrived off the coast was slow during the past week, and prices for arrived Wheat were 1s. per qr. lower. Maize gave way, and was the turn in buyer's favour. Barley quiet, and Rye tending downwards. We noticed hardly any disposition to enter into transactions for forward delivery of any kind of grain. Paris, November 4.—There was very little doing in either Wheat or Flour. The six marks are quoted at equal to 33s. per 280 lb. The stock at the Halle is estimated at 1560 cwts.

The arrivals of English grain this week are very small, and moderate of foreign. There was the usual attendance at this morning's market. English Wheat met a slow sale at Monday's quotations, and but very little business was transacted in foreign. In the value of spring corn there was no change, excepting for Oats, which were 6d. to 1s per qr. cheaper.

ARRIVALS.

Table with columns for Wheat, Barley, Oats, and Flour, with quantities in qrs. and prices in s. d.

Nov. 2.—We had an average attendance at our market to-day, and Wheat met with a moderate consumptive demand, at about previous rates. Flour quiet and unchanged. Indian Corn was but in limited request, at prices rather in favour of buyers. Oats and Oatmeal neglected. Beans firmer. Peas unchanged.

AVERAGES.

Table with columns for Wheat, Barley, and Oats, with prices for Sept. 25, Oct. 2, and Average.

SEED MARKET.

The inactivity that has so long characterised the agricultural seed trade has continued during the present week, and we have consequently but little to add to our last report. Winter Tares meet with small inquiry, at drooping values. Hemp seed is still very scarce and dear. New Canary seed is in large supply, and can now be bought at very moderate rates. We have a fair demand for feeding Linseed. There has been some speculation in white Clover seed; prices are tending upwards. All other kinds of seeds are without quotable variation. JOHN SHAW & SONS, 16, Water Lane, E.C.

WANTED a GARDENER, who thoroughly understands Greenhouse, Vinery, and Kitchen Gardening; and whose character for ability and industry will bear strict investigation. A second man kept. Wages 25s. per week.—Address, FELTON AND SONS, Birmingham Nursery, 56, Harborne Road, Birmingham.

WANTED, a YOUNG MAN, who has a knowledge of the Garden and Flower Seed Business, for a small Provincial Town. One who has a knowledge of Nursery Stock preferred.—Apply to ANDREW G. DALY, Nurseryman and Seedsman, Newry, Ireland.

To Jobbing Gardeners.

WANTED, in a West-end Florist's Shop, an active YOUNG MAN, not over 20, who thoroughly understands Jobbing, and can make himself generally useful. Wages 12s per week; hours, 7 to 8, must read and write well. Also an active intelligent BOY, who has been used to a Nursery or Shop. Wages, 10s. per week. Apply any day before 1 o'clock, at R. GREEN'S, 28, Crawford Street, Baker Street, W.

BY HER MAJESTY'S ROYAL LETTERS PATENT.

ORMSON'S PATENT ECONOMIC BOILERS.

ORMSON'S PATENT CONCENTRIC SADDLE BOILER.

ORMSON'S PATENT CONVOLUTED BOILER.

ORMSON'S PATENT TUBULAR BOILER.

From the Construction of these Boilers, it will be at once seen that the object of the Inventor is to economise fuel, by concentrating its entire force and vertical action on the surfaces of the Boiler, and not wasting it by Heating Brickwork and Chimneys, a fault common to the great majority of Boilers now in use. These Boilers are made of the best Welded Wrought-iron, of good substance, having no overlapping plates, holes, or rivets, and are therefore perfectly secure against expansion and contraction of the metal, an occurrence so frequent and fatal to all forms of Cast-iron Boilers. Please to state diameter and length of Pipe to be Heated.

HENRY ORMSON, HORTICULTURAL BUILDER TO HER MAJESTY,
AND HOT-WATER APPARATUS MANUFACTURER TO THE COMMISSIONERS OF HER MAJESTY'S ROYAL PALACES AND PUBLIC BUILDINGS,
AND TO THE ROYAL HORTICULTURAL SOCIETY,
STANLEY BRIDGE, KING'S ROAD, CHELSEA, LONDON, S.W.

GREEN'S PATENT IMPROVED TUBULAR HOT-WATER BOILERS.

OBLONG BOILER.

SQUARE BOILER.

THE ABOVE BOILERS ARE

THE MOST EFFECTIVE AND DURABLE EVER INVENTED.

They can be set to work at a nominal cost, inasmuch as no brickwork is required; as will be seen from the above drawing, they are placed upon a Cast-Iron Sole-plate, which answers the purpose of Foundation and Ashpit. From the peculiar and substantial manner in which these Boilers are made, they are warranted to last for years without getting out of order; in fact, we guarantee them for years, but feel convinced that they will serve all the purposes for which they are intended for a much longer period. They are specially adapted for Heating Greenhouses, Churches, Chapels, Schools, Public Buildings, Entrance Halls, Warehouses, Workshops, &c.

THE FOLLOWING ARE THE ADVANTAGES OF THESE BOILERS:

- 1st, They require no setting in brickwork.
- 2nd, They are complete in themselves, having perfect means of regulation.
- 3rd, They take up little room, and can be put in places inaccessible to other Boilers.
- 4th, They are economisers of fuel, owing to the great amount of heating surface upon which the fire acts in a direct manner, and the consumption of smoke.
- 5th, The fire can be made to last from 12 to 24 hours without attention.
- 6th, Any number of Flows and Returns can be annexed to the Boilers by means of T-pipes.
- 7th, By means of mud doors, they can be readily cleaned out when required.
- 8th, The Chimney is made of cast-iron, which can either be taken through a roof or turned into a flue, to meet the convenience of the situation that it may be fixed in.

and Plans, one volume, 8vo, handsomely bound, 10s., cloth, and
forming a very suitable Christmas Present for Gardeners and
Amateurs.

THE PARKS, PROMENADES, and GARDENS of
PARIS. By W. ROBINSON, F.L.S., Correspondent of the Times
for the Horticultural Department of the Paris Exhibition.

This Book contains, among many other subjects—
A full account of every interesting and important feature of
Continental FRUIT CULTURE, including all the beautiful Modes of
Training, and the true Cordon System; and this portion of the
Book alone is embellished with 138 accurate Engravings.
"In conclusion, we hardly know of a better mode of answering the
Author's inquiry of 'How are we to improve?' than by placing his
book in the hands of every gardener in the kingdom; and where
employers are liberal, or even worldly wise, doubtless this will be
speedily done."—*Gardeners' Chronicle.*

A description of every instructive phase of the MARKET
GARDENING of PARIS, including the first account yet published
of the remarkable system of MUSHROOM CULTURE carried on
underground, near Paris, with 12 illustrations and a Plan, and details
of the admirable system of Salad Culture, Asparagus Culture, &c.,
pursued round that city.
"Never before have the Market Gardens of Paris been so vividly
and instructively described. We quite expect to hear that the
chapter on Parisian Underground Mushroom Culture (to which we
must be content to refer our readers for a novel and genuine sensa-
tion) stimulating British enterprise to turn to account our used-up
mines and caverns."—*Saturday Review.*

A description of the PUBLIC PARKS, GARDENS, SQUARES,
BOULEVARDS, &c., of PARIS, with numerous Plates and Plans of
the larger Parks, and including the Gardens at Versailles, Fontaine-
bleau, St. Cloud, &c.
"Paris is the best known of any city in the world, and has been
described a thousand times, but this book contains quite a new and
fresh revelation of its rural aspects, and the result of its municipal
economy. Its object is evidently to institute comparisons, and to
establish conclusions with the strictest impartiality."—*Gardener's*
Magazine.

The only complete account of SUBTROPICAL GARDENING
yet published. It is in two divisions, one on Tender and the other
on Hardy Plants, and is embellished with many beautiful En-
gravings, showing the full-grown effects of the best of the Plants
employed for this purpose.
"Every reader will agree with us when he looks through the
work, that no book has ever been published on this subject
containing more real novelty for all persons interested either in
public or private gardens. It ought to be perused by every lover of
a garden, and those who devote little or no time to their gardens or
to garden literature would find it advantageous to present the book
to their gardeners."—*Land and Water.*

The PLANT DECORATION of APARTMENTS, with numerous
illustrations of the more important Plants used for this purpose in
Paris, where it is so well understood.
"It will be seen by these particulars that the book treats on a
great variety of subjects, and when we add that it contains nearly
700 pages, and has no less than 431 Plates and Wood Engravings,
our readers will be able to form some idea of the exhaustive way in
which the work has been carried out."—*The Field.*

The work has also been reviewed at length, and most favourably, in
the *Times* of October 21, the current number of the "Edinburgh
Review," and in all the leading journals.
London: JOHN MURRAY, and all Booksellers, Nurserymen, and
Seedsmen.
The Nursery and Seed Trades supplied by Messrs. CARTER and CO.

In Preparation, by the same Author,
ALPINE FLOWERS.—This Book will contain an
explanation of the principles on which the exquisite Flora
of Alpine countries may be grown to perfection in all parts of the
British Islands; many illustrations by the best Artists of properly
formed Rock-work for these plants, with Views of their natural
homes, illustrating the Author's Tour in the Alps, and a descrip-
tion, devoid of all technicalities, of a choice selection of the more
beautiful and interesting kinds.

CHEAP PRINTS.—A Job Lot of ENGRAVINGS and
LITHOGRAPHS, a varied assortment for Framing, Screens,
Scrap Books, Retelling, &c., Plain and Coloured mixed, at per gross
of 150, and different, post free for 3s. 6d. stamps. Not less than a
gross supplied.—J. REYNOLDS, 174, Strand, W.C.

ADVANTAGES of BOOKS.—Without books "justice
is dormant, natural science at a stand, philosophy lame, letters
dumb, and all things involved in Cimmerian darkness." The

THE COURT.—The Queen and Royal family continue
at Windsor. On Friday the Queen, accompanied by

Princess Louise, went to London, and paid a visit of
condolence to the Countess of Derby at her residence
in St. James's Square. Her Majesty afterwards visited
the Princess of Wales at Marlborough House,
and returned to Windsor at half-past six. The
Princess Louise remained in town, and accompanied
the Prince and Princess of Wales to the Gaiety
Theatre in the evening. On Saturday morning the
Queen walked and drove in the grounds, and in the
afternoon drove out. On Sunday morning the Queen
and Royal family attended Divine service in the private
chapel; the Rev. T. J. Rowsell preached the sermon.
On Monday the King of the Belgians and his daughter,
Princess Clothilde, arrived at the Castle on a visit to the
Queen. The Belgian Minister and Baroness de Beaulieu
and Viscount Sydney arrived at the Castle on a visit.
On Tuesday morning the Queen walked out with the
King of the Belgians and Princess Louise. In the
afternoon the Queen drove out with Princess Beatrice.
The King of the Belgians drove out with Princess
Louise and Prince Christian. The Prince of Wales,
the Duke of Cambridge, the Duchess of Argyll, the
Earl of Clarendon, Mr. and Mrs. Gladstone, and Vis-
count Jocelyn arrived at the Castle. On Wednesday
morning the Queen went out in the grounds with Prince
Leopold. The King of the Belgians visited M. and Madame
Van de Weyer, at New Lodge. The Prince of Wales and
Prince Christian went out shooting. In the afternoon
the Prince of Wales, the Duke of Cambridge, Baroness
de Beaulieu, Mr. and Mrs. Gladstone, and Viscount
Jocelyn left the Castle. The Queen drove out with
Princess Beatrice. The King of the Belgians rode out
with Princess Louise. The Austrian Ambassador
arrived on a visit. In the evening the Queen had a
dinner and an evening party. On Thursday morning
the Queen drove out. The King of the Belgians rode
on horseback with Princess Louise. The Duke de
Nemours, the Duke and Duchess d'Alençon, and
Princess Marguerite of Orleans visited her Majesty
and the King of the Belgians, and remained to
luncheon. The Duchess of Argyll, the Austrian
Ambassador, and the Earl of Clarendon left the
Castle.

THE KING OF THE BELGIANS, accompanied by his
daughter the Princess Clothilde, landed at Dover on
Monday afternoon, and after receiving an address from
the Corporation proceeded to Windsor Castle on a visit
to her Majesty. The Queen of the Belgians was pre-
vented by indisposition from accompanying the King.
On Tuesday morning the Princess Christian drove his
Majesty, in her pony phaeton, to Cumberland Lodge,
to view the ruins of the fire. In the afternoon Sir
James C. Lawrence, ex-Lord Mayor, Alderman Cotton,
and Captain Mercier, as a deputation of the Belgian
Reception Committee, had an audience with his Majesty
to learn the King's pleasure as to the presentation
of an address of welcome, signed by the Lord Mayors
of London, York, and Dublin, the Lord Provosts of
Edinburgh, Glasgow, and Aberdeen, 30 lord-lieutenants

of counties, 22 high sheriffs, 211 magis-
trates, 8 high bailiffs, 8 high constables, &c. The
King in reply said that Queen Victoria had
her wish that the address should be presented to
at Buckingham Palace, for which purpose he
attend there on Thursday, the 25th inst. at 9
His Majesty added that he would visit
the Lord Mayor's invitation to a
Mansion House on the same evening
to present the freedom of the City
he leaves this country.

THE PRINCE AND PRINCESS of
Friday the Prince, accompanied by
Saxe-Weimar, went out shooting to
the afternoon the Queen, accompa-
Louisa, visited the Prince and Prin-
Marlborough House. Prince Tunk
Envoy of the Sultan of Tringago, had
the Prince and Princess, for the pur-
a letter and some articles of work-
Highness. In the evening the Prince
accompanied by Princess Louisa, went
Theatre. On Saturday the Prince
Count Gleichen, went out shoot-
Park, and afterwards went to
took luncheon with Prince and Prin-
The Princess drove out. On Sunday
and Princess attended Divine
Monday Prince and Princess Christian
Prince and Princess at Marlborough L.
remained to luncheon. In the after-
drove out with Princess Christian. The
Prince left Marlborough House for W.
visit to her Majesty. The Princess de-
Wednesday the Prince returned to
House from Windsor. The Princess de-
the evening their Royal Highnesses went
of Wales' Theatre. On Thursday the
the Hoiborn Viaduct, and afterwards went
on a visit to the Queen. The Prin-
is announced that the Prince will visit
Countess de Grey at Studley Royal, near
beginning of next month.

ILLNESS OF THE ARCHBISHOP OF CANTERBURY.
—It was announced yesterday that the Ar-
Canterbury is seriously ill at Broadstairs, and
Seymour Haden, his medical attendant, is
summoned by telegraph from London.

THE NEW BISHOPS.—The Dean and
Carlisle, on Friday, unanimously elected
as Bishop of that see. The consecra-
place in York Minster, on the 30th inst.
and Chapter of Bath and Wells, on Thur-
mously elected Lord Arthur Hervey as B-
see. Dr. Moberly was enthroned as
Bishop of Salisbury, in the Cathedral of
is said that the prelates who will con-
Temple as Bishop of Exeter, are the Ar-
Canterbury, the Bishops of Winchester,
and Worcester. Bishop Ewing, of Scotlan-
take part in the ceremony.

THE BISHOPRIC OF ST. ASAPH.—It is
there is no truth in the report that the
St. Asaph has resigned his see, much less
successor has been determined upon.

THE DEANERY OF ELY.—Mr. Gladstone
the Deanery of Ely to the Rev. Dr. Merivale,
Fellow and Tutor of St. John's College, Cam-
honorary D.C.L. of Oxford, and Chaplain to the
of Commons.

PARLIAMENTARY MOVEMENTS.—Mr. W. E.
stone was re-elected for Whitchy on Wed-
a majority of 182 over Major Worsley, the
tive candidate. On the same day Mr. Ly-
worth, the Liberal candidate, was elected for
by a majority of upwards of 100 over Mr. R.
The election for Glasgow and Aberdeen
began on Monday, and was to continue
The latest returns gave Mr. Gordon, the Lib-
of the late Conservative Government, a
more than 500 over Mr. Smith. The elec-
Waterford took place on Thursday, when
Barron and Mr. Bernal Osborne were put
ination. The show of hands was in favour
Osborne. The poll takes place to-day
rumoured that Lord Enfield is about
from Middlesex in favour of Mr. Glad-
elevation of Mr. Talbot to the peerage
a vacancy in Glamorganshire. Mr. D. Lynn
of Penllergare, near Swansea, will be the
candidate, and Mr. G. T. Clark, of Down, has
be the Liberal candidate for the vacant
report that Mr. Corry intended to retire
representation of the county of Tyrone has
tradicted. It is stated that Mr. Bernard
son of the Right Hon. J. W. Fitzpatrick,
candidate for Queen's County. At a meeting
Liberal electors of Southwark on Friday, a motion
it was not expedient to bring forward Sir
Waterlow, after a long discussion, was carried
large majority. Sir F. Lyoett, Mr. Labourer

Mr. Odger, were mentioned as candidates for the resolution in favour of either of them.

COMMISSIONS.—On Monday a resolution was made to obtain the release of the prisoners committed to York Castle for evidence before the Beverley Commission. The Commission is to hear arguments on both sides. The Commission is to be composed of the Lord Chief Justice, the Lord Justice of Appeal, and the Lord Justice of the Queen's Bench. The Commission is to be discharged the rule, on the ground that the Commission had full power to commit to prison the prisoners.

HOUSE.—Considerable reductions are to be made in the Custom House. Mr. Morgan, the principal clerks in the Treasury, is to be discharged. The financial system adopted in the Inspector-Generals' Department, is to be examined by the Parliamentary Secretary of the Treasury, and reporting on the same to the House of Commons.

Foreign.

A rumour is current that an interview will be had at Nice next month between the Emperor and the Czar. The Emperor presided at a meeting of Ministers at Compiègne on Sunday, and reviewed the regiments of Zouaves and of the Guards. His Majesty was expected at the Tuileries yesterday, to stay till Tuesday. On Thursday on the Bourse that M. Ollivier will be appointed Minister of the Interior, and M. Forcade de la Roquette Minister of Finance; and that the Ollivier Ministry will be on the understanding that the Legislative Assembly will be dissolved after the voting of the Budget, the Electoral Bill, and Reconstruction of the Bill, all which measures the Legislature itself will be asked to draw up. The Ambassador, Baron Werther, presented his credentials to the Emperor on Monday, and said that his efforts to maintain and cement the friendship and good understanding which so long existed between the Courts and Governments of Prussia, and also of the North German Confederation, and which, based upon mutual interests, countries so cordially desire to develop, he would be obeying the express wish of his Sovereign. The Emperor, in reply, said:—

"The sentiments which you have expressed to me for your Sovereign. Like him, I wish to see friendly relations between Prussia, the North German Confederation, and France. I cannot but congratulate you on the choice made by the King in sending you to Paris, and I beg you to rely upon the kindly reception which will be accorded to you."

M. Ledru Rollin returned to Paris on Friday evening, and on the same night attended a meeting at the Rue La Chapelle, at which he was present, but would perhaps take his seat if the ground of his refusal to come to Paris at Compiègne was that his presence might provoke the responsibility of which he would not wish to assume. On Saturday night several meetings were held, but nothing of a remarkable character took place, with the exception of one in the evening, when M. Rochefort, alluding to the refusal of M. Ledru Rollin to come to Paris, is reported to have said:—"I saw decidedly that that man was not fit to be a Minister." At a meeting at the Folies on Sunday, M. Rochefort denied having any connection with the Orleanist party, and that he had never seen eight years old who was not baptised, and would be. He then contradicted the report that he was said to have used on the subject respecting M. Ledru Rollin, and stated that he had said that M. Rollin did not take a correct view of the position of the Government. At another meeting held on Sunday in the Rue de la Harpe, M. Felix Pyat declined to condescend as a candidate refusing to take a candidature to a working man. He alluded to the *ouvriers* to rise and shake off the yoke under the weight of which they were oppressed. The members of the Left met at the residence of M. Jules Favre on Sunday, and read a manifesto, which was published on Monday evening, with the signatures of 27 deputies, including those of MM. Gambetta, Jules Favre, and Ernest Picard. The manifesto attacked the interpellations and reforms which the Government intend to introduce in the Chamber of Deputies. It asks the suppression of the law which every man on attaining his majority is called upon to demand that the right of declaring war should be vested in the national will, and points to the franchise as the means by which the renovation of the country is to be attained. It concludes by saying that the nation must be freed simultaneously from the demagogic violence by which it is oppressed. The *Reforme* attacks this manifesto, and the deputies of the Left have agreed rather as to the substance of their manifesto than as to the ideas expressed. It therefore congratulates M. Gambetta upon not having signed the document. A meeting was held at Marseilles on the 20th, at which resolutions were passed declaring that M. Gambetta had forfeited the confidence of the electors, that he had sold himself, and was in bad health and incompetent. A meeting was held on Sunday night at Doudeauville, in which 2000 persons were present. The

manifesto of the Left was read and received by the audience with a burst of derisive laughter and hisses. The assembly decided almost unanimously that M. Gambetta was a traitor to the cause of the people, and had broken his word. M. Carnot has announced himself a candidate in opposition to M. Rochefort. The electoral committee of the Chamber of Deputies to take the oath had been elected. M. Louis Blanc in the place of M. Ledru Rollin; but at a private meeting on Tuesday M. Gambetta read letters from MM. Louis Blanc and Barbes, declaring that they would not come to Paris, the former as he did not wish to cause a disturbance, and the latter on account of his health. M. Ledru Rollin and M. Barbes recommended the working of a disturbance. It is now asserted that the Emperor intends to bring forward M. Gambetta as the candidate of the Left, to oppose M. Carnot. It is said that the Emperor has decided on making M. de Lesseps Duc de Suez, in honour of the opening of the Canal. Prince Napoleon is at Compiègne. The Princess has returned to the Palais Royal. A meeting of the manufacturers of silk stuffs at Lyons has petitioned the President of the Chamber of Commerce to use all his influence to maintain the French Commercial Treaty with England. Monseigneur Dupanloup, Bishop of Orleans, has addressed a letter to the clergy of his diocese, in which he declares himself averse to a definition of the personal infallibility of the Pope, as inopportune. He blames the intemperate language of such journals as the *Civita Cattolica* and the *Univers*, which have opened the discussion on this delicate question, and prejudged the decisions of the Ecumenical Council; and says that a declaration of personal infallibility would be inopportune at the present time, because it would be useless and dangerous; would drive schismatics and heretics still further from the Church, their restoration to which ought not to be despaired of, would provoke the mistrust even of Catholic Governments, and would revive the hatred of the Pontifical power. He blames the Pope who confounded the spiritual with the temporal, and arrogated to themselves claims to dominate over thrones, referring particularly to the Bull of Paul III., which released the subjects of Henry VIII. from their oath of allegiance. This Bull, he says, was calculated rather to precipitate the English nation into heresy than to bring it back to the Church, and was for all Christendom a great misfortune. The celebrated vineyard of Clos-Vougeot has been sold by auction for 1,632,000f. to the Marquis de la Garde.

SPAIN.—The Ministerial journals assert that the Duke of Genoa, if elected, will accept the Spanish Crown. It is expected that at the elections which will be held shortly to fill up the 30 vacant seats in the Cortes, members will be returned prepared to vote in favour of the Duke. It is estimated that the number of votes for his Royal Highness will then amount to 200. Admiral Topete was elected Vice-President of the Cortes on Friday, by a majority of 133 to 5. General Prim informed the Cortes that the Deputies Caimo and Suner had been condemned to death, that the Deputy Ameller had been condemned to perpetual exile, and the Deputy Serraclara to 12 years' confinement. The Bishop of Havana was arrested on Friday at Cadiz. A considerable sum of money for the Carlist chiefs was found in his possession. In the sitting of the Cortes on Saturday the Minister Becerra, in replying to questions from the Porto Rico Deputies, said that in a few days he would read the projected Constitution for that island, treating it not as a colony, like the relation of Canada to England, but as a Spanish province. He condemned slavery, which he said must be gradually abolished, with indemnification to owners. The Porto Rico Deputies spoke in favour of abolition. In the sitting of Thursday the Cortes discussed the Bill relative to the elections for the 39 seats which are vacant, when the Minister of the Interior declared that these elections would not be held until after the raising of the state of siege. A rumour is current in Madrid that the Italian Government has refused its assent to the candidature of the Duke of Genoa for the throne.

BELGIUM.—In the sitting of the Chamber of Representatives on Tuesday M. Frere Orban, in reply to M. Dumortier, said that the late Franco-Belgian railway difficulty had certainly excited the national susceptibilities in a slight degree; still the difficulty might almost be a subject of congratulation, since it had served to place the relations of Belgium and France on a better footing than ever. The conventions concluded were unobjectionable from a political point of view, and were especially favourable to manufacturing interests.

SWITZERLAND.—The Swiss Government has communicated to the Swiss Government its desire to join the Convention for the promotion of a uniform system of coinage, to which France, Italy, Belgium, and Switzerland, have already given their adhesion.

PRUSSIA.—The marriage of Prince Charles of Roumania and the Princess Elizabeth of Neuwied was celebrated on Monday in the presence of the Queen of Prussia, the Grand Duchess of Baden, the Count and Countess of Flanders, all the members of the Hohenzollern family, as well as the Ambassadors of the principal Sovereigns of Europe. In the sitting of the Chamber of Deputies on Friday, the motion of Herr Ebert, extending the trial by jury to political and press offences, was finally discussed and adopted. In the sitting of the Upper House on Monday, a resolution proposed by Count Von Munster declaring the granting of the concession for a lottery loan of 100,000,000 thalers to be incompatible with the welfare of the State, was adopted, as was also a Bill fixing 21 years as the age at which Prussian subjects shall henceforward attain their majority. In the sitting of Wednesday the motion of Count Lippe, relative to the

connection between Federal and Prussian legislation, was discussed, when the Minister of Justice declared in the name of the Government that the proposition could not be entertained. After a long debate the House passed to the order of day by a majority of 54 to 42.

GERMANY.—In the sitting of the Chamber of Deputies on Friday a motion requesting the Government to use its endeavours to bring about a peace between the North and South and end of no war, was adopted. The North German Confederation was unanimously adopted.

DALMATIA.—The last appeal to the insurgents to submit having proved ineffectual, the Austrian troops on Tuesday commenced marching forward in four columns against the district of Krive. The insurgents are partially retreating and partly being driven back by the advancing columns.

RUSSIA.—An Imperial rescript was issued on Thursday ordering the usual conscription to take place in January, at the rate of four in every thousand inhabitants throughout the empire, including Poland. The Emperor received the new French Ambassador, General Fleury, on the 11th inst. A Special Commission has been appointed in connection with the Second Division of the Imperial Chancery for the purpose of revising the existing censorship and press regulations. The following is a list of the presents brought by the son of the Emir of Bokhara for the Emperor and Empress.—For the Emperor.—Three magnificent sets of furs covered with precious cashmeres; three sets of Astracan furs of rare quality, enveloped with cashmeres; four splendid sets of harness, ornamented with precious stones, for saddle-horses. For the Empress.—A diamond ring of great value; a cashmere handkerchief of exquisite workmanship; a valuable piece of cashmere, and a dialium set with precious stones.

ITALY.—The King left his bed on Friday for a few hours, and is now well enough to sign decrees. The Italian papers are filled with the details of the events which took place between the King and the parish priest of San Rossore, when the latter was required to administer the last sacrament to his Majesty during his recent dangerous illness. The King being under sentence of excommunication, the priest applied to the Archbishop of Pisa, Cardinal Corsi, for instructions before he administered the sacrament. The Archbishop in reply enjoined the priest to obtain from the King, before admitting him to the rites of the Church, a retraction of all that he had done against the Church, and an engagement in writing, in the presence of two witnesses, to repeal, in case of recovery, all the laws which were displeasing to the clerical party. To these proposals the King replied:—"I have lived as a Christian in the faith of my forefathers, and in that faith I am ready to die. As King I have, in imitation of the example of my ancestors, done that which my conscience as Sovereign urged me to do for the good of my country." In the face of the King's firmness the priest had not courage to insist on the execution of the orders he had received, and administered the sacrament. The Archbishop was displeased at this, and again sent him to the King to demand at least a verbal retraction. To these fresh proposals the King replied that he would have been glad to listen to him if he had come to speak to him about death, but that if he wanted to talk about politics he must address himself to his Ministers. The Italian Parliament was opened on Thursday by Commission. The Speech from the Throne, after expressing gratitude for the manifestations of affection evinced during the King's illness, says:—

"The birth of the Prince of Naples will be a fresh pledge for the unity and liberty of the country. The relations of Italy with foreign Powers are extremely satisfactory, and if peace is the wish of all nations desiring progress it is particularly so with Italians, who are intent upon the interior re-organisation of their country. The Government has not thought it expedient to interfere with the Bishops who are going to Rome to attend the approaching Ecumenical Council, but the King hopes that a word may go forth from that assembly to reconcile faith and science, religion and civilisation. In any case the nation may be assured that the King will maintain intact the rights of the State and the dignity of the people. The King urges as of great importance the restoration of the finances of the kingdom, and the speedy adoption of the Budget. When the Budget shall have been voted the Government will present several Bills with the view to improve the present system of taxation, and thereby provide for the necessities of the Treasury. As the nation has never hesitated to make any sacrifice to maintain unbroken faith in all its engagements, it is for the Government and the Parliament to ensure that these sacrifices shall be really efficacious. Together with these financial Bills the Government will introduce various measures for the reform of the internal administration and of the penal law, and for the promotion of legislative unification, the reorganisation of the land and sea forces, the extension of trade and credit, and the transformation of the National Guard."

The health of the Princess Margherita and of the infant Prince of Naples is excellent. An enthusiastic popular demonstration in honour of the Royal family occurred on Friday on the Piazza Plebiscito and at the Stook Erohauga. Congratulatory telegrams have been received by Prince Humbert and Princess Margherita from all parts of Italy and from the European Sovereigns. A Royal decree, dated Sunday, has been issued, granting an amnesty to political offenders and to persons implicated in the Grist Tax Riots. The Tribunal of Florence on Monday evening condemned Major Lobbia to one year's military punishment, Signor Martinati to six months' ordinary imprisonment, and Signori Caregnato and Lovelli to three months' imprisonment each. Signor Benelli was acquitted. The sismograph at the Vesuvian Observatory has been extremely agitated since the 9th inst.

TURKEY.—The Council of Ministers met on the 11th inst., to consider the reply of the Khedive, in which his Highness substantially concedes all the points demanded by the Sultan, except that one relative

majority are opposed to the revival of the ancient synods, a very large number are in favour of a diocesan conference in some form or other. Your own memorial tends to confirm this opinion. I do not possess the same opportunity of ascertaining the opinion of the laity, and yet I feel it to be due to their position in the Church, and essential to the success of any such measure as that which we are considering, that their opinion should be sought, and their consent obtained, before any steps are taken for its practical adoption. At the present time, and as at present informed of the feeling of the laity upon the subject, I am not prepared to assemble a diocesan conference; but I will endeavour at an early opportunity as may be given me, and as effectually as I can, to ascertain the opinion of the laity upon the question.

OXFORD.—The Marquis of Salisbury was on Friday almost unanimously elected Chancellor of the University of Oxford, in the room of the late Earl of Derby. Only one vote was given for the other candidate, the Earl of Carnarvon.—The Bishop of Oxford delivered his farewell charge to the clergy of his diocese on the 11th inst. The following is a summary of the more important portions:—

"During the 24 years of his episcopate he had consecrated 19 new churches, re-opened 24 restored ones, and confirmed 2,000 candidates. During the same period 2,000,000 had been voluntarily contributed in the diocese for Church purposes and charities. With regard to recent controversies in the Church, he said that it was the special charge of the Church of England to resist the insidious assaults of Popery. In the Church of Rome it was asserted that there was but one dogma, and no room for any differences. The taunt was as unsound as it was easy to offer, for all sections of the Church did not teach one doctrine. Instead of that divergency in the Church being an evil, he held that it was a sign of life, and he would no more make every voice in a diocese speak in the same tone than he would abolish the music of Nature by requiring the same note from every songster. There were, however, limits to such differences. Now that they were bringing their united action to a close, he had the blessing of seeing amongst his warmest friends the representatives of every school of thought. He could not endure to be the bishop of a party when God's providence had called him to be the bishop of a diocese. To a certain extent the rule of liberty as to thought must be extended to the rule of observance. Feeling that strongly, few things had grieved him more than the recent controversy in the Church respecting dresses and externals. With the mighty work they had to do, with the growing masses on every side, it was heartbreaking to see the zeal of earnest spirits diverted from its true mission, and see it miserably wasted on unmeaning contests as to the cut of a surplice or the colour of a stole. In such a strife both sides appeared to him to be in the wrong, because both exalted things comparatively indifferent into an utterly undue importance. It was hard to understand religion which consisted on one side in refusing to wear a surplice, and on the other in convulsing a parish by introducing into its services the startling novelty of a gorgeous vestment. He had always held in these mere outward matters that, provided the law was not infringed, nor a weak brother offended, it would be wrong to force on others his own disinclination to change. Therefore, when in a rising town or parish there had been a corresponding progress of ritual, he had always felt that, instead of discouraging it, it was better to guide and moderate rather than oppose its development. He had always associated himself with the living works of the diocese, whenever he found them calculated to assist increasing devotion. He must be allowed to say that there might be changes involving great doctrinal questions. Very small alterations in some cases might indicate very great changes, and with regard to such changes it was impossible to be too watchful. The Church and the nation at the Reformation rejected at once the tyrannous usurpation of the Bishop of Rome and the whole system of superstitious accretions which, under the shadow of the Papacy, had overgrown the fair proportions of primitive truth. That great change was obtained at the price of a convulsion which could hardly fail to injure, and even to destroy something, and to endanger more things, which, though good and valuable in themselves, were more or less connected with the discarded errors. There was one change which he viewed with great apprehension, and that was the tendency manifested in certain quarters to change the idea of the Holy Eucharist from a communion of the faithful into a function of the celebrating priest. In his most mature judgment there was no lawful progress in increased reverence for that great sacrament upon the lines of our own Church, but the adoption of the views, and therefore of the practice, of another Church to whose doctrine as to the Holy Eucharist it naturally belonged; whereas it was absolutely subversive of that which had been received amongst ourselves. We should most earnestly resist all movement towards Rome as she is—first of all, because the accomplishment of such a movement would most certainly involve the loss of that most blessed heritage of the truth of God, which of His great mercy, through the fires of martyrdom, and the anguish of a whole generation of our fathers, He had given to us; and next because every semblance of success helped more than anything else, by giving a shock to long-established habits of belief, the progress of that flood of lawless infidelity which revelation showed us as the plague of the last days, and which seemed to have been already largely poured forth upon the air around us. Already he believed we had so suffered. Faith among us endured a far sadder shock from perversions to Rome than from the scientific discoveries by some supposed mainly to enlarge its continuance. Between true science and the Christian revelation there could be no conflict. The Queen of Science must be at one with her imperial sister, though too eager and perhaps half-instructed followers of each might indulge in passionate brawls and unseemly contention. While some injured true science by setting her up as hostile to the Christian faith, there were some who decided science in order to exalt revelation; but the one evil corrected the other. Hatred of science was unworthy of a Christian man, for his God was the God of Nature as truly as He was the God of Grace; nor need we be afraid of the result if some sought to array science against Christianity. The assault of such enemies against the sacred deposit of truth the Church had from the first endured, and could endure again and again. Only internal corruptions could make her fall before her enemies. The perversion of mighty ones among the Church's children to the corruption, untruthfulness, and superstition of the Papacy, was an injury to the faith, and a real danger against which we were bound to strive."

BUGBY.—The following are the candidates for the head-mastership of Rugby School:—Rev. Herbert Snow, assistant master of Eton, formerly Fellow of St. John's, Cambridge; Rev. Edwin Abbott Abbott, head master of the City of London Schools, formerly Fellow of St. John's, Cambridge; Rev. Albert Wratishaw, head master of Bury St. Edmund's School, formerly Fellow of Christ's, Cambridge; Rev. William Waite, assistant master of Eton, formerly Fellow of King's, Cambridge; Rev. John Percival, head master of Clifton College, formerly assistant master of Rugby, and Fellow of Queen's, Oxford; Rev. Henry Highton, formerly

head master at Cheltenham College, assistant master of Rugby, and Fellow of Queen's, Oxford; Rev. Arthur Faber, head master of Malvern College, formerly Fellow of New College, Oxford; Rev. Henry John Wickham, assistant master of Winchester College, formerly Fellow of New College; Mr. Theodore Walrond, formerly assistant master of Rugby, afterwards Fellow and mathematical tutor of Balliol; Rev. Andrew Hayman, assistant master of Bradfield School, formerly scholar of Merton College.

SALTIRE.—St. Titus Salt, who has just completed the erection of a Mechanics' Institution in this town, is about to provide a park and recreation ground for the benefit of his workpeople. About 12 acres of land are to be set apart for this purpose. The grounds will be laid out in flower beds and shrubberies, and provision will be made for cricket, croquet, bowls, and other outdoor amusements. The means for indoor recreation will also be provided. The whole cost will amount to several thousand pounds.

SHEERNESS.—Her Majesty's gun-vessel Rocket, the sister ship to the Thistle, the boiler of which exploded about a fortnight since, had an exceedingly narrow escape from an explosion on Friday morning. While trying her machinery at the Maplin Sands at full speed, the boilers primed to such an extent as to blow nearly all the water out of them, rendering it necessary to draw the whole of the fires. The alarm in the engine-room and stokehole was very great, being heightened by the remembrance of the calamity on board the sister vessel. Some of the men became so unnerved as to be obliged to go on deck, but others remained at their posts, and by their exertions prevented another catastrophe. The cause of the priming is unknown. The Thistle is ordered to be paid out of commission, all standing, and to be placed in the first division of the Steam Reserve.

SHIELDS.—The North Shields Free Library was opened by the Mayor and civic authorities on the 4th inst. Among the speakers was the member for the borough, Mr. Smith. The proceedings were very successful, and concluded with a *conversazione*. This is the first free library on Tyneside.

WARRINGTON.—On Thursday morning the 11th inst., Mr. Samuel Gleane, farmer, of Great Sankey, near this town, was killed by a gun-shot wound in the back, while driving his cart from the Sixsmiths farm to St. Helen's. At the inquest on Saturday, Joseph Gleane, son of the deceased, stated that his father left his house at 6 o'clock on the Thursday morning in a cart for the purpose of delivering his milk at St. Helen's, according to his usual custom. Josiah Gleane, his nephew, living upon a farm at Burtonwood, a few miles from that of the deceased, deposed that he saw his uncle's horse and cart at the door shortly before 7 o'clock. On going to the cart he found his uncle lying in the vehicle quite dead, with large clots of blood near him. On taking him home, and sending for a medical man, it was found that he had

been shot. A farmer named Roberts, who lives upon the road where the deceased passed every morning, gave evidence that on the morning in question he heard him pass in the cart about the usual time. A few minutes afterwards he heard the report of a gun. It was loud, as if the gun had been heavily loaded. He took, however, no notice of the occurrence, but soon afterwards heard that deceased had been killed. Dr. Smith, of Warrington, deposed that he had examined the body, and found on the left side a large gun-shot wound. In the heart and other parts of the body he found pieces of lead, which seemed to be chippings. No heavy shot had been used to charge the gun, which had been fired from a distance of between 4 and 8 yards, and from a lower level than that which deceased occupied. The shot also had been fired after deceased had passed the murderer, because the shot had hit him from behind. The witness also expressed a positive opinion that death had not been caused by deceased himself. The inquest was adjourned to Tuesday next, to enable the police to make further inquiries. Although the family have offered 200*l.* for information leading to the discovery of the murderer, none has yet been obtained. It is not supposed that the murder arose out of any attempt at robbery, 4*l.* or 5*l.* in sovereigns and loose silver having been found in the pockets of deceased, who is described as having been a good master and a kind neighbour. The only matter upon which he is known to have had any difference with anybody has arisen through the preservation of his game; and it is said that he had recently a quarrel with some poachers, and shot one of their dogs. It is also said that during last autumn he sued one of his labourers in the County Court, and that the defendant refused to appear on the summons, and had not been seen in the neighbourhood since that time. He was an Irishman, and was supposed to have returned home.

WIGAN.—A fatal colliery explosion occurred on Monday evening at the Moss Hall Coal Company's pit at Ince, near this town. Twenty-seven dead bodies have already been brought up, and it is believed that 19 more are in the pit. On Tuesday it was found that the pit was on fire, and as there was no doubt that all the men in the pit were dead, orders were given to close both shafts.

WINDSOR.—On Saturday forenoon, shortly after 9 o'clock, a fire broke out at Cumberland Lodge, in the Great Park, the residence of Viscount Bridport. The flames broke out in the apartments occupied by Mrs. Thurnson, the housekeeper, who was with difficulty rescued by Lord Bridport from the flames. The Windsor Brigade engine, and the engines from the Windsor Infantry and Cavalry Barracks, and Windsor Castle were promptly despatched to the Lodge, under the command of Lieutenant Dundas, Colonel Williams, Lord Somerset, Lord Carington, Marquis of Worcester, &c. By the time the engines arrived the fire had spread over a considerable portion of the

building, and unfortunately the nearest house was at Oxpond, a quarter of a mile distant. At past 11 o'clock the premises were in a state of lead running in every direction, and the fire continued until 2 o'clock, when they were partially extinguished, and it was hoped that the wing built in the reign of Queen Anne, and occupied by Lord Bridport, would be saved. The fire however continued to smoulder until day morning, about 1 o'clock, after which Lord Bridport returned home, it again being feared that the time were in great danger, but by the exertions of soldiers and others in charge, the fire was finally subdued by passing buckets of water through the passages which were in flames. Present on Saturday morning, and in the afternoon the Queen, with Prince Leopold, Prince Beatrice, arrived at the Lodge, and Lord Bridport the extent of the damage. Shortly afterwards the Princess Louise and the Christian family at Windsor met in the State apartments. The Queen, with Prince Leopold, Princesses again visited the ruins on Monday morning. The King of the Belgians and Prince Albert visited them on Tuesday. The plate belonging to Lord Bridport was removed by command of Her Majesty from Windsor Castle, in one of the Royal barges. It is supposed to have been caused by a beam of wood falling in one of the upper rooms of the State apartments. The housekeeper stated that she had perceived a smell of smouldering for the last two days, but could not ascertain from whence it came. The fire was confined to the State apartments, built in the reign of George III. for his brother, the Duke of Cumberland, including a large banquet-hall, a billiard room, library, reading-room, grand entrance-hall, and a suite of rooms above. Many valuable articles of property of the Prince of Wales, bearing the date of their purchase, were taken into the hall for safety, but the rapidity of the flames were entirely consumed, and they could be removed.

Ireland.

THE PRIME MINISTER AND THE IRISH.—The speech of Mr. Gladstone at Guildhall has furnished suggestive texts for articles in the "national" press. They accept the admission of "seven centuries of wrong," and moralise upon it after their own fashion. They point to legislative independence as the only remedy, and exhort the people to place their confidence in the promises of the British Government at the inauguration of a new swindle under the name of agitating for fixity of tenure, which was obtained save from an Irish Parliament. When concessions, it says, have been made to Ireland in time, or in any other time, have been made in English fears, not granted by English justice. The *People of Ireland* says that it is sheer folly to suppose that the promised Tenant-Right Bill of Mr. Gladstone will remedy matters. What Ireland wants, it says, is a native Government, under which the land would belong to the country, and be managed by it for the benefit of all its people. That could be effected at the first session of the Parliament of free and independent Ireland, and to that complexion it must come.

TENANT-RIGHT MEETINGS.—A tenant-right meeting, attended by about 5000 persons, was held at Scotstown, county Monaghan, last week. Mr. Wall, J.P., in the chair. The first resolution was: "That the people of Ireland are entitled to a fair rent, at a fair rent." Mr. A. J. M. Keenan, who moved the next resolution, which was: "That the so-called tenant-right of Ulster is a mere delusion," said that it was a lie to say that the condition of the rest of Ireland were like that of Ulster, the country would be happy. The right, he said, meant only oppression of the tenant and the tenant-farmers of Ulster would be exchanged for fixity of tenure at a fair rent. The proceedings terminated with the adoption of a petition to Parliament. A "Tenant-right League" was inaugurated at Kilkenny on the 10th inst. Mr. Bryan, M.P., in the chair, supported by Lord Bellow, Mr. Mulholland Marum, Mr. D. Wick, and several priests. Mr. Marum said that though he had written to every gentleman in the county soliciting their cooperation, few had favoured him with a reply. He proposed the adoption of the rules of the Munster Club, which were agreed to. The proceedings were frustrated by remarks from persons in the meeting about the Fenian prisoners and the release of Lord Carrick and other landlords. A meeting, attended by about 8000 persons, was held at Saltmills, Wexford, on Sunday, at which Mr. M.P., presided, and said he would not support a Bill giving security of tenure, but would support the principle whether the Bill passed or not. He said that the power of ejecting a tenant, and to deprive him of the power of a periodical valuation based on the price of agricultural produce. The Rev. Jeremiah H. H. who moved one of the resolutions, said the services of millions of the Irish race scattered over the face of the earth must be conciliated. There should be no question of tenure and fair rents. "There was no count"

Ireland, for Irishmen were never happy Tuesday a meeting was held at Lord Granard in the chair, supported by the county and for New Ross. Resolved in favour of sixty of tenure at fair that in any measure for the relief of the interest of the labouring class, and characterising as a gross and the alleged imputation of the measure to the Roman Catholic

DEMONSTRATION AT WATERFORD.—A demonstration was organised in Waterford on Tuesday, with bands at its head playing the national air, to the hill of Ballybracken, in support of Ireland, a Republic, and an independent Constitution. The banners were headed "Mackay for Ireland!" and "Upwards of 12,000 persons were

MURDER.—A man, whose name is not given, but who is supposed to be a Cotter or Reardon, has been arrested on suspicion of being concerned in the murder of a private inquiry was held on Tuesday, and he was remanded. The authorities are in communication with London, and more arrests are expected.

Scotland.

OFFICIAL OFFICERS IN SCOTLAND.—The Earl of Dalhousie and Sir William Clerk, one of the Secretaries of State, have been appointed to enquire into the administration of the public departments in Scotland.

JUDICIAL DECISION.—It is understood that the Government have determined on not filling up the vacancy in the Court of Session for the year 1869.

UNIVERSITY OF EDINBURGH.—The University of Edinburgh, under the sanction of the Chancellor, have passed the following regulations for the education of women in the University—"1, women admitted to the study of medicine in the University shall be conducted in separate classes; 2, the instruction of women for the purpose of medicine shall for this purpose be per- mitted to study medicine professionally may be conducted in separate classes; 3, the professors of medicine shall for this purpose be per- mitted to give instruction in such classes, as the Court may from time to time think fit and the fee for the full course of instruction in medicine shall be four guineas; but in the event of students proposing to attend any such course, it shall be in the power of the pro- fessors to provide a reasonable remuneration at a rate, it shall be in the power of the subject to make arrangements for a higher fee subject to the sanction of the University Court; 6, all students attending such classes shall be subject to all the regulations of the University; 7, the regulations shall take effect as from the com- mencement of the session 1869-70."

RECTORSHIP OF ABERDEEN.—The Rectorship of Aberdeen, which Mr. Grant Duff, M.P., Under-Secretary of State for India, was elected to the office next month, and there are already several candidates for a contest for the chair. It is understood that he will be opposed by Sir James Maxwell, Bart., of Keir. The election will take place on December 24.

ADDRESS WITH ENGLAND.—On Friday night the Rector of the Philosophical Institution in Aberdeen gave an address by the Right Hon. James Mackay, Lord Justice Clerk. The subject was "The Union of the Crowns and union of the kingdoms of Scotland and England." His lordship traced the history of the union which had been produced by those events on the progress and social condition of the country. He remarked that it was not until the bonds uniting the two countries were severed, and at the results which had been produced by mutual amity.

NEW CABMEN.—An important movement has commenced in Edinburgh to afford employment to the cabmen. Through the exertions of Mr. A. Mackay, a neat wooden building, designed by Mr. Mackay and provided by subscriptions from inhabitants of the neighbourhood and the cabmen themselves, has been erected at two stand at Randolph Crescent. The building is provided in it, by which a full view in each direction can be commanded; and entered by a door from the street-side. A gas-stove is to be provided for heating the stand. A gas-stove is to be provided for heating the stand. A gas-stove is to be provided for heating the stand.

IRISH GOLD DIGGINGS.—The operations during the last few weeks have been unproductive, and the number of persons employed has not been equal to that of the previous season, so that it is generally believed that the gold-mines in Sutherland is, for the present at least, abandoned.

Railways.

THE MIDLAND.—On Wednesday evening an express, from Derby to Leicester, was derailed at the Trent junction. Several persons were injured; one named Shaw, a traveller, is lying at Leicester, seriously injured. The men in the ballast van at the rear had their lives.

ABANDONMENT OF PROPOSED LINES.—The first series of notices for various railway Bills in the next session, which were issued on Saturday, are remarkable for the large number of applications they contain for the abandonment of proposed lines. The South-Eastern ask for power to abandon the construction of the extension line to Cranbrook, which was authorized five years since, and also of all the railways between Tonterden and Apolonia and Appetore and Stargate. The Great Northern ask to abandon the Watford and Edgware line, which was also authorized five years since, and the Lancashire and Yorkshire ask to abandon a portion of the Ripponian branch. It is also understood that neither of the three rival Brighton schemes will be proceeded with in the forthcoming session.

THE EASTON STATION.—The London and North-Western intend to enlarge the Easton terminus, and considerably improve it. The works will commence about the latter end of this month.

PENNY RAILWAY FARES.—The movement to establish penny fares for working men living in the suburbs is making great progress in Liverpool. The London and North-Western Company have nearly completed branch lines by which Bootle, West Derby, Walton, and other suburbs of Liverpool, will be connected with their main lines, and it is intended to establish a system of penny fares for working men.

Sporting.

THE GREAT TYNE BOAT RACE.—The four-oared race for the championship was rowed on Thursday on the Tyne, over a distance of three miles and a quarter. The competitors were the Thames crew and the Newcastle crew, which was recently successful on the Thames. At starting the waves were so high that both crews could scarcely row. The Thames crew got away with the lead, which they kept for half a mile, when the Tyne men came to the front, and, after a neck and neck struggle, went ahead, and won easily by two lengths and a half. Time, 28 min. 50 sec.

Obituary.

VISCOUNT CANTERBURY died on Saturday, after a lingering illness, at his town residence in Clarendon Street. He was the second son of Charles John Manners Sutton, second Viscount Canterbury of the City of Canterbury, and Baron Billesley of Bottesford, county Leicester, in the peerage of the United Kingdom, was the eldest of the two sons of the Right Hon. Sir C. Manners Sutton, G.C.B., Speaker of the House of Commons, and grandson of the Archbishop of Canterbury, by his first wife, the eldest daughter of Mr. J. Denison, of Ossington Hall, Notts. He was born in 1812, and succeeded to the title on the death of his father in 1845. He married, in 1838, the youngest daughter of the late Mr. Charles Thompson, of Winchingham Hall, Norfolk, by whom he has a numerous family. He was nominated by his grandfather, the Archbishop, to the reversion of the office of Registrar of the Canterbury Prerogative Court, and in its discharge received a pension. His baronetcy, which was created in 1831, devolved on his only son, the Hon. Sir John Manners Sutton, K.C.B., who was elected to Trinity College, Cambridge, and succeeded to the baronetcy in 1867. He was elected to the House of Commons for the borough of Cambridge in 1839; but was unseated on petition. He was, however, returned at the general election in 1841, and continued to represent the borough till the dissolution of Parliament in 1847. He was Under-Secretary of State for the Home Department from 1841 to 1846, was appointed Lieutenant Governor of New Brunswick in 1854, which appointment he held till 1861. In 1864 he was appointed Governor of Trinidad, which post he held till 1866, when he was appointed Governor of Victoria.

BARONESS WINDSOR died on the 9th inst., at St. Leonard's. Her husband, Harriet Windsor Clive, Baroness Windsor of Stanwell, in the peerage of England, was the youngest daughter of the eleventh and fifth Earl of Plymouth, by the daughter and coheir of the second and last Lord Archer. She was born in 1757, and married in 1811, the Hon. Robert Henry Clive, youngest son of the first Earl of Powis, by whom she leaves a son and three daughters. The barony of Windsor, which fell into abeyance on the death of the sixth Earl of Plymouth, in 1843, remained between her ladyship and her sister the late Marchioness of Downshire. On the death of the Marchioness her Majesty was pleased to terminate the abeyance, and declare her ladyship by letters patent to be Baroness Windsor, as the surviving coheir of her brother, and thirteenth in succession to the barony of Windsor. The title descends to her grandson Robert George, son of the late Hon. Colonel Robert Clive, M.P., who died in 1853, by Lady Mary Selina Bridgeman, youngest daughter of the late Earl of Bradford. The young peer was born in 1857.

LADY HENRIETTA LOUISA FRANCES CATHART, died on the 10th inst., at St. Leonard's. She was the second daughter of the late General Earl Cathart, G.C.B., sister of the present earl and of Lady Elizabeth Douglas and Lady Adelaide de Trafford.

SIR HENRY RICH, BART., died a few days since at Sonning, near Reading. He was the youngest son of the late Admiral Sir Thomas Rich, and was born in 1803. He married, in 1852, the youngest daughter of the late Rev. James Forkinson, of Dorchester Hall, Cheshire. He was educated at St. John's, and afterwards went to Trinity College, Cambridge, where he graduated B.A. in 1825. He served in the army for 30 years, and was at the taking of Mehadia, the battle of Kirkee, for which he received a medal. For some time he was a groom in waiting to her Majesty. He was a zealous reformer, and was the author of several political pamphlets. He contested Knaresborough unsuccessfully in 1831, and again in 1834, but was returned for that borough in 1837. In 1846 he was first elected for Richmond, without a contest, and represented that constituency till 1861, when he accepted the Chiltern Hundreds, to make room for Sir Roundell Palmer. He was a Lord of the Treasury from 1846 to 1852, and had the dignity of baronet conferred on him in 1863.

SIR DAVID CONNOR, BART., died on the 12th inst. at Hastings. He was born in 1802, and married, first, in 1833, the third daughter of General the Hon. Robert Meade, and the grand-daughter of the first Earl of Clanwilliam; and, secondly, in 1856, the daughter of the late Mr. William Baker. He succeeded to the baronetcy on the death of his father, the fifth baronet, in 1854. He was educated at Sandhurst, and served with the 13th Light Dragoons in India, and afterwards in the 12th Lancers. He succeeded to the baronetcy by his eldest son by the first marriage, Edward Augustus Thurlow, born in 1839, who entered the army in 1855, became Captain of the 32d Regiment in 1859, but retired from the service in 1864.

SIR JAMES PRIOR, KNT., R.N., Deputy-Inspector of Hospitals and Fleets, on the retired list, died on Sunday last at Brighton, aged 82. He entered the medical service of the

navy at an early age; served on the Eastern Coast of Africa, the East India Company's ships, and finally was for some time Surgeon to Admiral Boscawen. He was present at the capture of Mauritius and Java, and was afterwards employed in the 1st Regiment of Foot Guards, and was promoted to St. Petersburg in 1805. He was present at the battle of Borodino, and was afterwards employed in the 1st Regiment of Foot Guards, and was promoted to St. Petersburg in 1805. He was present at the battle of Borodino, and was afterwards employed in the 1st Regiment of Foot Guards, and was promoted to St. Petersburg in 1805.

THE REV. W. H. BARNES, M.A., Vicar of All Saints, Chelsea, died a few days since from a fall of some stone steps, while on a visit to the Dean of Bath. He was in his 53rd year, having graduated at Christ's College, Cambridge, in 1814. As a contributor to the "Quarterly Review" he was distinguished by his lucid and powerful style. He was elected to the pulpit in 1838, and his younger days he enjoyed a high reputation.

ADMIRAL THE HON. JOHN GORDON, youngest brother of the fourth Earl of Aberdeen, died on the 11th inst., at his residence in Queen Anne Street, London. He was in the 73rd year, having graduated at Christ's College, Cambridge, in 1814. As a contributor to the "Quarterly Review" he was distinguished by his lucid and powerful style. He was elected to the pulpit in 1838, and his younger days he enjoyed a high reputation.

REAR-ADMIRAL WARREN, C.B., senior officer on the coast of Ireland, died on the 11th inst., after a short illness. He entered the service of the navy in 1800, and was engaged in various sea services, and the Indian service. He for some time commanded the Channel Squadron, and in 1831, he was appointed to command the Mediterranean Squadron, and in 1834, he was appointed to command the Channel Squadron. He was made a Companion of the Bath in 1831, and a Rear-Admiral in 1833.

REAR-ADMIRAL HENRY COLLEGE DRACON, died on the 11th inst., at Leonard Place, Kensington, on the 9th inst., at the age of 81. He entered the navy in 1800, and accompanied the first Lord Nelson in the capture of the combined fleets of France and Spain. He was present at the capture of the Marsouin and Belle Isle in 1800, and the capture of the Spanish fleet in the Bay of Cádiz in 1805. He was present at the capture of the Spanish fleet in the Bay of Cádiz in 1805, and at the capture of the Spanish fleet in the Bay of Cádiz in 1805.

MR. W. M. BEST, one of the reporters of the Court of Queen's Bench, died on Wednesday, after a short illness. His treatise on the principles of evidence, published in 1849, attracted much attention at the Bar, and Baron Alderson publicly stated that it exhibited more real brains than any law book published during his lifetime. He had a high reputation in the profession as a lawyer, jurist, and scholar. He was a Master of Arts and Bachelor of Laws of Trinity College, Dublin, was called to the English Bar in 1834, and a few years ago was elected a Bencher of Gray's Inn.

WILLS.—The will of Lieut.-Col. Sir Trevor Wheler, Bart., of Alderley House, Leamington, has been sworn under 16,000l. personality; Mr. Charles Moore, M.P., late of Worcester, Lipperry, and Grafton Street, Bond Street, 10,000l.; Sir Thomas Murray Wilson, Bart., 1st of the manor of Hampstead, 12,000l.; Sir Charles George Young, Master King of Arms, 6,000l.; Mr. Robert Bright, of Bristol, and Abbots Leigh, Somerset, 7,000l.; Mr. William Edgar, of the firm of Swan and Edgar, stock-mercers, Piccadilly, and Eagle House, Clapham Common, 4,000l.; Mr. Alexander Beethfeur, of Moscow Road, Bayswater, 6,000l.; Miss Elizabeth Barton, of Wakefield, 140,000l.; Mr. Charles Lawrence, 70,000l.; Mr. Morley Smith, 60,000l.; Mr. Robert Bullen, 60,000l.; Mr. Thomas Prioleaux Ball, 45,000l.; Mr. Josiah Lewis, 40,000l.; Mr. George Jessop, 35,000l.; Mr. William John Campion, 30,000l.; Mr. John Talents Fisher, 40,000l.; Mr. Walter Butterfield, of Stanhope Terrace, Hyde Park, 20,000l.

Markets.

Table with market prices for various goods including Apples, Oranges, Pears, Grapes, Vegetables, and Fruits. Columns list item names and their corresponding prices per unit.

POTATOS.—SOUTHWARK, Monday, Nov. 15. During the past week the arrivals coastwise have been small, but more plentiful by rail. The trade for best samples

has been a little better. Quotations.—York Regents, per ton, 70s. to 100s.; Kent and Essex do., 60s. to 85s.; Lincolnshire do., 60s. to 80s.; East Lothian do., 70s. to 100s.; Perth, Forfar, and Fife do., 70s. to 80s.; French and Belgian Whites, 60s. to 70s.

ENGLISH WOOL

We have had a steady business doing in English Wool, and the tendency for all classes is decidedly towards firmness, though so far it has been impossible to obtain any marked rise, which, when the decided advance of Colonials here, and all classes of foreign Wool on the Continent, is taken into account, is rather singular, and we cannot but fancy that English must soon have its turn.

METROPOLITAN CATTLE MARKET.

MONDAY, Nov. 15.

We have a larger supply of Beasts; however, there is a good demand for the choicest qualities at fully late rates; trade is dull for second-rate, at rather lower prices. The number of Sheep is about the same as on Monday last; trade is good for choicest qualities, at a slight advance; middling and inferior are no dearer. There are very few Calves on offer; high prices are realised. Our foreign supply consists of 1929 Beasts, 3070 Sheep, and 47 Calves; from Scotland there are 44 Beasts, from Ireland, 703; and 1900 from the Midland and Northern Counties.

s. d.	s. d.	s. d.	s. d.

Beasts, 4583; Sheep and Lambs, 16,980; Calves, 56; Pigs, 90.		Pigs	4 0 to 4 6

THURSDAY, Nov. 18.

The supply of Beasts is shorter. Trade is not very brisk, but Monday's quotations are fully maintained. The number of Sheep is also smaller; there is a very slack attendance of purchasers, and no alteration in prices. Calves are selling about the same as on Monday. Our foreign supply consists of 415 Beasts, 500 Sheep, and 231 Calves.

MARK LANE.—MONDAY, Nov. 15.

There was a small supply of Wheat from Essex and Kent to this morning's market, and the sale was slow at a decline of 1s. per qr., some quantity being left over at a late hour. For foreign there was a limited demand, and the sales made were at a reduction of 1s. to 2s. per qr. Barley was 1s. per qr. cheaper. There was no change in the value of Beans or Peas. Oats were in rather better inquiry, at an advance of 3d. to 6d. per qr. The nominal top price of Flour was reduced 4s. per sack, and foreign was 1s. per sack, and American 6d. per barrel lower.

FRIDAY, Nov. 19.

Last Friday night the cold weather left us again, since then it has been variable. Foreign supplies of Wheat and Flour

into our principal ports having continued on a large scale; millers and dealers felt justified in expecting lower rates, they paused, therefore, in their purchases, and the result has been a very wretched trade throughout the past week, at a decline varying from 1s. to 3s. per qr. on Wheat. Spring Corn of all descriptions has been neglected, at 6d. to 1s. per qr. reduction in value. Flour moved off very slowly at about 1s. per barrel and sack below late rates. The arrivals of grain and seed-laden vessels off the coast this week consist of 125 cargoes, of which, with those left over from the preceding week, there remained for sale last night 106 cargoes. The floating trade has been exceedingly quiet throughout the week, buyers, under the influence of heavy arrivals (samples of which are now in course of distribution), were holding back, and arrived Wheat closed at a reduction of nearly 2s. per qr. Maize was steady, without any quotable alteration in price. In Barley and Rye hardly anything doing. There was no demand whatever for cargoes on passage or for forward shipment. Paris, November 18.—The Wheat and Flour trade are very quiet, with a downward tendency in prices. The eight marks are quoted at equal to 35s. 9d. per 280 lb. The stock at the Halle is estimated at 6500 cwts.

The arrivals of English and foreign grain this week are moderate. There was a very poor attendance at this morning's market, and little disposition to purchase Wheat, either English or foreign; the little business done was rather under Monday's prices. Spring corn was unchanged in value.

ARRIVALS.

	Wheat.	Barley.	Oats.	Flour.

SEED MARKET.

We have nothing new or important to report this week concerning the agricultural seed trade. Our markets are quiet but firm. The speculative demand for white Clover seed still continues, and the result of this inquiry has been an advance of 2s. to 3s. per cwt. Prices on the Continent for this description, as well as for Alsike, are also on the rise. Fine samples of new bold purple red Clover seed are scarce, and readily command high rates. Trefolli seed excites for the moment little attention. Hempseed sells freely at the late advance. New foreign Canary seed, owing to heavy arrivals, is now unprecedentedly cheap. We have a revived inquiry for winter Tares; these are now obtainable in our market at from 6s. to 10s. per bushel. The Linseed trade is firm. Rape and Mustard seeds are without alteration.

Wanted, a Nursery Foreman.

REQUIRED, an active, competent, first-class FOREMAN, to take the out-of-door Management of a large Provincial Nursery. None but those possessing decided ability and unexceptionable references need apply.—Address, by letter only, Z. Z., *Gardeners' Chronicle* Office, W.C.

MESSRS. VEITCH AND SONS wish to ENGAGE a PERSON thoroughly competent to take the Management of the Packing Shed, and to see to the general execution of orders, including the correct Naming of Plants, &c.—Apply by letter, stating references and wages required, to The Royal Exotic Nursery, Chelsea, S.W.

WANTED, an active WORKING MAN, for a Small Nursery.—One used to the Spade, and with some knowledge of Greenhouses and the Growth and Propagation of Bedding and Hardy Herbaceous Plants, &c. Wages, 20s. per week, with outgo. Address, by letter only, with full particulars, stating last engagements, &c., to F. D., *Gardeners' Chronicle* Office, W.C.

To Gardeners.

WANTED, by the Managers of the Metropolitan Asylum District, for the ASYLUM at Leavesden, near Watford, a PERSON who thoroughly understands the Cropping and Cultivation of a Kitchen Garden (about 7 acres in extent). The Person to be appointed, whose age must not exceed 40 years, will be required to enter upon his duties forthwith. Wages, 25s. per week, without a house or any other advantages.—Applications in the handwriting of the Candidates, on Forms provided for the purpose, accompanied by Testimonials of competency, must be forwarded to me, at the Offices of the Managers, 37, Norfolk Street, Strand, not later than Wednesday, November 21. Due notice will be given to those Candidates who may be required to attend the Committee. By Order, W. F. JEBB, Clerk to the Managers, 37, Norfolk Street, Strand, W.C.—Nov. 8, 1890.

The Best Remedy for Indigestion. NORTON'S CAMOMILE PILLS are recommended as a simple but certain remedy. They act as a powerful Tonic and general restorative; their operation; safe under any circumstances; persons can now bear testimony to the benefits of their use. Sold in bottles at 1s. 11d., 2s. 6d., and 5s. 6d. in the Kingdom. CAUTION.—Be sure to get the PILLS, and do not be persuaded to purchase any other.

NOTHING SUCCEEDS LIKE PARR'S LIFE PILLS. It was a saying of Tallyrand that "Nothing succeeds like PARR'S LIFE PILLS" and it is peculiarly applicable to PARR'S LIFE PILLS, the history of the world never was a discovery made of curative elements forming so complete an antidote to the decay of the human frame. In cases of Rheumatism, Stomach Complaints, Bile, Gravel, Cutaneous Affections, indigestion, &c., PARR'S PILLS give immediate relief to the slightest pain or inconvenience.

T. H. P. DENNIS & COMPANY, PATENTEES. HORTICULTURAL ENGINEERS AND BUILDERS IN WOOD AND IRON.

T. H. P. DENNIS AND COMPANY beg to direct the attention of Noblemen, Gentlemen, Nurserymen, and Gardeners to the many and varied improvements they have made in every description of Horticultural Buildings. They continue to Manufacture and Build up the most improved and most highly approved Patent Wrought Iron Construction. They have much pleasure in announcing that by the aid of modern appliances, in their Manufactory, all kinds of Horticultural Buildings will be supplied at the most moderate prices consistent with the high standard of their workmanship. Every description of Garden Structure arranged, designed, and heated on T. H. P. D. & CO.'S improved system, will be guaranteed to fully answer the purpose for which they are intended.

Gentlemen waited upon by Members of the Firm to advise and arrange for contemplated Buildings.

Our NEW HOT-WATER BOILER and other Specialities and Patented arrangements are described in other Advertisements, and also in our Catalogue, which may be had on application.

ANCHOR IRON WORKS, CHELMSFORD.

BY HER MAJESTY'S ROYAL LETTERS PATENT.

ORMSON'S NEW PATENT ECONOMIC BOILERS.

ORMSON'S PATENT CONCENTRIC SADDLE BOILER.

ORMSON'S PATENT CONVOLUTED BOILER.

ORMSON'S PATENT TUBULAR BOILER.

From the Construction of these Boilers, it will be at once seen that the object of the Inventor is to economise fuel, by concentrating its entire force and vertical action on the surfaces of the Boiler, and not wasting it by Heating Brickwork and Chimneys, a fault common to the great majority of Boilers now in use. These Boilers are made of the best Welded Wrought-iron, of good substance, having no overlapping plates, holes, or rivets, and are therefore perfectly secure against failure from expansion and contraction of the metal, an occurrence so frequent and fatal to all forms of Cast-iron Boilers. Please to state diameter and length of Pipe to be Heated.

HENRY ORMSON, HORTICULTURAL BUILDER TO HER MAJESTY, AND HOT-WATER APPARATUS MANUFACTURER TO THE COMMISSIONERS OF HER MAJESTY'S ROYAL PALACES AND PUBLIC BUILDINGS, AND TO THE ROYAL HORTICULTURAL SOCIETY,
STANLEY BRIDGE, KING'S ROAD, CHELSEA, LONDON, S.W.

SHAW'S PATENT FAN. For Samples and Prices apply to J. SHAW AND CO., 29, Oxford Street, Manchester.

BENJAMIN LOOKER, Inventor and Sole Manufacturer, Kingston-on-Thames.

Caution to Gardeners. - When you ask for SAYNOR and COOKE'S WARRANTED PRIZE PRUNING and BUDDING KNIVES, see that you get them Observe the mark SAYNOR, also the Corporate Mark, Obtain Warranted without which none are genuine. S. & C. regret having to caution Gardeners and others, but are compelled to do so, in consequence of an imitation, of common quality, having been sold for the genuine one, and which has caused many complaints to be made to them of Knives which were not of their make, all of which are warranted both by Sellers and Makers. S. & C.'S PRUNING and BUDDING KNIVES are the best and the cheapest in the market. Faxon Works, Sheffield. Established upwards of 126 years.

SHANKS'S PATENT LAWN MOWERS for 1869, The Patent for which is recently introduced and SHANKS'S MACHINE

Several important advantages possessed by no other Lawn Mower PATENT DOUBLE-EDGED SOLE-PLATE, WIND-GUARD, &c. The unprecedented Sale for 1868, notwithstanding the Dryness of the Season, forms the most convincing testimony how much these advantages have been appreciated. ALEXANDER SHANKS & SON beg to intimate that, among all the Exhibitors of Lawn Mowers at the Paris Exhibition, they are the only Firm to whom the Jury awarded a Medal. The Silver Medal then awarded is the highest Prize ever given at any Exhibition for Lawn Mowers.

ALEXANDER SHANKS & SON have for some time past been making the Revolving Cutter of their Machines Self-Sharpening - that is, with Steel on both Sides of each Blade, so that when the Cutter becomes blunt by running one way, it can be reversed, thus bringing the opposite or sharp edge of the Cutter to act against the Sole-Plate. In addition to this, A. S. & S. make the Sole-Plate or Bottom Blade of their Machine with Two Edges - one in front as usual, and one in reserve at the back; when the front edge gets worn down, the plate has only to be unscrewed and the unused edge brought to the front. It will be seen at a glance that this arrangement enables the cutting parts to last twice as long as in other machines, where the single-edged Sole-plate must be entirely renewed when the edge is worn down.

A Wind-Guard has also been introduced to prevent the Mown Grass being blown past the Box during the prevalence of wind. There is no ribbing with these Machines. The Lawn when mown has a most beautiful appearance, being as smooth as a piece of velvet. Every Machine warranted to give ample satisfaction, and if not approved of can be returned at once unconditionally. Illustrated Circulars, with full particulars, sent free on application. ALEXANDER SHANKS & SON, Design Iron Works, Arbroath, and 27, Leadenhall Street, London, E.C. A Stock of all sizes of Lawn Mowers always kept at 27, Leadenhall Street.

GREEN'S PATENT SILENS MESSORS, or NOISELESS LAWN MOWING, ROLLING, and COLLECTING MACHINES for 1869.

Every Machine is warranted to give entire satisfaction, and if not approved of, can be returned at once unconditionally. PRIZE MEDALS AWARDED TO GREEN'S PATENT LAWN MOWERS.

First Prize Medal at the International Exhibition, London, 1862. First Prize Medal at the International Exhibition, Dublin, 1865. First Prize Medal at the Namur Exhibition. First Prize Medal at the Gand Exhibition. First Prize Medal at the Laeken Exhibition. First Prize Medal at the Liere Exhibition. First Prize Medal at the Brussels Exhibition, on two occasions. First Prize Medal at the Hamburg Exhibition.

GREEN'S Patent Lawn Mowers have proved to be the best, and have carried off every Prize that has been given, in all cases of competition. The extraordinary success of GREEN'S Patent Lawn Mowers is an established fact. During the last five years the demand has been unprecedented, which alone is a proof of their superiority over all others. The following are their characteristic features: - 1st. Simplicity of construction, every part being free of access. 2d. They are worked with far greater ease than any other Lawn Mower 3d. They are the best to get out of order.

GREEN'S Patent Lawn Mowers combine all the advantages of self-sharpening, and when the cutters become blunt by running one way round, they can be reversed again and again, bringing the sharp edge of the cutters against the bottom blade, which operation can be done by any inexperienced person, owing to the peculiar adaptation of the Machine, which is possessed by no other. Illustrated Price Lists free on application.

THOMAS GREEN and SON, Smithfield Iron Works, Leeds, and 54 and 55, Blackfriars Road, London, S. N.B. - All orders are executed on the day they are received.

"Invaluable," the invariable report. THE "VOWEL" WASHING MACHINE sent to all parts of Great Britain upon trial, carriage free. Particulars free by post. BRADFORD AND CO., 63, Fleet Street, London, E.C.; Cathedral Steps, Manchester; 23, Dawson Street, Dublin

THE SOCIETY OF PAINTERS in WATER COLOURS. - THE EIGHTH ANNUAL EXHIBITION OF SKETCHES and STUDIES by the MEMBERS. OPEN on MONDAY, Nov. 29, at their Gallery, 5, Pall Mall. Admission 1s. WILLIAM CALLOW, Secretary.

Home News. THE COURT AT WINDSOR. - On Saturday the Queen went to London for the purpose of opening the Blackfriars Bridge and the Holborn Viaduct. Her Majesty, who was accompanied by Princess Louise, Prince Leopold, and Princess Beatrice, left the Palace at a quarter before 11 o'clock, and returned 15 minutes past 2. On Sunday the Queen and her family attended Divine service in the private chapel. The Rev. R. W. Church, rector of Wharfedale, preached the sermon. On Monday the Queen went to the morning and afternoon. On Tuesday the Princess of Wales arrived at the Castle, and remained to luncheon. The band of the Royal Horse Guards played in the quadrangle a selection of music during the luncheon in honour of the Prince's birthday. The Royal Highnesses afterwards returned to Marlborough House. On Wednesday morning the Judge-Advocate General had an audience of her Majesty. On Thursday the Queen held a Council, at which Sir Alexander Spearman and Mr. Acton S. Ayton, M.P., were sworn as members of the Privy Council, and took the oaths as members of the Board. Earl De Grey and Ripon, the Rector

day the district of Zuppa surrendered to the authorities. The troops, after having rested for a few days, will commence operations against the Crioschianians. During several of the recent severe engagements, the Montenegrins occupied their own frontier, and thus partially prevented the insurgents from crossing.

RUSSIA.—The Emperor on Friday received the son of the Emir of Bokhara and the other members of the Bokhara mission. His Majesty said he hoped that henceforth friendly relations would be maintained and increased between Russia and Bokhara, and added that Russia had not been the cause of the rupture between the two countries. On the friendly assurances of the Emir of Bokhara being communicated to the Emperor, his Majesty said he viewed the fact of the Emir's son being sent to St. Petersburg as a pledge of their sincerity.

ITALY.—The Princess Margherita gave birth to a son on Thursday night. Both are doing well. The Prince has received the names of Victor Emanuel Ferdinand, and the title of Prince of Naples. The King of Italy was in so dangerous a state on Saturday, that Prince Napoleon and Princess Clotilde were summoned by telegram from Paris, Prince Humbert was summoned from Naples, and the Duke and Duchess of Aosta, who had gone to Egypt for the opening of the Suez Canal, were recalled to Italy, while the departure of the Commissioners, who had been appointed by the Italian Government to accompany his Royal Highness to Suez, was suspended. On Sunday the King was informed of the serious nature of his illness, whereupon he immediately sent for his confessor, and received the sacrament with the greatest tranquillity, in the presence of Prince Humbert and Prince Carignano. During the day a copious military eruption appeared, and a sensible and progressive mitigation manifested itself in all the symptoms of the King's illness. On Monday his Majesty's health had sensibly improved, and he was entirely out of danger. On Tuesday the King continued to regain strength, and is now progressing so satisfactorily that Prince and Princess Napoleon returned to France. Prince Carignano, Prince Humbert, the President of the Senate, the Minister of the Household, and the officers of State left for Naples to be present at the confinement of Princess Margherita. On Thursday the Duke and Duchess of Aosta arrived at Taranto from Cairo, but on receiving favourable news of the King's health, their Royal Highnesses set out on their return to Egypt.

GREECE.—The Emperor of Austria left Athens on Friday evening for Jaffa. On Saturday the Ministry received a vote of confidence from the Chamber of Deputies. The division list showed 93 members to be in favour of the Government, while only two were recorded in opposition. The remaining deputies abstained from voting.

TURKEY.—The Porte sent four steamers last week to *Astoria* with reinforcements for the armies of Bosnia and the Herzegovina, as a precaution against a possible extension of the Dalmatian revolt to the Turkish border provinces. The Turco-Persian difficulty is finally settled, and the English and Russian Ambassadors have just delivered to the Porte, attested by their signatures, an elaborately executed map of the Turco-Persian border, on which the British and Russian commissioners have been working for some years past. It is understood that the Emperor of Austria has endeavoured to prevail upon the Sultan to proceed to Suez, but his Majesty has definitively declined to be present at the opening of the canal. It is stated that the British, French, and Austrian Ambassadors have opened negotiations with the Porte with the view of freeing merchant vessels from the onerous and disadvantageous regulations which have been in force since 1866 at the entrance and passage of the Dardanelles and Bosphorus. It is added that the Turkish Government appears disposed to give a favourable consideration to the representations of the three Powers.

THE HOLY LAND.—The Emperor of Austria arrived at Jerusalem on Tuesday from Jaffa, after 11 hours' journey on horseback. His Majesty was accompanied by several Bedouin chiefs and a body of some 800 horsemen. The Emperor visited the Church of the Holy Sepulchre, and alighted at the Austrian Hospice.

EGYPT.—The Duke and Duchess d'Aosta sailed from Alexandria on Saturday night for Italy. The Italian fleet left on Tuesday for Taranto. The Empress Eugénie is still in Upper Egypt, and has proceeded as far as the Second Cataract. Her Majesty was expected at Siout on Tuesday on her return to Cairo, where she will arrive to-day. The festivities in connection with the inauguration of the Suez Canal will commence at Port Said on Tuesday. On Thursday there will be a ball at Ismailia. The inauguration of the monument to Lieutenant Waghorn, the originator of the overland route, was to take place at Suez yesterday. The English squadron, consisting of five iron-clads and three despatch boats, arrived at Alexandria on Wednesday morning.

CAPE OF GOOD HOPE.—Accounts from the Cape state that a heavy fall of snow had occurred at Natal, and a large number of sheep had been killed by it. The Tatin goldfields were proving very satisfactory, and well-accredited specimens of richly-yielding quartz had reached Natal. The diamond discoveries on the banks of the Orange River were also increasing. A heavy gale prevailed in Algoa Bay on September 19 and 20. Out of 13 large vessels at anchor 11 were wrecked—namely, the English barks Argali, England, Fingoe, Forres, Sarah Black, the brig Duke of Buccleuch, the brigantine Flash, the French bark Jeanne, the German bark Major von Safft, the Norwegian bark Sea Snake, and the Swedish brig Gustaff. Captain Christopher, his son, and seven men of the Sea Snake were drowned. The other crews were saved. The bark Amersham was

also wrecked off Struy's Point on September 19, but the crew were saved. The dispute between the Cape Parliament and the Governor on the question of retrenchment still remained unsettled. The flying squadron, which left Monte Video on September 11, arrived at the Cape on October 4. Her Majesty's ship Luffey anchored in Table Bay, and her Majesty's ships Liverpool, Scylla, Endymion, Bristol, and Barossa went on to Simon's Bay.

INDIA.—The death of Azim Khan is officially confirmed. His nephew is supposed to have returned to Teheran.

UNITED STATES.—Senor Roberts, the Spanish Minister, has addressed a note to Mr. Fish, the Secretary of State, reminding him of the principles laid down by Mr. Seward and Mr. Adams in their controversies with Earl Russell, Lord Stanley, and Earl Clarendon, and asking how the United States can stultify themselves by recognising the belligerency of the Cubans after protesting against the recognition of the belligerency of the Southern Confederacy by Great Britain and France. Mr. Fish has replied that the Government of the United States has as yet no intention of recognising Cuban belligerency. He, moreover, maintains the doctrine of his predecessor regarding the British and French recognition of the belligerent rights of the Southern Confederacy, and he deprecates the course taken by the Cubans in the United States, where they have on several occasions violated the neutrality laws. Mr. Fish and the Hon. John Rose are framing a new Canadian reciprocity treaty. The Press throughout the country express great regret at the death of Mr. Peabody, and publish highly eulogistic biographies of him. Bells were to be tolled, religious services held, and other demonstrations of mourning made yesterday in Boston, Baltimore, Danvers, and other American cities, during the time of his funeral in London. Mr. Robert J. Walker died on Thursday. The National Reform Convention of Jewish rabbis, in session at Philadelphia, have passed resolutions in favour of adopting modern languages in the prayers, and of introducing modifications in the dietary, marital, and other laws. Admiral Stewart, of the United States Navy, is dead. The small-pox is raging among the Indians of Montano and Idaho; 500 deaths have occurred among the Grosventre tribe. The yellow fever has appeared at Puerto-Principe.

CANADA.—Chancellor Vanskoughnet, the Chief Equity Judge at Ontario, died at Toronto on Sunday.

City Intelligence.

MONEY MARKET, FRIDAY.—**BRITISH FUNDS:** Consols are 93½ to 93¾ for Money, and 93½ to 93¾ for Account; New Three per Cents, 91½ to 91¾; and Reduced, 91½ to 91¾; Bank Stock, 237 to 239; Exchequer Bills, March, par to 5s. pm.; June, 5s. to 10s. pm.; India Five per Cents, 115 to 115½. — **FOREIGN:** Turkish Five per Cents, 42½; Ditto, Six per Cents, 66½; Spanish, 26½; Italian, 53½; Lombards, 22; United States 5-20 Bonds, 80½ ex div.; Erie, 21; Illinois, 98½ to 99.

Metropolis and its Vicinity.

THE QUEEN'S VISIT TO THE CITY.—On Saturday the Queen opened Blackfriars Bridge and the Holborn Viaduct in semi-State. The weather, though cold, was everything that could be hoped for in November. Her Majesty, accompanied by the Princesses Louisa and Beatrice and Prince Leopold left Windsor shortly before 11, and arrived at Paddington Station at 25 minutes after the hour. She was received on her arrival by the Duke of Wellington, as Lord-Lieutenant of Middlesex; Viscount Sydney, Lord Chamberlain; Lord Stratbairn, Gold Stick in Waiting, in their State uniforms; Captain Bulkeley, and other directors and officers of the railway; while Mr. Walker, one of the Assistant-Commissioners of the Metropolitan Police, was in waiting on horseback to precede the Royal cortège on its way to Blackfriars Bridge. The 36th Middlesex Rifles, under the command of Colonel Gordon Innes, with their band playing, were stationed in front of the station, and at a quarter-past 11, when the Royal outriders and five of the Queen's carriages entered the station, the scene was extremely brilliant. Several hundreds of ladies and gentlemen were admitted to seats within the station, while vast crowds of people, many of whom had arrived from the country by the early trains, lined the route to be taken by the procession. Within two or three minutes after the train had reached the platform the Royal cortège set out for Blackfriars Bridge. Some mounted policemen went first, followed by two of the Royal outriders. A carriage and four followed, in which were Captain Greville, M.P., Groom in Waiting; the Hon. Colonel Hardinge, C.B., Second Equerry in Waiting; Colonel Marshal, Silver Stick in Waiting; and the Hon. Colonel Percy Feilding, Field Officer of Brigade in Waiting. A second carriage and four followed, containing the Hon. Emily Cathcart and the Hon. Lucy Kerr, Maids of Honour; Major-General Sir T. M. Biddulph, K.C.B., Keeper of the Privy Purse; and the Hon. General Grey, Private Secretary. In a third carriage and four were Lady Caroline Barrington, Lady Superintendent; the Marchioness of Ely, Lady in Waiting; Viscount Torrington, Lord in Waiting; and General Lord Stratbairn, G.C.B., Gold Stick in Waiting. A fourth carriage and four was occupied by the Duchess of Roxburghe, Lady of the Bedchamber; Viscount Sydney, G.C.B., Lord Chamberlain; the Marquis of Ailesbury, K.G., Master of the Horse; and the Hon. Colonel de Ros, Equerry in Waiting. Next came the first portion of the escort of the 2d Life Guards, then two of the Royal outriders, and then the Queen's carriage drawn by six horses, and followed by the rest of the escort. The horses of the five carriages were magnificent, and the

outriders, postilions, and footmen were a scarlet liveries. The carriages were open. The Princess Louisa took her seat by the side of her Majesty, and Prince Leopold and the Duchess of Roxburghe sat opposite. As the Life Guards turned the station and the cortège turned the corner, the Volunteer band played the National Anthem. The multitude outside raised a shout of welcome. Her Majesty appeared to be in excellent spirits. She was in deep mourning, and wore a miniver muff and collar. A large number of people in Whitehall and Parliament Street, and every balcony and window along the route was more than filled. In Palace Lane the Westminster boys had assembled, and gave her Majesty several rounds of hearty cheering, which she graciously acknowledged. On Westminster Bridge the cheering was enthusiastic, as was the case at every point of the route. The Royal carriages drove across the bridge. The Royal carriages drove across the bridge, where the dignitaries of the city, a number of official personages and members of the House of Commons, including Mr. Bruce, the Home Secretary, Lady Hatherley, Mrs. Gladstone, the Hon. Mr. Bengal and his two sons and several of the other political members. Her Majesty was received by the Lord Mayor, Alderman James Clarke, Law Officer in his robes of office, attended by the sword-bearer, mace-bearer; the Sheriffs, the Chairman of the House Estates Committee, and a deputation of the Committee, consisting of two aldermen and several members. The Lord Mayor, according to custom, tendered to her Majesty the sword of State. Her Majesty graciously returned as a mark of respect that it was in good and loyal custody. The Queen stopped opposite the door, when, without a word, she bowed with gracious dignity, and then the Lord Mayor read the address of the Corporation. The address was not read, as was also the written answer. The Lord Mayor then presented the Queen the mover of the address, and the engineer; and the chairman of the House Estates Committee presented her Majesty a manuscript volume, bound in pale blue, containing on one page the Royal arms, and on the other the arms of the City of London, then a page next the descriptive text, and finally a page with the Blackfriars Bridge with the arms of the 12 companies. This volume her Majesty was pleased to accept, and the Queen then declared, in an audible voice, that the Bridge was open to traffic. The Lord Mayor and his attendants, Aldermen and Councillors, then returned to the carriages, and a procession was formed from the friars to the Holborn Viaduct, the Queen bringing up the rear. All along the route the streets were enormous, and the houses were decorated with mottoes, wreaths of evergreens, and window curtains. The Viaduct itself was lined on either side with covered galleries of such ample dimensions as to accommodate comfortably the thousands whom invitations had been issued by the Corporation. The galleries were arranged under canopies, decorated, and were so liberally set in scarlet cloth that something like two miles of scarlet were used in and near the Viaduct. A route the Queen was received with a shower of ringing cheers. On arriving at the platform in the centre of the Viaduct, the Lord Mayor presented to her Majesty Mr. Deputy Fry, the Mayor of the Corporation who had been most active in the motion of the Holborn Valley Improvement Bill. In turn, presented the engineer, Mr. Hayward. Deputy Fry then offered for her Majesty a large volume, containing a record of the Holborn Valley Improvements, which her Majesty handed to the Home Secretary. The Lord Mayor and other civic dignitaries then retired to the side of the Queen, who drove rapidly through Holborn Street to Regent Circus, where the Royal carriage turned up Langham Place to Cavendish Street, proceeded thence by Wigmore Street and Leinster Street to Edgware Road, and then by Somers Place and London Street to Pall Mall. Almost immediately after the Queen's departure through Holborn on her return, a smart sleet fell, but it only lasted a few minutes. Her Majesty reached Paddington at 12.15 P.M., and arrived safely at Windsor at 1.15 before 2 o'clock. In the evening the Lord Mayor and the Lady Mayoress entertained a large company at the Mansion House in honour of the occasion.

at the Mansion House, Alderman J. the retiring Lord Mayor, officially that her Majesty had been pleased to him the honour of a baronetcy, and had Grey to inform him that she had a heartier welcome, and that she meantime, in a private way, to express to the citizens of London. He from the Home Secretary the

received the Queen's commands to the deep gratification in which the Blackfriars Bridge and Holborn last, afforded her Majesty, and the Queen felt with the arrangements Her Majesty specially commands me she was with the manifestations of which she was greeted by the vast with her progress through the metro- the arrangements had been planned, and ceremony was conducted, her Majesty was largely due to the kindly, co-opera- of all classes of her loyal and loving is most kindly to acknowledge by the Queen to convey her best thanks to all the authorities concerned for the care the ceremony as little fatiguing as possible.

ANNIVERSARY OF THE PRINCE OF WALES.—Tuesday the 25th anniversary of the birth of the Prince the Royal standard was hoisted on the Government offices in the metropolis; and were fired at Woolwich, Windsor, and at illuminated, and the Royal tradesmen their houses, and afterwards dined to the number of 250, at Willis's Rooms. The was graced by the usual present of venison sent of his Royal Highness.

MAYOR'S DAY.—On Monday at Guildhall the Lord Mayor Elect, took the usual was installed in his new office, and received to Westminister. On Tuesday his lord- the Lord Mayor's dinner took place as usual and was attended by most of the speakers were the Prime Minister, the Lord the Chancellor of the Exchequer, the Home Mr Gladstone, in returning thanks for of Her Majesty's Ministers, spoke as of the state of Ireland and on the foreign

and comfort to think that in this island, the whole of us are natives, but one sentiment with respect to the Sovereign, the laws, and the country. But let us cross the Channel with which we have been so long united and legislative bonds, and to which we are bound the most sacred obligations, and how melancholy it is to face of this great assemblage, in the face of those of foreign countries whose commendations of been so eloquently expressed to-night, we should be to confess that in Ireland, which we have governed several hundred years, over which we have exercised at period almost an unbounded power, we have not yet the very first condition of a civilised and well-con- community, and have not yet brought the people's to harmony with our laws and institutions. That is the fact, which leads me to feel warranted that all Governments must rely on your and beg your forbearance, we must above to you this requisition. We have been called to with that important crisis in the affairs that crisis in which the minds of the people of now addressed more seriously than perhaps it we are towards dealing with that problem, and and resolute endeavours to see whether it may our power to put an end to that which has the brain, the speck on the fair fame of this the sight of the world for so many generations. In must not disguise it—we perceive a state of ally diseased, a people of noble capacity, of quick whose heart, notwithstanding, in too many not beat with that warm and lively attachment to the other united country or to the name and voice of law which we so familiarly and so gladly recog- the side of the Channel. Now, painful as it is to I think if Englishmen have a merit, it is that to hide what is faulty in their condition themselves or others—painful as it is to confess it, to confess that even this very year has been Ireland by a sad augmentation of those ages which, occurring as they do in a rarely free from a general tendency to a painful notoriety, and strike at the heart a deadly chill. What may be the causes of it might be premature and it would say, but one thing I know,—and I would that to the minds of those who are connected it—let not those who perpetrate them that is the path by which they are to attain to for the removal of grievances. On the one who lifts his hand to harm his neighbour at this moment is not only, as he always was, before God and man, but he is, before all things, the enemy of the best interests of his and thankful to be cheered on by you must feel to be a noble task, while we do not to its due performance,—namely, the to this country that strength and unity portion of the community it already possesses, have still to deplore, in considerable part, a dread and melancholy exception. For and labour, encouraged and cheered by the gene- we have received at the hands of our fellow- such is our task at home, and one word I must law abroad, for it is among the most interesting of this extraordinary age that the heart of the in all portions of the world acknowledges mutual quicker and more powerful than has been known time—that strengthening of the tie of interest from commerce and from speedy and almost communication does not end in the creation of but constitutes on every hand a thousand ties of relations, and, though slowly, is steadily conducting process establishing in a greater degree than hereto- of brotherhood among the scattered members

of the human family and therefore it is idle to say as is sometimes said, that foreign policy is a subject of small interest to England. Impertinent interference I trust, we shall always avoid—a meddling and ambitious desire for instruction I trust we shall always forewear, but sentiments of true brotherhood to those countries with which we are united by so many friendly ties cannot be banished from our hearts, and I would not venture in the face of an assembly of Englishmen to say that the people of this country are not interested in our relations with the world from political or any favourite schemes, for the best of all reasons that we have time to prepare, but without attending to them I think we are bound on every occasion that may offer to make every effort towards removing those difficulties and allaying those disturbances which may arise in the progress of the world, and I would not think that in that that we occasion since has returned to the friends who holds the seals of the Foreign Office has had the satisfaction of receiving the liberal and hearty acknowledgments of foreign Governments for the useful contributions he has made towards the maintenance of our relations. An exception, perhaps—a partial exception I might say. It is an exception of the deepest interest I refer to our relations with the United States. But there is no occasion that I should refer to those relations in any terms except those of peace and concord. Were I tempted to depart from that friendly strain I should indeed, be admonished to judge more correctly and to speak more wisely by an event which has happened in the city in the course of the last few days. Your quick associations will out-run my allusion. You will know that I refer to the death of Mr Peabody, a man whose special benefactions—which, indeed, secure the immortality of his name—is that which he regarded as his old mother country, but which, like- wise, in a broader view, is applicable to all humanity—taught us in this commercial age, which has witnessed the construction of so many colossal fortines, at once the noblest and most needful of all lessons—namely, he has shown us how a man can be the master of his wealth instead of being its slave. And most touching it is to know, as I have learnt, that while, perhaps, some might think he had been unhappy in dying in a foreign land, yet, so were his affections divided between the land of his birth and the home of his early ancestors, that that which had been his fond wish has, indeed, been realised—that he might be buried in America, but that it might please God to ordain that he should die in England. With the country of Mr. Peabody we are not likely to quarrel. It is true, indeed, that the care and skill of a physician, animated by the purest and most upright feelings, though they have not imperilled, yet have failed to lead to a final issue—at this moment the tangled questions of law that have been in discussion between the two countries, but the very delay that has taken place, instead of being a delay tending to anger, has been a delay promoted by kindred goodwill and by the belief that the intervention of a limited time may be likely to obviate any remaining difficulty. I speak with confidence in anticipating that that which the whole world would view with horror and amazement—viz. a partial strife between England and America—is above all things the most unlikely to grow out of this state of affairs. My confidence is, in the first place, in the sentiment which I know animates the Government of the United States as well as our own, it is in the sentiment which we believe to pervade the mind of the people of these two great countries, and permit me to add I have yet another source of confidence, connected with some of those changes which we are witnessing in our age in which we live. I mean this change in particular, that as in every country there has long been, and especially in the last several centuries, but only a free of law, and a of opinion that has led to a certain extent with the augmenting intercourse of nations there is now growing up what I may term an international opinion, a standard of international conduct higher than the standard which a particular nation sets up for itself, and to which it becomes more and more from year to year as we live necessary that each country should conform consistently with the rights and duties of the whole mass of the civilised community of the world. I know of no change, not even in connection with railways and telegraphs—I know of no change in the whole of the material and moral developments which we have witnessed in our time more beneficial to mankind than that moral authority of all nations over each nation, and depend upon it there is no greater guarantee for the permanent good order of society. Before sitting down I have to discharge myself of an office which has been committed by her Majesty to my unworthy hands. All your memories are full of the great celebration of Saturday, and I have received a special commission from the Queen to state to the Lord Mayor and the citizens of London that no words could be too strong to convey to their minds the gratification which she derived from the magnificent reception—as she has been pleased to term it—that you gave to her on the occasion of her visit to this ancient and loyal city.

MARRIAGES IN WESTMINSTER ABBEY.—On Monday the double wedding of the Ladies Albertina and Maud Hamilton, daughters of the Duke of Hamilton, to the Marquises of Blandford and Lansdowne took place in Westminster Abbey. The friends of the brides and bridesgrooms were admitted to the choir, transepts, and nave by tickets; and by 11 o'clock the building was completely filled, from the sacristium to the organ loft, and each side of the nave was lined with rows of well-dressed spectators. The Prince and Princess of Cambridge, and Prince and Princess Christian, the Duke of Cambridge, and Prince Edward of Saxe-Weimar were among the earliest arrivals. Shortly before half-past 11 the brides arrived at the west door of the Abbey and walked up the nave, led, the eldest by her father, the Duke of Abercorn, the youngest by her brother, the Marquis of Hamilton, and accompanied each by six bridesmaids. One set of bridesmaids wore blue silk skirts and white tunics, with blue sashes and blue bonnets; and the other set wore dresses exactly the counterpart of the former, only pink was substituted for blue. The bridesmaids were the Ladies Anne, Sarah, and Georgiana Churchill, sisters of Lord Blandford; Lady Georgiana Hamilton, sister of the brides, the Ladies Catherine and Beatrice Lambton, nieces of the brides; the Ladies Florence and Beatrice Anson, daughters of Lord Lichfield, and grand-daughters of the Duke of Abercorn; Lady Emily Fitzmaurice, sister of Lord Lansdowne, the Ladies Victoria and Albertha Edgcombe; and Miss Winifred Howard, cousin of Lord Lansdowne. The brides themselves were plainly but tastefully attired in high white satin dresses with long trains, and with Irish lace over them; and each wore three rows of pearls. The first part of the service was performed in the body of the chancel by the Rev. Lord Wriothersley Russell and the Rev. Lord John Thynne, assisted by Canon Nepean, the Precentor, the Rev. S. Flood Jones, the Rev. F. Harford, and the rest of the cathedral

body. The latter portion was read at the altar, Mr. Flood Jones and the choir chanting the verses and responses, and the bridal party, including the members of the Royal family and the immediate relatives of the brides and bridesgrooms, being accommodated with seats inside the altar rails. At the conclusion of the ceremony the bridal party repaired to the Jerusalem Chamber, where the registry of the marriage was duly signed and attested by the Prince and Princess of Wales, Prince George, the Duke of Marlborough and Abercorn, and the Dowager Lady Lansdowne. Among the company in the Abbey in addition to the Royal and other distinguished personages already mentioned, there were present Earl Granville, Mr. Disraeli and Lady Beaconsfield, the Earl of Mount Edgcombe, Lord and Lady Claude Hamilton, Lord and Lady Tankerville, Lord Henry Lennox, Lord Newry, Colonel Townshend, Lord and Lady A. Churchill, Lord and Lady G. Paget, the Duke and Duchess of Buccleuch, Lord and Lady Dalkeith, the Turkish Ambassador and his daughters, Lord Carrington, Colonel and Mrs. Gordon, Lady Russell, the Hon. Flora Macdonald, Lord and Lady Ailesbury, the Nawab of Bengal and his son, Lord and Lady Bath, the Duchess of Marlborough, Lord and Lady Walden, Lord and Lady Feversham, Lord Strathairn, Sir William and Lady Knollys, Lord and Lady Sydney, Lord and Lady Hamilton, the Duke and Duchess of Marlborough, the Dowager Lady Lansdowne, Lord and Lady Claud Hamilton, Sir Henry Holland, Mr. H. W. Fisher, the Rev. Dr Butler and Mrs. Butler, Messrs. Howard, Messrs. Curzon, the Hon. Mr Byng, Lord and Lady Lichfield, Lord and Lady Darham, Lord George Hamilton, Lord C. J. Hamilton, Admiral Baulie Hamilton, &c. On the return of the wedding party to the residence of the Duke and Duchess of Abercorn, Chesterfield House, South Audley Street, a sumptuous breakfast was laid out at which the Prince and Princess of Wales, the Duke of Cambridge, Prince and Princess Christian, and between 200 and 300 guests, sat down, and in the course of the afternoon the newly-married pairs drove off in travelling carriages for Bowood and Blenheim respectively, amid the cheers of a large crowd, which filled the southern end of South Audley Street and a great part of Great Stanhope Street also.

OPENING OF THE HOLBORN VIADUCT.—On Monday morning, at eight o'clock, the Holborn Viaduct was opened to the public for both foot passengers and carriage traffic, the former having had access given them on Saturday evening. The fine roadway had not been open many minutes, when cabs, carts, and wag-gons, poured across it from either end. On Tuesday something like consternation was caused by the discovery that no less than six out of the 12 massive columns of red granite which support the bridge over Farringdon Street had fissures from 9 to 12 inches in length at their base, and that a catastrophe, if not averted, was certainly possible. Six of these columns support the structure at either side, and divide the footpath from the roadway. The two next Fleet Street, on the west, or Holborn end, show fissures nearly from top to bottom. The lower portion of the second column is so dangerously split in two places that it is evidently only a question of time before the superincumbent weight forces out the lesser half and the whole mass comes to the ground. On the opposite side of the way four columns are affected, those at the ends only remaining intact. The smaller blocks on which the chief blocks rest have alone suffered as yet, but they have been all broken in two by the pressure upon them. The cracks are very extensive, with edges sharply defined, and run irregularly from top to bottom. The cause of this misfortune is that the granite is deficient in the density requisite to enable it to resist not only the weight of the superincumbent structure, but the vibration of the enormous traffic. In places the substance appears to be almost spongy, and where the cracks appear pieces can be chipped away almost with the nail. It is stated that one of the columns split a week before the opening of the Viaduct. On Thursday a report was made to the Corporation Improvement Committee on the subject, and Mr. Haywood, the engineer, stated that, in his opinion, the structure is perfectly safe for traffic; but suggested that three eminent engineers should be requested to examine and report on the matter. The committee adopted the suggestion, and nominated Messrs. Bidder, Clarke, and Harrison to examine the bridge forthwith.

OPENING OF NEW BLACKFRIARS BRIDGE.—On Tuesday morning, at 6 o'clock, the new bridge at Blackfriars was thrown open to the public for passenger and carriage traffic. During the morning the crowds on the new bridge examining it became so dense that the temporary structure had to be partially used to relieve the traffic.

FUNERAL OF MR. PEABODY.—The remains of Mr. George Peabody were removed yesterday from No. 80, Eaton Square—the residence of Sir Curtis Lampson, Bart.—to Westminster Abbey, where a funeral service was performed at 1 o'clock, in the presence of a great concourse of persons, including the Right Hon. W. E. Gladstone, Earls Clarendon and Granville, the Lord Mayor and Sheriffs, the Dean of St. Paul's, and several members of Parliament. The hearse was followed by a long line of carriages, including those of the Queen, the Prince of Wales, the Lord Mayor, the Sheriffs and Under-Sheriffs, Miss Burdett Coutts, the American Minister, Lady Franklin, the Duchess of Somerset, the Marquis Townshend, &c. The route taken was through Hobart Place, Grosvenor Gardens, and Victoria Street to Westminster Abbey. The service was performed by the Sub-Dean. To-morrow afternoon the Bishop of London will preach a sermon in the Abbey, in honour of Mr. Peabody's memory. The body will shortly be removed to America, to be buried at Danvers, in the grave of his

mother; and in order to mark the national sense of his noble benefactions, and to pay a fitting tribute to his memory, his remains will be conveyed to America in one of her Majesty's ships of war. For that purpose the Inconstant frigate is being prepared with all dispatch, and a fitting mausoleum is being erected on board. Mr. Peabody's will was made in New York in September last, and the executors named are Sir Curtis Lampson, Bart., and Mr. Charles Reed, M.P. for Hackney.

THE NEW CHIEF COMMISSIONER OF WORKS.—At his re-election for the Tower Hamlets on Monday, Mr. Ayrton spoke as follows of his new office of Chief Commissioner of Works:—

"It was alleged that he had accepted an office the duties of which he was not qualified to perform. But let him ask, in the first place, what those critics thought of his duties? There was a certain sort of people in this country who had been educated at our public schools and Universities, and who, instead of looking at matters as they stood in the present day, began by looking back to see what was done 200 or 300 years ago in Greece or Rome; and unless things were now managed as was the case in those remote times they thought them all wrong. These people might be said to live in a world of their own; and, having discovered that a certain officer performed the functions of an office about 200 years ago, they said he ought to perform the like functions now in this metropolis, and that he was not qualified to do so. He did not believe that any sensible body of Englishmen who did not belong to that school would agree with that; and he might tell them that the duties of the office did not in the least resemble those discharged many centuries ago by the Roman *ediles*. His duties were, in fact, of a very simple kind. But there were people very fond of what was called art, and some of them were very artful people, too, judging from the way in which they wrote anonymously in the newspapers; and they said he ought to be an architect, a surveyor, a sculptor, a painter, a gardener—whether a flower, an ornamental, or a market gardener it did not much matter, also a builder, and anything else they liked to propose. Well, he was bound to say he did not understand and had not been brought up to any of those callings. If the member of the House of Commons who accepted this office ought to be of those callings, it was clear he ought to be the best man in his profession; and unless they got in that House the best architects, the best sculptors, and so on, the only result would be that they would get an inferior architect and sculptor to look after all the architects and sculptors in the country; and so, instead of being made better, matters would be made much worse. The idea of those persons, therefore, was founded on an entire mistake. He was appointed to represent the Crown and the public, who had to pay the expenses of the Crown, as the employer of architects and other professional men. It was not his business to rank himself with those whom the Crown employed, but to take care that the public were well served, and that if they had to pay taxes they got full value for their money. It was his duty to look after those professional persons—not to be one of them. What he had to do was to see that people in office did not make too many demands on the public purse for public works and buildings; above all, to take care that people who had fancies did not indulge them at the public expense, and that nothing was taken out of the national taxes which he did not believe was absolutely necessary. Well, if he had any particular qualification for performing that duty, he had to some extent acquired it in the previous office he had held as Secretary of the Treasury, under the first Lord of that department, where it had been his duty to do very much the same sort of thing for many great departments of the Government. And a very unpleasant business they might conceive it was, because every office would be happy to spend money if they could get it, and there was always a disposition, when one man had to spend and another to supply the money, for the man who spent to put all the responsibility on the man who supplied it. When at the Treasury it was his duty to receive many applications to spend public money, to examine and see whether the outlay was necessary, and when he thought it was not to advise and urge the Government to refuse such applications. Therefore, the harder he worked at the Treasury his labours had this curious result, that the less of them was seen by the public, because when he was most successful in preventing expenditure the public saw nothing at all of what was done, and it was only when he was unsuccessful and when there was expenditure that the public knew what was done, through having to pay for it. Well, that was the sort of training he had had since the present Government came into office; and he thought they would agree that that was the right view to take of his position. Taken as Ministers must be from the ranks of the House of Commons, nothing, then, could be more absurd than to say that no one should hold a great political office unless he belonged to the particular profession with which it had to do. If no one could be Secretary of State for War except a general officer of the army or a manufacturer of great guns—if no one could be at the head of the Admiralty but an old admiral or a builder of iron ships, the result would be no end of expenditure upon soldiers or big guns in the one case, and upon sailors or big ships in the other. The object of the Government was to control those naval and military services, to represent the Crown and the taxpayers in the administration of these departments, to see that they did not cost more than was absolutely necessary; and, above all, that they did not swell themselves, upon one pretence and another, so as to entail undue burdens on the people. All the gentlemen selected by the present Prime Minister as civil heads of the army and navy were men possessing those qualifications which would enable them to keep down the expenditure that had grown up under the late Government; and the effect of bringing to bear on that work the resolution of men trained in political and civil life was, that in the very first year of their administration they had diminished the expenditure by more than two millions sterling, and had considerably reduced the public taxation."

THE TEMPLE CHURCH.—On Sunday morning the Rev. Dr. Vaughan, Master of the Temple, preached his first sermon in the Temple Church, and will continue to preach regularly throughout the year. He took for his text the words of St. Paul—"Who is sufficient for these things?"—and entered upon a thoughtful review of the present state of the Church. There was a very large attendance, many of the judges and benchers occupying seats. Dr. Vaughan has not appointed an assistant preacher, and the afternoon sermons will be preached by the Rev. Alfred Ainger, M.A., who was some time since elected by the benchers.

THE HIGH TIDES.—There was another high tide on the river on Saturday. It was high water at London Bridge about half-past 3, but fully a quarter of an hour before that time the buttresses of the bridges were covered, and the water rose above the level of the pavement on the Embankment. In consequence, however, of the preparations made along the banks of the

river after the high tide of the preceding Wednesday, very little water found its way into the docks and warehouses, and the inhabitants of houses near the river at Nine Elms, Battersea, Chelsea, and Wandsworth were able to resist the force of the rise by the construction of small dams. A large portion of land at Chelsea, Wandsworth, and Putney was again covered with water, which, at the former place, found its way into some of the streets. In contrast with the high tide, there was a very low one on Saturday, and again on Monday. So low, indeed, was the water that some of the steamers of the Iron Boat and Citizen Companies, in endeavouring to get to the piers at Waterloo, Westminster, and Charing Cross, went aground, and were not got off till the tide turned.

THE OPEN SPACE NEAR THE MANSION HOUSE.—At the meeting of the Metropolitan Board of Works on Friday a report was presented from the Works Committee, stating that they had considered the memorial of bankers and others of the city of London, praying the Board to preserve the ground opposite the west side of the Mansion House as an open space, and recommending that the memorialists be informed that the formation of the new street from Blackfriars Bridge to the Mansion House is a duty devolving upon the Board by Act of Parliament, and that it is beyond their present authority to accede to the prayer of the memorial. The recommendation was agreed to.

THE RED JACKET.—The ship Red Jacket, belonging to Liverpool, bound from Cardiff for Bombay, and for the safety of which speculation has for some time been running high, has been spoken at sea, all well. She sailed in the middle of the heavy gales of September, and sundry wreckage and a name-board marked "Red Jacket" having been picked up off Penance, was supposed to indicate the loss of the vessel. This uncertainty brought the case into the hands of speculative underwriters, and 80 guineas premium was at length quoted to effect re-insurances upon her. Many underwriters were induced to part with lines at 50 which they had taken at five guineas. There was, however, no evidence of her loss, and her safety has now been confirmed by her having been spoken, on October 6, off the Cape de Verde Islands.

BRITISH-INDIAN TELEGRAPH EXPEDITION.—The Great Eastern steamship, having completed her coals, to the amount of 10,500 tons, at Portland, left on Saturday, at 4 P.M., on her voyage to India. She was last reported off the Bill of Portland, everything working admirably, and the ship steaming easily seven knots against the fresh north-west gale of the evening of the 6th inst. The Chiltern left the Thames on Sunday morning with another portion of the Red Sea cable, and joins the Great Eastern at Bombay.

THE ALBERT LIFE OFFICE.—The scheme of the official liquidators of the Albert Life Assurance Company to facilitate the obtaining of new policies in an old-established office has been submitted to a meeting of the representatives of the London and provincial committees of the policy-holders. A resolution was proposed by Lord William Hay, seconded by Mr. James Bird, and supported by Mr. Wyld and others, approving the scheme, and recommending its adoption by the policy-holders generally. The details will be communicated to the policy-holders in the course of a few days. The case of the company was appointed to be further heard by Vice-Chancellor James on Tuesday on the question of reconstruction, when a further adjournment was asked for on the ground that the policy-holders had not concluded their meetings on the subject. The Vice-Chancellor allowed the adjournment.

THE WORKING MEN AND THE COLONIES.—On Monday, in about a hundred different parts of the metropolis, working men solicited the signatures of passers-by to a petition to her Majesty, praying that steps may be taken to enable the out-of-work class to emigrate. The petition also opposes the policy of abandoning our colonies, and, in conclusion, prays the Queen to at once call Parliament together, to take the subject into consideration. The petition is being largely signed.

THE GOVERNMENT AND THE FENIAN PRISONERS.—The English Amnesty Committee have resolved to advise the people of Ireland, the Irish resident in the United Kingdom, and English sympathisers, to abstain from the use of tobacco while the Fenian prisoners are kept in confinement. The Committee hope by this to effect such a diminution in the revenue as will convince Mr. Lowe, whom they consider the obstacle in the Cabinet to the release of the Fenians, that the case is a serious one for his department. On Tuesday night the following order was issued by the Committee to the Irish resident in London, and was eagerly signed:—"On and after the — day of —, 1863, no tobacco in any form is to be consumed until such date as that on which all the political prisoners shall be released from custody. Issued and approved by the Amnesty Committees."

THE POOR-LAW BOARD AND THE ST. PANCRAS GUARDIANS.—On Tuesday a very important decision of the Poor-law Board with respect to the parish of St. Pancras was made known at a meeting of the guardians. A letter was read stating that the reluctance of the guardians to increase their infirmary accommodation, and the disputes connected therewith, interfered so greatly with the due administration of the relief of the poor that the Board had determined to issue, as early as practicable, an order to annex St. Pancras to the adjoining Central London Sick Asylum district. The communication contained a detached statement of the facts which had led to the adoption of this course. The letter was referred to a committee.

ST. PANCRAS WORKHOUSE INFIRMARY.—An inquest was held on Monday on the body of a costermonger who had died in the infirmary of St. Pancras Workhouse. He was in an advanced stage of consumption, and could not have recovered; but the

medical testimony proved that his death was hastened by the foul and fetid state of the ward in which he was placed. The president of the Royal College of Surgeons in London, surgeon of St. Thomas's, said in evidence that he was accustomed as he was to the hospital ward, and that he was not to be wondered at that the ventilation was stopped up; the water was not changed into, and had no ventilation except the beds were full, and nine mattresses on the floor—37 in all—that there were but 520 cubic feet of air for each patient, or about half the amount required. The Poor-law Board. The jury returned a verdict that the deceased died of consumption, and that the death was accelerated by the unwholesome atmosphere in which he was placed in the workhouse. Inquests were held on six other persons who had died in the infirmary. The jury returned verdicts to the effect that the deaths were caused by the over-crowded state of the ward, the vitiated atmosphere, and the want of ventilation. The inquests adjourned.

THE LATE CASE OF SHOOTING.—At Huddersfield Tuesday Henry James Tucker, a cartman, was charged with causing the death of a fellow workman at Huddersfield by firing a gun at him, without knowing whether it was loaded, was committed to the custody of the Clerkenwell magistrate, on the charge of manslaughter. The coroner's jury had previously returned a verdict of "Death by misadventure."

THE PUBLIC HEALTH.—The Weekly Return of the Registrar-General states that in the week ended on Saturday, Nov. 6, 1624 births were registered in London and in 13 other parts of the United Kingdom. The annual rate of increase was 28 per 1000 persons living, being 28 in London, 24 in Edinburgh, 20 in Dublin, 22 in Birmingham, 26 in Liverpool, 29 in Salford, 30 in Sheffield, 26 in Bradford, 25 in Hull, 30 in Newcastle-upon-Tyne, and 26 in Glasgow. In Paris the annual rate of increase in the same week was 25 per 1000 persons. The births of 1177 boys and 1119 girls, 2293 children, were registered during the week corresponding weeks of 10 years 1853-62. The number, corrected for increase of population, was 1772, of which 241 were from scarlet fever. The deaths registered in London during the week of the 44th week of the year, and the average number per week, corrected for increase of population, was 1772. The present return is therefore 368 above the average amount.

Provincial.

ALNWICK.—On Sunday morning the Countess Percy was safely delivered of twin daughters, who, with their mother are doing well. The Countess was attended on the occasion by Professor Sir James Spence, of Edinburgh, and by Dr. Wilson, of Alnwick. The Countess of Argyll arrived at the castle on Saturday evening, Sunday, by a singular coincidence, was the day of the Countess Percy, who on that day was her 20th year.

CARDIFF.—Vice-Chancellor James on Tuesday having had an interview with Miss Esther L., ascertained that she had become a Curator of the estate of the late Mr. L., and directed that she should remain with Mrs. L. to enable the father to test his rights by a writ of *corpus* at common law. It was stated that the intention of the father to apply for the same was mentioned by the judge, and Miss Lyons will remain with Mrs. Keep.

CARLISLE.—A new prison for the county of Cumberland has just been completed in this city at a cost of 16,000*l*.

CARMARTHEN.—An atrocious murder was committed on Thursday evening, the 4th inst., in the neighbourhood of Conwil. The victim was Miss Esther Davis, the wife of a farmer, living at a place called Blaendaed. The house is situated in a secluded part of the country near the Carmarthen railway. About half-past 8 o'clock on Thursday evening Mrs. Davies was in a room at her farm, preparing supper, when some person unknown to her through the window. The charge entered her body just below the heart, and passed out of the side. She staggered and fell, when some one in the room ran to her assistance, but she died within 20 minutes after being shot. The persons who were at the time were two servant men, a boy, and a girl, and a servant. The bullet was subsequently found in the body of the deceased. It had entered an inch and a half into the chest, and has since been extracted, and is now in the possession of the police. On the following day the marks of the murderer's feet, in stockings, were traced across two fields, but the trace was not followed. On receipt of the intelligence Captain L., superintendent of the Carmarthen district, accompanied by Sergeant Scurry, proceeded to the scene of the murder, and were engaged during the night and up to eight o'clock on the following morning in investigating the circumstances, and the sequence of some facts which came to light. The body of the husband was taken into custody, but the inquest against him is exceedingly meagre. It is, however, that the deceased, who was a young woman, being only 22 years of age, had been married only a few weeks, and that before her marriage her husband, who is a man in comfortable circumstances, was absent from the house when the murder was committed. On Monday a number of policemen

A gun was found in a turf heap, but has been found to be a toy gun. The brother of the husband, who was shot, said that his gun had been lent to the tenant, and has been found to be correct. The gun was found on Monday, when the jury returned a verdict of "Wilful Murder against some person or persons."

The funeral of the Marquis of Westmeath took place on Monday at Exceston Church. The ceremony was as private as possible. The Marquis arrived at the church at 11 o'clock, and was followed by the Earl of Winton, followed by the Earl of Winton, followed by the Earl of Winton, followed by the Earl of Winton.

On Thursday morning the barque "The Captain Prince" with wheat for the Holyhead breakwater, and the captain's wife, two of his sailors perished. Five sailors were rescued from the wreck. On Monday, at a large public meeting held in the town, a resolution was passed against the free-trade policy with a view of the Government inquiry into the far unreciprocated free trade concession of trade and pauperism, was passed.

On Wednesday night Mr. Forster addressed at the Liverpool Institute on the subject of the Endowed Schools Bill. He pointed out the need for general education, and as a result of his address a spirit of compromise had produced a spirit of compromise. He felt certain that some education Bill, and he pushed them forward in the matter. He advocated the working classes staying longer at school, and all learning French, to be taught to boys who are obliged to leave school.

Among the most recent acts of Bishop Goodrich was the inhibition of the Rev. J. P. Goodrich, the "assistant priests" St. Michael and All Angels, at Swanwick, one of the most advanced centres of worship in the south of England. The Rev. J. P. Goodrich being thus deprived of their posts, and took their parts in the Sunday last, the Rev. J. P. Goodrich was acting as subdeacon at the third service of the Holy Eucharist. The suit of the Bishop of Winchester against Mr. Goodrich, came before the Dean of Winchester. An application was made on behalf of the Rev. J. P. Goodrich to have the suit dismissed, as the Dean had decided, notice must be given to the Dean.

still connected with the tenant-right agitation. Meetings were held on Sunday in Loughal, Millstreet, Listowel, and Killeeney, where the memory of Peter Crowley, a Fenian, who was shot dead in an encounter between the military and a party of Fenians, was specially honoured by the meeting. In Dublin the rival Amnesty Association and Tenant-Right Committee had meetings on Tuesday evening. A number of men broke into the room of the latter, threw flour in their faces, declared they would have no more humbug, smashed the lamps and furniture, tore up the papers, and carried off the minute-book. At a meeting of the Corporation of Waterford on Tuesday, a letter from Mr. Galstone was read, stating in reply to the amnesty memorial transmitted to him by the Corporation, that "the Government will weigh carefully all the circumstances connected with the subject, but that he can give no pledge whatever as to the decision which may be arrived at." Assurances from the provinces state that ballads of a very dangerous nature, recommending the murder of landlords and the non-payment of rent, are being sung in the fairs and rural gatherings. Some of the singers were arrested and brought before a magistrate at Clonmel, but immediately discharged. The policemen who took them into custody, it is stated, were hosted until they took refuge in their barracks.

ABANDONMENT OF AN INTENDED DUEL.—The O'Donoghue and Mr. George Henry Moore were on the point of fighting a duel last week, in consequence of the language used by them at the recent amnesty meetings. The challenge of the former was accepted by Mr. Moore, and the place of meeting decided upon, but at the last moment the seconds induced the principals to make some concessions to each other, and their honour was satisfied.

ATTEMPTED ASSASSINATION IN TIPPERARY.—An attempt was made on Sunday evening to assassinate Mr. Thomas S. M'Adam, residing near Newport, Tipperary. It resembled in some respects the attempt upon the life of Mr. Brett, the county surveyor of Limerick. Mr. M'Adam was sitting at the fire in his parlour, when a shot was fired through the window. The bullet passed close beside him, but he escaped unhurt. On the following day he received a letter, written in confused terms, in which he was told that his ancestors were traitors, and warning him to not only sell his place, but leave the country with his family within a month, or he would be a dead man. It is impossible to say at present whether this was an agrarian or a Fenian outrage, as Mr. M'Adam was neither a landlord nor an agent. No motive can be assigned for the outrage.

ASSASSINATION IN CORK.—On Sunday night David Callaghan, a corn porter, was shot on Penrose's Quay, Cork. Four men were seen by a ship's watchman to be quarrelling, a shot was fired, and two of the men decamped. One of the remaining two then fired a second shot, and also decamped. The body was found about one hour afterwards, with two wounds in the head. The murdered man was a known Fenian, and it is supposed that he was killed for some breach of the Fenian code. At the inquest on Monday the jury returned a verdict of Wilful Murder against three persons unknown.

THREATENING A PRIEST.—The Rev. Mr. Guinty, P.P. of Moynalty, county Meath, has received a threatening letter, in consequence of having denounced the attempt on the life of Gargan, the steward of Mr. Farrell. This is such a novel feature in agrarian crime, that the rev. gentleman on Sunday called the attention of his congregation to the fact.

Scotland.

THE SCOTCH EDUCATION QUESTION.—At the dinner of the directors of the Edinburgh Philosophical Institution on Saturday evening, Lord Moncrieff (Lord Justice Clerk) made the following remarks in regard to the education question:—

"I do not think the difficulties in the way of the settlement of the education question are ecclesiastical difficulties. I believe the ecclesiastical difficulties to be mere phantoms. The religious question does not stand in the way of Scottish education; there is no such difficulty presenting itself in this country. There are no mountains in the path; there are only molehills. But a great many molehills are as bad as one mountain, or rather a great deal worse. If you find the old accustomed road that you travel full of those little risings they are apt to trip your horse. If it were a mountain you could tunnel it, or make your road round it. It was over a molehill, I think, that William III's horse stumbled and brought that great potentate to his end. We manage the mountain well enough; it is levelled—that is, a railroad carried over it; and if the molehills can only be levelled also, there is nothing to impede the career of Scottish education. I have only one mortification in leaving public life. It is not that I have not succeeded in carrying a measure of education for this country—though that, no doubt, would have been a great and glorious achievement, which I should have been proud to have had my name connected with,—it is that, with no difficulties to speak of in our way, we are going to let England get precedence of us. I am sorry that that should be the case. I trust, however, that in other hands that cause may succeed, and that after all we shall be able, not to follow, but to set the example to the sister country in the question of education."

M. PREVOST PARADOL IN EDINBURGH.—M. Prevost Paradol was a guest at the Edinburgh Philosophical Institution dinner on Saturday, and, in replying to the toast of his health, said that he was deeply moved at the concord and loyalty shown when the Queen's name was pronounced, and at the sincere emotions of joy exhibited on a telegram being read announcing the Queen's progress through London among a loyal and contented people. He never, he said, envied anything for his country so much as seeing them so united, living in freedom and prosperity, and with the honest pride of being freemen.

THE LORD PROVOST OF EDINBURGH.—Mr. Law has been unanimously elected Lord Provost of Edinburgh for the next three years.

Railways.

THE LATE ACCIDENT AT WELWYN JUNCTION.—The adjourned inquest on the three persons killed by the collision at Welwyn Junction terminated on Monday, when the jury, after deliberating for half an hour, returned a verdict that the accident resulted from the accidental shifting of the points by the pointsman when the train was going over. They added a recommendation that an independent line should be made from Hatfield to Hertford.

Obituary.

SIR EDWARD CONROY, BART., of Ashurst, near Reading, died a few days ago, in his 83rd year. He was born in 1837. He was a member of the House of Commons, and in 1854 succeeded his father, Sir John Conroy, who was created a baronet in 1837, in recognition of his services to the Duke and Duchess of Kent, of whose household he was in his later years equerry and comptroller. He is survived by his wife and three children.

SIR JAMES FRANCIS REYNOLDS, BART., died a few days since. He was born in 1807, and having been educated at Winchester, served for some time as an officer in the army. He is succeeded in the baronetcy which dates from 1787 by his brother, Henry Reynolds, Esq.

MR. THOMAS WATSON, M.P., of Manchester, died on Sunday last. He was born in 1800, and was a member of the House of Commons from 1847 to 1852. He was a member of the House of Commons from 1847 to 1852. He was a member of the House of Commons from 1847 to 1852. He was a member of the House of Commons from 1847 to 1852.

Markets.

COVENT GARDEN.—Nov. 13.
Trade has been rather more active, and stocks have considerably diminished. Good Apples and Peas being in greater request. Consignments from abroad are still ample, and pressing the usual assortment of goods at this season, largely Oranges being among them. Flowers chiefly consist of Pelargoniums, Mignonette, Fuchsias, Chrysanthemums, Primulas, Geophytes, and a few Cyclamens.

FRUIT.

Apples, p. 3 slice, 1s to 1s 6d	Melons, each, 1s 6d to 2s
Cobs, per lb., 9d to 1s	Oranges, per 100, 8s to 14s
Fishers, per lb., 6d to 9d	Peas, per bush, 2s to 3s
Grapes, per lb., 1s 6d to 2s	Pineapples, per lb., 4s to 6s
Lemons, per 100, 8s to 14s	

VEGETABLES.

Artichokes, p. doz., 3s to 6s	Lettuces, p. score, 1s to 2s
Beet, per doz., 2s 6d to 3s	Mint, per bunch, 4d to 6d

Brussels Sprouts, p. 2 slice, 1s to 1s 6d	Onions, green, per bush, 4d to 6d
Cabbages, per doz., 1s to 1s 6d	Parsley, per bunch, 2d to 4d
Carrots, p. 100, 2s to 3s 6d	Potatoes, York Regents, p. ton, 60s to 70s
Carrots, p. bunch, 4d to 6d	— Flukes, do., 8s to 12s
Cauliflowers, p. doz., 1s 6d to 3s	Scarf, per bundle, 1s to 1s 3d
Celery, p. bund., 1s to 1s 6d	Scorzouera, do., 1s to 1s 3d
Cucumbers, each, 6d to 1s	Seakale, per lb., 4s 6d
Endive, per doz., 1s 6d to 2s	Spinach, p. bush, 2s to 3s
Garlic and Shallots, per lb., 8d	Radishes, p. doz., 1s to 1s 6d
Herbs, per bunch, 2d to 4d	Tomatoes, per doz., 9d to 1s 6d
Horse Radish, p. bund., 2s to 5s	Turnips, per bunch, 4d to 6d
Leeks, per bunch, 2d to 4d	

POTATOS.—SOUTHWARK, Monday, Nov. 8.
During the past week the arrivals coastwise and by rail have been more abundant, and the quality of the samples very various. Trade is dull, and prices declining. The following are this day's quotations:—York Regents, per ton, 70s. to 90s.; Kent and Essex do., 60s. to 85s.; Lincolnshire do., 60s. to 85s.; East Lothian do., 70s. to 100s.; Perth, Forfar, and Fife do., 70s. to 75s.; French and Belgian Whites, 60s. to 70s.

ENGLISH WOOL.
The market for English Wools has maintained the same staidly but quiet tone which has characterised it of late. In Colonial descriptions, the sales which opened on the 11th inst. have established a further improvement of about 1d. per lb. on the last August series, making an average recovery of about 15 per cent. on the lowest period in May last.

CURRENT PRICES OF ENGLISH WOOL, per lb.—s. d.

FLEECES —Southdown hoggets	1 1 to 1 2
Half-bred ditto	1 2 to 1 2 1/2
Kent Fleeces	1 3 to 1 4

Straw 30 34	Inferior do. 85 95

METROPOLITAN CATTLE MARKET.
MONDAY, NOV. 8.
The supply of Beasts is much shorter than on Monday last. Prices are rather higher for all kinds, but trade is not brisk. There are a few more Sheep than last week; trade is very dull; choicest qualities are, however, rather dearer. There are very few Calves on offer; they are readily disposed of at higher rates. Our foreign supply consists of 1967 Beasts,

Ireland.

CHURCH.—The General Synod of the Diocese of Down, Connor, and Dromore was held on Wednesday, under the presidency of the Bishop of Down, for the purpose of electing the members of the diocese, for the purpose of electing the members of the diocese, for the purpose of electing the members of the diocese.

MEETINGS.—The holding of amnesty meetings in the South with increased instances these demonstrations are

3920 Sheep, and 33 Calves; from Scotland there are 58 Beasts, from Ireland, 350; and 1580 from the Midland and Northern Counties.

s. d. s. d.	s. d. s. d.
Best Scots, Herefords, &c. 5 4 to 5 8	Best Long-wools 5 4 to 5 6
Best Shorthorns 5 2 — 5 6	Do. Shorn
2d quality Beasts 3 4 — 4 4	Ewes & 2d quality 4 4 — 4 10
Best Downs and Half-breds .. 5 6 — 5 8	Do Shorn
Do. Shorn	Lambs
Beasts, 3961; Sheep and Lambs, 16,210; Calves, 47; Pigs, 125	Calves 4 0 — 5 8
	Pigs 4 0 — 6 4

THURSDAY, NOV. 11

The number of Beasts is considerably larger than on Thursday last, but the dead markets being clearer, trade is active, and Monday's quotations are well supported. Sheep are rather more plentiful, yet they are freely disposed of at fully late rates. Choice Calves are scarce and dearer. Our foreign supply consists of 290 Beasts, 1010 Sheep, 231 Calves, and 5 Pigs.

s. d. s. d.	s. d. s. d.
Best Scots, Herefords, &c. 5 4 to 5 8	Best Long-wools 5 4 to 5 6
Best Shorthorns 5 2 — 5 6	Do. Shorn

Best Downs and Half-breds .. 5 6 — 5 8	Do Shorn
Do. Shorn	Lambs
Beasts, 1133; Sheep and Lambs, 5000; Calves, 270; Pigs, 55.	Calves 4 0 — 6 0
	Pigs 4 0 — 6 4

METROPOLITAN MEAT MARKET.—Nov. 13.

Best Fresh Butter 18s. per dozen lb.
 Second do. do. 16s.
 Small Pork, 5s. 4d. to 6s. 0d.; Large Pork, 4s. 8d. to 5s. 4d. per 8 lb.

MARK LANE.—MONDAY, NOV. 8.

There was a moderate supply of Wheat from Essex and Kent to this morning's market, the best samples of which were sold at the rates of this day so'night, but inferior qualities were 1s. per qr. cheaper. There was a fair attendance; foreign Wheat met with a limited inquiry only, and to effect sales it was necessary to submit to a decline of 1s. per qr. Finest malting Barley brought last week's quotations, but secondary qualities were 1s. per qr. cheaper. Beans and Peas were unchanged in value. The Oat trade was dull, and sales could only be effected at a decline of 6d. per qr. For Flour there was very little demand, and prices were rather cheaper.

FRIDAY, NOV. 12.

Since the 5th inst we have had fine weather, but the temperature has gradually gone below the freezing point. A continuation of large foreign supplies of Wheat and Flour during the past week, considerably in excess of the consumptive demand, has pressed heavily upon the markets of the kingdom, causing a slow trade, and, where sales were forced, a further decline of 1s. to 2s. per qr. on Wheat, both English and foreign. Prices of spring corn of all descriptions have also had a downward tendency, and we must reduce the quotations 6d. to 1s. per qr. generally. Flour was much neglected, and fully 1s. per sack and barrel lower. Since Friday last 59 grain and seed laden vessels arrived off the coast, of which, with those left over from the preceding week, there remained for sale last night 33 cargoes. The floating trade continues without animation, and prices were against sellers. Arrived Wheat has receded fully 1s. per qr. Maize closed steady at a slight reduction. Barley—none off the coast; and only one cargo of Rye changed hands at late rates. There is no disposition to enter into transactions for forward shipment.

The arrivals of English grain this week are very small, but good of foreign. There was a thin attendance at this morning's market. English Wheat brought Monday's quotations. For foreign there was but a poor demand, and prices were unchanged. Spring corn was firm at late rates.

LIVERPOOL, Nov. 9.—We had a good attendance at our market to day, but the transactions in Wheat were of a very limited nature, and sales were only effected at a decline of 2d. per cental for all descriptions on the rates of Friday last. Flour extremely dull, and about 6d. to 1s. per sack and 6d. per barrel easier than last market day. Indian Corn dull, and last Friday's prices were barely maintained. Oats and Oatmeal nominal. Egyptian Beans in small request.

SEED MARKET.

Our markets have been very thinly attended during the past week, and the amount of business transacted has been exceedingly limited; indeed, as is usual at this time of the year, the agricultural seed trade is now almost quite inactive. There has been some speculation in white Clover, and a fair quantity of seed has recently changed hands; other sorts,

however, receive at present no attention. Hemp seed is in short supply, and easily realises high rates; prices in Holland are rapidly advancing. Canary seed is without change in value. Feeding Linseed, on account of the cold weather, meets with a brisk demand. The Rape seed trade is firm. There has been an improved inquiry during the week for winter Taras; they can now be bought in our market at from 9s. to 10s. per bushel. New Haricot Beans are now offering.

HOPS.—BOROUGH MARKET, NOV. 12

Messrs Pattenden & Smith report the market somewhat quieter though firm, holders in all instances standing out for full values. Continental markets are somewhat higher, the general supply being everywhere remarkably limited.

To Gardeners.

WANTED, by the Managers of the Metropolitan Asylum District, for the ASYLUM at Leavesden, near Watford, a PERSON who thoroughly understands the Cropping and Cultivation of a Kitchen Garden (about 7 acres in extent). The Person to be appointed, whose age must not exceed 40 years, will be required to enter upon his duties forthwith. governors of this hospital, convened by the Prince of Wales, as President, was held on Monday, the 14th inst. A statement by the treasurer, Mr. White, of certain charges which have been made in the management of the institution, by some of the governors. The Prince presided, and there were present the governors, and the Rev. Mr. White, the treasurer. His Royal Highness, the Prince of Wales, said that as certain charges had been made in the newspapers against the management of the hospital, he had thought it would be a general court, in order to give Mr. White, the treasurer, an opportunity of making a statement, which he trusted would meet all the charges that had been made against the management of the institution. Mr. White then entered into a detailed account of the affairs of the hospital, and stated that the diet of the patients in St. Bartholomew's was superior to that of the London and provincial hospitals with which it had been compared, and that the daily average of beds in occupation, was second to none. As to the mode in which the expenses of the hospital had been expended, he read a list of the improvements made, which were referred to him by the whole medical staff, and by 18 physicians and surgeons, declaring that they considered it their duty to bear witness to the number and importance of the improvements made during the treasurer's tenure of office. These were improvements in the surgery and dispensary, in the wards appropriated to women, in the operation theatre, in the conversion of the hospital square into a place fit for open-air exercise, and in several other departments. By these improvements, they added, the hospital has been made at least equal to any other in the kingdom, both as an institution for relieving the sick poor, and as a school of medical science. Mr. White concluded his statement by the following resolution:—

Resolved, that the house committee to inquire and report to the next meeting—1. What measures should be adopted for the purpose of providing better sleeping quarters for the nurses. 2. Whether it is expedient to take what steps, in order to diminish the labour of the nurses, and to afford them longer periods of rest. 3. Whether any measures lately made for the purpose of securing the relief of the casual patients are sufficient, and if not, what further provision should be made for the object in view. 4. What course can be adopted for the purpose of promoting a more efficient institution in the country for the patients of the hospital.

Mr. Englewood seconded the motion. After some remarks by Alderman Sir W. Rose, Alderman Sidney, Alderman Sir S. Waterlow, and other gentlemen, the resolution was carried unanimously. Mr. William Helps moved the hearty thanks of the meeting to Mr. White for the fidelity and zeal with which he had discharged his duties during the 15 years of his treasurer'ship, and for his unabated confidence in his management. Mr. Englewood seconded the resolution, which was carried unanimously. On the motion of Sir Benjamin Philips, seconded by Mr. Charles Reed, M.P., a vote of thanks was given to the Prince of Wales for taking the chair was carried unanimously. His Royal Highness, in acknowledging the resolution, said that he was very glad to have the statement of the treasurer, and congratulated him on the successful way in which he had met the charges that had been brought against him. As the meeting were all deeply interested in the welfare of the hospital, he hoped they would forgive him for venturing to suggest that if they would come there oftener it would be the better for all parties, and they would be more conversant with the details of the management, and would thus give a greater support to the treasurer.

WINCHESTER PLAY.—The *Trinummus* of Plautus will be performed by the Queen's scholars in the theatre on the evenings of Thursday, December 9; Friday, December 11; and Thursday, December 16.

THE POOR-LAW BOARD ON CHARITABLE ORGANIZATION.—The increase of out-door poor in the metropolis has become so alarming that the Poor-law Board have thought it advisable to issue an important circular with respect to the assistance given by charitable organizations. The object of the Board is to obtain a better understanding between the guardians and the public, so that the benevolence of the latter may not be misapplied to the relief which the Poor-law renders legal. The document concludes as follows:—

It is to be considered by what means such an understanding can be brought about. The first point is that there should be every opportunity for every agency, official or voluntary, engaged in relieving the poor, to know fully and in detail the work performed by all similarly engaged. The lists of the relieving officers would form the basis for the necessary information. No funds are at the disposal of the Poor-law Board with which they could employ a staff and provide offices for organizing a general system of metropolitan relief. Other means must, therefore, be sought for providing that a public registering office should be established in every large district, where the names of all persons in receipt of parochial relief should be kept of all persons in receipt of parochial relief, with such particulars attached as might guide others in their inquiries. The clergy of all denominations, and the representatives of all the charities in the neighbourhood, should be invited to send in their lists to such offices, and to make themselves acquainted with the other names deposited there, by which means an accurate and complete reference book might be framed which would contain the necessary information about almost every person who had once received relief, either parochial or charitable. In order to give any sufficient legal power in the Poor-law Board to carry out this plan, the following measures are proposed:—1. To authorize the guardians to employ any reasonable remuneration for extra work to be done by the guardians or their agents, or by any other persons, in carrying out this plan. 2. To instruct their inspectors to facilitate the communication between the official and private agencies, where such communication may be of any service, and to assist in systematic relief operations in various parts of the

metropolis. It is evident that the suggestion made may be adopted in all those instances where the relief may be prepared to adopt them, without waiting for the approval of any central authority, which may be less desirable in the execution. The successful working of the plan in even a few of the largest and most pauperized districts would in itself be of great value, and undoubtedly secure a similar organization throughout the metropolis. When the means of communication are established, it might be possible to organize a system of relief, which the guardians might, with advantage, employ to observe the names of all persons in receipt of parochial relief, and to give money or food to those in receipt of parochial relief, upon the understanding that these gifts should be taken into account for the purpose of curtailing the ordinary relief. 3. They might apply to the relieving officer on behalf of all such totally destitute persons, and to the relieving officer if full within the sphere of the relieving officer, and when property is held, when the relieving officer is applied to for relief, and are bound to refuse it, because the applicants are not actually destitute in the strict sense of the term, they might pass on the names and addresses to the charitable agencies where they think the cases are likely to fall within the class which the charity undertakes to assist. It will, of course, be understood that the Poor-law Board have no power in this matter to act beyond granting the necessary authority for the expenditure of money, or for the appointment of relieving officers as described above. They can only invite the various charitable agencies and the boards of guardians to consider the suggestions which they have made. In order to give effect to the suggestions in the east end of London from the understanding established between the guardians on the one hand and the representatives of the charities on the other, with the co-operation of Mr. Selator Booth, then Secretary of the Poor-law Board, and Mr. Corbett, Poor-law inspector. At the time of the cotton famine the Poor-law authorities and the administrators of charities also worked together with great success. These precedents justify the belief that great benefits would result to the metropolis if a cordial understanding could be arrived at and arrangements made between all parties engaged in relieving the poor, based on practical and systematic rules in conformity with the general plan sketched in this minute.

LONDON BRIDGE.—The effect of closing the carriage-way of London Bridge last week, for the purpose of having it repaved, has caused such an excessive traffic over Southwark Bridge that the police authorities have issued an order directing that all vehicles from the Surrey side, bound for parts of the Middlesex side west of Blackfriars, shall cross the river by Blackfriars Bridge. The routes of omnibuses also have been altered, and some of them running south of the Thames now finish their journey on that side of the river, instead of proceeding, as formerly, to Cornhill.

WINTER GARDEN AND THEATRE IN LEICESTER SQUARE.—The site where Saville House stood, in Leicester Square, previous to the recent fire, has been secured for a winter garden and theatre of huge proportions. The whole block of buildings has been taken, and a public company is in course of formation, the shares to be 1*l.* each, not less than 25*l.* to be taken up. The auditorium of the new theatre will seat 3000 persons, and the stage will be larger than Drury Lane. A covered facade in front of the house is also contemplated, calculated to shelter 1000 people from the weather. The promoters of this company have secured a place in Isleworth for the supply of the plants and flowers.

WOOLWICH DOCKYARD.—Mr. Childers, the First Lord of the Admiralty, has requested Mr. Tite, M.P., to advise him in regard to the division of Woolwich Dockyard into plots, preparatory to the property being offered for sale by the Government.

DEPTFORD DOCKYARD.—The Market Committee of the City of London have recently inspected this dockyard with a view of considering its capabilities as a substitute for Billingsgate. The committee, who were conducted over the establishment by Captain Eardley Wilmot, the Superintendent, made a minute inspection, and fully discussed the advantages and disadvantages of the yard in reference to the contemplated change.

THE POOR-LAW BOARD AND THE ST. PANCRAS GUARDIANS.—A crowded meeting of the St. Pancras guardians was held on Monday, at which were present, among others, Sir William Bodkin, the Deputy Judge, Sir Sydney Waterlow, Mr. Wyatt, Mr. Wedgwood, Mr. Bodkin, jun., and Mr. Corbett, the Poor-law inspector. Letters were read from the Poor-law Board refusing to delay the proceedings regarding the sick and long, requiring the guardians to get ready without delay wards of the new Highgate Infirmary to accommodate 170 sick, a task which could be accomplished, the Board said, in a fortnight. As to the reduction of the numbers of out-door sick needing infirmary accommodation, by calling upon the relieving-officers to treat the patients as far as possible in their own houses, as the guardians had ordered, the Poor-law Board did not think there would be any appreciable reduction in this course, and, besides, it must show that the guardians rested on the supposition that the parish officers hitherto had been relieving fewer sick cases in the patients' houses than might properly have been so dealt with, and that the patients had been sent in preference to the infirmary. The Board doubted that this had really been the fact. The Board refused to permit the payment of any fee to a body of medical men who might examine and report on the infirmary, as the guardians had suggested in a resolution, for the Poor-law Board knew of no case in which they "could be relieved of their duty of determining, on their own responsibility, whether the workhouse infirmaries are fit for their purpose, and whether the class of patients can be best treated in the various wards." There was less occasion for the guardians acting upon this resolution, "as the question of the necessity for additional accommodation for the sick has long ago been decided upon, and its practical solution has been delayed by the noncompletion of the building at Highgate." "Gentlemen of the highest medical eminence were members of the Cubic Space Committee, and the Board would not think it right to diminish their requirements in consequence of private professional

opinions given in a particular case by authorities called in by the guardians." The Poor-law Board also directed that five wards should not be used as sick wards a day longer "than was absolutely necessary." The guardians were told that the parish could only have about a fourth of the representation of the new sick asylum district of which it was to form a part. The letters of the Poor-law Board were agreed to, and a committee, largely formed of the St. Pancras guardians, was constituted to carry out the new regulations, which, in accordance with the orders of the Poor-law Board, are not to be stopped, even by the legal points in the amendment of the Statute in the new Board, which will be formed for the other business. A paid nurse who gave evidence before the Coroner was ordered to be dismissed, because she would not speak in answer to a guardian's questions before Mr. Corbett, but Mr. Corbett, who was present, declared that he found no fault with the woman. It was agreed to send patients to Charing Cross Hospital in order to relieve the infirmary.

ST. PANCRAS WORKHOUSE INFIRMARY.—Inquests were held on Friday on the bodies of three persons, two adults and an infant, who had died in St. Pancras Workhouse infirmary. Medical evidence was again given as to the deadly state of the atmosphere in the sick wards, and Dr. Ross said that they "stank as bad as ever." Dr. Robertson stated that he considered it equivalent to consigning people to their graves to put them in such wards. The jury returned verdicts in the first two cases to the effect that death had been accelerated by the impure air of the wards, and in the third case, that of a fine baby, that death had been caused by congestion of the brain, arising from the effects of poison from an open drain outside the nursery of the workhouse. On Monday the inquest on James Plant and two other persons who had died in the infirmary was resumed and concluded. The case of Plant had been partly gone into some days ago, when in consequence of the startling evidence given by Mr. Solly, vice-president of the College of Surgeons, and Mr. Brudenell Carter, Fellow of the College, as to the condition of the infirmary wards, it was agreed to adjourn them, the coroner stating that "in justice to the public the jury should go more fully into the matter." After hearing evidence at great length, the jury returned a verdict in one of the cases that death had ensued from the effects of consumption, accelerated by the overcrowded condition and bad atmosphere of the ward. The jury added to the verdict the following remarks:—

"That the wards of St. Pancras Infirmary have been overcrowded for the last three years, and the jury desire to express their regret that the Poor-law Board have not enforced the sanitary measures which they have from time to time recommended to be carried out. They also feel that the board of guardians have failed in their duty towards the parish of St. Pancras in not carrying into effect the recommendations of the Poor-law Board."

The inquiry lasted nearly nine hours, and the other cases were adjourned till Monday. The Poor-law Board have since determined on instituting a public inquiry into the state of the wards of the Infirmary, and the charges preferred by the guardians against their medical officers. The date of the investigation is not yet fixed, but it is understood it will be conducted by a special commission, wholly unconnected with the board.

PARISH OF ST. CLEMENT'S DANES.—The gentlemen who are reading with Dr. Vaughan, the new Master of the Temple, with a view to holy orders, have volunteered their services to the rector of St. Clement's Danes for work in Clare Market, one of the worst parts of his parish, and are now engaged in domiciliary visits among a class of poor whose misery it would be scarcely possible to exaggerate. They are also taking part in the Church service, by reading the lessons at evening services, at which Dr. Vaughan himself has undertaken to preach occasionally.

THE OPEN SPACE AT THE MANSION HOUSE.—The Improvement Committee of the Corporation have had a conference with the Metropolitan Board of Works, for the purpose of requesting that the vacant ground opposite the western side of the Mansion House, in Wallbrook, may be preserved as an open space. The Board of Works, in reply, have informed the Improvement Committee of the Corporation that, having regard to the great value of the ground in question as building land, they feel it impossible to entertain the question of preserving it as an open space.

THE TELEGRAPHS AND THE GOVERNMENT.—It is stated that the Post Office authorities will not be in a position to take over the working of all the telegraphs on January 1, but the delay will not extend beyond three or four weeks, during which temporary arrangements will be made with the existing companies to carry on the business under the control of the Postmaster-General. Meanwhile, it is reported that the Chancellor of the Exchequer will not appear in the market as a borrower of the amount to be raised for compensation, but will meet it temporarily or otherwise by adjustments in connexion with various branches of the public accounts. The transfer of the telegraphs to the post offices in Ireland is, it is said, to be deferred for a year.

THE PROPOSED NEW COUNTY PRISON.—On Thursday a meeting of the Middlesex magistrates was held at the Sessions House, at Clerkenwell, and was attended by no fewer than 150 magistrates. A proposal to build a new prison for the county had been favourably considered at former meetings, and a committee had been authorised to enter into a provisional contract to purchase as a site the Highbury Vale estate for 12,250*l.* A motion to confirm this contract was opposed by Mr. Serjeant Payne, Lord Enfield, and others, and was defeated on a division by 48 to 35.

LOSS OF THE CLIPPER SHIP SPINDRIFT.—This celebrated clipper ship, which made such a splendid voyage last year from Foochoo Foo to the Thames with the first "teas of the season," ran ashore on Sunday

near Dungeness, and has become a total wreck. She left London a few days previously in charge of a Trinity House pilot for Shanghai, with a cargo valued at 200,000*l.* and on Saturday in the weather ran on the rocks near Dungeness. She soon filled with water, and portions of the cargo were washed ashore. All hands were saved. The ship was built especially for the China tea trade on the Clyde in 1867, was 500 tons register, and was owned by Messrs. Finlay & Co. of London. She was not insured.

THE HIGHBURY RIOTS.—Early on the morning of the 6th inst. a riotous mob of men who had been keeping "Guy Fawkes" night at Highbury Barn, perambulated the streets of Highbury and Islington, attacked the passers they met with, and destroyed property to a large amount. At the Islington vestry, on Friday, a series of resolutions was adopted, declaring that such outrages were primarily referable to the practice of allowing places of entertainment to remain open until an unreasonable hour, emphatically protesting against the continuance of such practice, and earnestly urging upon the licensing magistrates not to renew the licence to the proprietors of Highbury Barn. It was resolved to send a copy of the resolutions to the licensing magistrates, and to call for a searching investigation into the conduct of the police in the districts traversed by the rioters.

THE PUBLIC HEALTH.—The Weekly Return of the Registrar-General states that in the week that ended on Saturday, Nov. 20, 1892 births and 374 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 30 per 1000 persons living, being 31 per 1000 in London, 33 in Edinburgh, 23 in Dublin, 27 in Bristol, 24 in Birmingham, 29 in Liverpool, 33 in Manchester, 28 in Salford, 31 in Sheffield, 24 in Bradford, 23 in Leeds, 30 in Hull, 27 in Newcastle-upon-Tyne, and 36 in Glasgow. In Paris the annual rate of mortality in the same week was 25 per 1000. The rate in Berlin during the seven days ending the 18th inst. was 26 per 1000, and in Vienna 27 per 1000 during the week ending the 13th inst. In London the births of 1092 boys and 1093 girls, in all 2185 children, were registered last week. In the corresponding weeks of 10 years 1859-68, the average number, corrected for increase of population, was 2181. The deaths registered in London during the week were 1859. It was the 16th week of the year, and the average number for that week, corrected for increase of population, was 1566. The present return is therefore 293 above the estimated amount.

Provincial.

BRIGHTON.—A company has been incorporated by Act of Parliament, for the erection of a large public aquarium in this town. The site chosen is at the foot of the Chain Pier, below the cliff, commencing at the Toll House, where there is ample space for every requirement. A sea wall is to be built, and a road laid down, enclosing an area of ground measuring 700 feet by 100 feet. Towards the construction of this wall and roadway the corporation of Brighton have agreed to contribute the sum of 7,000*l.* The aquarium to be erected will not only afford a popular amusement, but by its scientific organisation and classification will be most valuable to students of natural history, and especially of ichthyology.

BUXTON.—The Duke of Devonshire has made a liberal offer to the inhabitants of this town. His Grace states that if they will form a public company to carry out a number of required improvements, with a capital of 10,000*l.*, he will take half the shares, and give in addition 8 or 9 acres of land at a nominal rent of 5*s.* per annum. A committee has been appointed to canvass the town and take other steps. It is stated that the land offered by the Duke is worth 9000*l.*, which, with the 5000*l.* of capital he offers to provide, will make his Grace's contribution to the scheme 14,000*l.*

CARDIFF.—The Marquis of Bute has just relieved the hospital-ship Hamadryad, at this port, from a debt of upwards of 1000*l.*, and has signified his intention of subscribing 1000*l.* towards the building fund of the new Glasgow University.

CARMARTHEN.—On Tuesday, David Davies, who was suspected of having murdered his sister-in-law, Esther Davies, on the 4th inst., was re-examined before the county magistrates. After a number of additional witnesses had been examined, the presiding magistrate said that, in the opinion of the court, there was not sufficient evidence to warrant the committal of the prisoner. He was accordingly discharged from custody.

FROME.—The inquest on the 11 men and boys killed by the explosion in the Mackintosh coal-pit at Newbury, near this town, three weeks ago, has resulted in a verdict of manslaughter against William Baker, chief oversman; Abraham Hamblin, lampman; and John Baynton. The latter was proved to have torn a division curtain. Mr. Lionel Brough, the inspector, said that all the rules had been violated in the pit. The inquiry lasted five days.

HATFIELD.—On Thursday the Vice-Chancellor, the proctors, and a delegacy from Oxford, arrived at Hatfield House, and admitted the Marquis of Salisbury as Chancellor of the University with the usual formalities.

HAWARDEN.—Mr. Gladstone, the Premier, has purchased the Aston estate, in this parish, comprising Aston Hall and Aston Lodge, in all about 923 acres; also three collieries, the whole producing a rental of about 2500*l.* per annum. The property formerly belonged to Admiral Dundas.

HEXHAM.—On Wednesday week, as Mr. C. G. Grey, of Dilston, the receiver of the Greenwich Hospital rents at Haydon Bridge, was being paid by the tenants at the Anchor Inn, the Countess of Derwentwater marched into the room at the head of a number of her "retainers." She was richly dressed, and wore a massive gold chain round her neck, with a sword sus-

pending by her side. She told Mr. Grey that he had no right to receive the rents of her tenants, as her advertisements had now become law by not being contradicted. Mr. Grey had her attendants at once expelled, when she was seized by Mr. Goodrich and Mr. Glover, and put out also. When they took her by the body and arms, she seized the hilt of her sword, intending to take it out to defend herself, but it was taken from her by one of the people in the room, and broken in two, it never having been out of the scabbard. She then took up a large stick and struck Mr. Grey very severely several times over the knuckles. They then forcibly removed her from the room, and pushed her down the stair, which caused her to fall against the table at the bottom, hurting her very much. She afterwards retired to a room which she had engaged for herself, and left about half-past 5 o'clock in her carriage. As she drove away from the inn her departure was greeted with cheers by the concourse of people that had assembled in front of it.

LEEDS.—A special meeting of the General Council of the Yorkshire Board of Education was held recently in this town, to consider the establishment of a Yorkshire College of Science. Lord F. Cavendish, M.P., President of the Council, occupied the chair, and there were also present—Mr. Baines, M.P., Colonel Akroyd, M.P., Mr. Walter Morrison, M.P., the Rev. Dr. Woodford, vicar of Leeds; Mr. H. W. Ripley, Mr. Jacob Behrens, and Mr. Isaac Holden, of Bradford, Mr. E. Huth, of Huddersfield, Mr. James Garth Marshall, of Leeds, &c. Letters of apology were read from Sir Harcourt Johnstone, M.P., Mr. A. Illingworth, M.P., Mr. Mundella, M.P., Mr. F. S. Powell, Sir P. Crossley, M.P., Mr. W. S. Stanhope, Sir Titus Salt, &c., expressing approval of the project which the meeting was met to consider. The Chairman spoke upon the importance in a country which had reached such a state of civilization as ours of workmen understanding the nature of the materials on which they were employed. In earlier days, when the resources of the country were unexhausted, that was comparatively an unimportant matter. Materials were close to the surface, timber was abundant, and altogether there was no immediate bad effect where those resources which Nature had given so abundantly were not used as economically as they might have been. But the case was very different when the country had arrived at such a stage as that which England had reached. If England was to maintain her position in the civilised world, she could only do so by using to the best advantage the resources Nature had endowed her with. He gave an instance from Middlesborough, showing the importance of technical knowledge to the skilled workman. Every foreign country was up and doing in the way of competition with this country, and if England was equal to them, it was to be feared she was not ahead of other nations in her manufacturing products. In considering whether Yorkshire was too large or too small for a science college he said he thought the example of Germany and Switzerland might help them, where such colleges existed for every 5,000,000 inhabitants. Wherever one was started in Yorkshire he hoped it would be on a sufficiently broad basis. Yorkshiremen still gloried in the traditions of their country, and in deciding upon the locality for such a college he was sure all would be determined that the institution when opened should be worthy of the county to which it belonged. Colonel Akroyd, M.P., moved—"That in the opinion of this meeting it is desirable that a College of Science should be established in Yorkshire." He pointed out the example which Lancashire had set on this subject, and with reference to a remark that the existing depression of trade made it an unsuitable time for the establishment of such a college, he said that depression arose from the competition of Continental manufacturers, and that afforded an additional reason why they in Yorkshire should lose no time in the formation of this college. Mr. W. Morrison, M.P., seconded the resolution from an agricultural point of view, but he did not think it likely for many years that the Craven farmers would study scientific husbandry. Other gentlemen also supported the resolution, and it was unanimously carried. Mr. I. Holden moved, Mr. Baines, M.P., seconded, and Mr. J. G. Fitch, Government Inspector of Schools, supported a resolution appointing a committee to investigate, consider, and propose the best means to be adopted, in co-operation with the Endowed Schools Commission. The committee includes all the mayors of Yorkshire and the chairmen of the Chambers of Commerce and Agriculture in the county.

LINCOLN.—Dr. Wordsworth, the Bishop of Lincoln, has sent in his formal application for the appointment of a suffragan bishop, which the Government had previously expressed their willingness to grant. It is understood that either Mr. Mackenzie, Archdeacon of Nottingham, or Mr. Morse, the vicar of St. Mary's in that town, will be selected for the appointment. It is at least 200 years since a bishop of this class has been appointed in England.

LOWESTOFT.—The Tyro fishing lugger, which arrived at this place on Tuesday evening, reports that seven of her crew of 11 hands were washed overboard on Monday by a tremendous sea, and were all drowned.

NEWCASTLE-ON-TYNE.—A shocking murder was committed in this town last week. A sailor called Weir had visited a woman in a low neighbourhood, and on leaving the house is supposed to have stabbed her in the breast. She died in a quarter of an hour, without being able to say more than that "A man did it." In the meantime the man had gone to the police to complain of being robbed, and being taken into custody, was horror-stricken at finding that the woman was dead. At the inquest on Saturday the suspicion was strong against Weir, but it was suggested that the stab might have been given by a man called Renwick, who had lived with the woman, from motives of

jealousy. Evidence was given which fully established Renwick's innocence, and the jury returned a verdict of Wilful Murder, but by whom there was no evidence to prove. Weir, however, remained in the hands of the police.

PORTSMOUTH.—On Friday a fever ward had been erected in connection with the new hospital, and Gosport Hospital, as a memorial to the late Lord Northbrook (who as Sir Francis Baring represented the borough for 35 years), was presented over to the committee of the hospital, and referred in eulogistic terms to the services of the late nobleman, and was presented to the committee after which Lord Northbrook's appreciation of the manner in which the memorial parties had joined in the memorial, and of the form which it had assumed, was the memorial was upwards of 1000*l.*

RUGBY.—The election of the new trustees of the School, in the room of Dr. Temple, took place on Saturday. The trustees present were Mr. Charles Bertie Percy, Right Hon. Sir C. B. M.P., Rev. C. W. Hoibech, Colonel North, H. C. Wise, M.P., Mr. C. N. Newstead, M.P., Mr. W. B. Davenport, M.P. There were several candidates, and the choice of the trustees fell upon Rev. Henry Hayman, B.D., of St. John's, Oxford, head master of St. Andrew's College, Berkshire.

SOUTHAMPTON.—The local board of health has contracted to dispose of the town sewage, which hitherto discharged into a stream, for the year 1892, a sum sufficient to pay the interest on the sewerage works.

Ireland.

THE LAND QUESTION.—A conference of landlords and tenant-farmers was held in Longford on Tuesday for the purpose of considering the resolutions proposed at a county meeting on the 1st inst. Earl Granard took the chair, and addressed the meeting delivered by his lordship, Colonel Grealy, M.P., and Mr. G. Slater, who, while denouncing the present land laws, insisted that justice should be done to landlords as well as tenants. Resolutions were adopted of fixity of tenure and rents at a value to be adopted. On Wednesday a demonstration of the farmers of county Leitrim was held at Carr Shannon, and was attended by 10,000 persons. Earl Granard in the chair. The necessity for reform was impressed by the speaker, and a resolution was demned. On the same day a large tenant meeting was held at the Mansion House, Dublin, at which Moylan in the chair, in the absence of the Lord Mayor. Addresses having been delivered by Mr. P. J. Dominic Corrigan, ex-Judge Little, Sir John and others, resolutions were adopted declaring the land question demands the immediate attention of Parliament, that Mr. Bright's proposition of establishment of peasant proprietary should be put out; and that a conference of landowners of Parliament, municipal corporations, and boards should be held to devise the best means of rooting the Irish race in the Irish soil.

FENIAN DEMONSTRATION IN CORK.—On Tuesday to commemorate the deaths of Larkin, Arthur O'Brien, who were executed at Manchester for the murder of constable Brett, about 1800 Fenians marched through Cork at night, led by a band playing "Dead March in Saul." They moved in a funeral step, four deep.

FENIAN OUTRAGE IN TIPPERARY.—On Monday night a mob in Tipperary wrecked the house of the Rev. Mr. Howley, P.P., his curate, the Rev. Mr. O'Neill, who lived with him, having become notorious for supporting Mr. Heron.

FENIAN ROBBERY IN CORK.—On Sunday the residence of Mr. O. C. Edwards, of the Island House, five miles from Cork, was attacked by armed Fenians, who, in the absence of the family, compelled the man in charge to give them arms, and carried off two guns.

THE CORK MURDER.—The Fenian man who was arrested by the police on suspicion of being implicated in the late murder, has been discharged, there being no evidence against his detention.

THE MURDER OF CAPTAIN LAMBERT.—Barrett, who is accused of having fired at Captain Lambert, at Athelmy, and whose trial before the Special Commission terminated in a *Quoere* verdict, was brought up before the Court of Queen's Bench last week, and pleaded "Not Guilty." A plea of indictment at Galway was tendered, but not accepted. The Attorney-General intimated that it was the intention of the Crown to move an affidavit in a new change the venue.

SUSPENSION OF AN ORANGEMAN.—The Orange Lodge of Antrim has expelled from membership for one year Mr. Dalway, M.P. for Carrickfergus, because he supported Sir Shafto Adams, Liberal candidate for the county. The lodge master, Mr. William Gwynn, was not consulted in the decision of the Lodge, but wished Mr. Dalway altogether.

PARTY PROCESSIONS.—A memorial from the Catholics of Derry has been presented to the Lieutenant, calling upon the Government to prohibit the party processions in that city, and to prohibit an Orange celebration which takes place annually.

THE FENIAN PRESS AND ORATOR.—The *Irish Standard* contains an editorial article, entitled "The flag," in which it commends the people of Ireland for declaring they will "unfurl the flag of independence, and seek the liberation of the nation," winning the freedom of the nation.

... charged with the wilful murder of Mary Ann Wright. The prisoner lived with Wright, who had previously lived with a man named Whitall. The prisoner having seen the woman talking to Whitall, became jealous, and in the middle of the night cut her throat so terribly as to cause instantaneous death. A child which lived with them, the mother of Whitall, was covered with her blood. The prisoner went at once to the station and gave himself up. The facts being proved, the plea of insanity was set up in defence. The jury acquitted the prisoner on that point, and he was ordered to be detained in the Mad House.

Sporting.

THE INTERNATIONAL SCULLING RACE.—The scullers' race for 50l. a side, between Walter Brown, the American champion, and William Sadler (younger brother of Joseph Sadler), of Putney, was brought to a conclusion on Friday afternoon on the Tyne, from Scotswood Suspension Bridge to the High Level Bridge at Newcastle. Brown, the American, took the lead at starting, but after rowing about three miles, Sadler gained upon him, and was apparently winning, when he suddenly faltered, and was obliged to stop, leaving his antagonist to row to the winning post alone. In the evening, at a public concert, Sadler stated he was out of condition, and wished to row Brown again in six weeks. Brown agreed to row on the Tyne for not less than 100l. a-side. Five pounds a side were deposited, and the men met to-day to deposit 50l. more each.

THE DOUBLE SCULL MATCH.—The great double scull match between the Thames and the Tyne oarsmen was rowed at Newcastle on Saturday. Kelley and Sadler represented the Thames, and Renforth and Taylor the Tyne. The distance was nearly four miles, and great interest was excited. The contest was severe, but terminated in favour of the Thames crew.

SIR JOSEPH HAWLEY AND THE SPORTING PRESS.—On Saturday, Sir Joseph Hawley appeared at Bow Street, to prefer a charge of libel against Dr. Shorthouse, editor, and Mr. Farrah, publisher of the *Sporting Times*, for having published in that paper an article in which, under the designation of Sir Joseph Scratchhawley, he was accused of entering horses for the Liverpool Cup, and then scratching them for his own benefit, to the loss of the backers. Sir Joseph having been sworn, stated that neither he nor any one commissioned by him had any bet upon the horses in question. The defendants were committed for trial. A similar charge was made against Mr. Gilbert Robins, solicitor, residing at Rathcoole, Hornsey, as the writer of a libellous article in the *Man About Town*, and he also was committed for trial.

Obituary.

LORD FOLEY died on Saturday morning at the Hôtel Bristol, Paris, on his return home from a tour in Germany, after a few hours' illness, from congestion of the lungs, in his 61st year. He was the eldest son of the third Lord, by his wife, Lady Cecilia Fitzgerald, fifth daughter of the second Duke of Leinster. He was born in 1838, and married, 1864, Lady Mary Fitzalan Howard, eldest daughter of the sixteenth Duke of Norfolk. By the eldest daughter of the first Duke of Sutherland. Before succeeding to the House of Lords on the death of his father in 1833, he had represented Worcester-shire in the House of Commons, and voted in favour of the first Reform Bill, having supported the Whigs before their accession to office, as well as Lord Grey's Government. Earl Grey gave him the Court appointment of captain of the Hon. Corps of Gentlemen at Arms, an office he has held throughout every succeeding Liberal Administration. He was also one of the

... the House of Lords. He is... his eldest son, born in 1836... HAYES, junior judge of the Court... on Wednesday at the West... his 63d year. On Friday last he as... 1st Prior sitting in the Hall Court, at... private room, previous to departure for... Kaker, when he was sud-... paralysis, which prostrated... his lordship.

... shortly afterwards had the... Council. He was raised to the bench... by the late Government, when Parliam... the number of judges, in order that... over election petitions might be transferred from the... Commons' committees. On that occasion he received the... honour of knighthood. Sir George Hayes married, in 1840, a... daughter of Dr. John Hall, a medical practitioner of reputation... in Leicester, and has left a large family.

GENERAL MAIDEN, commanding the Madras Northern District, died of apoplexy in that city on the 17th ult. He had only been... about two months ago, having arrived from Trichinopoly on the 15th. He entered the service in 1826, and in April last was appointed to the command of the southern... About two months ago he was promoted to the northern district. He was present with the force that marched from Bangalore in April, 1857, to quell the insur- rection in Canara; was employed in the suppression of the mutiny in Bengal, 1857-58-59, commanded the field detach- ment that proceeded from Derannah to Chota Nagpore to subdue the insurgents; defeated the rebels in an engagement in January, 1858, capturing four small field pieces, totally routing the enemy, and killing their leader. He also served with the force under General Whitlock in Bundelcund, and commanded the infantry detachment that proceeded in 1859, under Brigadier Faddy, against Rounmuss Singh.

PROFESSOR PENNY, the distinguished analytical chemist, and teacher of the science of chemistry at the Andersonian Uni- versity, Glasgow, died suddenly on Monday night.

MR. ANDREW SHAFER DOUGLAS, the oldest diplomatist servant of the Crown, died on Friday last, at his residence, 31, South Kensington. He was appointed... Secretary to Mr. Canning, then Secretary of State for Foreign Affairs, in March, 1807; and, as private secretary to the Earl of Pembroke, accompanied him on a special embassy to Vienna, in the same year. He succeeded Mr. Stratford Canning, now Viscount Stratford de Redcliffe, as private secretary for the Secretary of State, at the end of that year, and held that appointment till 1809, when he was appointed... of Legation at the Court of Palermo, was appointed... Civil Secretary in February, 1811, and during that year was Chargé d'Affaires at Palermo, where he again filled... Secretary of Legation, and Chargé d'Affaires from... to April, 1822. In 1824 he was appointed... Embassy at the Netherlands; and, on the depart- ure of the late Earl Granville, the then ambassador... Plenipotentiary ad interim till Sir Charles... ambassador in the absence was Minister... in 1826, on a pension of 700l. a year.

MR. THOMAS DESBOROUGH, the oldest member of the British artistic colony in Rome, died recently at an advanced age. During a period of nearly 70 years he painted with consummate skill and success the varied landscape scenes of Rome and its environs. He was an Englishman by birth, but of Swiss descent, and was known as the "English Signor Tomasso." Of simple and retiring habits, he was a great favourite with his brother artists of all nations, and numbered among his friends Thorwaldson, Canova, Overbeck, Tenerani, Gibson, Wyatt, Macdonald, and many others who appreciated his humorous geniality of manner. A large number of his artistic colleagues attended his funeral in the Protestant burial-ground at the Porta San Paolo.

MR. ARTHUR KETT BARCLAY, of Bury Hill, near Dorking, head of the firm of Messrs. Barclay, Perkins & Co., died on the 20th inst., in his 64th year. He was a Fellow of the Royal Society, and a deputy-lieutenant and justice of the peace for the county of Surrey.

Markets.

COVENT GARDEN.—Nov. 27. Heavy arrivals are reported from the Western Islands. Stocks of Oranges and Lemons are becoming large, and, for the season, are of excellent quality. Hot-house Grapes are very plentiful, and home-grown Pines more than sufficient for the trade. Vegetables of the usual rough sorts are abundant and good. Flowers chiefly consist of Mignonette, Fuchsias, Chrysanthemums, Primulas, Pansies, Cyclamens, and Heaths.

FRUIT.

Apples, p. 1/2 sieve, 2s 6d to 4s
Cobs, per lb., 9d to 1s
Chestnuts, p. bush., 8s to 14s
Filberts, per lb., 6d to 9d
Grapes, per lb., 1s 6d to 5s

VEGETABLES.

Artichokes, p. doz., 1s 6d to 2s
Beet, per doz., 1s to 3s
Broccoli, p. doz., 1s to 2s 6d
Brussels Sprouts, p. 1/2 sieve, 2s to 3s
Cabbages, per doz., 1s to 1s 6d
Cauliflowers, p. doz., 1s 6d to 3s
Carrots, per bunch, 4d to 8d
Celery, p. bunch, 1s to 1s 6d
Cucumbers, each, 6d to 1s
Endive, per doz., 1s 6d to 2s
French Beans, p. 1/2 doz. to 1s
Garlic and Shallots, per lb., 8d
Herbs, per bunch, 1d to 4d
Horse Radish, p. bunch, 3s to 5s
Lemons, per 100, 7s to 10s
Melons, each, 1s 6d to 2s
Oranges, per 100, 6s to 10s
Peas, per doz., 2s to 3s
Pumpkins, per lb., 1s to 2s
Peas, per bunch, 2d to 4d
Lettuce, p. score, 1s to 2s
Mint, per bunch, 4d to 6d
Mushrooms, p. pott., 1s 6d to 2s
Onions, green, p. bun., 4d to 9d

METROPOLITAN CATTLE MARKET.

MONDAY, Nov. 22.

The supply of Beasts is shorter than on Monday last, and trade is brisk; consequently there is a small advance in choicest qualities, but our top quotations must be considered the extreme rate. Sheep also are not quite so plentiful; they are readily disposed of at an advance on Thursday's quotations. Good Calves are still in demand, at full rates. Our foreign supply consists of 1406 Beasts, 1340 Sheep, and 151 Calves; from Scotland there are 53 Beasts; from Ireland, 1064; and 1658 from the Midland and Home Counties.

Beasts, 4181; Sheep and Lambs,	14,675; Calves, 159; Pigs, 160.	Calves	4 0—6 0
		Pigs	4 0—6 0

THURSDAY, Nov. 25.

We have a larger supply of English Beasts than on Thursday last, but not so many of foreign; trade is active for choicest qualities at Monday's quotations; a fair clearance is effected of all descriptions. Sheep are more plentiful, and there is scarcely any demand, prices are lower for the small amount of business transacted. Calves are lower. Our foreign supply consists of 258 Beasts, 1260 Sheep, and 192 Calves.

METROPOLITAN MEAT MARKET.—Nov. 27.

Best Fresh Butter	18s. per dozen lb.
Second do. do.	16s.
Small Pork, 5s. 4d. to 5s. 10d.;	Large Pork, 4s. 4d. to 4s. 8d. per 8 lb.

MARK LANE.—MONDAY, Nov. 22.

There was a good supply of English Wheat to this morning's market, and to effect sales it was necessary to submit to a decline of 2s. to 3s. per qr., from the prices of this day yesterday. Of foreign the arrivals continue liberal, and the business done was at a reduction of 2s. per qr. Grinding Barley was 6d. per qr., and malting 1s. to 2s. per qr., cheaper. Beans and Peas were 1s. to 2s. per qr. lower. The Oat trade was very dull, at a decline of fully 6d. per qr. Flour was neglected.

FRIDAY, Nov. 26.

The weather since the 19th inst. has been dull, foggy, and damp, with occasional frosty nights. Great depression has

continued in the Wheat trade throughout the markets of the kingdom, and although the large foreign arrivals were offered readily at about 2s. per qr. further reduction, only a small retail trade resulted, as confidence in existing prices is still wanting. The trade in Spring Corn has been equally depressed, and we have to quote a reduction of 1s. to 2s. per qr. upon Beans, Peas, and best Barley, while grinding sorts and Oats were 6d. to 1s. per qr. lower. Flour continues neglected at 6d. to 1s. per barrel and sack decline; Birmingham quotes 3s. 4d. per sack reduction. During the week 64 grain and seed laden vessels arrived off the coast, of which, with those left over from the preceding week, there remained for sale last night 70 cargoes. The floating trade has been quiet; for arrived Wheat there were but a few chance buyers, at a decline of from 1s. to 2s. per qr. Maize was a slow sale at easier rates. Barley unaltered. The few transactions in Rye show a fall of nearly 2s. per qr. No business for cargoes on passage or for forward shipment. Paris, November 25.—The trade in Wheat and Flour is very inactive, with a downward tendency in prices. The six marks are quoted at equal to 35s. per 280 lb. The stock at the Halle is estimated at 7575 cwt.

The arrivals of foreign grain this week are good. There was a very fair attendance at this morning's market, and English Wheat was sold at Monday's prices; for American qualities there was rather more inquiry, and a moderate amount of business resulted at the extreme rates of that day; other descriptions remained without change. Spring Corn was unaltered in value.

LIVERPOOL, Nov. 23.—Wheat is irregular in value at 2d. per cental under Friday's rates. There is some disposition to purchase, but so far very little has been done. Flour was dull, at 6d. to 1s. reduction. Beans, Oats, and Oatmeal are neglected. Indian Corn is quiet at Friday's rates; round yellow, 29s.

SEED MARKET.

We have to report an improved inquiry for Clover seeds. Fine samples of new red seed are scarce, and readily command high rates. For superior descriptions we note an advance during the week of 2s. to 3s. per cwt. The values of Alsike and white Clover seed are also tending upwards; new French Italian is in fair request at recent currencies. Canary seed continues cheap and plentiful. Hemp seed is in short supply; for the small quantity in our market long prices are easily obtained. Orders continue to reach us for winter Tares. Feeding Linseed is a little easier. The Rapeseed trade is firm. We have received some new Dutch White Runner Beans. Mustard seed is without change in value. Windsor Beans are scarce and dearer.

JOHN SHAW & SONS, 16, Water Lane, E.C.

COALS.—Nov. 25.

West Hartley, 16s. 9d.; Harton, 17s.; Brancepeth Cannel, 18s.; Perkins' Big Vein Stone, 22s.; Walls End Haswell, 19s. 3d.; Walls End Hetton, 19s. 3d.; Walls End Stewart's, 18s. 9d.; Walls End Tunstall, 17s. 6d.; Walls End South Kelloe, 19s.—Ships at market, 31; sold, 30.

Foreign.

FRANCE — The Chambers were opened on Monday by the Emperor in person, who delivered the following Speech from the Throne.

"MESSIEURS LES SENATEURS, MEMBRES DE L'ASSEMBLEE... It is not only to establish in France the regular and peaceful exercise of Liberty... but to show the solidity of the edifice founded by universal suffrage; nevertheless, the uncertainty and disquietude which exist in the minds of the people cannot be denied... We must speak without any circumlocution... Liberty united with order. For order I will answer. And, gentlemen, to save Liberty; and to attain this object let us keep at an equal distance from reaction and revolutionary theories..."

"The measures which the Ministers will submit for your approbation all bear a sincerely liberal character... The mayors will be selected from among the Municipal Councils, excepting in special cases, for which provision will be made by the proposed enactment... At Lyons, as well as in the suburban communes of Paris, the formation of these councils will be committed to universal suffrage... Fresh prerogatives will be granted to the General Councils, and even the colonies will participate in this movement of decentralisation..."

"The statement of the situation of the Empire presents satisfactory results... Commerce is not at a standstill and the indirect revenues, whose natural increase is a sign of prosperity and confidence, have produced up to the present 30 millions of francs more than last year... But it is not enough to propose reforms, to introduce savings in the finances, and to administer affairs in an effective manner..."

"The progress of science brings nations together... While America joins the Pacific with the Atlantic Ocean by a railroad 100 leagues in length, and in all parts capitalists and thinkers agree to unite by electric communication the most distant countries of the globe..."

welcomed with great enthusiasm and when he said, "For order I will answer..." The Emperor's speech was also received with warm applause... M. Herbet... M. Paul Bethmont was the only member of the Left present at the ceremony... The Chamber of Deputies took place on Tuesday... M. Jules Favre... M. S. Schneider... The Municipal Council of Commerce of Marseille met on Saturday... The discovery of the body of Knuck, son, is confirmed... SPAIN.—The Republican minority returned to the Cortes on Saturday... DENMARK.—In the sitting of the Folkething on Monday the Minister of Finance presented the estimates of the Budget...

The Prince presided at the annual Corporation of the Scottish Hospital... Princess Louise and Princess Mary of Prussia... Prince of Wales attended the Grand Lodge of Freemasons in the Park... Prince and Princess at Marlborough... Monday next his Royal Highness will be the guest of the Earl and Countess of Devon at Studley Royal.

PRINCE LEOPOLD.—Prince Leopold suffering from ill-health, which is accompanied by her Majesty and the Duke of Clarence on Friday. The latest news of his Royal Highness is going on.

THE DUCHESS D'AUMALE.—Her Royal Highness the Duchess D'Aumale has been dangerously ill some weeks at Orleans House, Twickenham... Her Royal Highness is now better, and the medical men have ceased to attend on her, but yesterday morning they stated that since the previous bulletin there has been a gradual increase in the general health of the Duchess.

THE GARTER.—The Garters vacant by the Earl of Derby and the Marquis of Blandford have been bestowed on Viscount Stratford and Bar. de Grey and Ripon.

FRANCE.—The Gazette of Friday announced that the Emperor had directed letters patent to be passed granting the dignity of a Baron of the Kingdom to the Earl of Southesk, by the name of Earl of Southesk, in the county of Fife... Lord Fitzalan Howard, by the title of Earl of Gossop, in the county of Derby... Baron Castletown, of Upper Ossory, in the county of Wick...

MEMBERSHIP MOVEMENTS.—The Gazette of Friday announced the return of "Jeremiah O'Donoghue, Esq., deceased. It is said that the Government intend to nominate the convict Luby for the county of Wick... Mr. Fitzgibbon, a journeyman engineer, has also announced himself a candidate for the county of Wick... Mr. Odger has also announced himself a candidate for the county of Wick...

MEMBERS OF THE HOUSE OF COMMONS.—The Government have appointed the Rev. Henry White, chaplain of the Royal Chapel, Savoy, to be chaplain of the House of Commons, in succession to the Very Rev. Dean of Ely... Mr. Childers, the First Lord of the Admiralty, will be at once removed from the War Office in Pall Mall... Mr. Childers, the First Lord of the Admiralty, will be at once removed from the War Office in Pall Mall...

some time at Berlin pursuing his military education, and a Prussian princess, the Princess Marie-Elizabeth, daughter of Prince Frederick-Charles, nephew of the King of Prussia. As the King of Wurtemberg has no children, Prince William is in fact heir-presumptive to the crown; and if the rumoured alliance should be realised it might have the gravest consequences for the future of South Germany.

BAVARIA.—The recent elections to the Diet having resulted in the return of 80 Ultramontanes and 74 Liberals, all the members of the Ministry placed their resignation in the hands of the King on Saturday.

PRUSSIA.—The Chinese Embassy was received in an official audience by the King on Thursday afternoon. Mr. Burlingame presented his credentials, and most friendly sentiments were exchanged between King William and Mr. Burlingame in the name of the Emperor of China. It is semi-officially stated that Count Bismarck intends to leave Varzin at Christmas for Berlin.

POLAND.—The German journals announce the death at Cracow, aged 80, of Count Ladislas Ostrowski, Marshal of the Diet of Poland in 1830 and 1831, and one of the most illustrious defenders of that country.

DALMATIA.—It is stated, in explanation of the withdrawal of the Austrian troops to the cantonments on the coast, that the further pursuit of the insurgents into the inaccessible parts of the mountains was found impossible, and that the troops were unable permanently to occupy the captured forts at Dragali and Zagvordie, in consequence of the severe weather. At several of the important strategical points occupied by the troops block houses have been erected.

ITALY.—The Ministerial crisis still continues. On Saturday Signor Lanza undertook the formation of a new Cabinet, but demanded as a condition of his accepting the task that General Menabrea, Count Cambray Digny, and the Marquis de Gualterio should resign their posts in the King's household. The King acceded to this demand, but up to Tuesday afternoon Signor Lanza had not completed the formation of a Cabinet. Count Beust, the Austrian Premier, arrived at Florence on Wednesday to congratulate the King on his recovery. The fêtes in honour of the birth of the Prince of Naples commenced in that city on Monday. The railway communication across Mont Cenis was totally interrupted between St Martin and Gran Croce by severe snowstorms and avalanches from the 24th to the 28th ult. On Friday morning the snow on the Susa side of Mont Cenis was four feet deep, and no English mail had been received at Florence since the previous Monday. It is announced that 6510 metres of the Mont Cenis Tunnel on the Italian side were completed last week. The tunnel is therefore half finished, and the works have now entered upon French territory.

GREECE.—The Chamber of Deputies has again passed a vote of confidence in the Ministry, the division list showing a majority of eight in favour of the Government. In the sitting of Monday the Ministry proposed a new Regency Bill, providing that in the King's absence from the country the Queen shall be Regent; that in the absence of the King and Queen the Regency shall be entrusted to the King's uncle, and in the latter's absence to his brother.

THE PRINCIPALITIES.—The Roumanian Chambers were opened on Saturday by Prince Charles. His Highness, in his speech, alluded to his marriage, and announced the complete restoration of friendly relations with foreign powers, and the removal of all mistrust as to the policy of the Roumanian Government.

TURKEY.—Three Ministerial Councils were held last week for the consideration of the Khedive's last reply, in which his Highness deferentially declined to submit his Budget to the Porte, and maintained his independent right to contract loans. A memorandum, written by the Vizier and approved by the Sultan, was signed by all the Ministers, firmly recapitulating, from a Turkish point of view, the rights and privileges conceded to Egypt by treaties and firmans, and summoning the Khedive to accept this document as a rule for his conduct in all relations with the Porte. Server Effendi left on Monday to convey this ultimatum to the Khedive.

EGYPT.—The Emperor Francis Joseph left Alexandria on Friday for Trieste; Baron Prokesch left for Constantinople; and Count Beust and Count Andrassy left for Brindisi. General Ignatieff, the Russian Ambassador to the Porte, arrived on Monday from Cairo, and in the evening the Khedive gave an official banquet in honour of Mr. Elliot, the British Ambassador. M. de Lesseps was married on the 25th at Ismailia. Mgr. Bauer officiated on the occasion. It is officially stated that within the 10 days preceding Saturday last 50 vessels, representing 35,000 tons, passed from the Mediterranean to the Red Sea, without doing any damage to the banks.

INDIA.—Arrangements have been made for the experimental transmission of mails from India to the United Kingdom by the Brindisi route. Mr. G. W. Hayward, who recently explored eastern Turkistan, has left Murree for Cashmere, the first stage in his endeavour to penetrate from India by the Pamir steppe to the valley of the Oxus. A Female Normal School for native girls (attended at present by three Parsee and 12 Hindoo girls) has been opened in Bombay.

ARABIA.—Colonel Pelly, Political Agent in the Persian Gulf, arrived in the beginning of last month at Muscat in the steamship Dalhousie, and demanded an explanation of the firing on the gunboat Clyde. After several attempts at evasion, Azan bin Ghes, the present ruler at Muscat, made an apology to the captain and officers of the Clyde on the quarter-deck of the Dalhousie. On the arrival of her Majesty's steamships Daphne and Nymph at Muscat, it is expected that they will be despatched to Bahrein, to chastise

the Sheik of that place for some recent offences against British subjects.

CHINA.—The Duke of Edinburgh has visited Peking incognito, and has since arrived at Shanghai, where his Royal Highness was enthusiastically received, and attended a grand ball given in his honour. It is stated that Sir Rutherford Alcock will shortly leave Peking, and that he has made definite arrangements regarding the revision of the treaty. The China clipper Inarime has been lost in the China seas, on her voyage from Foo-choo-foo for London. A reactionary conspiracy has been discovered at Manila. The principal person implicated committed suicide.

AUSTRALIA.—The debate in the Legislative Assembly at Melbourne on Mr. Byrne's motion disapproving the appointment of a gentleman without a seat in Parliament to the office of Commissioner of Customs resulted in the defeat of the Government, who thereupon resigned. Mr. Byrne was subsequently sent for, and had succeeded in forming a new Ministry. No definite policy had been made public, but on the reassembling of Parliament it was the intention of the Government to proceed with those measures already before the House. In Sydney the Parliament had reassembled, and many bills of an important character had been promised, including those for the reduction of the salaries of future Governors and Ministers. It had also been announced that the Government intended to resume assisted immigration. Kenealey, one of the Fenians who was transported to Western Australia, had arrived with 25 of the brotherhood, some of whom are going to America, while the others intended to return to Ireland. In the South Australian Parliament the Treasurer had introduced his budget, estimating the probable deficiency on the year at 97,000*l.* This he proposed to meet by increased taxation, which was rejected, and the Government were obliged to introduce a fresh budget, and promise retrenchment.

NEW ZEALAND.—The latest news from New Zealand brings intelligence of an attack by the rebel Te Kooti on the friendly allies under the command of Colonel M'Donnell. Te Kooti was, however, repulsed with the loss of 30 men. A general attack on the rebel position was about to be made. Seven bodies were discovered after the fight, and on examination it was found the rebels were well supplied with ammunition. The troops had seven wounded. The Wanganui rebels convicted of treason-felony have been sentenced to death.

UNITED STATES.—The Government retains the custody of the Spanish gunboats, but has permitted the construction of the vessels to be resumed. A plot has been discovered among the Cuban residents of New York to burn the gunboats. Generals Babcock and Ingalls have gone to San Domingo to aid the negotiations for the annexation of that Republic to the United States. A delegation of Hebrews visited President Grant on Tuesday, and urged him to intercede with the Emperor Alexander on behalf of the persecuted Hebrews in Russia. The President promised to comply with their request. The election in Mississippi was held on Tuesday, when the Radicals elected Mr. Alcorn Governor by a majority of about 8000 votes over Mr. Dent. The Conservatives have carried Texas, electing Mr. Hamilton Governor. Great reductions have been made in the Government departments of the United States. In the Treasury at Washington, in which 3000 clerks were employed at the commencement of the year, more than 600 have been discharged, causing a saving of 70,000 dollars per month. In the War Department 200 clerks have been discharged, and in the Post Office also great changes have been effected. One of the begging-letter writers, who have for some years levied such heavy contributions upon the executors and relatives of deceased persons in England, by pretending to have had intimate associations with the deceased, has been discovered at Philadelphia by the tact of a gentleman at Southampton, to whom he had applied, and who tracked him with the assistance of the Postmaster-General of the United States. He confessed his frauds, and admitted that he had passed as a widow, a disowned scion of nobility, a distressed tradesman, and a young English girl of high birth and expectations in temporary distress. In all these characters he had raised large sums of money, and he stated that within the last two years he had received from all parts of England as much as 3000*l.* by his devices. Mrs. Hammond, better known during the war of the Southern Secession as Belle Boyd, and who had lately been giving readings at California, has become insane from sickness and mental excitement, and has been placed in a lunatic asylum at Stockton.

PARAGUAY.—The allied forces on arriving at San Estanislau, found that it had been abandoned by Lopez. They advanced in pursuit of the latter, who was said to be at Guruguary. It is rumoured that Count d'Eu is about to return to Rio with half the Brazilian army, leaving General Polydoro in command of the remainder.

City Intelligence.

THE METROPOLITAN LOAN.—The tenders for 2,500,000*l.* Metropolitan Consolidated 3½ per Cent. Stock were opened on Thursday week at the Bank of England by Sir John Thwaites, chairman of the Board of Works, in the presence of the Governor and Deputy-Governor of the Bank. The tenders having been read, it appeared that at various prices they reached an aggregate of about 2,100,000*l.* The sealed minimum was then opened, and declared to be 94*l.* 10*s.*, at and above which price about 700,000*l.* was found to have been subscribed—one very large bid by a leading Stock-Exchange firm being at 96*l.* 3*s.* Many additional applications were afterwards sent in to the Bank at the minimum price of 94½, and at the meeting of the Board on Friday Sir John Thwaites announced that tenders had been received for 2,900,000*l.*, and that parties in

the City were ready to take up the remainder of the loan at the minimum price. He stated that the Board on this satisfactory result, and that the tenders had been placed at a less rate of interest than the Corporation of the City of London had offered, it was announced that the Bank of England had taken up the whole of the outstanding balance.

MONEY MARKET, FRIDAY.—Consols are 93½ to 93¾; New and Reconsols, 92 to 92½; Bank Stock, 23 to 23½; Bills, March, par to 5*s.* p.m.; and June, 100 to 100½; India Five per Cents, 112 to 112½; Argentine, 84½ to 85½; Egyptian, 104 to 104½; Italian, 54 to 54½; Mexican, 131 to 131½; Spanish, 27; Turkish Five per Cents, 43½; Ditto Six per Cents, 65½ to 66; 5-20 Bonds, 84½ to 85; Erie, 20 to 20½.

Metropolis and its Vicinity.

GRAND LODGE OF FREEMASONS.—The meeting of the Grand Lodge of Free and Accepted Masons of England was held on Wednesday night at the Albert Hall. There were upwards of 500 brethren present, and many were unable to obtain admission. At seven o'clock the Earl of Zetland, the Earl of Devon, the Prince of Wales was waiting to be admitted into the Grand Lodge, being entitled to enjoy the same by the privileges of past grand master. The Earl of Zetland, wardens, the grand deacons, the grand treasurer, the grand scribes, and twelve grand stewards were present to escort the Prince into the Grand Lodge. His Highness was received with extraordinary honours, the cheering being renewed again and again as he passed to the dais. He was plainly habited as a mason, and took his seat on the left of the grand master, who addressed him in a brief speech, in which he enumerated the various members of the Prince's family who had been patrons of Freemasonry, and members of the craft. The Prince was then proclaimed as such. His Royal Highness expressed his warm thanks for the honour conferred upon him, and for the cordial manner in which he had been received. The grand master then announced the nomination of the office which he had held for the Earl de Grey was nominated in his stead. The meeting will take place in March next.

THE APPROACHING GENERAL COUNCIL OF THE CHURCH OF ENGLAND.—On Wednesday the first of a series of meetings in reference to the approaching (Ecumenical) Council was held in the large room of the Freemasons' Hall. The Hon. Arthur Kinnaird, M.P., presided, and on the platform were the Hon. and Rev. Bishops of London, Mr. E. Baxter, the Rev. Dr. Cumming, Dr. Lushington, Rev. Prebendary Auriol, General Walker, the Rev. Donald Fraser, and other gentlemen. The Rev. Dr. Lushington, in opening the proceedings, said that the Council of the Reformation, who had proposed to meet in London to observe this month in prayer. The proposal had been cordially received in all parts of the world, and he had letters stating that prayer meetings in connection with the forthcoming Council would be held in all the chief towns of Italy, Spain, France, the United States, and India. He expressed his confidence that they might see the hand of God in the success of the man in the favour with which Dr. d'Aubigne had been received throughout the world. He proposed to hold another meeting that evening at 8th, 10th, 15th, 22d, and 29th of the present month. The Hon. and Rev. Baptist Noel then read a passage of Scripture and prayed, and was followed by the Rev. Prebendary Auriol, rector of St. Dunstan's, who read a passage of Scripture and prayed, and was followed by the Rev. Dr. Cumming. Dr. Lushington then read a passage of Scripture, and the meaning of the infallibility of which was explained much, after which the Rev. Mr. Boardman, of America, offered up prayers, and the Rev. Mr. Timothy, closed the meeting with prayer.

THE NEW MAGISTRATE.—Mr. Franklin Lushington has been appointed to the police magistracy vacated by the death of Mr. Burcham.

THE COLONIAL OFFICE AND THE CLEANING OF THE TOWN.—The second meeting of colonists was held on Wednesday at the Cannon Street Hotel, Mr. Lushington presiding. A series of resolutions relative to the unsatisfactory policy pursued by the Imperial Government towards the colonies was submitted, and several speeches were delivered by Sir George Grey and other gentlemen. It was stated that the movement was carried on in London, and another meeting was fixed for Wednesday next.

THE NEW GENERAL POST OFFICE.—The plan of the new General Post Office, designed by Mr. Brass, of Old Street, St. Luke's, has been accepted for building the new General Post Office. The site for the new building is the open space between the present post office in St. Martin's Lane and the site of the new building. The design is by Mr. Williams, of the office of the Surveyor-General. The facade will be 860 feet long and will be of classical design, and will present a fine architectural front.

ROYAL SOCIETY.—The anniversary meeting of the Royal Society was held on Tuesday evening at the Royal Society. The medal of this year was awarded to M. R. A. Dumas, eminent French physicist and chemist, for his physical researches; and the other to M. J. B. Biot, for his researches on the Astronomer Royal at the Cape.

THE ALBERT ASSURANCE COMPANY.—The directors of the Mutual Assurance Society have issued a circular to the policy-holders, stating that they have accepted a transfer of the Albert policies, the directors of which are able to pass a medical examination.

considerable discussion arose, and several suggestions were offered. Mr. Hoskins, of The Hingham, moved that a monument or memorial window be placed in the Cathedral. Mr. Craekanthorpe, of Newbiggen Hill, moved, as an amendment, that a monument only be erected. Mr. C. B. Holston, of Harker, advocated the erection of an additional wing to the Cumberland Infirmary, and the Rev. T. T. Shipman, of Nether Denton, proposed the raising of "the sum of 10,000*l.* in connection with the Diocesan Society, as a supplementary fund for the augmentation of poorer livings in the diocese, to be called the Bishop Waldegrave Augmentation Fund." Votes were then taken on each proposition, when Mr. Craekanthorpe's motion in favour of the erection of a monument was carried, Mr. Hoskins withdrawing that portion of his resolution which proposed the alternative of a memorial window. A committee was appointed to carry out the resolution, and about 200*l.* was at once subscribed.

CARMARTHEN.—The Government has offered a reward of 200*l.* for the discovery of the murderer of Esther Davies, who was shot at Blaendud on the 4th ult. Large posters, printed in English and Welsh, announcing the fact, have been distributed throughout the country.

CHOLEY.—For some months there has been considerable dissension in the parish of Heapey, near this town, owing to the incumbent, the Rev. J. Fisher, who is infirm, refusing to comply with the wishes of the congregation by appointing the Rev. J. Shaw to be his curate. The majority of his congregation, numbering about 500 persons, some time since left the church, and began to build a church for themselves, which is now completed. Ineffectual attempts at reconciliation having been made, a meeting of the congregation was held at Wheleton last week, to consider whether they should not leave the Church of England. A statement was made by Mr. Shaw, from which it appeared that Mr. Fisher had said that Mr. Shaw should never enter his church so long as he lived, and that this being so the Bishop of the diocese was powerless in the matter. The question was warmly discussed, one member observing that they had better go where they were wanted than stop in a church where they were not wanted; and another that they would only be going in advance, for shortly the Church of England would be disestablished. A resolution was then moved and carried unanimously, to the effect that "the congregation should leave the Established Church and join that called the Free Church of England." As 500 persons have now left, the parish church of Heapey has only a congregation of about 50.

DOVER.—On Saturday night the smack Jupiter, of Guernsey, from Montrose for Plymouth, was run down off the South Foreland, and foundered immediately. The captain and crew saved themselves in their own boat, which floated from the wreck, and landed in this harbour on Sunday morning.

LEEDS.—A public meeting in favour of the National Education League was held on Monday night in the Town Hall, the mayor in the chair. The speakers included Mr. George Dixon, M.P., Birmingham; Alderman Carter, M.P., Leeds; and several prominent Baptist and Independent ministers, who stated that the object of the League was to provide a good education for every child in the kingdom, and that the originators of the League were not secularists, but unsectarian. It was urged that denominationalism had not occupied all the ground of education, that there was ample scope for other systems, and that all might be worked side by side. It was resolved to support the local branch of the League.

LIVERPOOL.—Mr. Shaw Lefevre, Vice-President of the Board of Trade, addressed a meeting of merchants in this town on Monday. He explained the Merchant Shipping Bill, which is to be proposed next session. He said that the repeal of the French Treaty would be a great misfortune to England. But there was no fear of such a course being taken. France had treaties similar to that with this country with almost every European Government, and it would be almost against the comity of nations to abrogate the treaty with us while some of the treaties with other countries had five or six years to run. There was no objection to an inquiry into its operation, but it must be complete and not partial.—The borough magistrates last week decided that a bicycle is a carriage within the meaning of the Act, and fined a youth for driving one upon a footpath.

MANCHESTER.—A great public meeting will be held in the Free Trade Hall, on Monday evening, for the purpose of urging the Government to grant an inquiry into the present stagnation of trade, with a view to obtain justice for British industry. The chair will be taken by Mr. Richard Hawthorn, and the meeting will be addressed by the Hon. Wilbraham Egerton, M.P., Mr. Staveley Hill, Q.C., M.P., Mr. Whitehouse, M.P., Mr. Charley, M.P., Mr. Newdegate, M.P., Mr. Sidebottom, M.P., Sir H. Drummond Wolff, Major Egerton Leigh, Mr. Richardson-Gardner, &c. Organisations in London, Birmingham, Rochdale, Wakefield, Leeds, Hull, Cheltenham, Blockley, Harpurhey, Coventry, Radcliffe, Winsford, Staleybridge, Heywood, and Newton have already signified their intention to aid the committee.

NEWCASTLE-ON-TYNE.—A conference on education was held in this town on two days last week, at which the Birmingham League and the Manchester Union were fully represented. The chairmen were Sir William Armstrong, Right Hon. T. E. Headlam, M.P., Alderman Cowen, M.P., and the Mayor of Newcastle. A number of papers were read, and some very warm discussions ensued between the promoters of the rival systems, but no votes were allowed to be taken on the one side or the other. There was a public meeting in the Town Hall on the evening of the 25th, over which the Mayor presided. Among the speakers were Mr.

Dixon, M.P., the Dean of Durham, Rev. Thomas Vasey (Wesleyan), Rev. Canon Consitt (Catholic), Mr. Joseph Cowen, jun., Mr. Headlam, M.P., Rev. Dr. Rutherford (Independent), Rev. J. C. Street (Unitarian), the Rev. W. Stanyers, and others. A good deal of feeling was shown in the course of the discussions, and the systems of secular and denominational education were very fully discussed.

NORWICH.—A meeting of the guarantors and others interested in the recent Musical Festival was held on Saturday at the Shire Hall, Lord Stafford in the chair. A report from the general committee was read stating that the festival of 1879, though highly successful from a musical point of view, had been a failure in a pecuniary sense, as there was no surplus available for distribution among the local charities. The total receipts were 3,961*l.*, and the total expenses 3,969*l.*, so that the festival had been attended with a deficit of 1*l.* The concert had produced 3,170*l.* of the receipts, and the ball, 278*l.* The payments made to the principal vocal performers absorbed 1,211*l.*, and those to the instrumental band and organist, 811*l.* The report was adopted, and it was resolved, after a short discussion, that the festivals should be continued triennially.

OXFORD.—Mr. Edward S. Talbot, of Christ Church, the Warden Designate of the new Keble College, has announced that the institution will open in October, 1879, and that he is ready to receive names for entrance. The candidates will have to pass a matriculation examination similar to that which exists at many colleges, and such as will give some security that they will pass in "Little-go" without much additional preparation. There will be rooms for 100 students. In its composition Keble College will be exactly like those which now exist, drawing its members from all classes, and fitting them for all professions. It starts, however, with the special aim of being a cheap college, combining the ordinary advantages of life in a college with a cost lower than is possible at any of the old colleges. Mr. Talbot thinks that this may be done both by a lowered scale of college charges, paid as a fixed sum each quarter in advance (amounting probably to near 70*l.* per annum more or less) and also by such arrangements and disciplinary rules as will make economy easy and extravagance difficult. It will not be in any sense a party college.

RAMSGATE.—About midnight of Saturday last the foreign brig Bikubon, of Grimstad, from Poole for Grimstad, went ashore on the North Sands Head of the Goodwin Sands, during very thick weather. The crew succeeded in getting her off on the flow of the tide, but she was so leaky that she foundered soon afterwards in the Gull. The crew, nine in number, took to their boat on Sunday morning, and after rowing for several hours towards shore were picked up and landed at this port.

WALSALL.—The sum of nearly 1000*l.* in gold, notes, and drafts, were stolen a few weeks ago from the premises of Messrs. Duynan, Lewis & Lewis, solicitors of this town, by two boys called Samuel Thompson, aged 16, lately in Messrs. Duynan's employ, and Thomas Simpson, aged 17, one of his associates. They continued to attend to their duties, without exciting suspicion, for some days, when they absconded. They were traced to London, where they had engaged berths in a vessel about to sail for Australia. This fact came to the knowledge of Simpson's father before it was known to the police, and he made inquiries at the shipping office which alarmed the boys and caused them to leave London for Liverpool, where they were captured, at Woodside Ferry, on Friday week. On being apprehended on the bridge leading to the Woodside landing-stage, Simpson threw into the river a purse containing between 50*l.* and 60*l.* in gold and 60*l.* in Bank of England notes, and a bankers' draft for 600*l.* Thompson, who had in his possession the sum of 58*l.* 15*s.*, on his way to Bridewell, made his escape from the inspector who had him in charge, but was recaptured at Chester. Divers have since been employed to recover the money, but without success. They believe, however, that they will ultimately be successful, as the bottom of the river, near where the bag is supposed to be, is very stony.

WARRINGTON.—The inquest on the body of Mr. Samuel Gleave, the farmer, who was murdered on the 12th ult., near this town, terminated on Tuesday in a verdict of Wilful Murder against some person or persons unknown.

WIGAN.—A serious explosion occurred at Swan Lane Colliery, Hindley Green, yesterday morning at six o'clock. Four men were seriously burned, and another injured. The gas ignited at a naked light before work was begun.

YORK.—The hearing of the case Noble v. Voysey took place on Wednesday, in the Chancery Court of York Minster, before Mr. Granville Vernon Harcourt, the Chancellor. The question to be determined was the admission of the articles which had been filed against the defendant. The promoter of the action was Mr. Noble, of York, the archbishop's secretary; and the defendant was the Rev. C. Voysey, vicar or perpetual curate of Healaugh, near Tadcaster. The defendant was charged with having written and published certain books or pamphlets, entitled "The Shing and the Stone," in which he has maintained doctrines totally at variance with the articles of religion and the formularies of the Church. A commission of inquiry reported that there was sufficient *prima facie* ground for instituting further proceedings, and in July the archbishop inhibited the defendant from performing any services of the Church in the diocese of York until the sentence should have been given. Mr. Voysey now appeared in person, and entered into a long defence of his opinions. On Thursday the Chancellor gave judgment that all the allegations against Mr. Voysey had been proved, and that they were a ground for excluding him from the Church of England. He also condemned him in the costs. Notice of appeal was given.

Ireland.

REPORTED CHANGES IN THE IRISH GOVERNMENT.—The Dublin papers are full of reports of the probability of a speedy change in the Irish Government, or the Chief Secretary's resignation, and of the opinion which have been expressed by the officials of the Irish Government that measures to be taken in the future of the country. It is stated that the Cabinet the immediate adjustment of the Government for the effectual protection of the country, and the repression of revolutionary measures, and the suppression of seditious publications, other hand these counsels are given by the Chancellor and the Chief Secretary, that affairs should be allowed to take their course.

THE ELECTION OF O'DONOVAN.—The town of Tipperary on Friday, after the election of O'Donovan Russa was announced, the windows of the supporters of Mr. Heron were smashed, and the Mayor was hooted at as he passed through the streets. In the evening the streets with drums and fifes, and displayed green badges. In the morning the Mayor was hooted at as he passed through the streets. On Friday night an illuminated light procession took place in the town. There were 100 torches, several banners, and many tar-barrels and bonfires. The houses were illuminated. A large number of people was present, but there was no disturbance. At Kanturk, however, three incendiary fires were kindled simultaneously, and were said to have been kindled because the owners of the property had not taken part in the demonstration. Great rejoicing took place in Croom, Westport, Sligo, Rathkeale, and other places, on Friday and Saturday evening, in honour of Russa. In some places the windows of those who refused to illuminate were broken by the mob.

TENANT-RIGHT MEETINGS.—On Monday a tenant-right meeting, under the presidency of Mr. Callan, was held in Dundalk Courthouse, and was attended by about 50 persons specially admitted. The meeting lasted only five minutes. Two resolutions were proposed and carried, when an immense mob, yelling for "Amnesty," broke in. Lord Byles and Mr. Callan, M.P., tried to apologise for the meeting, but the mob, in spite of the protestations of several priests, would not listen to the gentlemen and priests on the platform, the mob cheering frantically "Rossa" "Amnesty" "God save Ireland!" A grand demonstration of tenant-farmers was held on Monday in Drogheda, the High-Sheriff presiding. Resolutions in favour of sixty of tenure and agrest were adopted.

CARDINAL CULLEN'S PASTORAL.—On Monday Cardinal Cullen issued a pastoral letter to the clergy of the diocese of Dublin, on his departure for Rome to attend the Oecumenical Council. He exhorted them to pray for the "assembled fathers," and to pray that their "straying brethren may be brought to the one fold and the one shepherd, and that they may profess the true faith, and become members of the one Holy Catholic Church, outside of which there is no salvation." He refers to the "wild theories" which are disseminated by a "seditious press," and says that from socialism, communism, anarchy, the spirit of religion prevent a return to a preservative. In conclusion he exhorts an attempt to revive the practice of dancing, and the continued efforts made, under various names, to revive and spread the seeds of Fenianism, and into a dangerous and destructive combination. He says, he has been abandoned by the Fenian men, while Fenianism is allied with Orangemen, interested land agents to prevent useful reforms.

ATTEMPTED ASSASSINATION IN KILDARE.—Another attempted assassination took place in county Kildare on Friday. A man named Doran was ploughing in his field when he was fired at and hit on the right side. He fell, and a second shot took effect in his left arm. He was carried to the hospital, and the assassin, who was a man named O'Connell, was shot, which missed, followed, and the assassin ran away. The injured man managed to get to the hospital, and was conveyed at once to Dublin, where the bullet was extracted, and found to have been fired from a revolver. It is believed that Doran was a tenant, his brother, a deputy agent, who was the consequence of having ejected a tenant.

ATTEMPTED ASSASSINATION IN CAVAN.—On Friday evening, as Sub-constable John Griffin was on duty at Stradone station, near Cavan, was proceeding on the road for a walk, while passing a plantation, he was fired at by two men concealed behind a wall. The bullets passed through his cap. Two men were arrested on suspicion.

Scotland.

THE EDUCATION QUESTION IN SCOTLAND.—A report from the committee on national education, brought up, and, after much discussion, was adopted on the table, it being doubtful whether the committee had authority to deal with it. The report on the Scotch Education Bill of last session, which had opposed the denominational schools, and was introduced with a view to the settlement of the question.

religion in schools should be struck

MEETING IN GLASGOW.—A meeting, probably 800 in number, was held on Sunday evening, for the purpose of constitutional measures to obtain freedom of the press in the prison...

COLLISION.—On Friday morning, at 10 o'clock, the steamer Rose, from London, was run into by the steamer from New York to Glasgow. The Rose was cut down below...

BOAT EXPLOSION ON THE CLYDE.—The boiler of a screw steam-lighter on the Clyde, between Innellan and Dunoon, exploded, and the whole crew, supposed to be men, who were blown to pieces.

ESTATES.—The Marquis of Bute, of Bute Castle, with the extensive estates, has been bequeathed to the Countess of Loudoun, for the same period as the late Marquis of Hastings.

Railways.

MEN'S PENNY TRAINS.—A meeting was held at the Ve-try Hall, Paddington, the 1st inst. in the chair, to consider a memorial presented to the Board of Trade, drawn up by the Western, Metropolitan, and Suburban Railway Association.

Law.

PRIVY COUNCIL.—Sheppard v. Rev. of France.—This case was specially argued on Thursday, on which occasion the Archbishop of York, the Bishop of Chelmsford, Sir J. Colville, and Sir J. Napier, came before their lordships on an appeal from the Dean of Arches as to the reception of the Eucharist by the wicked, which charge was not supported by the commissioners who were appointed to investigate the matter.

Colend Elphinstone, at the instance of the Church Association, against the Rev. John Purchas, incumbent of St. James', Brighton, for introducing Ritualistic practices, contrary to the rubric. The defendant did not appear to the proceedings. Witnesses were examined at great length on the charges, which were contained in about 40 articles. Mr. Stephens, Q.C., addressed the Court for the prosecution, in a speech which occupied nearly two days. He denounced the ceremonial as superstitious, and referred to the use of the vestments as a relic of the dark ages.

EXCHEQUER CHAMBER.—Sadler v. Smith. Appeal.—This was an appeal from the Court of Queen's Bench, the plaintiff having brought an action against defendant as holder of the stakes in a sculling match between Sadler and Kelly. The decision of the Court below was affirmed, and Sadler therefore gets his share of the stakes.

CENTRAL CRIMINAL COURT.—Arson.—John Cusack, 48, a licensed victualler, was charged with setting fire to his house, with intent to defraud two insurance companies. Prisoner kept the Dolphin in Redcross Street, Southwark, and an alarm of fire was given at 2 in the morning, after the place had been closed three hours. The firemen, who were soon at hand, got inside and extinguished the flames. They then found that the house had been fired in 14 different places, and the furniture and fittings saturated with paraffin.

MURDER.—John Fokett, 21, was charged with attempting to murder Mary Ann Talbot, his sweetheart, in New Church Road, Camberwell. Prosecutrix and prisoner had been for a walk on Sunday, September 26. On arriving at a short distance from the girl's home, prisoner took a knife from his pocket, and without a word attempted his intention, knocked her down, and began to stab her. A young man called Bradbury, who was passing, saw the man who was severely wounded on the head and jaw. The prisoner then tried to cut his own throat, and did wound himself, but not seriously. The jury returned a verdict of guilty with intent to murder, and the prisoner was sentenced to 15 years' penal servitude.

Obituary.

LADY BLANTYRE died at Nice, on the evening of the 24th ult. Her ladyship was the second daughter of the late Duke of Sutherland, by the third daughter of the sixth Earl of Carlisle, and was born in 1825. She married, in 1843, Lord Blantyre, by whom she leaves an only son and four daughters, one of whom is married to Sir David Baird, Bart., of Newbyth. Her ladyship was sister of the Duchess of Argyll, the Marchioness of Kildare, and the Marchioness of Westminster.

LADY CAMPBELL, widow of Major General Sir Guy Campbell, Bart., died on the 25th ult. She was the eldest daughter of Lord Edward Fitzgerald, son of the fifth Duke of Leinster, who died of wounds received in the Irish rebellion of 1798. She was born in 1795, and was the second wife of Sir Guy Campbell, Bart., to whom she was married in 1829. She had been a widow since 1849.

LADY COOKE died at Swansfield House, near Alnwick, on the 25th ult., in her 84th year. She was the widow of the late Sir William Bryan Cooke, Bart., of Whitley Park, Yorkshire; the daughter of the late Sir William Middleton, and the sister of the late Sir Charles Monck, of Belsay Castle.

MR. JOHN HODGSON, M.P. for Newcastle from 1830 to 1847, died a few days since, at the age of 64. He was an eminent archaeologist and antiquarian, and the author of several standard works.

MR. BURCHAM, the police magistrate, died on Saturday, after a painful and lingering illness, at the age of 61. He was educated at the Norwich Grammar School, and graduated B.A. at Trinity College, Cambridge, in 1830, and in 1835 was elected Fellow of his College. He was called to the Bar at the Inner Temple, in 1843, and selected the Norfolk Circuit. He was for some years one of the classical examiners, and an examiner of mental philosophy, in the London University. Both offices he resigned on his appointment as magistrate at Southwark Police Court on the death of Mr. Gilbert A. Beckett, in 1856. At the sitting of the court on Monday Mr. Partridge referred to the death of his late colleague, and described him as a refined and elegant scholar, an able lawyer, and a humane and impartial judge.

MADAME GRISOLDI died at the Hôtel du Nord, in Berlin, on the 27th ult., after a short but severe attack of inflammation of the lungs. She was the daughter of Gactano Grisoldi, an officer of Engineers under Napoleon, and was born at Milan in 1812. She was the younger sister of Giudetta and the elder of

Carolina the former a singer (the latter a dancer) both famous in their day. At the age of 17 she sang before the King in public, at Bologna, as Emma in the Armata di Rosalinda, who was present on the occasion, and distinguished for her brilliant future. Youth, uncommon personal attractions, a beautiful voice and judicious selection of her parts, were so remarkably levelled...

SHE afterwards went to Florence and Rome, where her talents were at once recognized by Bellini, who produced Norma in the three principal characters. She soon afterwards went to Paris, where she made her first appearance in Rossini's Semiramide. In 1834 she commenced her career in London as Nautica in La Gazza Ladra, with Rubini as Giannetto, Zucchi as Fernando Villabella, and Tamborini as the magistrate. This memorable event established her reputation, and after her appearance as Semiramide it was unanimously admitted that "Pasta having retired, her only successor was Grisi." Her career in London extended over the whole period that elapsed between 1834, the year of her first appearance, and the year 1854, the year of her so-called "farewell" performance, previous to her engagement with Signor Mattioli to sing in the United States. During her period of residence in London every year, except in 1842, many of the parts in which she had been successful were afterwards performed by other artists, but the parts of Nautica, Anna Bolena, Desdemona, Elvira, Lucia, Semiramide, Donna Anna, Rosina, &c., which she had sung in London, were never again performed in the United States. In the repertoire of the Opera House, London, every year, except in 1842, many of the parts in which she had been successful were afterwards performed by other artists, but the parts of Nautica, Anna Bolena, Desdemona, Elvira, Lucia, Semiramide, Donna Anna, Rosina, &c., which she had sung in London, were never again performed in the United States.

CAPTAIN JUSTINIAN BAKER, R.N., died on the 24th ult., at an advanced age. He was the only surviving officer of Lord Howe's fleet of the 1st of June 1794. He entered the navy in 1791, and was distinguished in the service of Lord Howe's fleet. He afterwards served in the expedition of Lord Duncan, and in the operations of the fleet of Lord Hood. From his return to the Navy in 1811, he was present at the capture and destruction of more than 100 vessels of war. He obtained the rank of commander in 1815, and was placed on the retired list in 1832.

WILLS.—The will of Colonel Alexander Barry Montgomery, C.B., 1st Foot, has been sworn under 10,000l. personality. Colonel Wigram, Scots Fusilier Guards, late of 17, Grosvenor Square, 40,000l.; Mr. John Mawdaley, of Hanover Square, 60,000l.; Miss Barlow, of Bootham, Yorkshire, 50,000l.; Mrs. Anne Gero-Langton, of Stapleton Park, Gloucestershire, 45,000l.; Rev. Leveson Russell Hamilton, of Bath, 25,000l.; Mrs. Mary Lithgow, of Ipswich, 20,000l.; Mr. John Green, of Hales Owen, 14,000l.

Markets.

COVENT GARDEN.—Dec. 4. The produce here during the past week has been very meagre, both of growers and of members of the trade, the consignments from the Continent being again large, there is a difficulty in effecting sales, unless at a reduction. Hothouse Grapes continue to be well supplied. Pines are somewhat lower in price. French Vegetables, comprising Barbe de Capucin, young Radishes, Carrots, Asparagus, French Beans, and Artichokes are at hand today. Lettuce are coming in in large quantities, but though they are making remunerative prices, the trade is not brisk. Flowers chiefly consist of Mignonne, Fuchsias, Chrysanthemums, Primroses, Primulas, and Heaths. These have not been so plentiful, owing to the sharp weather of the last few days.

Table with columns for Apples, Grapes, Lemons, Melons, Oranges, Pears, Pineapples, Vegetables, and Fruits. Includes prices for various items like Artichokes, Beet, Broccoli, Brussels Sprouts, Cabbages, Carrots, Cauliflowers, Celery, Cucumbers, Endive, French Beans, Garlic and shallots, Herbs, and Horse Radish.

POTATOS.—SOUTHWARK, Monday, Nov. 29. During the past week the arrivals with exception and in by rail have been more plentiful, and quite equal to the demand. The trade still continues dull. The following are this day's quotations:—Yorkshire Regents, per ton, 70s. to 100s.; Kent and Essex do., 60s. to 80s.; Lincolnshire do., 60s. to 85s.; East Lothian do., 70s. to 100s.; Perth, Forfar, and Fife do., 70s. to 80s.; French and Belgian Whites, 60s. to 70s.

Table for ENGLISH WOOL. Lists current prices for Southdown hoggets, Half-bred ditto, Kent Fleeces, Southdown ewes and wethers, and Leicester ditto. Also lists sorts of clothing and combing.

METROPOLITAN MEAT MARKET.—Dec 4. Best Fresh Butter .. 18s. per dozen lb. Second do. do. .. 16s. Large Pork, 4s. 4d. to 5s. 0d. per 8 lb. Small Pork, 5s. 4d. to 5s. 0d. per 8 lb.

HAY.—Per Load of 36 Trusses.
SMITHFIELD, Thursday, Dec. 2.
 Supply moderate. Trade very heavy at lower rates.

METROPOLITAN CATTLE MARKET.
 MONDAY, NOV. 29.

The supply of Beasts is rather larger; there is, however, a good demand, and last Monday's quotations are well maintained. Sheep are more plentiful, and trade is dull for them; prices on the average are rather lower. Good Calves are scarce, and command higher rates. Our foreign supply consists of 1335 Beasts, 3740 Sheep, and 148 Calves; from Scotland there are 151 Beasts, from Ireland, 1459; and 1820 from the Midland and Home Counties.

Best Scots, Herefords, &c. .. 5 6 to 5 10	Best Long-wools 5 4 to 5 8
Best Shorthorns 5 4—5 8	Do. Shorn .. — —
2d quality Beasts 3 8—4 4	Ewes & 2d quality 4 4—5 0
Best Downs and Half-breds .. 5 8—5 10	Do. Shorn .. — —
Do. Shorn .. — —	Lambs .. — —
Beasts, 4371; Sheep and Lambs, 16,675; Calves, 154; Pigs, 120.	Calves .. 3 8—6 0
	Pigs .. 4 0—6 4

THURSDAY, Dec. 2

The number of Beasts is considerably larger than we have had on a Thursday for some time past; the demand is good, and Monday's quotations are readily obtained. The supply of Sheep is about the same as usual at this time of year; trade is dull, but prices for choicest qualities are not much altered. Calves are selling about the same as on Monday. Our foreign supply consists of 747 Beasts, 1475 Sheep, and 288 Calves.

Best Scots, Herefords, &c. .. 5 6 to 5 10	Best Long-wools 5 4 to 5 8
Best Shorthorns 5 4—5 8	Do. Shorn .. — —

Beasts, 1742; Sheep and Lambs, 5010; Calves, 298; Pigs, —.	Calves .. 3 8—6 0
	Pigs .. — —

MARK LANE.—MONDAY, NOV. 29.

There was a moderate supply of English Wheat to this morning's market, but no improvement could be made on the rates of this day's night. The attendance was good; factors commenced by asking higher prices for foreign Wheat, and a fair business was transacted in winter American, at an advance of about 2s. per qr. upon the lowest prices lately paid, but other descriptions were no dearer than last week. Foreign and grinding Barley were rather cheaper; fine English malting and Beans and Peas unchanged in value. The Oat trade was quiet; Swedish were 6d., Russian 1s. per qr. cheaper. Flour sold slowly at late quotations.

PRICE PER IMPERIAL QUARTER.

FRIDAY, Dec. 3.

The rates to which the late large arrivals of Russian and American W heats were forced down, and the commencement of winter, have given confidence to dealers and millers to increase their stocks, and caused also some speculative purchases, in consequence of which a better feeling has been established throughout the markets of the kingdom, resulting in a recovery of 1s. to 2s. per qr. in the value of these descriptions of Wheat. In a few of the agricultural markets a similar improvement has taken place in the price of home-grown Wheat, but the movement is not strong, owing probably to the heavy stocks of foreign in the chief ports of the kingdom, and the fact that there are now about 1,250,000 qrs. of Wheat afloat for our shores from all parts of the world, and many cargoes overdue. Spring Corn of all descriptions has continued much depressed, and to effect sales a further slight decline was imperative. Peas being most neglected, gave way nearly 2s. per qr. in some places. Flour was saleable, at fully late rates. Since Friday last the supplies off the coast consisted of 57 cargoes, of which, with those left over from the preceding week, there remained for sale last night 61 cargoes. The floating trade has improved in tone. Black Sea Wheat recovered 1s. 6d. to 2s. per qr. from the late lowest rates. Maize tending upwards, Barley steady, Rye a little dearer. Business for cargoes on passage or for forward shipment remains suspended.

The arrivals of English grain this week are moderate, of foreign Wheat and Oats large. There was a fair attendance at this morning's market, and the English Wheat on offer was sold at the extreme rates of Monday; American was held for an advance of 1s. per qr., which was paid by needy purchasers only, other descriptions of foreign met with little inquiry, and prices were unchanged. Barley, Beans, and Peas were steady. Oats brought an advance of 6d. to 1s. per qr.

SEED MARKET.

Our seed markets continue quiet but firm. Values of all descriptions of Clover seeds are well maintained, but no great quantity of seed is just now changing hands. The sort most in request is large-grained purple seed; this kind is in limited supply, and easily realises high rates. For Alsike and white Clover seed holders abroad are raising their demands. French Italian has gone 1s. per cwt. dearer, the stocks in France having been greatly reduced by heavy purchases made for Germany. No attention is at present given to Trefoil seed. Canary seed, having reached its lowest, has advanced during the last few days fully 2s. per qr. New French Hemp seed continues scarce and dear; there is no Dutch now offering. Königsberg spring Tares, for future delivery, can now be bought at very low rates. The cold weather has caused an improved inquiry for boiling Peas. Mustard seed is very firm, and has met during the past week with a brisk demand. Rapeseed is without change. Feeding Linseed is in good request.

JOHN SHAW & SONS, 16, Water Lane, E.C.

HOPS.—BOROUGH MARKET, Dec. 3.

Messrs. Pattenden & Smith report the market quiet, the demand being of an entirely retail character. Quotations unchanged.

MESSRS. VEITCH AND SONS wish to ENGAGE a PERSON thoroughly competent to take the Management of the Packing Shed, and to see to the general execution of orders, including the correct naming of Plants, &c.—Apply by letter, stating references and wages required, to The Royal Exotic Nursery, Chelsea, S.W.

WANTED, a respectable Couple.—The Husband as thorough KITCHEN GARDENER, as the produce of the Garden is all grown for Sale; the Wife as good LAUNDRESS. Dwelling-house in the Garden; Laundry and all the appliances provided.—WM. HOLMES, Frampton Park Nursery, Hackney, N.E.

WANTED, for Portugal, a YOUNG MAN, well up in Flower Gardening and Propagating in all its branches, able to make Plans, and carry same out with taste.—S. DIXON & CO., Seed Merchants, 48a, Moorgate Street, London, E.C.

WANTED, a YOUNG MAN, well up in general Propagation, especially Roses; one who has grown for market preferred.—State age, qualifications and wages to Z. M., *Gardeners' Chronicle* Office, W.C.

WANTED, a steady YOUNG MAN, to work in the Houses, under a Propagator. Must be active in Potting, Tying, and Watering. Good character is indispensable.—State age and qualifications to WILLIAM KNIGHT, Floral Nurseries, Hailsham, Sussex.

WANTED, a steady YOUNG MAN, to take charge of Houses, under the Foreman. One who has had some experience in the Propagation of Hard and Soft-wooded Plants, &c., and make himself generally useful.—State wages, reference, &c., to J. C. PADMAN, Nurseryman, Boston Spa, Yorkshire.

WANT PLACES.—Letters to be Post Paid.

DAVID MITCHELL, NURSERYMAN and SEEDSMAN (late Head Gardener, Hamilton Palace), can with confidence recommend to any Nobleman or Gentleman some first-class HEAD GARDENERS. Highest references can be given.—Apply, in first instance, to DAVID MITCHELL, 3, Hanover Street; or Dean Park Nurseries, Edinburgh.

To Gardeners and Bailiffs (Head, Foremen, or Under). JAMES CARTER and CO. having many applications for the above request that those WANTING SITUATIONS will send NAME, ADDRESS, and COPIES of TESTIMONIALS for ENTRY in their FREE REGISTER. Only those who can send unquestionable references need apply. Any Lady or Gentleman requiring GARDENERS or BAILIFFS may rely upon J. CARTER & Co. adopting the most stringent regulations in reference to testimonials as to ability, honesty, &c. JAMES CARTER and CO., 237 & 238, High Holborn, London, W.C.

LUCOMBE, PINCE, AND CO. have always on their REGISTER experienced GARDENERS, whom they can recommend to fill any Situation, whether as Head Gardener to a large Establishment, or Gardener and Bailiff, or Under Gardener. Any Lady or Gentleman applying to L. P. AND CO. will have their best attention. Exeter Nursery, Exeter.

EXPERIENCED GARDENERS (or as GARDENER and BAILIFF), of various qualifications, recommended to Gentlemen.—Further particulars given on application to Messrs. E. G. HENDERSON and SON, Wellington Nursery, St. John's Wood, London, N.W.

MR. WM. PAUL begs to announce that he has made arrangements by which he will be enabled in future to furnish Gentlemen with the NAMES, ADDRESSES, &c., of GARDENERS, and GARDENERS and BAILIFFS, of various qualifications, who are open to Engagements. The fullest particulars as to services required and wages given should be forwarded with application.—PAUL'S Nurseries, Waltham Cross, London, N.

Gardeners and Under Gardeners.

WM. CUTBUSH AND SON beg to state that they have at all times on their books MEN of various qualifications, whose characters will bear the strictest inquiry. Any Gentleman making application would save time by clearly stating the duties to be undertaken, wages offered, &c., so that suitable Men may be selected.—Highgate Nurseries, London, N.

GARDENER (HEAD).—Age 30, married, one child; thorough practical knowledge of the profession in all its branches; first-rate character. Is well known to Mr. E. BENNETT, Osberton Hall, Worksop, who will answer any inquiries.

GARDENER (HEAD); age 40, married, one child.—The Bishop of Oxford is anxious to obtain a situation for his Gardener, of whose skill in Gardening, honesty, sobriety and trustworthiness he can speak most highly. Has been 10 years with the Bishop.—G. B., Cuddesden Palace, Wheatley, Oxon.

Isles of Scilly.

GARDENER (HEAD).—JOHN HAWKINS, Head Gardener to A. Smith Esq., Treco Abbey, is open to an engagement with any Nobleman or Gentleman requiring a thorough practical experienced Man. He has lived as above for the last three years, and was six and a half years in his last situation. His practical acquirements will bear the strictest investigation.—Address as above.

GARDENER (HEAD), or GARDENER and BAILIFF.—Age 38, married, one child; has had good practical experience in both branches. Can be highly recommended.—S. J., West Street, Somerton, Somerset.

To Noblemen and Gentlemen.
GARDENER (HEAD), or GARDENER and BAILIFF, practical and trustworthy servant.—In the prime of a long practice in large establishments both in England and Ireland. Satisfactory references as to character and ability. County House, Newport Road, Middleborough, North Devon.

GARDENER (HEAD) where two or more may be kept.—Age 32, single; first-class practical Gardener in England and Scotland. Six years' character. St. John's Wood, London, N.W.

GARDENER, to take charge of the Garden of a Gentleman's Garden.—Age 22; has had experience under Glass. First-class references.—R. O'NEILL, Church Walk Nursery, Stoke Newington, N.

GARDENER (SECOND), or FOREMAN, in a good Establishment.—Age 25, single; has filled a similar situation before. Good references.—J. WILSON, Cambridge Road, Twickenham, S.W.

LAND STEWARD, or FARM BAILIFF, by a Farmer's Son; experienced in all the general details of Farming, the Management of all classes of Cattle, and Buying and Selling. Excellent references.—D. S., 11, Chancery Place, Old St. Pauls Church, London, N.

AGENT or LAND STEWARD, by a Scotchman, who has been brought up a practical Farmer.—Has studied Agriculture and the Management of Landed Property at the University of Edinburgh; and has had the Management of the Property in one of the Western Counties. Can give references as to character and ability.—F. J. A., 11, Cannon Street, London, E.C.

SHOPMAN and TRAVELLER.—Age 25, experienced with good knowledge of the Nursery Business.—Messrs. Fisher, Holmes & Co., Sheffield.

SALESMAN, in a Seed Establishment.—Single, experienced. First-class references.—JOHN ABRAMS, Laffan, Black Pool Nursery, Cork, Ireland.

SHOPMAN, or ASSISTANT.—Several years' experience; part knowledge of Nursery Business, &c.—references.—L. S., 30, White Street, Birkenhead.

"Invaluable," the invariable report sent to all parts of Great Britain upon trial, especially Particulars free by post. BRADFORD AND CO., 63, Fleet Street, London, E.C.; 23, Steps, Manchester; 23, Dawson Street, Dublin.

BREAKFAST.—EPPS'S COCOA GRAEFUL and COMFORTING. The *Civil Service Gazette* remarks:—"By a thorough knowledge of the natural laws which govern the operations of the system of nutrition, and by a careful application of the best selected Cocoa, Mr. Epps has provided for breakfast with a delicately-flavoured beverage which may save the heavy doctors' bills." Made simply with boiling water or milk. Sold only in 4 lb. and 1 lb. tin-lined packets, labelled—JAMES EPPS and CO., Homeopathic Chemists, London.

Sauce.—Lea & Perrins. THE "WORCESTERSHIRE" pronounced by connoisseurs "the only good Sauce," the appetite and aids digestion. Unrivalled for its purity. Ask for LEA and PERRINS' SAUCE. Beware of imitations, and see the names of Lea & Perrins on the bottles and labels. Agents—CROSSE and BLACKWELL, London, and all Dealers in Sauces throughout the World.

"THE DECAY OF THE TEETH AND GUMS" various causes, but principally it may be traced to neglect, ill-health, and the use of tooth-powders, and other de'eterious acids, which give a permanent stain to the teeth, while they corrode the enamel. It is recommended to point out MESSRS. ROWLANDS' ODONTALGIC DENTIFRICE, as a preparation free from all such ingredients, and eminently calculated to embellish and preserve the structure; to impart a grateful fragrance to the breath, and embellish and perpetuate the graces of the mouth.—Cherry.

DINNEFORD'S FLUID MAGNESIA. The best remedy for Acidity of the Stomach, Headache, Gout, and Indigestion; and the best and most delicate constitution, especially adapted for Ladies, Children, and Infants. DINNEFORD and CO., 172, New Bond Street, London, and of all Chemists throughout the World.

COCKLE'S ANTIBILIOUS PILLS THE SAFEST FAMILY APERTIVE. In boxes at 1s. 1/2d., 2s. 6d., 4s. 6d., and 11s.

COCKLE'S ANTIBILIOUS PILLS in use the last 69 years for INDIGESTION. In boxes at 1s. 1/2d., 2s. 6d., 4s. 6d., and 11s.

COCKLE'S ANTIBILIOUS PILLS in use the last 69 years for BILIOUS AFFECTIONS. In boxes at 1s. 1/2d., 2s. 6d., 4s. 6d., and 11s.

COCKLE'S ANTIBILIOUS PILLS in use the last 69 years for LIVER COMPLAINTS. In boxes at 1s. 1/2d., 2s. 6d., 4s. 6d., and 11s.

COCKLE'S ANTIBILIOUS PILLS THE OLDEST PATENT MEDICINE. In boxes at 1s. 1/2d., 2s. 6d., 4s. 6d., and 11s.

Winter Coughs, Colds, Asthma, and Influenza ARE SPEEDILY CURED BY THE USE OF SPENCER'S PULMONIC ELIXIR. To invalids, whose ailments are increased in frosty weather, Spencer's Elixir is a never-failing source of relief, and ease from suffering, enabling them to breathe with freedom the keenest frost and thickest fog.

CURE (THIS WEEK) OF CONSUMPTION, ASTHMA, COUGHS, &c., by DR. LOCOCK'S PULMONIC WAFERS. Messrs. Bell and Co., of 8, Cross Shore Street, Greenock, Scotland, 1869, write:—"A Gentleman we know was far gone in consumption, and his case declared hopeless by three Physicians, but after the use of the Wafers a short time, has been able to resume his employment. These Wafers give instant relief and a rapid cure of Consumption, Coughs, Colds, and Disorders of the Throat. They have a pleasant taste. 1s. 1/2d., 2s. 6d., and 4s. 6d. per box. All Druggists.

The Best Remedy for Indigestion. NORTON'S CAMOMILE PILLS are recommended as a simple but certain remedy for indigestion. They act as a powerful Tonic and general Apertive, and their operation; safe under any circumstances, and persons can now bear testimony to the benefits to be derived from their use. Sold in bottles at 1s. 1/2d., 2s. 6d., and 11s. each. Beware of cheap imitations. Be sure to ask for "NORTON'S CAMOMILE PILLS," and do not be persuaded to purchase the cheap imitations.

THE GARDENERS' YEAR BOOK AND ALMANAC FOR 1870.

By ROBERT HOGG, LL.D., F.L.S., Co-Editor of "THE JOURNAL OF HORTICULTURE."

The "Gardeners' Year Book" contains, besides the information usually found in Almanacs, a great mass of
valuable information, and numerous useful Tables in connection with Horticulture; a complete Garden Calendar,
Notices of all Horticultural, Floricultural, and Pomological Novelties; also a Directory of all the Principal Seats of the
Nobility and Gentry, the Names of their Owners, their Gardeners, and the Post Town near which they are situated.

"JOURNAL OF HORTICULTURE" OFFICE, 171, FLEET STREET, LONDON, E.C.

BY HER MAJESTY'S ROYAL LETTERS PATENT.

ORMSON'S PATENT ECONOMIC BOILERS.

ORMSON'S PATENT CONCENTRIC SADDLE BOILER.

ORMSON'S PATENT CONVOLUTED BOILER.

ORMSON'S PATENT TUBULAR BOILER.

From the Construction of these Boilers, it will be at once seen that the object of the Inventor is to economise fuel, by concentrating its entire force and vertical action on
the interior of the Boiler, and not wasting it by Heating Brickwork and Chimneys, a fault common to the great majority of Boilers now in use.
These Boilers are made of the best Welded Wrought-iron, of good substance, having no overlapping plates, holes, or rivets, and are therefore perfectly secure against
bursting from expansion and contraction of the metal, an occurrence so frequent and fatal to all forms of Cast-iron Boilers.
Please to state diameter and length of Pipe to be Heated.

HENRY ORMSON, HORTICULTURAL BUILDER TO HER MAJESTY,
AND HOT-WATER APPARATUS MANUFACTURER TO THE COMMISSIONERS OF HER MAJESTY'S ROYAL PALACES AND PUBLIC BUILDINGS,
AND TO THE ROYAL HORTICULTURAL SOCIETY,
STANLEY BRIDGE, KING'S ROAD, CHELSEA, LONDON, S.W.

JOHN P. LAURENCE, Secretary.

Home News.

THE COURT.—The Queen and Royal family continue at Windsor. On Friday her Majesty drove out with Princess Teck. The Prince of Wales and Prince Christian, Prince Teck, and the Nawab of Bengal, went out shooting. Lady Jane Alexander arrived at the Castle on a visit. In the afternoon the Queen drove out with Princess Beatrice. On Saturday morning the Queen walked and drove in the grounds with Princess Louisa. Prince and Princess Teck, Princess Claudine, Princess Victoria, and Prince Adolphus of Teck, left the Castle for the White Lodge. Mr. George and Lady Charlotte Russell left for London. In the afternoon the Queen drove out with Princess Louisa and Princess Beatrice. The Lord Chancellor and Lady Hatherley arrived at the Castle on a visit. On Sunday morning the Queen and Royal family attended Divine service in the private Chapel. The Rev. Dr. Barry, Principal of King's College, preached the sermon. On Monday morning the Queen, accompanied by Princess Louisa and

Princess Beatrice, visited Sir James Clark at Bagshot Park, and remained to luncheon. The Nawab Nazim of Bengal, accompanied by his eldest son, Prince Ali-Kudr Hussan Ali Bahadour, went out shooting. The Lord Chancellor and Lady Hatherley and Lady Jane Alexander left the Castle. On Tuesday the Queen, accompanied by Princess Louisa, paid a visit of condolence to his Royal Highness the Duke d'Aumale, at Orleans House, Twickenham. Her Majesty travelled by a special train on the South-Western Railway to Twickenham, and returned to Windsor at 5 o'clock. On Wednesday morning the Queen drove out with Princess Beatrice. On Thursday morning the Queen walked in the Home Park with Princess Louisa. In the afternoon her Majesty, accompanied by Princess Beatrice, went to London and visited the Princess of Wales at Marlborough House. Her Majesty travelled by a special train on the Great Western Railway, and returned to Windsor at 6 o'clock. This afternoon her Majesty will hold a Council at Windsor Castle.

THE PRINCESS OF WALES.—A bulletin was issued on Saturday, stating that the convalescence of her Royal Highness is steadily progressing, and that the infant princess continues well. Her Royal Highness's recovery being so far advanced, it is considered unnecessary to issue any more bulletins.

THE PRINCE OF WALES went shooting in Bagshot Park on Friday. On Monday his Royal Highness visited the Cattle Show at the Agricultural Hall, and afterwards left town for Studley Royal, on a visit to Earl de Grey and Ripon. On arriving at Holbeck the Prince's carriage was attached to the North-Eastern train to Ripon, where his Royal Highness was heartily cheered by the persons assembled on the platform. The Prince was received and escorted to Studley Royal by Lord de Grey and Ripon, whose guest he remained till Thursday, when he returned to town. Yesterday his Royal Highness attended the funeral of the Duchess d'Aumale.

THE ARCHBISHOP OF CANTERBURY.—A bulletin was issued on Tuesday, signed by Mr. Seymour Haden, Mr. Walter and Mr. Raven, stating that the Archbishop is going on favourably, and has gained considerable general and some local power. His Grace had previously exchanged his bed for a couch in an adjoining room, and had been able to spend several hours a day with the members of his family. Motion is now complete in the leg, and sensibility is also returning to the affected arm. On Wednesday his Grace was able to be dressed for the first time since his attack.

THE CABINET.—A Cabinet Council was held on Tuesday in Downing Street. Another Council was held on Thursday; and another is summoned for to-day.

PARLIAMENTARY MOVEMENTS.—The Hon. Norman Grosvenor, son of Lord Ebury, was elected for Chester on Saturday, in place of his cousin, Earl Grosvenor, who has succeeded to the peerage as Marquis of Westminster. The Lynn election terminated on Wednesday. Both parties claimed the victory, but the official declaration of the poll shows that Lord Claud Hamilton, the Conservative candidate, was returned by a majority of 19 over Mr. Young, the numbers being 1051 to 1032.

CONFIRMATION OF DR. TEMPLE.—The election of Dr. Temple to the bishopric of Exeter was confirmed on Wednesday at Bow Church. Objections as to the orthodoxy of the bishop-elect were raised by Bishop Trower and others, but Sir Travers Twiss, the Vicar-General, held that it was only against the manner in which the election had been conducted that objections could be heard, and that they had nothing to do with other matters. The Queen had approved of Dr. Temple as the Bishop of Exeter, and had commanded the Archbishop of Canterbury to confirm and consecrate him. The archbishop had issued his fiat to him as Vicar-General, and he was of opinion that he had no power to review the appointment of the Crown. He therefore declared Dr. Temple duly elected. Dr. Temple was loudly cheered as he left the church. Bishop Trower and the clergy who are acting with him are now obtaining signatures to a memorial to the archbishops and bishops, praying them to avert from the Church the "shame and scandal with which it is threatened," by withholding the consecration of Dr. Temple.

CONSECRATION OF THE NEW BISHOPS.—The consecration of Dr. Temple to the Bishopric of Exeter will take place in Westminster Abbey on Tuesday the 21st inst. In the event of the Archbishop of Canterbury not being sufficiently recovered to officiate, the ceremony will be performed by the Archbishop of York, assisted by the Bishops of London, Chester, Worcester, and St. David's. Lord Arthur Hervey will be consecrated Bishop of Bath and Wells at the same time.

THE BISHOPRIC OF CARLISLE.—The installation and enthronement of Dr. Goodwin as Bishop of Carlisle will be solemnised in Carlisle Cathedral on Wednesday next. Hitherto these ceremonies have been conducted privately and by proxy; but on this occasion they will be public, and the new Bishop will preach a sermon.

THE BISHOPRIC OF WINCHESTER.—Bishop Wilberforce will be enthroned at Winchester on Thursday next, the 16th inst., and on the Monday following will hold a levée at Farnham Castle. His Lordship has appointed his son, the Rev. Ernest Wilberforce, late rector of Middleton Stoney, to be his chaplain; and has offered the living of Middleton Stoney, vacant by this appointment, to the Rev. Basil Wilberforce, who has declined it.

THE BISHOPRIC OF LINCOLN.—The Bishop of Lincoln has received an intimation that Archdeacon Mackenzie will be appointed Suffragan Bishop for the diocese. The Archdeacon was formerly incumbent of St. Peter's, Bermondsey, vicar of Great Yarmouth, and afterwards vicar of St. Martin's-in-the-Fields, London. He is now Archdeacon of Nottingham, Sub-Dean of Lincoln, and rector of South Collingham.

THE ARCHDEACONRY OF SUDBURY.—The elevation of Lord Arthur Hervey to the Bishopric of Bath and Wells, has been conferred on Mr. Chapman, M.A., vicar of St. James's, Strand. Mr. Chapman is described as "a distinguished Churchman."

THE COMMISSIONER GENERAL OF CUSTOMS.—Mr. Doyle, Bart., has been appointed to the office of Commissioner-General of Customs and Excise in place of Mr. Grey. The appointment will not take effect until the 1st of January next.

INDIA LAW APPOINTMENT.—Mr. J. C. has been appointed to the office of Secretary to the Government, in the place of Mr. J. C. on a superannuation. The salary of Mr. J. C. and the term of service seven years.

THE EDMUNDS ARBITRATION.—The Hon. George Denman and Mr. Charles Edmunds, arbitrators to whom the claim of the Crown against Mr. Edmunds was referred, was published on Saturday. They find that there is due from Mr. Edmunds to the Crown 7142l. 13s., independent of the 7872l. 5s. 6d. refunded by Mr. Edmunds. Each party is to pay his own costs.

Foreign.

FRANCE.—The Empress Eugénie, after a passage across the Mediterranean, landed at Aigle at Toulon on Friday night. Her Majesty thence by rail, and reached Paris on Saturday. The France announces that, in consequence of recent Parliamentary movements, the Ministers placed their resignation at the disposal of the Emperor, and that his Majesty has communicated to a letter from M. Ollivier, explaining the circumstances which attended the formation of the Chamber and the drawing up of the programme, which 98 deputies have already signed. The basis of their programme is the maintenance of law on public safety, the modification of the constitution, the revision of the laws, the suppression of the newspaper stamp duty, the maintenance of a policy of peace abroad, and the re-organisation of the Legislative Body on Friday. M. Ollivier demanded that in future the charge of the Legislative Assembly should be entrusted to National Guards. He said that the Ministers being themselves electors, were the natural opponents of the Chamber against any surprise from whatever quarter it might come. The present Government they were certain to surprise. M. Gambetta supported the Emperor's said—"You will one day, perhaps, regret not having taken this precaution." The Chamber proceeded with the verification of the election in the sitting of Saturday M. de Latour-Maubourg in the name of the officers of the Chamber, that they had resigned to the Emperor in order to remain in the Chamber afterwards resumed the verification of the elections. In the sitting of Monday the Chamber appointed to draw up a report on the M. Viellard-Migeon, in the department of Rhin, proposed to annul the election, on several irregularities, and because the candidate had only a majority of 123 votes over his opponent. M. Ernest Picard, Léon Keller, Chevandier de Valdrôme, and Léon Peyrusse supported the election, which was ultimately declared valid by the Emperor. Twelve deputies in all were declared duly elected in the sitting of Tuesday, on the motion for the election of M. Durand, Deputy of the Nord-Orientales, a proposal for a Parliamentary Commission was brought forward, and rejected by 137 votes. M. Durand was afterwards declared elected. In the sitting of Wednesday, M. Raspail tabled a bill, signed by himself and M. Fort, proposing decentralization in a financial interest and centralization in a political interest. The verification of the doubtful elections subsequently resumed. M. Forcade la Perrière, the Minister of the Interior, in defence of the Emperor's said:—"The Government wishes to establish true liberty, with the assistance of all. It is aware of which liberty is threatened, but this longer resolution and confidence. The Government will make it its glory to found liberty. In this task its predecessors have succeeded, the Government Emperor sets up a claim to be more qualified, and more resolute. It looks back upon its past of 18 years which have given to the country, but at the same time it intends to make the Empire the definitive founder of Liberty. This resolution is not a fresh incident; it is the result of the success of one another during the last 18 years. It is the result of the Emperor's prudence and firmness. The country has a right to demand a Liberal but strong Government. It shall have. This is the idea which the Emperor has in mind from the throne at the opening of this session. For order I will answer, and for liberty."

This speech was received with loud cheering. M. Jules Favre thereupon rose, and took note of the declarations of the Minister of the Interior, but saw a flagrant contradiction in the Liberal speech and the demand that the Emperor's said:—"The Government wishes to establish true liberty, with the assistance of all. It is aware of which liberty is threatened, but this longer resolution and confidence. The Government will make it its glory to found liberty. In this task its predecessors have succeeded, the Government Emperor sets up a claim to be more qualified, and more resolute. It looks back upon its past of 18 years which have given to the country, but at the same time it intends to make the Empire the definitive founder of Liberty. This resolution is not a fresh incident; it is the result of the success of one another during the last 18 years. It is the result of the Emperor's prudence and firmness. The country has a right to demand a Liberal but strong Government. It shall have. This is the idea which the Emperor has in mind from the throne at the opening of this session. For order I will answer, and for liberty."

METROPOLITAN CATTLE MARKET.

MONDAY, Dec. 6.

We have a larger supply of Beasts, and on the average prices are lower; the demand is, however, good for choice qualities. The number of Sheep is also larger, and the average quality pretty good; trade is slow, and prices are lower for all descriptions. Calves are not selling quite so well. Our foreign supply consists of 1541 Beasts, 4570 Sheep, and 146 Calves; from Scotland there are 237 Beasts; from Ireland, 900; and 2040 from the Midland and Home Counties.

a. d. s. d.		s. d. s. d.	
Best Scots, Herefords, &c.	5 6 to 5 10	Best Long-wools	5 4 to 5 6

Beasts, 4784; Sheep and Lambs, 18,435; Calves, 165; Pigs, 45.		Calves	3 6-5 8
		Pigs	4 0-6 4

THURSDAY, Dec. 9.

The number of Beasts is small, but quite equal to the demand; trade is dull, at rather lower rates than on Monday. In the Sheep market there is scarcely anything doing; a few of the choicest qualities find purchasers, otherwise our quotations are almost nominal. Good Calves are in request, but on the average trade is very dull. Our foreign supply consists of 182 Beasts, 1265 Sheep, and 211 Calves.

s. d. s. d.		s. d. s. d.

		Pigs	4 0-6 0

MARK LANE.—MONDAY, Dec. 6.

There was a moderate supply of English Wheat to this morning's market, which brought the extreme prices of this day's night. The attendance was good, but the demand for foreign Wheat only limited; American qualities brought an advance of 2s. per qr. upon the rates of this day week; other descriptions were unchanged in value. Fine malting Barley brought last week's quotations; other descriptions were a slow sale and rather cheaper. Beans were unaltered; White Peas 1s. to 2s. lower. Oats lost the advance quoted on Friday; the trade was steady at the quotations of last Monday. There was no change in the value of Flour.

FRIDAY, Dec. 10.

The frost left us again on Monday, and since then the weather has been foggy and damp; to-day is damp and milder. Excepting at a few of the smaller country markets, where the advance in the value of Wheat quoted last Friday has been slightly exceeded, the trade this week throughout the kingdom, and chiefly in the sea ports, owing to a continuance of large arrivals, has been very dull again, and the improvement quoted last week has been lost, business closing exceedingly inactive. Best Malting Barley was steady. Peas and Oats have further given way in price, but all other sorts of spring corn remained as last quoted. To effect sales in Flour a small decline had to be submitted to. The supplies off the coast consisted this week of 48 cargoes, of which, with those left over from the preceding week, there remained for sale last night 35 cargoes. Arrived Wheat was neglected, at 2s. per qr. decline, some cargoes being ordered off on consignment. Maize was fractionally cheaper; Barley quiet at late rates, of Rye only one cargo (imperfect) change hands. Rapeseed is advancing in value; Linseed quiet. With the exception of some few transactions in Maize, there was little disposition to enter into business for forward shipment.

The arrivals of English grain this week are moderate, of foreign Wheat and Oats good. There was a poor attendance at this morning's market. English Wheat was a dull sale, at barely Monday's quotations; for foreign there was but little demand, and factors would have accepted a decline of 1s. per qr. to effect sales. Spring Corn was steady at late rates.

ARRIVALS.

	Wheat.	Barley.	Oats.	Flour.
English	1180 qrs	1600 qrs.	10 qrs.	— sks.

	23,940	6730	57,020	

LIVERPOOL, Dec. 7.—Wheat closes quiet, and prices are 2d. per cental lower since Friday. Flour dull, and prices favour buyers. For Beans there was a steady demand, at late rates. Oats and Oatmeal were in retail demand, and prices are a shade easier. Indian Corn was in moderate request, at a reduction of 6d. per qr.; round yellow, 29s. 6d.

Average	46 1	38 2	23 4

SEED MARKET.

At Mark Lane this week there has been a better attendance than usual, in consequence of the number of country agriculturists who are in town to visit the Cattle Show. We have a steady inquiry for fine red Clover seed, and what transactions there have been have taken place at an advance on late rates. Alsike and white Clover seed are also very firm. In Trefol there is just now nothing passing. For French Italian recent prices are well supported. Our reports from the other side describe the stocks to be getting reduced quite low. Bird seeds meet with a fair sale at last week's currencies. We have a good demand for feeding Linseed. Other kinds of seeds are unaltered.

JOHN SHAW & SONS, 16, Water Lane, E.C.

To Landscape Gardeners and Others.

THE TRUSTEES and COMMITTEE of the LUTON RECREATION GROUND are prepared to receive PLANS for LAYING OUT as a PEOPLE'S PARK the Recreation Ground at Luton, Beds.

GRAY'S OVAL TUBULAR BOILER.

INTERNATIONAL EXHIBITION, CLASS IX., No. 2119.

Mr. GRAY begs to call the attention of the Nobility, Gentry, Nurserymen, Gardeners, &c., to his
NEW OVAL TUBULAR BOILER,

Acknowledged by practical judges to be a great improvement on every form of Tubular Boiler yet introduced. It has proved itself superior to all other Boilers for quickness of action and economy of Fuel, doing its work with one-third less the amount required by any other.

Extract from Report in GARDENERS' CHRONICLE of International Exhibition, May 24, 1862, page 476
"The upright form of Boiler is usually made on a circular plan, but the oval form given to Mr. Gray's variety of it is said to be preferable in consequence of its bringing the tubes in closer contact with the fire. The usual form of a furnace being a parallelogram rather than a square, it seems feasible that the tubes of the oval grate should bring the tubes more completely in contact with burning fuel; and this being so, the change, though a slight one, is no doubt an improvement."

They are made of all sizes, which, with prices, may be had on application.

JAMES GRAY, HORTICULTURAL WORKS,
DANVERS STREET, PAULTON'S SQUARE, KING'S ROAD, CHELSEA, S.W.

BY HER MAJESTY'S ROYAL LETTERS PATENT.

ORMSON'S PATENT ECONOMIC BOILERS.

ORMSON'S PATENT CONCENTRIC SADDLE BOILER.

ORMSON'S PATENT CONVOLUTED BOILER.

ORMSON'S PATENT TUBULAR BOILER.

From the Construction of these Boilers, it will be at once seen that the object of the Inventor is to economise fuel, by concentrating its entire force and vertical action on a small portion of the Boiler, and not wasting it by Heating Brickwork and Chimneys, a fault common to the great majority of Boilers now in use. These Boilers are made of the best Welded Wrought-iron, of good substance, having no overlapping plates, holes, or rivets, and are therefore perfectly secure against expansion and contraction of the metal, an occurrence so frequent and fatal to all forms of Cast-iron Boilers. Please to state diameter and length of Pipe to be Heated.

HENRY ORMSON, HORTICULTURAL BUILDER TO HER MAJESTY,

AND HOT-WATER APPARATUS MANUFACTURER TO THE COMMISSIONERS OF HER MAJESTY'S ROYAL PALACES AND PUBLIC BUILDINGS, AND TO THE ROYAL HORTICULTURAL SOCIETY,

STANLEY BRIDGE, KING'S ROAD, CHELSEA, LONDON, S.W.

**S. OWENS & CO.,
HYDRAULIC ENGINEERS,
WHITEFRIARS STREET, LONDON, E.C.**

THE IMPROVED SELF-ACTING HYDRAULIC RAM.

This useful Self-acting Apparatus, which works day and night without needing attention, will raise water to any height or distance, without cost for labour or motive power, where a few feet fall can be obtained, and is suited for supplying Public or Private Establishments, Farm Buildings, Railway Stations, &c.

- DEEP WELL PUMPS for Horse, Hand, Steam, or other Power.
- PORTABLE IRRIGATORS with Double or Treble Barrels for Horse or Steam Power.
- IMPROVED DOUBLE ACTION PUMPS on BARROW for Watering Gardens, &c.
- GALVANIZED SWING WATER CARRIERS, for Garden use.
- FARM and MANSION FIRE ENGINES of every description.
- PORTABLE LIQUID MANURE PUMPS, on Legs, with Flexible Suction.

- No. 49. GARDEN ENGINES, of all sizes, in Oak or Galvanized Iron Tube.
- No. 54b. THE CASSIOBURY FIRE EXTINGUISHER, as designed for the Right Hon. the Earl of Essex.
- No. 44. WROUGHT-IRON PORTABLE PUMPS of all sizes.
- No. 4. CAST-IRON GARDEN, YARD, or STABLE PUMPS.
- No. 39b. IMPROVED HOSE REELS for Coiling up Long Lengths of Hose for Garden use.

S. OWENS AND CO. Manufacture and Erect every description of Hydraulic and General Engineers' Work for Mansions, Farms, &c., comprising PUMPS, TURBINES, WATER WHEELS, WARMING APPARATUS, BATHS, DRYING CLOSETS, GAS WORKS, Apparatus for LIQUID MANURE distribution, FIRE MAINS, REFRIGERANTS, HOSE PIPES, &c., &c. Particulars taken in any part of the Country. Plans and Estimates furnished.

ILLUSTRATED CATALOGUES CAN BE HAD ON APPLICATION.

THE ATHENÆUM for DECEMBER 25th, contains SPECIAL ARTICLES on the LITERATURE of ENGLAND, FRANCE, GERMANY, RUSIA, ITALY, BELGIUM, SPAIN, HOLLAND, TURKEY, DENMARK, SWEDEN, PORTUGAL, HUNGARY, and AMERICA for the YEAR 1870.

NOTICE: THE ATHENÆUM will be PERMANENTLY ENLARGED on and after the 1st of JANUARY, 1871.

"Glimpses at Irish Gardens." By Mr RICHARD DEAN, F.R.S. &c. THE GARDENERS' RECORD, an Irish Fortnightly Journal. Part First, 44.

Glenny's Garden Almanac, 1870. NOW READY, containing a List of all the latest Novelties of Flowers and Fruits, and full Instructions for Amateur Gardeners. Price 1s.; Post free, 1s. 1d.

Home News.

DEPARTURE OF THE COURT FOR OSBORNE.—The Queen and the Princesses are expected to leave Windsor this morning for Osborne, in order to spend Christmas in the Isle of Wight.

THE COURT AT WINDSOR.—On Friday the Marquis of Westminster and the Earl of Derby arrived at the Castle, and delivered up to her Majesty the insignia of the Order of the Garter worn by their late fathers. On Saturday the Queen held a Council at which the Bishop of Winchester and the Bishop of Carlisle did homage on their appointment. Viscount Stratford de Redcliffe and Earl de Grey and Ripon, were invested by her Majesty with the riband and badge of the Order of the Garter, after which Earl de Grey and Ripon was knighted by the Queen. The Bishop of Winchester was afterwards invested with the badge of office as Prelate of the Order of the Garter, and read the usual declaration. Sir Albert Woods also made the declaration of Office as Garter King of Arms. Alderman and Sheriff Joseph Causton and Mr. Sheriff James Vallentin received the honour of knighthood. On Sunday the Queen and Royal family attended Divine service in the private chapel. The Bishop of Winchester preached the sermon. On Monday Princess Louisa went to London and visited the Prince and Princess of Wales at Marlborough House. In the afternoon the Queen, accompanied by Princess Beatrice, drove to New Lodge. On Tuesday, being the anniversary of the death of the Prince Consort, the Queen and the Royal family went to the mausoleum at Frogmore. The Prince of Wales came down from London and met the Queen and Royal family at the mausoleum, where the Dean of Windsor read portions of Scripture and appropriate prayers. The Prince of Wales afterwards left Windsor for London. On Wednesday the Judge Advocate-General had an audience of her Majesty. On Thursday morning the Queen went out with Princess Louisa.

THE PRINCE OF WALES returned to Marlborough House on Friday from Studley Royal, and was present at the funeral of the Duchess d'Aumale. On Saturday the Prince went with the Duke of Cambridge to Richmond Park, and shot over the Duke's property at Coombe Wood. On Sunday the Prince attended Divine service at the Chapel Royal, St. James's. On Tuesday his Royal Highness went to Windsor, and attended the service in the Prince Consort's mausoleum. On Wednesday the Prince left Marlborough House for Sandringham.

PRINCE LEOPOLD has been for some days suffering from severe illness, but is now so far recovered that he was able to leave Windsor for Osborne yesterday morning.

THE ARCHBISHOP OF CANTERBURY.—A bulletin was issued on Tuesday, stating that during the past week the Archbishop of Canterbury has continued to gain strength.

ILLNESS OF THE DUCHESS OF ARGYLL.—Accounts received in town this week from Inverary Castle state that the Duchess of Argyll has been extremely ill for some days, from an attack of an apoplectic type, and that Sir James Simpson has been twice summoned from Edinburgh for consultation with Dr. Macdonald, the family physician. The latest accounts state that her Grace is in a critical condition, but is quite sensible, tranquil, and even cheerful.

THE CABINET.—A Cabinet Council was held on Friday in Downing Street. Another Council was held on Tuesday, another on Thursday, and another yesterday.

PARLIAMENTARY MOVEMENTS.—The Gazette of Tuesday summons Parliament for the "despatch of divers urgent and important affairs" on February 8. The same Gazette summons Convocation for the following day, the 9th. It is reported that Lord Courtenay will apply for the Chiltern Hundreds immediately on the assembling of Parliament, and that Mr. Wade will again be the Liberal candidate for the vacant seat. It is stated that the Liberals of Lynn will attempt to reverse the result of the late election on a scrutiny. A petition has been lodged against the return of Sir H. Barron for Waterford, on the ground of corrupt practices, illegal votes, and personation.

THE NEW BISHOPS.—The election of Dr. Wilberforce as Bishop of Winchester was confirmed on Saturday morning at Bow Church. In the afternoon the Bishops of Winchester and Carlisle went to Windsor, and did homage on their appointment. On Wednesday the Bishop of Carlisle was enthroned in the Cathedral of his diocese, and on Thursday the Bishop of Winchester was enthroned in Winchester Cathedral with great state and ceremony. The consecration of Dr. Temple to the see of Exeter, of the Rev. Lord Arthur Hervey to the see of Bath and Wells, and of the Rev. W. O. Stirling to the bishopric of the Falk-

land Islands, will take place at Westminster Abbey, under the sanction of the Archbishop of Canterbury to the Bishop of St. David's, Worcester and Ely.

THE MINT.—It has been determined by the appointment to the office of Master of the Mint, the present Deputy-Master, Mr. Freeman, to be the establishment, which will be the result of the election of Mr. R. R. W. Hamilton as Secretary to the Treasury.

THE CONSERVATIVE PARTY.—In the retirement of Lord Cairns from the Conservative party in the House of Commons, the meeting of the party will be held shortly for the purpose of electing his successor. It is understood that the choice will lie between the Marquis of Salisbury and the Earl of Derby.

Foreign.

FRANCE.—A change of Ministry is announced about to take place as soon as the verification of the elections is terminated. It is rumored that the Cabinet will be constituted as follows:—Minister of the Interior: M. Emile Ollivier; Minister of Foreign Affairs: M. Louvet; Minister of Justice: M. Segris; Minister of Public Instruction: M. de Freycinet; Minister of Commerce and Public Works: M. de Freycinet; Minister of War: Admiral Roussin; Minister of Marine: In the sitting of the Chamber on Friday the verification of the elections was resumed, when the election of M. Korisouet, for the Cotes du Nord, was ratified by 164 to 67. In the sitting of the Chamber on the 16th of the Loire, was ratified by 156 to 91. On the election of M. Girault proposed that the Chamber should be annulled, which was agreed to by the Chamber. The Left protested against the ground that it had taken them by surprise, long and uproarious debate ensued, during which Jules Favre moved that the discussion be postponed to Monday. This motion was ultimately carried to 86. In the sitting of Monday, in reply to a question of M. de Freycinet, the Minister of the Interior, reminded the Chamber that the law on this subject was enacted in 1830. He stated that the Government on its own responsibility granted absolute liberty to the Press, but had not given permission for the sale in the streets of newspapers in the streets, M. Forcade de la Roquette, Minister of the Interior, reminded the Chamber that the law on this subject was enacted in 1830. He stated that the Government on its own responsibility granted absolute liberty to the Press, but had not given permission for the sale in the streets of newspapers which had odiously attacked the Empire and the Constitution. He showed that this unenlightened classes, but in the other classes produced great perturbation. After some remarks by M. de Freycinet and Henri Rochefort, the Chamber dropped, and the Chamber resumed the discussion of the doubtful elections. The election of M. Forcade de la Roquette, which was annulled on Saturday, was ratified by the Chamber by a large majority, as was that of M. Joliot, the latter having 32 votes against 32. In the sitting of the Chamber on the 17th, M. Forcade de la Roquette, and 22 other deputies, presented a motion in favour of an immediate parliamentary session into the results of the treaties of commerce and the right of the Chamber to control the foreign policy of the country. M. Brame presented a motion, bearing the signatures of 50 deputies, in favour of giving notice before the Chamber of the withdrawal from the treaty of commerce with England. After some discussion the debate on the verifications of the elections. M. Garnier asked if the Government intend to permit newspapers to enter freely into France. M. Forcade de la Roquette, on behalf of the Government, replied that it was a question which an immediate affirmative or negative answer could not be given, because for an affirmative answer not being subject to the same taxes as French newspapers, ought not to enjoy in France the same advantages. M. Garnier Pagès rejoined that the answer of the Minister proved that, in spite of the liberalisation used by the Government, it had not made any progress forward. In answer to a question respecting the advertisements, which are given to only one of the papers, M. Forcade de la Roquette stated that on the subject would be introduced in the Chamber on the session. In the sitting of Wednesday the motion for inquiry into the election of M. Duvernois was rejected by 135 to 112. M. Duvernois was declared duly elected. The election of M. Duvernois as Deputy for the 8th Paris Circumscriptive District was declared valid. In the sitting of Thursday the report of the election of M. Calvet as Deputy of Finance, was issued on Monday. It stated that the floating debt has been reduced by 292 millions of francs. The Budget of 1868 showed a net surplus of 18,500,000f., and it is anticipated that the Budget of 1870 will show an equally favourable result. M. Garnier proposed to suppress the demi-decime, which would heavily upon the succession tax, and to reduce the minimum amount of rents which may be registered in the great book of the public debt from 100 to 50 francs.

AUSTRIA.—The Austrian Reichsrath was opened on Monday by the Emperor in person with the following speech from the throne.

Honoured Gentlemen of both Houses of the Reichsrath.—In assembling you again...

But such as the appreciating judgment of discerning...

Most deeply do I deplore the aberration which has rendered...

to as much as possible the sad results arising therefrom...

lation, and to deal with a series of measures affecting the...

most important branches of administration...

others which will be presented to you during the ensuing session...

in the same spirit of progress and of moderation and foresight...

into the peculiar circumstances and political and social require...

ments of the Empire which has hitherto marked your steps...

on the path of legislation. It is, however, necessary not...

alone to pass laws, but also, based as they are upon the...

Constitution itself, to obtain for them that general and...

actual recognition which, to my great regret, has not been...

accorded to them in many quarters. If experience has shown...

that alterations of the Constitution are desirable, the way to...

effect them is to be found in the Constitution itself. Most...

of the representative assemblies of my kingdom and countries...

DANIELA.—The latest reports from Germany...

notice of submission, and declared themselves ready to...

lay down their arms. The Crovocians have also petitioned...

the authorities to allow them to meet for terms, and the...

negotiations for that purpose will continue in a few days...

The Government has issued a proclamation forbidding the export of arms...

which have been sent from parts of the Adriatic during the course...

of the insurrection.

RUSSIA.—It is said that a Russian line of steamers from the Black Sea...

to Bombay via the Suez Canal, is about to be established...

with a contract recently made by one house at Moscow...

to ship 100,000 tons of cotton per week. An expedition...

is also being fitted out for the Balkan Bay of the Caspian Sea...

to attempt the discovery of a means of connecting the Caspian and Aral Seas...

by the bed of the ancient river Arax.

ITALY.—The official gazette of Tuesday announced that the King...

at Signor Sella's request, had associated Signor Lanza with him...

in the formation of a Cabinet. The gazette also published a decree...

containing the definitive Ministerial appointments, as follows:—President of the Ministry...

CAPE OF GOOD HOPE.—Accounts from the Cape state that the elections were to be held on the 6th of December, and Parliament is to assemble in Cape Town on January 20. The Governor is retrenching in all directions, and has addressed a circular to 30 of the temporary and 35 of the third-class clerks, informing them that after January 1 their services will be no longer required. The colony had been visited by a terrific storm, which began on October 20 and lasted four days, causing a great loss of life and property. There were no shipping casualties in Table Bay or Algoa Bay, but the tremendous fall of rain which accompanied the gale up the country increased the rivers to roaring torrents. The Beaufort west dam burst and washed away a large part of the town. No lives, however, were lost there. At several other places along the watercourses buildings, crops, and stock were destroyed, besides numerous fatal casualties. More diamonds and minerals have been discovered near the frontier of the Orange River Free State. The diamonds vary from half a carat to 150 carats, and are of extraordinary beauty. The territory in which they are found is upwards of 1000 miles in extent. Herr Manch, who has gone up the Vaal River, is said to have discovered a diamond mine, which also contains granates, topazes, and other precious stones.

INDIA.—The Duke of Edinburgh is expected at Calcutta on the 22d inst. The leading native inhabitants of Bombay have determined to present an address to his Royal Highness. It is considered probable that the Native Indian Regiments will be armed with Sniders as soon as the European troops, militia, and magazines are fully supplied with the Martini-Henry.

CHINA.—The Duke of Edinburgh landed at Hong Kong in State on November 2, and held a levee in the City Hall, after which several addresses were presented to him. Admiral Sir Henry Keppel, with Lady Keppel and family, left Hong Kong for England on the same day in the Peninsular and Oriental steamer *Salsette*.

UNITED STATES.—The House of Representatives on Monday passed, by a majority of 128 to 42, a resolution against the renewal of the Canadian Reciprocity Treaty. In the sitting of Wednesday a resolution was introduced by unanimous consent announcing the death of Mr. George Peabody, and reciting the honours paid him by her Majesty, the London authorities, the French Emperor, and others, and also the extraordinary preparations for the transfer of his remains to America. The President was authorised to order as many ships of war as were convenient and adequate for the occasion, to meet at sea the European convoy conducting it to America, and to make other preparations for the reception of the corpse, so as to be commensurate with the merits of the deceased. The resolution was made a special order for Monday. In the sitting of the Senate on Thursday Mr. Carpenter delivered a long and impressive speech in favour of recognising the Cuban insurgents as belligerents. Mr. Sumner spoke in opposition. The District Court of New York on Friday issued an order unconditionally releasing the Spanish gunboats, *Mr. Pierpont*, the District Attorney, having declared that the Government would not prosecute the libel, as a state of war did not exist between Spain and Peru. The gunboats will proceed immediately to Cuba. *Father Hyacinthe* sailed for France on Saturday in the *Pereire*.

RUPERT'S LAND.—The *Chicago Tribune* states that the latest advices from Winnipeg Territory represent the insurgents as still issuing rations from the stores of the Hudson's Bay Company, and state that they have placed a guard over Governor Mactavish, and repelled the messengers sent by Mr. McDougall.

BRAZILS AND PARAGUAY.—Intelligence from Rio announce that five skirmishes have occurred in Paraguay, and that Curugaty, the fourth town which Lopez had made his capital, was captured on September 28, after a slight resistance. Lopez had gone to Iguatemy, his last military post on the frontier, and the Government troops continued to pursue him.

HAYTI.—Salnave, by a *coup d'état* on the 17th ult., declared himself President for life. Generals Chevalier and Lubin, with their divisions, had deserted him and joined the revolutionists, who captured Cape Hayti on the 21st ult., and two of Salnave's steamers. Two generals whom Salnave held as hostages were shot at Brizartin on November 19.

City Intelligence.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols are 92 to 92½ for Money, and 92½ to 92½ for Account; New and Reduced Three per Cents, 91½ to 92; Bank Stock, 237 to 239; Exchequer Bills, March, par to 5s. pm. and June, 2s. to 7s. pm.; India Five per Cents, 111½ to 112 ex div.—FOREIGN: Turkish Five per Cents, 44 to 44½; Ditto Six per Cents, 66½ to 66½; Spanish, 27½ to 27½; Peruvian, 83½ to 83½; Italian, 51½ to 51½; Egyptian (1868), 78½ to 78½; Argentine, 85½ to 86½; United States 5-20 Bonds, 85½; Erie, 19½; Illinois, 99½.

Metropolis and its Vicinity.

THE LATE MR. PEABODY.—The remains of Mr. Peabody were removed from Westminster Abbey on Saturday and conveyed by special train to Portsmouth, where they were deposited on board her Majesty's turret ship *Monarch*, Captain Commerell, for conveyance to the United States. The ceremony was attended with all the respect and honour that could possibly be rendered, after the last tribute had already been paid by the Crown, the Government, and the nation, in the funeral service in Westminster Abbey. The special train conveying the body and the friends of the deceased from London (which had been provided free of expense by the London and South-Western Company as a testimony of their respect for Mr. Peabody), arrived in the dockyard at 3 P.M., when, in obedience to a signal gun

from the *Excellent*, the *Monarch* and all her Majesty's other ships in harbour dipped the British ensign. *Plymouth* also lowering her ensign from her peak at their peaks to "half-mast," and displayed the American ensign dipped to abreast their fore-topmast cross-trees, the *United States' corvette*. The guns of the *Duke of Wellington* afterwards took up the firing at minute intervals. The black case containing the coffin, having been removed from the railway car, was borne to the ship between a double line of American and English Marines, followed by the relatives and friends who had accompanied it from London, including Mr. Motley, United States' Minister in this country; Mr. Peabody Russel, Sir Curtis Lamson and Mr. Charles Reed, M.P., executors to the will of the deceased; Mr. J. S. Morgan and Mr. Somerby. The immediate mourners were followed by Admiral Sir James Hope and Admiral Key, Captain Hancock, and a number of American and English officers. The coffin, on reaching the deck of the *Monarch*, was received by the chaplain of the ship, and a few moments afterwards was reverently deposited on the bier in the pavilion on the quarter-deck, in official charge of Captain Commerell, in the presence of the Mayor and Corporation of Portsmouth in their robes of office, and a large body of official personages and naval and military officers. A few words were then exchanged between the American Minister and Captain Commerell, and then all not belonging to the ship returned to the shore. The warps holding the ship to the jetty were then let go, and the great ship, under slow speed, steamed out of the harbour to Spithead, where her anchor was let go. After she had anchored, the coffin was removed from the pavilion on the upper deck and placed in the mortuary chapel below, where it will remain during the voyage, the chapel being closed and placed under the charge of marine sentries. On Monday morning the *Monarch* took on board her powder and swung to ascertain the deviation of her compasses, but in consequence of a heavy rain setting in, which obscured from view the shore signals, this necessary operation could not be completed. It afterwards blew a heavy gale from the south-west, and as the storm has continued ever since, the *Monarch* and the *Plymouth* (U.S. corvette) had not been able to sail up to yesterday morning. On the arrival of the *Monarch* at Portland the body will remain on board for two or three days, and he in state in the mortuary chapel, which will be thrown open during the time to visitors from the shore.

DR. LIVINGSTONE.—Dr. Kirk, her Majesty's Consul at Zanzibar, has transmitted to the Secretary of the Bombay Government the following letter, which he received from Dr. Livingstone on the 2d October last:

"Ujiji, May 30, 1869.
"My dear Dr. Kirk,—This note goes by Musa Kamaala, who was employed by Koorji to drive the buffaloes hither, but by overdriving them unmercifully in the sun, and tying them up to save trouble in luring, they all died before he got to Unyanyembe. He witnessed the plundering of my goods and got a share of them, and I have given him beads and cloth sufficient to buy provisions for himself on the way back to Zanzibar. He has done nothing here. He neither went near the goods here nor tried to prevent their being stolen on the way. I suppose that pay for four months in coming, other four of rest, and four in going back would be ample, but I leave this to your decision. I could not employ him to carry my mail back, nor can I say anything to him, for he at once goes to the Ujijians and gives his own version of all he hears. He is untruthful and ill conditioned, and would hand off the mail to anyone who wished to destroy it. The people here are, like the Kilwa traders, haters of the English. Those Zanzibar men whom I met between this and Nyassa were gentlemen and traded with honour. Here, as in the haunts of the Kilwa hordes, slaving is a series of forays, and they dread exposure by my letters. No one will take charge of them. I have got Thani bin Suellim to take a mail privately for transmission to Unyanyembe. It contains a cheque on Ritchie, Stuart & Co., of Bombay, for 2000 Rs., and some 47 letters written during my slow recovery. I fear it may never reach you. A party was sent to the coast two months ago. One man volunteered to take a letter secretly, but his master warned them all not to do so, because I might write something he did not like. He went out with the party and gave orders to the head man to destroy any letter he might detect on the way. Thus, though I am good friends outwardly with them all, I can get no assistance in procuring carriers, and as you will see if the mail comes to hand I sent to Zanzibar for 15 good boatmen to act as carriers if required, 80 pieces of meritrano, 40 ditto of kinitra, 12 farsalas of the beads called jinsam, shoes, &c., and I have written to Seyd Majid, begging two of his guards to see to the safety of the goods here into Thani bin Suellim's hands, or into those of Mohammed bin Sahib. As to the work to be done by me, it is only to connect the sources which I have discovered from 500 to 700 miles south of Speke and Baker's with their Nile. The volume of water which flows north from latitude 12° south is so large, I suspect that I have been working at the sources of the Congo as well as those of the Nile. I have to go down the eastern line of drainage to Baker's turning point Tanganyika, Nyige Chowambe (Baker's?) are one water, and the head of it is 300 miles south of this. The western and central lines of drainage converge into an unvisited like west or south-west of this. The outflow of this, whether to Congo or Nile, I have to ascertain. The people of this, called Manyema, are cannibals, if Arabs speak truly. I may have to go there first, and down Tanganyika, if I come out unscathed, and find my new squad from Zanzibar. I earnestly hope that you will do what you can to help me with the goods and men. I am to be sent by Mr. Young, must surely have come to you through Fleming & Co.—I am, &c., DAVID LIVINGSTONE. A bag box, paid for to Nijji, was left at Unyanyembe, and so with other boxes."

UNITED PRAYER FOR THE COUNCIL AT ROME.—The fourth of the meetings for united prayer, in connection with the General Council at Rome, was held on Friday morning in Freemason's Hall. The Hon. Arthur Kinnaird, M.P., who presided, said that the subject chosen for consideration was "the attainment of a deeper knowledge of the Word of God" by Christians in England, Scotland, and Ireland, in Germany, Holland, Norway, Sweden, Switzerland, and other Protestant States of Europe, in the United States of America, in the colonial dominions of the British Empire, and in missionary stations; the con-

vers on in large numbers of those who love not, the truth; the enlightenment of those who have joined the Church of Rome, and who are inclined to do so. He stated that several missionary stations intelligence had been in meetings similar to those in London were held. Several prayers were offered, and it was decided that the meetings would be continued on the 22d and 29th inst.

THE SUEZ CANAL.—An important notice issued on Friday from the Hydrographic Office of the Admiralty in reference to the navigation of the Suez Canal, containing an elaborate report of Commander Nares, of her Majesty's surveying ship *Newport*, which passed through the canal during its opening. After touching upon the harbour of Said, the current pilot signals, &c., it states:—

"Thirty-five miles of the canal are subject to a squall was experienced (force 6), when the wind thick as an ordinary fog, and most distressing to the eye, much so that, had the ship been in the canal, there would have been great danger of its being driven from its proper channel. Fresh water is introduced into the canal for the greater part of the year, and soon as the water is no longer required, it will be used to irrigate the banks, and this nuisance in the total absence of wind, as quite completed. Through the canal, 100 miles there is either dredging or being on. For five miles in the Ballah and the lagoons south of it, dredging will be required until means are found to banks solid enough to prevent the water from the Serapeum cutting there is a barrier with only 18 feet water upon it, which is a case. Except for about 10 miles there is a barrier, the canal. Vessels drawing 12 feet of water can be open to ships drawing 20 feet of water that passed through the canal at the present Egyptian yacht, drawing 16 feet, and several ships grounded on the passage without delay. The grounding was not the fault of the 40 or 50 ships to get quickly out of the canal."

THE EAST INDIA SUBMARINE CABLE.—It has been definitely decided that the shore end of the India submarine cable shall be lodged at Port Cove, near the Logan Rock, at the Land's End. It has been in contemplation for some weeks within the last few days Sir James Anderson and Saunders have surveyed the district, and have determined that this is the most favourable site. The cable will pass through the Straits of Malacca, to the Isthmus of Suez, and thence to India as possible. The shore end of the cable will be landed at Sennen. A steamer of 2000 tons will visit the light-ship in mid-channel.

THE MEETING OF COLONISTS.—On Wednesday the weekly meeting of colonists was held at the Street Hotel, Mr. Youll in the chair. The resolution was adopted to the effect that the Colonists' citizenship, Imperial supervision, and Imperial commerce, and to promote all the best interests of the colonies, they, on their part, are not wanting in a recognition of their beneficial relationship. At noon a deputation, headed by the Duke of Devonshire, Viscount Bury, and Viscount Milton, were received by Granville at the Colonial Office, and Granville, in reply, said that he was exceedingly sorry to see England and all her colonies. He believed that the colonies were elastic, and there was really more than was supposed. At present, excepting the one of the most routine character, and a moment. He had proofs of confidence from the one minute a colony which, after deliberation, thought it necessary or expedient, and that when they went it would be on friendly terms.

PAYMENT OF ASSESSED TAXES IN A
On Monday night a largely attended meeting of tradesmen and working-men electors was held in Little Surrey Street, in reference to the forthcoming meeting of the assessed taxes 12 months in advance. G. M. Shee took the chair, and said that a meeting had been convened to protest against the scheme of the Chancellor of the Exchequer for January 1. He denounced the scheme as oppressive in the present depressed state of trade, and had been an elector of Southwark for 13 years, and always voted on the Liberal side, but he felt disgusted with the conduct of the Government in reference to the collection of the assessed taxes, and in treatment of the dockyard workmen, that he voted for the Conservative candidate at the election. Mr. Myers moved the following resolution:—"That this meeting considers the scheme of the Chancellor of the Exchequer for collecting the assessed taxes in advance in January next arbitrary and unjust in the present state of trade, and oppressive to the working classes, and hereby enters its strong protest against such a scheme." Mr. Baldwin seconded the resolution, which was supported by Messrs. Yates, Whitfield, and others, and carried unanimously. Mr. Williams said for the last 20 years he had voted for the Conservative candidates, moved,—

"That, as a practical protest against the scheme of the Chancellor of the Exchequer, this meeting resolves itself to support Colonel Bessford, the Conservative candidate, at the present election, and recommends the course to be taken by the electors of the borough of Southwark."

seconded the resolution, which was
by acclamation. The great majority of the
put down their names to form a com-
of Colonel Beresford.

VIADUCT.—At a meeting of the
Council on Thursday, a report was
George P. Bidder, T. E. Harrison,
the civil engineers who had been
the Viaduct, stating that the
had been caused by uneven
although severe frosts will probably
no danger to the safety of the
be apprehended. The report recom-
be allowed to stand untouched
when it will be seen what is required to

ROYAL SOCIETY.—Dr. John Davy, M.D.,
Humphrey Davy, has bequeathed to the
a fulfilment of an expressed wish of
a service of plate presented to Sir Hum-
for the invention of the safety lamp, to
in founding a medal to be given annually
important discovery in chemistry in
Anglo-America.

OF THE NATIONAL PORTRAIT GALLERY.
Wednesday the National Portrait Gallery in
George Street, Westminster, was closed, pre-
to the collection being removed to its future
the South Kensington Museum, where it
be again on exhibition in connection with
Portrait Gallery formed at the latter institution.

CLASS SCHOOLS CORPORATION.—The
of formally inaugurating the new school
Lower Street, City Road, and the third
of prizes, took place on Friday, in
of the Lord Mayor, the Sheriffs, and a
company. The school, in which over 900
receiving an excellent education, was
October last. The Lord Mayor said it gave
to be there to distribute the prizes
awarded, but it gave him still greater
with him the two sheriffs, who were,
prize men. The same energy, the
and the same industry which enabled
to obtain those prizes would enable the boys
to come to the sheriffs' time of life to obtain
prize of life. They should bear in mind
at the beginning of life, but unless
their present success would be only
and a snare. They must persevere in
with the same industry, and if
he ventured to guarantee the same

remarks by Mr. Arthur Hobhouse, Lord
M.P., as chairman of the Society of Arts,
to the admirable work which was
the schools, and said that no one was
aware than he was of the importance of
handwriting in the transaction of business.
years he had held an onerous post under
which involved eight or ten hours' work
and he could testify that the labour was
increased by the impossible hieroglyphics which
clothed the greatest questions of the day—
many of these emanated from some who were the
of the Government of the country. Sir W.

thanked the Lord Mayor for his presence,
that they had procured a site on the south
river, where he hoped they would soon open
with equally successful results. The Lord
distributed the prizes to the boys to whom
had been awarded. Votes of thanks to Mr.
the assistant masters, the council, &c., were
and seconded by Mr. Freshfield, M.P., Mr.
Diamond, Rev. Mr. Best, Rev. Canon
and Mr. Gasiot, and carried unanimously.

HARLES MATHEWS, the comedian, will quit
on January 31 for Australia, where he is
series of performances, and, as a prelude
there, will take a farewell benefit at Covent
Theatre on Thursday, the 4th of the same

WOMEN'S INTERNATIONAL EXHIBITION.—The
the Workmen's International Exhibition to
in July next, at the Agricultural Hall, will
conference of delegates from the towns of
Kingdom, and of other countries on
next, at the rooms of the Society of Arts in
Adelphi. The business will be distri-
method of arrangement of exhibition;
and discussion of the proposed system
of workshops in the exhibition; 4, Re-
statements, and suggestions, from local com-
and 5, Statement and discussion as to the
of technical education. Mr. Mundella,
Mr. Morley, M.P., will successively occupy
during the day's sitting. In the evening a
meeting will be held at Exeter Hall, at which
Buxley will preside.

BARKING OUTFALL.—The report of Mr.

Rawlinson, C.B., the Government engineer appointed
to inquire into the complaints of the inhabitants of
Barking with reference to the outfall of the metro-
politan sewage, was presented to Mr. Braddon Saturday
Mr. Rawlinson reports that the allegations have only
been partially proved, that the cesspools and general
want of drainage in the town of Barking are more
prejudicial to the health of that town than the
proximity of the outfall of the sewage of London, and
that there has been no diminution of the main
channel consequent on the outpouring of the sewage.
He says that while the Metropolitan Board of Works
have protested against the bulging of the Thames
above London, they themselves continue to pour
into it the sewage of all the vast London popu-
lation. The question of the utilisation of sewage was
not referred to Mr. Rawlinson, but he expresses the
opinion that to accomplish this the Board must either
subsidise or guarantee any company undertaking the
work, or carry it out themselves. He states that
deodorisation and disinfection of the metropolitan
sewage by chemicals would be very costly to the rate-
payers, and in the results imperfect; and that river
pollution by town sewage, in the case of the Thames,
may be prevented. Experienced engineers have stated
that the cost of taking the sewage to Sea Beach
would greatly exceed the total cost of the metro-
politan system of main drainage and that the area
requisite to utilise the sewage would not be less than
70,000 acres. It is stated in the evidence attached to
the report that, as compared with guano at 11l. a ton,
the annual value of the London sewage is not less than
1,000,000l.

THE CAB SYSTEM.—On the 1st January there is to
be an entire change in the cab system throughout the
metropolis. There will be complete free trade in cabs
and carriages for hire as regards the rate of fares, but
each carriage is to have conspicuously painted on the
panels of the doors the fares at which passengers will be
conveyed. The charge will be the same, whether
one or more persons are conveyed. All misconduct by
drivers will continue to be punished as under the
existing regulations. It is expected that the new
system will not only be found a considerable im-
provement on the old, but will lead to the intro-
duction of a better class of vehicles. A meeting
of hackney-carriage proprietors was held on Tuesday in
Cambridge Hall, Newman Street, to consider the new
rules and regulations as submitted by Colonel Hender-
son, the Chief Commissioner of Police. The meeting
was called by the Amalgamated Association of Cab
Proprietors, and was requested to express an opinion
on a number of points. It was unanimously agreed
that a metal flag denoting the fare be displayed from
the top of the cab as an indication that it was for hire,
and that for the present cabs the present fares should
be adopted, with the following modifications:—No fare
under 1s., Hansoms to charge 2s. 6d. an hour when
engaged by time, children to be paid for as adults, and
luggage outside to be always paid for at 2d. a package.
The four mile radius to be reckoned along the roads,
and 1s. a mile to be charged under all circumstances
beyond it. The inspection of the cabs to be in Sep-
tember, and the lamp not to be insisted on.

**THE BISHOP OF LONDON AND THE POOR OF
ST. PANCRAS.**—On Saturday evening the Bishop of
London preached a sermon to the inmates of St. Pancras
Workhouse. The Vestry Hall had been specially pre-
pared for the occasion, and was crowded with the
paupers, about 500 being present. The bishop preached
from Hebrews ix. 27, 28. Many of the officials attended
with the paupers.

THE PAUPERISM OF THE METROPOLIS.—A con-
ference of ministers of various religious denominations,
and of others interested in the social welfare of the
East of London, was held on Wednesday at Sion College,
to consider "the desirableness of united action, with a
view of checking the increase of pauperism and im-
proving the condition of the deserving poor." The
Rev. F. G. Bloomfield presided, and there were
present the Earl of Lichfield, the Right Hon. G. J.
Goschen, M.P., President of the Poor-law Board; Mr.
Corbett, Poor-law inspector; Alderman Abbiss, the
Revs. T. Rowsell, W. Rogers, E. Cachemaille, S.
Hansard, M. Gibbs, T. Richardson, F. Kitto, W. Tyler,
F. S. Lea, J. Cohen, G. D. Griffin, Landshoot, Millman,
Canon Povah, Dr. Stallard, several Roman Catholic
priests, dissenting ministers, Jewish rabbis, and numer-
ous guardians of the poor. The Rev. Mr. Cummings
proposed the first resolution, declaring that it is
desirable to promote concerted action among those
engaged in the distribution of charitable relief in the
City and eastern districts of London, with a view to
prevent wasteful expenditure, to check the increase of
pauperism, and to make adequate provision for the
deserving poor. Alderman Abbiss, chairman of the
City of London Guardians, seconded the motion, which
was supported by the Rev. Mr. Green, Roman Catholic
priest; Mr. Alex, a member of the Jewish Guardians;
Mr. Goschen, M.P.; the Rev. Mr. Tyler, Congregational
minister; Mr. Charrington, Dr. Stallard, Mr. Corbett,
the Earl of Lichfield and other gentlemen. The
resolution was adopted, with only two dissentients.
Mr. R. Wigram moved the second resolution, appointing
a committee to consider the best means of carrying
the first resolution into effect, and to report to a future
conference. The Rev. J. Cohen seconded the motion,
which was carried unanimously. A committee was
then appointed. Mr. Goschen in moving a vote of
thanks to the chairman, said that the guardians would
give the charities all the information they could. They
would do as England did in her commercial policy;
they would give it freely without reciprocity, but they
would take any reciprocity which the charities thought
proper to offer in return.

**THE POOR-LAW BOARD AND THE ST. PANCRAS
GUARDIANS.**—On Monday, being the day appointed
by the Poor-law Board for the election of seven persons

by the St. Pancras guardians to fill the office of
members of the Metropolitan Central District Asylum
Board, there was a very large attendance, in conse-
quence of the understanding that there would be a
contest between the old and new guardians and ex-
cessive members. Mr. Ross took the chair and at that
time the ex-officio members present were Sir W. H.
Bodkin, assistant judge, Mr. Wyatt, J.P., Mr. Wood-
ward, J.P., Mr. Miles, J.P., Mr. Robertson, J.P.,
Mr. Bunker, J.P., Mr. Henry, J.P., Mr. W. S. J.P.,
Mr. Twining, J.P., and Mr. Stilwell, J.P. with
four old members exclusive of the chairman, made up
the majority of 14, whilst the new guardians only mustered
11 out of their 12 members. The voting then proceeded.
There was a great uproar at the commencement of
the proceedings, and much ill-feeling was caused by the
presence of the police. An attempt was made to carry a
resolution that they should withdraw, but the motion
was lost. Sir W. Bodkin moved that the special
business of the election of members to the Asylum
Board take precedence, which being seconded, Mr.
North objected, and said that he had himself a motion
on the paper as to the "scandalous conduct of Mr.
Wyatt," who he would take care should not escape
censure if it remained there for six months. The
uproar was renewed, the speakers indulging in many
remarks of a personal nature. An attempt was made
to postpone the election, but it was negatived.
Eventually, in order that the business might be got
through, the majority proposed a compromise, by which
four members should be elected by the old party and
three by the new. This was assented to and the follow-
ing were proposed and elected, the show of hands for
each, however, varied.—Mr. Ross (the chairman), 17
votes; Dr. Edmunds, 20, Mr. Chandler, 18, Mr. Bower,
17, Mr. Miles, J.P., 20, Mr. Robertson, 15, Mr.
Watkins, 14. Mr. Wyatt voted for Mr. Watkins.
Mr. North then moved his resolution condemning
of Mr. Wyatt, but on a vote being taken, it was decided
not to allow the motion to take precedence of other
business. Mr. Wyatt then rose to go, and remarked,
"You will not get anything by intimidation." As he
was leaving, Mr. Watkins shouted, so as to be heard by
the non-members, who were in strong force, "I hope
that Mr. Wyatt will go out as safe as he came in."
Fearful uproar followed this remark, and Mr. Wyatt
was immediately surrounded and treated in a
threatening manner, the crowd following him down
the steps and out of the hall. The scene inside among
the ratepayers became indescribable, several fights
appearing imminent. Business was altogether stopped
for a time, and it was resumed amidst the greatest con-
fusion. The Chairman said he never knew the rate-
payers to disgrace themselves so much before.

ST. PANCRAS WORKHOUSE NURSERY.—On Monday
evening another inquest was held on six more persons
who had died in St. Pancras Workhouse, two being
children who were inmates of the workhouse nursery,
and as to whose deaths inquests had been demanded by
their mothers. The medical evidence showed that the
cause of death was congestion of the brain, accelerated
by the atmosphere of the ward, which had been very
bad, arising mainly from foul drainage. The jury
returned a verdict that the deceased died from the
mortal effects of congestion of the brain, accelerated
by the unsanitary condition of the infant nursery in
St. Pancras Workhouse.

THE ORGANISATION OF RELIEF TO THE POOR.—
The plan for systematising the regular and irregular
charity of the metropolis is assuming a practical form,
and the operations of the various committees, both at
the East and West End, have already commenced.
At the meeting of the Marylebone guardians on
Friday, a special committee, which had been appointed
to confer with a deputation of the St. Marylebone
charitable relief committee, as to the best means of
giving effect to the recommendations contained in the
minutes of the Poor-law Board, submitted a report
on the subject of their interview, and on their recom-
mendation the following resolutions were unanimously
agreed to:—1. That the clerk be directed to supply the
St. Marylebone charity organising committee with
copies of the weekly lists of applications, and with an
alphabetical list, either monthly or otherwise, of all
applications for relief, with the results thereof. 2.
That the relieving officers be directed to avail them-
selves of the information afforded by the charity orga-
nising committee with respect to all applications for
relief. 3. That the relieving officers be directed to
investigate cases residing in their several districts
that may be referred to them by the charity orga-
nising committee as being, in the committee's opinion,
suitable for poor-law relief, the charity organising
committee, on the other hand, undertaking to
consider cases referred to them by the relieving
officers or by the guardians, on account of such cases
requiring relief other than can be legally given from
the rates. 4. That these recommendations be adopted
by way of trial, and on the understanding that the
charity committee reciprocate information, and that a
copy thereof be forwarded to the Poor-law Board, in
reply to the letter forwarded with the minute on poor
relief. The guardians of the Holborn Union have
appointed a committee to obtain information as to the
number and extent of the charitable agencies within
the union, and their relation to the pauper class, with
the object of bringing such information under the
notice of the president of the Poor-law Board. On
Tuesday evening a meeting was held at the St. Mary
Chamber school-room, Golden Lane, for the pur-
pose of considering the best means of organising
charitable relief in that neighbourhood, Mr. W.
McCullagh Torrens in the chair. Resolutions were
carried unanimously to the effect that the pre-
sent distribution of charitable funds tended to
waste, mendicancy, and imposture, and that,
pending the working of a more complete and general
action, it was desirable to make some attempt

in the immediate neighbourhood to improve the distribution of charitable relief. The first anniversary meeting of the Bluebeard Mendicity Society was held on Tuesday, the Earl of Lifford in the chair, when it was stated that during the first year of its existence the society had examined over 2000 cases, and given assistance, through their relieving officer, in 117 cases. The result of the issuing mendicity tickets had been almost to clear the district of tramps and professional beggars, thereby enabling the society to give substantial help to cases of real distress. Mr. Talbot, M.P., detailed the steps taken by the magistrates of Kent in general sessions to check the alarming increase of vagrancy in that county, and expressed an opinion in favour of more stringent action on the part of the magistrates and police in punishing confirmed impostors and habitual vagrants by sentencing them to terms of imprisonment.

DESTRUCTIVE GALE.—The high winds which have blown over London for some days past culminated on Wednesday morning in a terrific gale, accompanied by a heavy fall of rain and hail. In some parts of the metropolis the hailstones were as large as marbles, and numerous windows were broken. The wind blew down several chimney-stacks in the southern districts. One fell at Upland House, Dulwich Wood Park, the residence of Mr. W. O. Melhuish, and breaking through the roof, buried in the ruins a bed containing a nurse, nursemaid, and child. They were all, however, rescued without serious injury, though in an exhausted state. The gale lasted until late on Thursday night, accompanied by heavy falls of rain, by which the meadows and gardens at Hampton, Esher, and the surrounding districts, were flooded to the depth of 3 feet. On the river several barges were sunk or damaged, and great destruction of property is reported from the low lying districts on the banks.

THE CLERKENWELL EXPLOSION.—On Monday a meeting was held at the Vestry Hall, Clerkenwell, for the purpose of presenting the Rev. Robert Maguire, chairman, and Mr. Robert Paget, hon. secretary, of the Clerkenwell Relief Fund, with testimonials in acknowledgment of the energy and labour bestowed by them in raising and administering the fund of 10,000*l.* in aid of the persons who suffered from the Clerkenwell explosion two years since. The testimonials consisted of elaborately engrossed records of the services rendered by those gentlemen, with a silver salver to the former, and a purse of 100 guineas to the latter.

FORGERY OF BILLS OF LADING.—Two men, named Brown and Terry, were brought before the Lord Mayor, on Saturday, charged with forging and uttering bills of lading, with a view to defraud the Monarch Insurance Company. Brown was stated to have been for some time engaged in a series of frauds, and after much evidence had been given the prisoners were remanded.

EXECUTION OF THE WOOD GREEN MURDERER.—On Monday morning Frederick Hinson, who was condemned to death at the last session of the Central Criminal Court for the murder of a woman named Death, with whom he had lived for some years, and of a neighbour, named William Douglas Boyd, of whom he was jealous, underwent the last sentence of the law within the walls of Newgate. The culprit, almost to the last, entertained a belief that his sentence would be commuted. During his last moments the culprit became so faint that he had to be supported upon the scaffold by a turnkey, and when the drop fell he appeared to be dead almost in an instant. The prison bell tolled while he was proceeding to the scaffold, and when the drop fell a black flag was hoisted at the entrance of the gaol. A notice was also affixed outside the prison stating that the execution had taken place. The only persons present were the officials of the prison, some of the officers of the sheriffs, and the reporters.

THE PUBLIC HEALTH.—The Registrar-General's Weekly Report states that in the week that ended on Saturday, Dec. 11, 4699 births and 3873 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 31 per 1000 persons living, being 29 per 1000 in London, 37 in Edinburgh, 25 in Dublin, 33 in Bristol, 25 in Birmingham, 30 in Liverpool, 33 in Manchester, 32 in Salford, 41 in Sheffield, 31 in Bradford, 25 in Leeds, 29 in Hull, 30 in Newcastle-upon-Tyne, and 43 in Glasgow. In Paris the annual rate in the same week was 24 per 1000. In London the births of 1136 boys and 1131 girls, in all 2267 children, were registered last week. In the corresponding weeks of 10 years 1859-68, the average number, corrected for increase of population, was 2107. The deaths registered in London during the week were 1769. It was the 40th week of the year, and the average number for that week, corrected for increase of population, was 1608. The present return is therefore 151 above the estimated amount.

Provincial.

BURSLEM.—A town's meeting was held at Burslem on Wednesday evening in support of the Education League. The Chief Bailiff presided, and there was a large attendance. Messrs. Dixon, M.P., and Melly, M.P., Mr. Davies, stipendiary magistrate for the Potteries; Messrs. W. Woodall, T. Hulme, and other influential gentlemen were on the platform. Resolutions in favour of the League were passed with enthusiasm.

CAMBRIDGE.—On Monday a new gasometer, which had been erected in this town at an expense of 5000*l.*, was upset by a gale of wind, when the gas in escaping became ignited by a light some distance off. The whole of the gas was not destroyed at once, but continued for some time burning in an immense flame about 20 feet wide by 9 or 10 feet high. In about an hour the contents of the gasometer were consumed, and the flames ceased. About 70*l.* worth of gas was

consumed. Cambridge remained in darkness during the night, as the street lamps could not be lighted.

CARMARTHEN.—Four nurses from Guy's Hospital, accompanied by Mr. Griffiths, arrived at Carmarthen on the 8th inst., and proceeded that night to Pencader, distant about two miles from Llethernoyadd, the home of the "fasting girl," Sarah Jacob. The following day was occupied in a thorough examination of the room and bed in which the girl had been accustomed to sleep. This examination was made by the nurses in the presence of Dr. Lewis of Carmarthen; Dr. Corsellis and Dr. Davies of Llandyssul; Drs. Rowland and Herder of Carmarthen; the Rev. W. Jones, vicar of Llanfihangel; the Rev. W. Thomas of Llandyssul; and Mr. John Griffith, all of whom signed an official report stating that the room, the furniture, the contents of the drawers, the bed on which the girl was lying, and its coverings, her body, clothes, and hair had been fully examined, and that nothing of the nature of food had been found anywhere. The watch then commenced on the understanding that it is to continue for 14 days, at the end of which time a report is to be made; and if any doubt should then reveal it is probable the watch may be continued. The expenses attending the watch are to be defrayed by public subscription. A meeting of the committee was held at Pencader on Monday evening, when it was stated that the four professional nurses had not detected any food being conveyed to the girl, and were morally certain that she had not partaken of food. Up to Tuesday the girl had been watched for four and a half days and nights by two nurses, who are constantly with her, one on each side of her bed. Mr. H. Davies, a surgeon, who visited the girl on Sunday afternoon, found her pulse at 112 per minute, and her appearance natural and healthy. On Wednesday Dr. Lewis, of Carmarthen, visited her, and found that her pulse was 120 per minute, and that she was precisely the same weight as when the watching commenced, and there was no symptom of any physical prostration. The nurses reported that there had been no attempt to convey food to the child clandestinely, nor had she expressed the slightest wish to have food of any kind.

GLOUCESTER.—During the gale of Wednesday morning the chains of a large gasometer, recently erected in this city at a cost of 4000*l.*, were broken by the violence of the wind, and a rent having been caused in the gasometer by the fall of one of the chains upon it, about 70,000 feet of gas escaped, but though a light was near, no explosion occurred.

EGHAM.—The poachers who made so murderous an attack on her Majesty's keepers about a fortnight ago, in an encounter near the ruins at Virginia Water, were brought before the county magistrates last week and fully committed for trial. Both the keepers are still in a dangerous condition from the savage treatment they received, although hopes are entertained of their ultimate recovery.

ETON.—The Christmas vacation at Eton College commenced yesterday. During the last three weeks of "the half" measles have been very prevalent in the school, and there have been also a few slight cases of scarlatina. Five boys are at present in the sanatorium on the Eton Wick Road. A meeting of the new governing body was held at the office of the Public Schools Commission last week, when the number of the governing body was completed by the election of two members in addition to those previously elected. The governing body as now constituted is as follows:—The Provost of Eton, the Provost of King's, members *ex officio*; the Master of Balliol, elected by the Hebdomadal Council of the University of Oxford; the Master of Trinity, elected by the Council of the Senate of the University of Cambridge; Professor Stokes, elected by the President and Council of the Royal Society; Sir Roundell Palmer, Q.C., nominated by the Lord Chief Justice; Professor Lightfoot, D.D., elected by the Masters of Eton; the Rev. W. A. Carter, the Right Hon. S. H. Walpole, Lord Lyttelton, and the Earl of Morley, elected by the members of the governing body.

LEEDS.—On Saturday afternoon the men who were convicted a few days previously at Leeds, before Mr. Justice Lush, of robberies with violence at Leeds, Sheffield, Bradford, and Whitkirk underwent the punishment of 24 lashes each with the cat-o'-nine-tails in the borough gaol.

MAIDENHEAD.—Mr. Headington, of Bray, having made known to the Queen that the widow of an agricultural labourer named Plumridge, 101 years of age, living on the small income derived from the savings of her husband and herself as agricultural labourer, at Beach-on-Sea, near Bray, had repeatedly expressed a desire to see her Majesty, the Queen, on the 8th inst., in the most considerate manner gratified the wishes of Mrs. Plumridge. Her Majesty, accompanied by Princess Beatrice, and attended by the Hon. Caroline Cavendish, drove to the residence of Mr. Headington, who had the honour of showing her Majesty the way to Mrs. Plumridge's cottage. It is needless to say how much the old woman felt honoured by the visit, and by the kind way in which her Majesty and the princess conversed with her.

RICHMOND (YORKSHIRE).—On Saturday, John Mangles, a respectable, well-dressed man, who is well connected, but described as having no fixed residence, was charged with attempting to upset a passenger train by placing a sleeper on the line of rails on the 27th ult. The sleeper was soon after found between the rails, having been struck off by the guard bar, which was broken in doing it, the train having a narrow escape. It was proved that the prisoner was seen walking on the railway some time before, and that while at a public-house afterwards he appeared uneasy and startled, and debated whether he should travel by the train. Ultimately he went to Moulton and took a ticket for the Scorton Station, and rode in the train.

Though the engine knocked the sleeper and no shock was felt prisoner got out at said to two witnesses that they had run between the stations. He had also told in the afternoon that it might be the might see her. He was committed to York assizes.

PLYMOUTH.—A large French vessel, *merce de Paris*, from Rio Janeiro to ashore at Bigbury Bay, near this port night. Her cargo, composed of cotton and saved. Efforts were made on Sunday to but proved unsuccessful, and it is feared become a total wreck.

RUGBY.—Great dissatisfaction exists of the election of Mr. Hayman, Temple in the head mastership of ment, it is alleged, having been made than those of academical distinction and on the strength of testimonials in reference to another appointment. strong at Rugby itself, especially are intimately connected with the prosperity of the school, that 20 of them have presented a memorial to the trustees to them to reconsider the recent nomination to mastership.

WALLINGFORD.—On Sunday morning Richard Green, a dealer in wood, and known to be possessed of a considerable sum of money, was murdered at the bottom of his cart, opposite his house at Stoke Row, near this town. The supposed to have been committed on Saturday between Shillingford and Benson, and the robbery was home uninterrupted, a distance of seven Robbery does not seem to be the motive for the as the old man's money and watch were both upon him. Some deeds and money were missed from his house, and his son and nephew been taken into custody. An inquest was body at Stoke Row on Monday, when a Wilful Murder against some person at present was returned.

WINDSOR.—On Monday the foundation-stone new chancel of the parish church of New Windsor laid by the Princess Christian, in the presence very numerous congregation. It is intended to reconstruct the church, the proposed work new chancel, the re-seating of the interior, other alterations, both in the exterior and as will bring it more into harmony with the character of ecclesiastical buildings. The erection the new chancel will considerably enlarge the and afford an opportunity for altering the pew, which is so inconveniently situated that the participants of it cannot hear the sermon. The cost of entire reconstruction is estimated at about but at present only a portion of the work is contemplated, consisting of the erection of and organ chamber, the re-seating of the and the reconstruction of the The Bishop of Winchester and a large clergy, the Mayor and several members of the tion in their robes were present at the Monday. The religious service was conducted by the Vicar of Windsor, the responses being by parish choir. A silver trowel having been the Princess, her Royal Highness and laid the stone. The Bishop of Windsor delivered a short address, in the course said that he rejoiced infinitely in being was about to conclude his ministrations to take his humble part in the work of the and wish them God-speed in their undertakings.

WOKING.—A daring attack was made afternoon on Captain Bramley, the Woking Convict Prison. As the convict out of chapel, after Divine service, one of stated to have once been a prize-fighter, rushed the Governor, who was watching the prisoners in the chapel, and hit him twice in the breast in the loin with a round piece of old iron, which was filed to a point, but was rather blunt. A instantly sprang upon the man, who was and secured him. The Governor's wounds were regarded as dangerous.

WOLVERHAMPTON.—On Friday morning 120 colliers went down one of Lord D. this town, for their day's work. At noon in the ordinary course of things, would down to them, but an hour previously the drawing engine, about two tons in weight, snapped. The skips, one ascending and descending, were thus fixed about 100 feet impeded in the more distant workings. got air enough, but no food could be passed. The difficulty was not surmounted until 11 Friday night, when after an enforced abstinence of 17 hours they were all brought to the surface.

YARMOUTH.—The steamer *Xanthe*, of Shields for Gibraltar, with coals, was Saturday in the Wold by the steamer *R. L. Shields*. The *Xanthe* sank in 25 minutes and cargo were valued at 15,000*l.*

Ireland.

MILITARY PRECAUTIONS.—It is stated consequence of information which Government through private sources had received instructions to prepare seven flying under picked officers, ready to move at an ing on any parts of the country threatened with disaffection. On Saturday a squadron of goon Guards marched from Kingstown to

head of the well-known firm of Parsons, Thomson & Co., the University bankers.

WILLS—The will of Admiral Sir Robert Lambert Baynes, K.C.B., Admiral of the Fleet, has been sworn under 16,000 l.

Markets.

COVENT GARDEN.—Dec. 18.

Trade has been very quiet here during the past week, owing to the absence of orders from provincial markets.

FRUIT.

WHITECHAPEL, Thursday, Dec. 16.

Fine Meadow Hay 75s to 82s; Inferior do. .. 60 72; Prime New Hay .. 70 72.

METROPOLITAN CATTLE MARKET.

MONDAY, Dec 13.

This being the "Great Market," we have a larger supply of Beasts than on ordinary occasions. The number is considerably larger than on the corresponding day last year.

Table with columns: s. d. s. d. Best Scots, Herefords, &c. 5 6 to 5 8; Best Shorthorns 5 2 to 5 6; 2d quality Beasts 3 4 to 4 0.

THURSDAY, Dec. 16

The number of Beasts is not larger than was expected, a considerable proportion consisting of those left over from Monday.

selling as on Monday. Our foreign supply consists of 426 Beasts, 2065 Sheep, and 257 Calves.

Table with columns: s. d. s. d. Best Scots, Herefords, &c. 5 6 to 5 8; Best Shorthorns 5 2 to 5 6; 2d quality Beasts 3 4 to 4 0.

MARK LANE.—MONDAY, Dec. 13.

The supply of English Wheat to this morning's market was very small, but to effect sales it was necessary to submit to a decline of 1s. per qr. upon the prices of this day's night.

Table with columns: PRICE PER IMPERIAL QUARTER, s. s. s. s. WHEAT, Essex, Kent, Suffolk. White 39-48; Red 36-47; fine selected runs 41-52; Talavera 55-57; Norfolk 39-52; Foreign 39-52.

FRIDAY, Dec. 17.

The Wheat trade throughout the markets of the kingdom has continued to suffer from the accumulation of stocks noticed in our last, and the fresh arrivals at our seaports far in excess of the consumptive demand.

The arrivals of English and foreign grain this week were moderate. There was a fair attendance at this morning's market.

ARRIVALS.

Table with columns: Wheat, Barley, Oats, Flour. English 1220 qrs, Irish 1550 qrs, Foreign 13,370 qrs.

LIVERPOOL, Dec. 14.—In the corn market Wheat was in moderate consumptive demand at 1d. to 2d. per cental reduction.

AVERAGES.

Table with columns: Wheat, Barley, Oats. Nov 6 47s 1d, 13 46 11, 20 46 8, 27 45 6, Dec 4 44 3, 11 43 8.

SEED MARKET.

Our markets have been thinly attended during the past week, and, as is usual at this time of the year, only a very limited amount of business has been passing.

Home News.

THE COURT.—The Queen, accompanied by Princess Louisa, Princess Beatrice, Prince Christian Victor, and Prince Albert of Schleswig-Holstein, left Windsor on Saturday morning for Osborne, for the Christmas holidays. The royal party crossed from Gosport in the yacht Alberta, and arrived at Osborne at 2 p.m. On Sunday the Queen and Royal Family attended Divine service at Osborne. The Rev. R. Duckworth officiated. Sir William Jenner, who accompanied Prince Leopold from Windsor on Friday, left Osborne for London. On Monday the Queen went out in the grounds with Princess Louisa, and drove out in the afternoon with Princess Beatrice. On Tuesday morning the Queen walked in the grounds with Princess Beatrice. In the afternoon her Majesty drove out with Princess Louisa. On Wednesday the Queen went out in the grounds with Princess Louisa. The Duke and Duchess of St. Albans arrived on a visit. On Thursday Prince and Princess Christian arrived from Frogmore.

THE PRINCE AND PRINCESS OF WALES.—The Princess was churched on Monday at the Chapel Royal, St. James's. Her Royal Highness afterwards drove out. On Wednesday evening the Prince arrived at Marlborough House from Sandringham. The christening of the infant daughter of their Royal Highnesses took place on Thursday.

THE ARCHBISHOP OF CANTERBURY is still progressing favourably, although regaining strength but slowly. The Government have consented to the request of his Grace for the appointment of a suffragan. The Archbishop is anxious it should be known that this application has been made quite independently of his present illness, and that no further step will be taken for several months, in order to ascertain whether his Grace's recovery is as complete as there is every reason to hope.

THE DUCHESS OF ARGYLL has so far improved that there are now hopes of her recovery. Sir James Simpson, who had been in attendance from the beginning, and Dr. Radcliffe, who was summoned from London last week, have both left Inverary Castle, and the latest telegram received in town states that the Duchess has passed another good night.

LORD CAIRNS.—The report that Lord Cairns has left England on account of his health is contradicted on authority. His lordship, who has proceeded with Lady Cairns and his family to Mentone, is perfectly well, and intends returning to be present at the meeting of Parliament.

REPORTED DEATH OF SIR STAFFORD NORTHCOTE BY DROWNING.—A rumour was current in Devon on Saturday that Sir Stafford Northcote had been lost in Sir George Stucley's yacht Deerhound, on her voyage home from Egypt. The report was wholly without foundation, the right hon. baronet having arrived in Paris in perfect health.

CONSECRATION OF THREE BISHOPS.—On Tuesday morning Dr. Temple, the newly-elected Bishop of Exeter, Lord Arthur Herve, the new Bishop of Bath and Wells, and the Rev. W. H. Stirling, the first Bishop of the English congregations in the Falkland Islands, were consecrated in Westminster Abbey under a commission issued by the Archbishop of Canterbury to the Bishops of London, St. David's, Worcester, and Ely. The Abbey was crowded to excess; but the commencement of the ceremony was delayed for some time by an unexpected incident. After the consecrating bishops, the bishops elect, and other dignitaries had assembled in the Jerusalem Chamber, the Bishop of London announced that he had received protests from the Bishops of Gloucester, Hereford, Lichfield, Lincoln, Llandaff, Bangor, Rochester, and Peterborough, against the consecration of Dr. Temple, as the author of a production condemned as heretical by both Houses of Convocation. More than one of these communications had been forwarded at a very late period, and some, it was understood, without any intimation of their contents being conveyed to Dr. Temple. The character and extent of the objections which they urged were laid before the prelates for their decision, and in so doing the Bishop of London quoted a number of authorities as to the course to be pursued under the circumstances, and stated that, as the clergyman to be consecrated was of blameless life, and had never been accused in any court, they were bound to obey the Royal mandate and perform the ceremony. In conclusion he expressed a hope that even then Dr. Temple would make a declaration of his orthodoxy. Dr. Temple, however, made no answer to this appeal, and the three other Bishops named in the Commission having been invited to deliver their opinions, expressed concurrence in the view taken by the Bishop of London, and their desire to proceed with the ceremony of consecration. The oath of allegiance was therefore administered by the Vicar-General to each of the Bishops elect in turn, after which a procession to the sacarium was formed, and the consecration took place with the usual solemnities. The new Dean of Durham, Dr. Lake, preached the sermon. In addition to the protests of the eight Bishops, a memorial was presented on Saturday to the Archbishops and bishops, praying them not to consecrate Dr. Temple. The document was signed by 1490 persons, including the Marquis of Bristol, the Earls of Dartmouth and Buckinghamshire, Lords Fitzwaller and Eliot, Sir John Pakington, M.P., Sir W. Bagge, M.P., Mr. Dimsdale,

THE GARDENER,

A MONTHLY MAGAZINE OF HORTICULTURE AND FLORICULTURE.

NEW ARRANGEMENTS FOR 1870.

The Proprietors beg to intimate to their Readers that they have made new arrangements in regard to the "Gardener," which they trust will prove acceptable to their Subscribers, extend the usefulness of the Magazine, and secure a largely increased amount of public support. Commencing with the Number for January the duties of the Editorship will be jointly discharged by Mr. William Thomson, Dalkeith Gardens—who, the establishment of the "Gardener," has done so much to insure its marked success, and who will continue to work the benefit of his great practical experience—and Mr. Richard Dean, Ealing, London. The object of the Proprietors in adopting these new arrangements is to give to the "Gardener" a broader character than it has hitherto possessed, and to make it acceptable in all parts of the United Kingdom, by including the widest range of subjects related to Horticulture. Practically, the Proprietors seek to give to the work, which will be published in London, the tone and scope belonging to a national Horticultural organ. The general line which has been followed in the past, and which has proved so successful under Mr. Thomson's management, will be adhered to, a larger prominence will be given to Floriculture; and, especially in the Department of Florists' Flowers, every endeavour will be made to supply the latest and fullest information. Condensed reports of the leading Exhibitions, giving their salient and interesting features, will be furnished, and other matters coming under the same category; and under the head of "Notes of the Week" will be given such miscellaneous intelligence, likely to be interesting to amateur and professional Horticulturists, as may not conveniently come in under other headings. The heading of "Garden Requisites" will be duly chronicled all inventions and improvements of real value to the Horticulturist; while "Garden Economies," under which will be included Bee-keeping, Wine-making, Preserves, &c., will have due prominence. No exertion will be spared to render the "Gardener" a monthly manual for all classes interested in the subjects to which its columns are devoted; and the Proprietors confidently anticipate that, under the able superintendence of Messrs. Thomson and Dean, it will hold its own among the leading Horticultural organs of the day.

Yearly Subscription, 6s., or free by post, 7s., payable in advance.

OFFICE OF THE GARDENER:—37, PATERNOSTER ROW, LONDON, E.C.

Orders received by all Booksellers and Newsmen.

M.P. Mr. Fowler, M.P., General Percy Herbert, M.P., Mr. Collins, M.P., Sir W. Farquhar, Baron Dunsdale, Bishop Chapman, the Deans of York, Norwich and Llanthyll, Archdeacons of Oxford, Taunton and Bedford, the Vice-Chancellor of the University of Oxford, the Rev. Dr. Pusey, Rev. H. P. Liddon, Rev. Canon Bright, Mr. L. H. May, the Hon. G. J. R. Gordon, Sir Arthur Hall, Mr. E. J. Barr, Sir C. A. Vincent, Sir C. R. Lubbock, Sir F. Ouseley, the Hon. H. W. P. de la Hun, Lord Nelson, the Hon. J. M. St. John, &c. Archdeacon Dunsen, moreover, read a formal protest in the parish church of St. Brent at morning and evening prayer on Sunday, and the day of consecration was observed in his church as a day of special humiliation and prayer that what was being done that day might not be visited upon the Church and the people.

THE BISHOPRIC OF OXFORD.—On Wednesday, in accordance with the Queen's *congé d'élire*, the Dean and Chapter of Christ Church, Oxford, elected the Rev. John Fielder Mackarness to be bishop of that see, in the room of the Right Rev. Dr. Wilberforce, translated to Winchester.

BISHOPRIC OF SIERRA LEONE.—It is stated that the bishopric of Sierra Leone, now vacant, has been offered to the Rev. Dr. Massingham, of Warrington.

COURT APPOINTMENT.—The Queen has appointed the Marquis of Normanby to be Captain of the Hon. Corps of Gentlemen-at-Arms, in the room of the late Lord Foley.

PARLIAMENTARY MOVEMENTS.—Mr. Labouchere has retired from the contest for Southwark, in order to prevent a Conservative being elected through the Liberal votes being divided. In consequence of an announcement that Lord William Hay is not recognised as a probable candidate on the Liberal side in the event of a vacancy in the representation of Berwickshire, Lord Dunsen has intimated that he will not proceed with his canvass of the county. It is stated that Mr. Edward Wynn Williams, eldest son of the late Mr. David Williams, M.P. for Merionethshire, has been solicited to stand as a candidate for the county in the place of his father. Mr. Henry Whitmore having announced his intention to retire from Bridgnorth, Mr. William Henry Foster, son of Mr. William Orme Foster, of Apley, has accepted an invitation from the Liberal electors to become a candidate for the seat.

ORDER OF THE BATH.—Mr. Secombe, who has been Financial Secretary in the India Office every since the extinction of the Old East India Company as a governing body, has been appointed a Civil Companion of the Bath.

OFFICIAL APPOINTMENT.—Mr. Charles Kendall, who was Assistant-Secretary of the Royal Defence Commission for many years, has been selected to fill the new office of Registrar of Habitual Criminals, under the Habitual Criminals' Act.

THE ARMY.—It is stated that the appointment to all first commissions (ensignies, &c.) in the Army has been stopped at the Horse Guards by an order of Government, and that the intended reduction of the infantry will be effected by the reduction of two companies in each battalion throughout the service.

THE NAVY. It is rumoured that the scheme of naval retirement is nearly completed, and that under its provisions all officers, both executive and civil, with the exception of flag officers and civilians of corresponding rank, will be allowed to retire at 50 years of age, and will be called upon to retire at 55. It is stated that the Admiralty have abandoned the idea of further reducing the strength of the Royal Marines.

APPROACHING COLLECTION OF TAXES.—The *Law Times* says that on January 1 all the taxes for the next year will not only become due, but be payable, and must be actually paid. For all their assessed taxes, except the inhabited house duty, they will be compelled, under severe penalties, to take out licences from the Excise, precisely as now for the keeping of dogs. Therefore the whole of the year's taxes must be paid in advance, instead of being collected half-yearly at the end of the year as hitherto. The income-tax is to be collected in like manner; the whole year is to be paid at once, in the same month of January, already severely burdened by the compulsory payment in advance of the assessed taxes. It adds that it gives its readers this notice "that they may make early preparation to meet a demand whose existence the public does not appear to have yet realised, but which, when it is understood, will create a commotion such as has not been seen for many a day." The *Pall Mall Gazette*, echoing the general impression concerning the practical effect of the new system under which the assessed and income taxes are thus to be collected in January, had speculated on the chances which the widow of a man who might have paid his taxes in advance in January and have died in February would have if she endeavoured to make the Chancellor of the Exchequer refund the money. Mr. Lowe thereupon addressed the following letter to the *Pall Mall Gazette*.

"The question cannot arise, because there is 'no arrangement that we are to pay our taxes in advance.' The taxes which fall due in January, 1870—the land tax, the house tax, and Schedules A, B, and D of the income tax—are imposed in respect of the year beginning April, 1869, and ending April, 1870. Of this year nine months will have expired before any portion of these taxes is demanded. The hardship, such as it is, consists not in the requiring the taxes to be paid in advance, but in requiring them all to be paid at the same time. It must, however, be remembered that for this hardship, the necessity for which I regret, the public has had an ample equivalent. By this means have we, instead of imposing fresh taxation, as was generally and very reasonably expected, been able to take one penny off the income-tax, to repeal the corn and fire insurance duties, to abolish the license for the sale of tea, and to remodel the taxes on locomotion."

THE VOLUNTEERS.—The Secretary of State for War held a conference at the War Office on Tuesday with a deputation of commanding officers of Volunteers, for the purpose of discussing the question of

increasing the capitation grant to the Volunteers. The result of the conference is that Mr. Cardwell proposes to connect the force with the army under one general organisation, but so as not to interfere with the functions of lord lieutenants. He will increase the grant to 30s. per head for every efficient, provided the man should enter the second class or first 60 rounds, 10 of which are to be "volley bring." The old system of finances is to be reverted to—that is, all expenditure will have to be vouched at the War Office. Commissioned officers will have to qualify themselves by joining a line or militia regiment for a month, or by passing an examination. Camp equipage and targets will be provided without charge, and all Government stores delivered free. As to ranges, it transpired that an inquiry is pending to see if it is not possible to provide two ranges near London for the use of metropolitan corps. Company drills to count for capitation grant must be with not less than 12 files, and battalion parades four companies of 16 files.

Foreign.

FRANCE.—The *Times* of Monday published a telegram from its Berlin correspondent stating that France had proposed disarmament at St. Petersburg, Vienna, Florence, Berlin, and it was supposed, at London. Accounts from Berlin state on good authority that no such proposal had been made by France to Prussia, and that it was doubtful whether the proposition had been made to the other Courts. It is now said that the idea of a disarmament was some time since the object of an exchange of correspondence between the British, French, Russian, Prussian and Italian Governments; but it was not initiated by the French Government, and the letters which passed between the interested Governments left little chance of the idea assuming a more tangible form. M. Emile Ollivier has categorically contradicted the statement that since the meeting of the Legislative Body he had been intrusted with the formation of a new Cabinet. In the sitting of the Legislative Body on Friday, on the reading of the minutes of the previous sitting, an animated discussion arose in reference to the dismissal of the Juges de Paix. Several speakers accused M. Cremieux of having commenced the dismissal of magistrates in 1848. M. Keller asked leave to interpellate the Government on the system of the temporary importation of cotton into France. The debate on the doubtful elections was then resumed, and the report of the committee on the return of M. Locesne as the Deputy for Havre, which proposed to declare him duly elected, was brought up for discussion. The conclusions of the committee were agreed to, and the election of M. Argeuse was afterwards ratified by a majority of 159 to 72. In the sitting of Saturday, after the election of M. Leroux was ratified, the election of the Duke de Rivoli was declared valid without discussion. In the sitting of Monday M. Rochefort moved an interpellation asking the Government to explain why Deputy Paul Angulo, an exile from Spain for having done his duty, had been expelled from France at a time when the presence of a deposed Queen, who conspires in open daylight, was imposed upon the French nation. In the course of his remarks he said the severity of the French Government in apprehension of a Republic was reasonable, since that form of Government was near at hand. The Minister of the Interior replied that France showed a generous hospitality to all foreigners—kings or subjects. Angulo had entered France after attempting to create civil war, and had afterwards failed in the duties he owed as a refugee by preaching insurrection. Thereupon the Government put into operation the law of 1849. The Minister added that the Government was resolved to treat as they deserved all attempts to stir up disorder, and would render the minority harmless, not by force, but by moral authority, supported by the concurrence of the entire people. Enthusiastic applause followed this speech, and, after a remark from M. Rochefort that Belgium and Switzerland gave refuge to Republicans, the matter was allowed to drop. The report of the committee on the election of M. Delheil, which proposed its ratification, was brought up. The election of M. André was declared valid. In the sitting of Tuesday M. Schneider, having recovered from his recent illness, resumed the presidency. Count Lehon moved for leave to interpellate the Ministry respecting the system of government in Algeria. M.M. Jules Favre and Lebœuf also spoke on the subject, and the Government consented to the motion, and fixed Jan. 20 as the day when the interpellation should be brought forward. The verification of the elections was then resumed, and the return of M. Chagot was declared valid by a majority of 154 to 62. In the sitting of Wednesday the elections of Messrs. Rouain and Marion were annulled. The Emperor gave an audience on Sunday to General Banks, who left on Tuesday on his return to America. M. Delangle, the late Minister of Justice, died on Tuesday afternoon. The official journal announces the total loss, with all hands, of the Imperial despatch boat Gorgone, off Ushant, as she was returning from the Spanish coast to Cherbourg. The heart of King Richard I. of England, which has hitherto been preserved in the treasury of the cathedral of Rouen, has just been placed in the tomb recently erected for that sovereign in the choir of the building, thus realising the last wish uttered by Coeur de Lion. The leaden plate on the urn bears the inscription, "Hic jacet cor Ricardi, regis Anglorum."

SPAIN.—Petitions, bearing a considerable number of signatures, have been received from some of the chief towns of the Peninsula, including Santander, Orense, Gualajara, Grenada, and Cordova, praying the Cortes to elect the Duke of Montpensier King of Spain. Rumours are current in Madrid that a reconciliation has taken place between the Duke of Montpensier and

Queen Isabella. Should this reconciliation be effected, a major portion of the members of the Cortes will coalesce with the Progressist party. It is believed that the King of Italy has postponed his departure relative to the candidature of the Duke of Salaparuta for the throne of Spain, till the votes are filed up, the desiderata will be filled after these for the meeting of the Cortes on Friday. The Minister of Justice, brought in several bills, civil and criminal cases, and a bill for regulations for civil marriages. In the day the interpellation moved on by Senor Castelar, on the conduct of the Government, and in his speech all the tendencies of the late insurrection were discussed. The Ministers have gone on a hunting party to the mountains of Toledo, attended by a battalion of infantry. In consequence of the large amount of destitution in the city of Madrid, an excursion is viewed with dissatisfaction by

PORTUGAL.—General Da Silva Malhoa, the Minister of War, has resigned. It is believed that no change in the Ministry will occur until the Cortes open on the 9th of January.

PRUSSIA.—The Upper House of the Prussian Legislature adopted almost unanimously the Bill for the consolidation of the Prussian State, and were also passed for carrying into effect the Rhine Navigation Act of the 17th of October, for establishing Courts to settle questions connected with the navigation of that river. A petition for the removal of the Elbe dues, was received by the Government for consideration. The Emperor, a Roman Catholic military general, has been suspended from office by the King of Prussia, for marrying the Princess of Prussia, a Protestant. It is believed that the Emperor will be obliged to promise that their issue should be brought up in the Catholic faith. The young man was tried at the Berlin Criminal Court on the charge of attempting to shoot the King of Prussia while performing Divine service in the church. He was found guilty, and sentenced to three years imprisonment with hard labour.

BAVARIA.—It is stated that Herr Von Braun has been appointed Minister of the Interior, and that Herr Von Lutz, the Minister of Justice, has been appointed Minister of Public Worship.

AUSTRIA.—It is stated on reliable authority that a majority of the Ministry have forwarded a memorial to the Emperor, through Count Von Taaffe, President of the Council of Ministers, and that at the same time the minority of the Ministry have again tendered their resignations. It is believed that the result of the crisis, the address at the end of January will be the place in various parts of the empire in favour of the Constitution. In the sitting of the Reichsrath on Saturday the Minister presented several Bills relating to the tax and public debt. It is announced that the Government has declared itself ready to negotiate a treaty of commerce with Austria and Hungary on the footing of the most favoured nations.

DALMATIA.—Advices from Cattaro state that an interview took place on Tuesday at Ladin between General Auersperg and a deputation from the Italian insurgents, to arrange terms of submission. The insurgents, showed evident signs of demoralisation and discouragement, stated they had been designing agitators, and regretted having taken arms against the Government. Another meeting is to take place to-morrow, when a larger number of delegates will be present, who will be recognised officially as the negotiators for the submission.

RUSSIA.—It is reported that the Emperor intends visiting Jerusalem next spring, and will visit the Sultan en route. Further advices have been made respecting the conspiracies in the population in different parts of Russia, in connection with the abolition of serfdom anniversary. The plotters had circulated prosercription notices, and the names of high Government officials and members of the National party. The conspirators were signed chiefly for the promotion of Socialism. The leaders who have been arrested will be tried before the ordinary tribunals. Most of them were taken in Moscow, but it is clear that the plot extends to several of the leading towns.

ITALY.—The Crown Prince of Prussia, Prince of Hesse, and the Queen of Württemberg, arrived at Florence on Friday. The Crown Prince and the Prince Louis of Hesse went on Saturday to Spezia, where they embarked for Cannes to meet Princess Victoria. The King and the Princess Duchess d'Aosta left on Sunday for Turin. Mr. Elliot and Lady Elliot left Florence on Wednesday for Constantinople, by way of Trieste. It is believed that the Duchess of Genoa intends to request the resignation of the Spanish Minister relative to the speech of General Prim, in the Cortes, on the candidature of her son for the Spanish throne. The Chamber of Deputies adjourned on Saturday, February 1, after voting the provisional exercise of the Government provisional exceptional powers, until the sitting of the Senate on Tuesday. Count Digny defended his financial administration, and said he hoped that party passion would not be the same obstacle to Signor Sella as it had been to him. Signor Lanza, the new Prime Minister, expressed reservations respecting some statements contained in Count Cambray-Digny's speech, and said

the financial discussion until a more moment. The committee of the Senate to examine the Provisional Budget then of the day, expressing regret that provisional exercise of the Budget and exceptional powers for the year 1861, and declaring that the Budget could not be declared that the Budget could not be of the day, which was equivalent to a of confidence. Signor Scialoja reported the consequences might be, the Senate upon the order of the day as proposed then postponed to Wednesday, when made a declaration stating that, by the Government had pursued with regard to the of the Great Tax it in no way the prerogative of the Senate, and would avoid the course objected to. He that the Senate would withdraw the day. The committee thereupon substitute the record of Signor Lanza's the provisional exercise of the Budget, the exceptional powers relative to the Great Tax, were then approved. The afterwards indefinitely prorogued. The much swollen from the continuous rain, relations are apprehended at Pisa.

VATICAN.—The Pope on Sunday received 600 subjects at the Vatican. After speaking with individually, he delivered an Allocution in which he dwelt upon the significance of the Christmas Festival, and said, "God, in humility, declared pride to be the enemy of the author of revolution." His Holiness then assembly, amid loud applause. The third session of the Council was held on the election of 14 out of the 21 ecclesiastics to compose the committee on matters related. The principal members were Bishops of Cambrai, Utrecht, Pozen, Malines, and Westminster; the Bishops of Poitiers, and Padabour; the Primate of Hungary and the Primate of Hungary.

The assembly then members as a committee on questions connected with discipline. The Apostolic bull "Sedis," October, which, out of consideration for the are, reduces the number of cases of excommunication, was promulgated on the 10th. A telegram from Rome says that the idea of the infallibility of the Pope loses ground. The Holy See has entrusted the exact wording of the bull to the Commission, which, however, does not seem to take this responsibility. It is certain that the Holy See betrays a decided anxiety lest it endanger their own prerogative in extending the power of the Pope. A letter on Fenianism by the Rev. Mr. Lavelle has reached Rome, and created a very great interest among the Irish bishops who are attending the Council. In this letter Father Lavelle says that the Fenians have never been formally expelled from the Holy Sea. The letter has been translated into Italian, and placed before the Prefect of the Propaganda for the consideration of the congregation which Cardinal Barnabo presides. The Cardinal's decision is announced. There are 16 cardinal's hats at the disposal of the Pope, and it is asserted that his Holiness will not create any more during the Council.

Some Ministerial modifications will be made in the Government. Mr. Zaimis, however, the President of the Council, is at the head of the Government.

PARLIAMENTS.—In the sitting of the House of Commons on Wednesday, Mr. Cuddeposc made an interpellation respecting the intrigues of the Government on Jews in Roumania and the "Alance Israelites" at Paris in connection with the Government whether M. Boerexo promises to Earl Clarendon that the Government should obtain civic rights.

The subscriptions to the new loan closed on Friday. The number of bonds subscribed was 93,061, and the aggregate amount was 1,861,220*l*. Server Effendi, the bearer of the loan, has returned from Egypt, and had an audience with the Sultan. The settlement of the Egyptian debt is confirmed. Omar Pacha, the Egyptian Minister, has retired from the Government, as an acknowledgment of his services, has granted him the full pay and a pension for the remainder of his life.

In the despatch sent by the Earl of Salisbury to the Government, his lordship said that he had expressed the sentiments both of her Majesty and the British public. He also congratulated the Government and nation on the constant progress of a work so fruitful in the political and commercial results. M. de Lesseps, his lordship said that he had expressed the sentiments both of her Majesty and the British public. He also congratulated the Government and nation on the constant progress of a work so fruitful in the political and commercial results. M. de Lesseps, his lordship said that he had expressed the sentiments both of her Majesty and the British public. He also congratulated the Government and nation on the constant progress of a work so fruitful in the political and commercial results.

resolved on enforcing the removal of the Basutos from the disputed lands. Mr. M'Corkindale, the representative of the company, the owners of the river Asooto lands, has arrived in the Norseman, to hasten the settlement of the dispute between England and Portugal as to the ownership of Delagoa Bay. The Norseman's cargo includes a handsome tiger, Kaross, a present to Queen Victoria from the Basuto Paramount Chief, Mosoth, and a box of diamonds value 2000*l*.

INDIA.—A public subscription is being raised in Calcutta to defray the expenses incurred in the reception of the Duke of Edinburgh. A large number of native chiefs will be in Calcutta during the visit of his Royal Highness, and Sir Jansettee Jejeebhoy, Bart., and his two sons are also going there to meet him. It is reported that two out of the four remaining regiments of Madras Cavalry—viz, the 3d and 14*th*—are to be disbanded, and the officers to be posted to the 1st and 2d. A serious outbreak of convicts occurred in the Central Gaol at Rangoon on the 15th ult., resulting in the death of the superintendent of the gaol, Dr. A. Connell Mainzay. Mr. Candlish and Captain Beaumont have been taking evidence in Bombay and Poona in connection with the Abyssinian inquiry. They intend to pay a brief visit to Calcutta.

UNITED STATES.—The *New York Times* states that Mr. Motley, the United States' Minister in London, has induced the British Government to accept a proposition for the transfer of the negotiations on the Alabama claims to Washington. Eighteen of the Spanish gunboats sailed for New York on Sunday evening, it is supposed for Cuba. Congress has passed a concurrent resolution authorising the President to make preparations for the reception of the remains of the late Mr. Peabody, as merited by his glorious deeds, and in a manner commensurate with justice and the dignity of a great people. It is reported that Mr. Fish, the Secretary of the Treasury, will soon resign his post. President Grant has nominated ex-Secretary Stanton to the post of Associate-Justice of the Supreme Court, vacant by the resignation of Mr. Grier, and the Senate has confirmed the appointment by a majority of 41 to 11. Mr. Wells, commissioner of the revenue, in his report to Congress, recommends a modification of the tariff. In the sitting of the Senate, on the 16th, Mr. Carpenter delivered a long and impressive speech in favour of recognising the Cuban insurgents as belligerents. Mr. Sumner spoke in opposition. In the House of Representatives on the same day, Mr. Munger, Democrat, from Ohio, made a speech advocating repudiation of the National Debt. Great excitement followed. Messrs. Brooks, Randall, Kerr, and Woodward, all Democrats, denounced repudiation, declaring that their party was in favour of an honest payment of the debt. The House adopted, by a majority of 123 to 1, a resolution declaring that "any proposition directly or indirectly to repudiate any portion of the debt of the United States is unworthy of the honour and good name of the nation; and the House, without distinction of party, hereby sets its seal of condemnation on any and all such propositions." The one negative vote was given by Mr. Jones, a Democrat, from Kentucky. In the sitting of Tuesday, the House adopted the Bill which the Senate had passed by a majority of 49 to 9, providing for the reassembling of the old Legislature of Georgia, to include the negro members, and declaring the ratification of the Suffrage Amendment by that Legislature to be a condition which must be fulfilled previous to the admission of the Georgian delegation to Congress. The result of the election in Texas is still doubtful.

CANADA.—The Canadian Parliament adjourned on the 23rd inst. until January 11. The Ontario Legislature has voted a sum of 24,000 *dols.* to promote and encourage immigration.

RUPERT'S LAND.—Intelligence from Winnipeg territory announces that Governor M'Dougall and Colonel Dennis, Surrogate-General, were at Pembina in Dakota territory on the 6th inst., organising a force of Sioux Indians and English half-breeds to suppress the insurrection on the Red River. It is reported that Riell, the insurgent leader, had 460 men under arms. The latest accounts state that the insurgents continued to show a determined resistance to the authorities, and had seized the prominent Canadian sympathisers in the settlement, and taken possession of a fort situate opposite Pembina. Colonel Dennis was reported to be retreating. George Francis Train harangued a meeting at Buffalo on the 18th inst., expressing his indignation against the Government at Washington for permitting Governor M'Dougall to organise an armed force on United States' soil.

PARAGUAY.—Lopez is reported to have fled from Paraguay towards Bolivia with only a few followers, his last resources having been cut off, while he is himself in despair on account of the demoralisation of his remaining forces and the want of provisions. His troops had mutinied, and he had shot upwards of 200. The allied forces in small detachments were pushing into the interior without resistance, and were daily finding proof of the almost total dismemberment of Lopez's army.

Metropolis and its Vicinity.

UNIVERSITY TESTS.—A deputation from the meeting held at Cambridge on the 20th ult. in favour of the abolition of University Tests, and also one from Oxford, waited on Mr. Gladstone last week, to lay before him their views on this question. There were present from Oxford—the Dean of Christ Church, Rector of Lincoln, Principal of Brasenose, President of Trinity, Sir B. Brodie, Professors Price, Wilson H. J. S. S. S., and Jowett, and Messrs. Neale and R. and from Cambridge—the Masters of St. John's and Christ's, Professor Loveing, Mr. Bradshaw, librarian, Mr. W. G. Clark, late public orator; Mr. Ferrers, tutor, of Caius; and Mr. Porter, tutor, of Peterhouse. The Master of St. John's presented the memorial from Cambridge with 116 signatures. Mr. Gladstone, in reply, said that there were three points on which he was agreed with the memorialists—1st, That the time had arrived when this question ought to be settled by some legislative enactment; 2d, that it should be by a compulsory, and not by a permissive measure; and, 3d, that it should be made a Government measure. He could not, however, give any specific promise at present that the Government would introduce a Bill next session. He had not consulted his colleagues on the point, and at present there was more important questions which engaged their attention, and which must be settled before they could decide whether they could bring in a Bill respecting the tests. He urged, however, that the passing of any such measure next session must depend very much upon the degree of harmony which was likely to prevail in regard to its provisions, and pressed those anxious for the settlement of the question to try and arrive at as many points of agreement as possible, for if new questions were started, and had to be fought out at every turn, it might be impossible, if only from lack of time, to get a measure passed in the ensuing session.

WESTMINSTER SCHOOL.—The new governing body of this school has now been fully constituted, and the first meeting was held on Monday. The *ex officio* members are the Deans of Westminster and Christ Church and the Master of Trinity College, Cambridge. The others are Sir R. Phillimore, nominated by the Lord Chief Justice; Mr. William Spottiswoode, F.R.S., nominated by the Royal Society; Canons Nepean and Conway, elected by the Chapter; Rev. H. L. Thompson, by Christ Church; Mr. J. L. Hammond, by Trinity College, Cambridge. The co-opted members are the Earl of Devon, the Master of the Temple, the Bishop of Exeter, and Mr. D. Acland, M.P. The numbers of the school have risen since the question of removal was set at rest by the Public Schools Bill, and two additional masters have been appointed within the year.

METROPOLITAN PUBLIC WORKS.—The Commons' Select Committee on the subject of the proposed viaduct on the Thames Embankment, from Hungerford Bridge to Wellington Street, Strand, were instructed also to inquire whether any controlling power over public works in the metropolis is vested in and exercised by any Government department. The committee, over which Lord E.cho presided, examined several gentlemen, and the evidence given by them has just been issued. The committee came to the following resolutions:—"That no general control over works and buildings in the metropolis, constructed under Parliamentary sanction, is at present vested in any Government or public officer or department, other than that now exercised by departments of Government over the buildings that are under their superintendence. 2. That the design and execution of unsightly works, such as the Charing Cross railway station, and the railway bridges across the streets and roadways of the metropolis, as well as the juxtaposition of the London, Chatham, and Dover Railway Bridge and the new Blackfriars Bridge, across the Thames, may be reasonably attributed to the fact that railway, gas, water, and other public companies, or corporate and chartered bodies, have not been hitherto required to deposit any designs, elevations, or models of projected works or buildings when applying for Parliamentary powers. 3. That having regard to the improvement of the metropolis, and as a security against its further disfigurement, it is desirable that whenever any public company or corporate body applies for Parliamentary powers to enable it to execute any works or erect any buildings in the metropolis, or to raise money for the execution or erection of such works or buildings, it should, before coming to Parliament, deposit at the office of the Commissioners of her Majesty's Works and Public Buildings, plans and elevations, designs or models, in like manner as railway companies are now obliged to deposit plans and sections at the Board of Trade; and the committee recommend that the standing orders be amended so as to effect this object. 4. That the First Commissioner of Works should report to Parliament on such plans and elevations, designs or models, and that such reports should be referred to the Committee on Private Bills, in the same manner as the reports from the Board of Trade and Admiralty are now referred." The chairman prepared and proposed the first three of these resolutions, though not exactly in the form in which they now stand. He proposed, also, to recommend that a general control over all public works and buildings in the metropolis should be vested in the First Commissioner of Works, that greater importance and influence should be attached to his office; that there should be a Parliamentary under or assistant-secretary; that the Commissioner should be assisted by a Board or Council of Advice, representing the City, the Metropolitan Board of Works, the Royal Academy, the Institute of Architects, and the Institute of Civil Engineers, each of these bodies to name three of its members, from whom the Government should select one to serve for three years, and then be re-eligible, all these members

City Intelligence.

MONEY MARKET, THURSDAY.—BRITISH FUNDS: Consols are 92½ to 92½; New and Reduced Three per Cents, 91½ to 92; Bank Stock, 235 to 237; Exchequer Bills, March, 1*s.* dis. to 1*s.* pm., and June, par to 5*s.* pm.; India Five per Cents, 111½ to 112—FOREIGN: Turkish Five per Cents, 44½ to 45; Ditto Six per Cents, 67½ to 68½; Peruvian, 83½ to 84½; Spanish, 27½ to 27½; Italian, 56 to 56½; Lombards, 20½ to 20½; Egyptian, 79 to 79½; Mexican, 13½ to 13½; Argentine, 86 to 86½; Brazilian, 86½ to 86½; United States 5-20 Bonds, 85½ to 86; Erie, 17 to 17½; Illinois, 99½ to 100.

HOPE.—We have accounts from the 19. In the eastern province all the elections were likely to be contested. A Reform Bill. The Cape papers state that Buchanan was to have 600 oxen for his services with Teakelo, to urge the claims of the Free State Government had

1869.]

consequence of the distress existing among the population from want of employment, to the efforts of the society by sending the labour of this country to the colonies, where it was in demand, and land lying waste, and by the free use of some of the money and the free use of some of the vessels now lying idle. It was also proposed that the deputation should be appointed at a public meeting in favour of emigration to be held at the Hall on the 4th of next month, over which Sir George Grey consented to preside.

TAXATION AND THE INCOME-TAX.—A meeting, largely attended, was held in the Square Rooms on Monday evening, to discuss the subject of local taxation and the pressure of the Income-tax. The meeting was presided over by Dr. Brewer, and was largely attended.

Mr. Pocock moved the first resolution—“That this meeting views with great uneasiness the enormous increase of local taxation, more particularly so in the face of new reassessment.”

Mr. Fleming, Mr. Verey, Mr. Mason, and Mr. Stanton moved the next resolution—“That this meeting strongly protests against the enormous increase of 4 per cent upon the rate for water, and would recommend that some authority shall have the power of settling equitable terms for the consumers, with power of purchasing if these terms are not agreed with.”

Mr. Hughes seconded the resolution, which was supported by Mr. Nichols, and carried unanimously. Mr. Ross moved the next resolution—“That this meeting considers the mode of assessing the Income-tax exceedingly arbitrary and unfair, and would suggest that each person make a return on affidavit if required, and that the assessors take the usual remedy against all persons as on the present system. The power appears to be too strongly vested in the assessor, who may use or abuse it to the great annoyance and loss of his parochial neighbours. A long discussion followed, in which, in spite of the chairman's determination to call them to order, and to support Mr. Ross, several speakers denounced the Chancellor of the Exchequer, and expressed a hope that the tax would not allow him to carry out the ‘thimble-rick’ intended. The resolution was eventually put to the vote, and carried amidst cheers. Mr. Sapwell moved the next resolution:—“That this meeting looks upon the enormous increase of the assessed and income taxes in this country as a very heavy pressure at so early a period of the year.”

Mr. G. D. Laycock seconded the resolution. Mr. Downes said they were nine months behind in the tax, and emphatically denied that the tax would be paid in advance—in thirteen months they would have to pay three years' taxation. He also moved against Mr. Lowe's policy, and accused the Chancellor of the Exchequer of ‘hoodwinking’ the country. A speaker in the body of the room argued that the present Act of Parliament the Chancellor of the Exchequer had the power, not only to obtain the law months' taxes in advance up to April, but to obtain the months' taxes in advance in addition. During the speech the Chairman repeatedly called the speaker to order, despite cries of ‘He is speaking to the point.’ A gentleman near the platform complained that the Chairman was pressing the resolution too much. The Chairman said that they must listen to the ruling or he would leave the chair. The resolution was then put and carried.

OUTDOOR RELIEF.—A crowded meeting of Metropolitan Relieving Officers was held a few days since at the Strand, Mr. B. Wates, of Woolwich, in the chair. There were present relieving officers from every district of the metropolis. A paper was read by Mr. Nagle, of Stepney, on the question of outdoor relief, and the recent minute of the President of the Poor-law Board. In his paper, Mr. Nagle dealt with the conditions on which relief should be given to pauper widows and children, and what sort of relief should be administered. Respecting the children he suggested that the guardians should hold themselves in readiness to provide for them adequate relief in housing, food, clothing, and schooling. He next desired the guardians to insist upon the maintenance of the family being entirely satisfactory to the locality and adaptability. Should such a family not be readily found, he suggested that homes should, at the cost of the Union, be provided, in which all the fatherless families in receipt of relief should be required to reside. Further, he would suggest that every fatherless pauper child to school at the age of three or four years, and that should be the conditions upon which relief was given to the mother.

In the discussion which followed Mr. Stanley, relieving officer of Poplar, said that in the case of the widow who neglected the education of her children had a most beneficial effect. Mr. Slight, of Old Town, said he found that by constantly sending the widows before the Guardians they were enabled to send their children to school. Mr. Jones, with respect to outdoor relief to old people, that needle-rooms should be provided for them, and called ‘pauper pay,’ and that would not occur in the outdoor relief. Mr. Birch, of Holborn, said that it was the wish of many guardians that the recent minute of Mr. Goschen. He had, however, told several guardians that the minute was a consolidation of the orders of the Poor-law Board which had been made over and over again, and that a fair test and trial should be given

to the people seeking outdoor relief, to ascertain whether they would work or not. In Liverpool the guardians established a large workshop, in which they offered the people 1s. 6d. to 2s. a day, and out of 800 applicants for out-door relief only 400 accepted the work offered them. A better system of testing the applicants was wanted in the metropolis, so as to see whether they were willing to work. He had tailors, shoemakers, and people of every trade applying to him, and he hardly knew how to test them. No better plan, in his opinion, could be provided than to provide some place for the children, so as to leave the mother's hands free to work. Nothing, he thought, could be better than for the charity Boards to take up the question of paupers' residences, because in that point lay the great defect of the Poor-law system. He could speak of many Unions in the metropolis in which no care was taken as to whether the children were sent to school or not. Other speakers followed, and the proceedings closed with the usual vote of thanks to the chairman.

ORGANISATION OF CHARITABLE RELIEF.—A meeting of guardians and representatives of the charities in Westminster was held on Monday for the purpose of organising a system of relief which should reach all deserving cases, and prevent any from obtaining duplicate assistance. Mr. J. G. Talbot, M.P., took the chair, and among those present were the Earl of Lichfield, Lord A. Churchill, Mr. W. H. Smith, M.P., the Rev. A. Borodaile, the Rev. J. H. Hamilton, the Rev. Cyril Page, &c. A resolution based upon the suggestions of the Poor-law Board was unanimously adopted, the chief object aimed at being such a registration of voluntary relief, as that persons who make a living out of the gifts of the benevolent may not be able to obtain assistance from two or three sources, a circumstance which now is believed to be extremely common. The Rev. Samuel Martin, an eminent dissenting minister, said the movement had the support of the nonconformist bodies. On Monday a meeting was held at the Islington Institution to consider the propriety of organising and establishing a society for repressing mendicancy in that parish. The Rev. Daniel Wilson, the vicar, occupied the chair, and said that the increase of mendicancy was becoming very serious. There was a great number of persons in Islington who made a regular traffic of begging, and who traded upon the benevolence of the public. The class of mendicants who were the greatest evil were those who begged from house to house. There were places in the parish where mendicants could buy petitions already written, and obtain lists of all the charitable people residing in the neighbourhood. It was proposed to establish a society which would employ two officers whose business would be to inquire into the real condition of those who applied for relief. Those who were impostors would be detected, and those who were really deserving would be relieved, either by the existing charities in operation in Islington, or, when these failed to meet a case, by the funds of the society. Mr. Hill explained at some length the advantages and the working of this system, and said that it had been successfully carried out, in co-operation with existing relief societies, in the parishes of St. George, Hanover Square, and Marylebone, in which districts a vast amount of imposture had been detected, and at the same time many deserving poor relieved. Resolutions approving of the proposed plan and appointing a committee were agreed to.

FORGERY OF BILLS OF LADING.—On Monday the two Gravesend boatmen, Brown and Terry, who were charged with a series of extraordinary frauds upon insurance companies, were again brought before the Lord Mayor at the Mansion House. The evidence showed that the success of these frauds, which extended over a whole year, appears to have been due to the boldness with which the prisoners had carried them into execution, and that the insurance companies had been robbed to the extent probably of 1200l. The prisoners were again remanded.

THE LATE MURDERS IN ABYSSINIA.—It is reported that the expenses incurred in recovering the remains of the late Mr. Thomas Powell, who, with his wife and others, met their death in so sad a manner while on a hunting expedition in Abyssinia last spring, amount to more than 15,000l. Chiefs had to be largely propitiated by costly presents, and Egyptian soldiers had to be employed in carrying out this mournful duty. One chief, or sheik, on being asked what form his present should assume, replied that he wished for the full uniform of a British general. His fancy has been complied with, and the cocked hat, plumes, sword, &c., are now on their way to Abyssinia. Mr. Henry Powell, who, with Mr. Jenkins, went out to recover the remains, has since his return suffered severely from ill-health.

THE PUBLIC HEALTH.—The Registrar-General's Weekly Report states that in the week that ended on Saturday, Dec. 18, 4530 births and 3630 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 29 per 1000 persons living, being 26 per 1000 in London, 36 in Edinburgh, 24 in Dublin, 30 in Bristol, 29 in Birmingham, 33 in Liverpool, 33 in Manchester, 32 in Salford, 34 in Sheffield, 30 in Bradford, 30 in Leeds, 29 in Hull, 26 in Newcastle-upon-Tyne, and 40 in Glasgow. In Paris the annual rate in the same week was 26 per 1000. The rate in Berlin during the seven days ending the 16th inst. was 26 per 1000. In London the births of 1145 boys and 1034 girls, in all 2229 children, were registered last week. In the corresponding weeks of 10 years 1859-68, the average number, corrected for increase of population, was 2204. The deaths registered in London during the week were 1566. It was the 50th week of the year, and the average number for that week, corrected for increase of population, was 1541. The present return is therefore 25 above the estimated amount.

Provincial.

ALDERSHOT.—A Government inquiry, which is likely to have an important bearing upon the question of the utilisation of sewage and the liability of Local Boards of Health to execute works of drainage, was opened on Monday at the office of the Aldershot Local Board of Health. The Board has recently been threatened with proceedings in the Court of Chancery in consequence of an alleged nuisance caused by draining the town sewage into the river Blackwater at Ash. To this the Board answered that if any nuisance existed it was caused as much by the sewage from the Camp Farm as by the town drainage, and at a recent meeting the Board passed a resolution asking the Government, as contributors to the pollution of the Blackwater stream, to contribute also to the expense of cleansing it. The military authorities, in response, alleged that the pollution of the stream occurred before it reached the boundaries of their farm, and issue being thus raised, the Secretary of State for War applied to the Secretary of State for the Home Department for an official inquiry into the allegations on either side, and Mr. Bruce, in pursuance of the powers conferred upon him by the Sanitary Act, 1866, appointed Mr. Rawlinson, C.B., to make the official inquiry, which was opened on Tuesday before the members of the Local Board of Health and several military witnesses. The evidence was very voluminous, but the chief facts established upon the evidence of Mr. Martin, an innkeeper, residing near the Camp Farm; Mr. Fillingham, tenant of a cottage under him; Mr. G. Trimmer, Mr. F. Egar, chairman of the Local Board; and Dr. Shoolbraid, its medical officer, were that the water which left the Camp Farm after the application of the sewage to the land was very offensive in odour, and often black in colour; and, although no disease had yet been traced to it, there was reason to suspect that its effects were injurious in various ways, some of the cottagers attributing the bad condition of the water of their wells to the percolation of sewage abominations. On the other hand, Mr. Blackburn, lessee of the Camp Farm, while admitting that the sewage water was often black, stated that the blackness was caused by the iron-rust of the soil over which it had previously passed. Captain Salmond, Royal Engineers, said he had inspected the farm recently, in consequence of complaints which had been made, and found it in a good state. He understood that persons were in the habit of drinking the water which came through the subsoil pipes. Staff-Surgeon Major Thornton said there had been a few complaints in the North Camp about the farm when the wind was blowing from the south-east, but it did not blow from that quarter more than a dozen times in the course of a year, and the North Camp was remarkably free from zymotic disease. The Commissioners said that sewage farming was in its infancy. There was no doubt it must be made a special business, and the sewage must be applied to land in the proper proportion and at proper seasons. He thought Mr. Blackburn would bear him out that it would not do to irrigate the same land with the same volume of sewage for all kinds of crops, and if they attempted to grow Wheat they would simply waste their time. The Commissioners then, accompanied by the members of the local Board, proceeded to the farm to make a minute inspection of the system there in operation prior to reporting to the Secretary of State on the whole subject.

BIRMINGHAM.—On Wednesday Lord Napier of Magdala visited this town on a visit to Colonel Charles Ratcliff, at Widdrington, and received a flattering reception from the inhabitants. He was met at the Great Western Railway Station by the Mayor, members of the Corporation, and Volunteer officer. In the afternoon a public reception was given to his lordship at the Free Reference Library, when an address to him was read by the town clerk. In the evening Lord Napier was entertained at dinner at the Great Western Hotel, where, among the invited guests, were the Earl of Dartmouth, Earl of Lichfield, Lord Lyttelton, Sir Charles Adderley, M.P., Messrs. Dixon, M.P., Muntz, M.P., Newdegate, M.P., the Mayors of Birmingham, Coventry, Wolverhampton, Wenlock, &c. At eight o'clock the distribution of prizes to the prize marksmen in the Birmingham battalion of Rifle Volunteers took place in the Town-hall, Lord Napier handing the prizes to the successful candidates.

CAMBRIDGE.—A general committee of resident members of the University engaged in tuition, have adopted a scheme of arrangement for delivering lectures to women during the ensuing Lent term. This committee comprises Professors Adams, Babington, Cayley, Liveing, and Maurice, and about 20 other Fellows, tutors, or lecturers. The lectures will for the most part commence in the first week in February, and will comprise English history, English language and literature, Latin, Greek, German, French, algebra, and the principles of arithmetic, practical arithmetic, geometry, logic, political economy, botany, geology, physical geography, chemistry, harmony, thorough bass, and the theory of sound in its application to music. The lectures will be delivered twice a week within the period of University residence, and between the hours of 2 and 5 in the afternoon. The fee for a single course will be one guinea, and any woman having attained the age of 17 will be eligible for attendance. It is intended that the scheme shall be self-supporting; but the committee will be glad to accept funds for the formation of exhibitions.

CARMARTHEN.—Sarah Jacobs, the Welsh fasting girl, died on Friday evening in the presence of the four nurses from Guy's Hospital. Shortly after 3 o'clock in the afternoon she became delirious, but the parents refused to offer her food. She made no confession, but continued in a delirious state until she died. A meeting of the watching committee was held on Saturday

afternoon, when the nurses were examined and gave in a report containing a diary which they had kept from the time they took charge of the girl till her death. The report stated that for the first five days she was cheerful and slept well, sleeping the greater part of the time. She had a brief fainting fit on the sixth day, and her voice was not at all strong, having become weaker. On the 7th she was very restless, and had no sleep. Her feet being very cold, flannels were heated and wrapped round them. About 3 o'clock in the afternoon of the same day she was very cold, and could not get warm. Her father asked that her young sister should be put in the bed beside her, and this was done. The nurses then thought the girl was dying, and told the father and mother they might go near the bed, but they still watched to see that they gave her nothing. On Friday, the eighth day, she was very restless, but quieter than during the night. She died at three in the afternoon. Dr. Davis said he had cautioned the father on the condition of the girl on Friday, and offered to take away the watchers, but the father refused to give her food. Some time afterwards, however, he said that if the doctor wished to be persuaded that the girl could swallow he might offer her something; but it was then too late to do so. At the inquest on Tuesday, Messrs. Thomas and Phillips, surgeons, who made the *post-mortem* examination, deposed that the body was plump and well-formed, with indications of puberty; that the brain showed no indications of disease; there was no obstruction in the alimentary canal; the stomach contained three teaspoonfuls of semi-gelatinous substance; the small intestines were empty; in the colon and rectum there was half a pound of hard excrement; there was no malformation anywhere, and the body was free from disease. It was believed that deceased was afflicted with hysteria. Mr. Phillips spoke of a large hollow under the left arm capable of secreting a half-pint bottle. Mr. Davis, the surgeon, deposed that the girl was in a fit for one month in 1867, when there was a difficulty in ascertaining whether she was dead or alive. The inquest was adjourned to Thursday.

CHATHAM.—Further changes are to be made in the Chatham Dockyard, both by way of diminution and increase. From the 1st April next, in any future appointment of a master smith, the salary will commence at 150*l.*, increase 10*l.* every three years, and stop at 250*l.*; foremen of smiths will commence at 120*l.*, increase 10*l.* every seven years, and stop at 150*l.*; foremen of caulkers and joiners are to commence at 120*l.*, and increase 10*l.* every three years, up to 180*l.*. The limit of the salary of foremen of the yard will be 250*l.*. The Admiralty intend to make the following augmentations in the pay of artisans:—Leading men are to receive 6*d.* a day extra, as more work will devolve upon them from the intended abolition of the office of inspectors of the various trades; sawyers are to have an increase of 4*d.* a day, and joiners an increase of 2*d.* a day. With respect to compulsory superannuation of the dockyard hands, it appears that the general age will be 59, and that the men who are to be superannuated between the age of 55 and that age will only be those who are no longer capable, from advancing years, of doing what is considered a fair day's work.

DAFMOUTH.—The Mary, steamship, from Algoa Bay, bound to London, put into Dartmouth harbour on Tuesday, having on board three men, one of whom was handed over to the authorities on a charge of attempted murder, the other two being witnesses in the case. It appears that the bark Stirling, of Liverpool, lately left Cardiff for Aden, and that shortly afterwards one of the crew, named William Boyle, an Irishman, made an attempt on the captain's life, and stabbed him in the neck. The vessel then put into St. Vincent, one of the Cape Verd Islands, where the Mary, steamship, arrived for a supply of coal. The British Consul handed over the men to the captain of the Mary, requesting him to pass them over to the authorities at the first port he made. At the time of the Mary's leaving St. Vincent, the captain of the Stirling was doing well, and hope was entertained of his recovery.

DERBY.—The floods caused by the overflowing of the rivers in the midland districts have been very disastrous in this county. On Sunday, the road in front of St. Paul's Church, Little Chester, Derby, was five feet under water, and it was of course impossible to hold Divine service in the edifice.

DURHAM.—Joseph Whitfield, a pitman, who was tried a few days since at Durham for murdering his daughter, aged seven years, and acquitted on the ground of insanity, died on Friday night in the county gaol. He had been suffering severely before his trial from miner's asthma, and died of exhaustion.

EPSOM.—On Wednesday morning, as a man called Spooner was preparing to leave the village of Ewell for London with a load of flour, a man rushed into his house and threw into the fire, where the wife was making breakfast, a bag of gunpowder, and then committed suicide by stabbing himself. The house was blown down, and the husband was so seriously injured that he is not expected to recover. A railway porter passing at the time was also severely injured. The motive of the outrage is stated to have been jealousy, and the suicide confessed before his death that he had obtained the powder by breaking into the powder mills at Ewell Marsh.

HOUNSLOW.—On Friday afternoon a fatal explosion occurred at the gunpowder works of Messrs. Curtis & Harvey, at Hatton, by which three workmen were killed, and several others injured. The explosion occurred in a corning-house, which contained 1300 lb. of powder, and was completely destroyed, the machinery and other contents being scattered in all directions. The shock was felt for miles round. The last explosion that occurred at the Hatton Mills was about 10 years ago, and until recently the inhabitants of the neighbourhood were of opinion that these works were

quite safe, as it was believed that it was simply green charges that were worked prior to being removed to the Haworth Mills to undergo corning and finishing. The inquest was opened on Monday, and adjourned to Wednesday, when the jury returned a verdict of "Accidental Death."

LANCASTER.—Considerable damage has been occasioned in this county by the recent heavy rains. In the river Irwell, on Sunday, the water was 12 feet above the ordinary level, and in north, east, and west Lancashire there was nothing to be seen but a succession of great lakes, dotted here and there with a homestead, haystack, or tree.

LIVERPOOL.—A young man, who gave the name of Arthur Forrester, and who is suspected of being connected with the Fenians, was arrested on the 16th inst. in an eating-house in this town. On his person a loaded revolver was found, and in his portmanteau five others unloaded. He said he was a hawker, and bought them in Birmingham to sell again. He was remanded.

MANCHESTER.—The annual meeting of the Manchester National Society for obtaining Woman Suffrage was held on Monday, when it was determined to form a guarantee fund of 5000*l.* for the purpose of furthering the objects of the association. The speakers included Mr. Rylands, M.P. for Warrington; Mr. Charley, M.P. for Salford; Mr. Jacob Bright, M.P. for Manchester; Miss Becker, and Miss Ashworth. The Mayor of Manchester presided.—On Wednesday night a large meeting was held in the Free Trade Hall, at which resolutions were unanimously passed denouncing the recent political evictions in Wales, and advocating the ballot. Mr. George Wilson presided. Among the speakers were—Mr. Richards, M.P. for Cardiganshire; Mr. Osborn Morgan, M.P. for Denbighshire; Mr. Richard, M.P. for Merthyr Tydvil; Sir Edward Watkin, and Mr. Torr, barrister.

NOTTINGHAM.—Deluging rains which fell last week, have caused the Trent, the Derwent, and other rivers in the midland districts to overflow their banks. In the neighbourhood of this town the water rose very rapidly on Saturday night and Sunday morning, covering the meadows near the town and flooding the cellars of the houses in the lower parts. On Sunday afternoon the waters had passed the mark of the great flood of 1864, and reached the height of the flood of 1857. In the evening they were within 3 feet of the flood of 1852, the greatest inundation recorded for a long series of years. At Wilford Ratcliffe, and, indeed, throughout the whole of the Vale of Trent, the water has had the appearance of a vast lake, thousands of acres being submerged. Numbers of sheep have been carried away and drowned, bridges and railway embankments washed away, and considerable injury has been done to farm produce.

OXFORD.—The following letter has been addressed to the President of St. John's College, Oxford, by the Hon. Auberon Herbert:—

"Dec. 11.—My dear President,—I write to inform you that I have decided to resign my fellowship. I take this step for two reasons—first, because I do not believe in the Articles of the Church of England; and, secondly, because I am entirely opposed to the system of fellowships. I ought, perhaps, to add, that those fellowships which were gained, as in my own case, under the old conditions of restricted competition, seem to me specially indefensible. I will only say in this letter that I consider that the use which we make at present of very extensive funds is unwise and unjust, as it limits the number of those to whom we can offer the advantages of a University education. In a few days I shall take another opportunity of stating what I believe Oxford, with her great resources, might do for the whole people. I cannot separate myself from a society to which I have belonged a good many years without expressing my sense of the personal kindness which I have always received both from you and all other members of that society, however often or however widely we may have differed in matters of opinion.—I am, my dear President, very faithfully, AUBERON HERBERT."

PORTSMOUTH.—On Thursday week, while the wind was backing out to the southward and increasing in strength, her Majesty's line-of-battle ship Donegal, Captain Hewett, V.C., bound to China, and lying at Spithead in company with the Monarch and United States' screw corvette Plymouth, was signalled to proceed to sea. The order was obeyed, and the ship steamed out in the teeth of the gale. Eight hours afterwards she was off St. Alban's Head with storm sails split, ports stove in, quarter gallery washed out, and decks filled with water. She was also strained and leaked very much in her topsides, if not below the water line. After knocking about in the Channel all night she returned on Friday to St. Helen's Roads, beyond which no one who saw her get under weigh on the previous day supposed she had gone, and there anchored in safety. It is stated by the *Times* that the bill for making good the damages sustained by the Donegal will not be less than 1000*l.*, while in other quarters it is said that this estimate is greatly exaggerated. This latter statement derives confirmation from the fact that the ship sailed on Tuesday for China.

RUGBY.—The trustees of Rugby School met at Warwick on Monday, and after some discussion resolved not to revoke the appointment of Mr. Hayman to the head-mastership of the school.

SALFORD.—The *Manchester Guardian* states, upon authority which it cannot doubt, that on Saturday evening a telegram from the Horse Guards was received by Colonel Reynolds, the assistant adjutant-general for the district, intimating that the Fenians contemplated an attack upon the Militia Barracks in Salford, with the view of obtaining possession of about 800 stand of arms which were stored there. Colonel Reynolds lost no time in adopting measures for the defeat of the plot. The rifles were removed the same night to the Infantry Barracks, where, of course, they are safe against any sudden surprise. It has since been announced that the report has no foundation, and that the telegram made no mention of Fenianism.

SHEERNESS.—During the gale of Thursday night a sad disaster happened off this port, by which five chil-

dren lost their lives. The barge *Monarch*, Captain Chapman, master, had anchored for the night at Spithead, having on board, beside the master and his wife, five children between 13 and 3 years of age. The mother of these children was drowned in the barge in 1868, and her sister-in-law had since taken charge of them. About six o'clock on Thursday night the barge was blowing with the fury of a hurricane, and the waves dashed over the gunwales of the barge, filling the cabin with water, which rose to such a height as to likely to founder, Chapman got out the boat, and his sister and children into it, and pushed off. The boat soon got half full of water, and he expected it would also go down. He believed that three of the children were drowned in the boat by the waves dashing over them before there was any chance of help, and that they were knocking about till past two o'clock, when they were picked up by a fishing smack. He and his sister were saved, but the boat was swamped and all his children were drowned.

SKIPTON.—On Saturday Thomas Smith, a well-known man, was committed for trial at the assizes for having set fire to two haystacks belonging to the rectory of Addingham, a stable occupied by Mr. Joseph W. and the Wesleyans Reformers' Chapel.

WALLINGFORD.—On Thursday night, the 16th inst., constables repaired to Benson, and arrested Richard Pither, a cattle doctor, and Vandyke Polley, who was seen in the company of Richard Green on the evening of his murder. Pither was conveyed to Oxford Castle, and Polley to the Watlington police-station. The house of the murdered man, who was apprehended for removing some title-deeds and money from his father's house, has been liberated.

WARRINGTON.—It was announced at the weekly meeting of the Town Council last week that Colonel the Right Hon. J. Wilson-Patten, M.P., who resides in this town, had stated his intention to present a space of ground, measuring about 11½ acres, for a public park, to be devoted to the recreation and amusement of the people of the borough. Colonel Wilson-Patten has desired that the place shall not be ornamented as a park, but left for the recreation of the people, stipulating that the Militia and Volunteers should be permitted to use it as a drill-ground. A formal record of Colonel Wilson-Patten's liberality was placed upon the minutes.

WHITCHURCH.—A rural-decanal conference was held a few days since in this town, to consider certain queries submitted by the Bishop of Lichfield to the clergy and lay representatives of the diocese. Archdeacon Allen presided, and there were present Mr. Gwyn, Messrs. G. Brookes, Whitchurch; J. Bourne, Adderley; J. Davis and G. Jones, Ash; J. Christian, Ightfield; R. Houlding and J. Powel, Press; T. Eaton, Tilstock; J. Dawson, Whixall; Mrs. P. Andrews, A. Corbet, J. Evans, C. H. Prace, H. H. Price, A. J. Warren, and E. Cheere. The following resolutions were adopted:—

"1. Considering all circumstances, this meeting is not disposed to accept a conscience clause in villages, or in other places where the parents have not a choice of schools, or principle of perfect liberty of teaching to the teacher, or perfect liberty of withdrawal to the parent. 2. We see how education is to be generally enforced. 3. We think that school fees should be paid in all ordinary cases, but give no opinion as to the means that should be taken to meet the lowest stratum of society in large towns. 4. We think that a certificate of a certain amount of education should be required as a condition of employment, and that being allowed to the examiners to pass those unable to be incapable. We further think that Denison's Act should be made compulsory on Boards of Guardians, and that the duties of all persons receiving out-door relief should be required to attend school up to the age of 11, or up to the time when they may have received a certificate of instruction. We think that the Privy Council Office should be more liberal in giving grants in destitute districts; that all schools should be inspected; and that payments should be made for making allowances to the school where the teacher is certificated a high rate of payment. 5. We disapprove of local rates in support of schools." Archdeacon Allen disapproved of the resolution mentioned in resolution 4 being required as a condition of employment.

WORCESTER.—The floods have been very disastrous in their effects in several parts of this county, and in some parts all locomotion had been impeded or suspended. At Bewdley on Monday morning persons were prevented from getting into the town from the Worcestershire side. At Stourport the same state of things existed, and it was found necessary to barricade the bridge to prevent persons hazarding their lives.

WREXHAM.—The Board of Guardians of this town have resolved to adopt the system of boarding out pauper children. Persons who take children will be paid 3*s.* per week until the children reach the age of 13 years, when the amount will be lowered to 2*s.*

Ireland.

ANNIVERSARY OF THE SIEGE OF DERRY.—The anniversary of the closing the gates of Derry in the face of the army of James II. by the 'pretence boys' that city in the year 1689, was celebrated on Saturday in the usual manner, and, notwithstanding the threats of some and the prognostications of others, the peace of the town remained unbroken. This result was due in the first instance to the energetic action of the Government, who had massed together in the city a force so overwhelming as to overawe the most intrepid, and partly to the self-control of the Apprentice Boys, who carefully refrained from any insult to the Catholic fellow-townsmen. The Apprentice Boys, with their friends, numbering 2000, marched in procession, attended by their band, with ten stands of banners, colours, the city ensign, and a number of brass bands. Their band played "No Surrender," and the enthusiastic cheers of spectators in the streets and the ecstatic greetings of women who lined the way.

THE MARQUIS OF BUTE.—The Buteman says that ... it is rumoured that the Marquis of Bute, disgusted ... at some of the goings on in connection with the ... (Ecumenical Council, has left the "Eternal City," and ... is meditating a return to the Church of his Fathers. ... It is also stated that the Marquis took with him from ... Scotland to Rome a magnificent silver cross of Gothic ... workmanship, adorned with Scottish stones, and pre- ... sented it to the Pope, who directed that it was to be ... used as the processional cross of the Council. The ... cross was made by a well-known Catholic jeweller in ... Glasgow.

DISCOVERY OF GOLD IN INVERNESS-SHIRE.—It ... appears that the reports recently in circulation regard- ... ing the discovery of gold in Inverness-shire, or the ... neighbouring county of Moray, were not without ... foundation. The precious metal has been actually ... found in a stream in the parish of Daviot, but it has ... not yet been ascertained if it occurs in sufficient ... quantities to pay the working.

Railways.

THE METROPOLITAN.—It is understood that the ... section of this line between Westminster and Black- ... friars, passing along the Embankment, will be com- ... pleted and ready for traffic on May 1, and that if the ... contractors are put in possession of the land, the ... extension from Blackfriars to Cannon Street will also ... be completed by the same time. The capital in hand ... is more than sufficient to complete the work.

ACCIDENT ON THE GREAT WESTERN.—On Friday ... night a goods train was running into Brettell Lane ... station, near Stourbridge, when the driver discovered ... that a part of the train had become uncoupled, and had ... been left behind, but the missing trucks being left on a ... heavy gradient had followed, and on the driver revers- ... ing his engine to go in search of them they came dash- ... ing upon him with such force as to smash several ... carriages, and block both up and down lines. The down ... express from Paddington was then due, but the signal- ... man hoisted his distant signals, and telegraphed to the ... next box to do the same. This was promptly done, ... and the driver of the express was thus able to pull up ... in time to prevent a catastrophe.

COMPENSATION CASES.—In the Sheriffs' Court on ... Wednesday two actions, arising from the collision at ... the New Cross station, came on before the Under- ... Sheriff and a common jury. In the first, Rosapine v. ... the London, Brighton, and South Coast Company, the ... action had been brought in the Exchequer, when judg- ... ment was allowed to go by default, and the damages ... were laid at 500l., but a settlement was effected for 90l. ... In the second case, Mr. Kendall, a tavern-keeper, ... Bermondsey Street, obtained a verdict against the com- ... pany for 84l. 2s. 6d. During the trial it was stated ... that upwards of 60 actions had been brought on account ... of the accident, some of which have been arranged and ... others tried, and a number still remain undecided.

Law.

COURT OF QUEEN'S BENCH.—The Overend Gurney Prosecutions. ... On Saturday, at the opening of the sixth day's proceedings ... in the trial of the Overend and Gurney directors, Mr. Harding, ... the official liquidator, handed in a statement of the profits of ... the old firm during the ten years previous to the transfer, ... which gave an annual average of 220,000l. It was submitted ... that there was no evidence that Mr. Barclay, one of the ... defendants, had any knowledge of the alleged frauds, and, ... therefore, there being no case against him, he was entitled ... to be discharged. Upon this the Lord Chief Justice thought, on ... the other hand, there was no evidence to prove that he had ... not made himself acquainted with the state of affairs, and the ... question of fraud must go to the jury. Dr. Kenaly then ... addressed the Court for the prosecution, and had not concluded ... when the Court adjourned to Monday, when Dr. Kenaly con- ... cluded his address for the prosecution. The Solicitor-General ... then opened the defence on behalf of the Messrs. Gurney and ... Mr. Birkbeck, and had not concluded when the Court rose. ... On Tuesday the Solicitor-General concluded his speech amidst ... considerable applause from a crowded court. The Lord Chief ... Justice, in repressing such demonstrations, said he was not ... surprised that so fine a speech should produce emotion, but it ... should not be manifested in that shape. The counsel for the ... new directors then addressed the jury, and claimed for their ... clients ignorance of the real state of things, contending that ... they could not have had any motive in combining fraudu- ... lently to bolster up the firm if they knew it to be insolvent, ... and thus risk their own wealth and reputation. On Wednes- ... day the Lord Chief Justice commenced his summing up at the ... opening of the court, and did not conclude until two o'clock. ... It was altogether in favour of the defendants. The jury were ... only a quarter of an hour in consultation, and returned into ... court with a verdict of Not Guilty, which was received with ... applause. The prosecutor's counsel having applied for the ... costs of the prosecution, his lordship said that though he ... unhesitatingly agreed in the propriety of the verdict, yet, ... believing that this was a case for inquiry, and believing, also, ... that Dr. Thom was actuated, as against the defendants, by ... entirely honest motives in instituting this proceeding, he ... should not have hesitated to allow him costs, but inasmuch ... as, in his opinion and judgment, the uniting of the other ... defendants in the same indictment, and thereby shutting ... their mouths, was altogether unjustifiable, he could not allow ... the costs.

COURT OF EXCHEQUER.—The Saville House Fire: Malicious ... Prosecution.—It will be remembered that Mr. Morris was tried ... and acquitted on a charge of attempting to defraud the Gas- ... light and Coke Company, in respect to damages said to have ... resulted from a fire at Saville House, caused by the alleged ... defects of the company's service of gas. On Friday Mr. Morris ... sued the Gas Company in the Court of Exchequer for "malici- ... ous prosecution," and the defendants, after the trial had pro- ... ceeded for some time, agreed to a verdict for the plaintiff with ... 1500l. damages. The Lord Chief Baron said that the plaintiff ... left the Court without the slightest imputation upon his ... character.

NORFOLK CIRCUIT: CAMBRIDGE.—The Cambridge High- ... wayman.—Charles Trevor alias Horace Wright, 22, was charged ... with assaulting and stealing from Mrs. Perkins, the wife of ... Henry Perkins, Esq., the sum of 11., at Thriplow, on Octo- ... ber 16 last. It will be remembered that the prisoner, wearing ... a black mask, and armed with a pistol, stopped Mrs. Perkins

while she was in her carriage on her way to her home a ... Thriplow, he being at the time attired in full highwayman's ... costume, jack boots, &c., and riding a horse he had obtained ... from a livery stable in London. He afterwards stopped some ... country people in a cart, but as they said they were poor he ... would take nothing of them. He pleaded guilty; and as he ... had been previously convicted of a like offence, Mr. Justice ... Blackburn sentenced him to nine months' imprisonment with ... hard labour.

NORTHERN CIRCUIT: DURHAM.—The Stanley Murder.— ... Thomas Shield, aged 23, a pitman, was indicted for the wilful ... murder of Ralph Reed, at Stanley, near Lanchester, by ... stabbing him in the throat with a penknife. The jury found ... him Guilty of Manslaughter. Mr. Justice Lush said that as ... death had been caused by the use of the knife, the case was ... one which must be severely punished. He then sentenced ... the prisoner to penal servitude for 20 years. The Lanchester ... Murder.—Joseph Whitfield, a pitman, aged 47, was indicted ... for the wilful murder of his daughter, Ann Whitfield, eight ... years of age, at Lanchester, on July 26 last. The family was ... in a distressed state through the inability of the father from ... illness to work, and he appeared to have laboured under the ... delusion that by killing his children he would save them from ... misery. The doctor's opinion was that he knew what he was ... doing, but was not of sound mind. The jury acquitted ... him on the ground of insanity. The Thornley Murder.—James ... Hart, a pitman, was indicted for the wilful murder of Jonah ... Gott, at Thornley, on the 4th of December last. The prisoner, ... who was one of a party of Ludworth pitmen, had a quarrel ... with some Thornley men who had knocked him down, and ... kicked him while on the ground. The deceased had taken no ... part in the row, but the prisoner, believing that he had, ... attacked him, and, having got him down, kicked him so ... savagely as to rupture the jugular vein, which caused death. ... At the suggestion of Mr. Justice Lush, on the evidence of ... provocation, the counsel for the prosecution withdrew ... the charge of Murder, and the jury at once convicted ... the prisoner of Manslaughter. His lordship sentenced ... him to 15 years' penal servitude.—LIVERPOOL: Wife Murder.— ... John Gregson, a collier, aged 27, was charged with the wilful ... murder of his wife, Ellen Gregson, at Wigan, on the 18th of ... October last. In this case also death was caused by a kick, ... the prisoner having dealt her a terrific kick under the left ear ... with a heavy iron-shod clog which he was wearing at the ... time, by which the base of her skull was fractured, and she ... died almost immediately. The defence was that the crime ... was done in a drunken frenzy. The jury returned a verdict ... of Wilful Murder, with a recommendation to mercy. His ... lordship, in sentencing the prisoner to Death, remarked that ... the case was most clearly one of murder, but he would send ... the recommendation of the jury to the proper quarter. The ... prisoner heard the sentence with the utmost unconcern. The ... Skelmersdale Murder.—John Brown, 44, farmer, was charged ... with having at Skelmersdale, on the 28th September, wilfully ... murdered George Ashton. The deceased was a labourer, and ... on the 27th September went to the prisoner's premises with a ... threshing machine. On that day the prisoner had been ... engaged to lay the foundation-stone of a chapel, and as it was ... expected he and his family would be from home, the prisoner's ... son had given to the deceased the key of the house. The ... threshing machine was put in order, after which one of the ... men, know as "Scotty," went to sleep in the granary, and ... deceased and the other man (called Leatherbarrow) proceeded ... to a neighbouring public-house. In this public-house they found ... the prisoner, who had returned from the foundation-stone ... laying. After drinking some time, the prisoner, deceased, and ... Leatherbarrow left the public-house, and went in the direction ... of the prisoner's farm. On the way the prisoner wanted to ... fight Leatherbarrow, and on reaching his farm the prisoner ... ordered him to leave the premises, and struck him with a ... poker. The deceased, becoming frightened, went into an ... inner room, and Leatherbarrow left. About 3 o'clock next ... morning the prisoner went into an outbuilding where some ... Irishmen were sleeping, and, waking them, said some men had ... been in his cellar and drank his beer. The men went with the ... prisoner to the house, where, between the kitchen and the ... pantry, they found the deceased lying. The walls ... around were besmeared with blood, as were also the ... prisoner's clothes. The deceased, who was very weak, ... on seeing the Irishmen, requested them to take him to a ... place where he could lie on some straw. The Irishmen were ... about to lift the deceased, when the prisoner kicked him ... several times about the body. The deceased was removed to ... the barn, and at eight o'clock in the morning, at a short ... distance from the place where he had been laid by the Irish- ... men, he was found dead. The police, on examining the place, ... discovered two broken pokers in an oven, one of them being ... stained with blood. An examination of the deceased's body ... showed that he had received several violent injuries. The ... head was severely contused, one of the arms was broken, as ... were also the seventh rib and the breast-bone. The jury, ... under his lordship's direction, found the prisoner guilty of ... Manslaughter, and he was sentenced to penal servitude for ... 10 years.

Obituary.

THE EARL OF CRAWFORD AND BALCARRES died at the family ... seat, Dunecht, Aberdeenshire, on the 15th inst., in his 86th ... year. His lordship, the Right Hon. James Lindsay, Earl of ... Crawford and Balcarres, Lord Lindsay of Balcarres, Lord Bal- ... nell, in the peerage of Scotland; Baron Wigan of Haigh Hall, ... in the county of Lancaster, in the peerage of the United King- ... dom, was born in 1783, and was the eldest son of the 6th Earl ... of Balcarres, who, on the death of the 22d Earl of Crawford, ... in 1808, succeeded *de jure* as 23d Earl of Crawford. He married ... in 1811, the only daughter of the first Lord Muncaster, and by ... her had issue four sons, Lord Lindsay, the Hon. Major James ... Lindsay, Hon. Charles Hugh Lindsay, and the Hon. ... Colin Lindsay. On the death of his father, in 1825, he ... succeeded to the earldom of Balcarres, and in 1848 received ... from the House of Lords a confirmation of the earldom of ... Crawford, which had lain dormant since 1808, and, conse- ... quently, established his claim as premier earl on the Union roll ... of Scotland. He is succeeded in the titles and estates, both in ... Scotland and Lancashire, by his eldest son, Alexander William ... Crawford, Lord Lindsay, who was born at Muncaster Castle, ... in 1812, and married, in 1846, the eldest daughter of the late ... General James Lindsay, of Balcarres. He was educated at ... Trinity College, Cambridge, where he graduated M.A. in ... 1833, and he has distinguished himself in literature as the ... author of "Letters on Egypt and the Holy Land," a "Letter ... on the Evidences of Christianity," "The History of Christian ... Art," "Lives of the Lindsays," &c.

THE EARL OF ANTRIM died on Sunday last at Glenarm ... Castle, county Antrim. The deceased, Mark M'Donnell, Earl ... of Antrim and Viscount Dunluce in the peerage of Ireland, ... was the second son of the Countess of Antrim, by her mar- ... riage with Vice-Admiral Lord Mark Kerr, third son of the fifth ... Marquis of Lothian. He was born in 1814. He entered ... the navy in 1830, became a commander in 1846, and was made ... a captain on the retired list in 1864. In 1855 he assumed, by ... royal warrant, the name of "M'Donnell" only for himself ... and issue. He married, in 1849, the daughter of the late ... Major Macair, of Carrig, county Armagh, by whom he leaves ... several children. He succeeded to the title and estates in ... Ireland on the death of his elder brother, who inherited the ... earldom on the death of his mother in 1855, and died in 1855.

His lordship is succeeded by his eldest son, William Randal, Viscount Dunluce, born in 1851.

The Duchess de Coigny died on Sunday at Paris. She was the only daughter of Sir Hew Dalrymple-Hamilton, Bart., by his marriage with the eldest daughter of the first Viscount Duncan, and sister of the first Earl of Camperdown. She was born in 1801, and married in 1835 the Duke de Coigny, by whom she had two daughters, the eldest married to the present Earl of Stair, and the other married to Earl Manvers.

The Countess of Fife died suddenly on Saturday evening at her house in Cavendish Square, while conversing with her children, Viscount Macduff and Lady Alexina Duff. She was the second daughter of the 17th Earl of Erroll, by Lady Elizabeth Fitzclarence, one of the daughters of William IV. (by Mrs. Jordan). She was born in 1829, and married, in 1846, the eldest son of the Hon. General Sir Alexander Duff, who succeeded his uncle as Earl of Fife in 1857. Her ladyship leaves an only son, William Alexander, Viscount Macduff, born in 1849; and four daughters, Lady Anne Elizabeth Clementina, married to the Marquis Townshend; Lady Ida Louisa Alice, married to Mr. Hope; and two others, unmarried.

LADY HARRIET COWPER died on Saturday morning, at her residence in the Rue du Faubourg St. Honoré, Paris, after suffering for about a month with an internal abscess. She was the only daughter of the Earl of Blessington, by his first wife, the widow of Major Browne. She was born in 1812, and married in 1827, when quite a girl, the late Count D'Orsey. On the death of Count D'Orsey, in 1852, she married, secondly, the Hon. Charles Spencer Cowper, youngest son of the late Viscountess Palmerston by her first marriage with Earl Cowper.

GENERAL SIR DAVID CAPON, K.C.B., Colonel of the 106th Regiment (Bombay Light Infantry), died a few days since at his residence, Craven Hill, Hyde Park, at the age of 76. He was born in Bombay, and educated in England, after which he entered the military service of the East India Company in 1809. He served with the 1st Bombay Native Infantry in the expedition against Palampore in 1813; in the Konkan in 1817, and was present at the storming of the hill fort of Mudolungher. He commanded the troops at Aden in 1839, when the place was on two occasions attacked by large bodies of Arabs. He also commanded the 1st Brigade of the Bombay column army of the Punjab at the siege of Mooltan, in 1848-49, and in the attack on the town; also at the battle of Goojerat, and pursuit of the Sikh army, for which he received the medal with two clasps. He was nominated a Knight of the Bath in 1862, and in the same year was appointed colonel of the 106th Regiment. He attained the rank of general in 1868. He was the son of Lieut. Colonel John Capon, of the East India Company's Service, by the daughter of the late Colonel Proctor, of the Bombay Army. He married, in 1832, the fourth daughter of the late Dr. G. M. Burrows.

CAPTAIN MANNING, her Majesty's Lieutenant and Governor of Portland, died at Portland Castle on the 13th inst., after a long illness. He was nearly 80 years of age, was one of the magistrates for the county, and had resided at the Castle since 1834.

DR. JOHN GRANT STEWART, C.B., Inspector-General of Naval Hospitals and Fleets, died a few days ago. He entered the navy as assistant-surgeon, and obtained the rank of surgeon in 1840. He was specially promoted to be deputy-inspector in 1845 for having volunteered his services to go on board and take charge of the infected patients in the Eclair. In 1861, he was made an Inspector-general of Hospitals and Fleets. He was granted a good service pension in April last, and in June this year was made a Companion of the Bath for his civil services.

MR. GEORGE SAVILE FOLJAMBE died at Osberton Hall, near Worksop, on Saturday, in his 70th year. He had suffered from bronchitis for about a month, but no immediate danger was apprehended up to the middle of last week, when the attack assumed a more alarming aspect, and he became rapidly worse. He was born in 1800, and married in 1845 the Dowager Viscountess Milton, eldest sister of the Earl of Liverpool. He is succeeded by his eldest son, Francis John Savile Foljambe, Esq., of Aldwark Hall, near Rotherham, M.P. for East Retford.

MR. W. H. BARBER, whose name was before the public some years ago in connection with the Fletcher will forgeries, died on Friday of heart disease, in his 61st year. The case of Mr. Barber was remarkable as the first example of an innocent man obtaining compensation from the nation for a wrongful conviction by a criminal court; 5000*l.* having been voted to him by Parliament in 1859.

WILLS.—The will of Mr. Peabody has been sworn under 400,000*l.* personality in England; Lord Cranstoun under 4000*l.*; Sir Charles Rushout Rushout, Bart., of Seizecoat, Moreton-in-the-Marsh, Gloucestershire, 10,000*l.*; Mr. John Walker, Q.C., of 3, Old Buildings, Lincoln's Inn, and North Mymms, 100,000*l.*; Mr. James Box Wetenhall, stockbroker, 10,000*l.*; Mr. George Berkeley Harrison, merchant, Great Tower Street, 40,000*l.*; Mr. Edward Doudney, of 49, Lombard Street, tailor and woollen draper, 40,000*l.*

Markets.

COVENT GARDEN.—Dec. 24.

The market is very heavily supplied, and better prices cannot be obtained for either fruit or vegetables. Evergreens of the usual character are also abundant, and much lower in price than they have been for several years past. Flowers chiefly consist of Mignonette, Fuchsias, Chrysanthemums, Primulas, Poinsettias, Heaths, and Tulips.

FRUIT.

Apples, p. 1/2 sieve, 3s to 5s	Lemons, per 100, 5s to 10s
Cobs, per lb., 9d to 1s	Melons, each, 1s 6d to 3s
Chestnuts, p. bush., 8s to 14s	Oranges, per 100, 6s to 12s
Filberts, per lb., 6d to 9d	Pears, per doz., 3s to 6s
Grapes, per lb., 3s to 5s	Pine-apples, per lb., 3s to 5s

VEGETABLES.

Artichokes, p. doz., 3s to 6s	Leeks, per bunch, 2d to 4d
Beet, per doz., 2s to 3s	Lettuces, p. score, 1s to 2s
Broccoli, p. doz., 1s to 2s 6d	Mint, per bunch, 4d to 6d
Brussels Sprouts, p. 1/2 sieve, 2s to 3s	Mushrooms, p. pott., 1s to 1s 6d
Cabbages, per doz., 1s to 1s 6d	Onions, green, p. bun., 4d to 9d
Capsicums, p. 100, 2s to 2s 6d	Parley, per bunch, 2d to 4d
Carrots, per bunch, 4d to 8d	Potatoes, York Regents, p. ton, 80s to 105s
Cauliflowers, p. doz., 1s 6d to 3s	— Flukes, do., 80s to 120s
Celery, p. bund., 1s to 1s 6d	Salsafy, per bundle, 1s to 1s 3d
Cucumbers, each, 1s 6d to 3s	Scorzoneria, do., 1s to 1s 3d
Endive, per doz., 1s 6d to 2s	Seakale, p. punnet, 2s to 2s 6d
French Beans, p. 100, 2s 6d to 3s	Spinach, p. bushel, 2s to 3s
Garlic and shallots, per lb., 8d	Radishes, p. doz., 1s to 1s 6d
Herbs, per bunch, 2d to 4d	Tomatoes, per doz., 9d to 1s 6d
Horse Radish, p. bund. 3s to 5s	Turnips, per bunch, 4d to 6d

POTATOS.—SOUTHWARK, Monday, Dec. 20.

During the past week the arrivals coastwise have been moderate, but heavy by rail. The trade continues in a very languid state, and the consumption small for the period of the season. The quotations are:—Yorkshire Regents, per ton, 70s. to 100s.; Kent and Essex do., 60s. to 80s.; Lincolnshire do., 80s. to 85s.; East Lothian do., 70s. to 100s.; Perth, Forfar, and Fife do., 70s. to 80s.; French and Belgian Whites, 55s. to 65s.

HOPS.—BOROUGH MARKET, Dec. 24.

Messrs. Pattenden & Smith report there is more doing than is usual at this time of the year, and prices are well maintained. The stock of English is exceedingly limited, the bulk of the Hops now on the market being Americans, and for these there will doubtless be a good trade after Christmas.

COALS.—Dec. 23.

Cowpen Hartley, 17s.; Holywell Main, 17s. 9d.; West Hartley, 17s.; Walls End Elliot, 19s. 9d.; Walls End Braddyll's Hetton, 19s. 9d.; Walls End Haswell, 21s.; Walls End Hetton, 21s.; Walls End Hawthorn, 18s. 6d.; Walls End Tunstall, 19s. 3d.; Walls End Hartlepool, 20s.; Walls End Original Hartlepool, 21s.; Walls End South Hartlepool, 19s. 6d.; Walls End Tees, 19s. 3d.; Brancepeth Cannel, 18s.—Ships at market, 85; sold, 61.

ENGLISH WOOL

A moderate trade has been transacted, without material alteration in value.

CURRENT PRICES OF ENGLISH WOOL, per lb.—s. d.

METROPOLITAN CATTLE MARKET.

MONDAY, Dec. 20.

We have a good supply of Beasts for the day; trade opened brisk, but declined towards the close; on the average prices are about the same as last week. Trade is active for Sheep, although the supply is fair; prices have advanced slightly. Choice Calves are considerably dearer. Our foreign supply consists of 429 Beasts, 2550 Sheep, and 94 Calves; from Scotland there are 111 Beasts; from Ireland, 547; from Norfolk and Suffolk, 300; and 740 from the Midland and Home Counties.

s. d. s. d.		s. d. s. d.	
Best Scots, Herefords, &c. ..	5 6 to 5 8	Best Long-wools	5 6 to 5 10
Best Shorthorns	5 2—5 6	Do. Shorn
2d quality Beasts	3 4—4 0	Ewes & 2d quality	4 4—5 4
Best Downs and Half-breds	5 8—6 0	Do. Shorn
Do. Shorn	Lambs
Beasts, 2128; Sheep and Lambs, 10,340; Calves, 128; Pigs, 175.		Calves	4 0—6 4
		Pigs	4 0—6 0

THURSDAY, Dec. 23.

This is very nearly a holiday market. The supply of all kinds of stock is very moderate, and there are very few purchasers at market. The small amount of business transacted is at about Monday's quotations. Our foreign supply consists of 423 Beasts, 740 Sheep, and 62 Calves.

s. d. s. d.		s. d. s. d.

Do. Shorn	Lambs
Beasts, 615; Sheep and Lambs, 3550; Calves, 9; Pigs, —.		Calves	4 4—6 4
		Pigs

MARK LANE.—MONDAY, Dec. 20.

There was a moderate supply of English Wheat to this morning's market, which was quickly sold at the extreme prices of this day se'nnight. The attendance was good, including several country millers, and a fair consumptive trade was done in foreign Wheat, American and Russian bringing an advance of 1s. per qr. upon the lowest quotations lately current. Barley and Beans were unchanged in value. Peas were cheaper. The Oat trade was steady, at the rates of this day se'nnight. There was no alteration in the price of Flour.

— Foreign per barrel	22—25	Per sack..	29—55

WEDNESDAY, Dec. 22.

The attendance at market to-day is limited. English Wheat rather firmer than on Monday; foreign in moderate demand, but prices fully maintained. Trade for English Flour rather more firm; American quite as dear. Barley: choice malting rather dearer, grinding descriptions unaltered. Oats: arrivals moderate, and prices tending upwards. Beans firm. Peas rather easier than last week. Linseed a little cheaper. Rapeseed fully as dear. Maize without change. In floating cargoes trade for Wheat was steady; for Barley and Rye there was little inquiry.

SEED MARKET.

The close of the year being so near at hand our markets are now quite inactive, and there is consequently no change in report in the value of any kind of seed. We have on hand low for white Mustard seed, the stocks of which are almost exhausted. Rapeseed is scarce and dear.

JOHN SRAW & SONS, 16, Water Lane, E.C.

WANTED, as WORKING FOREMAN on a Farm, active, intelligent Man, to Superintend and assist in the management of a Gentleman's Small Farm. He must have had considerable experience in the Management of Stock and Land, and be willing to himself generally useful.
