WHEN A PERSON TAKES COLIC, which is a consequence of a cold, a natural effort is made for its relief. The only safe and prudent remedies to be adopted, which assist Nature in her work, by removing the cause of the complaint, and restoring the system to its normal state, are SPENCER'S PULMONIC ELIXIR, which is admirably adapted to the cure of colic, and other ailments of the stomach, and the chest; and for a temporary relief, a few drops of the Elixir will be sent, post paid, on receipt of address and one shilling. FRUIT GARDEN, East, 30, York Buildings, Strand, London.

Address, BENJAMIN EDGINGTON, (only), 3, Duke Street, London Bridge, S.E. No other Establishment.

RALPH WALLER AND CO., 45, Dale Street, Manchester. Manufacturers of all kinds of GARDEN NETTING, &c.—The serious injury done every spring to fruit crops by frost has proved to every Gardener the absolute necessity of providing some protection to the trees early in the year. If the blossom, in its earliest development, be but slightly weakened by frost, the vitality of the fruit germ is destroyed, and the fruit lost. In this climate, on the average of a century, there is not more than one year in 10 when the protection is unnecessary. Many fabrics have been tried for this purpose of protection, with more or less success; and we may now say, without fear of contradiction, that we have succeeded in manufacturing the only fabric which is altogether unobjectionable for this purpose. Without unduly nursing, it effectually protects the young germ, and does not impede the action of light and due circulation of air. Some other fabrics do this, and thus weaken the vitality of the tree altogether. Almost every large grower in the three kingdoms can testify to these facts. The Nettings also make a beautiful shading for Hothouses in summer, and are cheaper than other fabrics on account of their great durability. Netting (qualities) Nos. 1, 2, 3, in pieces of 30 yards long, 1 1/2 yard wide. Tiffany in pieces 20 yards long, 30 inches wide. For prices, &c., apply to the above address—45, Dale Street, Manchester.

H. BROOK AND CO., Sole Manufacturers of the H. CHELTENHAM GARDEN ENGINE, which weighs on 3 lb 1 oz., throws water in a continuous stream over 35 feet. BREAKFAST.—LEPP'S COCOA. GRATEFUL and COMFORTING. Only in 1/2 lb., 1 lb., and 1 1/2 lb. Packets—tinned and labelled. Sold by the Trade in all Parts. Prepared by JAS. LEPP & CO., Homoeopathic Chemists, London.

A Success Unprecedented. MARAVILLA COCOA is PERFECTION.—The Globe says—"Taylor Brothers' Maravilla Cocoa has achieved a thorough success, and surpasses every other Cocoa in the market. Entire solubility, a delicate aroma, and a rare concentration of the purest elements of nutrition, distinguish the Maravilla Cocoa above all others. For homeopaths and invalids we could not recommend a more agreeable or valuable beverage." Sold in Packets only, by all Grocers.

Sauce.—Lea & Perrins. THE "WORCESTERSHIRE" pronounced by Connoisseurs "THE ONLY GOOD SAUCE." Improves the Appetite, and Aids Digestion. Unrivalled for piquancy and flavour. Ask for LEA & PERRINS' SAUCE. Beware of imitations, and see the Names of LEA & PERRINS on all bottles and labels. Agents—Cross & Blackwell, London, and Sold by all Dealers in Sauces throughout the World.

WHITE and SOUND TEETH are indispensable to personal attraction, and to health and longevity, by the proper mastication of food. ROWLANDS' ODONTO, or PEARL DENTIFRICE, is of inestimable value in Preserving and Beautifying the Teeth, Strengthening the Gums, and in giving a pleasing fragrance to the Breath. It eradicates Tartar and Spots of Incipient Decay, and polishes and preserves the Enamel, to which it imparts a pearl-like whiteness. Price 2s. 3d. per Box. Sold by Chemists and Perfumers. Ask for Rowlands' Odonto.

DINNEFORD'S FLUID MAGNESIA.—The best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and the best mild aperient for delicate constitutions, especially adapted for Ladies, Children, and Infants. Dinneford & Co., 172, New Bond Street, London; and of all Chemists throughout the World.

HALSE'S GALVANIC APPARATUS.—Extraordinary Cures of Paralysis, Rheumatism, Loss of Muscular Power, Indigestion, Debility, &c. Asthma, &c. Send two stamps to Mr. Halse, No. 40, Addison Road, Kensington, for his pamphlet, which contains the particulars of the most extraordinary cures. Invalids will be astonished at its contents.

ELECTRICITY IS LIFE. SELF-ADJUSTING CURATIVE and ELECTRIC BELT. Sufferers from nervous debility, indigestion, weakness, &c., can now cure themselves by the only "Guaranteed Remedy" in Europe, protected by Her Majesty's Great Seal. Free for One Stamp, by H. JAMES, Esq., Medical Electrician (to the London Hospital), Percy House, Bedford Square, London, W.C. N.B.—Medicine and Fees superseded. A Test gratis. Send for details. Established 1840.

CORNS and BUNIONS.—A Gentleman, many years tormented with Corns, will be happy to afford others the information by which he obtained their complete removal in a short period, without pain or any inconvenience.—Forward address on a stamped envelope to F. KISSEROW, Esq., Ware, Herts.

Galvanism and Medicine Superseded. NEW METHOD of CURING DISEASE, without the aid of doctors and their drugs, by studying the laws of health and Nature. Invalids cannot too carefully avoid pills, pretended life drops, and other dangerous medicines, as they contain mineral poisons, which act on the delicate coatings of the stomach, and thus destroy the receptacle of our daily sustenance. The Advertiser pronounced incurable, but, acting in accordance with the advice he now offers, has, by God's blessing, been restored to health and strength; and with sympathy for like sufferers, the means of cure will be sent, post paid, on receipt of address and two stamps.—Address PHILIP GARREY, Esq., 29, York Buildings, Strand, London, W.C.

SPENCER'S PULMONIC ELIXIR.—This Medicine possesses every property which can be beneficial in cases of Colds, Coughs, Asthma, and all Complaints of the Throat and Lungs. For temporary and local affections, such as Wheezing, Irritation of the Throat, Palpitation of the Heart, Hoarseness of the Voice, Influenza, &c., SPENCER'S ELIXIR affords immediate relief, while in more chronic disorders, as Bronchitis, Catarrh, or inveterate Asthma, it is equally valuable in its effects, though of course longer perseverance in the use of the Medicine is required. Prepared with great care by T. HOOPER & CO., 8, Crane Court, Fleet Street, London; and can be obtained of all respectable Medicine Vendors in the Kingdom, in bottles of 1s. 1/2d. and 2s. 6d. each.

to wear either of the following dresses, instead of the present "Court Dress":—
 1. Dark coloured cloth dress coat, single breasted, with collar, and gold embroidered collar, cuffs, and buttons. White waistcoat, without collar, and white trousers of the same colour as the coat, with a stripe on the sides. Black cocked hat, with a white band. Sword, similar to that worn by the King's Guard. White neckcloth. For evening wear, white waistcoat, hat, and sword the same as above, of the same colour as the day dress. Black or white silk hose, shoes, gilt buckles.
 2. Black silk velvet dress coat of the same cut as the first, with gilt, steel, or plain buttons. Gilt or steel handled sword, with silk shoulder belt. For Drawing Rooms, &c.—Coat, waistcoat, and neckcloth the same as for Levees. Black silk velvet hose, shoes, gilt or steel buckles. In evening—A cravat to be worn on the left arm. It is to be understood that these dresses will be worn at Court by those gentlemen who have no naval, military, or civil uniform. The present "Court Dress," will still be recognised at her Majesty's Court.

THE CABINET.—A Cabinet Council will be held this afternoon at the official residence of the First Lord of the Treasury in Downing Street.

TRIALS OF ELECTION PETITIONS.—Baron Martin gave judgment yesterday on the Westminster petition, and that Mr. Smith was duly elected, and that corrupt practices had not extensively prevailed. He reserved his decision as to costs, and stated that the whole of the costs would be paid by the petitioners. Mr. Justice Willes on Monday gave judgment in the Tamworth petition, declaring that Sir Robert Peel and Mr. Henry Bouverie were duly elected, the petitioners to pay the costs of Sir Robert Peel, but not those of Sir Henry Bouverie, a mob of 150 men having been employed to surround Mr. Justice Blackburn on Saturday gave judgment on the Staleybridge petition, declaring that Mr. Sedgwick was duly elected, that there was no evidence of intimidation or treating, but there was bribery in a mild form by the promise of payment of wages to voters. The agency, however, was not sufficiently proved to void the election. In Ireland, on Tuesday Mr. Justice O'Brien gave judgment as to costs in the Londonderry petition, ordering the petitioner to pay the costs in the proceedings except those of the sixth day, during which evidence was given in regard to acts done by paid agents of the respondent. He directed persons employed at the elections to be sworn and said that such a practice must be stopped. He also directed the Greenock inquiry terminated on Saturday in favour of Mr. Graeve, the sitting member. The Coventry and Cashel petitions are still in progress. The Hartlepool, Gloucester, and North Derbyshire petitions have been withdrawn. The Bodmin petition will be tried by Justice Willes on Monday. The facts brought to light by some of the recent trials are likely to lead to further proceedings on the part of Parliament. In the House of Commons, on Wednesday, on the motion of Mr. Ayrton, a copy was ordered of the evidence taken at the trial of the Norwich and Drogheda petitions, and, on the motion of Lord Hill, a copy was ordered of the evidence at the trial of the Bradford, Guildford, and Drogheda petitions.

ILLNESS OF THE MARQUIS OF WESTMINSTER.—A report from Eton Hall states that the Marquis of Westminster is suffering from a softening of the brain. The following is the official report of Monday night:—
 "The Marquis of Westminster has passed two quiet days, and is now lying with tranquil sleep, and has walked in the garden and in the Mall with the Marquessess in the long carriage. His rather feeble strength is fairly maintained."
 W. H. M. P. E. W. M. D.

THE BISHOP OF LINCOLN.—The Dean and Chapter of Lincoln, in obedience to her Majesty's command, have elected Dr. Wordsworth to the vacant see of that see. The confirmation of the election will take place forthwith at Bow Church, and the consecration will take place on the 24th inst. in Westminster Abbey. The Bishop has appointed as his vicar-general the Rev. Dr. Benson, Master of Wellington College, and the Rev. Frederick Meyrick, one of her Majesty's inspectors of schools.

THE BISHOP OF SALISBURY.—It is stated that there has been no improvement in the health of Bishop Salisbary during the last few days.

ILLNESS OF THE BISHOP OF CARLISLE.—In consequence of ill-health Bishop Waldegrave has retired from active duties, and Bishop Anderson has undertaken his duties during his absence.

CONFERENCE OF BISHOPS.—The English and Irish Bishops met twice last week at Lambeth Palace, when the subjects discussed were the Irish Church and the disestablishment of the Church of England. On the first, a general feeling was expressed that the disestablishment took place the Church must be absolutely free. The Archbishop of Canterbury, however, stated as his opinion that, though the nation had decided on disestablishment, it had not agreed as to the manner in which it should be effected. The Archbishop, though concurred in this view, which did not meet with general support. Their lordships resolved that they should not issue any joint manifesto on the Ritual question, but that each in his own name should give the best advice in his power.

KNIGHTHOOD.—The Queen has directed letters to be passed under the Great Seal granting the rank of a Knight of the United Kingdom to the Hon. Young Esq., Chief Justice and President of the Executive Council of Nova Scotia, and to Hugh Esq., Chief Justice of Newfoundland.

GREENWICH HOSPITAL.—Admiral Sir Houston Stewart, G.C.B., has been appointed, under the late Act in Council, Governor of Greenwich Hospital, at a salary of 1200*l.*, including his half-pay as Admiral. The emoluments of the late Governor were equivalent to 2571*l.* per annum.

THE PORTSMOUTH COMMAND.—Vice-Admiral Sir James Hope, G.C.B., has been appointed to succeed Admiral Sir Thomas Pasley, Bart., as Commander-in-Chief at Portsmouth.

THE DOCKYARDS.—An Admiralty order received at Chatham Dockyard directs the discontinuance of a number of intricate and useless returns. The result will be that a vast amount of unprofitable labour on the part of the clerks will be entirely got rid of.

THE WAR OFFICE.—General Ballour, the Assistant Controller, resigned his office last week, but resumed it on the next day, the difficulty which led to his retirement having been removed.

THE ARCHDEACONRY OF SUFFOLK.—The Archdeaconry of Suffolk, vacant by the preferment of Bishop Ryan to the rectory of St. Nicholas, Guildford, has been conferred by the Bishop on Norwich on the Rev. Richard Hindes Groome, rector of Monk Soham, near Woodbridge.

PARLIAMENTARY MOVEMENTS.—It is understood that in consequence of the late opening of the session, and the importance of the measures which will have to be discussed, the Easter recess not be of the usual length, but will be no longer than just to tide over Good Friday and Easter Sunday. At a meeting of the Bradford Liberals, on Thursday week, Mr. M. W. Thompson was formally accepted as a candidate for the vacant seat. A writ for the vacancy in the City of London, caused by the death of Mr. Charles Bell, was issued on Wednesday. An aggregate meeting of the 19 Liberal committees in the City was held on Thursday, when it was unanimously resolved to adopt Baron Rothschild as their candidate for the vacant seat.

Foreign.

FRANCE.—A circular of the Minister, M. Foreade de la Roquette, was published on Thursday, relative to the right of public meeting. It says that the Government can no longer tolerate abuses of the newly-granted liberty, and intends henceforth to repress all license and thereby separate from the right of free meeting those excesses which can only have a compromising tendency. In the sitting of the Legislative Body on Monday, the 22d inst. was fixed for the discussion of the contract between the City of Paris and the Credit Foncier of France. In the sitting of Thursday the interpellation of M. M. Garnier-Pages and Richard were authorised by the Bureau. Count Walewski arrived at Marseilles on Monday with the reply of Greece to the declaration of the Conference, and reached Paris on Tuesday. The Conference met on Thursday to receive the reply, and the adhesion of the Cabinet of Athens to the principles laid down by the Conference having been formally recorded, the Conference declared the diplomatic relations between Turkey and Greece *ipso facto* re-established, and instructed its president to thank the two Governments, in the name of the Conference, for the deference shown to its counsels. After this the Conference declared itself dissolved. The Government journals are very severe in their censure of the Bill carried by the Belgian Chamber of Deputies, extending the powers of the Government in forbidding railway companies to cede their concessions. They contend that the Bill originated in groundless fears, and is calculated to impede the development of international relations between France and Belgium, they condemn the Brussels Cabinet for introducing it, and express the hope that the Senate will quash the vote of the Chamber of Deputies. The *France* of Tuesday publishes an article headed "Public Feeling in France," in which it says—

"People believe they see the hand of Prussia in this Belgian affair. It is necessary that it should be known abroad that France is tired of the present precarious and uncertain condition of her foreign relations. The existing state of things is neither war nor peace. No one is more sincerely inclined towards a pacific course than ourselves, but this state of uncertainty, which compromises every interest and alarms the public mind, is truly unbearable. It is time to have done with it."

The *Public*, in an article on the subject, says:—

"There is no Belgian question at issue, but a serious question of political economy, which has been raised inopportunistically by the Ministry now in power in Brussels. We do not know if it will be settled by legitimate reprisals on the part of France, or by the fall of the Belgian Cabinet."

The *Constitutionnel* contains an article, of which the following is a summary:—

"We consider the vote of the Belgian Chamber as a mark of distrust against a neighbouring and friendly country, but do not agree in the exaggerated views held by others, who regard the incident as a complete humiliation endured by France at the hands of Belgium, and even consider a rupture to be unavoidably imminent. We believe King Leopold will offer explanations to satisfy France, or that the ill consequences of the law voted by the Chamber under the pressure of the Ministry will be annulled, and that the incident will not disturb the peace of the world."

The *Pays*, apostrophising Prussia, says:—

"You are insane enough to tempt and provoke us! But have you forgotten that our old hatred of the English has been replaced by our hatred for the Prussians! 1815 and Waterloo still ring in our ears as a funeral knell, and the hour of revenge is impatiently awaited by French patriots. We well know the way that leads to your capital."

The Opposition, as well as the Government journals, also publish articles condemning the attitude of the Belgian Government, which they agree in charging with fear or dislike of France, and with trucking to Count Bismarck, who will, they assert, before long act by Belgium as he has acted by Hanover. Some of them go so far as to suggest that it was at the instigation of Prussia that the Belgian Government and Chambers offered such an affront to France. They all express the hope that in view of the general opinion in France, already clearly expressed on the subject, the Belgian Ministry will not permit the project to have a retrospective character, but will consider that such a course would prejudice the interests of the commercial

community. Fudl Pacha, the late Prime Minister of Turkey, died at Nice on Saturday, after a long illness. His malady, *angina pectoris*, had latterly been most distressing. Unable to lie down, from the irritation of his back consequent on a long recumbent position, the Pacha was supported for many nights before his death by slings, which were passed under his arms. His death has caused much regret in French society, and his loss will be seriously felt at Constantinople. Professor Max Muller has just been elected one of the eight foreign Associates of the Institute of France. The Paris Mint is at present coining gold pieces of 25fr, according to the plan of the committee on monetary unification. The new coin will have the weight of the English sovereign, and will be called The Emperor. During the late storms, two of the five electric cables which connect France and Belgium with England were broken by the tempest. The land communications which join the three others on each side of the Channel were also broken, so that all telegraphic correspondence between France and England was completely suspended. For this reason the evening journals of Tuesday were unable to give the Queen's Speech on opening Parliament.

ALGIERS.—A telegram from Algiers states that a portion of the tribe of Ouled Sidi Chetah, which remained faithful to the Government, surprised the insurgents' camp, on the 5th inst., and made a successful razzia, returning with 2500 camels laden with booty.

SPAIN.—In the sitting of the Constituent Cortes on Saturday Senor Rivera was elected President by 163 votes against 59 given to the Republic, an candidate, Senor Orenze. Senores Vega, Arango, Mirto, Cantero, and Valera were elected Vice-Presidents. Senor Rivera delivered a speech, in which he appealed to the Deputies to pursue a prudent and dignified course. The Cortes have since been occupied with the verification of the elections. At a very important meeting of the majority of the Cortes on Wednesday evening, it was resolved, that when the Cortes are constituted, and the Provisional Government resigns its powers, Marshal Serrano shall be intrusted with the formation of a new Cabinet, thus embodying the sovereign Executive Power. Private advices state that the election of Dom Fernando to the Spanish Throne, and his acceptance of it, are considered probable. The Minister of the Colonies has issued a decree establishing various financial modifications and a uniform system of jurisdiction in the Colonies, and abolishing the Ecclesiastical Courts. An important manifestation in favour of liberty of worship and the abolition of capital punishment was made on Sunday at Malaga. A demonstration in favour of the abolition of military conscription took place on the same day at Valladolid. Senor Olozaga has left Madrid, in order to visit his estate near Vico. It is asserted that he will resign his seat as Deputy.

PORTUGAL.—Many seditious proclamations in favour of an Iberian Republic have been secretly circulated in Portugal.

BELGIUM.—A convention was entered into some time since between the Luxembourg Railway Company and the Eastern of France, by which it was agreed that the latter should take over and work the line from Arlon, in the Luxembourg territory, to Brussels. The agreement is said to have been very advantageous to the Belgian Company in its results, but the public seems to have seen in this amalgamation an increase of French influence. The Government and the Chamber of Deputies shared these apprehensions, and the consequence was that a measure was introduced into the Chamber prohibiting concessions of railways without the authority of the State. In the sitting of the Chamber on Sunday, this Bill was carried by a majority of 61 to 16. In the sitting of the Senate on Wednesday the Bill was introduced and referred to the Committee on Judicial Affairs, the debate upon it being fixed for Thursday. In consequence, however, of the great excitement which has been caused in Paris by the recent vote, General Renard, the Minister of War, left Brussels on Wednesday for Paris, with an autograph letter from King Leopold to the Emperor, explaining that the Bill has purely a financial bearing and not a strategical one. It is said that the Ministry had previously drawn up an explanatory circular tending to satisfy France and to calm the susceptibilities of public opinion. For some weeks past a very fatal form of scarlet fever has been raging at Brussels, more especially among young women of the best families. Among those who have already fallen victims may be mentioned Madlle d'Artemberg, Madlle. d'Oultremont, and Madlle. de Merode, a relation of the late Marquis de Moustier.

SWITZERLAND.—Notwithstanding the petition signed by 6000 inhabitants of the Canton of Soleure, in favour of a total revision of the Constitution, the Cantonal Council have decided, by a majority of 76 to 19, for a partial revision only. Negotiations for the conclusion of a Treaty of Commerce between Switzerland and the Zollverein will be resumed in Berlin next month, and, it is believed, with every prospect of success.

PRUSSIA.—The *North German Gazette* formally denies that Prussia has been connected in any way with the Belgian railways affair. In the sitting of the Upper House on Friday the Bills relative to the confiscation of the private property of the King of Hanover, and of the Elector of Hesse, were agreed to by a large majority in the form in which they passed through the Lower House. During the debate the Bill for the confiscation of the King of Hanover's private property, Count Bismarck delivered a speech in which he said:—

"The treaty of September, 1867, which was signed by two Kings and countersigned by the Prussian Minister for Foreign Affairs, was no private contract, but a State treaty, both in the manner in which it arose and the form in which it was drawn up. In the interests of peace we set an example of magnanimity such as had never before been witnessed in the history of Europe. Had Prussia been defeated, an event which

In 1806 all the world, excepting ourselves, considered certain, Silesia would probably not have been the only sacrifice we must have made to save ourselves from destruction, for our opponents projected the dismemberment and annihilation of Prussia. After our victory the duty of self-preservation forced upon us the extinction of the Hanoverian kingdom. To the Royal house which had fallen by its own faults and self-delusion we desired to secure, with a view to the consolidation of peace, a position worthy of its past history, so that its head might live in England in a manner suitable to his rank as Duke of Cumberland. At the same time we did not believe in any theory of the rights to private property of an enemy who had not concluded peace with us. We looked upon the arrangement made as a settlement of all claims, for we gave more than the King of Hanover had possessed. As his Majesty has deceived us when we confided in the fulfilment of the implied conditions and assumptions of the treaty, we are now compelled to preserve the fatherland from any possible danger that might arise from this violation of trust.

During the discussion on the Bill confiscating the property of the Elector of Hesse-Cassel, Count Bismarck said—

"The Elector of Hesse broke his engagements entered into in the treaty with us by his direct appeal in a published manifesto to the European Powers to take the province of Hesse from Prussia. The Elector of Hesse is concerned in the deplorable agitation carried on by a certain Press to disturb the peace of Europe. It is a criminal undertaking to endeavour to incite to war two nations most earnestly desirous of remaining at peace, and to do so, moreover, through the dissemination of falsehood by means of the distribution of money. In the French Press, among a people extremely sensitive on points of honour, an opinion has purposely been spread abroad that Germany wishes to employ the strength gained by unity towards a war of attack upon France. In this must be sought the explanation for the collection of false news which has been circulated with shameless inventiveness in both countries, and which, sent everywhere by telegraph, has had a most pernicious effect. Thus public opinion in France and Germany is worked upon as if war was daily imminent between the two countries. It is the interest of both nations that an end should be put as speedily as possible to these lying intrigues, by cutting off the means by which they are fostered. The Prussian Government has always actively endeavoured to prevent the circulation of false war rumours. It is fully convinced that all European Governments are animated by peaceful intentions, and it requires that the public, both in France and Germany, should entertain this belief. Even in the interest of national dignity it is necessary to stop the sources whence newspapers are subsidised openly to incite a brave and warlike nation like the French to make war upon Germany. I have many times been reproached by the Press for not preserving a proper diplomatic calm in the face of such endeavours. Those who can restrain their anger at such baseness have national feelings differently organised to mine."

The Prince of Montenegro dined on Saturday with the Crown Prince and Princess, and left in the evening for Vienna. Heinrich Ritter, the well-known philosopher and historian, has just died at Göttingen. He was born in 1791, and, after having taken part in the war of independence in 1815, he commenced his career as academical teacher in Berlin, whence he afterwards removed to Kiel and Göttingen.

HUNGARY.—The Imperial decree convoking the Hungarian Diet for the 20th April was promulgated on Thursday. The examination of Prince Karageorgewicz terminated on Saturday. During the proceedings he repeatedly protested his innocence. The authentication of the depositions and the pleadings terminated on Thursday, when the Court decided that criminal proceedings should be taken against the Prince and MM. Trifcovits and Stancovits.

CROATIA.—The Croatian Diet has been convoked for the 1st of March. The Emperor and Empress of Austria will visit Agram on the 8th, and Fiume on the 14th of March.

RUSSIA.—It is stated that the precarious health of the Grand Duke, heir of the throne, will render it necessary for him to make a prolonged residence in the South of France or Italy.

ITALY.—The King and the members of the Cabinet returned to Florence from Naples on Sunday. The Italian journals state that her Royal Highness the Princess Margherita is in an interesting situation. The Chamber of Deputies re-assembled on Tuesday, and resolved to devote three days weekly to the discussion of the budget, two days to the discussion of the Provincial Administration and Reorganisation Bill, and one sitting to Bills of secondary importance. The King, during his visit to Naples, ordered the excavations at Herculaneum, which have been discontinued for 40 years, to be recommenced at his expense.

PAPAL STATES.—The Marquis of Bute left Rome on Monday last for Civita Vecchia, where he embarked in his yacht, the Ladybird, for the Levant. He will remain in the Holy Land during Lent, and return to Rome by Easter.

GREECE.—The new Ministry at Athens has issued a programme explaining the situation of affairs, and giving the reasons for its adherence to the protocol of the Conference. It has also revoked the measures taken by the late Government for the establishment of a national guard and for an extraordinary levy of troops, and has withdrawn the troops from the military positions they had taken up during the late crisis. The Candioti refugees have petitioned the Foreign Ministers at Athens for ships to enable them to return to Candia.

THE PRINCIPALITIES.—The Budget was voted on Wednesday. The estimated receipts are 74,362,823*l.*, and the expenditure 74,217,961*l.* The Chamber has authorised the Minister of Finance to issue Treasury Bonds bearing interest to the amount of taxes in arrears. Prince Charles has issued a decree fixing the primary elections for the new Chamber to take place between the 22d and 30th of March, and the actual election of the deputies between the 3d and 9th of April. It is said that a conspiracy against the Prince has been discovered.

TURKEY.—The Sultan has appointed Ali Pacha Minister of Foreign Affairs and Grand Vizier; Mohammed Ruscudi Pachi chief of the newly-created office for the Interior, Kiamil Pacha President of the Privy Council of State, Sodigk Effendi Minister of Finance, Midhat Pacha Governor of Bagdad, and

Omer Feozi Pacha Governor-General of Crete. The widow of Fuad Pacha was received on Monday at the Imperial Palace, and was granted by the Sultan a monthly pension of the value of 250*l.* The Government is also defraying the funeral expenses of the deceased Minister. The Sultan had ordered a frigate to fetch the body of Fuad Pacha from Nice, but had been anticipated by the Emperor of the French, who sent a man-of-war from Toulon to convey the body to Constantinople. It is intended to erect a tomb in memory of the deceased Minister. A proclamation of the Hellenic Government containing offensive expressions against Turkey, has been published at Constantinople, and has created a painful impression. The Porte is said to have protested against the terms employed in the proclamation, and insists upon their being retracted before official intercourse is resumed.

CANDIA.—The chiefs Koraka, Criari, Lacada, Sfakaniaki, have sent in their submission to the authorities, and the island now enjoys full and entire tranquillity. The Greek Patriarch has addressed a pastoral to the Christians in Crete, urging them to return to peaceful pursuits.

PERSIA.—Advices from Tiflis, dated the 14th inst., deny the truth of a telegram published by the Paris papers, stating that the Shah of Persia was preparing to move with an army in the direction of Bagdad, and add that the Shah has no intention of so doing. Six Turkish battalions, and eight cannons, have, however, been dispatched towards the Turkish frontier.

INDIA.—Sir John Lawrence is now in Ceylon, where he is making a short stay previous to leaving for England. It is announced that Lord Napier of Magdala will return to England in April. Sir Richard Temple will make his financial statement early in March. A surplus of 200,000*l.* is expected. Sir Richard will then proceed to England. Rain has fallen in the Punjab, and much of the crop under cultivation has thereby been saved. Cholera has broken out at Hyderabad and Secunderabad. Disturbances are reported in Oude, caused by the application of the Rent Act. The octroi duties on grain have been suspended in the North-west Provinces and Cashmere. The Looshai clan of Kookhies, on the eastern frontier of Sylhet and Cachar have devastated the two tea plantations of Woodlands and Soonarhunde, and killed several of the coolies. A body of armed police, followed by a detachment of the 7th Native Infantry, under Lieut. Logan, has been sent against them. It is officially confirmed that Azim Khan and Abdool Rahman have sought refuge in British territory. The Viceroy consented to give them shelter on condition of their abstaining from political intrigues and of their residing at a distance from the frontier. It is rumoured that an expedition is to be sent from India to New Zealand in consequence of the recent rising. The railway accident at Chore-Ghaut was caused by a heavy dew. The engine-driver lost all control over the train, which was going down an incline, and dashed over the embankment. Eighteen persons were killed, and more than thirty injured. No European lost his life. A Government inquiry has been instituted into the affair. The Sultan of Zanzibar has imprisoned the man Moosa, who gave false intelligence regarding Dr. Livingstone.

AUSTRALIA.—Accounts from Melbourne of January 5 state that the debentures of the new Victorian Railway loan have been sent to England by this mail. From Adelaide we learn that an expedition has sailed to survey the Northern territories. The yield of wheat this season will probably be six and a half million bushels. The second visit of the Duke of Edinburgh is looked forward to with great pleasure in the colony. At Sydney the Robertson Ministry has resisted the Opposition of the Parkes party.

CHINA.—A collision has taken place near Swatow between the inhabitants of some villages and the crew of her Majesty's gunboat *Cookchafer*. The crew were exercising on the shore, under Lieut. Kerr, when the natives unexpectedly commenced firing on them. The British were compelled to retreat, having had 11 of their number wounded. The officers escaped unhurt. A naval force of 400 men is proceeding to Swatow to obtain reparation. Her Majesty's ship *Serpent* has commenced taking deep-sea soundings between Singapore and Galle, with a view to the future laying of a telegraph cable.

JAPAN.—The Mikado has received the foreign representatives at Yeddo in public audience. The young Japanese sent to Russia for their education have left St. Petersburg, by order of their government, to return home. Those who were in Paris and London have also been recalled, the expenses of their residence in Europe being pronounced too great.

UNITED STATES.—The Senate Committee on Foreign Relations on Thursday agreed almost unanimously to recommend the rejection of the Alabama Claims Treaty, but reported favourably on the St. Juan Treaty. The President has accepted the office of arbitrator on the African boundary dispute between Great Britain and Portugal. General Grant, in reply to the formal notification of his election to the Presidency, declared that he would faithfully discharge the duties of his office, and call around him men who would earnestly carry out the principles of economy, retrenchment, and honesty, adding that he declined to announce the names of the members of his Cabinet until the nominations were sent to the Senate. On Tuesday the Senate passed the bill already adopted by the House of Representatives, prohibiting the acceptance of the national currency by banks, corporations, or persons as collateral security for loans. On Wednesday the new Tax Bill passed the Senate, and is now before the President. The President has sent to the Senate for ratification the treaty with Columbia, giving to the United States an exclusive right to construct the Darien Ship Canal. A proposition to tax interest on United States' bonds was

defeated on Tuesday in the House of Representatives. The Supreme Court has given a decision in favour of contracts made specially payable in gold. The Senate Committee on Pensions has reported on the petition of Mrs. Lincoln for a pension. The committee say that it is a special matter, and there is no precedent, and if considered at all should be considered by some other committee. Nellie Stevens has been burnt on the 20th at Arkansas; 63 persons were lost and 40 saved. Slight shocks of earthquake were felt at San Francisco on the 28th and 29th ult.

HAYTI.—The President of Hayti was slain in the south, and his troops hold Miragoan, and near Aux Cayes. The French admiral had refused to recognise the blockade of St. Marie, and ordered a Haytian steamer belonging to Salnave away from Port au-Prince. An earthquake occurred at Port au-Prince on the evening of the 22d ult., and damage was done.

CUBA.—The insurrection in Cuba, far from subdued, is spreading rapidly, and disaffection is festing itself in all the large centres of population. Havannah itself not excepted. A fresh rebellion broken out at Villaclara, a central point of strategic importance. General Dulce has ordered telegraphed for reinforcements, and has given orders for the insurgents who are taken prisoners to be shot by court-martial.

PARAGUAY.—Accounts from the River Plate announce the conclusion of the Paraguayan campaign. Angostura was taken by the Allies on December 10, and on January 2 a division of the Brazilian army occupied Asuncion, the Paraguayan capital, and was found deserted. Lopez had refused to surrender, and had either fled with a few followers to the north or to Bolivia, or had concealed himself at Corrientes. The execution of his brothers, Berges the brother-in-law, is confirmed. The Brazilian army ascending the river to Matto Grosso. The Paraguayan population was returning to Asuncion.

SANDWICH ISLANDS.—Advices from Honolulu January 15 state that a severe storm had prevailed over the Sandwich Islands, and that frequent shocks of earthquake had been felt at Hawaii.

Parliament.

THE new Parliament met on Tuesday for the time for the despatch of business. The Queen's Speech was delivered by commission, and the Commons having been summoned to the bar, the CHANCELLOR read the Speech as follows:—

"MY LORDS AND GENTLEMEN,
"I recur to your advice at the earliest period permitted by the arrangements consequent upon the retirement of the Administration.

"And it is with special interest that I comment on the resumption of your labours at a time when the popularity of the Legislature has been chosen with the advantage of greatly enlarged enfranchisement of my faithful and loyal people.

"I am able to inform you that my relations with the Powers continue to be most friendly, and I have no reason to believe that they cordially share in the policy which I am animated for the maintenance of peace, and at which I am anxious to use my best exertions to secure the motion of this most important object.

"In concurrence with my allies I have endeavoured friendly interposition, to effect a settlement of the differences which have arisen between Turkey and Greece, and that our joint efforts have aided in preventing any interruption of tranquillity in the Levant.

"I have been engaged in negotiations with the States of North America for the settlement of questions which affect the interests and the international relations of our countries, and it is my earnest hope that the result of negotiations may be to place on a firm and durable basis a friendship which should ever exist between England and America.

"I have learnt with grief that disturbances have broken out in New Zealand, and that at one spot they have been attended with circumstances of atrocity. I am confident that the colonial government and people will not be wanting in energy to repress the outbreaks, or in the practice of moderation which I trust may prevent their recurrence.

"GENTLEMEN OF THE HOUSE OF COMMONS,
"The estimates for the expenditure of the country for the year will be submitted to you. They have been framed with a careful regard to the efficiency of the service, and do not exhibit a diminished charge upon the country.

"MY LORDS AND GENTLEMEN,
"The ever-growing wants and diversified interests of the empire will necessarily bring many questions of public policy under your review.

"The condition of Ireland permits me to believe that it will be spared the painful necessity which was felt by the Parliament for narrowing the securities of persons and property in that country, by the suspension of the Habeas Corpus Act.

"I recommend that you should inquire into the various modes of conducting parliamentary and municipal business, and should consider whether it may be possible to secure further guarantees for their tranquillity, purity, and efficiency.

"A measure will be brought under your consideration of some classes of occupiers from hardships arising from rating, which appear to be capable of remedy.

"You will also be invited to direct your attention to the extension and improvement of education in Scotland, for rendering the considerable revenues of the endowments of the schools of England more widely effectual for the purpose of instruction.

"A measure will be introduced for applying the same principle of representation to the control of the county rate by the establishment of financial boards for counties.

"It will be proposed to you to recur to the consideration of bankruptcy, with a view to the more effective disposal of assets, and to the abolition of imprisonment for debt.

"The ecclesiastical arrangements of Ireland will be brought under your consideration at a very early date, and the consideration which will be necessary in order to their final settlement will make the largest demands upon the wisdom of the Legislature.

"I am persuaded that, in the prosecution of every legitimate interest which may involve, and that you will be governed by the same aim to promote the welfare of religion through the promotion of equal justice, to secure the action of the Legislature, and opinion of Ireland on the side of loyalty and law."

of former contentions, and to cherish the sym-

an affectionate people.

of public interest, and especially in one so

that the Almighty may never cease to guide

and I may bring them to a happy issue."

Lords the Earl of CAIRNS moved and

seconded the Address in answer to the

Lord CAIRNS said it was satisfactory

Address was couched in language that they

to the Sovereign with unanimity, even

they differed as its subject-matter. Their

not but be gratified that the necessity

existed for the suspension of the Habeas

Act.

He trusted that economy in the public

would be tempered with a due regard to

and that the scheme for dealing with the

Church, whatever it might be, would be intro-

at the earliest possible moment, as a whole and

instalments, so that it might receive the full and

consideration to which it was entitled. Earl

GRANVILLE said he was grateful for the tone of Lord

CAIRNS' observations, but he should follow him in not

giving the information which the House would

have before it respecting the Government

on the Irish Church. On Thursday the LORD

CHAMBERLAIN stated that in compliance with the desire

of the trading community, the Bill for the reform of the

bankruptcy would be initiated in the House of

Commons. The Marquis of SALISBURY, Earl GREY,

Lord CAIRNS, Earl RUSSELL, and Lord WESTBURY,

expressed their opinion that it was necessary to adopt

some plan for the more satisfactory distribution of the

business of Parliament between the two Houses.

Earl GRANVILLE stated that he had been directed by

Her Majesty to express her regret at having been

prevented by the state of her health from meeting

Parliament, but would come to town to receive the

Address in person. His lordship then moved that the

Address should be presented by the whole House.

Lord CAIRNS seconded the motion, which was

agreed to. Yesterday the LORD CHAMBERLAIN an-

ounced that her Majesty would receive the address of

the House at Buckingham Palace, at one o'clock on

Monday next. Earl GRANVILLE moved a formal

resolution relating to the private Bills of railways,

which was agreed to.

In the Commons on Tuesday Mr. GLADSTONE gave

notice that on the 1st of March he would move that the

goods on Sunday, and Mr. W. JOHNSTONE obtained

leave to bring in a Bill to repeal the Party Processions

(Ireland) Act. The report of the Address having

been brought up and agreed to, Mr. GLADSTONE

moved that it be presented by the whole House.

It had been a matter of serious concern to

the Queen not to be able to meet Parliament at

the first assembly of a House of Commons elected

after a wide extension of the franchise. But her Majesty

was suffering at the time from severe headache to a

degree which precluded her from going through a cere-

mony which at all periods of her life had tried her

strength to the utmost. If the motion were agreed to,

the Queen had signified her intention of coming to

town specially to receive both Houses. Though

it was unusual to present in person the answer

to a Speech delivered by Commission, there was

a precedent in the reign of George III, when the

two Houses went up with an Address to the

King, congratulating him upon the battle of Trafal-

gar. Mr. DISRAELI seconded the motion, which

though unusual and not to be followed as a precedent,

he held to be wise and judicious in view of the import-

ance of establishing personal relations between her

Majesty and the new Parliament. The motion was

agreed to unanimously. Mr. W. FORSTER moved for

leave to bring in a Bill to reform and re-organise the

endowed schools in England and Wales. He said that

the measure was designed to carry out the recommen-

dations of the Schools Commission, and would be

limited to four years. After some discussion leave was

given to bring in the Bill, and Monday, the 8th of

March, was fixed for the second reading. Yesterday

the CONTROLLER OF THE HOUSEHOLD appeared at

the bar and stated that the Queen would receive the

Address of the House at noon on Monday next, at

Buckingham Palace. Mr. GLADSTONE stated, in

answer to Mr. C. Forster, that the Government did not

intend to repeal the ratepaying clauses of the Reform

Act, or to restore the system of compound rating in

form. In answer to Lord ELCHO, Mr. C. Buxton, and

Lord Bury, Mr. LAYARD said that he was entirely

opposed to the project of a viaduct on the Thames

Embankment, and thought that an inquiry ought to

be instituted by order of the House of Commons.

The House was left sitting.

City Intelligence.

THE CASE OF MR. EDWARDS AND OVEREND,

GURNEY, AND Co.—On Monday in the Court of

Bankruptcy Mr. Edwards, the official assignee, gave

his explanation before Mr. Commissioner Holroyd of

the circumstances affecting him, which had been made

public by his evidence before the Lord Mayor in the

prosecution of Overend & Gurney. The Lord Chan-

cancellor had required him to state whether the news-

paper report of his examination was substantially cor-

rect, and if so, how he reconciled his attendance at

board meetings of the Atlantic Royal Mail Steam Com-

pany in the middle of the day twice a-week, and his

services to the company of Overend, Gurney & Co.

at a salary of 5000*l.* a-year, with the performance of

his duties as an official assignee in the Court of Bank-

ruptcy, and on what account he received a further sum

of 10,000*l.* Mr. Edwards read his reply, which was of

great length, but which was to the effect that his ex-

amination was hostile, that he had no opportunity of

refreshing his memory by reference to vouchers and

documents; that he was baited by both sides, and

had no protection from the Bench; that he attended

the board meetings of the Atlantic at the request of

Overend & Gurney to protect their interests, and that

it was after office hours, and therefore not inconsistent

with his duties as official assignee; and that if the

10,000*l.* mentioned referred to commission from the

Millwall Company he denied ever having received such

a sum. He also stated that if the books of Overend &

Gurney were referred to it would be seen that he was

in no respect responsible for the losses which the firm

had sustained. He considered that the ceaseless labour

he performed had fully entitled him to the 20,000*l.*

which he received from Overend, Gurney & Co. The

firm were fully aware of the commissions, the pay-

ments, and the presents which he received, and that

most of the insinuations that had been raised respect-

ing him were unfounded, and in many respects per-

fectly absurd. Commissioner Holroyd said that the

reply of Mr. Edwards would be transmitted to the

Lord Chancellor for his decision.

THE MERCHANTS' COMPANY PROSECUTION.—The

case for the prosecution against Mr. Richard Stuart

Lane, Mr. Horace Edward Chapman, and Mr.

Frederick John Helbert Helbert, three of the direc-

tors of the Merchants' Company, and partners in the

late firm of Lane, Hankey & Co., of Old Broad Street,

was resumed on Friday, and again adjourned to Mon-

day next, the 22d. The other summons, for issuing a

false circular, in which Mr. Stuart Lane and Mr.

James Childs only are concerned, was adjourned to

yesterday, when the case for the defence was

closed. The Lord Mayor then gave his decision,

and said that he had gone carefully over the books,

and was of opinion that at the time the circular

was issued the company was hopelessly insolvent,

to the knowledge of the defendants. He therefore

committed them for trial, but would admit them

to bail—themselves in 2000*l.*, and one surety each

in 2,000*l.*

CHARLES LAFFITTE & Co. (LIMITED).—Vice-

Chancellor Sir E. Malins has given judgment in the

important case of Gray v. Harvey Lewis, M.P., and

others, in which the plaintiff, one of the shareholders

in Charles Laffitte and Company (Limited), on behalf

of himself and the other shareholders of the company,

except the defendants, sued for the purpose of com-

pelling the National Bank and the directors of Charles

Laffitte and Company to restore the sum of

230,000*l.*, which the plaintiff alleged had been

illegally and improperly taken from the funds.

The Vice-Chancellor held that the agreement,

by which a guarantee was given to the National

Bank for the payment out of the funds

of Laffitte & Company for 40,000 shares placed in the

name of the International Company, was illegal and

fraudulent, and therefore decreed that the bank could

derive no right under the guarantee, and "must con-

sequently restore the 230,000*l.* with interest, to Charles

Laffitte & Co. Messrs. Lewis, Rensham, Kitson, &

Bate having been the main promoters of the scheme,

and having taken an active part in its accomplishment,

were guilty of a breach of trust, and were therefore

liable, with the bank, to restore the funds in question,

and they, the said National Bank, must pay the costs

of the suit."

MONEY MARKET, FRIDAY.—BRITISH FUNDS:

Consols closed at 92½ to 93, both for Money and

Account; New and Reduced Three per Cents, 93½

to 93½; Bank Stock, 242 to 244; Exchequer Bills,

par to 5s. pm.; India Five per Cents, 112½ to 112½.

—FOREIGN: Italian (1861), 57½ to 57½; Tobacco Loan,

7 to 8 pm.; Argentine, 81½ to 81½; Turkish Five per

Cents, 41½; Ditto Six per Cents, 64½; Spanish, 31½;

Brazilian, 84 to 84½; Peruvian, 78 to 78½; Mexican,

15½ to 15½; Greek, 11½ to 12½; Danubian, 78 to 79;

Egyptian Railway Debentures, 96½ to 96½; Ditto

(1868), 74½ to 75; Portuguese, 36½ to 37; Nicolai, 67

to 67½; Moscow, 80½ to 81; Charkof, 81 to 81½; United

States 5-20 Bonds, 78 to 78½; Erie, 25½ to 25½; Illinois,

96 to 97.

Metropolis and its Vicinity.

MR. BRIGHT ON THE BOARD OF TRADE AND THE

BISHOPS.—At the dinner of the Fishmongers' Com-

pany to her Majesty's Ministers last week, Mr. Bright

made the following remarks on his office in the

Government, and on the speeches made by the Arch-

bishop of York and the Bishops of London and Oxford

at a dinner given by the Company a few nights before:—

"My name in connection with the Board of Trade reminds

me of a question which I once put to the late Mr. Stiel, when

he was Vice President of the Board. I asked him how it

happened that he had been put into that place. Now, we

know what Mr. Stiel was—he was a very eloquent Irishman.

He had a great sympathy with his country, but he was not

particularly connected with commercial affairs, and he said he

thought the only reason was, that he was found to know less

of trade than any other man in the House of Commons. I do

not profess to be able to say that, since for 25 years, nay, for

30 years, I have given up my time, and nearly all my thought,

to public and political questions. I am afraid my family will

always have to remember that in many things I sacrificed

their interests to my own convictions of what I thought the

interests of the country. But that at any rate I can say, that

if I have forsaken the paths of trade I have not endeavoured

to make a trade of politics. But this name of trade will

induce the public to think that the Board can do

much more than it really can. It is far more a

department of counsel than a department of action.

It gives any quantity of good advice to other departments of

the Government, but, in the presence of this audience,

I charge upon my colleagues that a great deal of that advice is

wholly disregarded. Now, if I had here all the Prime

Ministers that I have known—I will not go so far back as my

own parliamentary experience, but I will say the Prime

Ministers for the last 15 years—if I had all the Chancellors of

the Exchequer during that time still more, if I had all the

Ministers who presided over the departments of the army and

the navy, I should bitterly complain of them that they have

been guilty of the most extraordinary and indefensible waste

and extravagance of the public resources. 20,000,000*l.*, I be-

lieve, have somehow or other been added to our expenditure

and taxes during the 15 years to which I have referred. Now

this result has happened, besides the money that has been

raised in taxation. Your policy of free trade stopped

short at the policy of protective duties, but still main-

tains a restrictive system by levying 20,000,000*l.* per

annum on articles consumed in the food of the people.

Now, if I am not absolutely silenced by my position in the

Government I shall take every opportunity of bringing my

colleagues before the bar of public opinion. I shall say that

I am at the head of a department which is but permitted to

advise—that we have at the head of our departments men of

remarkable ability in connection with public affairs, that on

all questions submitted to them they give good advice, but

little of it is accepted and followed. Lord Granville has

noticed some remarks which were made in this hall two or

three nights ago, the report of which was of a very humorous

description. In fact, I might ask the Prime Warden and his

predecessors in his dignified office whether they ever had in

this hall before so jolly a company. For my share I almost

envy those right rev. gentlemen that they should be so

hilarious on the occasion. What an extraordinary point

of imagination a man must have arrived at who

could say that the life peerages or life peers—the eccle-

siastical peers—were really the only liberal element

in the House of Lords. That may be true, but I much pity

the rest of the House if it be true. There was an old Syrian

monk that I read of many years

THE CAPITATION GRANT TO VOLUNTEERS.—A deputation from the Capitation Grant Committee, chiefly consisting of officers from Durham, Northumberland, and other northern counties, had an interview on the 11th inst. with the Secretary for War for the purpose of bringing forward fresh evidence of the necessity for an increase in the capitation grant, and especially for a graduated scale suited to the wants of the different arms of the service. Mr. Cardwell, in reply, said that he was not at present prepared to say that an increase is advisable, but he fully admitted that a gradation in the allowances to various services is necessary owing to the additional requirements made on some branches of the service, and also the additional requirements in some localities. He was at present engaged in inquiring into the necessity of such increase, and also into the possibility of an improved organisation of the force, not only in relation to itself, but also in relation to the other branches of the reserve forces and the regular army. He was not prepared to say that a Crown Commission would be recommended, though he would be glad to communicate with Lord Elcho, this Committee, and others who were acting for the volunteer force; but he strictly adhered to the reply given last month to Lord Elcho, that no money increase would be granted at present. A report has since been prepared by a committee of Scotch volunteer officers, and presented to a meeting of commanding and field officers at Glasgow. It states that after inquiring minutely into the condition and management of a large number of corps in Scotland, the committee are satisfied that the increase of the capitation grant by at least 12s. 10¹/₂d. a head is absolutely necessary to the vitality of the force; and that in some corps the men are actually wearing the uniforms they obtained at the commencement of the volunteer movement 10 years ago. The report was adopted, and a deputation was appointed to wait upon Mr. Cardwell, to ask for an increase of at least 10s. in the grant.

DEVONSHIRE VILLA, CHISWICK.—It is announced that the Prince of Wales has taken the Duke of Devonshire's villa at Chiswick, lately occupied by the Dowager Duchess of Sutherland, for a term of three years.

ACCIDENT TO VISCOUNT JOCELYN.—On Monday evening as Lord Jocelyn was descending Hay Hill, Berkeley Square, in a hansom cab, the horse fell. His lordship was thrown out of the cab and fell on his back, and sustained injury to his spine. He was taken to Lady Palmerston's residence in Park Lane, and was immediately attended by his brother-in-law, Lord Sudley, and by Mr. Prescott Hewitt, the eminent surgeon, under whose treatment, although suffering considerable pain for a time, his lordship is going on favourably. In consequence of the accident Lady Jocelyn was summoned by telegram from Broadlands. Lady Palmerston, accompanied by the Right Hon. W. Cowper, M.P., and Mrs. Cowper, also came to town on Tuesday.

THE EASTER MONDAY REVIEW.—The final arrangements were made at Dover on Wednesday for the Easter Monday Volunteer Review. The regular forces present, including Artillery and Engineers, will comprise together about 3000 men, and steps are to be taken to request the consent of the Admiralty to the presence and assistance of a number of men-of-war and gunboats in the sham fight.

THE OPERA SEASON.—It is now decided that there will be only one Opera Company during the ensuing season. Mr. Costa having resigned his office as conductor of the Opera at Covent Garden, the two companies will be united, and then joint performances will take place at Covent Garden every night in the week. Signor Arditi is to be conductor.

LAMBETH PALACE.—The Archbishop of Canterbury has signified his intention of having an evening service, with a sermon, in his private chapel in Lambeth Palace, at 5 P.M., on Sundays throughout Lent. A limited number of persons will be admitted to the chapel, on application to the chaplain, at the Palace. About 60 persons can be accommodated.

PERVERSION TO ROME.—The Rev. William Hunnybun, M.A., Vicar of Bicknoller, Somerset, has resigned his living, and been received into the Church of Rome. He was educated at Caius College, Cambridge, where he graduated in 1860. He was for some time curate of North Kelsey, Lincolnshire, and was presented to the vicarage of Bicknoller in 1867.

CONVERSION OF CAST-IRON GUNS.—The first batch of 61 rifled guns, converted on the Palliser principle from smooth bore cast-iron guns, has been received at Woolwich. They have been proved by the Royal Gun Factories, and 60 have been passed into the service, one being rejected for defective manufacture. A second batch of 30 guns is on its way from the Elswick Works at Newcastle. It is stated that Government have decided to convert a considerable number of cast-iron guns next year in the gun factories at Woolwich.

STEAM TRAFFIC ON COMMON ROADS.—A project has been matured which promises ultimately to establish a system of steam conveyance for goods and passengers on common roads. Mr. Thomas Page, the acting engineer to the Thames Tunnel under Mr. Brunel, and the constructor of Westminster Bridge, is the inventor of the new system and a company has been formed for carrying out the enterprise, which will be free from the objections which have hitherto obstructed the extension of tramways, as tributaries of railways. It will also admit of the steepest gradients being overcome by the engines employed, and will at once bring new traffic to the railways, and develop industry and production, now stagnating for want of ready access to markets. The directors of several railway companies have expressed themselves entirely in its favour. The working arrangements will be simple, and Mr. Page estimates the cost of the tramways at less than 2000^l. per mile.

THE METROPOLITAN IMPROVEMENT RATE.—The Metropolitan Board of Works have resolved not to

introduce the Metropolis Improvement Rate Bill in the present session of Parliament.

THE BOARD OF TRADE.—The whole staff of the Board of Trade have removed from their former offices in Whitehall to Pembroke House in Whitehall Gardens, recently occupied by the Foreign Office. The Colonial Office will now remove from Downing Street to the vacated building in Whitehall, while the old Colonial Office will be demolished for public improvements.

THE POOR-LAW BOARD.—The Right Hon. G. J. Goschen, President of the Poor-law Board, on the night of Wednesday week, paid a visit to St. Marybone Workhouse, and spent a couple of hours in inspecting the casual wards, and a portion of each department of the workhouse.

THE ROYAL ACADEMY.—The new galleries of the Royal Academy in Piccadilly are progressing rapidly, and there is reason to believe that the stipulation requiring them to be finished for the May exhibition will be complied with. The walls of the galleries are in course of being painted a deep maroon red. The pictures are not to be hung at so great a height as in the old galleries. The size of the catalogue is to remain unchanged, and is to include a plan of the galleries, so as to facilitate reference. It is still undecided whether the sale of refreshments will be permitted within the Exhibition, as in the British and South Kensington Museums.

EXTRAORDINARY HIGH TIDE IN THE THAMES.—On Monday morning the tide in the river rose to an unusual height, inundating the wharves and warehouses on both banks, and causing great damage to property. In the low-lying districts at Lambeth, Vauxhall, Nine Elms, and Battersea, the water ran along the streets at an alarming pace, flooding the houses to a serious extent. In the upper part of the river the stream is gradually swelling, and immense tracts of land are under water, especially in the neighbourhood of Reading, Cookham, Maidenhead, Windsor, and Datchet. The Eton Brocas, the Playing Fields, the Windsor racecourse, and their vicinity are all under water; the streets in Clewer parish are flooded, and punts have to be used to enable the residents to gain access to their houses.

THE METROPOLITAN POLICE.—It is stated that four Chief Constables of the Metropolitan Police will shortly be appointed, at salaries of 500^l. a year each.

IMPRISONMENT OF CHILDREN FOR DEBT.—On Tuesday last a girl under 14 years of age was taken away from the Girl's Refuge at Ealing, by the sheriff's officers, for an alleged debt of 3^l. 11s. 2^d., and conveyed to Whitecross Street Prison, where she still remains. Sir G. Jenkinson brought the matter before the House of Commons on Thursday, when the Home Secretary said that he had made inquiries, and ascertained that not only was the statement true, but that the prisoner's two sisters, one 14 and the other 17 years of age, had also been arrested for the costs of an action. It was, he said, to be supposed that they had been committed by the judge under some mistake; but he would take immediate steps to inquire into the matter.

DEATH IN THE STREETS.—The Registrar-General this week prominently calls attention to the fact that, calculating from the returns of last year, people are killed in the streets of London at the rate of 23 in six weeks; the numbers registered in the six weeks of the present year are 24. He says that the chances of death change with the laws, and may be considerably reduced, and that a fine on the owners and drivers of the vehicles would probably produce a salutary effect in the streets.

ALLEGED CONSPIRACY TO OBTAIN ADMIRALTY CONTRACTS.—At Bow Street Police-court on Wednesday Mr. James Thomas Gambier, one of the first-class clerks in the Storekeeper's Department of the Admiralty, Somerset House, and Mr. William Rumble, inspector of machinery afloat, were brought up in custody of Inspector Clarke, Sergeant Langley, and Sergeant Sayer, of the detective force, upon a warrant signed by Sir Thomas Henry, charging them with having conspired to obtain 30^l. from Mr. Nicholas Mahon Maxwell by false and fraudulent pretences. The case was conducted by Mr. Bristowe, the Solicitor to the Admiralty, and Mr. Baxter, M.P., the Parliamentary Secretary to the Admiralty, attended to watch the proceedings. It appeared from the statement for the prosecution, that Mr. Maxwell sent in a proposal for a contract for elm timber for the dockyards, and that a day or two afterwards Mr. Rumble called upon him and told him that the contract lay between him and another person, and unless he made terms with him and another person at the Admiralty he could not get it. Mr. Maxwell immediately communicated this offer to the heads of the department, and by their instructions the negotiation was carried on with a view to find out who were concerned beside Mr. Rumble in the matter, and by the aid of a detective, Mr. Gambier was found to be implicated, one of the 10^l. notes, paid by Mr. Maxwell by order of the Board, having been traced to his possession. After a good deal of evidence the case was adjourned.

MANUFACTURE OF POISONOUS SAUSAGES.—On Monday George and Charles Simmonds, sausage-makers of Bethnal Green, brothers, but carrying on business in distinct shops, were charged at the Worship Street Police Court with cutting up diseased beef, unfit for human food. At one establishment the officers found two men cutting up two quarters of beef, and at the other the defendant himself was at work preparing one quarter, probably of the same animal. Mr. Ellison sentenced the former, George Simmonds, to pay a fine of 20^l. and costs, 3^l. 13s. 6^d., which he did at once; and the latter, Charles Simmonds, to three months' hard labour, without the option of a fine.

ATTEMPTED MURDER IN PIMLICO.—On Saturday afternoon a tragical affair took place in Warwick Street,

Pimlico. Mr. Lynn, the sculptor, having been told that if Mr. Joseph Dunbar, one of his model-room, Dunbar became drunk, he should not have attempted to commit suicide violently, Mr. Lynn immediately seized his hand, upon which he stabbed Mr. Lynn in the groin. He was prevented from doing further mischief, and was taken over to the police. He was taken, in a rickshaw, to the nearest hospital, and the wound in his groin is serious that he is not expected to recover. His wound is not considered dangerous.

THE MURDER AT HACKNEY.—The Home Office has issued an order granting a reward of 100^l. for the discovery of five men who, on the night of the 23rd and 24th inst., murdered Samuel Crockett, and threw his body into the Regent's Canal at Hackney.

THE DOUBLE MURDER IN POPLAR.—The bodies of the old man and his granddaughter, who were murdered at Blackwall, were examined on Monday, when the jury returned a verdict of Murder against John Cooper, the husband of the deceased woman. Although 10 days have elapsed since the crime was committed, the police have not yet traced the perpetrator, for whose apprehension a reward of 100^l. has been offered by the Home Office.

THE PUBLIC HEALTH.—The Registrar-General's weekly return states that in the week ending on Saturday, Feb. 13th, 4617 births and 3221 deaths were registered in London and in 13 other large towns in the United Kingdom. The annual rate of mortality was 26 per 1000 persons living, being 23 in London, 28 in Edinburgh, 27 in Dublin, 22 in Birmingham, 27 in Liverpool, 33 in Manchester, 23 in Salford, 24 in Sheffield, 20 in Bradford, 23 in Leeds, 27 in Hull, 34 in Newcastle-upon-Tyne, and 38 in Glasgow. The rate in Vienna was 1000 during the week ending the 6th inst. In Berlin 40 per 1000 during the seven days of the 11th inst. In London the births of 1097 boys and 1097 girls, in all 2249 children, were registered during the week. In the corresponding weeks of 1859-63, the average number, corrected for population, was 2363. The deaths registered during the week were 1426. It was the 11th of the year, and the average number for the year, corrected for increase of population, was 1566. The present return is therefore 156 below the average number.

Provincial.

CAMBRIDGE.—The Rev. John Venn, M.A. of Gonville and Caius, has been elected Lecturer for the ensuing year.

CARLISLE.—On the night of Saturday, the 2nd inst., a man called John Ward was walking into the street when he was shot in the back by some one who is supposed, intended to rob him, but as he did not see the man run away. He was however recovered persons on the spot, and was traced to Croftthence to Wigton, where he was apprehended. His name is John Ludlow, from the village of Ouchterlony, Wigton. He had his gun in a chimney, and he was brought before the magistrates and committed for trial. The medical witnesses stated that he was not yet positively out of danger. —It was stated last week that a stoker on the Caledonian Railway had been apprehended for the theft of a register containing the sum of 500^l. which formed the contents of the mail bag from Carlisle to Edinburgh. Many other letters were missing, and it appears that the prisoner, who had been out of the night of the robbery, went to his work in the morning, and, taking the letters with him, put them into the furnace of his engine, where they were consumed.

ETON.—The last barrier of the entire of colleges and oppidans at Eton College has been broken down, and the colleges are to be taken into the boats. Owing to this reform, it has been thought advisable to put on a new eight-oared boat accordingly the Hibernia is to row between the St. George in the annual procession on the 1st of March.

JERSEY.—On Friday week, the States of Jersey passed, by a majority of 20 to 19, the proposed Bill for imposing a tax of 2^d. per lb. on raw wool, and 6^d. per lb. on manufactured, and 6^d. per lb. on the purpose of increasing the revenue, and enabling the States to meet the numerous and pressing demands upon the island's exchequer for public works of various kinds. Since then several of the deputies and members of the parish who voted in the majority have been so wrought upon by their constituents as to be opposed to taxation in any form, that they have adjourned the Bill for 12 months by a majority of the members but two. On Friday the States passed a Bill for an increase of the indirect tax on spirits, and a dissentient voice. There was, however, a division on a motion by the rector of St. Helier, to form a reserve fund of one-half of the income of the States to wipe off the debt of 30,000^l. owing to the States to the harbour fund, which was carried by a majority of 25 to 12.

LIVERPOOL.—The Pacific Steam Navigation Company have received, by the Atlantic Cable, news that their steamer Arica was totally lost near the Cape Verde, Peru, on the 13th ult. No lives were saved. The vessel is understood to be partly insured.

LOWESTOFT.—In the severe gale of the 2nd inst. four vessels were driven ashore on the beach, and several others were stranded. Sixteen lives were saved by means of the apparatus, and the lifeboats Letitia and Josephine were put out and rendered effective service to the vessels.

MARGATE.—During the heavy gale which

METROPOLITAN MEAT MARKET.—Feb. 20.

Best Fresh Butter 19s. per dozen lb.
 Second do. do. 17s.
 Small Pork, 4s. 4d. to 5s. 4d.; Large Pork, 2s. 8d. to 4s. 4d. per 8 lb.

HOPS.—BOROUGH MARKET, Feb. 19.

Messrs. Pattenden & Smith report the demand good, especially for foreign, prices for which are the turn dearer, as also for English.

METROPOLITAN CATTLE MARKET.

MONDAY, Feb. 15.

The supply of Beasts is larger than on Monday last, yet it is small, and choice qualities are quickly disposed of at advanced rates; a clearance is readily effected. The number of Sheep is unusually small; the demand is very good, and prices have advanced considerably. Choice Calves are still scarce and dear. Our foreign supply consists of 1810 Beasts and 76 Calves; from Scotland there are 230 Beasts; from Ireland, 70; from Norfolk and Suffolk, 830; and 690 from the Midland and Northern Counties.

s. d. s. d.		s. d. s. d.

		Pigs	3 8-5 4

THURSDAY, Feb. 18

We have a few more Beasts than on Thursday last; there is, however, a demand for them, and prices are about the same as on Monday. There are also a few more Sheep, but they are for the most part disposed of, and prices are scarcely altered. Good Calves are still scarce and dear. Trade is slow in all departments, consequent upon high prices. Our foreign supply consists of 410 Beasts and 94 Calves.

SEED MARKET.

We have to report increased activity in the agricultural seed trade. With an improved demand values of all descriptions are exceedingly firm. New English Red Clover seed comes to hand in very small quantities; although the quality of most of the samples is poor, holders ask long prices; for German Red there is a ready sale at full currencies; Alsike and White Clover seed are without alteration. There is a moderate inquiry for new Trefoil seed. We have a brisk demand for French Italian Rye-grass. Mustard seed is very scarce, and commands a good deal of attention on the part of speculators. English Rape seed sells steadily at late rates. Canary and Hemp seed are now very cheap. Koenigsberg Spring Tares are advancing in price; Brunswicks are in short supply, and realise long values; a few parcels of large Scotch Tares have been sold on our market: they are very scarce this year. Sainfoin seed is in fair request at last week's quotations. Linseed is very firm; fine weather would doubtless cause great activity to prevail in the seed trade, the recent heavy rains having apparently caused many buyers to defer their purchases.

JOHN SHAW & SONS, 16, WATER LANE.

MARK LANE.—MONDAY, Feb. 15.

There was a small supply of Wheat from Essex and Kent to this morning's market, and the few samples in good condition were sold at the prices of this day so'night, but others were neglected, and remained on the stands at a late hour. There was a fair attendance, and the business in foreign Wheat was quite in retail, at the quotations of that day. Malting Barley was unchanged in value, but foreign grinding, Beans, and Peas were each 1s. per qr. cheaper. The Oat trade was slow, and prices must be quoted 8d. per qr. lower. Flour was unchanged in value.

FRIDAY, Feb. 19.

Since the 12th inst. business in Wheat throughout the markets of the kingdom has been most inactive, and although holders and importers would have been willing to submit to some further reduction in value, millers and dealers have held off, and prices close at a further decline of 1s. per qr. Best samples of malting Barley moved off slowly at former rates, but grinding qualities and Maize were 1s. per qr. cheaper. Beans and Peas continue neglected, although offered at less money. Egyptian Beans declined 2s. per qr. Oats were pressed at a reduction of 6d. per qr., excepting samples fit for seed, which were unaltered in value. Flour was a difficult sale, at 6d. to 1s. per sack decline. The supplies off the coast this week consisted of 86 cargoes, of which, with those left over from last week, there remained for sale last night 70 cargoes. The trade in Wheat arrived off the coast has been fair, but prices show a further reduction of 1s. per qr., and we find that latterly the first-class Wheats, such as Marianopoli, Berdianaki, and Odessa Ghirkas, &c., have given way more in proportion than ordinary Banat and Taganrog Ghirkas, showing that low priced quality is most wanted. In the value of Barley, Maize, and Beans we observed no further decline. Rye steady. We did not hear of any business for forward shipment. Paris, Feb. 18.—The trade in Wheat and Flour ruled very inactive, and prices were about maintained. The eight marks are quoted at equal to 36s. 9d. per 280 lb. The stock at the Halle is estimated at 10,530 cwt. The arrivals of English grain and foreign Wheat and Oats are moderate, but of Barley and Maize large. The market this morning was badly attended. The little English Wheat on offer in good condition brought Monday's prices. The

business done in foreign was limited to a few retail sales at about the quotations of that day. Spring Corn was difficult of sale, but unchanged in value.

WANTED, a WORKING HEAD GARDENER.—Steady, sober, active, married Man, no children, Wife to assist the House or Parlour-maid, or Laundry. Unexceptionable character required.—Vicar, Post Office, Dorking.

WANTED, an energetic, steady, trustworthy INDOOR PLANTSMAN, of good address.—Must be well up in the value of, and in the Growth of, Stove and Greenhouse Plants, including Orchids. Wages 30s. per week. Also an OUT-DOOR ASSISTANT under a Foreman, 25s. per week.—Apply to J. SHAW, 29, Oxford Street, Manchester

WANTED, a Single Man, who understands PACKING, and is willing to make himself generally useful in a small Nursery. Good character, &c., indispensable.—Florist, Post Office, Hereford.

WANTED, a Young Man, about 18 years of age, as IMPROVER, in a Nobleman's Garden, where a general system of Gardening is carried on. A Premium will be required.—Apply to D. Judd, The Gardens, Hawkstone, Shrewsbury.

WANTED, an ASSISTANT SHOPMAN, in a London Retail House. A progressive salary offered to a suitable Person. Good references indispensable.—R. M. S., *Gardeners' Chronicle* Office, W.C.

WANTED, in a Gentleman's Family in the Country, where there are three in the Kitchen, a Young Person as KITCHENMAID and DAIRYMAID.—She must thoroughly understand the duties of a Dairy as well as Baking. A preference will be given to any one who understands the Management of Poultry.—Apply by letter to Mrs. CHAPMAN, Canon Hill, Maidenhead.

WANT PLACES.—Letters to be Post Paid.

EXPERIENCED GARDENERS (or as GARDENER and BAILIFF, of various qualifications, recommended to Gentlemen.—Further particulars given on application to Messrs. E. G. HENDERSON & SON, Wellington Nursery, St. John's Wood, London, N.W.

To Gardeners and Bailiffs (Head, Foremen, or Under). JAMES CARTER AND CO. having many applications for the above request that those WANTING SITUATIONS will send NAME, ADDRESS, and COPIES of TESTIMONIALS for ENTRY in their FREE REGISTER. Only those who can send unquestionable references need apply.

Any Lady or Gentleman requiring GARDENERS or BAILIFFS may rely upon J. CARTER & CO. adopting the most stringent regulations in reference to testimonials as to ability, honesty, &c.

JAMES CARTER & CO., 237 and 238, High Holborn, London, W.C.

MR. WM. PAUL begs to announce that he has made arrangements by which he will be enabled in future to furnish Gentlemen with the NAMES, ADDRESSES, &c., of GARDENERS, and GARDENERS and BAILIFFS, of various qualifications, who are open to Engagements. The fullest particulars as to services required and wages given should be forwarded with application.—Paul's Nurseries, Waltham Cross, London, N

GARDENER (HEAD), or SUPERINTENDENT to a Public Park or Garden.—The Advertiser is about leaving a large place where he has served 12 years, and is now at liberty to engage with any Nobleman or Gentleman requiring the services of a first-class practical Gardener. He has had great experience in Planting, and the Management of Woods and Forests; can Measure Timber, Ground, and Brickwork, and is well qualified to fill a position similar to the above. Testimonials of the highest class as to character and ability can be had from present and late employers. References to JAMES RICHARDS, Esq., Assistant Secretary, Royal Horticultural Society, South Kensington, W.; Mr. Geo. EYLES, Superintendent, do.; or Mr. A. F. BARRON, do., Chiswick, W.

GARDENER (HEAD).—Excellent experience, and first-rate testimonials.—W. B., care of James Dickson & Sons, "Newton" Nurseries, Chester.

GARDENER (HEAD).—Age 36, married, no incumbrance; well skilled in all branches of his profession. Good references.—A. B., Post Office, St. Peter's, Thanet, Margate, Kent.

GARDENER (HEAD).—Age 27; thoroughly understands the Management of Stove and Greenhouse Plants, Vines, Melons, and Cucumbers, Kitchen and Flower Gardening, &c.—W. W., Mr. E. Jones, Seedsman, Henley-on-Thames, Oxon.

GARDENER (HEAD), married.—A Gentleman wishes to recommend his Second Gardener. Thoroughly competent. Four years' good character.—W. F., Post Office, Shest, near Petersfield, Hants.

GARDENER (HEAD).—Married; thoroughly understands his business in all its branches. First-class character from last and previous places.—G. Y., Post Office, Rowlands Castle, Hants.

GARDENER (HEAD).—Age 27, single; perfectly understands his business in all branches; also the Management of Stock and Land. Three years' good character.—J. D. M., Messrs. W. H. Smith & Son, Railway Station, Worthing.

GARDENER (HEAD).—Married, no incumbrance; Wife understands Dairy and Poultry, or Plain Cook if required. Have had the care of the house in the absence of the family. Good personal character.—A. B., 12, Streatham Place, Brixton, Surrey, S.

GARDENER (HEAD).—Age 35, married, no incumbrance; understands Stove and Greenhouse Plants, Fruits of all kinds, Vegetables, and general Management of Gardens and Pleasure Grounds. Reliable testimonials and references.—R. B., Temperate House, Royal Gardens, Kew, London, W.

GARDENER (HEAD), to any Gentleman requiring the services of a first-class Gardener.—Married; thoroughly practical, working, energetic; understands Gardening in all its branches, also Land and Stock. Good character.—G. M., Mary Cottage, Freeland's Grove, New Bromley, Kent, S.E.

GARDENER (HEAD).—Age 32, married, no incumbrance; thoroughly understands his profession in all its branches; can Manage Land if required. The estate changing hands cause of leaving. First-class testimonials. Liberal wages expected.—A. Goodwin, Holmbush House, Horsham, Sussex.

GARDENER (HEAD), to any Nobleman or Gentleman in want of a thorough practical Man.—Age 36, no incumbrance; is a good Kitchen and Flower Gardener. A number of Prizes for Fruits and Flowers. Wages moderate. Messrs. K. G. Henderson & Son, Wellington Nursery, Wood, London, N.W.

To Nurserymen, Landscape Gardeners, &c. **GARDENER (HEAD) or FOREMAN.**—A Gentleman has just left the Management of Man.—H., Mr. J. Newton, Hyde Park, W.

GARDENER (HEAD), or GARDENER.—Age 40, married; first class experience in all branches. Highly recommended by the Gentlemen with whom he has served 10 years.—H. B., 11, Lime Cottages, Battersea Park, S.W.

GARDENER (HEAD), or good STOVE and GREENHOUSE GARDENER.—Age 28; thoroughly understands the Management of Stove and Greenhouse Plants, Vines, Cucumbers, &c. Two years' good character.—A. B., 10, Road, Chiswick, W.

GARDENER (HEAD, WORKING).—Age 27; understands Early and Late Forcing, Stove and Greenhouse Plants, and Flower and Kitchen Gardening, &c. E. H., Mr. J. Head, Sen., Petersfield, Hants.

GARDENER (HEAD), where one or two are required.—Age 28, single; has a good knowledge of the management in first-rate places. Good testimonials.—H. Ley, Nurseryman, Croydon, S.

GARDENER (HEAD), where two or three are required.—Age 30, married, no incumbrance, thoroughly experienced in the Management of Glass, &c. First-class character.—D., Mr. J. Ley, Nurseryman, Croydon, S.

GARDENER (HEAD), where one or two are required.—Married, no incumbrance, thoroughly experienced in the Management of Grapes, Cucumbers, Melons, &c. Three years' good character from his last place.—A. B., Vaie, Bramley.

To Nobleman and Gentlemen. **GARDENER (FIRST-CLASS).**—Thoroughly experienced in the Management of Glass, &c. in every department. Class references.—Apply, in the first place, to Mr. J. J. J., Intendant, Royal Horticultural Society's Garden, Chelsea.

GARDENER, in a Nobleman's or Gentleman's Family.—Has a thorough knowledge of his profession in all its branches. Character will bear the strictest investigation.—Post Office, Lower Tulse Hill, Brixton, S.

To Nurserymen. **GARDENER.**—Age 38, married, no incumbrance. Experienced good Workman. Understands the Management of Glass, &c.; would make himself useful in any department.—A. B., Mr. Macdonald's, Southwood, S.W.

GARDENER (SINGLE-HANDED).—Age 27; no incumbrance; good Flower and Kitchen Gardener. Mrs. Corner, 19, Singeaton Street, East Road, C.R.

GARDENER (SINGLE-HANDED).—Age 27; understands Stove and Greenhouse Plants, Vines, Flower and Kitchen Gardening, &c. Good character.—17, Cumberland Cottages, Kew, Surrey, W.

GARDENER (SECOND).—Age 24; six years' experience in all branches. Good character.—W. J., 15, Providence Place, Bush, W.

GARDENER (SECOND).—Age 23, is at present in a comfortable situation in a good Estate. Years' experience; good character.—A., care of Garden, Wood, West Hill, Putney Heath, S.W.

GARDENER (UNDER).—Age 18, used to be in the Management of a Nobleman's Garden. Good character.—J. H., 3, Denmark Road, Camberwell, S.E.

GARDENER (UNDER).—Has been employed in the Management of Nobleman's Gardens.—R. C., Post Office, Blyth, Workop, Notts.

FOREMAN, in a Nobleman's or Gentleman's Family.—Age 24; good character.—A. G., Worksop, Notts.

FOREMAN, in a Nobleman's or Gentleman's Family.—Age 24; has a thorough knowledge of Forcing, Pines, Fruits, &c.—W. H. H., Harbour Street, Worksop, Notts.

FOREMAN and GROWER.—Age 35, married, no incumbrance. Thorough knowledge of the routine of Market-gardening. Eight years' character.—G. G., 4a, Rutland Street, Worksop, Notts.

FOREMAN (UNDER), in the Houses.—Age 27; has been brought up under Gardeners well known in the profession; used to Glass. For references as to trustworthiness, ability, apply (by permission) to CHARLES TR. FALS, Esq., Harmondsworth, near Slough.

FORESTER.—An active Man, of excellent character, and the highest testimonials as to character and ability. Want of a situation as above.—Messrs. James Dickson & Sons, Nurseries, Chester.

JOURNEYMAN, in a Nobleman's or Gentleman's Family.—Age 27; good character.—J. H., Post Office, Enfield, Middlesex, W.

RALPH WALLER AND CO., 45, Dale Street, Manchester, Manufacturers of all kinds of GARDEN NETTING, &c.—The serious injury done every spring to fruit crops by frost has proved to every Gardener the absolute necessity of providing some protection to the trees early in the year. If the blossom, in its earliest development, be but slightly weakened by frost, the vitality of the fruit germ is destroyed, and the fruit lost. In this climate, on the average of a century, there is not more than one year in 19 when the protection is unnecessary. Many fabrics have been tried for this purpose of protection, with more or less success; and we may now say, without fear of contradiction, that we have succeeded in manufacturing the only fabric which is altogether unobjectionable for this purpose. Without unduly narrowing, it effectually protects the young germ, and does not impede the action of light and due circulation of air. Some other fabrics do this, and thus weaken the vitality of the tree altogether. Almost every large grower in the three kingdoms can testify to these facts. The Nettings also make a beautiful shading for Hothouses in summer, and are cheaper than other fabrics on account of their great durability.

Netting (qualities) Nos. 1, 2, 3, in pieces of 30 yards long, 1 1/2 yard wide. Tiffany, in pieces 20 yards long, 39 inches wide.
For prices, &c. apply to the above address—45, Dale Street, Manchester.

Dry and Warm Feet.

ELECTRICITY IS LIFE. SELF-ADJUSTING CURATIVE and ELECTRIC BELT. Sufferers from nervous debility, indigestion, weakness, &c. can now cure themselves by the only "Guaranteed Remedy" in Europe, protected by Her Majesty's Great Seal. Free for One Stamp, by H. JAMES, Esq., Medical Electrician (to the London Hospitals), Percy House, Bedford Square, London, W.C. N.B.—Medicine and Fees superseded. A Test gratis. Send for details. Established 1840.

Galvanism and Medicine Superseded.
NEW METHOD OF CURING DISEASE, without the aid of doctors and their drugs, by studying the laws of health and Nature. Invalids cannot too carefully avoid pills, pretended life drops, and other dangerous medicines, as they contain mineral poisons, which act on the delicate coatings of the stomach, and thus destroy the receptacle of our daily sustenance. The Advertiser was pronounced incurable; but, acting in accordance with the advice he now offers, has, by God's blessing, been restored to health and strength; and with sympathy for like sufferers, the means of cure will be sent, post paid, on receipt of address and two stamps.—Address PHILIP GAZLEY, Esq., 20, York Buildings, Strand, London, W.C.

The Best Remedy for Indigestion.
NORTON'S CAMOMILE PILLS are confidently recommended as a simple but certain remedy for indigestion. They act as a powerful Tonic and general Aperient; are mild to their operation; safe under any circumstances; and thousands of persons can now bear testimony to the benefits to be derived from their use. Sold in bottles at 1s. 1/4d., 2s. 9d., and 11s. each, in every town in the Kingdom. CAUTION.—Be sure to ask for "NORTON'S PILLS," and do not be persuaded to purchase the various imitations.

CORNS and BUNIONS.—A Gentleman, many years tormented with Corns, will be happy to afford others the information by which he obtained their complete removal in a short period, without pain or any inconvenience.—Forward address on a stamped envelope to F. Kingston, Esq., Ware, Herts.

CURES (THIS WEEK) OF SEVERE COLDS and COUGHS by DR LOCOCK'S WAFERS.
From Mr. TRAYLOR, *Jel Works, Strathes, Yorkshire, Feb. 23, 1863*
"I had been suffering for a considerable time with a most severe Cold and Cough, and, as I am a member of a jury, I was under considerable uneasiness. I could find no relief until I then took some Wafers, and, as if by a charm, the Cough ceased, and I am now entirely well." Dr. Locock's Wafers give instant relief to Asthma, Consumption, Coughs, and all disorders of the Breath and Lungs, and have a pleasant taste.—Price 1s. 1/4d., 2s. 9d., and 4s. 6d. per box. Sold by all Druggists.

A Success Unprecedented.
MARAVILLA COCOA is PERFECTION.—The *Globe* says:—"Taylor Brothers' Maravilla Cocoa has achieved a thorough success, and surpasses every other Cocoa in the market. Entire solubility, a delicate aroma, and a rare concentration of the purest elements of nutrition, distinguish the Maravilla Cocoa above all others. For homeopaths and invalids we could not recommend a more agreeable or valuable beverage." Sold in Packets only, by all Grocers.

BREAKFAST.—EPPS'S COCOA. GRATEFUL and COMFORTING. Only in 1/2 lb., 1 lb., and 1 lb. Packets—tin-lined and labelled. Sold by the Trade in all Parts. Prepared by Jas. Epps & Co., Homoeopathic Chemists, London.

The Best and Cheapest Agricultural Newspaper is THE MAGNET, which has now been established for 20 years. Home News.
RETURN OF THE COURT TO WINDSOR—The Queen, accompanied by Princess Louise, Prince Leopold, Princess Beatrice, left Osborne yesterday morning for Windsor Castle. Her Majesty and the Royal Family arrived at Windsor at a quarter to 2 o'clock.

THE COURT AT OSBORNE.—On Friday the Queen's return to Windsor was prevented by the indisposition of Prince Leopold, in consequence of which her Majesty was unable to leave Osborne Saturday Sir William Jenner arrived from London. The Queen, accompanied by Princess Louise, Princess Beatrice, drove through Parkhurst on Sunday the Queen, accompanied by Princess Louise, and Princess Beatrice, attended Divine Service at Whippingham Church. The Rev. G. Prothero officiated. On Monday the Queen walked and drove with Prince Louise; and in the afternoon drove out with Prince

Sir W. Jenner returned to London. On Tuesday the Queen drove out. Lord Dufferin, Chamberlain of the Duchy of Lancaster, arrived on a visit. On Wednesday Viscount Sydney, the Lord Chamberlain, and Lord Odo Fitzgerald, the Controller of the Household, arrived from London and presented Her Majesty the addresses of the two Houses of Parliament in reply to the Queen's speech. Lord Dufferin had an audience of Her Majesty. The Right Hon. Mr. Bruce arrived from London on a visit. On Thursday morning the Queen walked and drove in the grounds with the Princess Louisa. Prince Leopold took a short drive. The Bishop of Lincoln arrived from London and was introduced to her Majesty by the Secretary of State for the Home Department, and did homage on his appointment. Mr. Bruce, the Bishop of Lincoln, and the Hon. and Rev. E. Keppel, Deputy Clerk of the Closet, left for London after the ceremony.

THE PRINCE AND PRINCESS OF WALES.—It is now arranged that the Prince and Princess will prolong their absence from England until the first week in May. As the difficulty between Turkey and Greece has been settled, the Prince and Princess will resume their intention to pay visits to the Sultan and the King of Greece, should diplomatic relations be re-established between the two countries by the time of their leaving Egypt. The Sultan has ordered the palace at Salih Bazar to be prepared for the reception of their Royal Highnesses.

THE DUKE OF EDINBURGH left Simon's Bay in the Galatea frigate on the 6th January for Swan River. **PRINCE LEOPOLD** was attacked with a sudden return of the internal hæmorrhage to which he is subject on Thursday week. Dr. Hoffmeister, of Cowes, remained in attendance on his Royal Highness all Thursday night, and Sir W. Jenner arrived there early on Friday morning, and remained with the Prince until Monday. The attack subsided much more quickly than on any former occasion, and the Prince has progressed so satisfactorily during the week that he was able to accompany the Queen yesterday to Windsor.

ACCOUCHMENT OF PRINCESS CHRISTIAN.—The Princess Christian was confined of a son at 6 o'clock yesterday morning. Her Royal Highness and the infant Prince are doing well.

COURT ARRANGEMENTS.—The Queen's Court, which was announced to take place at Buckingham Palace, on Tuesday, the 2d of March, has been postponed to Wednesday, the 3d of March.

THE CABINET.—A Cabinet Council was held on Saturday, in Downing Street.

PARLIAMENTARY MOVEMENTS.—There is a vacancy in Scarborough, caused by the death of Sir J. V. B. Joannstone. Baron Rothschild was elected for the City of London on Monday, in the room of the late Mr. Charles Bell, without opposition. The election for the London Boroughs took place on Thursday, when the Marquis of Hartington, the Postmaster-General, was elected by a majority of 371 over Mr. Phillips, the numbers being 316 to 175. The Westbury election terminated yesterday in the return of Mr. Phipps, the Conservative candidate, by a majority of 49 over Mr. Laverton, the numbers being 325 to 276. Mr. Devereux (Liberal) was returned for Wexford yesterday without opposition. In the House of Commons, on Wednesday, a select committee was appointed to inquire as to the alleged parliamentary disqualification of Sir S. Waterston to sit and vote as member for Dumfriesshire, with leave to hear counsel on the matter referred to them.

TRIALS OF ELECTION PETITIONS.—Mr. Justice Willes on Saturday gave judgment on the Coventry petition, declaring that Messrs. Eaton and Staveley had, the Conservative sitting members, were duly elected. He made no order as to costs, considering that there were grounds upon which, for the public benefit, the petition should have been presented. Mr. Justice Willes on Wednesday gave judgment in the Bodmin case, declaring that Mr. Gower was duly elected, that there was no evidence to show or reason to believe that corrupt practices prevailed on either side and that all the costs should fall on the petitioners. Mr. Justice Blackburn yesterday decided that the Bridgwater election was void, and condemned the respondents to the payment of costs. He also decided that corrupt practices had extensively prevailed, and refused certificates of indemnity to some of the witnesses. In Ireland, Baron Fitzgerald has declared the election of Mr. O'Beirne for Cashel void, that Mr. O'Beirne was personally and by his agents guilty of bribery, and that Mr. Munster, the petitioner, was guilty of bribery by his agents. On Monday Mr. Justice Keogh gave judgment on the Shgo petition, declaring that Major Knox was not duly elected, that corrupt practices and the grossest intimidation had extensively prevailed, and that Major Knox must pay the costs of the inquiry. The trials of Stafford, Pelyn, Falmouth, and Youghal, are still in progress. The petitions from Hull and Shrewsbury have been withdrawn. Baron Martin will open the Hereford inquiry on March 9.

THE NEW COURT DRESS.—In answer to inquiries the Lord Chamberlain has intimated that no alteration has been made as regards the Highland dress in the recent regulations on Court dress.

CONSECRATION OF THREE BISHOPS.—On Wednesday the consecration of Dr. Wordsworth, to the see of Lincoln; of Dr. Hatchard, to the see of Mauritius; and of Dr. Turner, to the see of Grafton and Armidale, took place in Westminster Abbey under very imposing circumstances. Dr. Wordsworth, the new Bishop of Lincoln, having, as Archdeacon of Westminster been one of the most eminent members of the Lower House of Convocation, both Houses, which are now in session, suspended their sittings to assist at the consecration of their colleague. The result was an extraordinary assemblage of the higher dignitaries and clergy, many of whom wore their Convocation robes or University costume. The Archbishop of Canterbury, who officiated

on the occasion, was assisted by the Bishops of London, Oxford, Llandaff, Ely, Bangor, Rochester, and Lichfield; the Bishop of Luban, the Bishop of St. Andrew's, and Bishop Ryan, and many others present were the Procurator of the Lower House of Convocation, the Deans of Westminster and Canterbury, the Archdeacons and other members of the Lower House, the Warden of All Souls, Oxford, the Vicar-General, and other legal officials. There was a full choral service, and the sermon was preached by Archdeacon Bickersteth.

THE NAVY.—The Queen has conferred the rank of Vice-Admiral of the United Kingdom on Sir George Sartorius, one of the few survivors of the battle of Trafalgar. The Greenwich Hospital pension of 150*l.* a year, vacant by the death of Sir James A. Gordon, has been granted to Vice-Admiral the Hon. Joseph Denman. The Good Service pension of 300*l.* a year, vacant by the appointment of Sir Houston Stewart to the Governorship of Greenwich Hospital, has been granted to Vice-Admiral Sir R. Smart.

REDUCTIONS IN THE ARMY AND NAVY.—It is reported that the saving which Mr. Childers will effect during the financial year of 1869-70 will be from 900,000*l.* to a million sterling, and that the saving in the Army Estimates, which are now nearly completed, will exceed one million sterling. Amongst the staff appointments which will be abolished are those of Director of Ordnance, Commander of the Forces in Ireland, Inspector-General of Cavalry, Artillery, and Engineers; two major-generals in Canada, and several minor offices. The three regimental lieutenant-colonels of the Guards will also be abolished as unnecessary, now that the division has a general officer attached to it. It has also been determined to keep a battalion of Guards as part of the garrison of Dublin.

CONVOCAION.—Both Houses of Convocation of the Province of Canterbury assembled on Tuesday at Westminster for the despatch of business. The Archbishop presided, and the first business was the adoption of an address to the Crown, of which the principal passage was as follows:—

"We look forward with deep anxiety to the proceedings which may be proposed to Parliament respecting the Irish Branch of the United Church of England and Ireland, and we trust that the interests of true religion may not be lost sight of amid the conflicts of political parties; and we pray, whatever course may finally receive the sanction of the Legislature, it may tend to that which all loyal hearts desire—the peace, enlightenment, and good government of Ireland."

The address was then sent down to the Lower House, when Canon Blakesley moved that it be adopted as it stood, remarking that its moderation would recommend it to the House. Canon Selwyn then moved the following as a "rider" to the address:—

"That the Upper House be requested to concur in an address praying Her Majesty not to assent to any measure for repealing, with respect to any portion of the United Kingdom, those parts of the great Charter, and of the 1st of William & Mary, chap. 6, and other statutes, which secure the rights and privileges of the Church, nor to any measure for alienating to secular purposes any portion of the property or revenues which have been dedicated to the maintenance of the worship of Almighty God and the support of His ministers."

Archdeacon Freeman seconded the addition of this clause. The Dean of Ely remarked that such an addition would jeopardize the Crown, since it prayed Her Majesty to put herself into conflict with Parliament. Archdeacon Moore opposed the rider on the same ground. Archdeacon Denison and Dr. Jebb supported it, and the latter, in very strong terms, denounced the Irish Church Bill to be brought forward by Mr. Gladstone as an "abominable measure." The Dean of Westminster reminded the House that they were not in a position to discuss matters, as no measure on the Irish Church had yet come before Parliament. A discussion ensued, which lasted several hours, and in which Archdeacon Grant, Lord A. Harvey, Chancellor Massingberd, Canon Thomas, Mr. Hughes, and Archdeacon Mackenzie, took part. A show of hands was then taken, when Canon Selwyn's "rider" was carried by a large majority. Archdeacon Denison then moved another "rider" as follows:—

"Above all, we are constrained by our sense of duty to your Majesty and to the Reformed Church of England and Ireland, humbly to represent to your Majesty that the disestablishment of the Church in Ireland cannot be had without repudiation on the part of this nation of the necessity and value of the Reformation."

Dr. Jebb seconded this addition, which was carried. On Wednesday the Upper House did not meet. In the Lower House the Rev. J. W. Joyce moved a series of resolutions on church discipline, with a request that the Upper House would appoint a committee on the subject. Canon Selwyn moved the omission of all the resolutions, so as to ask simply for a committee. Archdeacon Hale seconded this motion, which was carried by 36 to 22. On Thursday, in the Upper House, the amended address having been brought up from the Lower House, The Bishop of Oxford opposed the "riders" of Canon Selwyn and Archdeacon Denison, as unconstitutional, and moved their omission, substituting for them the following clause:—

"We look forward with deep anxiety to the measures which may be proposed to Parliament respecting the Church now by law established in Ireland, and we trust that the interests of true religion and the just claims of that ancient and reformed communion may not be lost sight of amidst the conflicts of political parties."

The Bishop of Peterborough seconded this motion, which was carried. The other amendments of the Lower House, respecting an increase of the episcopate and a better representation of the clergy, were rejected. In the Lower House, Archdeacon Denison presented a petition from 99 "priests of the Church of England," containing passages from Thorndike's "Laws of the Church," written A.D. 1659, in favour of the "real presence," and asking that they in affirming this dictum might be protected from the imputation of unfaithfulness to the Church of England, inasmuch as

they were constrained to affirm, that to repudiate this doctrine was, *ipso facto*, to cut off the Church of England from the Church primitive and catholic. The petition, which was of great length, and the reading of which was heard with great impatience and interruptions, was referred to the committee of privy-counsellors. The Convocation of the Province of York also assembled on Friday under the presidency of the Archbishop, and evinced more than ordinary attention to the chief subjects of discussion including the Irish Church question and the suggested union of the Wesleyans and the Establishment.

Foreign.

FRANCE.—The French Government has sent a circular note to its diplomatic agents abroad, briefly detailing the results of the Conference. M. Troplong, the President of the Senate, is seriously ill. In the sitting of the Legislative Body on Tuesday, the discussion on the contract between the City of Paris and the Credit Foncier of France was resumed. M. Taiers spoke at great length against the municipal administration. The Government journals have received very coldly the explanations given in the Belgian Senate by M. Frere-Orban relating to the Railway Bill, but have considerably moderated their tone against Belgium. The *France* declares that deeds, not words, are necessary to efface the mistrust to which the passing of this Bill has given rise. The *Patron* states that the position of affairs remains *in statu quo*, and that the rights of the Eastern Railway of France are still intact. The *Public* is of opinion that the declaration made by M. Frere-Orban is equivalent to a retreat. The *Constitutionnel*, however, expresses confidence in the wisdom of the King and people of Belgium, and hopes that the question raised by the vote on the Railway Bill will not enter a phase likely to justify the alarms which have been circulated. The seals have just been taken off the property of the Princess Baccouchin, in presence of Marshal Vaillant and M. Chassagné Goyon, representing the Emperor and the Council of State respectively. The family papers, which have been taken to the Emperor, are said to include 45 different volumes, containing notes made by Napoleon I. at St. Helena. The Princess, besides her property in Brittany, possessed an estate at Trieste, which produces a revenue of 100,000 francs a year, the whole of which is left to the Prince Imperial. A collision took place in the Gulf of Genoa, on the night of the 17th, between the Imperial despatch-boat Latouche-Treville, on her way from Toulon to Nice to receive the body of Fuad Pasha, and the Prince Pierre, of the Valery Company. The latter was cut in two, and sunk in five minutes, and 13 of her passengers were drowned. The despatch-boat succeeded in saving about 30 persons, among whom was M. Gavini, deputy, and brother of the Prefect of Nice. The disaster is attributed to a mistake as to the "rule of the road" at sea. The two vessels had sighted each other, the lights were all in their proper position, the weather was fair, with a slight breeze, and the sea calm; but in their anxiety to avoid each other both went to the starboard side, and so ran into each other at full speed. Sedan chairs have reappeared in the old Faubourg St. Germain. The Princess de Metternich, Madame de Rochefoucault-Bisaccia, the Princess de la Tremouille, and the Marquise de Faneenes, use them for going to church and for short morning visits. A special toilette has been invented for them, consisting of a black mantilla trimmed with guipure, and the costume is called *sortie d'église*. An English groom called Carmann, who said that he was the jockey of an English nobleman, who had sent him to Paris with some race-horses, was found a few nights ago in the Champs Elysées with a knife sticking in his chest, and with seven wounds in his back. He has since died in hospital, and no clue to the murder has been discovered, the man himself having to the last moment refused to furnish any information as to the affair.

SPAIN.—In the sitting of the Constitutional Cortes on Saturday Senor Rivero was definitively elected President by 167 votes against 47 given to Senor Orense. The Vice-Presidents and secretaries were also re-elected. In the sitting of Monday Senor Rivero thanked the Deputies for the honour they had conferred upon him in electing him President of the Chambers. He said that he would use all his energy towards fulfilling the duties of his office, and invited the House to hasten the work of reconstruction. The Cortes decided unanimously to be bound by the rules laid down in 1854 until a committee had drawn up special regulations. Marshal Serrano then addressed the House, announcing that the Provisional Government had resigned office, and urging the Cortes to avoid all delay in proceeding to their task. General Prim, replying to reports circulated by Paris newspapers, declared that the late dynasty should never reascend the Throne of Spain, and that he would never, directly or indirectly, aid in endeavours in favour of the Prince of Asturias. He concluded by reiterating that he had joined Marshal Serrano to destroy the former régime, and would remain united with him in the work of reconstruction. Admiral Topete, in a speech which was loudly cheered, asked for a Bill of indemnity for the navy, which had violated the military laws in order to save the country and bestow liberty upon their fellow-countrymen. It was then moved by one of the secretaries of the House that the Cortes should pass a vote of thanks to the Provisional Government, and intrust Marshal Serrano with the executive power and the formation of a new Cabinet. The motion was supported by Deputy Valera, and taken into consideration by a majority of 181 to 57. The Republican minority moved an amendment to the effect that there was no occasion to consider the motion. Signor Castelar and Senor Orense spoke in favour of this amendment, which was rejected. The debate was then adjourned to Tuesday, when

 Address, BENJAMIN EDGINGTON, (only), 2, Duke Street, London Bridge, S.E. No other Establishment.

RALPH WALLER and CO, 45, Dale Street, Manchester. Manufacturers of all kinds of GARDEN NETTING, &c.—The serious injury done every spring to fruit crops by frost has proved to every Gardener the absolute necessity of providing some protection to the trees early in the year. If the blossom, in its earliest development, be but slightly weakened by frost, the vitality of the fruit germ is destroyed, and the fruit lost. In this climate, on the average of a century, there is not more than one year in 19 when the protection is unnecessary. Many fabrics have been tried for this purpose of protection, with more or less success; and we may now say, without fear of contradiction, that we have succeeded in manufacturing the only fabric which is altogether unobjectionable for this purpose. Without unduly nursing, it effectually protects the young germ, and does not impede the action of light and due circulation of air. Some other fabrics do this, and thus weaken the vitality of the tree altogether. Almost every large grower in the three kingdoms can testify to these facts.
 The Nettings also make a beautiful shading for Hothouses in summer, and are cheaper than other fabrics on account of their great durability.
 Netting (qualities): Nos. 1, 2, 3, in pieces of 30 yards long, 1 1/2 yard wide. Tiffany in pieces 20 yards long, 39 inches wide.
 For prices, &c., apply to the above address—45, Dale Street, Manchester.

Galvanism and Medicine Superseded.
NEW METHOD of CURING DISEASE, without the aid of doctors and their drugs, by studying the laws of health and Nature. Invalids cannot too carefully avoid pills, pretended Lido, &c., and other dangerous medicines, as they contain mineral poisons, which act on the delicate coatings of the stomach, and thus destroy the receptacle of our daily sustenance. The Advertiser was pronounced incurable; but, acting in accordance with the advice he now offers, has, by God's blessing, been restored to health and strength; and with sympathy for like sufferers, the means of cure will be sent, post paid, on receipt of address and two stamps.—Address
 PHILIP GASPEY, Esq., 20, York Buildings, Strand, London, W.C.

The Best Remedy for Indigestion.
NORTON'S CAMOMILE PILLS are confidently recommended as a simple but certain remedy for indigestion. They act as a powerful Tonic and general Aperient; are mild to their operation; safe under any circumstances; and thousands of persons can now bear testimony to the benefits to be derived from their use. Sold in bottles at 1s. 1 1/2d., 2s. 9d., and 11s. each, in every town in the Kingdom. CAUTION.—Be sure to ask for "NORTON'S PILLS," and do not be persuaded to purchase the various imitations.

CORNS and BUNIONS.—A Gentleman, many years tormented with Corns, will be happy to afford others the information by which he obtained their complete removal in a short period, without pain or any inconvenience.—Forward address on a stamped envelope to F. KISSER, Esq., Ware, Herts.

CURES (THIS WEEK) of SEVERE COLDS and COUGHS by DR. LOCOCK'S WAFERS.
 From Mr. TRAILL, *Jet Works, Strathclyde, Yorkshire, Feb. 22, 1866*
 "I had been suffering for a considerable time with a most severe Cold and Cough, and, being summoned on a jury, I was under considerable anxieties how I could possibly attend. I then took some Wafers, and, as if by a charm, the Cough ceased, and I am now entirely well." Dr. Locock's Wafers give instant relief to Asthma, Consumption, Coughs, and all disorders of the Breath and Lungs, and have a pleasant taste.—Price 1s. 1 1/2d., 2s. 9d., and 4s. 6d. per box. Sold by all Druggists.

A Success Unprecedented.
MARAVILLA COCOA is PERFECTION.—The *Globe* says:—"Taylor Brothers' Maravilla Cocoa has achieved a thorough success, and surpasses every other Cocoa in the market. Entire solubility, a delicate aroma, and a rare concentration of the purest elements of nutrition, distinguish the Maravilla Cocoa above all others. For non-vegetarians and invalids we could not recommend a more agreeable or valuable beverage."
 Sold in Packets only, by all Grocers.

BREAKFAST.—EPPS'S COCOA.
GRATEFUL and COMFORTING.
 Only in 1 lb., 1/2 lb., and 1 lb. Packets—tin-lined and labelled.
 Sold by the Trade in all Parts.
 Prepared by JAS. EPPS & Co., Homoeopathic Chemists, London.

The Best and Cheapest Agricultural Newspaper is THE MAGNET, which has now been established for 30 years. It is a real Price Current, is conducted by powerful and talented Editors, and replete with the fullest information connected with the Agricultural interests. It is, moreover, the steadfast and consistent friend of the British Farmer. Published every Monday Evening after the termination of the Mark Lane Market. Price 4 1/2d., stamped.
 Offices, 19, Exeter Street, Strand, W.C.

Advertising in Ireland.
THE GARDENERS' RECORD, the only Horticultural Paper published in Ireland—a first-class Paper. Specimen Copy and Tariff for four stamps.
 THOMAS EDMONDSON, Stationer and Printer, 9, Dame Street, Dublin.

A HISTORY of VARIEGATED ZONAL or TRICOLOR PELARGONIUMS, with Practical Hints for their Production, Propagation, and Cultivation. By P. GROVE, Colford, Bury St. Edmund's. Post free from the Author on receipt of 3s. 6d. in postage stamps.
 "An excellent and thoroughly practical treatise on the production and culture of these popular plants."—*The Florist and Pomologist.*

Outdoor Cultivation of the Rose.
 This day is published, price 4d., sewed.

 F. ALLAN CURTIS, Actuary and Secretary.

Will Close on Saturday, March 20.
THE SOCIETY of PAINTERS in WATER COLOURS.—The WINTER EXHIBITION of SKETCHES and STUDIES is NOW OPEN, 6, Pall Mall East, from 10 to 12 o'clock.
 Admission 1s. WILLIAM CALLOW, Secretary.

Home News.
RETURN OF THE COURT TO WINDSOR.—The Queen, accompanied by Princess Louise, Prince Leopold, Princess Beatrice, left Osborne yesterday morning for Windsor Castle. Her Majesty and the Royal Family arrived at a quarter to 2 o'clock.
THE COURT AT OSBORNE.—On Friday the Queen's return to Windsor was prevented by the indisposition of Prince Leopold, in consequence of which her Majesty was unable to leave Osborne on Saturday. Sir William Jenner arrived from London on Saturday, accompanied by Princess Louise, Princess Beatrice, and the Duke of Devonshire. The Hon. Eva Macdonald arrived on Sunday, and Princess Beatrice, attended Divine Service at Whippingham Church. The Rev. G. Protheroe officiated. On Monday the Queen walked and drove with Prince Leopold, and in the afternoon drove out with Princess Louise.

Mr. W. Jenner returned to London. On Tuesday the Queen drove out. Lord Dufferin, Chamberlain of the Duchy of Lancaster, arrived on a...

THE PRINCE AND PRINCESS OF WALES.—It is arranged that the Prince and Princess will prolong their absence from England until the first week in May. As the difficulty between Turkey and Greece has been settled, the Prince and Princess will resume their intention to pay visits to the Sultan and the King of Greece, should diplomatic relations be re-established between the two countries by the time of their leaving Egypt.

THE DUKE OF EDINBURGH left Simon's Bay in the Galatea frigate on the 6th January for Swan River. PRINCE LEOPOLD was attacked with a sudden return of the internal hæmorrhage to which he is subject on Thursday week. Dr. Hoffmeister, of Cowes, remained in attendance on his Royal Highness all Thursday night, and Sir W. Jenner arrived there early on Friday morning, and remained with the Prince until Monday. The attack subsided much more quickly than on any former occasion, and the Prince has progressed so satisfactorily during the week that he was able to accompany the Queen yesterday to Windsor.

ACCOUCHMENT OF PRINCESS CHRISTIAN.—The Princess Christian was confined of a son at 8 o'clock yesterday morning. Her Royal Highness and the infant Prince are doing well.

COURT ARRANGEMENTS.—The Queen's Court, which was announced to take place at Buckingham Palace, on Tuesday, the 2d of March, has been postponed to Wednesday, the 3d of March.

THE CABINET.—A Cabinet Council was held on Saturday, in Dowling Street.

PARLIAMENTARY MOVEMENTS.—There is a vacancy for Scarborough, caused by the death of Sir J. V. B. Johnstone. Baron Rothschild was elected for the City of London on Monday, in the room of the late Mr. Charles Bell, without opposition. The election for the Boinor Boroughs took place on Thursday, when the Marquis of Hartington, the Postmaster-General, was elected by a majority of 371 over Mr. Phillips, the numbers being 516 to 175. The Westbury election terminated yesterday in the return of Mr. Phipps, the Conservative candidate, by a majority of 49 over Mr. Laverton, the numbers being 325 to 276. Mr. Devereux (Liberal) was returned for Wexford yesterday without opposition. In the House of Commons, on Wednesday, a select committee was appointed to inquire as to the alleged parliamentary disqualification of Sir S. Waterhouse to sit and vote as member for Dumfriesshire, with a view to hear counsel on the matter referred to them.

TRIALS OF ELECTION PETITIONS.—Mr. Justice Wiles on Saturday gave judgment on the Coventry petition, declaring that Messrs. Eaton and Staveley Hill, the Conservative sitting members, were duly elected. He made no order as to costs, considering that there were grounds upon which, for the public benefit, the petition should have been presented. Mr. Justice Wiles on Wednesday gave judgment in the Bodmin case, declaring that Mr. Gower was duly elected, that there was no evidence to show or reason to believe that corrupt practices prevailed on either side, and that all the costs should fall on the petitioners. Mr. Justice Blackburn yesterday decided that the Bridgwater election was void, and condemned the respondents to the payment of costs. He also decided that corrupt practices had extensively prevailed, and refused certificates of indemnity to some of the witnesses. In Ireland, Baron Fitzgerald has declared the election of Mr. O'Beirne for Cashel void, that Mr. O'Beirne was personally and by his agents guilty of bribery, and that Mr. Munster, the petitioner, was also guilty of bribery by his agents. On Monday Mr. Justice Keogh gave judgment on the Sligo petition, declaring that Major Knox was not duly elected, that corrupt practices and the grossest intimidation had extensively prevailed, and that Major Knox must pay the costs of the inquiry. The trials of Lord Pelyn, Falmouth, and Youghal, are still in progress. The petitions from Hull and Shrewsbury have been withdrawn. Baron Martin will open the Hereford inquiry on March 9.

THE NEW COURT DRESS.—In answer to inquiries the Lord Chamberlain has intimated that no alteration has been made as regards the Highland dress in the recent regulations on Court dress.

CONSECRATION OF THREE BISHOPS.—On Wednesday the consecration of Dr. Wordsworth, to the see of Lincoln; of Dr. Hatchard, to the see of Mauritius; and of Dr. Turner, to the see of Grafton and Armidale, took place in Westminster Abbey under very imposing circumstances. Dr. Wordsworth, the new Bishop of Lincoln, having, as Archdeacon of Westminster, been one of the most eminent members of the Lower House of Convocation, both Houses, which are now in session, deferred their sittings to assist at the consecration of their colleague. The result was an extraordinary assembly of the higher dignitaries and clergy, many of whom wore their Convocation robes or University costumes. The Archbishop of Canterbury, who officiated

on the occasion, was assisted by the Bishops of London, Oxford, Llandaff, Ely, Bangor, Rochester, and Lichfield; the Bishop of Luban, the Bishop of St. Andrew's, and Bishop Ryan, and among those present were the Procurator of the Lower House of Convocation, the Deans of Westminster and Canterbury, the Archdeacons and other members of the Lower House, the Warden of All Souls, Oxford, the Vicar-General, and other legal officials. There was a full choral service, and the sermon was preached by Archdeacon Bickersteth.

THE NAVY.—The Queen has conferred the rank of Vice-Admiral of the United Kingdom on Sir George Sartorius, one of the few survivors of the battle of Trafalgar. The Greenwich Hospital pension of 150*l.* a year, vacant by the death of Sir James A. Gordon, has been granted to Vice-Admiral the Hon. Joseph Denman. The Good Service pension of 300*l.* a year, vacant by the appointment of Sir Houston Stewart to the Governorship of Greenwich Hospital, has been granted to Vice-Admiral Sir R. Smart.

REDUCTIONS IN THE ARMY AND NAVY.—It is reported that the saving which Mr. Childers will effect during the financial year of 1869-70 will be from 900,000*l.* to a million sterling, and that the saving in the Army Estimates, which are now nearly completed, will exceed one million sterling. Amongst the staff appointments which will be abolished are those of Director of Ordnance, Commander of the Forces in Ireland, Inspector-General of Cavalry, Artillery, and Engineers; two major-generals in Canada, and several minor offices. The three regimental lieutenant-colonels of the Guards will also be abolished as unnecessary, now that the division has a general officer attached to it. It has also been determined to keep a battalion of Guards as part of the garrison of Dublin.

CONVOCATION.—Both Houses of Convocation of the Province of Canterbury assembled on Tuesday at Westminster for the despatch of business. The Archbishop presided, and the first business was the adoption of an address to the Crown, of which the principal passage was as follows:—

"We look forward with deep anxiety to the proceedings which may be proposed to Parliament respecting the Irish Branch of the United Church of England and Ireland, and we trust that the interests of true religion may not be lost sight of amidst the conflicts of political parties; and we pray, whatever course may finally receive the sanction of the Legislature, it may tend to that which all loyal hearts desire—the peace, enlightenment, and good government of Ireland."

The address was then sent down to the Lower House, when Canon Blakesley moved that it be adopted as it stood, remarking that its moderation would recommend it to the House. Canon Selwyn then moved the following as a "rider" to the address:—

"That the Upper House be requested to concur in an address praying her Majesty not to assent to any measure for repealing, with respect to any portion of the United Kingdom, those parts of the great Charter, and of the 1st of William & Mary, chap. 6, and other statutes, which secure the rights and privileges of the Church, nor to any measure for alienating to secular purposes any portion of the property or revenues which have been dedicated to the maintenance of the worship of Almighty God and the support of His ministers."

Archdeacon Freeman seconded the addition of this clause. The Dean of Ely remarked that such an addition would jeopardize the Crown, since it prayed her Majesty to put herself into conflict with Parliament. Archdeacon Moore opposed the rider on the same ground. Archdeacon Denison and Dr. Jebb supported it, and the latter, in very strong terms, denounced the Irish Church Bill to be brought forward by Mr. Gladstone as an "abominable measure." The Dean of Westminster reminded the House that they were not in a position to discuss matters, as no measure on the Irish Church had yet come before Parliament. A discussion ensued, which lasted several hours, and in which Archdeacon Grant, Lord A. Harvey, Chancellor Massingberd, Canon Thomas, Mr. Hughes, and Archdeacon Mackenzie, took part. A show of hands was then taken, when Canon Selwyn's "rider" was carried by a large majority. Archdeacon Denison then moved another "rider" as follows:—

"Above all, we are constrained by our sense of duty to your Majesty and to the Reformed Church of England and Ireland, humbly to represent to your Majesty that the disestablishment of the Church in Ireland cannot be had without repudiation on the part of this nation of the necessity and value of the Reformation."

Dr. Jebb seconded this addition, which was carried. On Wednesday the Upper House did not meet. In the Lower House the Rev. J. W. Joyce moved a series of resolutions on church discipline, with a request that the Upper House would appoint a committee on the subject. Canon Selwyn moved the omission of all the resolutions, so as to ask simply for a committee. Archdeacon Hale seconded this motion, which was carried by 36 to 22. On Thursday, in the Upper House, the amended address having been brought up from the Lower House, The Bishop of Oxford opposed the "riders" of Canon Selwyn and Archdeacon Denison, as unconstitutional, and moved their omission, substituting for them the following clause:—

"We look forward with deep anxiety to the measures which may be proposed to Parliament respecting the Church now by law established in Ireland, and we trust that the interests of true religion and the just claims of that ancient and reformed communion may not be lost sight of amidst the conflicts of political parties."

The Bishop of Peterborough seconded this motion, which was carried. The other amendments of the Lower House, respecting an increase of the episcopate and a better representation of the clergy, were rejected. In the Lower House, Archdeacon Denison presented a petition from 99 "priests of the Church of England," containing passages from Thorndike's "Laws of the Church," written A.D. 1659, in favour of the "real presence," and asking that they in affirming this dictum might be protected from the imputation of unfaithfulness to the Church of England, inasmuch as

they were constrained to affirm, that to repudiate this doctrine was, *ipso facto*, to cut off the Church of England from the Church primitive and catholic. The petition, which was of great length, and the reading of which was heard with great impatience and interruptions, was referred to the committee of privileges. —The Convocation of the Province of York also assembled on Tuesday under the presidency of the Archbishop, and excited more than ordinary attention, the chief subjects of discussion including the Irish Church question and the suggested union of the Wesleyans and the Establishment.

Foreign.

FRANCE.—The French Government has sent a circular note to its diplomatic agents abroad, briefly detailing the results of the Conference. M. Troplong, the President of the Senate, is seriously ill. In the sitting of the Legislative Body on Tuesday, the discussion on the contract between the City of Paris and the Credit Foncier of France was resumed. M. Thiers spoke at great length against the municipal administration. The Government journals have received very coldly the explanations given in the Belgian Senate by M. Frere-Orban relating to the Railway Bill, but have considerably moderated their tone against Belgium. The *France* declares that deeds, not words, are necessary to efface the mistrust to which the passing of this Bill has given rise. The *Patris* states that the position of affairs remains *in statu quo*, and that the rights of the Eastern Railway of France are still intact. The *Public* is of opinion that the declaration made by M. Frere-Orban is equivalent to a retreat. The *Constitutionnel*, however, expresses confidence in the wisdom of the King and people of Belgium, and hopes that the question raised by the vote on the Railway Bill will not enter a phase likely to justify the alarms which have been circulated. The seals have just been taken off the property of the Princess Baccicchi, in presence of Marshal Vaillant and M. Chassaigne Goyon, representing the Emperor and the Council of State respectively. The family papers, which have been taken to the Emperor, are said to include 45 different volumes, containing notes made by Napoleon I. at St. Helena. The Princess, besides her property in Brittany, possessed an estate at Trieste, which produces a revenue of 100,000 francs a year, the whole of which is left to the Prince Imperial. A collision took place in the Gulf of Genoa, in the night of the 17th, between the Imperial despatch-boat *Latouche-Treville*, on her way from Toulon to Nice to receive the body of Fuad Pasha, and the Prince Pierre, of the Valery Company. The latter was out in two, and sunk in five minutes, and 13 of her passengers were drowned. The despatch-boat succeeded in saving about 30 persons, among whom was M. Gavini, deputy, and brother of the Prefect of Nice. The disaster is attributed to a mistake as to the "rule of the road" at sea. The two vessels had sighted each other, the lights were all in their proper position, the weather was fair, with a slight breeze, and the sea calm; but in their anxiety to avoid each other both went to the starboard side, and so ran into each other at full speed. Sedan chairs have reappeared in the old Faubourg St. Germain. The Princess de Metternich, Madame de Rochefoucault-Bisaccia, the Princess de la Tremouille, and the Marquise de Fanecones, use them for going to church and for short morning visits. A special toilette has been invented for them, consisting of a black mantilla trimmed with guipure, and the costume is called *sortie d'église*. An English groom called Carmann, who said that he was the jockey of an English nobleman, who had sent him to Paris with some race-horses, was found a few nights ago in the Champs Elysées with a knife sticking in his chest, and with seven wounds in his back. He has since died in hospital, and no clue to the murder has been discovered, the man himself having to the last moment refused to furnish any information as to the affair.

SPAIN.—In the sitting of the Constitutional Cortes on Saturday Senor Rivero was definitively elected President by 167 votes against 47 given to Senor Orense. The Vice-Presidents and secretaries were also re-elected. In the sitting of Monday Senor Rivero thanked the Deputies for the honour they had conferred upon him in electing him President of the Chambers. He said that he would use all his energy towards fulfilling the duties of his office, and invited the House to hasten the work of reconstruction. The Cortes decided unanimously to be bound by the rules laid down in 1854 until a committee had drawn up special regulations. Marshal Serrano then addressed the House, announcing that the Provisional Government had resigned office, and urging the Cortes to avoid all delay in proceeding to their task. General Prim, replying to reports circulated by Paris newspapers, declared that the late dynasty should never reascend the Throne of Spain, and that he would never, directly or indirectly, aid in endeavours in favour of the Prince of Asturias. He concluded by reiterating that he had joined Marshal Serrano to destroy the former régime, and would remain united with him in the work of reconstruction. Admiral Topete, in a speech which was loudly cheered, asked for a Bill of indemnity for the navy, which had violated the military laws in order to save the country and bestow liberty upon their fellow-countrymen. It was then moved by one of the secretaries of the House that the Cortes should pass a vote of thanks to the Provisional Government, and intrust Marshal Serrano with the executive power and the formation of a new Cabinet. The motion was supported by Deputy Valera, and taken into consideration by a majority of 181 to 57. The Republican minority moved an amendment to the effect that there was no occasion to consider the motion. Signor Castelar and Senor Orense spoke in favour of this amendment, which was rejected. The debate was then adjourned to Tuesday, when

Senor Figueras, a member of the minority, spoke against the motion. On Wednesday the debate was resumed, and the Cortes held an evening sitting to conclude the discussion. The Minister of Justice delivered a speech explaining the motives of the Government in reserving to the Cortes the right of proclaiming liberty of worship. He justified the suppression of the Jesuit conferences at the Monastery of St. Vincent, whereby conspiracy had been fomented, and he stated that among the accomplices in the murder of the civic Governor of Burgos were three friars belonging to that monastery. The Minister of Public Worship addressed the House, and was several times interrupted by cheers. He declared that the proceedings of the clerical party justified the measures which had been taken to preserve the objects of art in the churches. The motion was then adopted by a majority of 180 to 62. When the result was announced, Marshal Serrano addressed the House amid frequent cheering, appealing to the minority to observe a conciliatory attitude in view of the inexorable principles of the majority, and promising on his own part loyalty, patriotism, and abnegation. The sitting only terminated at half-past 2 o'clock on Thursday morning. In the sitting of the Cortes on Thursday, Marshal Serrano announced his assumption of the executive power, and said:—

"He had accepted it solely from motives of patriotism, and with an entire feeling of abnegation. He insisted upon the fact that it was impossible for him to abuse the power conferred upon him, as none of the prerogatives of supreme power, such as the right of veto, the right of making peace or war, had been granted him. Were the Assembly to offer him these prerogatives he should refuse them. He desired to walk hand in hand with the Cortes, the minority acting as the legitimate censor of the Ministry, and the majority as its sovereign judge. He should remain at his post as long as might be necessary, with no care but for the welfare of the nation, with no ambition but that of withdrawing into private life after having accomplished his duty to his country."

Senor Sorni then spoke, stating that the minority had head with satisfaction the speech just delivered by Marshal Serrano. The latter subsequently communicated to the house a telegram from Cuba, in which General Dulce announces that he has 8,000,000 dobs. towards the expenses of the war, and that that sum will be sufficient to put down the insurrection, which is now on the decrease. On Thursday evening Marshal Serrano had a long conference with General Prim, Admiral Topete, and the committee of leaders of the majority of the Cortes. It is probable that the contemplated modifications of the Cabinet will introduce politicians of more radical opinions than the public have been led to suppose.

PORTUGAL.—The Portuguese Press strongly condemn the recently revived idea of an Iberian union. The Government is treating with the South-Eastern Railway Company for the purchase of their lines, for which the company demand 4,000,000*l.* The Government will buy the railway at a fixed price. A regatta of the crews of the British iron-clad squadron now lying in the Tagus has been held at Lisbon.

BELGIUM.—In the sitting of the Senate on Saturday the Railway Bill came on for discussion. M. Frere-Orban, Minister President, made a speech, of which the following is a summary:—

"Great excitement has been produced by this Bill in a neighbouring country, and I admit that the rapid passing of the measure through the Chamber of Deputies was calculated to arouse attention abroad. It must not surprise us that the Paris Press, ill-informed, should see in that vote an act of hostility on our part, but the Government rejects with indignation the calumnies circulated by a portion of those journals. I do not know Count Bismarck personally, but I believe that he would not act so disgracefully as to seek a hiding-place behind us. If such a thought should ever enter his mind, we should make him the reply which it would best fit us to give, and which would be required by the part assigned to Belgium by international treaties. France has the greatest right to our gratitude, and though the proclamation of the Republic and of the Second Empire gave rise here to some uneasiness, ever since the first moment was over the attitude of France towards us has always been of a friendly character. It is not her strength only, but the principle of right and justice that dictates the conduct of that country. I categorically contradict the statement contained in the letter of Mr. Reed which was published in the newspapers, and declare that as the Government had learnt, through the journals, on the 30th of December, the definitive conclusion of the agreement between the Luxembourg Railway Company and the Eastern Railway Company of France, it was urgent that the Bill should without delay be submitted to the Chamber."

This speech was received with general marks of approval, and the Bill was afterwards adopted by 36 votes. Seven Senators abstained from voting. The official *Moniteur Belge* of Wednesday publishes the full text of the new Bill, with the signature of the King affixed, and the Bill came into operation on Thursday. In the sitting of the Senate on Wednesday the Budget of the Minister of Justice was rejected, without debate, 25 members voting for and 25 against the Government. In the sitting of Thursday, the Chamber of Representatives overruled the vote of the Senate, and passed the Budget of the Ministry of Justice by 62 votes against 42. The President of the Ministry had previously stated the Senate had done an entirely useless act, which must be annulled, as that body had usurped the privileges of the House of Representatives.

HOLLAND.—In consequence of the cattle disease having again broken out in Germany, the Dutch Government has despatched to Zevenaar a staff of officials to exercise an active supervision over the German frontier.

SWITZERLAND.—The inhabitants of the Canton of Soleure on Sunday voted against the total revision of the Constitution. The continuance of the present system of government is therefore assured.

FRANKFORT.—An agreement has been arrived at between the Prussian Government and the Frankfort municipality on the question of the compensation due to that city since its incorporation with the kingdom of Prussia. The Prussian Government has agreed to

pay the amount demanded by the municipality—namely, 3,000,000 florins.

PRUSSIA.—A decree, signed by the King of Prussia, was issued on Wednesday, convoking the North German Parliament for the 4th March. In the sitting of the Upper House of the Prussian Diet on Thursday, the Bill modifying the oath to be taken by Jews was adopted as passed by the Lower House. The Diet will probably be closed on the 6th March. The steamer *Bienenkorb* left Bremerhaven on Sunday morning, on her expedition to the North Pole.

AUSTRIA.—In the sitting of the Lower House of the Reichsrath on Tuesday, the Germano-Austrian Telegraph Convention was adopted. The Austrian frigate *Radetzki* has been blown up between the islands of Lissa and Lesina, in the Adriatic. The loss of life was 312, including the captain and all the officers except one midshipman. Only 23 persons were saved, five of whom are seriously injured.

HUNGARY.—The Emperor and Empress arrived at the Castle of Buda on Wednesday night, on their way to Agram. The elections to the Hungarian Diet will take place at Buda on the 21st of March. In Pesth the date has been altered from the 18th to the 23d of March, on account of the annual fair. The Jewish Congress was closed on Tuesday.

RUSSIA.—The Emperor of Russia has telegraphed to the King of Greece congratulating him upon his adhesion to the declaration of the Conference. The Russian Cabinet will shortly make public a collection of diplomatic documents relating to the Eastern question, and more especially to the recent Conference. A rumour is current that the Government is negotiating with foreign bankers for the issue of the remaining obligations of the Nicolai Railway.

GREECE.—The King left Athens on Monday with his uncle, Prince Frederick, for the Morea, and will be absent about three weeks. The French Minister at Athens has announced that the Canadian refugees who wish to return to Crete can obtain from the French Consuls the money to pay their passage.

ITALY.—In the sitting of the Chamber of Deputies on Monday the debate on the budget of the Ministry of War was resumed. The Chamber adopted by a majority of 130 to 92 a Bill re-establishing the three superior territorial military commands. In the sitting of Tuesday a Bill authorising the provisional exercise of the Budget during the months of March and April was adopted. On Thursday the Chamber rejected, by a majority of 138 to 84, a proposal made by Signor Mellana to effect an economy of 50,000 lire in the Budget of the Ministry of the Interior by reducing the expenses of the Prefectorial establishments.

PAPAL STATES.—The Tribunal of the *Sacra Consulta* has reversed the sentence of death passed upon Ajani and Luzzi, and has condemned them to hard labour for life. It is reported at Rome that the Marquis of Bute's contribution to Peter's-pence is 1200*l.* a-year.

TURKEY.—An official notification was published at Constantinople on Wednesday, stating that the Porte and Greece having accepted the declaration of the Conference, and diplomatic as well as commercial relations being on the point of resumption, the Sultan has ordered all measures adopted against Greek subjects and shipping in consequence of the *ultimatum* to be annulled.

EGYPT.—The Prince of Wales, travelling leisurely, left Esneh, on the left bank of the Nile, in the province of Thebes, Upper Egypt, on Saturday, for the cataracts of Assouan. All well. The Viceroy has ordered preparations for a ball to be given in honour of the Prince and Princess on the 4th of March.

CAPE OF GOOD HOPE.—Governor Wodehouse had addressed a very conciliatory letter to President Brand, and proceeded to Aliwal North to endeavour to arrange matters disputed between the Free State Boers and the Basutos. The Natal planters were applying for a further supply of coolie labour. The question of introducing coolies into British Kaffraria was also being discussed. A protest against the consecration of Mr. Macrorie as Bishop of Natal, has been signed by large numbers of the laity of the Church of England at the Cape—Low Church, High Church, and Broad. It originated with the High Churchmen, and repudiates any notions of sympathy with the heretical opinions of Dr. Colenso, but expresses the conviction that he has not been dealt with in accordance with the laws and constitution of the Church of England. Letters from the goldfields state that the expedition of Mr. Chapman had arrived, and that gold was not likely to be found in quantities to pay. It is said, however, to be more plentiful further north.

INDIA.—The condition of the Punjab and the Central Provinces, where apprehensions of distress were entertained, has been greatly improved by another fall of rain, which has saved much cultivation from failure. Ameer Shere Ali made a triumphant entry into Cabul on the 16th of January, amid great rejoicings. The Viceroy will probably visit the North-West frontier for the purpose of meeting the Ameer before proceeding to Simla. It is stated that the subsidy to be given to the Ameer will amount to 12 lacs of rupees and 4000 stand of arms. The Government has sanctioned a project for the maintenance of military field telegraph establishments. Dissatisfaction has been expressed at the reasons assigned for the accident on the Bhoré Ghaut Railway, and a Commission will shortly sit to investigate the matter. A telegram from Cachar states that the Government has taken measures to prevent further depredations by the hill tribes, and is about to send troops to pursue them.

AUSTRALIA.—The Government of Sydney have advertised for tenders for a monthly mail to England via the Cape. The Robertson Ministry maintains itself in office notwithstanding the efforts of the Opposition. The report of the parliamentary committee appointed to investigate the alleged Fenian organisation

has been issued. It disproves the existence of a conspiracy. A new Ministry has been formed in Queensland. The Victorian Parliament assembled on the 11th ult. The Ministry announced the introduction of a Bill to amend the Land Act. Extensive reforms in the civil service are contemplated. A severe drought prevails, and live stock are perishing for want of food.

NEW ZEALAND.—The latest news from New Zealand states that the *Ti-Koote* leader of Maori rebels was defeated, with a loss of 130 killed. The war is considered almost at an end.

UNITED STATES.—The House of Representatives have agreed, by a majority of 140 to 33, to the Constitutional amendment, prohibiting any law from being made with regard to the suffrage on account of either of race, colour, nativity, property, education, or creed. The Copper Tariff Bill has been vetoed by the President, and was returned on Monday, with a statement of his objections, to the House of Representatives. On Tuesday the House again passed the Bill. Wednesday the Senate passed the Bill by a majority of 38 to 11. It is, therefore, notwithstanding the President's veto, now law. Schenck's Finance Bill has passed the House by a majority of 119 to 61. It provides that the debt, not otherwise specified, is payable in gold, and postpones the payment till the value of greenbacks equals gold. It also legalises gold contracts. The Senate Republican Caucus has decided to take action on the Tenure of Office Repeal Bill until Congress. Monday, being the anniversary of Washington's birthday, was observed as a holiday throughout the union, and business was entirely suspended. Charles Bright has succeeded in picking up the marine cable lost during last summer in the Stream between Florida and Havannah.

CUBA.—General Dulce has reported to the Government of Madrid that large numbers of the insurgents are surrendering to the authorities, and that the reaction will now speedily be brought to a close. Insurgents do not receive reinforcements from abroad.

MEXICO.—Intelligence from Mexico, in the New York journals, announces that revolutions have broken out in several States of the Republic, and that Puebla has captured Puebla.

Parliament.

In the House of Lords on Monday, the Duke of ARGYLL gave notice that on Friday he would bring a Bill for the Improvement and Extension of Education in Scotland. Earl GRANVILLE announced in consequence of the illness of Prince Leopold, Majesty had expressed her regret that she was unable to receive the Address of the House of Lords. Under these circumstances he moved that the Address be presented in the usual manner. The Lords' Commissioners with white staves motion was agreed to. On Tuesday, in answer to the Marquis of CLANRICARDE, Earl GRANVILLE said that Bills had been prepared on the grand jury laws and prisons in Ireland, but it was doubtful if a Bankruptcy Bill for Ireland could be brought in this session. The Earl of KIMBERLEY gave notice that on Friday he should bring in a Bill for the better prevention and suppression of crime in the Common Law (Ireland) Bill, which was read a first time. On Tuesday the LORD CHAMBERLAIN brought up the Queen's reply to their lordships' address on the opening of Parliament. The Duke of ARGYLL brought up the Government Bill for the Extension and Improvement of Education in Scotland, and explained its provisions at great length, stating that it preserved the existing system of payment according to results, and gently recognised the principle of the Common Law Clause, and that its main features were that it encouraged the highest standard of education which had hitherto prevailed in the parochial schools. The Bill was read a first time, on the understanding that it will not be committed until after Easter. Yesterday the Earl of KIMBERLEY brought in the Government Bill for the repression of crime, and said its main principle was that men, after having been repeatedly convicted, should be called upon to earn their living, and that they should be allowed to do that, then that they should be allowed imprisonment. The House was left sitting.

In the Commons on Friday, Mr. B. FOWLER drew attention to the systematic enslavement of children by the Boers of the Transvaal Republic, and asked if the Government had taken any steps to cause the Boers to fulfil the provision of the Treaty of 1852 which prohibited slavery. Mr. MONSELL in reply said that the Government were aware that an organised system of slavery was carried on by the Boers, and that the plan of operations was to murder the Kaffir children, and then seize the children on the ground of their destitute condition, and convert them into slaves. The Government would do all in their power by means to prevent this violation of treaty, but they could not promise any other measures. Lord ELMERS drew attention to the proposed viaduct along the West London Embankment, from Charing Cross to Westminster Street, and urged the House to interfere to preserve from disfigurement one of the finest sites in the metropolis. He also appealed to the Government, as the keeper of the public purse, to take the guardian of the public taste, to take the lead in the matter. Mr. C. BUXTON and Lord ELMERS also urged the necessity of immediate interference to prevent the disfigurement of the river frontage, and the loss of a magnificent site for a public building. Mr. LAYARD said that he

some discussion, leave was given to bring in the Bill. Mr. RUSSELL GURNEY obtained leave to bring in a Bill similar to that of last year to amend the law relating to the property of married women, and Mr. T. CHAMBERS obtained leave to bring in a Bill to legalise marriage with a deceased wife's sister. Yesterday, in answer to Mr. CECIL RAIKES, Mr. CHICHESTER FORTESCUE said that the redistribution of seats in Ireland could never be a question of great magnitude, and that it did not form a part of the programme of her Majesty's Government. Mr. BRIGHT, in reply to Lord GARLES and Sir JOHN HAY, said that Portpatrick light was to be abolished, and that the rule of the road at sea, adopted in 1862, was now acknowledged by all the countries of the world. The House was left sitting.

City Intelligence.

THE MERCHANTS' COMPANY.—The hearing of the first charge which was preferred against some of the directors of the Merchants' Company was resumed on Monday at the Mansion House, when Mr. Richard Stuart Lane, Mr. Horace Edward Chapman, and Mr. Frederick Herbert Helbert, were again brought before the Lord Mayor, on the charge of conspiring to defraud the shareholders by issuing a prospectus, well knowing it to be false in certain material particulars. The case is quite distinct from that heard on Friday, and in which Mr. Lane and Mr. Childs were committed for trial. Mr. Cape, the official liquidator, was recalled and examined, and the case was again adjourned.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 93½ to 93¼, both for Money and Account; New and Reduced Three per Cents, 93½ to 93¼; Bank Stock, 242 to 241; Exchequer Bills, 4s. dis. to 1s. pm.; India Five per Cents, 112½ to 112¼. —FOREIGN: Italian, 56½ to 57½; Tobacco Loan, 4 to 4½ pm.; Turkish Five per Cents, 41½ to 42; Ditto Six per Cents, 64½ to 65; Egyptian (1864), 88½ to 89½; Ditto (1868), 78½ to 79½; Peruvian, 78½ to 79; Spanish, 32½ to 32¼; Mexican, 15½ to 15¼; Orel-Vitebek, 82½ to 83½; Nicolas, 66½ to 67½; Honduras, 85 to 87; United States 5-20 Bonds, 80½ to 80¼; Erie, 24½ to 25; Illinois, 96½ to 97.

Metropolis and its Vicinity.

MR. BRIGHT ON CHAMBERS OF COMMERCE.—On Tuesday evening the Associated Chambers of Commerce entertained Mr. Bright, M.P., President of the Board of Trade, at a dinner at the Westminster Palace Hotel. The chair was occupied by S. S. Lloyd, of Birmingham, President of the Associated Chambers. In returning thanks for her Majesty's Ministers, Mr. Bright spoke as follows:—

"There are questions which affect the commerce of the country which, from some cause, Chambers have thought beneath, above, or beyond their province. Two questions have been mentioned during the discussions which appear to me, and must appear to all, to be very important. One is that of the laws affecting bankrupt estates; the other is that of the charge for postage for letters crossing the ocean. This is a question of pennies; it does not sound very large, but, in my opinion, it is of the greatest consequence that we should have ocean postage reduced to the very lowest figure. It was not originally intended, and it is only a practice that has grown up with our vast extravagance, that Parliament should look to the Post Office for a large revenue; but the public have a right to expect that for what they pay for their postage they should have the greatest possible convenience and advantage. There is no doubt whatever that as between here and the United States, and between here and the Australian colonies, and probably between this and almost every other country, it would be possible for the Post Office to negotiate a system by which letters should cross the ocean for a penny. I speak disinterestedly. I do not know who suffers more from the penny postage than I do. I think I never did an act of such entire disinterestedness in my life as when I sent a subscription to Birmingham towards the erection of a monument to Sir Rowland Hill. Though not the Chambers of Commerce, but the Post Office, makes my life a burden to me, I think that the demand upon the Government for the establishment of an ocean penny postage, particularly between this country and the United States, is one of those things every member of a Chamber ought to consider—one of the first things he ought to ask for and obtain. Last night there was a discussion in the House of Commons, brought on by county members chiefly, who complained of the burdens of local rates, and mainly the Poor-rate. I am afraid that, having changed my place in the House of Commons perforce, I rather neglected that which, had I not changed my place, I might have found it my duty to do or to say. There wanted something saying a little different from anything that was said. Now the burden of the Poor rate is no doubt heavy, and of late in many districts it has been increasing; there is a general uncomfatableness about it, and every man feels it galling his shoulders, and he is trying to shove it on somebody else. But that is a very unsatisfactory thing, because wherever you put it off it remains and increases, and there will still exist the same uncomfatableness, the same unsettledness, the same demand upon Parliament to do something to relieve the burden. What the country should ask itself, and what the Parliament should inquire into, and what the country gentlemen should ask one another, and if they cannot get satisfaction from among themselves they should ask somebody else who can tell them, why all this pauperism exists? If you cannot diminish pauperism you cannot diminish the Poor rate, and those who bear it now must bear it still, or some one else must bear it for them, and that will probably only extend the discontent which now exists. Well, then, the question comes—and it is a very important question for all of us—why is it there is so much pauperism in this country? Why does it increase? If the country gentlemen on both sides of the House and her Majesty's ministers, and everybody else, try to solve that question, it will be about the most important employment men can put their minds to, and the result will perhaps bring out something that may change the aspect of the country. Is it not surprising that in a population like this, of 30 millions of people, crowding upon these comparatively small islands, with all the laws which make land a monopoly, with near 70,000,000l. sterling of taxation, without including local taxation, being annually raised from these 30,000,000, one half of whom have no property, and besides and above and beyond all this the fact that the great mass of the working classes of the country have been left, in addition to bearing their share, or more than their share, of these enormous burdens without the means by which they be instructed and civilised? That I take to be the great problem which will some day or other have to be solved, and in comparison with which many of those peddling questions which sometimes occupy us are as nothing. Why should Chambers of Commerce shut their eyes to questions like this? Why should they who are the great employers of labour, and who come constantly and daily and hourly into contact with the labouring classes, and who know the evils which I have but faintly described, discuss them in their local legislatures, their local creators of opinion, and ultimately the creators and directors of Parliament? Why should they not expand themselves to the greatness of these great questions, and become, as they may become, truly the saviours of their country?"

THE EASTERN MONDAY REVIEW.—At the request of the Dover Committee of the approaching Volunteer Review, the First Lord of the Admiralty has promised the presence of a naval force to co-operate with the volunteer army and the regulars at the Dover Review.

THE VOLUNTEERS AND THE CAPITATION GRANT.—On Friday afternoon a meeting of peers and members of Parliament who are members of Volunteer corps was held in the Tea-room of the House of Commons, for the purpose of drawing up a memorial for presentation to the Secretary of State for War on the subject of the Capitation Grant. The Duke of Manchester occupied the chair, and Lord Elcho moved, and the Duke of Abercorn seconded, the adoption of the following memorial:—

"We, the undersigned peers and members of Parliament, being members of the Volunteer force, have met to consider its position as regards the Capitation Grant. We have had before us the report upon this subject that was laid before Parliament in 1867 (Parliamentary Paper 184). This report was drawn up after careful inquiry by a committee of metropolitan Volunteer commanding officers, and such peers and members of Parliament as happened at the time to be members of Volunteer corps, and resident in London. The views there set forth may therefore be said to fairly represent the opinions of the force in general, and not of any section in particular; and we think the recommendations therein contained as to increased aid to Volunteer corps deserve the serious attention of Government. We do not now urge the concession of an increased Capitation Grant; that is a question of policy to be determined by Government and by Parliament. But speaking simply as citizens, and not as Volunteers, we are strongly of opinion that a Volunteer army such as we now possess forms a valuable and economical element of national defence; and we are further of opinion that those who without pay give their time and services to the State should not be called upon personally to spend money in providing for the necessary expenses of the force. A difference of opinion, however, is said to exist as to the sufficiency or insufficiency of the present grant to cover necessary expenses, and we therefore respectfully urge such an inquiry as will definitively and satisfactorily determine this disputed point, as thus only can Government and Parliament rightly judge whether the present Capitation Grant ought or ought not to be increased. In conclusion, we would also express an opinion that the organisation of the force might be greatly improved, and its consequent efficiency increased, without reference to any increase of the Parliamentary grant, and without imposing any additional tax upon the time and services of the Volunteers."

The memorial was discussed for upwards of an hour, and was unanimously adopted. Among the peers and members of Parliament who signed it were the Dukes of Manchester and Abercorn, the Marquis of Lorn, the Earls of Rosslyn, Brownlow, Dartmouth, Tankerville, Durham, Grosvenor, Yarborough, and Vane, Lords Wharncliffe, Suffield, Vernon, Campbell, Truro, Bury, and Elcho, Colonel Loyd Lindsay, Mr. Lyttelton, Mr. Henry Strutt, Mr. C. H. Lindsay, Mr. Wilmot, Mr. Donald Dalrymple, Mr. Charles Dalrymple, Mr. C. Hambro, Mr. E. T. Gourley, Mr. Donald Cameron of Lochiel, Mr. Algernon Egerton, Mr. Charles Williams, Colonel Ancott, Sir W. W. Wynn, Mr. Hutton, Mr. Roden, Mr. Macfie, Colonel Mellor, Mr. G. Denman, Mr. Anderson, Mr. Gray, Mr. Howe, Colonel Barttelot, Sir John Ogilvy, Mr. Samuda, Mr. H. G. Liddell, &c. The memorial now lies in the Cloak Room of the House of Commons for signature.

REGENT'S PARK.—Mr. Layard, Chief Commissioner of Works, has sanctioned a proposition for carrying an iron railing 7 feet high round the Regent's Park in lieu of the present dwarf fence. The rails will be of the ordinary common spike shape.

STATE OF THE STRAND.—A deputation of tradesmen having places of business in the Strand waited upon Colonel Henderson, the new Chief Commissioner of Police, on Tuesday to present a memorial complaining of the many nuisances impeding the traffic and injuring the trade of the Strand. Colonel Henderson, in reply, promised that the police should do all that was possible, but he reminded the deputation that their power was limited, that they could not interfere with any one selling newspapers, or with hawkers of flowers and matches unless it could be shown that they were begging.

THE CHARGE OF CORRUPTION AGAINST ADMIRALTY OFFICIALS.—The charge against Mr. T. Gambier, chief clerk in the Storekeeper's department at Somerset House, and Mr. William Rumble, Inspector of Machinery Afloat, for fraudulently and illegally offering to obtain the acceptance of contractors' estimates from the Government, was again brought before Sir Thomas Henry at Bow Street on Thursday. Evidence was adduced to prove that the bank notes paid by Mr. Maxwell had been traced to the prisoners, and that books had been found in their possession which rendered another remand necessary. The prisoners were ultimately remanded, bail being taken for Gambier as before, and as Sir T. Henry refused to reduce the amount for Rumble, he was sent back to prison. It is stated that some extraordinary revelations are likely to result from this prosecution; and that written and verbal statements have been pouring in upon the authorities, showing the ramifications of a system of fraud carried on to an extent of which the public generally have had little idea. Mr. Baxter, the Admiralty Secretary, is personally engaged in investigation of the matter, assisted by detectives, who have already been most successful in their movements, which have not been confined to London. It is said that the

pocket-books and documents seized exhibit as complete a system of public robbery as could be devised.

ELECTION OF ACCOUNTANT TO THE BOARD OF WORKS.—At the meeting of the Metropolitan Board of Works on Friday, the election of an accountant to the Board took place. The committee selected from a list of 126 candidates the 12 following, viz., Messrs. Bellamy, Cox, Pritchard, Dixon, Finlaison, Gunn, Hutchison, Jones, Livingstone, Muir, Routledge, and Smith. The number thus selected was reduced by the Board by one vote to six, and by five subsequent votes to two, when Mr. Gunn, of the Treasury, obtained 31 votes, and Mr. Herbert Routledge, of the War Office, 11. The name of Mr. Gunn was then put, and he was unanimously elected accountant to the Board.

RECTORY OF ST. MARY, NEWINGTON.—This rectory, which is put down in the Clergy List at the annual value of 900*l.* per annum, but is stated by the clerical papers to be really worth from 3000*l.* to 4000*l.* a year, has been conferred by Mr. Gladstone upon Dr. Miller, vicar of Greenwich. Under ordinary circumstances this preferment belongs to the bishopric of London, but the death of the late rector, the Rev. A. C. Onslow, having taken place on the day the new bishop did homage on his election to the ser. and the Great Seal not having been affixed to the Queen's approval, the appointment lapsed to the Prime Minister. The vicarage of Greenwich, value 700*l.*, which becomes vacant by this appointment, is also in the gift of the Crown.

THE BEERHOUSE LICENSING SYSTEM.—On Friday a deputation waited upon Mr. Bruce, Secretary of State for the Home Department, to urge the desirability of transferring the granting of licences for beerhouses from the Inland Revenue Office to the magistracy. The Home Secretary was accompanied by Mr. Knatchbull-Hugessen, Under Secretary. Among those composing the deputation were Colonel Akroyd, M.P., Mr. Selwin-Ibbetson, M.P., Mr. J. T. Hibbert, M.P., Mr. Jacob Bright, M.P., Mr. Bazley, M.P., Mr. Barnes, M.P., Mr. Gourley, M.P., Mr. Whitwell, M.P., Mr. Candlish, M.P., Mr. Backhouse, M.P., Mr. T. W. Mellor, M.P., Sir R. Clifton, M.P., Mr. Sidebottom, M.P., Sir J. B. Johnstone, M.P., Colonel Brise, M.P., Mr. Dodds, M.P.; Mr. Taylor, Secretary, and Mr. Dale, Vice-President of the Church of England Temperance Society; Mr. Candelet, Secretary of the Licensed Victuallers Association; Rev. Canon Jenkins, M.A., &c. Colonel Akroyd, M.P., introduced the deputation, and said that a petition to Parliament against the present system had been signed by 250 mayors, that a memorial signed by upwards of 1000 gentry was about to be presented to the Premier, and that beerhouses were increasing so rapidly that any delay in legislating on the question would have a bad effect. Mr. Stannier, Mr. Selwin-Ibbetson, M.P., Mr. Lupton, J.P., Mr. Baines, M.P., Mr. Candelet, and Canon Jenkins having spoken in support of the memorial, Mr. Bruce, in reply, said:—

"Mr. Gladstone had told the House of Commons that many subjects of great national importance, and among them the question of education, could not be dealt with this session. There was no doubt this question of the licensing system would have been treated in the way of a whole measure if the Government had any prospect of carrying such a measure during the present session. It was a subject upon which great diversity of opinion existed, and the Government was of opinion that it could only be dealt with generally. Their proposition, however, was a much more limited one, it was confined to the transfer of the power of granting licences to beerhouses to magistrates. Now, with respect to that, it seemed a very simple question, but it would be impossible for any Government to take this step without considering whether that was part and parcel of a good and complete system with respect to the question of licensing. The Committee of the House of Commons which dealt most exhaustively with this subject was that presided over by Mr. Charles Villiers, and it reported in favour of depriving the magistrates of the power of granting licences, but lodging in them certain other powers, such as judging of the character of the applicant and the suitability of premises. The Bill brought forward on behalf of Liverpool once or twice, which to his certain knowledge received a large support from gentlemen of influence belonging to all parties, was founded upon a similar principle. The step which they called upon the Government to take was one which, he might say, had been under the consideration of the Government, but which was at variance with the report of that Committee, with the Liverpool Bill, and with the opinion of a very large number of persons who had considered this question. They would understand, therefore, that, without full consideration of this subject, her Majesty's Government were not prepared to say whether they could assent to this modified legislation. They must not consider what he now stated a positive refusal, but the question of this modified legislation was a new one, which had not been previously raised. They did not intend to deal with the whole question. They were asked to deal with part of the question, and so, without consultation with his colleagues and mature consideration, he was not prepared to say what they would do."

SEA GULLS AT BATTERSEA.—On Tuesday afternoon two sea gulls were shot outside Battersea Park. Both were fine specimens, although suffering from want of food.

RELEASE OF THE ORPHAN CHILD FROM WHITE-CROSS STREET.—On Friday Mr. Justice Blackburn made an order exonerating from the payment of costs the child, Elizabeth Cope, 13 years of age, who was removed from the Girls' Refuge at Ealing to White-cross Street Prison, and authorising the Sheriff of Middlesex to discharge her from custody, on the condition that no action was to be brought against the plaintiff by the child for being arrested and locked up in prison. The child was released from prison on Friday afternoon, and is again in the Refuge at Ealing.

THE POLICE.—It has been determined to appoint four district superintendents of police in the metropolis, to act in their respective districts under the orders of the Chief Commissioner. The superintendents appointed are Mr. Baynes, now governor of the County Prison at Winchester, Mr. A. C. Howard, of the Bengal constabulary, Colonel Pearson, of the Grenadier Guards; and Superintendent Walker.

THE PUBLIC HEALTH.—The weekly return of the Registrar-General states that in the week that ended

on Saturday, Feb. 20th, 5026 births and 3339 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 27 per 1000 persons living, being 25 per 1000 in London, 30 in Edinburgh, 27 in Dublin, 24 in Bristol, 20 in Birmingham, 27 in Liverpool, 29 in Manchester, 31 in Salford, 30 in Sheffield, 30 in Bradford, 25 in Leeds, 32 in Hull, 33 in Newcastle-upon-Tyne, and 35 in Glasgow. The rate in Vienna was 35 per 1000 during the week ending the 13th inst., and in Berlin 33 per 1000 during the seven days ending the 18th inst. In London the births of 1200 boys and 1192 girls, in all 2401 children, were registered in the week. In the corresponding weeks of 10 years, 1859-68, the average number, corrected for increase of population, was 2279. The deaths registered in London during the week were 1491. It was the 7th week of the year, and the average number for that week, corrected for increase of population, was 1522. The present return is therefore 31 below the estimated amount.

Provincial.

BIERMINGHAM.—The old family property, called the Packwood Estate, was sold a few days since in this town by Messrs. Chincock & Galsworthy, of London. There was an unusually large attendance, and the most spirited competition was manifested for some of the lots, Packwood House, with its curious old yew tree gardens and home lands, realised 19,000*l.*; the remainder sold for about 60*l.* per acre, realising altogether 43,970*l.*, the timber upon the estate to be paid for at a valuation.

BOLTON.—At a recent meeting of the Chadwick Charity trustees it was intimated that Dr. Chadwick, of Southport, formerly a resident in this town, had placed at their disposal a further sum of 5000*l.*, in addition to the 17,000*l.* previously given, making in all 22,000*l.* The money will be devoted to the erection of artisans' model dwellings and an orphan asylum.

CAMBRIDGE.—Mr. Vernon Harcourt, Q.C., Mr. Fitzjames Stephen, Q.C., and Mr. E. C. Clarke late Fellow of Trinity, are candidates for the professorship of International Law recently founded in this University by the munificence of the late Dr. Whewell, Master of Trinity.—In consequence of the practice of bell-ringing among the undergraduates, and the numerous convictions which have taken place for ringing the night-bell of Dr. Ransom in particular, notice was given by the magistrates, on the occasion of the last charge, that they would send the next offender to prison. On Monday Mr. Charles A. Andrews, a Creole, was brought up on the charge of mischievously ringing Dr. Ransom's bell at a late hour at night. The Court was densely crowded in anticipation of the magistrates carrying out their threat. The offence was fully proved, and admitted by defendant, who pleaded that he did it in a thoughtless moment, that he knew nothing of the feud between Dr. Ransom and the students, and was not before aware that the ringing of bells was so serious an offence, street-door bells being unknown things in the country from which he came. The Mayor said that if the bench thought the defendant had been cognisant of bygone transactions he would inevitably have been sentenced to imprisonment. They were, however, willing to give him the benefit of the doubt, but they felt it to be their duty to inflict the highest penalty in their power, which was 40*s.* and costs, or imprisonment for 14 days with hard labour. The money was immediately paid.

FROME.—On Saturday another murder was added to the long list for which this district has become notorious. Between seven and eight a.m. Mr. H. Farthing, of Hemington, five miles from Frome, sent one of his labourers, named Edward Smith, and a lad in his employ, named Frank Taylor, aged 11, to drive two beasts to Cannard's Grave, near Shepton Mallet, about ten miles distant. On their return at eight p.m. they stopped at Mells, where Smith had a pint of beer at the Talbot Inn. He asked the boy to partake of it, and on his refusing, the man, who was already the worse for drink, became angry and used harsh language. They then left for home, taking a short cut to Buckland across the fields. It is stated that people living near the fields heard cries as of some one being beaten. On the next morning (Sunday) a man named Taylor found the body of a boy in a ditch in a lane some distance from the path to Buckland. It lay face downwards, and was covered with mud and dirt. He gave information to a policeman at Mells, who had the body removed to his own house, where it was identified as that of a boy who had been seen driving cattle on the previous day. The officer then proceeded to Hemington, and requested Smith to accompany him and see if the body was that of the missing boy. Smith consented, and at once recognised the body, and on being taken into custody stated that he had given him a cut or two with his stick because he would not keep up with him, and added that "he was very sorry, and would not have had it happen for 10*l.*" He was conveyed to Frome, where he remains in a very despondent state. It appears that on his way home the prisoner had to pass the house of the boy's father, but he did not, either on Saturday night or Sunday morning, give any information about him. At one part of the foot-path there were traces apparently of a struggle, and the dead boy's boots exactly correspond with the footprints.

LIVERPOOL.—A few days since, at Mander's Menagerie, now exhibiting in this town, two leopards commenced fighting, and all efforts to separate them were for some time in vain. When they were at length parted the smaller one was found to be so much injured that it was necessary to poison it with prussic acid.

MANCHESTER.—Information was received last week that stamps, identified to have been a portion of the

15,000*l.* worth stolen from the Metropolitan Office more than two years ago, had been for sale in London. The persons who were apprehended, and 800*l.* were found in their possession.

MONMOUTH.—Inquests have been taken on John Prosser, aged 48, who was sustained in the recent explosion at the colliery. Several witnesses were examined, and Mr. Green, colliery agent, and Mr. Bennett, Inspector, whose evidence was that an explosion was caused by the man who had violated the colliery rules, and an accumulation of gas, which an explosion who carried a naked light on his person working. The jury in Prosser's case returned a verdict that "his death was caused by his violating the rules of the colliery." Had he been committed for trial by the coroner of Weekes the verdict was simply that of injuries sustained in the explosion. Mr. Bennett's intention of presenting the survivors before the Pontypool magistrates.

NORWICH.—Brother Ignatius has been appointed to the monastery in this city, with the intention of calling on his Norwich friends to help in the beds or bedclothes, plates, spoons, knives, a chair, table, or even a stool, a dustpan, a blanket, or anything else in the way of necessaries.

OXFORD.—The amalgamation of the city police has created a new era in the history of justice in this city, as an under-convicted on Monday before the Vice-Chancellor of an assault on Inspector Barron, the new Oxford force, and fined two months. The Vice-Chancellor, in giving his decision, made it known that if members of the new police had as much right to deal with any one else.

SHEFFIELD.—The amount subscribed for the new police has now reached 100,000*l.* A presentation will be made in the City Hall, on March, at a public meeting of the subscribers, at which a banquet will be given to the learned and the learned.

SUNDERLAND.—On Saturday night a woman named Fitzsimmons, who lived in Barges Lane, was found in a pool of blood under her door, being quite extinct. She was stabbed in several places on the breast and back, and the wounds found by a post-mortem examination were deep and dangerous. She had been drinking with a sailor, and it is supposed accompanied her home, where she was found silver money being found concealed in her dress. He had the appearance of an Irish man, and thought that he left Sunderland on Saturday. A man, answering to his description, was arrested at Middleborough on Wednesday. He is of Charles Wright, and said that he was from Massachusetts. He was remanded for trial.

Ireland.

THE IRISH CHURCH.—The Corporation of Dublin, at a special meeting on Friday, adopted a resolution to present an address to her Majesty, in dissent from the Irish Church, and addressed to the Queen, to be presented to both Houses of Parliament. It was resolved that the petition to the Lords should be presented by the Earl of Devonport, and that the petition to the House of Commons should be presented at the bar of the House by the Mayor, accompanied by the officers of the Corporation, and many members as might desire to accompany them.

THE RATHFARNHAM CONVENT.—The Hon. Miss French, who was said to be suffering from illness, was removed from the Queen's Bench on Monday, and was confined for a week, in consequence of the illness of Lord French, her father, intended to be presented in Chancery. Her mother had been confined, and expressed herself satisfied with the character of her illness.

IRISH RAILWAYS.—A numerous deputation of members of Parliament had an interview with the President of the Board of Trade, to discuss the expediency of carrying out the recommendations of the Commission which was appointed on the condition and prospects of the Irish railways.

Railways.

ATTEMPT TO UPSET A TRAIN.—A boy named Henry Taylor was brought before the magistrates at Shrewsbury charged with an attempt to upset a train. A platelayer in the neighbourhood hearing the noise of a train coming up, he also saw the boy, but he recognised him, and had the train secured by a pallock on the previous day. It was proved that the lock had been forcibly broken with a hammer. The prisoner was committed to the gaol.

NEW METROPOLITAN LINE.—An attempt was made to the Ranger for leave to dig a tunnel underneath the parks, so as to connect

the short supply of them causes prices to continue high. Our foreign supply consists of 620 Beasts and 128 Calves.

POTATOS.—SOUTHWARK, Monday, Feb. 22

During the past week the arrivals have been very heavy coastwise, by rail, and from abroad, and trade extremely dull. Prices have fallen from 20s. to 30s. per ton, many second-rate and inferior sorts being quite unsaleable at present. The following are this day's quotations.—Yorkshire Regents, per ton, 50s. to 90s.; do. Flukes, 80s. to 110s.; Lincolnshire Regents, 60s. to 80s.; Dunbar and East Lothian do., 60s. to 110s.; Perth, Forfar, and Fife do., 60s. to 80s.; do. Rocks, 50s. to 60s.; French and Belgian Whites, 40s. to 60s.

MARK LANE.—MONDAY, Feb. 22.

There was a small supply of Wheat from Essex and Kent to this morning's market, which was mostly disposed of at the prices of this day so'night. The attendance included some few country buyers, and for foreign Wheat there was a retail demand at last week's quotations. Barley was 1s. per qr. cheaper. Beans and Peas were rather lower. The Oat trade was steady without change in prices. Flour remains unaltered.

FRIDAY, Feb. 26.

Inactivity has continued to be the prevailing feature of the trade throughout the markets of the kingdom during the past week, and we have to report a further decline of 1s. per qr. on Wheat in Hull, Newcastle, and some of the Scotch markets, while in the producing districts former rates were maintained with difficulty. Barley has been neglected, and grinding qualities were the turn cheaper. Peas and Beans were a slow sale, at prices fully 1s. per qr. in buyers' favour. Oats have not experienced any further decline this week. Flour sympathized with Wheat, and to effect sales a slight reduction had to be submitted to. The supplies off the coast consisted this week of 53 cargoes, of which, with those left over from last week, there remained for sale last night 55 cargoes. The floating trade has been quiet throughout the week, arrived cargoes of Wheat being held at previous rates (the only exception being a cargo of five white from San Francisco sold at 2s. per qr. decline), but the business concluded was not extensive. Maize was about 6d. per qr. cheaper, whilst Barley met with more inquiry at the late heavy reduction. Rye, none on offer. Paris, Feb. 25.—The trade in Wheat and Flour ruled firm but inactive. The eight marks are quoted at equal to 36s. 6d. per 280 lb. The stock at the Halle is estimated at 10,180 cwt.

The arrivals of English grain and foreign Wheat and Barley are moderate, but of Oats good. There was a poor attendance at this morning's market. Part of the English Wheat left over from Monday remained unsold at a late hour, although offered at that day's prices. In foreign the business done was quite in retail, and we do not alter our quotations. Spring Corn met a slow sale without alteration in the value of any description.

LIVERPOOL, Tuesday, Feb. 23.—The market was fairly attended. Wheat in good request at last Friday's rates. Flour quiet, without alteration in value. Beans steady, at Friday's decline; Saidi, 36s. to 38s. 6d. Oats and Oatmeal firm, at late rates. Indian Corn in fair inquiry, at the extreme rates of Friday last; mixed, 31s.

SEED MARKET.

Owing to the continuance of wet weather the agricultural seed trade is still in a rather quiet state, many buyers apparently declining to go into stocks until the consumptive demand has absolutely set in. Red Clover seed of all descriptions is held at full values, and the market exhibits no signs of giving way; the quantity of seed now in London is small, and holders seem confident that immediately the country trade begins to operate higher prices must rule; German Red is in fair supply—indeed, if it had not been for Germany we should have been very poorly off this year for Red Clover seed, new English continues exceedingly scarce and dear. We have more doing in Trefoil, of yearling seed the stocks are large; new French has come to hand, at moderate currencies. Alsike and White Clover seed are without change, the former being in abundant supply, and now very cheap. We have a brisk inquiry for French Italian Rye-grass, the stocks of which on the other side appear to be getting reduced very low. Bowing Linseed meets with more attention, a good many orders coming to hand from Ireland. For Mustard seed there

is a good inquiry, but the supply is very limited, the unprecedented demand last autumn having used up the stocks quite close. English Rapeseed is about the same. We have a demand for Dutch Runners, which are this year being used in the place of Scarlet, the last-named being exceedingly scarce and high in price. Spring Tares move off rapidly at the late advance. For large Scotch Tares there is some inquiry. French Sainfoin seed meets with a free sale at last week's quotations. Canary and Hemp seed are unaltered in value. JOHN SHAW & SONS, 16, Water Lane

WANTED, a steady Man as GENERAL FOREMAN in a small Nursery. Must be well up in the Cultivation and Management of Roses and Fruit Trees, and competent to Superintend the Glass and Propagation of Soft-wooded stuff, with a Junior Propagator under him. Beasts, 1050; Sheep and Lambs, 6250; Calves, 184; Pigs, 70.

POTATOS.—SOUTHWARK, Monday, Feb. 22.

During the past week the arrivals have been very heavy coastwise, by rail, and from abroad, and trade extremely dull. Prices have fallen from 20s. to 30s. per ton, many second-rate and inferior sorts being quite unsaleable at present. The following are this day's quotations:—Yorkshire Regents, per ton, 50s. to 90s.; do. Flukes, 60s. to 110s.; Lincolnshire Regents, 60s. to 80s.; Dunbar and East Lothian do., 60s. to 110s.; Perth, Forfar, and Fife do., 60s. to 80s.; do. Rocks, 50s. to 60s.; French and Belgian Whites, 40s. to 60s.

MARK LANE.—MONDAY, Feb. 22.

There was a small supply of Wheat from Essex and Kent to this morning's market, which was mostly disposed of at the prices of this day's night. The attendance included some few country buyers, and for foreign Wheat there was a retail demand at last week's quotations. Barley was 1s. per qr. cheaper. Beans and Peas were rather lower. The Oat trade was steady without change in prices. Flour remains unaltered.

FRIDAY, Feb. 26.

Inactivity has continued to be the prevailing feature of the trade throughout the markets of the kingdom during the past week, and we have to report a further decline of 1s. per qr. on Wheat in Hull, Newcastle, and some of the Scotch markets, while in the producing districts former rates were maintained with difficulty. Barley has been neglected, and grinding qualities were the turn cheaper. Peas and Beans were a slow sale, at prices fully 1s. per qr. in buyers' favour. Oats have not experienced any further decline this week. Flour sympathized with Wheat, and to effect sales a slight reduction had to be submitted to. The supplies off the coast consisted this week of 53 cargoes, of which, with those left over from last week, there remained for sale last night 55 cargoes. The floating trade has been quiet throughout the week, arrived cargoes of Wheat being held at previous rates (the only exception being a cargo of fine white from San Francisco sold at 2s. per qr. decline), but the business concluded was not extensive. Maize was about 6d. per qr. cheaper, whilst Barley met with more inquiry at the late heavy reduction. Rye, none on offer. Paris, Feb. 25.—The trade in Wheat and Flour ruled firm but inactive. The eight marks are quoted at equal to 36s. 6d. per 280 lb. The stock at the Halle is estimated at 10,180 cwt. The arrivals of English grain and foreign Wheat and Barley are moderate, but of Oats good. There was a poor attendance at this morning's market. Part of the English Wheat left over from Monday remained unsold at a late hour, although offered at that day's prices. In foreign the business done was quite in retail, and we do not alter our quotations. Spring Corn met a slow sale without alteration in the value of any description.

ARRIVALS THIS WEEK.

SEED MARKET.

Owing to the continuance of wet weather the agricultural seed trade is still in a rather quiet state, many buyers apparently declining to go into stocks until the consumptive demand has absolutely set in. Red Clover seed of all descriptions is held at full values, and the market exhibits no signs of giving way; the quantity of seed now in London is small, and holders seem confident that immediately the country trade begins to operate higher prices must rule; German Red is in fair supply—indeed, if it had not been for Germany we should have been very poorly off this year for Red Clover seed; new English continues exceedingly scarce and dear. We have more doing in Trefoil; of yearling seed the stocks are large, new French has come to hand, at moderate currencies. Alsike and White Clover seed are without change, the former being in abundant supply, and now very cheap. We have a brisk inquiry for French Italian Rye-grass, the stocks of which on the other side appear to be getting reduced very low. Sowing Linseed meets with more attention, a good many orders coming to hand from Ireland. For Mustard seed there

is a good inquiry, but the supply is very limited, the unprecedented demand last autumn having used up the stocks quite close. English Rapeseed is about the same. We have a demand for Dutch Runners, which are this year being used in the place of Scarlet, the last named being exceedingly scarce and high in price. Spring Tares move off rapidly at the late advance. For large Scotch Tares there is some inquiry. French Sainfoin seed meets with a free sale at last week's quotations. Canary and Hemp seed are unaltered in value. JOHN SHAW & SONS, 16, Water Lane.

WANTED, a steady Man as GENERAL FOREMAN in a small Nursery. Must be well up in the Cultivation and Management of Roses and Fruit Trees, and competent to Superintend the Glass and Propagation of Soft-wooded stuff, with a Junior Propagator under him. Green's Patent Noiseless Lawn Mowers.
 GREEN'S PATENT LAWN MOWERS have proved
 to be the best, and have carried off every prize that has been
 offered in the course of competition, and in proof of their superiority
 upwards of 50,000 have been sold since the year 1856.
 They are the simplest in construction, least liable to get out of
 order, and can be worked with far greater ease than any other Lawn
 Mower.

They are the only Machines in constant use at
 The Winter Palace Gardens, Dublin
 The Dublin Botanic Gardens
 The Liverpool Botanic Gardens
 The Leeds Royal Park
 The Hull Botanic Gardens
 The Botanic Gardens, Brussels
 The Sunderland Park
 The Preston Park
 The most of the principal Parks and Squares in the United Kingdom.

These Mowers are warranted to give entire satisfaction, and if not
 satisfied, they may be returned at once and unconditionally.
 They are sent by Railway, which includes Free Delivery
 to all Railway Stations and Shipping Ports in England
 and Wales, on the day they are received.
 We have ten times more Lawn Mowers in Stock at their
 Works, 4 and 55, Blackfriars Road, S., than any other firm
 in the Kingdom, and intending Purchasers can select from
 our very extensive premises in London, we are in a position to
 make repairs there as well as at the Works at Leeds.
 SAMUELSON & CO., Smithfield Iron Works, Leeds; and 54 and
 55, Blackfriars Road, London, S.

New and Important Book of Travels. Now Ready, with Maps and Illustrations.

TRAVELS in the ISLANDS of the Eastern Archipelago, during the years 1855-6-7-8. By Alfred Russel Wallace, Esq., F.R.S., and Captain Charles Moore, R.N. With 100 Illustrations. Post 8vo, 10s. 6d.

"The Malay Archipelago is a region of wonders, the greatest volcanoes in the world, extinct or nearly extinct, earthquakes of tremendous force frequently occur. Yet nowhere does Nature wear a more lovely aspect than in the Malay Archipelago. The most beautiful and fantastic Orchids creep over the stems, the huge and fantastic tribes of monkeys, including the huge orang-utan, branch to branch, ferocious tigers prowl in the jungles, scarcely less ferocious, for their prey, are the rhinoceroses, orang-utans, buffaloes, deer, &c."

ATHENÆUM. "The Eastern Archipelago and its islands are of great interest to the public." —Athenæum.

EXAMINER. "We certainly know no other book which gives so full a survey, historical and scientific, of the islands of the Eastern Archipelago, and of the smaller islands of Ceram and Buru, Gilolo, and other smaller islands."

JOHN BULL. "Mr. Bickmore's volume is the most charming and valuable book of travels published since the appearance of the wonderful account of his travels in the North American continent, by Mr. Bickmore, and other travellers. It is of the highest value. The reader will find in it the most interesting information, while the sportsman will derive much pleasure from the rhinoceroses, orang-utans, buffaloes, deer, &c."

LAND AND WATER. "We have seldom read a book of travel, more interesting and valuable than this. It is the narrative of a naturalist-traveller, free from all the usual cataloguing, and full of incident and adventure."

JOHN MURRAY, Albemarle Street, W.

Agricultural Improvements.

MR. BAILEY DENTON undertakes the **UNDER-DRAINAGE OF LAND** at a charge of 6s an acre; and will supply **PLANS and SPECIFICATIONS** for Farm-houses, Farm-buildings, and Labourers' Cottages with or without Superintendence during Construction, on terms to be ascertained of him at
22, Whitehall Place, London, S.W.

THE GENERAL LAND DRAINAGE and IMPROVEMENT COMPANY

Directors:
Thomas Chapman, Esq., F.R.S. The Right Hon. Viscount Compton.
Geo. Thomas Clark, Esq. Edward John Hutchings, Esq.
John C. Cribb, Esq. William Tate, Esq., M.P.
Henry W. Currie, Esq.

J. BAILEY DENTON, Principal Engineer.
Agricultural Improvements of any kind are executed by the Company, or the outlay thereon repaid to Landowners who prefer executing the work by their own Agents.

Tenants may also by arrangement with their Landlords, procure the execution of such improvements.

The outlay, with all official expenses, may be charged on the Estate, and paid off by a rent-charge in 31 years, or at the option of the Landowners in a shorter term.

No investigation of title necessary, and no legal expenses incurred. Application to be made to **HORACE BROKE**, the Secretary, at the Offices of the Company, 22, Whitehall Place, London, S.W.

THE LANDS IMPROVEMENT COMPANY.

(Incorporated by Special Acts of Parliament.)
Directors:
John Clifton, Esq., 9, Whitehall Place, S.W.
Frederick L. Dashiwood, Esq., Kirtlington Park, Oxford.
Henry Farquhar, Esq. (Messrs. Herries, Farquhar, & Co.), 16, St. James Street, S.W.

Lord Gariles, M.P., 25, Eaton Square, S.W., and Galloway House, Wiltshire, N.B.
John Horatio Lloyd, Esq., 1, King's Bench Walk, Temple, E.C.
Granville R. Ryder, Esq. (Managing Director), 2, Princes Terrace, Hyde Park, S.W.

Granville R. H. Somerset, Esq., Q.C., 6, Park Street, Westminster.
Henry W. West, Esq., Q.C., M.P., 10, King's Bench Walk, Temple, E.C.

Charles Watkin Williams Wynn, Esq., M.P. (Chairman), 2, Lower Berkeley Street, Portman Square, W., and Coedy-Maon, Welshpool.

The Company advance money, unimpaired in amount, for all purposes of Agricultural Improvement, including the erection of Cottages and Farm Buildings, to the owners of settled and other Estates, and to the Clergy in respect of their Glebe Lands.

The whole outlay and expenses are liquidated by a rent-charge upon the land, redeeming principal and interest, over 25 years. No investigation of title is required.

For Forms and further information apply to **GRANVILLE R. RYDER**, Esq., Managing Director, 2, Parliament Street, London.

Will Close on Saturday, March 20.

THE SOCIETY OF PAINTERS IN WATER COLOURS.

The WINTER EXHIBITION of SKETCHES and STUDIES is NOW OPEN, 5, Pall Mall East. Ten the day. Admission free. **WILLIAM CALLOW**, Secretary.

Home News.

THE COURT.—The Queen on Friday, on her arrival at Windsor from the Isle of Wight, drove with Princess Louisa to Frogmore House, and visited the Princess Christian. On Saturday morning her Majesty again visited Princess Christian, and in the afternoon drove out with Princess Louisa. The Lord Chancellor and the Rev. Charles Kingsley arrived at the Castle on a visit. On Sunday morning the Queen and Royal family attended Divine service in the Private Chapel. The Rev. C. Kingsley preached the sermon. On Monday the Earl of Clarendon, Secretary of State for Foreign Affairs, arrived at the Castle, and introduced to her Majesty Baron Fabrice, Minister for Saxony; Baron Gevers, Minister for the Netherlands; and Baron de Beaulieu, Minister for Belgium, who presented their credentials. Viscount Sydney, Lord Chamberlain, introduced to the Queen the Earl of Southesk, who received the honour of Knighthood, and was invested by her Majesty with the Insignia of the Order of the Thistle. The Queen afterwards drove out with the Princesses Louisa and Beatrice. In the evening Prince Christian and Princess Henriette of Schleswig-Holstein dined with her Majesty. On Tuesday morning the Queen went out with Princess Beatrice. On Wednesday morning the Queen, accompanied by Princess Louisa and Princess Beatrice, visited Princess Christian at Frogmore House. Her Majesty afterwards left Windsor for London, accompanied by the Princesses Louisa and Beatrice, and Princess Henriette of Schleswig-Holstein. Her Majesty travelled by special train on the Great Western Railway to Paddington, and drove thence to Buckingham Palace, escorted by a detachment of Lancers. The Queen arrived at Buckingham Palace at 12 o'clock, and in the afternoon held a Court, the first of the season, which was very numerously attended. Prince Arthur arrived at the Palace from Greenwich Park. After the Court the Queen drove out and visited the Princess Teck at Kensington Palace. In the evening Madame and Miss Van de Weyer dined with the Queen. The Princess Louisa, Prince Arthur, and Princess Henriette of Schleswig-Holstein, went to the Adelphi Theatre. Prince Arthur afterwards returned to Greenwich Park. On Thursday morning the Queen, accompanied by Princess Beatrice, visited the Zoological Gardens. In the afternoon her Majesty, accompanied by Princess Beatrice, visited the South Kensington Museum, and afterwards paid a visit to the Dean of Westminster and Lady Augusta Stanley at the Deanery of Westminster. The Right Hon. W. E. Gladstone had an audience of her Majesty. Yesterday afternoon the Queen held the first Levee of the season at Buckingham Palace. The new court-dress for gentlemen was first worn on this occasion.

THE PRINCE AND PRINCESS OF WALES IN EGYPT.—Immediately after the departure of the Prince and Princess on their Nile tour unfavourable weather reached Thebes on the evening of the 16th ult., and proceeded on the 18th to the Second Cataract. On their return down the river the Prince and Princess will visit the Pyramids of Gizeh. The Viceroy, in anticipation of this visit, has made a fine broad carriage-road to the Pyramids, and has specially erected for their reception a pretty pavilion, which will afterwards be allowed to be used as an inn for travellers in general. The Prince and Princess have intimated to M. de Lesseps their intention of visiting the Suez Canal under his guidance, and the Viceroy will give a series of truly regal fetes in honour of their stay in Cairo. Preparations are

making, among other places, in the gardens and palace of Kobbe, near the racecourse on the plain of the Abasieh, for a *fête champêtre*, to end with races.

THE PRINCESS CHRISTIAN is doing well, and making favourable progress towards recovery. The infant Prince is quite well.

COURT ARRANGEMENTS.—It is announced that the Levee announced to be held at St. James's Palace on the 19th inst. by Prince Arthur on behalf of the Queen has been postponed to Saturday, April 3. Her Majesty will hold Drawing Rooms at Buckingham Palace on Thursday, April 8, and Tuesday, May 11. Her Majesty's Birthday will be celebrated on Saturday, May 29.

PRINCE ARTHUR.—It is reported in Canada that Prince Arthur will shortly proceed to Canada to join the Canadian Rifles.

THE CABINET.—A Cabinet Council was held on Saturday, in Downing Street.

PARLIAMENTARY MOVEMENTS.—It was announced on Wednesday in the House of Commons that if the state of public business will allow, the Easter recess will be from Tuesday, the 23d inst., to Thursday, April 1. On Thursday a new writ was issued for Bradford, in the room of Mr. Ripley, unseated on petition. A motion for the issue of a new writ for Bewdley, vacant by the unseating of Sir R. Glass, was opposed by Mr. Muntz, who moved, as an amendment, the suspension of the writ for one year, by way of punishment for electioneering malpractices. After a long discussion the new writ was carried by 128 to 65. Mr. Cunliffe, the banker of London, will be the Conservative candidate for Bewdley, and will, it is said, be opposed either by Major Anson or Mr. W. C. Hemming in the Liberal interest.

TRIALS OF ELECTION PETITIONS.—Baron Martin on Tuesday gave judgment on the Salford petition, declaring that Messrs. Charley and Cawley, the Conservative members, were duly elected, but that no costs would be allowed, on account of the committee rooms in public-houses, the hire of cabs, and the employment of roughs. Mr. Justice Willes on Friday gave judgment on the Penryn and Falmouth petition, declaring that Messrs. Fowler and Eastwick were duly elected, that no corrupt practices had been proved, and that the petitioners must pay the costs. Mr. Justice Blackburn yesterday gave judgment on the Taunton petition, declaring that Serjeant Cox was not duly elected. A scrutiny followed, when Mr. James was declared by the Judge to be duly elected. In Scotland on Friday Lord Jerviswoode pronounced an interlocutor allowing the Wick Burghs petition to be withdrawn, and found the petitioner, Mr. Lockyer, liable in expenses. In Ireland, on Tuesday, Mr. Justice O'Brien gave judgment on the Youghal petition, to the effect that the charge of bribery was wholly unsustainable, but that Mr. Weguelin was guilty of treating. His lordship reserved for the Court of Common Pleas the question whether the treating proved was of a corrupt character, and considering the expenditure extravagant, ordered each party to pay his own costs. Mr. Justice Keogh, on Wednesday, gave judgment on the Galway petition, declaring that the sitting members were duly elected, but that each of the parties must pay his own costs. The Cambridge petition has been withdrawn. The Wigan case is now in progress. The following cases have been set down for hearing—Beverley, March 8; Hereford, March 9; Lynn, March 15; Oldham, March 15; Dover, March 20; Pembroke, April 1; Brecknock, April 7; Christchurch, April 13.

THE BISHOP OF SALISBURY during the last few days has been in such a state as to cause increased anxiety to his friends.

CONVOCAION.—In the Upper House of the Convocation of Canterbury, on Friday, it was agreed, after a long discussion, to appoint a committee to consider the report of the committee of the Lower House on the subject of pensions to disabled and retiring incumbents, and to report thereon. It was also resolved, on the motion of the Bishop of Oxford, that in case of a bishop's inability to discharge the duties of his office from age or bodily infirmity, he may, subject to the approval of the archbishop, pray her Majesty to appoint a coadjutor *cum jure successionis*, and with such proportion of the stipend as may hereafter be determined, and that provision be made to apply this principle to cases of mental infirmity. In the Lower House, on the address to the Crown being sent down from the Upper House, with alterations in the passage relating to the Irish Church, Canon Bakesley moved and Archdeacon Moore seconded, that the House do concur in the address as altered. Archdeacon Denison objected to some words in the altered clause, and with a view to the unanimity of both Houses, moved for a conference with their lordships. This was seconded by Canon Selwyn, and carried, after some debate, by 42 to 22. A conference accordingly took place, when the Upper House consented to alter that part of the address which related to the Irish Church by the insertion of the words—"That the issue may be directed by the good Providence of Almighty God." This was accepted by the Lower House, and it was then moved and carried that the address should go to the Queen as that of the "Bishops and Clergy." Both houses were then prorogued to June 15. In the Convocation of York an address to the Queen was adopted by a majority of 29 to 6, declaring that "the Convocation of York viewed with sorrow and alarm the proposed attempt to disestablish and disendow the Irish branch of the United Church of England and Ireland, and hoped that nothing would be done to hinder the spread of truth and promote error."

Foreign.

FRANCE.—In the sitting of the Legislative Body on Friday the debate on the contract between the City of Paris and the Credit Foncier of France was resumed. M. Rouher, the Minister of State, delivered a speech

in defence of the course pursued by M. Haussmann. Prefect of the Seine. In the course of his speech he stated that the Emperor was not responsible for the administration of the City of Paris, which was a political but an administrative question. He stated that there had been some irregularities in the particular the employment of guaranties, but that the most serious fault that had been made was the issue of 50,000,000f. the 100,000,000f. Advances for Public Works had been issued. The Minister concluded by stating that he was not opposed to the Chambers adding to the first paragraph of the B.L. so as to enable the City of Paris to contract loans in a direct manner, but would then be necessary that this should be sent back to the Committee. This speech was received with much applause, and the article was referred to the Committee. In the sitting of the 14th M. Du Miral laid on the table the article proposed by the Committee, authorising the City of Paris to issue a number of bonds required to produce 165 millions of francs, repayable in 50 years, the power to make the issue in successive amounts. The sitting of Tuesday the debate on the B.L. was resumed by M. Fremy, who declared that if the contract was not ratified the administration of the City of Paris would not regret it. He added, in reference to the illegal commissions the company are said to have received, that a meeting of the shareholders would be held, when a proposal for restitution would be submitted to them. The amendment of M. Fremy proposing that the municipality should issue a loan, was then considered. It was opposed by M. de Lesseps, who spoke in favour of an immediate issue of 150,000,000f. to 200,000,000f. The second issue of 265,000,000f. to be made subsequently. M. de Lesseps, Minister of Finance, said that it was to the credit of the City of Paris that the contract with the Credit Foncier should be maintained, and that the municipality should have at the same time power to issue bonds in order to reimburse the Credit Foncier in circumstances might be favourable for so doing. M. Picard, Thiers, Jules Favre, and others repeated speeches of MM. Rouher and Magne, and declared to abide by the contract would be to sanction illegalities which had been committed. M. de Lesseps' amendment was withdrawn by the member who proposed it, but was taken up by M. Leopold Jasson, and, on being put to the vote, was carried by a majority of 147 to 97. In the sitting of the 15th a proposal was made to send back the article to the Committee for reconsideration, but was rejected by a majority of 187 to 69. The article was adopted. The *Moniteur de l'Armée* contains an article opposing the idea of disarming France. It says that "France does not disturb either the peace or order of Europe, and at the same time she will not disarm." M. de Lesseps, long for some years past President of the Chamber and M. de Lamartine, the poet and statesman, in Paris on Sunday last. In the sitting of the Legislative Body on Monday several resolutions were passed the regret felt by the Chamber at the death of M. de Lamartine and M. Troplong, and that decrees have been issued ordering the funeral to be conducted at the expense of the State. The Chamber has opened a subscription list in its honour, and a statue to the memory of M. de Lamartine.

SPAIN.—In the sitting of the Constituent Cortes on Friday, Marshal Serrano, President of the Provisional Government, announced to the Chamber that all the members of the Provisional Government retained their seats in the House and took their seats on the benches. Marshal Serrano then delivered a speech in which he said that it was not necessary for the Government to announce a programme, as the principles laid down by the Resolutions of the 11th and 12th of February would be followed. He further declared that it was the intention of the Government to introduce Bills with a view to effecting economy in the expenditure, and that he reminded the country that it would be necessary to make sacrifices if it wished sincerely for the preservation of liberty. He promised that the liberal policy had been delayed in consequence of the war in Cuba should be speedily proclaimed. He also stated that no Bill would be introduced for consideration of the Cortes without having obtained for its introduction. In the sitting of the 15th a resolution for the appointment of a committee of 15 members to prepare the draught of a constitution was agreed to by a large majority. The members elected belong all to the majority. In the sitting of the 16th having taken part in the vote. In the sitting of the 17th Thursday Senor Castelar spoke in favour of to proclaim an amnesty for political offences. Sagosta, in reply, stated that the Government intended to celebrate the opening of the Cortes by granting an amnesty, but that this had been delayed in consequence of the conspiracy lately been discovered. He promised that as soon as the real motives of the Government had been discovered the Government would to the Cortes to proclaim an amnesty for political offences. The proposal of Senor Castelar was rejected by 135 votes against 94. The proposal of a Socialistic rising at Barcelona, but which was of that city discountenanced the plot, was suppressed, and 33 of the conspirators were arrested. Several Carlist partisans have been arrested at Girona, and Castellon, and proof has been given of their complicity in the rising at Barcelona. It is officially stated that the Republic has accepted the honorary presidency of the Cortes, and that Deputy members of which had been arrested in that country.

Prussia - The North German Parliament was opened on Thursday by the King in person. The Budget of 1871 is a summary of the Speech from the Throne.

that the prospect of the maintenance of the last assembly proved failures... A bill relative to the electoral law, with Art. 2 of the constitution of the German Empire, would be laid before the Reichstag... The Budget of 1871... The first duty of the Government will be to secure the maintenance of peace... The Minister of Finance on Friday submitted to the Lower House of the Prussian Diet a Bill embodying the financial arrangement with the City of Frankfurt-on-the-Main.

The Minister of Finance on Friday submitted to the Lower House of the Prussian Diet a Bill embodying the financial arrangement with the City of Frankfurt-on-the-Main, in accordance with which the Government grants to the municipality of that city the sum of 2,000,000 florins. He announced at the same time that the King would present the town with 1,000,000 florins out of his private purse, and he expressed a hope that this gracious act would win the hearts of the inhabitants of Frankfurt. The Bill was referred to a Committee, and in the sitting of Monday it was passed almost unanimously, in accordance with the Committee's report. The trial of Count Lesnasky for high treason, after having lasted six days was brought to a termination on Saturday in a sentence of imprisonment for three years.

Italy - The Judges of the Court of Appeal gave judgment last week on an important case which had been submitted to them as to the right of priests to marry, and therefore involving the question of the States independence of the Church and of the position of a priest in presence of the civil law. The Civil Tribunal of Salerno in June last had decided that a priest was always a priest, before whatever Court he presented himself, and was bound by the obligations he had assumed in that character. The Court of Appeal last week annulled that sentence; declared to be inadmissible the opposition which had been made to the celebration of matrimony between Signor Luigi Tola and Signora Marianna Montefusco, and directed that the ceremony should be proceeded with according to the law. This decision of so high a Court as that of the Court of Appeal at Naples is regarded as of more than local importance, and as certain to be cited as a precedent in all similar cases.

India - Sir Richard Temple will introduce the Indian Budget on the 7th, or, at the latest, on the 13th of May. A police post at or near Kohat had been captured by an incursion of one of the border tribes, in which three of our men had been carried off and one killed. A force had been ordered out for the punishment of the marauders. The son of the ex-Emperor has occupied two cities in Turkistan. On the receipt of this intelligence Abdul Rahman Khan immediately proceeded thither. An early interview between the Viceroy and Sher Ali is therefore considered probable. Accounts from Mallimgam state that in consequence of the anticipated drought for the next four months the Government has sanctioned four of Norton's American pumps being sunk in the bed of the river, which runs within 100 yards of the cantonment, and already at this early period quite dry.

China - The inhabitants of the villages near Shanghai, who attacked the crew of the British gunboat Cyclops, have been satisfactorily punished by a force comprising her Majesty's ships Icarus, Rinaldo, and three gunboats under the command of Commodore Jones. The details of the conflict which took place show that 85 natives were killed or wounded. Three British officers were wounded, but not seriously. The Cyclops has been destroyed and the force has returned to Hong Kong. The Chinese Government intends to appropriate all the tonnage dues, averaging 300,000 taels annually, towards improving the navigable waters of the country. The Leander has made the fastest run of the season from England to China, she having performed the passage in 95 days.

Japan - An engagement has taken place between the Southern (Mikado's) troops and 900 Northerners. The former suffered a complete defeat, and fled in confusion. The German ship Cornelia has been lost. The crew were rescued by Japanese.

UNITED STATES. - On Thursday, being the day appointed for the retirement of Mr Johnson and the entry of General Grant into the office of President of the United States, the late President issued a valedictory proclamation, defending his administration, and asserting that honesty and sincerity had been the rule of all his actions during his presidency. The Fortieth Congress adjourned on the same day. The new Congress

then assembled. Mr James Blaine, the Republican candidate, was elected Speaker of the House of Representatives. At noon General Grant took the oath of office as President, and issued an inaugural proclamation, stating that he shall have a policy to recommend, but none to enforce against the will of the people; that there must be no repudiation of a single farthing of the public debt, which must be paid in gold; that the revenue must be faithfully collected and accounted for; and that in regard to foreign policy, he will deal with nations as equitably as the law requires that individuals should deal with each other. It is said that General Grant's Cabinet will include Mr. Adams, the late Minister in this country, and General McClellan as Minister of War; and that Mr. Motley or General Sherman will probably be offered the post of Minister to the Court of St James. The Constitutional Amendment enacting negro suffrage has passed Congress, and been sent to the State Legislatures for ratification. Kansas and Louisiana, Missouri, Nevada, and West Virginia, have already ratified it. General Schenck's Finance Bill was passed by the Senate on Sunday by a majority of 29 to 16. It had previously passed the House of Representatives, but was sent back to that body for its concurrence in certain amendments, upon which the House asked for a conference, the result of which was that the Bill was finally passed by Congress substantially as it was passed by the House of Representatives. The Bill in its present shape declares the faith of the United States to be solemnly pledged to pay in coin all the obligations of the United States, except in cases where the law authorising their issue expressly provides that the same may be paid in greenbacks. The Senate, by a majority of 26 to 22, has refused to repeal the Tenure of Office Bill, which had been previously repealed by the House of Representatives. On Wednesday the House unanimously passed a resolution expressing sympathy with the efforts of the Spanish people to establish liberty, and with the struggle of the Cubans to achieve their independence, at the same time authorising the President to recognise the independence of Cuba, as soon as a *de facto* Government shall have been established. The bodies of all the persons executed for complicity in the assassination of Mr. Lincoln, with the exception of that of Payne, who attempted to kill Mr Seward, have been delivered to their friends, and have received Christian burial. The body of Booth was taken away very quietly, and has been interred in a grave by the side of his father's in Baltimore. The body of Payne has not been applied for, his relatives, it is said, are all dead.

BRAZILS AND PARAGUAY. - Intelligence from Paraguay states that Lopez is fortifying the interior. No fresh movement has been made by the allies. The Marquis de Caxias and Viscount de Herval have retired from their military commands.

Parliament.

IN the House of Lords on Friday, the Earl of KIMBERLEY, in explaining the Government Bill for the further suppression of criminal offences, briefly sketched the course of legislation since penal servitude had been substituted for transportation, and the results which had followed the employment of convicts in reproductive labour, and the police supervision of licensed convicts. From these results he drew the conclusion that the present system, whatever its faults, had been upon the whole successful. If, therefore, he were asked, why further legislation was necessary, he would answer that the facilities for crime and escape from detection were increasing; while the state of the criminal classes, who constituted a vast army waging war on society, was also such as to demand consideration. Deprecating the infliction of imprisonment for life, he insisted on the full sentence of penal servitude being carried out, and urged that prisoners for life too old for the public works, and criminal lunatics who, after years of confinement, might become sane, ought to have some remission. The Bill proposed to extend police supervision, and to throw on the criminal the burden of proof that he was leading an honest life. A register would be kept of all the licenses granted, and any person holding one might be summoned by the police before a magistrate, and called upon to show that he was earning an honest livelihood. If he failed to do so, he would be remitted to undergo his original sentence. In the case of persons convicted of felony a second time, it would be a part of the sentence that they should be subject to police supervision for seven years, during which they might be summoned by the police to show that they were pursuing a decent calling, and in default be imprisoned for one year. A similar provision would apply where licensed convicts were found in suspicious circumstances and about to commit a crime. For third convictions the sentence would never be less than seven years' penal servitude. The receivers of stolen property, after a first conviction, would be required to show that the goods were not stolen, and would not be allowed to plead simple ignorance of the fact. The Bill also dealt with the case of vagrants, and with cases of brutal assaults. It would not interfere with the liberty of the innocent, while it would circumscribe the movements of criminals and greatly strengthen the administration of justice. The Earl of SHAFTESBURY and Lord HOUGHTON expressed a general approval of the scheme; while Earl GREY recommended that it should be referred to a Select Committee. The Marquis of SALISBURY hoped that the great and novel principles of the Bill would be left to a Committee of the whole House. Lord CAIRNS concurred in this view, and urged the Government not to refer it to a Select Committee if it should pass the second reading. After some further discussion the Bill was read a first time. On Monday the House met for a short time, and having

read some private Bills a second time, immediately adjourned. On Tuesday the Earl of CLARENDON moved the second reading of the Brazilian Slave Trade Bill, the object of which was to repeal the Act of 1845, commonly known as the "Aberdeen Act." He said that for the past 12 years no slaves had been imported into the empire of Brazil, and it appeared equitable now to do away with an arrangement which cast a slur on a friendly Government, and which, indeed, when first introduced was not meant to be permanent. Lord CHAMBERS and Lord CAIRNS supported the Bill, and condemned the Aberdeen Act, on legal and international grounds, as a measure which would never have been contemplated in the case of a strong Government. The Bishop of OXFORD, whilst rejoicing at the extinction of the traffic in slaves with Brazil, hoped that the Government would turn its attention to the slave trade on the east coast of Africa. Earl GREY described the Aberdeen Act as one of the most useful that had ever been passed in the interests of humanity. Earl GRANVILLE also spoke in approving terms of the Aberdeen Act; but as its object had been fully accomplished, it was, he thought, time that it should be repealed. The Bill was then read a second time. The Common Law Courts (Ireland) Bill, on the motion of Lord DUFFERIN, was read a second time. On Thursday the Marquis of SALISBURY moved the second reading of the Parliamentary Proceedings Bill, the object of which was to enable their lordships to take up at the commencement of a new session business which they had been prevented, by the pressure of time, from completing in the session preceding. Earl GRANVILLE recommended their lordships to read the Bill a second time, and refer it to a joint committee of both Houses. The Earl of DERRY, Earl RUSSELL, and Lord CAIRNS supported the Bill, which was ultimately read a second time and referred to a joint committee. The Brazilian Slave Trade Bill passed through Committee. Yesterday Lord REDFORD moved for various returns relating to the Irish Church, but, at the suggestion of Earl GRANVILLE and Earl GREY, the motion was withdrawn. The House was left sitting.

In the Commons on Friday, in answer to Mr. MCCARTHY DOWNING and Mr. BLAKE, Mr. GLADSTONE said that the Government saw no prospect of being able to legislate this session on the relations of landlords and tenants in Ireland, and that it would not be expedient to declare a policy without being able to follow it up with a practical measure. Sir J. ELPHINSTONE called attention to the distress at Portsmouth, caused by the discharge of numerous workmen in the dockyard, and suggested that a certain number should be assisted by the Government to emigrate. Mr. STONE, Mr. J. D. LEWIS, Mr. M. CHAMBERS, and Mr. W. MARTIN, also pressed on the attention of the Admiralty the distress in the dockyard towns represented by them. Mr. CHILDERS, in reply, defended the course taken by the late Government in reducing the number of men employed in the Government yards, and claimed for the present Administration perfect freedom to carry out such economical reductions as they might consider desirable without impairing the efficiency of the public service. As to the suggested scheme for emigration, the Government could give it no kind of sanction. Mr. NEWGATE moved for a Select Committee to inquire into the operation of the Roman Catholic Charities Act and of the Act relating to the Registration of Burials, contending that both these Acts were systematically evaded by the Roman Catholic hierarchy. On a division the motion was negatived by 85 to 46. Mr. SELWIN-IBRETON obtained leave to bring in a Bill to amend the law for licensing beer-houses, and for other purposes. Mr. SYKES obtained leave to bring in a Bill for the preservation of sea birds of Great Britain during the breeding season, from the 1st May to the 1st August; and Mr. DENMAN obtained leave to bring in a Bill for the further amendment of the law of evidence. On Monday, in expectation of the debate on the Irish Church, the House was crowded in every part, while the galleries were filled with strangers, including numerous peers, both lay and spiritual. After the heads of the Acts relating to the Established Church of Ireland and Maynooth, and the first Resolution of last year had been read the House went into Committee, when Mr. GLADSTONE, amidst loud cheers from his supporters, moved that the chairman be directed to move for leave to bring in a bill to put an end to the establishment of the Church in Ireland, and to make provision in respect of the temporalities thereof, and in respect of the Royal College of Maynooth. After stating that among the general considerations which recommended the resolution for adoption, the foremost were the painful and bitter memories of ascendancy kept alive by the maintenance of an alien Church in Ireland, he reminded the House that it was now about to prosecute the unfinished labours of last session. The issue then raised had been clearly put, and had been decisively answered, and the resignation of the late Government was an emphatic confirmation of the judgment of Parliament and of the public. The existence of the Established Church in Ireland was adverse to the cause of religion itself, because it was essentially opposed to those principles of right upon which every religion should be based. The measure of disestablishment ought, he thought, to be prompt in its operation, as it would not be to the interest of the country that the Church Establishment should be subjected to the pain of a lingering death. It was also desirable that legislation should be final. The technical disendowment of the Church would therefore take place on the passing of the Act; but a period of about 18 months would be allowed for preparatory arrangements, and that time was proposed to be limited to the 1st of January, 1871. A further period might probably be required for the subsidiary arrangements necessary for the winding-up of the Establishment. The present

Ecclesiastical Commission would be brought to an end, and a new Commission would be appointed, the names of the commissioners being inserted in the Bill. This Commission was to endure for 10 years, which, in the opinion of the Government, was ample for all the numerous and diversified purposes which they would have to prosecute. Upon the passing of the Act the whole property of the Church would vest in the Commission, subject to life interests. It was proposed that appointments should be made, generally speaking, to spiritual offices without investing the person appointed with the freehold. With regard to episcopal appointments, it was proposed that they should be made by the Crown, but only on the prayer of the bishops themselves requesting the Crown to appoint some individual named by them. The next important enactment that would take place after the passing of the Act would be to remove all disabilities to the action of the Church, which would then be at liberty to revive Convocation, if so minded. After the removal of those disabilities, the bishops, clergy, and laity would constitute for themselves something in the nature of a governing body, and power would be given to her Majesty in Council to recognise by incorporation that body when created, as in the case of Canada. The right of the Irish bishops to sit in the House of Lords as peers of Parliament was too anomalous to be perpetuated, and all ecclesiastical corporations in Ireland would lapse on the 1st January, 1871. But it was proposed that although the ecclesiastical laws should lose their effect as laws, they should continue to be the terms of such voluntary contracts as might be used to bind the communion together. The Bill contained provisions respecting the interests of incumbents, curates (permanent and transitory), lay and municipal officers, advowsons, private endowments, churches, glebe-houses and lands, grave-yards, the winding-up of the Ecclesiastical Commission, and the sale of Church lands. The net incomes of incumbents would be ascertained, and be payable so long as they discharged their duties, or they might be commuted for life annuities. With respect to the private endowments proposed to be dealt with, it was intended to go back to the year of the Restoration (1660). The value of these endowments, in land, tithes, and money, did not exceed half a million sterling. The fabrics of the parish churches might be taken over on the simple declaration of the governing body that they intended to maintain them for public worship, or with a view to their being taken down and rebuilt in more populous or eligible places. With regard to the cathedrals, as they were national monuments of great historic interest, it was proposed that in respect to 12 of those buildings the Ecclesiastical Commissioners should be authorised to make a moderate annual grant out of Church property for their repair; but that in the case of other fabrics (such as the Glendolough churches), which it was no longer desirable to keep up for Divine worship, the Board of Works would look after them. The expenditure on the glebe houses of Ireland could be traced to amount to 1,200,000*l.*, irrespective of an outstanding charge of 253,000*l.*, and yet the annual value was returned at only 18,000*l.* per annum. The burial grounds would pass either with the churches or to the poor-law guardians. With reference to the University of Dublin, the Government did not intend at present to make any proposal to Parliament; but so far as the College of Maynooth and the recipients of the Regium Donum were concerned, it was proposed to give them compensation for life interests, or to commute at 14 years' purchase. Landlords would be allowed to redeem the rent-charge now payable by them at 22½ years' purchase, and if unprepared to purchase the money would be lent them at 3½ per cent. interest repayable by instalments. In selling proprietary rights, pre-emption would be given to tenants, and three-fourths of the purchase money would be left upon the security of the land, the liquidation to be by instalments, making the whole repayable in 28 years. The income of the Established Church might be taken at between 700,000*l.* and 800,000*l.* The financial result of disendowment would be as follows: The tithe rent-charge would yield 9,000,000*l.*; Lands and Perpetuity Rents, 6,250,000*l.*; Money, 750,000*l.*, making a total of 16,000,000*l.*; the present value of the property of the Irish Church. Of this the Bill would dispose of 8,650,000*l.*—viz.: Vested interests of incumbents, 1,900,000*l.*; curates, 800,000*l.*; lay compensation, 900,000*l.*; private endowments, 500,000*l.*; building charges, 250,000*l.*; commutation of Maynooth Grant and the Regium Donum, 1,100,000*l.*, and expenses of the Commission, 200,000*l.* There would, therefore, remain a surplus of between 7,000,000*l.* or 8,000,000*l.*; and after considering various schemes for disposing of this sum, the Government had concluded to apply it to the relief of unavoidable calamities and suffering not provided for by the Poor-law. They proposed to assign 185,000*l.* a-year to lunatic asylums, 20,000*l.* to idiot asylums, 300,000*l.* to training schools for the deaf, dumb, and blind, 15,000*l.* for the training of nurses, 10,000*l.* for reformatories, and 51,000*l.* to county infirmaries—in all 311,000*l.* a-year. He concluded his speech, which occupied upwards of three hours, by declaring that while he sympathised with the sacrifices the Irish clergy were called on to make he claimed for the Bill that, though it loyally carried out all his pledges, it treated them in a liberal and indulgent spirit. The task was one which would test the mettle not only of the Government but of every party and even every individual member, and by which the fame of the House must be sensibly affected for good or evil; but, notwithstanding its magnitude, he was sanguine that the close of the controversy was near at hand. Mr. DISRAELI declared, with much emphasis, that the opinion of the Opposition remained unchanged with respect to the policy involved in the question which

the Premier had brought forward with so much moderation, eloquence, and propriety. They looked upon disestablishment as a political error, and on disendowment—especially when accompanied by secularisation—as nothing short of mere and sheer confiscation. Under ordinary circumstances he should have opposed the introduction of the Bill, but, looking to the verdict of the country at the general election, and to the action of the late Government on that verdict, he would not oppose the motion, but he pressed for a delay of three weeks before the second reading. Mr. GLADSTONE declined to postpone it so long, and ultimately the second reading was fixed for Thursday fortnight, the 18th. Leave was then given to introduce the Bill, which was read a first time. On Tuesday Mr. W. E. FORSTER gave notice of a Bill for the regulation of the Cattle Trade. Mr. ACLAND moved for a Select Committee to inquire into the expediency of committing to some one department the duty of dealing with administrative and legislative questions affecting agriculture. After some discussion, in which Mr. GOLDNEY, Sir S. NORTHCOKE, Mr. PELL, Mr. NEWDEGATE, Lord HENLEY, and Lord F. CAVENDISH took part, Mr. BRIGHT recommended the agricultural interest to have as little as possible to do with Government departments, but promised that, if the Board of Trade and the Home Office could do anything in the direction of the motion, it should be done. With this assurance Mr. ACLAND expressed himself satisfied, and withdrew his motion. Mr. H. SHERRIDAN obtained leave to bring in a Bill to amend the Reform Act of 1867, by restoring the principle of compounding for rates. Mr. CRAWFORD obtained a Select Committee to inquire into the operation of the Poor-law in Scotland, and whether any and what amendments should be made therein. Mr. MLAGAN obtained leave to bring in a Bill to amend the Game Laws of Scotland; and Mr. HADFIELD obtained leave to bring in a Bill to amend the law which regulates the burial of Dissenters. On Wednesday the Bayswater Market and Baths Bill was thrown out without a division. The second reading of the Metropolitan Street Tramways Bill, after a long discussion, was carried by a majority of 209 to 78. Mr. T. HUGHES' Sunday Trading Bill was read a second time and referred to a select committee. Mr. FAWCETT moved the second reading of the Election Expenses Bill, the object of which was to throw the cost of elections upon local rates instead of upon the candidates. Mr. FLOYER moved as an amendment, that the Bill be read a second time that day six months. Mr. AYRTON, on the part of the Government, suggested that, as the whole subject was about to be referred to a Select Committee, the Bill should be read a second time and referred to that committee. Mr. FAWCETT declined to accept any compromise, and after a long debate the Bill was thrown out on a division, by the narrow majority of three, the numbers being 163 to 165. A first reading was given to Bills brought in by Mr. S. CAVE to amend the law relating to Life Assurance Societies; by Lord ELCHO to amend the Scotch Game Laws, and by Mr. BAZLEY to amend the Lands Clauses Consolidation Act in the matter of costs of arbitrations. On Thursday Mr. MOWBRAY gave notice that, on the order for the second reading of the Oxford and Cambridge Universities Tests Bill, he should move as an amendment that the Bill be read a second time that day six months; and Mr. HARDY, on behalf of Mr. DISRAELI, gave notice of a similar amendment to the second reading of the Irish Church Disestablishment Bill. The House went into committee of supply, when the CHANCELLOR of the EXCHEQUER moved a vote of 3,000,000*l.* on further account of the Abyssinian Expedition, and in doing so confessed that the rough accounts received from India did not enable him to answer the questions which might naturally be put respecting the causes of the increased expenditure. Mr. HUNT stated that the late Government had never received from India any information which led them to suppose that their original estimate would be exceeded until August last, when they were informed that it would be 5,000,000*l.*, and after the late Ministry quitted office, a telegram from India stated that it would be 7,000,000*l.* Mr. J. WHITE suggested that a Select Committee should be appointed to inquire who was responsible for the "monstrous calculations" which had deluded the public and the House of Commons. Sir P. O'BRIEN moved to postpone the vote until a Committee had ascertained the causes of the excess. But on Mr. GLADSTONE pointing out that the money had been spent by the Indian Government, and must be repaid, the amendment was withdrawn, and the vote agreed to. Mr. BRUCE moved for a Select Committee to inquire into the present modes of conducting Parliamentary and municipal elections, with the view of providing further guarantees for their tranquillity, purity, and freedom. He contended that the present system, if continued, would lead to a Parliament of rich men only. He adverted in detail to the numerous cases of intimidation and mob law which had prevailed at the recent elections, and said that a deep-rooted conviction had grown up in the public mind that the only remedy for these abuses was secret voting. He owned that recent events had changed his own opinion on the subject of the ballot, and that he was now in favour of an inquiry into the desirability of introducing it. After some observations from Mr. R. TORRENS, Mr. G. HARDY, and Mr. GLADSTONE, the motion was agreed to. Mr. W. FORSTER obtained leave to bring in a Bill to consolidate, amend, and make perpetual the Acts for preventing the introduction and spreading of contagious or infectious diseases among cattle and other animals in Great Britain. Lord R. MONTAGU obtained leave to bring in a Bill for amending the Pharmacy Act of 1868. Yesterday the ATTORNEY-GENERAL gave notice that on Friday he should move an address for a Royal Commission, to inquire into the corrupt practices at Norwich at the last election. Lord

EUSTACE CECIL moved a resolution that the Government should give early attention to the increase of food, drink, and drugs. The House was left empty.

City Intelligence.

OVEREND, GURNEY & Co. DISMISSED.—Mr Edward Watkins, the official assignee of the Court of Bankruptcy, has been dismissed from his office by order of the Chancellor. Commissioner Holroyd announced the fact in Court on Tuesday, and directed the Bankruptcy Act of 1861, under the provisions of which assignees are forbidden to hold any other employment, under pain of dismissal, and in consequence of his "deliberate violation" of this rule in the matter of Overend & Gurney.

MONEY MARKET, FRIDAY.—BRITISH CONSOLS closed at 92½ to 92¾ for Money, and 92½ to 91½ ex div.; Bank Stock, 242 to 244; India Five per Cent. Bills, par to 5s. pm.; India Five per Cent. Bills, 112½.—FOREIGN: Brazilian, 80½ to 81; Ditto Seven per Cent., 75½ to 76½; Egyptian (1864), 80½; Ditto Viceroy's Loan, 78½ to 79; Ditto 75½ to 76½; Italian, 56½ to 56¾; Tobacco Loan (1852), 85½ to 86; Portuguese, 36½ to 37; Peruvian, 80½ to 80¾; Orel-Vitebsk, 81½ to 82½; Spanish, 31½ to 32½; Honduras, 85 to 87; United States 5-20 Bonds (1855), 81 to 81½; Erie, 24½; Hanover,

Metropolis and its Vicinity

ACCIDENT AT BUCKINGHAM PALACE.—During the levee held yesterday by her Majesty at Buckingham Palace, the horse of Mr. Percy Howard, while passing the entrance of the Palace took fright at the sight of the Guards' band, and dashed along the crowded thoroughfare at a furious pace. Mr. Howard was thrown from the saddle, and the horse knocked a woman and child, and so injured them as to necessitate their removal to the hospital. It then ran into the iron railing which encloses the Palace, and knocked down about 10 feet of the massive ironwork.

OXFORD AND CAMBRIDGE BOAT RACE.—It was announced on Saturday that the presidents of the two Universities had fixed the boat race for Wednesday, March 17, at four in the afternoon, as the day when the practice on metropolitan waters will be most improve the crews, but it seems that no other day is practicable.

THE FENIAN PRISONERS.—On Thursday the Mayor of Dublin presided at a conference held at the Charing Cross Hotel between the representatives of the English and Irish committees, which have been established for promoting an amnesty of the Fenian prisoners. It was stated that the Irish petition had been signed by 200,000 persons, and that one was to be presented yesterday at the Leves by Mr. Baines, M.P. for Leeds, bore 7000 or 8000 signatures. After considerable discussion, in which several members of Parliament took part, resolutions were adopted in favour of using all constitutional means to obtain amnesty, and it was agreed to organise a deputation of members of Parliament, mayors, and other public representatives to present English and other petitions to the Prime Minister on the 10th of April.

THE DOUBLE MURDER IN POPLAR.—The body of John William Cooper, the supposed murderer of his wife and her father, was picked up yesterday morning by a waterman, off Shadwell Dock Stairs. It was in a very decomposed condition. He was in the same dress as when he left home on the evening of the murder, and there were no marks of violence.

MURDER AND SUICIDE AT BLACKWALL.—On Wednesday a widow named Browne and her daughter had kept for 20 years a small confectionery shop in High Street, Poplar, were found with their throats cut in such a manner that their deaths must have been instantaneous. A married man, called Bradshaw, had until recently lodged with them, was suspected, and on going to his house in Campbell Row, Blackwall, was also found with his throat cut, and the knife used was found to fit a sheath found beneath the body of Mrs. Browne. It is said that for some time past there has been in the habit of receiving love letters from a young married woman, whose family a few days ago received an anonymous package containing the letters in question. It is conjectured that Mrs. or Miss Browne may have sent the love letters of the married lady to her family, and that Bradshaw may have killed both of them out of revenge.

THE PUBLIC HEALTH.—The weekly returns of the Registrar-General states that in the week that ended on Saturday, Feb. 27, 15,000 births and 3267 deaths were registered in London and in 13 other large towns in the United Kingdom. The annual rate of mortality was 26 per 1000 persons living, being 23 per 1000 in London, 33 in Edinburgh, 29 in Dublin, 21 in Bristol, 21 in Birmingham, 26 in Liverpool, 29 in Manchester, 30 in Salford, 32 in Sheffield, 23 in Bradford, 26 in Leeds, 26 in Hull, 27 in Newcastle-upon-Tyne, 30 in Glasgow. The rate in Vienna was 26 per 1000 during the week ending the 20th ult., and in Berlin 31 per 1000 during the seven days ending the 25th ult. In London the births of 117,000 and 1070 girls, in all 223,000 children, were registered the week. In the corresponding weeks of 1869-70, the average number, corrected for increase of population, was 2306. The deaths registered in London during the week were 1419. It was the 5th week

of the year, and the average number for that week, corrected for increase of population, was 1585. The present return is therefore 166 below the estimated amount.

Provincial.

WELLSBURY.—Early on Sunday morning a woman named Brown was found in a field at this place dead; her person had been violated, and more than a dozen pieces of furniture under had been forced into her body. Her dress showed that she had been engaged in a struggle with the perpetrators of the crime. The body where the body was found is 150 yards from the house. The deceased, who has led a life of intemperance, was seen drunk at 11 o'clock on Saturday night. Her husband is at this moment in Staffordshire. An inquest was opened on Monday, and adjourned for a week. A man called William Hull, a sinker, was arrested on Thursday at Darlaston on suspicion, and a search of the miller found with the body was discovered in his cottage.

Ireland.

THE CASE OF THE HON MISS FRENCH.—On Monday Miss French attended in the Court of Queen's Bench, and expressed her wish to go with her mother. The Lord Chief Justice said she was free to do so, and anybody who interfered with her would be attached for contempt of Court. She drove away with her mother, Lady French, who was waiting for her at the entrance of the Court.

A STATION-MASTER SHOT.—On Wednesday night Mr. Anketell, the station-master at Mullingar, was shot near his own door, he was fired at and desperately wounded. Seven slugs lodged in his chest, and eight entered the wall near him. A bundle of hay, which the assassin used to kneel on to raise himself, was found behind the garden wall. It is supposed that he is a railway policeman whom Mr. Anketell had reported for insubordination. The railway company have offered a reward of 200l. for the discovery of the perpetrator.

Railways.

ACCIDENT ON THE GREAT EASTERN.—On Thursday week a fatal accident occurred in Bethnal Green to a party of workmen employed by Messrs. Lucas, the contractors for effecting some repairs for the Great Eastern Company. While a number of men were at work under one of the arches, a heavily-laden coal-truck passed over it, when the arch gave way and buried them in a mass of bricks, iron, and timber. Fourteen men were dug out alive, but more or less injured; and five others were frightfully mutilated, and quite dead. The accident is attributed to the weakness of the arch by the operations of the men and the neglect of putting in proper supports while the work was going on.

Obituary.

FIELD-MARSHAL VISCOUNT GOUGH, one of the few surviving officers who served under Sir Arthur Wellesley, Sir Ralph Abercromby, and Sir Stapleton Cotton, died on Tuesday morning, at St. Helen's, Booterstown, near Dublin, in his 90th year. He was born at Woodstown, in the county of Limerick, in 1778, and at the age of 13 obtained a commission in a regiment of militia, of which his father was the colonel. He was afterwards transferred to the Line, his first regiment being the 10th Foot, on the disbanding of which he passed to the 8th Highlanders, which he joined in 1795 at the Cape of Good Hope, in time to take part in the capture of that place and of the Dutch fleet in Saldanha Bay. He next served in the 7th Royal Irish Fusiliers, in the West Indies, at the attack on Fort Roco, the capture of Surinam, and in the brigand war in St. Lucia. In 1800, he proceeded to the Peninsula, to join the army under the Duke of Wellington. He took part in the operations before Oporto, the battle of Talavera, where he was severely wounded, in the attack on Barossa, the defence of Larifa, the battles of Vittoria and Nivelles, when he was again severely wounded. For his services on this occasion he was rewarded with the Order of St. Ferdinand, and shortly afterwards received the Order of St. Michael from the King of Spain. For his services at Tarifa and Vittoria, his countrymen, proud of him as an Irishman, presented him with the freedom of the city of Dublin, and with a considerable sum of money. In 1837 he proceeded to India to take the command of the Mysore Division of the army, and in 1840 he was sent to China to command the operations against the rebels. On the conclusion of the Treaty of Nankin, in 1842, the British troops were withdrawn, he was created a Knight and invested with the Grand Cross of the Bath. He received the thanks of both Houses of Parliament and of the East India Company, for his services in China, the Duke of Wellington proposing the vote in the Lords and Lord Derby in the Commons. In 1843, Sir Hugh Gough was appointed to the command of the Forces in India. He arrived in 1843, and having gained the two important victories of Mithanpore and Punia, Lord Ellenborough was enabled to conclude peace under the walls of Gwalior. His next important operations were against the Sikhs in the Punjab, where he was seconded by his gallant Peninsular comrade, who was then the Governor-Generalship—the late Lord Hardinge. The Sikhs had long shown signs of intended mischief, and in 1845 they forced on a rupture with the Indian Government, and crossed the Sutlej in vast numbers. The Governor-General immediately volunteered to serve under his old comrade, and arms Sir Hugh Gough, who accepted the office, and was supported by Lord Hardinge, gave battle to the Sikhs at Moodkee on the 18th of December, and on the 11th at Ferozshah, where he carried by assault the entrenched camp of the enemy, with ammunition, stores, and 70 pieces of cannon. This he followed up by a third and more decisive battle, that of Subram, on the Sutlej, which was speedily followed by the total rout of the Sikhs and a peace dictated on terms before Lahore. The Sikhs having laid down their arms it was hoped for ever, Sir Hugh Gough was created a Peer in 1848, as Baron Gough, of Chinkinfoo in China, and of Matarajpet and the Sutlej in the East Indies, in the peerage of the United Kingdom. But the Sikhs, though subdued for the time, were not conquered. In 1848 the ashes of the Sikh war broke out into flame again, and Lord Gough was forced once more to take the field. With the

dash and energy of a far younger man he went out to meet them, and defeated them a fourth time at Rainnuggur, and again at the sanguinary and indecisive battle of Chillianwallah. His crowning victory was at Gojerat, where the Sikh power was finally and decisively broken, and the fugitives were pursued by Sir Walter Gilbert beyond the Indus, and outmarched as well as defeated, had to lay down their arms. Upon Lord Gough's return to England he was advanced to a Viscountcy, by the title of Viscount Gough of Gojerat, in the Punjab, and of the city of Lincoln, and at the same time he again received the thanks of both Houses of Parliament, together with a pension of 2000 a year for himself and his two next successors in the peerage. The East India Company followed the example of the Imperial Legislature, voting him their thanks and settling on him a corresponding pension, and the City of London conferred on him its freedom. From that date Lord Gough saw no active service; but the nation did not forget him. He was appointed Colonel in Chief of the 6th Rifles in 1854, in the following year he succeeded Lord Raglan as Colonel of the Royal Horse Guards, and in the year 1856 he was sent to the Crimea to represent her Majesty on the occasion of the investiture of Marshal Pelissier and a large number of our own and of the French officers with the insignia of the Bath. In 1857 he was installed a Knight of the Order of St. Patrick, being the first knight who did not hold an Irish peerage. In 1859 he was sworn a Privy Councillor; in 1861 he was nominated a Knight Grand Commander of the Star of India, and was appointed to the honorary colonelcy of the London Irish Rifle Volunteers; and in November, 1862, he received the latest reward of a long life spent in the service of his country, in the shape of a Field-Marshal's baton. He married, in 1809, the daughter of General Stephens, but was left a widower five or six years since. By her he had four daughters (one of them the wife of the present Governor of Malta, Lieut. General Sir Patrick Grant, G.C.B.), and also an only son, the Hon. George Stephens Gough, of Rathronan House, Tipperary, formerly captain in the Grenadier Guards, who was born in 1816, and has been twice married. By his second wife, who was a Miss Arbuthnot, he has a youthful son.

LORD WYNFORD died at his residence in Park Place, St. James's, on Monday. His lordship William Samuel Best, Baron Wynford, of Wynford Eagle, Dorset, in the peerage of the United Kingdom, was the eldest son of Sir William Draper Best, who was elevated to the peerage on his retirement from the office of Chief Justice of the Common Pleas. He was born in 1778, and consequently had just completed his 71st year. He was educated at Eton, and at Brasenose College, Oxford, where he took the degree of Bachelor and Master of Arts, and shortly after was taken to the Bar at the Inner Temple. He sat in the Parliament of 1831-32 as the Conservative M.P. for the borough of St. Michael's, Cornwall, which was disfranchised by the first Reform Bill. He was a magistrate for Dorsetshire, and patron of one living. He married, in 1821, the daughter of Mr. William Thoyta, of St. Hampstead, Berkshire, by whom he had two daughters and five sons. The title and estates devolve on his eldest son, the Hon. William Draper Mortimer Best, a magistrate and deputy-lieutenant for Dorset, and late captain in the Rifle Brigade. He was born in 1826, and married, in 1857, the eldest daughter of Mr. Evan Baillie, of Duchfour, and grand daughter of the fifth Duke of Manchester.

MAJOR CHARLES FREEMAN SANDHAM, R.A., one of the few remaining survivors of the Waterloo officers, died on the 14th ult. at Rowell, Sussex, aged 86. He served in the campaign of 1799 in Holland, being then present at four engagements; afterwards in the expedition to Copenhagen, in 1807, then in Sweden, and afterwards, under Sir John Moore, in the retreat of Corunna. He subsequently served in the expedition to Walcheren, in 1809, in the campaign in Holland, in 1814; in Flanders and France, in 1815, including the battle of Waterloo, in which he commanded a battery of artillery.

DEATH.—On Saturday, February 27th, THOMAS BLOMFIELD FAIRHEAD, of the firm of Fairhead & Son, Borough Market, aged 32 years.

Markets.

COVENT GARDEN.—March 6. The imports have increased largely during the last few days, and now comprise Asparagus, French Beans, Carrots, Artichokes, Green Peas, Lettuces, and Endive. There has also been some Pine from St. Michael's, but not near so good as they were last year. Strawberries are now regularly supplied, and realise 3s. per oz. Flowers chiefly consist of Orchids, Primulas, Cinerarias, Mignonette, Heaths, Cyclamens, Tulips, Crocuses, Snowdrops, Calla aethiopica, Cytisus racemosa, Hyacinths, Lily of the Valley, Deutzias, Pelargoniums, Fuchsias, Violets, and Wallflowers, &c.

FRUIT. Apples, per bushel, 4s to 6s; Grapes, per lb., 8s to 12s; Kent Cobs, per lb., 1s to 1s 6d; Lemons, per 100, 4s to 7s.

VEGETABLES. Artichokes, green, p. doz 4s to 6s; Beans, Kidney, p. 100, 1s to 2s; Beet, per doz., 1s to 2s; Cabbages, per doz., 1s to 2s; Carrots, per bunch, 6d to 10d; Cauliflowers, Cornish, p. doz., 2s to 4s; Celery, p. bunch, 1s 6d to 2s 6d; Cucumbers, each, 1s to 2s; Endive, per doz., 1s 6d to 2s; Garlic and Shallots, per lb., 6d; Herbs, per bunch, 2d to 4d; Horse Radish, p. bunch 3s to 5s; Leeks, per bunch, 2d to 4d.

HAY.—Per Load of 36 Trusses. SMITHFIELD, Thursday, March 4. Best Green Hay ... 115s to 126s; Prime Meadow Hay 107s to 115s; Inferior do. ... 90 100; New do. ... 30 36; Straw ... 30 36.

CUMBERLAND MARKET, Thursday, March 4. Sup. Meadow Hay 110s to 118s; Inferior do. ... 92 98; New do. ... 40 43; Superior Clover ... 120 132.

WHITEHAPPEL, Thursday, March 4. Fine Meadow Hay 108s to 112s; Inferior do. ... 95 100; Prime New Hay ... 30 34; Inferior do. ... 30 34.

COALS.—March 3. Walls End Hetton, 17s; Walls End Hetton Lyons, 14s; Hollywell Main, 15s; Hastings Hartley, 14s 6d; Wylam, 15s; Walls End Harton, 14s; Walls End Haswell, 17s; Walls End Trimdon Thornley, 14s 6d; Brancepeth Cannel, 17s 6d.

METROPOLITAN MEAT MARKET.—March 6. Best Fresh Butter ... 19s. per dozen lb.; Second do. do. ... 16s.; Small Pork, 4s. 8d. to 5s. 4d.; Large Pork, 4s. 0d. to 4s. 6d. per 8 lb.

LEADENHALL AND NEWGATE POULTRY, &c. THURSDAY, March 4. We have no change to make in the prices of last week. Geese ... each 6 0-7 0; Pigeons ... each 1 0-1 4; Tame Rabbits ... 1 4-2 0; Wild Rabbits ... 0 9-1 3; Ducks ... 2 6-3 6; Pheasants ... 2 6-3 3; Ducklings ... 3 6-4 0; Teal ... 1 0-1 6; Wild Ducks ... 2 0-2 9; Snipes ... 3 0-3 6; Partridge Fowls, couple ... 8 0-12 0; Hares ... 1 0-1 9; Do. do. ... 8 0-9 0; Plovers ... 9 0-10 6; Barn-door Fowls, ... 6 0-9 0; English Eggs, p. 100, ... 8 0-8 6; Partridges ... each ... Foreign do. ... 8 0-8 6; Fresh Butter, 1s. 3d. to 1s. 6d. per lb.

HOPS.—BOROUGH MARKET, March 5. Messrs. Pattenden & Smith report an improved demand for foreign of all descriptions, at slightly enhanced prices. The best sorts of English are also in fair request, and rule firm in price.

ENGLISH WOOL. We have a flat market, and prices in some instances are with difficulty sustained. Some of the better grades of half-breds and also good Kent and superior Down fleeces are, however, in small supply, and held at full rates. CURRENT PRICES OF ENGLISH WOOL. per lb.—s. d. s. d. FLEECES.—Southdown hoggets ... 1 4 to 1 5; Half bred ditto ... 1 4 1/2 to 1 5 1/2; Kent Fleeces ... 1 5 to 1 5 1/2; Southdown ewes and wethers ... 1 4 to 1 4; Leicester ditto ... 1 1 to 1 1 1/2; SORTS.—Clothing ... 1 0 to 1 8; Combing ... 1 2 to 1 10.

METROPOLITAN CATTLE MARKET. MONDAY, March 1. We have a few more Beasts than on Monday last; they are in demand, and prices are not lower. The number of Sheep is larger, but is accounted for by the foreign Sheep being allowed to come to the market. The trade is quite as good as of late, in fact, in some instances prices are better. Calves are selling at about late rates. Our foreign supply consists of 1970 Beasts, 6950 Sheep, and 121 Calves, from Scotland there are 258 Beasts; from Ireland, 190; from Norfolk and Suffolk, 1100; and 452 from the Midland and Northern Counties.

Best Scots, Herefords, &c. ... 5 4 to 5 8; Best Shorthorns ... 5 2 to 5 4; 2 1 quality Beasts ... 4 4 to 4 6; Best Downs and Half Breds ... 6 4 to 6 8; Do. Shorn ... 4 0 to 5 4; Beasts, 3970; Sheep and Lambs, 21,730; Calves, 128; Pigs, 140.

THURSDAY, March 4. The number of Beasts is about the same as on Thursday last. The trade is not brisk, but generally Monday's quotations are realised. The supply of Sheep is larger, nearly half of it, however, is from abroad, and these have not lately been allowed into this market; English consignments are smaller than for a long time past. Prices are quite as good as on Monday. Good Calves are still very dear, but inferior are lower. Our foreign supply consists of 614 Beasts, 3810 Sheep, and 124 Calves.

Best Scots, Herefords, &c. ... 5 4 to 5 8; Do. Shorn ... 4 0 to 5 4; Best Shorthorns ... 5 2 to 5 4; 2 1 quality Beasts ... 4 4 to 4 6; Do. Shorn ... 4 0 to 5 4; Best Downs and Half Breds ... 6 4 to 6 8; Calves ... 3 8 to 6 0; Pigs ... 3 4 to 5 4; Beasts, 1010; Sheep and Lambs, 8690; Calves, 180; Pigs, 20.

POTATOS.—SOUTHWARK, Monday, March 1. During the past week the arrivals coastwise, by rail, and from abroad have again been in excess of the demand. Trade sluggish. The following are this day's quotations:—Yorkshire Regents, per ton, 50s. to 90s.; do. Flukes, 60s. to 110s.; Lincolnshire Regents, 60s. to 80s.; Dunbar and East Lothian do., 60s. to 110s.; Perth, Forfar, and Fife do., 60s. to 80s.; do. Rocks, 50s. to 60s.; French and Belgian Whites, 40s. to 60s.

MARK LANE.—Monday, March 1. There was a small supply of English Wheat to this morning's market. Millers showed but little disposition to purchase, and a portion only was disposed of at about the prices of this day's market. There was a fair attendance, but the business done in foreign was quite of a retail character, and the sales effected were in favour of buyers. For malting Barley there was scarcely any inquiry, grinding was unaltered in value. There was no change in Beans or Peas. Oats were a slow sale at a decline of 6d per qr. Flour met with but little attention.

PRICE PER IMPERIAL QUARTER. s. s. s. s. WHEAT, Essex, Kent, Suff. lk. White 52-55 Red ... 47-50; — fine selected runs do. 55-56 Red ... 49-52; — Talavera ... 62-65; — Norfolk ... Red ...; — Foreign ... 43-66; BARLEY, grind. & dist. 37s to 39s. Chey. 46-51 Malting ... 44-49; — Foreign grinding and distilling 25-28 Malting ... 38-43; OATS, Essex and Suffolk ... 25-33 Feed ...; — Scotch and Lincolnshire Potato 30-32 Feed ... 23-29; — Irish ... Potato 30-32 Feed ... 21-26; — Foreign ... Poland and Brew 25-30 Feed ...; RYE MEAL, Foreign ... 40-42 Foreign ...; RYE MEAL, Foreign ... 44-45; BEANS, Mazagan 37s to 41s. Tick 44-45 Harrow ... 44-45; — Pigeon ... 45s to 49s ... Winds ... Longpod ...; — Foreign ... Small 40-45 Egyptian ... 41-44; PEAS, White, Essex, and Kent. Boilers 43-49 Suffolk ... 48-50; — Maple 44s to 48s ... Grey 42-44 Foreign ... 40-44; MAIZE ... 44-47; FLOUR, best marks delivered ... per sack 43-44; — 2d ditto ... ditto 34-44 Country ... 34-44; — Foreign ... per barrel 24-30 Per sack ... 43-46.

FRIDAY, March 4. The weather during the past week has been more wintery than of late; rain and snow have fallen, the temperature has decreased, and we had a couple of days' frost, rather severe in some parts, but since last night it is milder. The grain trade throughout the kingdom has been slow, the failures in the North increasing the general dullness and tending to produce a further reduction of 1s. per qr. in the value of Wheat. We observe no further decline in the quotations of best malting

THE HORTICULTURAL DIRECTORY FOR 1869.

EDITED BY ROBERT HOGG, LL.D., F.L.S.,

Co-Editor of the "Journal of Horticulture and Cottage Gardener," &c.

THE "Horticultural Directory" will be a complete Register of the Addresses of all the most important establishments and persons connected with the gardening interest in the United Kingdom and on the Continent, and will consist of:—

London Seedsmen and Florists Nurserymen, Seedsmen, and Florists residing within the postal districts of the Metropolis. County List of the Nurserymen, Seedsmen, and Florists in England and Wales; ditto, ditto, in Scotland; ditto, ditto, in Ireland; ditto, ditto, in the Channel Islands.

Suitable Advertisements will be received at 40s. for one Page; 25s. one Half; and 15s. for one Quarter of a Page.

As the space is limited, instructions and copy are requested prior to March 24

"JOURNAL OF HORTICULTURE" OFFICE, 171, FLEET STREET, LONDON, E.C.

free trade, but only to propose, as a certain reforms of the customs duties. The Republicans asked the Government by what right the Duke of Montpensier was still Captain-General of the Duchy of Brittany, a title given for family considerations and not for military achievements should be abolished, and that the Duke of Montpensier should be neither Marshal nor King. The Duke, in reply, said that the Duke of Montpensier's position was made by the late dynasty, by which he was banished, and that the Provisional Government did not intend to relieve him of his rank of Marshal. The question, he said, had been raised with the object of eliciting the views of the Government as regards the candidature to the throne. Senor Figueras and Castellar (Republicans) then delivered speeches violently attacking the Duke of Montpensier. Admiral Topete defended the Duke, and said that his Royal Highness at the time of the war in Mexico wished to proceed to Africa, but was not permitted to do so. He added, that if the Duke did not proceed to Cadix on board the frigate Saragossa, at the outbreak of the insurrection in September last, it was because he (Admiral Topete) did not think it a proper course to be pursued. He concluded by stating that of the Republic and the Duke of Montpensier he personally preferred the latter. Marshal Serrano said that the declaration just made by Admiral Topete was his personal opinion; that it was not yet time to discuss the question of the candidature to the throne, and that the Government and the country were bound to respect the supreme decision of the Constituent Cortes. Senor Sagosta brought forward a Bill of Amnesty for Newspaper Offences. In the sitting of Wednesday the Cortes rejected a proposal to abolish the tax, and adopted unanimously Senor Sagosta's Bill of Amnesty for Newspaper Offences, which puts an end to all prosecutions now pending. In the sitting of Thursday, Senor Figuerola brought in a Bill to raise a loan of one thousand million reals in cash, to be issued in bonds of the consolidated external debt.

PORTUGAL.—In accordance with a decree promulgated on Thursday, the Government has taken possession of the South-Eastern Railway and its dependencies, and conceded to the company an indemnity of about 100,000,000, subject to the approval of the Cortes. The British squadron has sailed from Lisbon for a cruise of 30 days on the coast of Portugal.

BERLIN.—Cabinet Councils were held on Wednesday and Thursday, at which the King presided. It is stated that the object of these meetings of the Ministry was to examine the question raised by the railway difficulty between France and Belgium. In the sitting of the Chamber of Representatives on Saturday the Bill for the abolition of imprisonment for debt was adopted by a majority of 101 to 12. An amendment, which was proposed with a view to maintain imprisonment in certain cases, such as the condemnation of newspapers to damages, was rejected by 56 to 43. On Wednesday the Senate adopted by a majority of 32 to 23 the Budget of the Minister of Finance, which they rejected on the 24th ult. The appeal of the Prosecutor-General against Mr. Douillon was rejected by the Court of Cassation on Monday.

HANOVER.—The ex-King of Hanover has addressed a harsh protest to all German Sovereigns against the late adoption by the Prussian Diet for the confiscation of his private property. It is said that the Emperor of Russia has invited the King to pay a visit to St. Petersburg.

PARIS.—The Ministry closed the session of the Chamber of Deputies on Saturday by order of the King. The speech from the Throne read on the occasion said that the Government had acquired the conviction that, in order to maintain the balance between opposite but equally well-founded opinions was to be found the true source of the constitutional development of Parliamentary life. The Minister of Finance thanked the Diet for its approval of the Budget, and promised to bear in mind the necessity of the exercise of economy in order to restore the balance between the revenue and the expenditure. The speech also expressed thanks for the adoption of the Bill relative to the financial arrangements with the city of Frankfurt; and, after mentioning the various measures that had been given to improvements in the administration of justice and the reforms effected in the laws concerning the different provinces of the Empire, it concluded with a promise that next session fresh measures would be submitted to the Diet with a view to the system of education and the communal and district Constitutions. In the sitting of the North German Parliament on Tuesday Herr Simson was re-elected President by a great majority, and Duke Ujest and Herr Von Benningsen were also re-elected Vice-presidents by large majorities.

BARCELONA.—A telegram from Munich states that King Louis II. has been for some days confined to his bed by violent neuralgic pains in the right leg, at the same spot in which he suffered last year from a severe neuralgia.

AUSTRIA.—The Budget Committee of the Lower House has approved the financial law for 1869, by which the expenditure is estimated at 299,026,671 florins, and the revenue at 296,284,176 florins, leaving a deficit of 2,742,495 florins, which is to be covered by the operation of the floating debt. In the sitting of Wednesday the supplementary credit of 2,286,526 florins was agreed to. The House then proceeded to the discussion of the Budget, and passed the estimates for the Court, for the Reichsrath, for the Ministry of the Interior, and for the War Department. In the sitting of Tuesday the House passed the estimates of the Ministry of Public Instruction, of the Ministry of Finance, the State Subvention, and the estimates of the Ministry of Agriculture, and approved the estimates of the revenue from direct taxes, from indirect taxes, from the customs, and from the tax on salt. In the sitting of Wednesday the House agreed to the estimates of the expenditure for

the Ministry of Finance, the Ministry of Commerce, and the Ministry of Agriculture, and adopted the estimates of the revenue of the Ministry of Finance, and the Ministry of Commerce. In the sitting of Thursday the House passed the estimates of the requirements for the Ministry of Justice, the National Debt, and common affairs. The whole budget for 1869 then passed the second and third reading. It is now declared that the Duke de Grammont, the French Ambassador, has abandoned his intended journey to Paris.

HUNGARY.—The elections in Hungary have been attended by violent conflicts among the electors. In a collision at Kiraly-Helmész two persons were killed and 40 wounded. The Government have issued a stringent proclamation on the subject.

CROATIA.—The Emperor and Empress arrived at Agram on Monday evening, and were received with much enthusiasm by the people. The town was brilliantly illuminated. Count Beust also arrived from Vienna. The Empress is expected to take her departure for Pesth to-day.

TRANSYLVANIA.—A Conference has been held at Hermanstadt by the leaders of the Roumanian party, at which it was decided not to take part in the elections to the Hungarian Diet.

ITALY.—In the sitting of the Chamber of Deputies on Saturday a debate took place on the Administrative Reorganisation Bill, in which the Chamber adopted a motion, suspending its decision on Signor Peruzzi's proposal, that Prefects should henceforth no longer preside over the Provincial Councils. Captain Taylor, who has been commissioned by the English Government to examine the various routes for the transport of the Indian mails, arrived at Brindisi last week from Greece, and on Friday went over the line from Ancona to Bologna. He will thence proceed to Venice, returning to England by the Brenner, accompanied by Cavaliere Vighi, inspector of Italian railways, in order to determine the best route for the direct service between Ostend and Brindisi.

PAPAL STATES.—The Pope blessed the Golden Rose on Sunday. The English Catholics residing in Rome have celebrated a triduum at the church of St. George to implore the intercession of that saint for the return of England to the unity of the faith. The Pope has raised the Duke d'Aquaviva to the dignity of "Cameriere segreto di Spada e Cappa," the most distinguished office that can be conferred on a layman in the States of the Church. It is expected that Dr. Manning will receive the Cardinal's hat at the next Consistory. In consequence of the tranquillity which now prevails in the provinces of Campagna and the Maremma, the Minister of the Interior has issued an edict revoking the extraordinary measures against brigandage contained in the edicts of 1865 and 1867. All cases of brigandage will henceforward be tried by the ordinary tribunals, but the penalties remain unaltered. The new edict came into force on the 1st inst.

SERVIA.—The Belgrade Ministerial paper of Tuesday publishes an article contending that the Porte has no right to conclude commercial treaties with other countries the provisions of which are binding on Serbia, or to carry the projected Eastern Railway through Bosnia, thereby cutting off Serbia from the general traffic with foreign countries. They declare that Serbia will not submit to proceedings so vitally prejudicial to her interests.

TURKEY.—Aali Pasha, the Grand Vizier, is organising great changes, originally suggested by the late Fuad Pasha, in the domestic administration of Turkey. The Turkish Ambassador at Paris has received instructions to make arrangements for instituting at Constantinople an academy of music on the French plan.

PERSIA.—The dispute between Turkey and Persia is in a fair way of being settled, an envoy having arrived at Constantinople on an extraordinary mission from the Shah.

EGYPT.—Sir John Lawrence, accompanied by Professor Owen and Mr. Fowler, the engineer, left Alexandria on Friday in the Caradoc, for Brindisi, intending to proceed thence to England by overland route. The Duke of Sutherland left on Saturday by the Italian steamer for Brindisi, on his way to England. The Viceroy is about shortly to visit the works of the Suez Canal.

INDIA.—The Ameer of Afghanistan has arrived at Peshawur on his way to Lahore, where the Lieutenant-Governor of the Punjab, the Hon. D. F. M'Leod, will hold a Durbar. The camp is being formed at Umballa, where the interview between the Viceroy and Shere Ali is expected to be held on the 25th inst. Sir Richard Temple delivered his financial statement to the Legislative Council on Monday. The completed accounts for 1867-68 show a deficit of 1,610,517L.; the regular estimate for 1868-69 shows a deficit of 2,801,244L.; and the budget estimate for 1869-70 exhibits a surplus of 52,650L. It is proposed to levy an income tax of 1 per cent, which it is calculated will produce 900,000L., and to negotiate loans to the amount of 5,000,000L. The customs and salt duties are not changed, and no part of the opium revenue is reserved. The General Post Office at Bombay was totally destroyed by fire on the 2d inst.

AUSTRALIA.—Accounts from Sydney state that a motion of want of confidence in the Ministry has been defeated in Parliament. The preliminary arrangements for convening an Intercolonial Conference for the establishment of a Customs Union were progressing. Accounts from Adelaide state that the Government Land Reform Bill has passed through Parliament. The arrival of the Duke of Edinburgh was daily expected. It was announced that the Queen had requested that the reception given to the Duke should be of a non-official character.

UNITED STATES.—The following is the full text of the inaugural proclamation of General Grant on taking

the oath of office on the 4th inst. as President of the United States. —

"Citizens, — Your suffrages have elected me to the office of President. I have taken the oath prescribed by the Constitution without mental reservation, and with the determination to do, to the best of my ability, all that is required of me. The responsibility of my position, I feel, but I accept it without fear; the office which has been conferred upon me was unsought. On leading questions I will express my views to Congress when I think it advisable. I will interpose my veto to defeat measures to which I am opposed, but all laws will be faithfully executed, whether they meet with my approval or not. I shall have a policy to recommend, but none to enforce against the will of the people. The laws are to govern all those approving as well as those opposing them. I know no method to secure the repeal of obnoxious laws so effectual as the stringent execution of them. Many questions will arise during the next four years, and it is desirable that they should be appreciated calmly and without prejudice, the greatest good of the greatest number being the object to be obtained. This requires security for the person, for property, and for religious and political opinions throughout the country. All laws to secure this end will receive my best efforts towards their enforcement. A great debt has been contracted in securing the Union, the payment of which and a return to a specie basis, as soon as it can be accomplished without detriment to the debtor class or to the country at large, must be provided. To protect the national honour every dollar of the Government indebtedness should be paid in gold, unless otherwise expressly stipulated at the time of being contracted. Let it be understood that there must be no repudiation of a single farthing of the public debt, and it will go far towards strengthening our credit, which ought to be the best in the world, and will ultimately enable us to replace the debt with bonds paying less interest than we now pay. To this should be added the faithful collection of the revenue, strict accountability to the Treasury for every dollar collected, and the greatest practicable retrenchment. Who doubts the feasibility of paying every dollar with more ease than we now pay for useless luxuries? Prostrate commerce must be rebuilt and industry encouraged. The young men of this country have a peculiar interest in maintaining the national honour. A moment's reflection upon our future commanding influence among nations should inspire national pride. How the public debt is to be paid, and how speedy payment is to be resumed, are not so important as that the plan should be adopted. The united determination to do is worth more than divided counsel on the method of doing. Legislation on this subject may not now be necessary, nor even advisable, but will be so when civil law is fully restored throughout the land and trade shall have resumed its wonted channels. It shall be my endeavour to execute the laws in good faith, to collect all the revenues assessed, and to have them properly disbursed. I will, to the best of my ability, appoint only officers who will carry out this design. Regarding foreign policy, I would deal with nations as equitably as the law requires that individuals should deal with each other. I would protect law-abiding citizens, whether of native or foreign birth, whenever their rights are jeopardised and wherever the flag of our country floats. I would respect the rights of all nations, and demand equal respect for our own. If others depart from this rule in dealing with us, we may be compelled to follow the precedent. The proper treatment of the Indians deserves careful consideration. I will favour any course tending to their civilisation, Christianisation, and ultimate citizenship. I hope for and desire the adoption of the Suffrage Amendment to the Constitution. In conclusion, I ask for patient forbearance one towards the other throughout the land, and a determined effort on the part of every citizen to share and cement our happy Union, and I ask for prayers to God on behalf of this happy consummation."

On the following day it was announced that the new Cabinet had been constituted by General Grant as follows, all the members, with the exception of Mr. Washburne, being men new to official life:—Mr. Elihu B. Washburne, of Illinois, Secretary of State; Mr. Adolph E. Bowrie, Philadelphia, Secretary of the Navy; Mr. Alexander T. Stewart, New York, Secretary of the Treasury; Mr. Jacob D. Cox, Ohio, Secretary of the Interior; Mr. John A. J. Cresswell, Maryland, Postmaster-General, and Mr. George E. Hoar, Massachusetts, Attorney-General. General Schofield was retained as Secretary of War. General Sherman was made General-in-Chief, and General Sheridan Lieutenant-General of the United States army. On Monday President Grant requested Congress to repeal the old law prohibiting Treasury officers from engaging in trade, as it disqualified Mr. Stewart from accepting the post of Secretary to the Treasury. Mr. Sumner objected in the Senate to the hasty repeal of the law without deliberation. Mr. Stewart consequently tendered his resignation, which President Grant accepted. On Thursday Mr. Washburne, Secretary of State, and General Schofield, Secretary of War, resigned office. Ex-Governor Hamilton Fish, of New York, has been appointed to succeed Mr. Washburne, and General Rawlins to succeed General Schofield. Mr. Bontwell, of Massachusetts, member of Congress, has been nominated Secretary of the Treasury in the room of Mr. Stewart, and Mr. Washburne has been appointed by the President as Minister to France in the room of General Dix. All these nominations have been confirmed by the Senate. In the sitting of the House of Representatives on Wednesday Mr. Butler reintroduced the Bill repealing the Tenure of Office Act, which was rejected by the Senate, and it was passed by 113 to 16. The Republicans have carried the elections in New Hampshire. General Schenck's Finance Bill, not having been signed by President Johnson before retiring from office, has failed to become a law by reason of Congress having adjourned before the expiration of the 10 days allowed for Executive consideration. The States of Maine, Michigan, Illinois, and Wisconsin, have ratified the negro suffrage amendment.

NEWFOUNDLAND.—The Newfoundland Assembly have passed the address in reply to the Lieutenant-Governor's Speech, affirming union with the dominion of Canada by a majority of 20 to 8. The Legislative Council affirmed the union by an unanimous vote.

CUBA.—Intelligence from Havana announces that a battle has taken place near Puerta Principe, between the Government troops and 4000 insurgents. The latter were defeated, with heavy loss. The Government telegraphed to General Dulce to suspend the execution of insurgents condemned to death.

way to make its position secure would be to... an increase of life subscriptions. The next... would not be so expensive as its predecessors... would be issued this year, for all new rifles... had been converted. Those, therefore, who... the Queen's Prize must use their own... it was impossible at present to determine... should be a review this year or not... was adopted.

INTER REVIEW.—The Commander-in-Chief appointed Major-General Russell, C.B., to command the south-eastern district, to command the divisions at the Dover review on Easter Monday. He has selected the following general officers at Alderbury: Major-General Carey, and Major-General Sir Alfred Peckham. The Secretary of State for War has taken steps to secure proper medical arrangements for the review, by appointing two surgeons to take charge of the hospitals at Castle Hill Fort and at Swinley on the day of the review. The railway authorities have made arrangements for the conveyance of the general public to Dover and back at the rate of 3s. for 1st class, and 1s. 6d. for 2nd class. The London and South-Eastern Railway will be used for Charing Cross, Cannon Street, Victoria, and Blackfriars. The general public will be accommodated with additional trains and excursion tickets.

THE MONCRIEFF BATTERY.—The Moncrieff invention of mounting heavy artillery has been definitively accepted by the Government. Captain Moncrieff is to receive a sum of money sufficient to cover the cost of his models and his preliminary expenses; he will receive payment for the time he has devoted exclusively to the public service (about £1000) at the rate of 1000l. per annum, which rate is to continue as long as Captain Moncrieff is engaged in rendering assistance towards the application and completion of his system; thirdly, he is to receive 1000l. as a reward for the invention, and for the use which may be made of it in her Majesty's service, either afloat or ashore, in any modification or combination. Of this sum of 15,000l., 10,000l. is to be paid at once, and the remaining 5000l. when the inventor has drawn his salary of 1000l. a-year.

THE CLOSING OF WOOLWICH DOCKYARD.—Negotiations are pending between the Government and one of the largest shipbuilding firms on the Thames, with a view to letting to the latter a considerable portion of Woolwich Dockyard for the purpose of building iron ships of a large class. Should the negotiations be successful, much of the apprehended distress consequent on the closing of the Government yard will be averted, and the migration of a large number of workmen and artisans from the town prevented.

THE THAMES EMBANKMENT.—The Council of the Society of Arts have appointed a committee to report on the best way of dealing with the Thames Embankment, so that the opportunity may not be lost of making the site conducive to the embellishment and improvement of the metropolis. A meeting will be held on Tuesday next, when the proposal for extending the new law courts on the Embankment will be discussed.

THE REFORM LEAGUE: RESIGNATION OF MR. BEALES.—A special meeting of the general council and executive committee of the Reform League was held on Monday evening to receive the resignation of Mr. Beales, the president. There was a large attendance. Mr. Beales presided, and stated that the time had come when he could honourably retire from a post which had exposed him to much obloquy, calumny, and misrepresentation. He then contrasted the present state of the political atmosphere with what it would have been if the League had been sustained; an enlarged and improved representation had been gained; the cause was on the eve of being obtained; the majority of the Irish Church establishment was about to be abolished, and justice to Ireland was likely to be secured. He did not mean to claim credit for the League having accomplished all these things, but he had greatly helped in the battle. A vote of thanks to Mr. Beales was carried by acclamation.

THE CHARTERHOUSE.—The ground, which was formerly the Charterhouse Playground, nearly two acres in extent, has been let on building leases, and is now being cleared out, there is every prospect of its being covered with warehouses and shops.

VALUE OF LAND IN THE CITY.—It was stated at a meeting of shareholders, held a few days since, that the value of 71 per foot for a piece of ground in the neighbourhood of Smithfield Market had been refused.

LAMBETH PALACE LIBRARY.—The Archbishop of Canterbury has appointed Archdeacon Hale to be Librarian of Lambeth Palace Library; the Rev. J. R. Green, Vicar of St. Philip's, Stepney, to be Librarian; and has confirmed the late Archbishop's appointment of Mr. S. Wayland Kershaw, of St. John's College, Cambridge, to be Librarian in charge.

LEICESTER SQUARE.—In the Rolls Court on Saturday an attempt was made by Mr. Webb, the owner of a house in Leicester Square, to compel Mr. James Webb and Mr. John Augustus Tulk to restore the square, which has long been a public square, to a proper state of repair, and to maintain it in a neat and ornamental condition as a garden, or pleasure ground, in conformity with certain covenants contained in certain deeds dated respectively in 1497 and 1498. Lord Romilly gave judgment to the effect that a court of equity could not enforce the performance of an agreement to repair. The defendants were therefore nonsuited, but as the defendants were morally bound to keep the interior of the square in a proper state of repair, they were left to pay their costs.

THE WIDENING OF PARK LANE.—At the weekly meeting of the Metropolitan Board of Works on Friday, the Works and Improvements Committee brought up a report, recommending the Board not to accept certain clauses which Mr. Gore, and the Office of Woods, proposed to insert in the Park Lane Improvement Bill, giving compensation to the Crown and its lessees and tenants of the houses and buildings in Hamilton Place, not only for the property which may be taken for widening Park Lane, but also for the diminution in the value of all the houses in consequence of Hamilton Place being converted into a thoroughfare. The report was adopted, and there was a general concurrence among the members that in the interest of the ratepayers, as well as a matter of principle, these offensive clauses should be energetically opposed, and that the Bill should be abandoned if their insertion should be sanctioned by the Select Committee.

LICENSING OF BEERHOUSES.—An influential deputation, headed by Archbishop of York, waited on the Premier and the Home Secretary a few days since to represent the advisability of repealing the Beerhouse Act, and leaving the licensing in the hands of magistrates only. Mr. J. A. Smith, as one of those who supported the passing of the Beerhouse Act of 1830, simply desired to state that in his opinion it had proved an utter failure. He hoped that either the Government, or some private member supported by the Government, would introduce a measure for its repeal. Mr. W. H. Smith, M.P., from his experience as a magistrate, could state that half the cases which came before the petty sessions had their origin in beerhouses, and under the present system the magistrates were practically unable to enforce salutary regulations with reference to the manner in which they were to be conducted. Mr. Gladstone, in reply, said that there was no doubt the present system was totally unsatisfactory; nevertheless the Government could not materially bind or bias the sense of Parliament on the subject. The memorial, however, should have the best attention of the Government.

THE CHARGE OF CORRUPTION AGAINST ADMIRALTY OFFICIALS.—The hearing of the charge against Mr. Gambier, Admiralty clerk, and Mr. Rumble, a Government inspector of machinery, was resumed on Thursday at Bow Street. The Hon. Robert Dundas, Storekeeper-General, Admiral Robinson, one of the Lords, and Mr. Baxter, M.P., Parliamentary Secretary to the Admiralty, gave evidence as to the acceptance of the tender sent in by Mr. Maxwell to show that no influence had been brought to bear upon them. Sir Thomas Henry committed both prisoners for trial, and the solicitor to the Admiralty stated that other charges against the prisoners were under investigation.

PROSECUTION OF THE REV. W. J. E. BENNETT.—Lord Auckland, Bishop of Bath and Wells, has consented, on the report of the Commission issued by the late Bishop of London, to send the case of Mr. Bennett, Vicar of Frome, to the Court of Arches by letters of request, and the matter will come before Sir Robert Phillimore in the course of a few weeks. The complaint against Mr. Bennett will be that he teaches a real, actual, and visible presence of the Lord upon the altar, and that without that doctrine containing and inferring the sacerdotal office of the priest, and the sacrificial character of the altar, there would be no altar at all. The case will also embrace some minor charges. It is said that Dr. Jackson, the new Bishop of London, in reply to representations made to him, has declined to grant, even ministerially, any aid to the prosecution, and that early in Easter Term the Court of Queen's Bench will be applied to for a mandamus to compel his lordship to render to the promoters of the suit the same aid as was granted by the late Bishop of London, the present Archbishop of Canterbury.

THE GREAT CONVENT CASE.—The Tablet states that the expenses of the defendants in this action will amount to 6000l., and if they are not successful in their appeal to the judges in banco they will also be liable for the costs of the plaintiff.

THE FATAL ACCIDENT AT THE LEVEE.—On Tuesday an inquest was held at St. George's Hospital on the body of Esther Gillings, aged 35. The deceased was standing with an infant in her arms, on Friday last, near the railings at Buckingham Palace, watching the arrivals at the Levee. The horse of a gentleman who was riding up the Mall took fright at the music of one of the military bands, and ran away with him. It made a dash at the railings just where deceased happened to be standing, and crushed her so seriously that she died on the way to the hospital. A verdict of Accidental Death was returned.

UNCLAIMED DIVIDENDS AGENCIES.—On Tuesday a man named Hill was committed for trial at the Marlborough Street Police Court on eight charges of obtaining money under the fraudulent pretence of helping the complainants to unclaimed dividends and property in Chancery, to which he said they were entitled. It was stated that since he had been in custody inquiries had been made by which it was discovered that the number of similar charges which might be preferred against him were innumerable.

EXTENSIVE ROBBERY OF JEWELLERY.—A robbery of a most extensive nature was committed on the 2d inst., at the residence of Mrs. Cohen, in Park Lane, jewellery of the value of 5000l. having been carried off by the thieves, who effected an entrance to the premises by climbing over the portico, by which means from 20 to 30 robberies have recently been committed in London and the suburbs. The police have not yet traced the burglars, though a reward of 100l. has been offered for their apprehension.

THE MURDERS AND SUICIDE AT POPLAR.—The inquests on Mrs. Browne and her daughter, who were murdered in High Street, Poplar, and on Bradshaw, their supposed murderer, were held on Saturday. Mrs. Browne, it appeared, was the wife of a Frenchman, from whom she was separated, and against whom she held a magistrate's protection. The evidence taken in the first case was chiefly as to the discovery of the bodies, and of Bradshaw having been seen passing along the street on the evening of the murders. The love letters said to have been addressed to him by a young married woman, and supposed to have been sent to her family by the Brownes, were produced in court in the presence of the young woman whose name they bore; but she denied that she had written them, and said that they were probably written by Bradshaw himself, though her sister-in-law and others stated their belief that they were in her handwriting. In the case of Bradshaw, it appeared from the evidence of Harriet Emberson, who lived with him as a wife under a promise of marriage, that after committing the murder on the Tuesday night he returned to his lodgings at about 1 o'clock on Wednesday morning, and went to bed. Nothing transpired from which she could surmise anything of the dreadful tragedy which had just been enacted. He was very restless, and arose two or three times during the night. The next morning while at breakfast, he complained of illness and left the room. She shortly afterwards heard a groan, and on going into the next room found him dead with his throat cut. Nothing was formally placed before either jury as to the cause of the crime, but it was proved that certain locks which Bradshaw had taken with him when he left his lodgings on Tuesday at Bow were found in the house of Mrs. Browne, the deceased. The knife-sheath found under the body of Mrs. Browne was not, however, identified as his. In the case of Bradshaw the jury returned a verdict of *felony de se*, and in the case of the two women the jury returned a verdict of Wilful Murder against him.

INQUEST ON COOPER, THE SUPPOSED MURDERER.—On Saturday an inquest was held at Shadwell on the body of John Cooper, aged 26, the murderer of his wife and her grandfather, which was discovered floating down the river on Friday. A policeman produced a rent-book which he had found on the body, with Cooper's name in it. The jury returned a verdict of "Found Drowned."

THE PUBLIC HEALTH.—The weekly return of the Registrar-General states that in the week that ended on Saturday, March 6, 4839 births and 3323 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 26 per 1000 persons living, being 24 per 1000 in London, 30 in Edinburgh, 25 in Bristol, 18 in Birmingham, 26 in Liverpool, 30 in Manchester, 23 in Salford, 31 in Sheffield, 27 in Bradford, 27 in Leeds, 23 in Hull, 35 in Newcastle-upon-Tyne, and 38 in Glasgow. The rate in Vienna was 38 per 1000 during the week ending the 27th ult., and in Berlin 30 per 1000 during the seven days ending the 14th inst. In London the births of 1144 boys and 1163 girls, in all 2307 children, were registered in the week. In the corresponding weeks of 10 years, 1859-68, the average number, corrected for increase of population, was 2298. The deaths registered in London during the week were 1487. It was the 9th week of the year, and the average number for that week, corrected for increase of population, was 1511. The present return is therefore 84 below the estimated amount.

Provincial.

AYLESFORD.—It was stated a short time since that "Sir Roger C. D. Tichborne, Bart.," the Australian claimant to the Tichborne title and estates, had either been massacred by Indians, or gone in quest of a gold mine in the interior of South America. His solicitors have replied to this report by stating that he has returned to England, and that the result of the commission is satisfactory. It is said that the action will be tried on the earliest possible day, and that the plaintiff and his friends are anxious to bring it to an issue.

BARNESLEY.—The Queen in Council has granted a charter of incorporation to this town.

BIRMINGHAM.—A meeting of the Trades' Council was held on the 5th inst., in reference to a wish said to have been expressed by Mr. Reverdy Johnson to address the working-men of Birmingham with a view to establish an amicable and friendly relation between them and the working-classes of his own country. It had been suggested by Mr. Field, Chairman of the Chamber of Commerce, that Mr. Johnson should be invited to address the workmen in the Town Hall, but Mr. M. Rae, the secretary of the Trades' Council, remarked that that would involve expense; and another speaker expressed doubts as to whether Mr. Johnson could be said to represent the American people in this matter. Other speakers discouraged the proposal on various grounds, and ultimately it was resolved that the offer should be declined.

CAMBRIDGE.—Mr. Vernon Harcourt, Q.C., M.P. for Oxford, was last week elected the first Professor of International Law in this University on the foundation established by the late Dr. Whewell, Master of Trinity.

DURHAM.—The Theatre Royal in this town was totally destroyed by fire on Thursday morning. It formerly belonged to the Kemble family, and many eminent actors and actresses have appeared on its boards.

LEEDS.—The subscription for the benefit of the widow and children of William Orvis, the kennel huntsman to the York and Amstey Hunt, already amounts to more than 600l. The sum raised for the widows and families of the Warriners, father and son, who were in charge of the boat at the time of the accident, is upwards of 260l.

MAIDSTONE.—On Saturday night the lifeless body of a young man, named Finn, a tailor, was found on the Ashford Road, about half a mile from this town, by

the park wall of Mr. Whatman, M.P. It was first observed by two boys, who went to the paper-mill close by and gave an alarm. When they saw the body a bundle was lying close to it, but on their return with assistance the bundle had disappeared. It is supposed that it was stolen by some other passer-by, who might have taken the deceased for a drunken man. A surgical examination showed that the deceased had been shot through the head. At present the whole affair is wrapped in mystery, and no clue to the murderer has yet been discovered. At the inquest on Tuesday the jury returned a verdict of "Willful Murder against some person or persons unknown."

OLDBURY.—On Wednesday afternoon a dreadful explosion occurred at some naphtha works at Oldbury, near Birmingham. The extracting process was going on, when the retort exploded and set fire to a number of naphtha barrels. Two men were burnt to cinders and four others were so severely injured that two of them have since died. Hopes are entertained that the other two men injured may survive.

PORTSMOUTH.—On the 1st inst. the flag of the Commander-in-Chief was hauled down for good from the main of Lord Nelson's old ship, the *Victory*, which will henceforth be the tender to the flagship. On the same day the flag of Vice-Admiral Sir James Hope, G.C.B., the new Port Admiral, was hoisted with the usual salute at the fore of the screw three-decker *Duke of Wellington*, 3771 tons, 700-horse power, and 49 guns.—The commanding officers of Volunteer corps in Hampshire and the adjoining counties held a meeting at Bishopstoke last week, and resolved that, in consequence of the Easter Monday Review for this year being fixed for Dover, it was advisable, with the sanction of the Lord-Lieutenant, to hold a review at Portsmouth of the Volunteers of Hampshire and the southern counties. It was stated that the military and naval commanders-in-chief at this port had promised to render all the assistance in their power.

RAMSGATE.—Between 8 and 9 o'clock on Friday night Nether Court, the residence of the Rev. G. W. Sicklemore, vicar of St. Lawrence, Thanet, a county and Cinque Ports magistrate, was the scene of a daring robbery. The family were assembled in the drawing-room downstairs, while the bed-room, immediately above, was broken into by thieves and thoroughly ransacked. They were disturbed in their work by Mrs. Sicklemore, who had occasion to go to her bed-room, and found the door locked against her. The thieves at once made off with the plunder they had collected, including 100*l.* in cash, and watches, jewellery, &c., to the value of between 50*l.* and 60*l.* The alarm-bell was rung and the thieves pursued, but not overtaken, and they are still at large. They obtained admission to the house by placing a ladder against the wall and pressing open the bed-room window and shutters. On the same night a cottage in the neighbourhood was robbed of some money and clothes.

ROCHESTER.—Deputations from Rochester and Chatham have recently had an interview with the Secretary of State for War, to represent the necessity for the removal of the powder magazines from Upnor Castle, on the ground that they constitute a great danger to the towns of Chatham, Rochester, Brompton, &c., as well as to the naval and military establishments at Chatham. Mr. Cardwell, in reply, said that the subject was under the consideration of his department, which was in communication with the Admiralty on the subject. The deputation, therefore, might consider that measures would be taken for the removal of the magazines, but he could not give any promise as to the time.

SHEFFIELD.—On Saturday morning, about 1 o'clock, an attempt was made to blow up a non-unionist saw handle maker, named Martin, by throwing a stone bottle containing powder and steel filings into his garret window. The bottle broke the glass, but struck the woodwork of the window and fell back into the street, where it was found by a policeman. Had the bottle got into the room, and the contents exploded, the man against whom the attempt was made would not have been hurt, as he slept in another room, but the persons injured would have been an old woman, who is an invalid, and two little children. A man bearing the same name, Martin, has been apprehended on suspicion and remanded.

Ireland.

THE POLITICAL PRISONERS.—At the Queen's Levée at Buckingham Palace, on Friday, addresses and petitions praying for the release of the Irish political prisoners, were presented by the Lord Mayor of Dublin, Sir John Gray, M.P.; Alderman Devitt, J.P.; and Mr. John S. Carroll, from the citizens of Dublin; by Mr. Maguire, M.P., from the Town Commissioners of Queenstown; by Mr. McCarthy Downing, M.P., from the Town Commissioners of Skibbereen; by Mr. Henry Matthews, M.P., from the Town Commissioners of Dungarvan, and from the Town Commissioners of Roscommon; by Mr. Blake, M.P., from the Town Commissioners of New Ross, and from the inhabitants of Tramore, County Waterford; by Mr. John Brady, M.P., from the Town and Council of Thurles; by The O'Donoghue, M.P., from the Guardians of the Poor of the Listowel Union, in the county of Kerry; by Mr. Charles Moore, M.P., from the Town Commissioners of Templemore; by Mr. Serjeant Simon, M.P., from 2030 inhabitants of Dewsbury, Batley, and Birstal, in the county of York; and by Mr. Edward Baines, M.P., from 7768 inhabitants of Leeds.

RELEASE OF FENIAN PRISONERS.—Augustine E. Costello, one of the Fenian convicts who was sentenced to penal servitude, has been released unconditionally from Mountjoy Prison. He was one of those engaged in the Jacknall Expedition, and his youth and earnestness excited sympathy for him at his trial. The following Fenian convicts have since been set free

from Woking, Millbank, and Portland prisons:—Charles J. Kickham, who had been sentenced to 14 years' imprisonment; J. J. O'Connor, John Halligan, late publisher and printer of the *Irish People*, sentenced to seven years' penal servitude; Terence Byrne, Dublin, first arrested on the charge of illegal drilling, and acquitted, but subsequently tried for having arms and making bullets, and sentenced to seven years' penal servitude; Edward Butler, Dublin; Michael O'Regan, Cork, sentenced to seven years' penal servitude; John Coghlan, Cork, five years' penal servitude; James O'Brien, Cork, tried for high treason, and sentenced to death, which was commuted to transportation for life; William O'Sullivan, Kilmallock, sentenced to five years' penal servitude; Patrick Barry, Cork, sentenced to 10 years' penal servitude. A committee has been formed to welcome the "patriots" back to Ireland, and subscription lists and cards have been issued to every Roman Catholic church in Ireland for St. Patrick's day and the following Sunday, to raise a "national fund" for the released prisoners.

THE ASSASSINATION OF THE MULLINGAR STATION-MASTER.—Mr. Anketell, the unfortunate station-master at Mullingar, who was shot at his own door by, it is supposed, a paid assassin employed by the Ribbon Association, died on Saturday after great suffering. On examination it was found that the ball (one of 75 to the pound), had penetrated the chest, driving before it the top vest button, and lodged in the lung. Some slugs were found in the kitchen wall. It is believed that the assassin used a blunderbuss of large calibre, which he rested on the garden gate, in order to take steady aim. The outrage was most deliberately perpetrated, straw having been strewn upon the path of the retreating assassin, so that his footsteps might not be traced. The jury at the inquest returned a verdict of Willful Murder against some persons unknown. The outrage has produced the utmost uneasiness in the neighbourhood, especially as it has been followed by the intelligence that Mr. Anketell had for some time been "a marked man," and that his dismissing a railway official had been referred to from the altar of a Roman Catholic chapel in such terms as induced two most respectable Roman Catholics to go to him and disavow all sympathy with what had been said. It appears also that two new porters who had arrived to take the place of the two who had been discharged by the deceased, had been warned that they were not wanted there, and that they had better take warning by the fate of the master. The men have since returned to Dublin, being unwilling to remain in Mullingar at the peril of their lives. The assassination of Mr. Anketell is considered the most daring crime committed in Ireland for many years. Lord Chief Justice Whiteside alluded to it in charging the grand jury at the King's County assizes, and called on the resident proprietary to aid the paid officials more earnestly in the effort to detect crime, and render the perpetrators amenable. His lordship said that a gross form of despotism existed—the threats of murderous outrage against persons of the farmer class, who either hold, or may intend to take land, which "anonymous villains" covet. The criminal, he added, was never more daring in Ireland than now; and a return moved for in Parliament, enabling a comparison to be made between detected and undetected crime, would be an interesting document.

ANOTHER OUTRAGE IN WESTMEATH.—A correspondent of the *Evening Mail* states that a Roman Catholic, who had up to his death refused to remove his children from a Protestant school, was buried on Sunday at Drumcree, Westmeath; and that on Wednesday night his coffin was taken out of the grave and left exposed.

ATTEMPT TO BLOW UP A HOUSE AT RAPHOE.—The *Derry papers* report an attempt to blow up a house near Raphoe. A tenant had been dispossessed, and the new-comer having received warning that he would be visited with serious consequences if he entered into possession, he obtained the protection of a body of police. A few nights ago they were alarmed by a tremendous explosion, and on going out to ascertain the cause found that a barrel of gunpowder had been placed near the house, and fired by means of a fuse. Fortunately no one was injured.

OUTRAGE IN TIPPERARY.—A daring attack was made a few days since at Derravalla, the residence of Mr. Kernan, in the Killensule and Ballynonty police district. Twenty men, with their faces blackened, attacked Mr. Kernan's house, and carried off a double-barrelled fowling-piece, a pistol, and 10*l.* in money. Before leaving, one of the men struck a young lady staying in the house in the face and injured her severely.

AGRARIAN OUTRAGE IN LIMERICK.—Mr. Goggin, an owner of property at Glin, near Tarbart, was fired at a few days since whilst driving home with his wife and children in an open carriage. Four shots were discharged from behind a fence, and all missed. Mrs. Goggin described the intending assassin, whom she saw running off. Pending ejection proceedings are stated as the probable cause.

THE BALLYCOHY OUTRAGE.—The Government have offered a reward of 500*l.* for such information as shall lead to the arrest of the person or persons who fired the fatal shots at Ballycohy, and a further reward of 300*l.* for such private information as shall lead to the arrest of any of the perpetrators of the outrage.

THE ESMONDE WILL CASE.—The great cause of *Browne v. Esmonde* is to be tried again, the will being now impugned by Sir John Esmonde, Bart., M.P., and Mr. James Esmonde, executors of the late baronet.

Scotland.

SECESSION FROM THE FREE CHURCH.—The Rev. J. B. Dickson, LL.D., formerly of the Free High Church, Paisley, has joined the Church of England.
IMPORTANT POST-OFFICE PROSECUTION.—Mr.

Edmund Beatty Lockyer, one of the candidates for a recent election for the Wick Burgh, was tried at Edinburgh, on the charge of intercepting and opening letters addressed to Miss Sinclair of Dalrymple. George Wilkie Holmes, a letter-carrier, included in the same indictment. It was proved that Lockyer forced his attentions on Miss Sinclair against her wishes, and bribed the postman to let him read various letters addressed to her. The letters were then re-gummed, and this system went on for a considerable time before it was discovered. The transaction was of considerable interest, and occupied the Court for several days in the morning till about 1 o'clock the next day. The jury retired shortly before midnight, and returned after an absence of three-quarters of an hour with a verdict finding both prisoners guilty, but recommending Holmes to the leniency of the Court. The Lord Justice Clerk sentenced Holmes to nine and Lockyer to twelve months' imprisonment.

Railways.

ACCIDENT ON THE LANCASHIRE AND YORKSHIRE.—A serious accident occurred late on Saturday a mail train on this line, at Todmorden. The engines were undergoing repair, and the temporary arrangements gave way as the train passed, by which several carriages were thrown off the line. No one was hurt, but several passengers were hurt.

PASSENGER TRAIN SIGNALS.—The President of the Board of Trade has determined to sanction a system for passenger train signals agreed upon by the managers at their York meeting, giving to all lines as have electric or other signals in use the right of continuing them.

Law.

NORTHERN CIRCUIT, DURHAM: *The Sunderland Free Press* reports that John Dolan, aged 37, was indicted for the wilful murder of Hugh John Ward, at Sunderland, on the 4th inst. Two men lodged at the house of a woman named Evans on the night in question the prisoner, who was drunk, abused the woman, with whom he had lived for years. Ward interfered on her behalf, with the view of protecting her from the prisoner's attack. The prisoner was in, and it was supposed the matter was at an end; afterwards the prisoner fetched a cobbler's knife from a room, and stabbed Ward in the bowels and in the leg. He was found guilty, whereupon he declared his intention to be freely forgiven those who had sworn his life away. Justice Lush passed sentence of Death in the usual manner.
Darlington Murder.—John McColville was charged with the wilful murder of Philip Trainer, at Darlington, on the 1st of January. Deceased and some others had been drinking at a public-house on the night in question, and there took place a fight between him and another man. A man named Quinn had some conversation with the prisoner, and the latter afterwards collected in the street, when the prisoner put his hand to his breast and fell. The man carried into the public house, when it was discovered he was dead, having been shot through the head. The prisoner was found guilty, and the Judge sentenced him to receive 18 lashes in addition to the term of imprisonment.
NEWCASTLE ROBBERY.—James and John, 34, Thomas Charlton, 24, and William Fatake, 24, were found guilty of assaulting and robbing a man of a sum of 15*l.* 10*s.* the monies of the River Tyne Prisoners. Mr. Justice Brett sentenced Ralph Charlton to five years, and the other two to five years' penal servitude to receive 18 lashes in addition.

MIDLAND CIRCUIT, WARWICK: *The Reporter* reports that a man named Carter was indicted for the wilful murder of a man named Carter, who was killed by a Western train, which had stopped near the station. The collection of tickets, thrown overboard, was found to have jumped out again with a number of cash notes. The prisoner was a ballast train signalman, and was charged with the collection of the money and the murder of the man. The guard was so blinded by the creature that he refused by the sudden and unexpected character of the attack that the prisoner effected his retreat with a bag containing a sum of money, and would probably have escaped but that he dropped the can which had contained the creature, being a breakfast can, and marked with the name of the prisoner. He was found guilty, and sentenced to ten years' penal servitude.
Atherstone.—Michael Atkins, 22, miner, was indicted for the wilful murder of his wife, Harriett Atkins, his wife, at Badlesley Estate, Atherstone, on the 1st of December, by shooting her with a gun. The prisoner and his wife had been married about three years, and lived happily together. On the night in question the prisoner had been drinking, and soon after he received a report of a gun was heard, and the wife was found on the floor in a pool of blood, having been shot in the mouth and left ear. The prisoner denied that he had fired the gun, and stated there was a man with him at the time the gun was fired, and that he met two others who carried him to his house, and they found the prisoner with a blasting powder was found in his pocket, such as is used as a miner, but no shot or caps. It was proved, however, that the prisoner and his wife had been living together, and that he took his wife to a public-house on the night in question, and endeavoured to buy a dog as a present for her. The jury, after deliberating for some time, returned a verdict of Guilty. Mr. Justice Brett passed sentence of Death in the usual way, but recommended mercy. On learning the sentence the prisoner was taken to the dock, and was carried out of Court by a man named by a *Father*.—Richard Cooper, an engraver, was indicted for attempting to strangle Richard Cooper, his son, on the 9th of February last. It was proved that the prisoner, who was in the first instance charged the boy, who was six years of age, with having stolen a watch, but had not the heart to kill him, and had only intended to prevent him from going to his neighbour what he had done. The jury found the prisoner guilty, and sentenced him to five years' penal servitude to receive 18 lashes in addition.
CENTRAL CRIMINAL COURT.—Mr. John Spong, a respectable maltster in Kent, was charged with the December sessions of forging a will, was brought

The case was a very peculiar one and that the prisoner had acted with the best intentions in the office charged against him. The Court said that it was a case of a man who had been a friend of the family. The Court said that it was a case of a man who had been a friend of the family. The Court said that it was a case of a man who had been a friend of the family.

Obituary.

Mr. Richard Davison, formerly M.P. for Belfast, died at Cultra, near that city, a few days since, in his 73d year. In 1852 he was selected by the Conservative party to become one of their representatives in Parliament, and was returned at the head of the poll in conjunction with Lord Cairns. Unlike his colleagues, however, Mr. Davison had no special aptitude for senatorial pursuits, but he was a second time elected in 1857. In 1860 he retired from public life. He had a considerable literary and scientific taste, and was especially fond of conchology—a department of natural history of which he possessed a valuable collection.

WILLS.—The will of Lady Elizabeth Hope-Vere has been sworn under 12,000l. personally. Admiral Sir Lucius Curtis, K.C.B., a friend of the testatrix, Sir Henry Ellis, K.B., F.R.S., late Principal of the British Museum, 25,000l.

DEATH.—On the 7th March, at his residence, 22, Alfred Place, Bedford Square, R. BEST HENDERSON, Esq., of the firm of Beek, Henderson & Co., Seed Merchants, 221 and 222, Upper Thames Street, London, aged 74 years.

Markets.

CONVENT GARDEN.—March 13.
The supply, both foreign and home grown, continues ample; neither have we any fresh remarks to make with regard to the amount of business transacted. Oranges are plentiful. Strawberries are now regularly supplied, and realize 3s. per oz. Flowers chiefly consist of Orchids, Primulas, Cinerarias, Mignonettes, Heaths, Cyclamens, Tulips, Crocuses, Snowdrops, Calla arthropica, Callis racemosa, Hyacinths, Lily of the valley, Delphinium, Passiflora, Fuchsias, Violets, Wallflowers, Roses, and Hotch Potatoes.

FRUIT.
Apples, per bushel, 4s to 5s
Grapes, per lb., 8s to 12s
Kent Cobs, per lb., 1s to 1s 6d
Lemons, per 100, 4s to 7s
Melons, each, 2s to 4s
Pears, per doz., 4s to 12s
Pine apples, per lb., 6s to 10s
Oranges, per 100, 2s to 7s

VEGETABLES.
Artichokes, green, p. doz, 4s to 6s
Beans, Kidney, p. 100, 2s to 3s
Beet, per doz., 1s to 2s
Cabbages, per doz., 1s to 2s
Carrots, per bunch, 6d to 10d
Cauliflowers, Cornish, p. doz., 2s to 4s
Celery, p. bund., 1s 6d to 2s 6d
Cucumbers, each, 1s to 2s
Endive, per doz., 1s 6d to 2s
Garlic and Shallots, per lb., 8d
Herbs, per bunch, 2d to 4d
Horse Radish, p. bund. 3s to 5s
Lettuces, p. score, 1s to 2s 6d
— French Cos, 8d to 10d each
Leeks, per bunch, 2d to 4d
Mint, per bunch, 6d to 1s
Mushrooms, p. pott., 1s to 1s 3d
Onions, per bushel, 5s to 12s
Parsley, per bunch, 4d to 6d
Peas, green, p. pun., 2s to 2s 6d
Potatoes, York Regents, p. ton, 12s to 15s
— Flukes, do., 12s to 16s
— new, 1s 6d to 2s 6d p. lb.
Saskale, p. pun., 2s to 3s
Spinach, per bushel, 2s to 3s
Raddishes, p. doz., 1s to 1s 6d
Turnips, p. bunch, 6d to 8d

HAY.—Per Load of 36 Trusses.
SMITHFIELD, Thursday, March 11.
Best Green Hay 110 to 125
Prime Meadow Hay 100 to 120
Inferior do. 80 90
New do. 90 100
Straw 30 35
CHARLES JAMES EASTON.

CHAMBERLAIN MARKET, Thursday, March 11.
Sup. Meadow Hay 112 to 115
Inferior do. 85 105
New do. 90 100
Superior Clover 128 132
JOSHUA BAKER.

WHITEHALL, Thursday, March 11.
Fine Meadow Hay 108s to 116s
Inferior do. 80 105
Prime New Hay 90 100
Inferior do. 70 80
Straw 30 34

HOPS.—BOROUGH MARKET, March 12.
Messrs. Pattenden & Smith report no alteration in the market during the week, the demand being steady, and prices firm.

METROPOLITAN CATTLE MARKET.
MONDAY, March 8.
We have a shorter supply of Beasts, and consequently last week's quotations are fully maintained, although trade is not brisk. There are a few more Sheep, but the increase is in foreign consignments; the demand continues very good, and prices are still very high. Choice Calves are scarce and dearer. Our foreign supply consists of 1740 Beasts, 9270 Sheep, and 80 Calves; from Scotland there are 150 Beasts; from Ireland, 70; from Norfolk and Suffolk, 1000; and 460 from the Midland and Home Counties.

THURSDAY, March 11.
We have a large supply of foreign Beasts, but choice English are not very plentiful; there is scarcely any alteration in

prices of the latter, but the former are rather lower. Sheep are rather more plentiful, and trade is dull, with a little reduction in price. Calves are rather lower. Our foreign supply consists of 760 Beasts, 4230 Sheep, and 119 Calves.

Best Scots, Here- fords, &c.	5 4 to 5 6	Best Long wools	6 0 to 6 4
Best Shorthorns	5 2—5 4	Do. Shorn	—

		Calves	3 8—6 0
		Pigs	3 4—5 4

Beasts, 1220; Sheep and Lambs, 9270; Calves, 175; Pigs, 20.

POTATOES.—SOUTHWARK, Monday, March 8.
During the past week the arrivals coastwise and from abroad have been rather lighter, but still more than equal to the demand. The following are this day's quotations—York Regents, per ton, 50s. to 90s.; do. Flukes, 60s. to 110s.; Lincolnshire Regents, 60s. to 80s.; Dunbar and East Lothian do., 60s. to 110s.; Perth, Forfar, and Fife do., 60s. to 80s.; do. Rocks, 50s. to 60s.; French and Belgian Whites, 40s. to 60s.

MARK LANE.—MONDAY, March 8.
Although the supply of English Wheat to this morning's market was very small, millers showed no disposition to make purchases, and it remained unsold at a late hour. There was a fair attendance, and scarcely any business transacted in foreign Wheat, the few sales made were at a reduction of fully 1s per qr. since this day a fortnight. Maiting Barley was unchanged in value, but grinding was 6d to 1s. per qr. cheaper. Beans and Peas remain as last noted. To effect sales of Oats it was necessary to submit to a reduction of 6d to 1s. per qr. Flour was very difficult of sale, even at a slight reduction.

FRIDAY, March 12.
In spite of the more seasonable weather, which should cause a larger consumption of breadstuffs, we have to report a very slow trade throughout the markets of the kingdom. The anticipation of still lower prices for Wheat (owing to the approach of the Baltic shipments on the coast) of Great Britain, and the arrivals from the United States, California, and the South of Europe in the chief ports of the west coast, has caused a further accumulation of about 2s per qr. for Wheat, with but few transactions. Spring corn of all descriptions has continued neglected, and prices are 1s to 2s per qr. lower for all articles, while stocks have accumulated largely in granary. Flour has been pressed at a reduction of 1s. to 2s. per barrel and sack, and very little business transpired. The arrivals of grain and seed-laden vessels off the coast this week consisted of 11 cargoes, of which, with those left over from last week, there remained for sale last night 19 cargoes. The floating trade has ruled very inactive, and prices of arrived Wheat declined nearly 2s per qr. Maize was about 1s, and Barley and Beans from 1s to 1s 6d per qr. cheaper, the decline not having had any activity in business. There is no inclination to operate for foreign delivery. Paris, March 11.—The trade in Wheat and Flour was very inactive during the last week, and prices were lower for both articles. The six marks are quoted at equal to 34s. per 280 lb.

The arrivals of all descriptions of grain during the week have been moderate. There was a poor attendance at this morning's market, and millers showed very little disposition to purchase Wheat. Some few sales of English were effected at a decline of 2s per qr. upon Monday's quotations, and to have made sales factors would have accepted a reduction of 1s per qr. on foreign, but scarcely any business was transacted. Barley was unchanged in value. Oats were cheaper.

LIVERPOOL, Tuesday, March 9.—There was a very good attendance at to-day's market, but Wheat met with an extremely limited inquiry, at prices which, though merely nominal, may be quoted 6d. per cental lower than on this day week. Flour dull, and rather cheaper. Indian Corn in limited request, and 6d. per qr. lower than on Tuesday last. Peas quiet, and 1s. lower. Other articles nominally unchanged.

SEED MARKET.
The agricultural seed trade exhibits increased animation, and a fair amount of business has been transacted during the last few days. Values of all descriptions continue very firm. New English Red is exceedingly scarce, and fine qualities command extreme rates. Higher prices for Clover seed are reported from Germany; as that country is now our sole source of supply, if the upward tendency continue we must shortly experience a corresponding advance here. Some heavy orders for yearling American seed have within the last few days been telegraphed to this market from New York; the shipment to America of some hundreds of tons of this class of seed must, it is thought, have a hardening effect upon currencies here. Alsike and White Clover seed are

Mr. G. A. W. died on Wednesday night at his residence, 11, St. James's Place, London, at the age of 74 years. He was the eldest son of the late Sir John Lubbock, 1st Baronet, and was educated at Eton and at the University of Cambridge. He was a member of the House of Commons from 1852 to 1859, and was Secretary of the Treasury from 1859 to 1861. He was also a member of the Privy Council, and was created a Knight of the Garter in 1861. He died on the 21st inst., at Aberdeen, from a cerebral hemorrhage which he had a few days before. He was in his 74th year, and was well known both in London and Aberdeen.

Mr. Arthur Gordon, C.C.B., K.C.H., died on the 21st inst., at Aberdeen, from a cerebral hemorrhage which he had a few days before. He was in his 74th year, and was well known both in London and Aberdeen. He was the third son of the late Viscount Bunsford, and was educated at Eton and at the University of Cambridge. He was a member of the House of Commons from 1852 to 1859, and was Secretary of the Treasury from 1859 to 1861. He was also a member of the Privy Council, and was created a Knight of the Garter in 1861. He died on the 21st inst., at Aberdeen, from a cerebral hemorrhage which he had a few days before. He was in his 74th year, and was well known both in London and Aberdeen.

Mr. William Emerson, of Belfast, died on the 21st inst., at Aberdeen, from a cerebral hemorrhage which he had a few days before. He was in his 74th year, and was well known both in London and Aberdeen. He was the third son of the late Viscount Bunsford, and was educated at Eton and at the University of Cambridge. He was a member of the House of Commons from 1852 to 1859, and was Secretary of the Treasury from 1859 to 1861. He was also a member of the Privy Council, and was created a Knight of the Garter in 1861. He died on the 21st inst., at Aberdeen, from a cerebral hemorrhage which he had a few days before. He was in his 74th year, and was well known both in London and Aberdeen.

Mr. Thomas Tennent, Bart., died suddenly on Saturday the 21st inst., at Aberdeen, from a cerebral hemorrhage which he had a few days before. He was in his 74th year, and was well known both in London and Aberdeen. He was the third son of the late Viscount Bunsford, and was educated at Eton and at the University of Cambridge. He was a member of the House of Commons from 1852 to 1859, and was Secretary of the Treasury from 1859 to 1861. He was also a member of the Privy Council, and was created a Knight of the Garter in 1861. He died on the 21st inst., at Aberdeen, from a cerebral hemorrhage which he had a few days before. He was in his 74th year, and was well known both in London and Aberdeen.

Mr. John Tennent, Bart., died suddenly on Saturday the 21st inst., at Aberdeen, from a cerebral hemorrhage which he had a few days before. He was in his 74th year, and was well known both in London and Aberdeen. He was the third son of the late Viscount Bunsford, and was educated at Eton and at the University of Cambridge. He was a member of the House of Commons from 1852 to 1859, and was Secretary of the Treasury from 1859 to 1861. without alteration. Trefoil seed meets with a little more inquiry, the unusually low prices at which it can now be bought having apparently attracted the attention of speculators. A good business is being done in French Italian Rye-grass; the crop in France is this season only the third of an average one. In Mustard seed the late advance is fully maintained. Sowing Rape seed is very firm. We have a ready sale for spring Turps. Hemp seed is a little dearer. Canary seed sells slowly at the late decline. English Flax seed is in good request. Imported Sainfoin seed moves off at last week's quotations. JOHN SHAW & SONS, 16, Water Lane

To Agricultural Seed Agents, &c.

A DUTCH FIRM, at Haarlem, requires a REPRESENTATIVE in this country to Sell Garden Seeds, Beans, &c. A knowledge of the German and French Languages would be a recommendation. He must also be willing to Travel in England, Scotland, and Ireland.—Address, with full details, to B. & Co., care of Mr. Joseph Harris, 67, Lower Thames Street, London, E.C.

All the foreign element, excepting the... portion, had been exterminated. Major Von Versen, a Prussian officer, and Mr. Trevelyan, Director of the Paraguayan telegraphs, had escaped. The Marquis de Caxias, commander-in-chief of the allied army, General Argollo, and Admiral Viscount de Inhauma, the naval commander-in-chief, have returned to Rio from the war. The Marquis de Caxias, having left the army without leave, was coldly received by the Emperor and the people. It is stated that the Conte d'Eu will be the new generalissimo of the Brazilian forces.

CUBA.—The hardest battle of the war has been fought at Sierra de Cubitas. The insurgents under Lesca, 4000 strong, were entrenched, and a heavy artillery fire was opened upon them, under cover of which the Spaniards charged with the bayonet, and gained a complete victory, the rebels losing over 1000 killed and wounded. General Quesada is reported to have only 7000 available troops.

HAYTI.—Anarchy still reigns in Hayti. On the morning of the 26th ult. 350 residents were shipped to Gonaves from Port-au-Prince, and it was said that all wealthy merchants were to be shipped to the same place. President Salnave had made his long-expected attack on the city of Aux-Cayes by sea and land, but without success. After bombarding the city for 24 hours without effect, he suddenly sailed away to Port-au-Prince. His land forces simultaneously assaulted the town, but were repulsed.

Parliament.

In the House of Lords on Friday the Duke of ARGYLL moved the second reading of the Parochial Schools (Scotland) Bill. Lord ABINGER objected to the large powers which the Bill placed in the hands of an irresponsible Board, to the clause authorising the conversion of old national schools into new, and to the proposed representation on the schools' board of the Schoolmasters' Association, which bore too close a resemblance to a trades union. The Earl of AIRLIE also considered that the machinery of the Bill was defective, and required to be remodelled. The Earl of DENBIGH complained that the Bill neglected the interests of the Roman Catholics. The Duke of MARLBOROUGH doubted the wisdom of establishing a general board, which would result in a conflict of jurisdiction with the Committee of Council on Education, and complained of the absence of any guarantee for religious teaching. The Duke of ARGYLL defended the Bill, but intimated his readiness to assent to a proposal for striking out the representatives of either the schoolmasters or the universities. After some remarks by Lord CAIRNS and Earl DE GREY, the Bill was read a second time. The House then adjourned for the Easter recess, to Monday, April 5.

In the Commons on Friday the adjourned debate on the Irish Church Bill was resumed by Dr BALL, late Attorney-General for Ireland, who opposed the Bill on the ground that its principle was the destruction of existing endowments and the introduction of the voluntary principle, which had been adopted by no country in Europe, and was utterly unsuited to Ireland. He held that the titles of the incumbents of the Protestant Church were as sacred and inviolable as the fee simple of any landed proprietor in the country and that disestablishment would disconcert the clergy because the source of their emoluments had been taken from them; and would disconcert the laity because new fiscal burdens would be imposed upon them. The result would be, that a great shock would be given to the inviolability of the rights of property, and a precedent would be set for further organic change. Mr SULLIVAN, the Attorney-General for Ireland, contended that disestablishment was an act of justice, and that the success of the voluntary principle in the Catholic Church was sufficient to show what might be effected under that principle. Sir F. HEGGATE, Viscount CRIGHTON, and Sir S. NORTHCOTE opposed the Bill. Sir J. GRAY and Mr. MIALI supported it. Mr. BRIGHT said that the question at issue was whether the Established Church was to exist as a State institution. The country had pronounced emphatically that to maintain that Church any longer was wholly out of the question. It was admitted that it was the Church of conquest, and he would add that it presented the most flagrant violation of the principles of the Reformation that could be imagined. The only pretence for its existence was that it was to convert the Roman Catholics to Protestantism, and bring about a friendly and permanent union between the two countries. But it had failed to accomplish either of those objects. History in all its saddest pages had not a case of more complete failure, for Ireland was more Catholic now than she had ever been before, and she was more Roman than any other Catholic country of Europe. He believed that the Bill would lead to a more solid union between the two countries—that it would restore tranquillity to the people—impart greater strength to the realm, add new lustre and dignity to the Crown, and have the blessing of the Supreme, because it was founded on the eternal principles of justice and mercy. On Monday the debate was resumed by Sir ROUNDELL PALMER, who expressed regret that an imperious necessity had compelled him to separate himself from his party on this question, but he could not shut his eyes to the fact that the principle of the Bill was not mere disestablishment, but disestablishment accompanied by

universal disendowment; and to that principle he could not agree, because, in his opinion, it would be an act unjust in itself, injurious in its... without a precedent, even at the

separated from the State by the abolition of its po... privileges, but he was opposed to the confiscation of its private endowments on the false assumption that the property of the Church was national property, of which the State might dispose. He admitted that the episcopal and capitular revenues must go with the establishment, but if they were suppressed, as well as the endowments of all parishes of less than 200 Protestants, there would still remain to the Irish Church 340,000l. a year of parochial endowments. He showed that there were numerous parishes in Ireland where the Protestant population was sufficiently large to justify a permanent endowment, and he pronounced it a grievous wrong to these people to take away their endowments without their having done anything to forfeit them. If the House sanctioned the principle that the State might divert the funds of local communities to the maintenance of lunatics and other purposes, it would be impossible to say that the property of the Church. Sir J. D. COLERIDGE, the Solicitor-General, contended that the Irish Church held its property because it was Established, and for no other reason; that it was the great symbol of Protestant ascendancy in Ireland, and was maintained by English force, without which it would fall of itself. Mr. CHARLEY, Mr. VANCE, and Lord CLAUD HAMILTON opposed the Bill, which was supported by Mr. DOWSE, Mr. H. RICHARD, and Mr. LOWE, who maintained that it was too late to object to the introduction of voluntarism into Ireland, because in practice Ireland had been long ago driven into the voluntary system by the appropriation of her endowments to the religion of a small minority. The Irish Church had neglected every chance of reconciling itself with the Irish people, and the effect of its connection with the State had been to set three-fourths of the people against us. It was, therefore, self-condemned, and its fall was now unavoidable. Mr. GREENE opposed the Bill, which he characterised as a monstrous scheme of robbery and confiscation. On Tuesday the debate was resumed by Mr. WALPOLE, who condemned the Bill as violating fundamental laws, invading prescriptive rights, and severing the Royal supremacy from the Church of the country, thereby removing the control which was necessary to the freedom of the Church. Sir H. BULWER, Mr. AGAR ELLIS, Mr. MILLER, THE O'DONOGHUE, and Mr. G. H. MOORE spoke in favour of the Bill. Mr. MOWBRAY, Mr. DALRYMPLE, and Lord GEORGE HAMILTON opposed it. Mr. GATHORNE HARDY said that the policy of the Government partook far more of the character of vengeance than of justice. He denied that the Church was a badge of conquest; he looked at it rather in an imperial light—a token of the Protestantism of the Sovereign, and as a distinct recognition by the nation of the supervision and superintendence of the Almighty. The State did not enow the Church of Ireland, but was responsible for the protection of its property. To divert its possessions and convert them to any other purpose was simply confiscation. He did not believe that the abolition of the Church would restore peace and concord to Ireland. Its success in that respect was overshadowed by the recent Foman reception. Moreover, it was admitted that this Bill by itself would not be final, and the language used by Mr. Bright and others as to these ulterior measures must raise hopes in Ireland which never could be realised. He believed that the Bill would strike a fatal blow at the cause of true religion in Ireland, and that it was a destructive measure, wrong in the sight of God, and opposed to the interests of the empire. Mr. GLADSTONE, in reply, said that Mr. Hardy's speech was an indictment against the Irish people, and that the four nights' debate had failed to show that the Opposition had any alternative measure to propose. They had entirely set aside the proposals of the Commission and had either no plan at all, or it was the old plan of levelling up. The Royal supremacy was neither denied nor taken away by the Bill. The endowments of the Irish Church were given in trust for the benefit of the whole nation, but when it was found that they became mischievous or were usurped by a mere handful of the people, it became the business of the State to interfere. The charges of "robbery," "selfishness," "bribery," he accepted as proofs that the Government had carried out their pledges completely, but without harshness, and he concluded by repeating his confident anticipation that the settlement of this controversy was close at hand. At 20 minutes past 8 the House divided, when the numbers were—For the second reading, 368; against it, 250; majority, 118. The result was hailed with loud and repeated cheers from the Ministerial benches. The Bill was then read a second time, and Mr. GLADSTONE announced the Committee for Thursday, the 15th April. The Marine Mutiny Bill, the Brazilian Slave Trade Bill, and the Lands Clauses Consolidation Act Amendment Bill were read a third time and passed. The House then adjourned for the Easter holidays to Thursday, April 1.

City Intelligence.

MONEY MARKET.—Yesterday, being Good Friday, the Stock Exchange was closed. The following are from Thursday's quotations:—Consols 93 to 93½ for Money, and 93½ for Account, New and Reduced Three per Cents., 91½ to 91½; Bank Stock, 258 to 240 ex div.; Exchequer Bills, par to 5s. pm.; India Five per Cents., 112 to 112½.—FOREIGN:—Chilian Four and a Half per Cents. (1867), 94½ to 95½; Egyptian (1864), 89 to 90; Do. (1868), 76½ to 76½; Do. Debetures, 96 to 97; Italian

(1861), 55½ to 56½; Peruvian (1865), 78½ to 79½; Portuguese (1867), 36 to 37; Russian (1862), 86 to 87; Nicolas, 67 to 67½; Turkish Five per Cents, 41½ to 41¾; Ditto (1865), 64 to 65; United States 5-20 Bonds, 83½ to 83¾.

Metropolis and its Vicinity.

THE HOUSES OF PARLIAMENT.—In consequence of the large number of visitors who availed themselves of the opportunity last Easter of viewing the Houses of Parliament, the Lord Chamberlain has decided that they shall be open to the public on Easter Monday and Tuesday next, between the hours of ten and four.

THE EASTER VOLUNTEER REVIEW.—The official "detail" of the metropolitan corps of Volunteers who are to take part in the Review at Dover, on Monday next, thus divides the conveyance—South-Eastern Railway—from Cannon Street Station, 6150; from Charing Cross Station, 2906 men. London, Chatham, and Dover—from Victoria Station, 3595; and from Blackfriars, 577, making a total of 18428. The "detail" of county corps shows that 1431 men will travel by the South-Eastern, and 2798 men by the London, Chatham, and Dover, to be taken up at the various stations on the lines. The naval force which is to take part in the review is to be under the command of Capt. Arthur Hood, of the Excellent, gunnery ship, at Portsmouth. The Royal Sovereign, armour-plated turret-ship, carrying the flag of Capt. Hood; Scorpion, armour-plated iron turret-ship, Capt. Brooker, with the Staunch and Stork, gunboats, and the Ferret, 8, and Martin, 12, sailing brigs, sailed from Spithead for Dover on Thursday morning.

LAUNCH OF NEW SHIPS OF WAR.—Four new ships of war have recently been added to the British Navy. On Saturday, the 20th inst., the screw corvette, *Druid*, of 10 guns and 350-horse power, was launched from Deptford Dockyard. The *Princess Louisa*, who was accompanied by Prince Arthur, performed the ceremony of naming the vessel, which will be the last of a long list of ships added to the English navy from this yard. It was at Deptford that the *Pelican*, the first ship that sailed round the world, was constructed, and where, on her return, Admiral Drake entertained Queen Elizabeth on board the vessel, which was anchored opposite the slip from which it had been launched. Many ships famous in English history were subsequently built at Deptford, and Peter the Great there learnt the art of shipbuilding. The launch of the *Active* also took place on the same afternoon, from the Thames Ironworks, at Blackwall. This vessel was designed by Mr. Reed as the "sister" to the *Volage*, which was launched a few weeks previously from the same works. These two vessels are the first of a new class of iron-plated corvettes of the Alabama type, having great swiftness, but carrying only three or four powerful guns. Their burthen is 2320 tons, and they will be propelled by engines of 600-horse power. Their rate of speed will be an average of 16 knots an hour, and they will carry two 6½-ton guns on their upper decks, and a 6½-pounder on their poop and fore-castle. The *Andalous*, another addition to our navy, was recently launched from the yard of Messrs Napier, of Govan, near Glasgow. This vessel is a twin screw, and is the fifth of the class afloat.

ERNEST JONES DEMONSTRATION.—A demonstration to the memory of the late Mr. Ernest Jones took place yesterday afternoon in Trafalgar Square. The men of Hackney, Bethnal Green, Shoreditch, Spitalfields, Mile End, Poplar, &c., assembled at Bethnal Green at 2 o'clock, from whence they marched to Finsbury Square, where they were joined by the Islington and Hoxton contingents, and then proceeded to join the main body at Clerkenwell Green, from whence the procession, accompanied by several bands and banners, started at 4 o'clock for Trafalgar Square. The West-End procession, which embraced the German, French, Italian, and Polish members connected with the International Working Men's Association, assembled in Soho Square at half-past 4; and the South London procession assembled at the Obelisk, Blackfriars Road, at the same hour. The proceedings in Trafalgar Square commenced at 5 o'clock, and the speakers were Mr. G. J. Holyoake, Rev. Mr. Applebee, Messrs. L. Bradlaugh, G. Odgers, and L. Wade, Mr. Tincroft acting as chairman. The various societies of Irishmen in the metropolis took part in the demonstration, out of respect to Mr. Jones, for his defence of the Manchester Fenians in 1867.

THE OPENING OF PUBLIC MUSEUMS ON SUNDAYS.—A very large deputation from the Society for Promoting the Due Observance of the Lord's Day waited on the Premier at his official residence in Downing Street, a few days ago, and presented a memorial praying him to discourage the efforts now making to open the national museums and galleries on Sundays, after morning service, and to carry out the recommendation of the Select Committee by opening the British Museum, the National Gallery, and other similar institutions on two or three evenings of the week between the hours of seven and ten. The deputation comprised—The Bishop of London, the Earl of Shaftesbury, Lord Fitzwalter, Mr. T. Chambers, M.P., Mr. Kinnaid, M.P., Mr. Macfie, M.P., Mr. Floyer, M.P., Mr. Baines, M.P., Mr. M'Lagan, M.P., Mr. C. H. Mills, M.P., Mr. M'Laren, M.P., Mr. Stevenson, M.P., Mr. Holt, M.P., Mr. W. H. Smith, M.P., Sir R. Palmer, M.P., Mr. Cawley, M.P., Alderman Lusk, M.P., Mr. Abel Smith, M.P., &c. Mr. Gladstone told the deputation that the subject was one which the Government had not yet considered. He, however, recognised its importance, and promised to give his attention to the representations made to him. It was a matter upon which the Government would rather have to be guided by public opinion than by any feeling or sympathy of their own. In a religious view of the question, he believed the observance of the Sabbath was

conducive to the interests of religion, and in a moral and physical sense no doubt it would have to be very carefully considered before legislating upon it.—Immediately afterwards a deputation consisting of upwards of 100 persons representing the middle and industrial classes, had an interview with Mr. Gladstone, for the purpose of presenting a memorial in support of Mr. Gregory's motion, which will shortly come before the House of Commons for opening public museums, galleries, and libraries on Sunday afternoons. The deputation, which was under the auspices of the National Sunday League, was introduced by Mr. Gregory, M.P., who briefly explained that their object was to impress the Government with the idea that this movement was a really popular one, and that the alternative of opening on Saturday afternoons, which had been suggested by their opponents, would be really useless. Mr. Morrell, the hon. secretary of the Sunday League, having read the memorial, Mr. Gladstone, in reply, said that the matter would not be governed so much by the views and ideas of the Government as by the current of public opinion. He had just received a deputation holding contrary views to the gentlemen before him, and they had stated that the working classes were, generally speaking, adverse to the views advocated by the League. Mr. T. Chambers, M.P., had stated that his election for Marylebone had mainly been secured by his opposition to such measures, and the Rev. Mr. Murphy had adduced the nightly attendance at the South London Industrial Exhibition in support of opening the museums in the evenings. There could be no doubt that the religious observance of the Sabbath was the great and principal stay of religion in this country, and that the social and physical necessities of the people required an absence from all labour on that day. The Government, as such, had not yet entered upon a consideration of the questions which had been urged by the deputation, but they were prepared, so far as it depended upon them, to offer all reasonable facilities on week-day evenings for the opening of national institutions to which the working classes and the general population might resort.

THE LEADERS OF THE REFORM LEAGUE.—It is stated that Mr. Beales, late president of the Reform League, will shortly receive a county court judgeship. It is said that Mr. Howell, the late secretary to that body, has been appointed private secretary to a member of Parliament.

CIVIL SERVICE COLLEGE.—The project of this college has been well received both in India and the colonies as likely to supply a want generally felt amongst servants of the Crown abroad; and it is understood that a large sum will shortly be remitted to England with a view to the immediate establishment of the College.

A PENNY POST TO AMERICA.—The National Steamship Company have offered to the Postmaster-General to run large steamers with regularity once a week from Liverpool to New York, charging one penny per ounce for all letters, in order that the Post Office might be able to reduce the charge to the public to one penny per half-ounce.

ANOTHER ATLANTIC TELEGRAPH.—A new Atlantic Telegraph Company has been formed in New York, with the object of laying a telegraph cable from the coast of Plymouth, Massachusetts, to one of the Western Islands, a distance of 1500 miles, and thence, by a second section of cables, of 500 miles long, to the French coast. Each cable will be 2000 miles long, and 400 miles shorter than the cables now working. The Company intend using a new American invention, called the "Double Transmitter," by which, it is said, two separate currents of electricity can occupy the cable at the same time and travel in opposite directions.

THEODORE'S CROWN.—The crown of King Theodore of Abyssinia was bought at the capture of Magdala from a common soldier by Herr Von Rolffs, a Prussian officer attached to the expedition, and was by him presented to King William. His Majesty having had his attention drawn to Lord Napier's order forbidding the sale of articles taken by the army, has now sent the trophy to this country.

COBDEN CLUB.—The annual gold medal for 1868, offered by this Club for the best essay on some public question with which Mr. Cobden's political career was identified, has been adjudged to the Rev. Dr. Joshua Leavitt, D.D., of 3, Park Place, New York. The subject for competition was—"The best way of developing improved political and commercial relations between Great Britain and the United States of North America." The following subject has been chosen for the essay for the gold medal for 1869:—"Free Trade in its relation to the colonies and dependencies of Great Britain." The essays are to be sent in to Mr. T. B. Potter, M.P., Honorary Secretary, Reform Club, before the 1st January, 1870. No essay is to exceed in length 50 pages of the "Quarterly" or "North American Review." The committee reserve the right of publishing the successful essay.

TRINITY HOUSE.—At a special court held on Tuesday, at the Trinity House, the Prince of Wales was unanimously elected an Elder Brother of the Corporation, in the room of the late Admiral Gordon.

THE LICENSING SYSTEM.—A deputation from Lancashire, Cheshire, Northumberland, Cumberland, Derbyshire, Durham, Essex, Herefordshire, Kent, Lincolnshire, Middlesex, Shropshire, Staffordshire, Warwickshire, and Yorkshire, had an interview with the Home Secretary a few days since, to present a memorial relating to the present system of licensing public-houses and beer-houses. The deputation was introduced by Colonel Wilson-Patten, and among the speakers were Mr. Ashworth, of Salford, Lord Teignmouth, and Mr. R. Fowler, who urged that the present licensing system is fraught with injurious results to the working classes, as leading to the increase of intemperance and its consequent evils, and to the increase of crime and taxation. Mr. Bruce said

that both he and his colleague, Mr. Lowe, nised the importance of the deputation, and the evils which had been used by the Government. He admitted that the evil complained of was of magnitude and urgency which demanded the attention of the legislature, and he assumed the position that the present Government had taken subject under their most careful consideration. The question was one of the gravest importance, and had occupied the attention of successive Governments. The evil was admitted but the difficulty in applying the remedy was such that gentlemen who were most desirous of reform amongst themselves as to the mode of proceeding being of opinion that the licensing system should be in the hands of magistrates, whilst others held different opinions. The subject was surrounded by other circumstances which would necessarily be taken into account by Parliament with so important a subject. He had stated, and his colleagues were very desirous of doing the subject if they could immediately, but he did not hold forth any hope that it would form part of legislation this year.

THE HOLBORN VIADUCT.—It is stated that a viaduct over the Holborn Valley will be open to the public in July or August next.

THE TOWER SUBWAY.—The directors of the Tower Subway Company have completed the purchase of land required in Middlesex for 1900, and the right of passing under one-half of the street. The contractor has commenced the shaft on the freehold of a house, with river frontage, which has been purchased on the Surrey side, and the acquisition of passing under the other half of the street for the sum of 16000, an arrangement which will enable the tunnel to be shortened by about 1000, whereby a saving of about 8000 in the cost will be effected. The directors believe that the whole of the works will be completed within the estimated 16,000.

POST-OFFICE NOTICE.—The Postmaster-General has issued a notice stating that letters in pillar letter-boxes in London during the day of Sunday, are included in the morning mail, and in the first morning delivery in London. Letters posted at receiving offices cannot be collected because no early morning collections or deliveries can be made from such offices. To prevent letters being delayed through the day, letters posted at receiving offices, it is intended that letter-boxes at such offices shall be closed at night, from 9 P.M. till 8 A.M., and during the day of Sunday.

THE NEW COURTS OF JUSTICE.—Mr. F. W. C.E., having been requested by the Chancellor of the Exchequer to state his views on the subject of the new courts, has made a short report on the matter. In regard to architectural efforts he is of opinion that the superiority of the Thames Embankment is unequalled in London for a great national building, but he attaches importance to facility of access to the main floor of the building, and while the level of the Strand is 16 feet higher than the Strand, the level of the Thames Embankment is 30 feet below the Strand, showing a considerable difference in level. Mr. Edward Ryde has expressed his opinion for him that the abandonment of that site as a situation of the Embankment site would be a great loss. For in Carey Street the Government have cleared 7½ acres for 800,000, or 100,000 per acre, one-half of which amount would be required for the cost of 7½ acres on the Embankment site at 1,125,000, or 150,000 per acre, and 400,000 realised by the above re-sale, the 725,000. With regard to the approaches, Mr. Ryde is of opinion that the adoption of the Embankment site would create an intolerable blockade of Carey Street and the Strand by carriages crossing from the Law Courts; and that upon the whole the Strand site, though inferior in architectural appearance, would be the most advantageous of the two. It would be a leading thoroughfare on its Holborn side. He proposes, therefore, the construction of a street in continuation of Piccadilly and Carey Street, crossing Farringdon Street, and the beginning of Cheapside, and widening Great Turnstile to give a carriage approach from Holborn to the new Law Courts. Portions of such a street should be shared in equal proportions between the Government and the latter obtaining a new street which would be an acknowledged want, the former paying for it by its Law Courts the leading thoroughfare. Mr. Shields proposes further, that a railway should be allowed to construct a railway under the Strand and under Cheapside—in fact, from Kennington to Mansion House—and that the cost of the railway should be required to widen Coventry Street, Lord Poulter, the space so acquired being made available for the construction of the line and stations, and to raise the bottom of the Serpentine to a level of 1 foot with the material excavated from the tunnel. Mr. Ryde has estimated for Mr. Shields the cost of this project as follows:—Net cost of the project (nearly four miles) and widening streets, assuming the net receipts at 600 per acre, or 124,800 per annum, this would pay for the capital of 2,080,000, leaving a surplus of 1,955,200. The cost of the purchase of property and improvements on the new streets, with all modern improvements, at 1,600,000; deducting the railway, there remains a cost of 400,000, to be divided between the Government and the metropolis. On Monday

stands. Peas were a slow sale on former terms. The Flour trade was very quiet, at the recent decline in the quotations.

WEDNESDAY, March 24.

Fresh up to Mark Lane this morning the receipts of Wheat from Essex and Kent were only moderate, but the quality was good; for both red and white parcels the demand was inactive, at late currencies. There was a good show of foreign Wheat, for which, however, very little inquiry was experienced, at previous prices. Floating cargoes of Wheat were inactive. Other kinds of produce afloat commanded but little attention. The Barley trade was firm, but the business doing was far from extensive; the supply was moderate. Malt was in limited request at late rates. In Oats, the show of which was moderate, transactions are to a fair extent, at Monday's prices. Beans and Peas were dull, at about late prices. Flour moved off quietly on former terms. Linseed and Rapeseed were firm. Clover seed was steady in value; otherwise agricultural seeds were quiet.

SEED MARKET.

We have to report an increase of activity in the agricultural seed trade. English Red Clover seed continues to come to hand in small quantities, for which the holders demand long values; new German Red moves off at last week's currencies, in white Clover seed there has been an advance of 4s. to 5s per cwt; Alsike seed has also risen considerably in value, the recent low prices of the latter having attracted the attention of speculators, and some heavy sales have in consequence been effected. Trefolls meet with an improved demand. In French Italian Rye grass we note a decline of 1s. per cwt. Mustard seed is exceedingly firm. For Rape seed we have a better inquiry. Spring Tares meet with a ready sale at last week's quotations. English sowing Flax seed is in fair request. Bird seeds are without alteration. French Sainfoin seed, being in short supply, is 2s. per qr. dearer.

JOHN SHAW & SONS, 16, Water Lane.

with great gratification that we announce our permission to refer upon any occasion to the various Heating Apparatuses at the above, where our "BOILER SYSTEM" has for years been subjected to the most critical tests with every satisfactory result. It is matchless for efficiency, and is working the apparatus on record. These are no theoretical statements, but positive facts, and it is not too much to add, that no boiler can boast a parallel.

For List of Details, see "ILLUSTRATED BOOK OF DESIGNS" (12th Edition), which can be obtained by addressing a note to

WEEKS AND COMPANY, HORTICULTURAL ENGINEERS, &c., KING'S ROAD, CHELSEA, S.W.

ESTABLISHED OVER QUARTER OF A CENTURY

FRANCIS MORTON & CO., LIMITED.

HEAD OFFICES AND WORKS, LIVERPOOL.

LONDON BRANCH--35, PARLIAMENT STREET, WESTMINSTER.

GLASGOW BRANCH--145, QUEEN STREET, ROYAL EXCHANGE SQUARE.

AGRICULTURAL FIRE-PROOF IRON ROOFING, BUILDING, AND SHEDDING OF EVERY DESCRIPTION.

THE special attention long given by F. M. AND CO. to the constructive details of IRON ROOFS, BUILDINGS, &c., entitles them to offer the guarantee of a practical experience, extending over many years, in the Designing and Construction of Iron Roofs and Buildings for almost every variety of purpose, in all parts of the world, thereby avoiding the danger of accident frequently arising from faulty execution. This Department of F. M. AND CO.'S business is placed under the special supervision of the Company's Architect, whose professional skill ensures the preparation and erection of Buildings of the highest and most complete quality.

FRANCIS MORTON & CO.'S

IRON BUILDINGS

ARE SPECIALLY ADAPTED FOR

- VOLUNTEER DRILL HALLS;
- ARCHERY AND PUBLIC GROUNDS;
- CRICKET PAVILIONS; BOATHOUSES;
- REMOVABLE AND PERMANENT BILLIARD ROOMS;
- RIDING SCHOOLS; GYMNASIUMS, &c.

Illustration of Shooting Box, at Country House, &c., as erected for the Right Hon. Lord ... -- Designed for remote situations of the property.

Illustration of F. M. & Co.'s Single Span Permanent Hay Barn, from 15 feet to 45 feet span. Fireproof, economical, efficient, quickly erected, and ensuring the Hay Harvest being housed and stored in the best condition for market or home use.

All inquiries should state span required, length of barn, height from ground line to square, and if timber uprights (which are the cheapest) could be found on the spot, or if iron columns are desired.

FRANCIS MORTON & CO.'S

IRON BUILDINGS

ARE SPECIALLY ADAPTED FOR

- COVERED FARM YARDS; GRANARIES;
- CATTLE SHEDDING; BARK HOUSES;
- HAY BARNES; CORN SHEDS;
- LABOURERS' COTTAGES; ENTRANCE LODGES;
- SHIPPONS; STABLING, &c.

Illustration of Farmyard covered with F. M. & Co.'s Galvanised Iron Fire-resisting Roofs. The covering in of Stack and Rick Yards, though so strongly recommended by the highest practical authorities, has hitherto been attended with too much uncertainty and expense, owing to the costly and perishable roofing usually proposed, affording at the same time no security against fire. Our Iron Roofs are economical, easily and quickly erected, save all cost of future repairs and maintenance, cannot be injured by violent winds, are removable without injury, and, above all, fire-proof.

Crops thus housed are effectually protected from the disastrous ravages of vermin, wet, hailstones, fire, and general waste, and are brought to market in the finest condition.

THE GENERAL LAND DRAINAGE and IMPROVEMENT COMPANY. Directors: Thomas Chapman, Esq., F.R.S., John C. Cobbold, Esq., Henry W. Carr, Esq., The Right Hon. Viscount Compton, The Right Hon. Viscount Hornby, The Right Hon. Viscount Fitzroy, The Right Hon. Viscount de Grey, The Right Hon. Viscount de Grey.

AGRICULTURAL IMPROVEMENTS of any kind are executed by the Company, or the outlay thereon repaid to the owners who prefer to execute the work themselves.

THE RIGHT HON. VISCOUNT COMPTON, The Right Hon. Viscount Hornby, The Right Hon. Viscount Fitzroy, The Right Hon. Viscount de Grey, The Right Hon. Viscount de Grey.

PRACICAL GEOLOGY - KING'S COLLEGE, LONDON. PROFESSOR TENNANT, F.R.S., will give a COURSE OF LECTURES ON GEOLOGY AND MINING.

THE RIGHT HON. VISCOUNT COMPTON, The Right Hon. Viscount Hornby, The Right Hon. Viscount Fitzroy, The Right Hon. Viscount de Grey, The Right Hon. Viscount de Grey.

YEVING LECTURES - ROYAL SCHOOL OF MINES, Jermyn Street. - PROFESSOR F. GUTHRIE will COMMENCE A COURSE OF EIGHT LECTURES ON LIGHT ON MONDAY NEXT, APRIL 5, at 8 o'clock.

Home News.

THE COURT. - The Queen and Royal family continue at Windsor. On Thursday, the 25th, Prince Arthur arrived at the Castle from Greenwhich Park.

On Friday morning the Queen and Royal family attended Divine service in the private chapel. The Rev. R. Du'worth preached the sermon.

In the afternoon the Queen drove out with Princess Louisa and Prince Arthur. On Saturday morning the ceremony of churching Princess Christian took place in the private chapel of the Castle.

The Duke of Windsor officiated. The Duke of Roxburghe left the Castle. On Easter Day the Queen and Royal family attended Divine service in the private chapel.

The Dean of Windsor officiated, and administered the Sacrament. Prince and Princess Christian visited her Majesty, and remained to luncheon. On Monday the Queen drove out in the morning and afternoon.

Prince Arthur went to Dover, to be present at the Volunteer review, and returned to Windsor at night. On Tuesday morning the Queen walked and drove in the grounds with Princess Louisa.

Wren Hoskyns, by large majorities over Sir R. Bagot, and Mr. Clive and Mr. Chandos. The numbers being, Wren Hoskyns, 1035; Sir R. Bagot, 800; Mr. Clive, 750; Mr. Chandos, 700.

THE ELECTION PETITIONS. - The election of Sir W. Wakefield before Baron Martin, on the 13th inst. The two South Hants petitions are to be tried at Winchester, before Justice Willes, on the 26th inst.; and the Warwick County petition is to be tried before Justice Willes on the 5th of May.

BISHOPRIC OF LINCOLN. - The enthronement of Bishop Wren Hoskyns, at Lincoln Cathedral, took place on Thursday with the usual pomp.

THE REVENUE. - The Revenue returns for the year ended 31st March 1889, show a total of £291,772,000, on the year ended 31st March 1888 of £291,772,000.

THE BISHOPRIC OF NEW ZEALAND. - The Rev. W. G. Cowie, rector of St. Paul, and formerly chaplain to the late Bishop of Calcutta, has accepted the Bishopric of New Zealand.

THE BISHOPS ON THE IRISH CHURCH. - Some of the Church Papers, which profess to be well informed, state that the Bishops of Gloucester, Lichfield, and Peterborough are the only three of the British prelates who dissent from the policy recommended by the rest of the episcopate.

Foreign.

FRANCE. - It is confirmed that the soldiers on six months' furlough have been ordered to join their regiments on the expiration of their leave of absence on the 31st ult.; but it is semi-officially added that there is nothing unusual in this arrangement.

In the sitting of the Legislative Body on Wednesday, M. Kolb detailed the appointment of the Franco-German Commission entrusted to examine the pending commercial questions.

He asked whether it was the intention of the Government to substitute another treaty in place of the present treaty of commerce, and whether the tariffs would be modified in any way.

M. Rouher, Minister of State, in reply, declared that the Commission had not received any programme for its deliberations, and that no modification of the tariffs would be introduced in future without an inquiry.

Two Bills, the first relative to the suppression of the workmen's books (livrets), and the second granting the concessions for several new lines to the Northern Railway Company, were laid on the table.

In the sitting of Thursday M. Picard's interpellation relative to bribery or corrupt practices at elections came on for discussion.

for the Treasury. The *France* states that a deputation from the Sporades has arrived in Paris to solicit the assistance of France against the repressive measures that have recently been imposed by the Ottoman Government. It appears, however, that the deputation will not be received by M. de Lavalette in person or in his name. The *Opinion Nationale* says that several persons, among whom is M. Gustave Flourens, have been arrested on charges connected with their conduct at some of the recent public meetings in Paris.

SPAIN.—The Committee's project for the new Constitution was read in the Cortes on Wednesday evening. It proposes an hereditary monarchy, Cortes, consisting of a Senate and a Congress, to make laws, which are to receive the King's sanction, and to be promulgated by him, and the monarch is to exercise the executive power through his ministers. The Catholic religion is to be maintained by the nation, but Spaniards and foreigners are to be guaranteed free exercise of other forms of belief, subject only to the laws of universal morality and right. The Bill for the new loan was carried. On Thursday the Cortes were occupied with the election of a secretary and two vice-presidents. Marshal Serrano, in reply to a question, declared that the deputies from Cuba would soon take their seats in the House, the Government having sent out to the island the necessary orders for their election. In the sitting of Wednesday, Senor Posada Herrera asked whether it was true that the Portuguese Minister had informed the Provisional Government that Dom Fernando would not accept the Spanish Crown. Senor Lorenzana replied that the Government had received no official communication on the subject. General La Torre has been appointed Captain-General of the Philippine Islands. Fifty Spaniards received the communion in Madrid on Sunday morning according to the Protestant rite. This is the first time that this ceremony has been celebrated in the capital since the time of Philip II. The reformed faith is also making great progress at Seville. A rumour is current that a Carlist conspiracy has been discovered in Navarre, and that a general, a colonel, and a captain have been arrested on suspicion.

PORTUGAL.—The funeral of Captain Roderick Dew, of her Majesty's ship *Northumberland*, took place in the Protestant Cemetery at Lisbon on Friday. The members of the British Legation attended, with several British, American, Portuguese, and Prussian officers.

SWITZERLAND.—An address, signed by 4000 citizens, has been presented to the Government of the Canton of Geneva, asking that energetic steps should be taken to resist the terrorist attitude assumed by the International Association of Workmen.

BELGIUM.—The Court of Assizes at Bruges yesterday passed sentence on the prisoners accused of incendiarism at St. Genois. Vanderputte was sentenced to 12 years' hard labour. Virginie Takkens to 15 years' imprisonment. Van Overshelder to 10 years', and De Poorter to 5 years' imprisonment.

HANOVER.—Professor Ewald, who was lately acquitted by the Supreme Tribunal at Gottingen on a charge of high treason, was on the day of his acquittal selected unanimously by a large meeting of electors as their candidate for the Parliament of the Northern Confederation.

AUSTRIA.—The official *Wiener Zeitung* publishes an Imperial decree sanctioning the finance law and the estimates for 1869. The Grand Duke Vladimir of Russia, travelling *incognito*, arrived at Vienna on Friday, on his way to Italy. His Imperial Highness was visited by the Emperor, and afterwards returned the visit. The Baroness Julia Ebergényi, who was some time ago sentenced to imprisonment for life, for having, with Count Chorinsky, poisoned the wife of the latter, has made an attempt to escape from the prison of Nendorf under the disguise of a nun. She was, however, detected and stopped by one of the gaolers at the moment she was about to pass through the gates. A lady belonging to a high family of Vienna was waiting for her outside with a carriage.

HUNGARY.—The Emperor Francis Joseph arrived at Pesth on Monday. Of the elections to the Hungarian Diet which have been held up to the present time 230 have resulted in favour of the Deak party and 160 in favour of the Opposition.

TRANSYLVANIA.—A Ministerial order has been issued, prohibiting the continuance of the committee which has lately been carrying on a political agitation on behalf of the Roumanian nationality.

RUSSIA.—An ordinance has been issued granting a furlough to the sailors of the Imperial Navy the unlimited furlough which had recently been withdrawn. An Imperial ordinance has been issued, decreeing that the former practice of coining three-rouble gold pieces shall be resumed. The standard of this coinage is to be 88, and it will contain 81 parts gold.

ITALY.—Lieut. General Moring arrived at Florence on Tuesday, sent by the Emperor of Austria to return the complimentary visit of General Della Rocca to Trieste. The diplomatic despatches relating to the negotiations on the Roman question were distributed on Tuesday among the members of the Chamber of Deputies. They consist of 69 documents, exchanged, with few exceptions, between Paris and Florence, and of which the dates range from the 7th December, 1867, to the 1st December, 1868. These despatches testify to the firm attitude of the Italian Government, and its persistence in endeavouring to obtain the establishment of a *modus vivendi* between Italy and Rome, and the recall of the French troops from Civita Vecchia. The negotiations relative to the *modus vivendi* remained without result, owing to the resistance of the Papal Government. A note of the Marquis de Moustier, of the 31st October last, makes the recall of the French troops depend upon the adhesion of the Pope and of the Catholic world.

GREECE.—By a Royal decree published at Athens on Monday the Chamber is dissolved. The elections for

the next Parliament will take place on the 28th of May. The Ottoman Ambassador had his first audience of the King on Monday. On Thursday the King and Queen left for Corfu, where they intend to pass the summer months.

TURKEY.—The Prince and Princess of Wales arrived at Constantinople on Thursday morning, in the *Ariadne*, accompanied by the *Psyche*. The *Caradoc*, the Sultan's yacht, and nine other steamers, had gone into the Sea of Marmora, with the British residents on board to welcome their Royal Highnesses. The Minister for Foreign Affairs and the Sultan's Grand Chamberlain went on board the *Ariadne*, and all landed in the Sultan's barca at the Salihbazar Palace, the usual salute being fired. The royal party were preceded by a guard of honour and the Sultan's band. All the foreign steamers in the port were dressed with flags.

EGYPT.—The Prince and Princess of Wales, after inspecting the works of the Suez Canal, left Port Said on Friday evening, and reached Alexandria on Saturday morning. Their Royal Highnesses left Egypt on Monday, in the *Ariadne*, for Constantinople.

CAPE OF GOOD HOPE.—Accounts from the Cape to the 20th Feb. state that a tract of country 100 miles long, and varying in breadth from 15 to 150 miles, had been desolated by a fire unparalleled in the annals of the colony. The weather had been unusually hot and dry for the previous six weeks. On the 9th of Feb. the temperature throughout the colony rose to a more intense heat than ever previously known. During the morning scorching hot winds blew from the north-east, and in the afternoon a fire broke out at several places in the burnt district, and wrapt millions of acres in an enormous conflagration. The cultivated lands, farm buildings, native forests and bush, farm stock, and wild animals sharing the same fate. In a few hours hundreds of pounds' worth of property was destroyed, the European colonists and natives alike suffering, and in the majority of cases the sufferers losing all they possessed. Several persons were also burnt to death, the casualties in the majority of cases occurring to the natives and to the wives and children of the colonists. Those saved had to take shelter in the rivers, water dams, and wet ditches, where many of them were badly scorched. The calamity occurring just after the harvest, which had been an unusually good one, and destroying its produce, has caused great distress in the districts of Swellendam, Riversdale, Mossel Bay, George, and Oudtshoorn, the Knysna, Humansdorf, and Uitenhage. It is believed that the damage would have extended further but for the rain setting in. Meetings have been held in the colony to relieve the sufferers, and an appeal has been sent home to England. The Legislative Council elections had taken place in the western province, and had proved largely in favour of the party opposed to the introduction of ecclesiastical support. Elections were also taking place in the eastern province, and there the Conservative element was also expected to predominate. The Free State and Basuto difficulty had been settled.

INDIA.—Shere Ali, the Ameer of Afghanistan, arrived at Umballa on the 24th, and the Earl of Mayo arrived on the morning of the 27th ult. They met with a grand reception. The road from the railway to the camp was lined with troops. The Viceroy's Durbar, which was held on Saturday last, was a great success. Lord Mayo welcomed Shere Ali, in the name of the Queen, and expressed a hope that the interview would be the commencement of a new era of mutual confidence. The Ameer was much gratified with his reception. The presents of the Government to Shere Ali are valued at 10,000*l.* On Monday the Viceroy returned the visit of the Ameer at Umballa. Presenting his own sword to the Ameer, Lord Mayo declared that the British would always be friendly towards him.

CHINA.—It is rumoured that an Imperial edict has been issued, prohibiting the cultivation of the poppy.

JAPAN.—The Pacific mail steamer *Hermann*, with Japanese troops on board, has been totally lost 70 miles north of Yokohama. The loss of life is estimated at from 250 to 300 souls. The German bark *Madeira* has been totally lost in Pratos shoals.

UNITED STATES.—Ex-President Johnson is not dead, as reported last week, but is still ill. The Bill passed by the Senate to modify the Tenure of Office Act was defeated last week in the House of Representatives by a majority of 99 to 70. The House insisting on the repeal of the Act, and the Senate insisting upon its being merely modified, both Houses agreed to refer the measure to a joint Committee of Conference, and the Bill has been finally passed by both Houses as reported back from the joint Committee. The Bill is now substantially the same as the one adopted by the Senate. By its provisions the absolute removal of officials by the President is still prohibited. Should the Senate reject his nomination of any public officer, the latter's predecessor is to be considered reinstated in office. The Foreign Affairs Committee of the House of Representatives have reported a resolution authorising the President to recognise the independence of Cuba. The Legislature of Massachusetts has ratified the 15th constitutional amendment, prohibiting the denial or abridgment of the right to vote on account of race, colour, or previous condition of servitude. The Senate of Columbia has rejected the treaty concluded by Mr. Cushing for the construction of a canal across the Isthmus of Darien.

BRAZILS.—General Polydoro, and not the Count D'Eu, will succeed the Marquis de Caxias in command of the Brazilian forces in Paraguay. A second Argentine expedition has been sent to the interior of Paraguay. Nothing positive was known of Lopez, he is said to have 18 cannon and 3000 men, with abundance of food, in the mountains, but his ammunition was said to be scarce. Senor Paranos has arrived at Assumption.

CUBA.—General Dulce has telegraphed to Madrid that before a fortnight has elapsed the island will have been completely extinguished.

CHILI AND PERU.—Earthquake shocks were experienced at Santiago, in Chili, with alarming violence. Scarcely a day passed without one or more being experienced. In Peru, also, earthquakes occurred in the interior, creating great consternation.

Parliament.

THE House of Commons reassembled on Tuesday after the Easter recess. The ATTORNEY-GENERAL called attention to the report of Baron Macclesfield tried the late election petition for Norwich, to the effect that corrupt practices had extensively prevailed at that election, and moved an Address for a Commission to inquire into the existence of such practices at Norwich. Mr. C. S. REID supported it. Mr. GATHORNE HARBY supported it. Mr. GATHORNE HARBY reported the extensive prevalence of corrupt practices, the House had no objection but to agree to a Commission almost as a matter of course. After some remarks by Mr. H. GENERAL moved a similar Address in the case of water, against which a report had been presented by Mr. Justice Blackburn. The motion was agreed to without opposition. The second reading of the Metropolitan Poor Act (1867) Amendment Bill was proposed by Mr. GOSCHEN until next week. The Valuation of Property Bill was read a second time after some remarks by Mr. HENLEY, Mr. W. SMITH, and Mr. LOCKE, on the understanding that they were committed to nothing beyond the establishment of a common basis of rating. The Select Committee on the Endowed Schools Bill was nominated. Today Mr. STAPLETON gave notice that on Tuesday next he will ask the Home Secretary whether attention has been called to a ritualistic procession which took place on Good Friday in St. George's-the-East, and whether such processions are in accordance with the law. Mr. GREGORY gave notice that on the 30th inst. he will move that the British Museum and other public buildings should be opened to the public on Sundays, after morning service. Mr. JENKINSON gave notice that on the motion for the introduction into Committee on the Irish Church Bill, he will move that the compensation should not be taken out of any funds in the possession of the Irish Church. The House was left sitting.

City Intelligence.

BANK RATE OF DISCOUNT.—The Directors of the Bank of England on Thursday made an advance of 1 per cent. in the rate of discount, which has been raised from 3 per cent., at which it was fixed on the 24th December last, to 4 per cent.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 92½ to 92½, both for Money and Account; New and Reduced Three per Cent. at 91½; Exchequer Bills, 1s. to 5s. pm.; India Five Per Cent., 112½ to 112½.—FOREIGN: Brazilian, 79½ to 79½; Egyptian (1868), 76 to 76½; Ditto (1864), 86 to 86½; Viceroy's Seven per Cent., 80½ to 81½; Do. per Cent., 95½ to 95½; Italian, 54½ to 55; Portuguese Loan, 81 to 85; Peruvian, 78½ to 79½; Portuguese Loan, 36½; Orel, 81½ to 82½; Nicolas, 66½ to 67; Moscow, 79½ to 79½; Charkof, 77 to 77½; Spanish, 30½ to 31; Turkish (1862), 66½ to 67½. Ditto Six per Cent. at 41 to 41; Ditto Five per Cent., 40½ to 41. United States 5-20 Bonds, 83 to 83½; Erie, 24½ to 25; Illinois 96½ to 97½.

Metropolis and its Vicinity.

THE EASTER REVIEW AT DOVER.—The Volunteer Review on Monday took place under circumstances which are not likely to be soon forgotten. The morning was ushered in by a hurricane, during which the Majesty's training brig *Ferret* was wrecked on the Admiralty Pier, the Castle heights were covered with snow, and the Volunteers on their arrival at Dover found themselves exposed to drifts of hail so thick and violent that the object of their journey seemed hopeless of attainment. Soon after 7 o'clock the special trains from London began to arrive by both the Southern and the London, Chatham, and Dover Railway. Among the first corps which arrived were the 3rd London, the 37th, the 40th, the 48th Middlesex, and the 3d Middlesex Artillery. The Hon. Artillery Company came down in the course of the morning, the guns having been brought down on Saturday. At 9 o'clock bands were playing in all directions, and 16,000 Volunteers were already preparing for the muster on the various points of rendezvous along the beach. But at 9 o'clock the weather became worse than ever, and in another quarter of an hour rain and sleet were falling, and the wind had risen to a hurricane. The tide also was rapidly rising, and an alarm from the Admiralty caused every one to run in that direction, where a grand but unexpected spectacle was witnessed in the total destruction of her Majesty's ship *Ferret*. The *Ferret* and the *Marten*, companion training brig, had come round from Portsmouth on Saturday, and were part in the naval operations at the review, and were moored to buoys on the east side of the Admiralty pier. The *Ferret*, which carried eight guns, and had a crew of 17 men, seven or eight stewards, and 38 boys, after rolling heavily for some hours during the gale, length parted from her moorings, and was instantly let go, but she was rapidly driven against the pier. The shouts of those on board were heard by the

that for the same description of house elsewhere he would have to pay at least one-third more rent, and at the end of his 21 years have no more title to the property than on the first day he entered on its occupancy. After the stone was laid on Tuesday, Lord Shaftesbury dwelt upon these advantages, and above all on the enormous benefits which must accrue to the working men from having clean, well-ventilated, and wholesome dwellings instead of being huddled together as they now were in crowded sties, the very atmosphere of which so depressed the vital system that drinking and all its hideous train of vices was almost forced upon the poor. He avoided expressing any opinion as to the financial results of the company, but did not conceal his admiration of the good work they had begun, and earnestly hoped that it would be as successful to them as it must in any case be beneficial to the working men who would tenant the houses. He believed in the goodness of the scheme, as he believed in the excellency of most of the efforts which were now fortunately being made for the benefit of the artisan and mechanic, and all the upper class of handicraftsmen; and he thought the day was not far distant when as classes they could be pointed to as models of frugality, temperance, and industry. The Hon. Arthur Kinnaird also addressed a few words to those who had come to witness the laying of the stone.

BEARDS AND MOUSTACHES FOR THE POLICE.—By direction of the Commissioners of Police, an order was read on Wednesday at every station of the force, stating that the Metropolitan Police will in future be permitted to wear beards and moustaches. The order was received with general satisfaction by the men.

THE PUBLIC HEALTH.—The weekly return of the Registrar-General states that in the week that ended on Saturday, March 27, 4623 births and 3594 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 29 per 1000 persons living, being 26 per 1000 in London, 36 in Edinburgh, 33 in Dublin, 31 in Bristol, 17 in Birmingham, 31 in Liverpool, 32 in Manchester, 25 in Salford, 31 in Sheffield, 32 in Bradford, 21 in Leeds, 30 in Hull, 26 in Newcastle-upon-Tyne, and 46 in Glasgow. The rate in Berlin was 34 per 1000 during the week ending the 25th ult. In London the births of 1121 boys and 1076 girls, in all 2177 children, were registered in the week. In the corresponding weeks of 10 years 1859-68, the average number, corrected for increase of population, was 2259. The deaths registered in London during the week were 1590. It was the 12th week of the year, and the average number for that week, corrected for increase of population, was 1603. The present return is therefore 13 below the estimated amount.

Provincial.

BIRKENHEAD.—On Saturday morning the turret-ship Captain, built and armoured on the principle of Captain Cowper Coles, was successfully undocked at the works of Messrs. Laird, in the presence of the First Lord of the Admiralty and a large number of naval officers. As soon as she had cleared the shed under which she had been built, her telescopic funnel was raised, steam got up, and everything held in readiness for a trial of her engines. By the assistance of powerful steam-tugs she was taken into the Alfred Dock, where she was moored and visited by Mr. Childers and a large number of naval and scientific men. The engines were worked for several hours in a highly satisfactory manner. The huge turrets were also worked in the presence of Mr. Childers, by steam as well as by hand-power. In 45 seconds the turret made a complete revolution, and it was found that at any point, and without the slightest difficulty, it could be stopped or reversed.

BRIERLY HILL.—On Sunday morning the nine men and three boys who were so marvellously delivered from Lock's Lane Pit, attended Brierly Hill Church, for the purpose of offering up public thanksgiving for their restoration to their families. The men sat in a body on seats provided for them in the centre of the church, and immediately in front of them were Mr. Frederick Smith, chief agent for the Earl of Dudley, and the heads of the various departments in connection with the mining estates. Only one or two of the men were able to walk to church, and those who did so lived in the immediate neighbourhood. The others were conveyed in cabs. The fact that they would attend church having been publicly announced there was great excitement in the neighbourhood, and many thousands crowded the street and churchyard for the purpose of obtaining a view of persons who were looked upon as men raised from the dead. The church itself was crowded, and many hundreds were obliged to stand during the service.

BURY ST. EDMUND'S.—A proposition is in the course of discussion by the magistrates of Suffolk to amalgamate the police forces of the east and west divisions of that county, which are now separately officered and managed.

CAMBRIDGE.—Mr. G. H. Hallam, scholar of St. John's, and Mr. J. S. Reid, of Christ's, were bracketed equal for the place of Senior Classic in the Classical Tripos. Mr. Hallam was educated at Shrewsbury School, was elected Craven University scholar last year, and obtained the Browne Medal for a Latin ode in 1867, and for a Greek ode in 1867 and 1868. Mr. Reid was educated at the City of London School, which has turned out three Senior Classics and two Senior Wranglers during the last twelve years. Mr. Warr who was third, was educated under Dr. Turner, at the Royal Institution School, Liverpool, was Scholar of Trinity, and Porson prizeman and Members' prizeman.

DERBY.—On Monday a party of Derby gentlemen, including Mr. Joseph West, his brother, Mr. Eli West, and Mr. Jas. Haywood, were returning from the meet-

of Mr. Meynell Ingram's hounds, and began cantering across the grass-land in Foston Park, Mr. Joseph West being in the rear of the others. The party pulled up in front of the hall, when Captain Lovett, of Barton Fields, shouted out "I'm sure there is a man killed." The party then turned to look, and saw the body of Mr. Joseph West lying at the foot of a tree. They rode up and found him dead, the front of his head and face being fearfully battered in. It appears that there were only two trees in that part of the park, and the impression is that Mr. West was riding his horse along the park without taking notice where he was going, and that he struck the trunk of the tree with such force as to cause instantaneous death. He was only 27 years of age. An inquest was held on Tuesday, when a verdict of Accidentally Killed was returned.

KINGSTON.—The Corporation of Kingston-on-Thames received last week a communication to the effect that the Secretary of State declined to grant a provisional order to take certain lands, known as Ham Fields, for the purpose of sewage irrigation. The Government inquiry into the merits of the petition, presented by the Corporation to the Home Office, praying for powers to take the land in question, closed on the 19th ult.

LEAMINGTON.—On Monday morning the Leamington Local Board held a special meeting to consider an offer received from the Earl of Warwick, to take the whole of the sewage of the town for a term of 30 years, and dispose of it by irrigation on his lordship's estate, two or three miles south of this town. The local board are to lay down the requisite mains, construct the necessary works, and pump the sewage to a given point on the estate, and in return his lordship will pay the board 150*l.* annually for the sewage. The terms proposed by his lordship were unanimously approved of by the board, and the offer was accepted, and will come into operation on the 25th March, 1870, by which time Lord Warwick will be prepared to dispose of the sewage on his estate.

LYNN.—On Monday afternoon, in consequence of an unusually high tide, nearly 50 feet of the bank of the River Ouse split and subsided into the river close to the sluice of the St. Peter's drain, and about half a mile from St. Germain's church. Great fears were entertained that at high water in the evening the tide would come through the breach and flood the country, as in 1862; but the measures which were promptly adopted to secure the breach were effectual in preventing the threatened inundation.

MAIDSTONE.—The Government has offered a reward of 100*l.*, with a free pardon, to any accomplice, not being the actual culprit, who will give such information as will lead to the conviction of the murderer of John Fenn.

NEWCASTLE-ON-TYNE.—Mr. Reverdy Johnson, who arrived in this town on Monday, was presented on Tuesday morning, at the Town Hall, with addresses from the Chamber of Commerce, the iron trade, the coal trade, the alkali trade, and the corporation of South Shields. In returning thanks Mr. Johnson spoke at great length on English-American questions, and reiterated his assurance that the Alabama question would be settled without war, which would cost infinitely more than the sums claimed. The two countries, he was sure, would ever work together, and promote unity, peace, and concord between the two people. In the evening his Excellency was entertained at a public banquet in the Town Hall. In returning thanks for the toast of his health he referred to the desire of his own Government to reduce the rates of postage between this country and America, and the efforts he made to obtain a reduction. He then spoke of communications he had received on the subject of the light dues from a Chamber of Commerce in England, urging him to induce his own Government to bring their injustice before her Majesty's Government, and he had done so. With regard to free trade, he thought that any system to be carried out should be a fair one. The Americans had manufactures of their own, such as spirit, which they wanted to send out to England; but the tax on the article amounted to 350,200*l.* They also wanted to send tobacco, but they were made to pay a tax on that product last year of 6,274,200*l.*, which was a pretty round sum to pay in this land of free trade. He then referred to an allusion made by Dr. Ball, M.P., in the debate on the Irish Church, to the state of morality and religion in America as described in Mr. Dixon's book, and said that with regard to moral and religious character he did not know that they had the advantage of us; but, without boasting, he might say, what he believed to be the truth, that they had more churches in the United States than in any other country in the world; had more communicants than any other country, and paid their parsons better. He then alluded to the statements recently made at Sheffield by Mr. Roebuck as to the things England had reason most to dread. The chief of these was America; but a more idle fancy never entered the brain of man than that of a war between England and America. It could not be; and no man more rejoiced in that conviction than the one who addressed them.

PLYMOUTH.—The telegraph cable thrown overboard by the Calcutta has been cut by the Caroline 10 miles from the eastern end. She had recovered up to the 25th ult. 27 miles of the longer end, and it is hoped that she will succeed in getting the other part on board.

PRESTON.—A large meeting of delegates from various towns in Lancashire was held in this town on Sunday, at which it was resolved that 4*s.* per head should be given this week to all operative weavers on strike, whether they be in or out of the Union, with an extra shilling to each weaver in the Union. The delegates, during their discussion, spoke strongly against giving way to the proposed 10 per cent. reduction, but expressed their perfect willingness to sanction a lowering of wages 5 per cent. A meeting of delegates repre-

senting the card-room operatives, including delegates from 20 districts, was held on Monday, and was unanimously resolved "that all the districts should give their association support by every legitimate means to power the card-room hands of Preston to maintain their position on strike, by putting on levies and making contributions in the card-rooms of all the mills in Lancashire." On Tuesday the delegates from the Preston district hands were sent into the South Lancashire to state their case, and have since reported favourably to the support they have received. On Wednesday evening a meeting of the Amalgamated Trade Union was convened to consider a letter received from Mr. Mundella, M.P., suggesting, among other things, the establishment of a council of conciliators in the town.

SALFORD.—The execution of Michael Jackson, the murderer of Patrick Nurney, took place at the prison on Monday morning. The prisoner was noted for the violence of his conduct when he went on Boxing-night and demanded drink, refused, and deceased, who was a water, and a landlord to remove him. On this John Jackson, a knife and stabbed Nurney in the thigh, causing immediate death. The jury, in giving a verdict of Guilty, recommended him to mercy, and made to obtain a remission of the sentence of the culprit, from this, entertained the idea, at least that he would not be executed, and his behaviour to the Roman Catholic chaplain, who have been discreditable. Since Friday, on which his parents took leave of him, his conduct had hardened; but he does not appear to have shown much penitence for his crime.

SWANSEA.—On the evening of the 23rd ult. colliers employed in the New Mountain Colliery, Llangyfelach, had nearly all left the pit on the approaching Good Friday. There were two men and two boys, however, still at work, and one of the boys was going to an old working for a stove. He was cautioned not to take a light, as it was thought that fire-damp had accumulated there. Despite this warning, he went into the place with a light; an explosion instantly followed; he was killed on the spot, and two men were suffocated after-damp. The others escaped, but not without great danger, several of them having suffered from the after-damp.

TODMORDEN.—Mrs. Plow, the widow of Rev. A. J. Plow, vicar of this parish, was ordered by Miles Wetherhill in March last to leave the 19th ult. She never recovered from the attack made upon her; but after 12 months suffering died at Wantage, almost exactly a year after her husband. The Todmorden tragedy resulted in the deaths of a father, a mother, a child, and a nurse.

WATFORD. Early on Sunday morning a colliery farm, at Shaw-end, about nine miles from the town, was completely destroyed by fire. Only inmates of the house were an old man, a woman, Watson, his housekeeper, and a little boy, 10 years, their son. About 8 o'clock a party of men and his housekeeper were found in the ruins, and his housekeeper presented a ghastly appearance in the same room, but, strange to say, she escaped the same fate; for the little boy, some time after the accident, crept out from the ruins and was found in an adjoining building, which was not so completely destroyed, and was not so much hurt.

WIGAN.—Another colliery explosion occurred on the morning of the 23rd ult. in the Highbrook colliery, a fiery Arley seam in which so many accidents have recently happened. It is supposed to have been caused by the firing of a shot, which has not yet been discovered, but has been blown out; but it will probably never be discovered, as the shot was fired by boys employed in that part of the mine. 28 bodies have been brought to the surface, and were so terribly mutilated, that few could be recognized. On Thursday night. Several families, including a father, brother, are all dead.

Ireland.

THE IRISH CHURCH.—Meetings of the Irish Church in various dioceses of Ireland. At a Synod in the Bishop, Dr. Alexander, declared that he was to any idea of compromise on the question of the Church and laity present took the same view of the matter, and in the most decided language declared that the Bill was pronounced "a sacrilegious violation of Union, and a sacrilegious violation of property of the Church, whose property it was to depress the Protestant and to exalt the Catholic Church in the ascendant." At a meeting in Dublin, Sir Joseph Stansfeld, M.P., proposed a resolution declaring that the Bill was a violation of justice, that it violated every principle of honour, and alienated to secular purposes property dedicated to God, declared that "no compromise, or attend to any scheme was entertained, but to support the measure he was ready and willing to do so." The Bill was bristling with objections, all the recklessness of the robber and the thief. He concluded by saying that "the Irish people are the victims of a political game—the victims of a game of brigands." At Gorey on Saturday, the Bill was over by the Earl of Courtown, who was attended by a very large number of the parts of the county Wicklow. The

against the Bill as unjust in its principles and fraught with disastrous consequences to all classes, and declared that the Church, as a body, should not offer any compromise with regard to the Bill, or take any steps towards amending provisions. A meeting of a similar character was held in the County Leitrim, which was remarkable for the attendance of several members of the clergy, one of whom, the Rev. Mr. Lynn, proposed a resolution. The Conference for Leitrim and Kildare was held on Wednesday at St. Patrick's Cathedral, the Archbishop presiding. Five hundred delegates attended. Addresses were given by the Archbishop, Sir E. Grogan, Rev. Mr. Arden, and Hon. D. Plunket, and resolutions were passed condemning the Bill and opposing any compromise. Mr. Gladstone. In the course of his address, the speaker strove to show that the refusal of the Government to meet the Church to meet, whilst riling it of its protest, was a "bartering" process, and intimated that at the coming Conference there was no intention of forming any Church body to assist Mr. Gladstone's project. On the same day Conferences were also held in Kilkenny, Cavan, Ossory, Meath, Clonmel, Limerick, and Wick, when resolutions were adopted protesting against the Bill. At Cavan the resolutions were moved by Presbyterian and Methodist ministers. At the Navan and Meath Conferences the measure was treated as inevitable, and it was considered desirable to make the best terms that could be secured, and instead of wasting their energies in declamatory invectives, to concentrate their attention upon the more useful object of securing to obtain some reasonable modification of the Bill. The attendance at all the Conferences was full. At Belfast, on the same day, a great and important meeting was held, the Earl of Enniskillen presiding, supported by the Marquis of Downshire, Lord O'Neill, Lord Cole, and the leading landed gentry of Ulster. Five thousand artisans were in the body of the meeting. The resolutions were of the most uncompromising character. The High Sheriff of Antrim moved, and W. Johnston, M.P., seconded the following resolution, which was carried by acclamation:—"That we shall continue to uphold the legislative union between Great Britain and Ireland so long as the international compact is respected and held inviolable by the British Parliament, but should the 5th article of the Treaty of Union, which is expressed to be essential, fundamental, and perpetual, be repealed, we shall be forced to regard the union as virtually dissolved."

CARDINAL CULLEN AND THE FREEMASONS.—Cardinal Cullen, in a pastoral issued in Dublin yesterday morning, pronounces that all Roman Catholics who attend the Masonic hall to be given to H.B.H. Prince Arthur in Dublin shall be excommunicated.

THE ATTEMPT TO BRIBE A LORD-LIEUTENANT.—Mr. Downing, a gentleman residing in the county Wick, was prosecuted at the recent assizes for sending a letter to Lord Fermoy, lord-lieutenant of the county, to induce him to get the writer appointed to the Commission of the Peace. He pleaded guilty, and expressed great regret for his indiscretion. Mr. Justice O'Brien, in pronouncing sentence, commented in terms of great severity on the serious character of the offence, and said it would have been his duty to sentence the prisoner to a long term of imprisonment if medical evidence had not been given that confinement would be dangerous to his health. Under these circumstances he thought the ends of justice would be best served by sentencing Mr. Downing to pay a fine of £100.

THE FENIAN CONVICTS' FUND.—On Sunday a large Fenian levy was made in the Roman Catholic church in Cork, Mayor O'Sullivan, the treasurer of the fund, attending mass in full robes, accompanied by the civic officers.

MURDER IN TIPPERARY.—On Wednesday night a farmer named Topham, residing at Boffant, within 13 miles of Clonmel, was shot dead on his own farm. The body was found on Thursday morning with two bullet wounds in the head. No particulars have been received.

ATTEMPTED ASSASSINATION IN KILLARNEY.—A terrible attempt has been made to assassinate The Viscount of the Reeks, in his domain at Killarney. He was twice fired at from the shrubbery. His clothes were perforated with slugs, but he himself was unharmed. He is but 17 years of age. No arrests have been made.

Scotland.

LORD STANLEY AT GLASGOW.—On Thursday afternoon Lord Stanley, who, in November last, was elected Lord Rector of the University of Glasgow, was installed in the City Hall, and, in the presence of the Mayor and a large assemblage of the general public, delivered his inaugural address. In the course of his remarks his lordship said that in affording facilities to comparative poor men to obtain knowledge and to compete on equal terms with the wealthy, the Scotch Universities set the English a good example, and one they would do well to follow. With reference to education, he insisted on the importance of acquiring accurate habits of thought and expression. He maintained the value of classical training if rationally conducted and gone into to such an extent as to acquire a mere smattering of Latin and Greek. He considered a sheer waste of time. In general he commended thoroughness. The student should only study what he had a reasonable prospect of over-coming, and master that completely. The address was warmly applauded. In the evening a grand banquet was entertained by the professors at a private banquet in the College Hall.

Law.

NORFOLK CIRCUIT, NORWICH.—The Norwich Murder and Mutilation.—William Sheward was indicted on his own confession for the murder of his wife, 17 years ago. He now withdrew his confession, and pleaded Not Guilty. The case for the prosecution dwelt chiefly on the prisoner's own confession, and the mysterious disappearance of his wife, followed by the discovery of the mutilated remains of a female body in various parts in and about the city of Norwich, of which his carefully preserved these remains in spirits of wine. The relatives of the wife deposed to her sudden disappearance, and to the ineffectual applications made by them to the prisoner for information respecting her. The medical men who had examined the remains in 1876, when they were still fresh, had come to the conclusion that they belonged to a young adult female, but now declared on inspection that they might be those of a woman of 15 or 20 years of age. The prisoner, although evidently feeble, listened to his sentence with apparent indifference.

HOME CIRCUIT: KINGSTON.—The Rachel and Borrodale.—Proceedings against Madame Rachel. The plaintiff, Miss S. S. S., made Mrs. P. P.'s partner in White Street Prison, and became known as a sort of female attorney and amanuensis for that lady in the prosecution of Madame Rachel, writing her letters, instructing her solicitor, preparing her case, &c. Plaintiff now claimed 160l. for her services, and presented a bill for that amount, some of the items of which were not a little curious. The jury, after two hours' deliberation, gave a verdict for the plaintiff, damages 100l.

MIDLAND CIRCUIT, LEEDS.—The Sheffield Child.—Henry Seyman was indicted for the wilful murder of his son, aged four years. A neighbour saw the prisoner at the door of his house, and heard him say to his wife, "Go and see what I have done." The wife and neighbour went upstairs and found the child with his throat cut. The prisoner ran up the street. He appeared very wild; the child was his father's first of four children. The prisoner had been frothing a great deal at family misfortunes, and had taken to drinking. He had cut the child's throat with a razor, and death must have been instantaneous. The evidence of one doctor went to show that on the night after the alleged murder the prisoner was suffering from a temporary derangement of mind, and that of another went to show that he was now sane. Baron Cleasby having summed up, the jury returned a verdict of Not Guilty, on the ground of temporary insanity. The prisoner, who appeared deeply affected during the trial, was ordered to be detained during her Majesty's pleasure.

Sporting.

EPSOM SPRING MEETING.

TUESDAY.—Trial Stakes of 100 sovs.—Sir J. Hawley's Blue Gown beat Formosa, Vespasian, and 4 others. United Railway Stakes.—Mr. Bromsgrove's Newminster filly beat Juanita, Czar, and 12 others. City and Suburban Handicap.—Mr. B. Hill's Alpenstock beat Drummer, Birthday, and 17 others. Beaufort Stakes.—Mr. J. Clay's Gladness beat Zerlina, Vibration, and 11 others. Two-Year-Old Stakes of 10 sovs.—Duke of Newcastle's Stephanotis beat Elferon, Green Riband, and 9 others. Heathcote Plate.—Mr. J. Saxon's April Morn beat Warrite, Anthony, and 13 others.

WEDNESDAY.—B. S. S. S.—Mr. P. P.'s filer beat King of the South, Lady Cecilia, and 2 others. Match, 100 sovs.—Mr. G. Payne's Marshal Ney beat Michael de Basses, Structural Perse, Mr. Pryor's Spynx beat Lady Evelyn, Conrad, and 14 others. Epsom Spring Cup.—Lord Wilton's Attack gelding beat Scattarius, Langer, and 2 others. Best Metropolitan Stakes.—Mr. G. J. Jones's The Drummer beat Laurel, Alpenstock, and 8 others. De. S. S. S.—Mr. W. Fletcher's Hilda beat Don Quixote, Juana, and 11 others. A. S. S. S.—The Westmorland's Guy Dayrell beat Reginald, Finsterre, and 9 others. Prince of Wales's Stakes.—Lord Wilton's Attack gelding beat Winifred, Curse Royal colt, and 8 others.

Obituary.

GENERAL JOHN MORGAN, C.B., of the Madras Infantry, died on Monday at the age of 84.

MR. THOMAS BROWN, for very many years a partner in the well known firm of Messrs. Longman, Brown, Green, & Co., Paternoster Row, died on the 24th ult., at his lodgings in Ludgate Hill, in his 91st year. He retired from the firm eight or nine years since, and evinced his great love for the City by continuing to reside in the very heart of it. Some time ago he made a present to St. Paul's Cathedral of a stained glass window, which was placed over the western entrance. In company with the late Dean Milman, he attended the unveiling of that window. He returned home with apparent delight at having witnessed the ceremony, and has never since left his house. Nature commenced more rapidly to decay, and he gradually sank. He was for many years an active member of the Court of the Stationers' Company.

MR. CHARLES CAPPER, Chairman of the Victoria and Southampton Docks Companies, died recently at Upton, Essex, in his 47th year, from exhaustion following a severe attack of diarrhoea. He was the architect of his own fortune. He came to London first as goods manager of the Great Eastern Railway, in which position he proved so useful that he was speedily promoted to be superintendent of the line. At the opening of the Victoria Docks he was selected by the lessees, on account of his commercial knowledge, to be their general manager, and the revolution he effected in dock management is still recognized by all associated with such interests. Shortly after the amalgamation of the London Dock Companies, which was chiefly brought about by his exertions, he was unanimously elected chairman of the Southampton Dock Company, a position in which his peculiar talents were conspicuously displayed. He was also deputy chairman of the Central Bank of London, and chairman of the Dagenham Dock Company. In 1861 he published a volume on the "Port Trade of London," which has gone through more than one edition, and is an acknowledged text-book of commercial information. In 1863 he was at one time a successful candidate for the vacant aldermanic gown in Langbourn Ward. At the general election of 1865 he contested S. d. with in the Conservative interest against two members of the Government—Lord Clarence Paget and Mr. Knatchbull-Hugessen. He failed, but on a vacancy occurring in the following spring he was returned. At his death all the ships in the Victoria and Southampton Docks, and many in

the river, carried their flags half-mast high as a mark of respect to his memory.

MR. HENRY BRIGHT, formerly M.P. for Bristol, died at Malvern on Friday, in his 84th year. He was the brother of Mr. Robert Bright, of Abbot's Leigh, and uncle of Mr. Richard Bright, M.P. for East Somerset. He was a West India merchant, and represented Bristol in the Whig interest from 1820 to 1830, his colleague being Mr. Richard Hart Davis. At the dissolution of Parliament on the death of George IV., in 1830, he declined to offer himself again as a candidate, and was succeeded in the representation of the city by Mr. James Evan Bailie.

Markets.

COVENT GARDEN.—April 3.

In consequence of business being somewhat suspended during the holidays, we have few alterations to make. Cucumbers and early Vegetables are becoming plentiful. Some new hothouse Grapes of good quality have come in, and are worth from 2s. to 2s. 6d. per pound. Almonds Grapes are rather more plentiful, at from 1s. 6d. to 2s. per pound. The Potato trade continues dull at former prices, the supply being greater than the demand. Flowers chiefly consist of Orchids, Mignonette, Cyclamens, Tulips, Crocuses, Calla aethiopsica, Cytisus racemosa, Lily of the Valley, Fuchsias, Violets, Wallflowers, Fairy Roses, Spiraea japonica, and Cinerarias and Pelargoniums, which are more plentiful.

FRUIT

HOPS.—BOROUGH MARKET, April 2.

Messrs. Pattenden & Smith report a more active demand for Hops of all descriptions, choice samples being scarce and rather dearer.

METROPOLITAN CATTLE MARKET.

Monday March 29.

There are a few more Beasts than on Monday last; the demand has, however, considerably increased, and prices on the average are higher. We have a short supply of Sheep. choice qualities are readily disposed of, at an advance on Thursday's quotations. There is no improvement in the Lamb trade. Calves are rather dearer. Our foreign supply consists of 1870 Beasts, 8365 Sheep, and 55 Calves; from Scotland there are 180 Beasts; from Ireland, 50; from Norfolk and Suffolk, 900; and 800 from the Midland and Home Counties.

Pigs 3 4—5 4
Beasts, 3540; Sheep and Lambs, 20,260; Calves, 59; Pigs, 110.

THURSDAY, April 1.

The number of Beasts is rather larger than on Thursday last; we have, however, a fair demand, and Monday's quota-

tions are pretty generally realised. The number of Sheep and Lambs is about the same as last week: trade is very dull, and a clearance cannot be effected, yet choicest descriptions are not much lower. Calves are scarce and dear. Our foreign supply consists of 299 Beasts, 5220 Sheep, and 76 Calves.

MARK LANE.—MONDAY, March 29.

There was a small supply of English Wheat to this morning's market, which was sold at an advance of 1s. per qr. on the prices of this day semi-lit. The attendance was not large, and a moderate amount of business only transacted in foreign at the extreme rates of last week, excepting for American, which brought 1s. per qr. more money. Barley, Beans, and Peas were fully as dear. The Oat trade was firm, and in some instances a slight advance was established. There was no change in Flour.

FRIDAY, April 2.

The extreme dullness in the grain trade throughout the kingdom, which led at the middle of last month to a severer reduction in the prices of Wheat than experienced for some time past, has at last ceased, and after a very partial response to the decline quoted in London, the country markets have taken the lead, and we have now to report a recovery of 2s. per qr. on English, and 1s. per qr. on foreign Wheat, from the above-mentioned greatest depression. The trade cannot, however, be described as generally active, and the advance is only reluctantly complied with, business being limited to purchases of needy buyers. Spring Corn of all descriptions has remained a slow sale at about former rates, Maize and malting Barley alone being sold at fully 1s. per qr. advance. Flour was less pressed, and its value increased nearly 1s. per sack in several leading markets. The arrivals of grain and seed laden vessels off the coast since the 15th ult. consisted of 27 cargoes, of which, with those left over from last week, there remained for sale last night 10 cargoes. The floating trade has been steady throughout the fortnight. Arrived Wheat was in fair demand, and an improvement of 1s. to 2s. per qr. was asked, but the business transacted was very limited on account of the short supplies. Maize commanded more inquired after, and advanced 6d. to 1s. per qr. Prices of oil seeds ruled firm. In Wheat on passage and for forward shipment there was nothing doing. In Maize a large business has been reported, and prices were quoted about 2s. per qr. higher. Paris, April 1.—There was a tendency to improvement in Wheat and Flour. The eight marks are quoted at equal to 34s. per 280 lb. The stock at the Halle is estimated at 9870 cwt.

The arrivals of all descriptions of grain during the week have been small. There was a poor attendance at this morning's market, and the little English Wheat fresh up was taken at Monday's prices, upon which terms a limited amount of business was transacted in foreign. Spring Corn was steady at the quotations of that day.

ARRIVALS FROM MARCH 27 TO APRIL 2, BOTH INCLUSIVE.

LIVERPOOL, Tuesday, March 30.—At to-day's market we had a very good attendance, but in Wheat only a tolerable amount of business was transacted, at an improvement of 4d. per cental on the rates of last Tuesday, the advance tending to check the demand. Flour obtained prices 6d. to 1s. above those of this day week, with, however, only a limited request. Indian Corn was in improved request, at figures ranging 1s. 6d. to 2s. per qr. higher than the rates of Tuesday last. Oatmeal is held for 6d. per qr. advance. Beans in good request, and 1s. per qr. dearer.

SEED MARKET

The agricultural seed trade has been rather quiet during the last few days, owing partly to the wet and ungenial weather we have been getting, and partly to the Easter holidays. Values of all descriptions have nevertheless continued steady, and what business has been done has been transacted at last week's currencies. The stocks of new Red Clover seed held at the present moment in London appear to be reduced quite low. Alsike and white Clover seed are both very firm, higher quotations being reported from abroad. Trefoil seed moves off in retail at late prices. White Mustard seed is scarce and

dear. We have an improved inquiry for English Rape seed. Canary seed sells more freely, and Hemp seed we note 1s. per qr. dearer. Home-grown Linseed for sowing meets with a lively demand, and fine qualities realise high rates. A large business has recently been transacted in French Italian Ryegrass; our French advices state that there is now very little left on the other side. Spring Tares are in good request, on somewhat easier terms. For imported sainfoin seed we have a fair demand, at an advance of about 2s. per quarter.

JOHN SHAW & SONS, 16, WATER LANE.

WANTED, to place a PUPIL, age 19, with a respectable practical FARMER and BREEDER, who farms not less than 400 Acres, for two years.—Address, stating terms, SAMUEL BRANDON, Cranbrook Farm, Lower Clapton, Middlesex, N.E.

WANTED, for the Province of Wellington, New Zealand, a steady active Man, to MANAGE a STATION of about 800 ACRES, part in Cultivation with Sheep, the rest requiring breaking up. He must be able to keep Accounts and Sell Produce. No inexperienced Man, or one who cannot give first-rate testimonials, need apply.—For further particulars apply to C. B., Mr Odam's, Wandsworth, S.W.

WANTED, a WORKING GARDENER.—A good practical Man, having a knowledge of Vines, Fruit, Melons, Cucumbers, Greenhouse, and Flower and Kitchen Gardening. Lat and in his Wife to undertake the Laundry. Apply to Rev. W. H. WOOD, West Retford Rectory, Notts.

WANTED, a GARDENER, and his Wife as LAUNDRESS.—A Cow to Milk and take charge of. All found for the laundry. A cottage and good garden given, and 28s. a week besides for both. Young children objected to satisfactory references required. Address, post paid, stating full particulars, A. B., Post Office, East Sheen, Surrey, S.W.

WANTED, a YOUNG MAN, who has been accustomed to Herbaceous and Alpine Plants. State age, wages required, and other particulars.—Tues. S. WALK, Hale Farm Nurseries, Tottenham, Middlesex, N.E.

WANTED, a GAMEKEEPER (Single-handed).—Must be a Married Man without incumbrance, sober, active, and thoroughly acquainted with Rearing of Game, Breaking and Management of Dogs. None whose character will not bear the strictest investigation need apply to Mr. BIRRS, 19, New Bridge Street, Backfriars, E.C.

WANTED, a SHOPMAN—also an APPRENTICE, in a large Seed and Nursery Establishment, to live in the house.—Apply to DAVID GOLD M'KAY, the Old Established Seed Warehouse, Sudbury, Suffolk.

WANT PLACES.—Letters to be Post Paid.

EXPERIENCED GARDENERS (or as GARDENER and BAILIFF), of various qualifications, recommended to Gentlemen.—Further particulars given on application to Messrs. F. G. HENDERSON & SON, Wellington Nursery, St John's Wood, London, N.W.

To Gardeners and Bailiffs (Head, Foremen, or Under). JAMES CARTER AND CO. having many applications for the above request that those WANTING SITUATIONS will send NAME, ADDRESS, and COPIES of TESTIMONIALS for ENTRY in their FREE REGISTER. Only those who can send unquestionable references need apply.

Any Lady or gentleman requiring GARDENERS or BAILIFFS may rely upon J. CARTER & Co. adopting the most stringent regulations in reference to testimonials as to ability, honesty, &c.

JAMES CARTER & Co., 27 and 238, High Holborn, London, W.C.

MR. WM. PAUL begs to announce that he has made arrangements by which he will be enabled in future to furnish Gentlemen with the NAMES, ADDRESSES, &c., of GARDENERS, and GARDENERS and BAILIFFS, of various qualifications, who are open to Engagements. The fullest particulars as to services required and wages given should be forwarded with application.—Pat. a Nurse, Waltham Cross, London, N.

Gardeners and Under Gardeners.

WM. CUTBUSH AND SON beg to state that they have at all times on their books MEN of various qualifications, whose characters will bear the strictest inquiry. Any Gentleman making application would save time by clearly stating the duties to be undertaken, wages offered, &c., so that suitable Men may be selected.—Highgate Nurseries, London, N.

Copies are now ready, and can be had of any Bookseller in Town or Country.

For the Best Practical Information

On LAYING DOWN NEW or IMPROVING OLD GRASS LANDS, See the New ILLUSTRATED WORK,

PERMANENT PASTURES.

By M. H. BURTON, F.R.S., &c.

CONTENTS.—How to Prepare the Land—How to Sow the Land—Sowing with or without a Corn Crop—The best Sorts to Sow—The After Management—The Break-up of Grass Land—The Improvement of Pastures—The Manures most suitable. To which is added Notes on the Leading Grasses and Clovers, from personal observation; and 20 beautiful Illustrations of the most useful kinds.

It will not do to let Grass come of itself in order to good pasture. If you want to grow the right sorts of plants you must sow the right sorts of seed, and you can do better than procure and read Mr. Burton's paper on Laying Down Grass, which you will get by sending to his address at Reading. Agricultural Gazette, Nov. 6, 1867. Opinion of Professor Buckman:—"I do not know of anything to equal it."

SIMPSON, MARSHALL & Co.

Works by David Page, LL.D., F.G.S., &c.

"Few of our Handbooks of Popular Science can be said to have greater or more decisive merit than those of Mr. Page on Geology and Palaeontology. They are clear and vigorous in style, they never oppress the reader with a pedantic display of learning, nor overwhelm him with a pompous array of terms. They are, in fact, the happy art of taking one straightway to the face of Nature herself, instead of leading him by the tortuous and bewildering paths of technical system and artificial classification." Saturday Review

INTRODUCTORY TEXT-BOOK OF GEOLOGY. With Engravings on Wood and Glossarial Index. Eighth Edition. 2s.

ADVANCED TEXT-BOOK OF GEOLOGY, Descriptive and Industrial. With Engravings and Glossary of Scientific Terms. Fourth Edition, revised and enlarged. 7s. 6d.

The Company advances money, unimpaired in amount, for all purposes of Agricultural Improvement, including the erection of Cottages and Farm Buildings, to the Owners of settled and other Estates, and to the Clergy in respect of their Glebe Lands.

Land where cattle and sheep are kept is let at a rent-charge of 10s. per acre, and is improved by drainage, over 20 years.

No investment in cattle is required.

For Forms and further information apply to GRANVILLE R. RYDER, Esq., Managing Director, 7, Parliament Street, London.

National Education, Ireland.

ALBERT NATIONAL AGRICULTURAL TRAINING INSTITUTION, GLASNEVIN, DUBLIN.

The Commissioners of National Education in Ireland are prepared to receive into the Agricultural School at Glasnevin a CLASS of PAYING PUPILS, who will be INSTRUCTED in the THEORY and PRACTICE of AGRICULTURE. The number of Pupils in this Class to be at present limited to Ten.

There are three Farms attached to the Institution, viz.—A SPADE-LABOR Farm, of 54 acres; a SMALL Farm, of 25 acres, which is worked with simple and inexpensive implements, and a LARGE Farm, of nearly 150 acres, on which are employed the most improved Agricultural Implements and Machines, with the uses of which the pupils are made fully acquainted.

Various Rotations and Systems of Farm Management are pursued. Lectures will be given each Session on the following subjects:—

1. Agricultural Chemistry and Geology, by W. K. Sullivan, Ph.D., Professor of Chemistry, Royal College of Science.

2. Botany and Vegetable Physiology, by D. Moore, Ph.D., Curator, Royal Dublin Society's Botanic Gardens.

3. The Structure and Diseases of Farm Animals, by a Veterinary Surgeon.

4. Agriculture, by the Superintendent and by the Agriculturist.

5. Horticulture, by Mr. Edward Carroll.

The course of training will extend over two years. The annual payment by each pupil to be £20 a year, payable quarterly in advance. This amount will cover the expense of Board, Lodging, Washing, and Medical Attendance.

Extern Pupils who reside in the City, or in the vicinity of the Model Farm, are permitted to attend the Lectures and take part in the practical business of the Farms, at a charge of £2 per quarter each.

The Model Farm is within three statute miles of the General Post Office. For further information apply to

THE SECRETARIES,

Education Office, Marlboro' Street, Dublin; or to

THE SUPERINTENDENT,

Albert Agricultural Institution, Glasnevin, Dublin.

THE GENERAL LAND DRAINAGE IMPROVEMENT COMPANY.

Thomas Chapman, Esq., F.R.S. Geo. Thomas Clark, Esq. John C. Colville, Esq. Henry W. Currie, Esq.

J. BAILEY DENTON, Principal Engineer. Agricultural Improvements of any kind are executed by the Company, or the Civil Engineer employed by the Company, or the Civil Engineer employed by the Company, or the Civil Engineer employed by the Company.

Tenants may also, by arrangement with the Company, execute the execution of such improvements.

The outlay, with all official expenses, may be repaid by the Landowners in a shorter term.

No investigation of title necessary, and the Company will be made to HORACE P. K. at the Offices of the Company, 22, Whitehall Place, London.

Home News.

THE COURT.—On Saturday morning the Queen, accompanied by Prince Leopold and Princess Alice, drove to Claremont, and returned to Windsor on Sunday.

Prince Arthur held a levee at the Palace on behalf of her Majesty. The Duke of Devonshire, Lord Salisbury, and Lord E. Cardwell arrived at the Castle on Sunday the Queen and Royal family.

The Queen, accompanied by Prince Albert and Princess Louise, visited the service in the private chapel. The Rev. Mr. Williams, rector of Hedsor, preached on Monday the Queen went out in the morning.

Princess Beatrice. On Tuesday morning the Queen, accompanied by Princess Louise, Princess Beatrice, left Windsor for the Palace.

Her Majesty travelled by a special train to the Great Western Railway to Paddington, thence to Buckingham Palace, escorted by the 17th Lancers. Prince Albert, Prince George, Princess Louise, and Princess of Wales, had previously arrived at the Palace.

Windsor. In the afternoon the Queen, accompanied by Prince Albert and Princess Louise, visited the Secretary of State for Foreign Affairs, Lord Salisbury, and presented Hassan Paşa, son of the Egyptian Sultan, to her Majesty. The Queen visited St. Bartholomew's Hospital, and the Market, in Smithfield. Prince Leopold and Princess Alice went to the Tower of London. In the evening Prince Albert and Princess Louise went to the Drury Lane Theatre. On Monday morning the Queen drove out with Prince Victor of Wales. that was being done for the cure and comfort of the Her Majesty, on leaving the hospital, visited the New Meat Market, and drove very slowly through the central avenue, where a large crowd had assembled. Her Majesty then visited new Blackfriars Bridge, and the Church of St. Dunstons, Stamford Street and by Westminster Palace.

WALTER HILL OF THE TEMPLE.—It is announced that the Hon. Walter Hill has placed his resignation of the Mastership of the Temple at the disposal of Mr. Hill, with whom rests the appointment.

THE SUNDAY QUESTION.—On Monday deputations from the National Sunday League and from the East-end of London waited upon the Right Hon. H. A. Bruce at the Home Office, and presented addresses from different workshops in favour of opening museums on Sundays, and an address to her Majesty from a public meeting held at the Freemasons' Tavern in favour of the same.

In reply, the Home Secretary said that it was well known what his opinion was upon the subject, as he had been severely criticised for his vote, and he had been a martyr to it, having been advertised in consequence as a person unfit to represent a constituency. He had no hesitation, however, in saying that he adhered to the opinion expressed by that vote; but the question was one which must be decided by a Government apart from any individual opinions, and he was not prepared to say at present what were the opinions of his colleagues. It must be admitted that in a question of this sort, above all others, they had to consider the national feeling and prejudices, and it would be the duty of the Government to ascertain what the opinions of the majority were. For he did not believe that the opening of museums and institutions on Sundays would be in any way injurious to religion, but he thought that much mischief had arisen in this country in consequence of Sunday being considered as the only day for entertainment, and religious feelings. He did not say that there were not great advantages in setting aside a day for religious observance, but the way in which the Sunday was to be observed ought to be decided by the national will. In conclusion, he promised that the matter should have the careful consideration of the Government. The deputation having withdrawn, another deputation from the Working Men's Lord's Day Rest Association had an interview to present a memorial in favour of opening museums on week-day evenings, and against the opening of such places on Sundays. The deputation, which consisted of more than 100 working men, was headed by the Earl of Shaftesbury, Mr. Charles Reed, M.P.; Mr. M'Arthur, M.P.; and Mr. Girdlestone. The Earl of Shaftesbury said that the deputation consisted of some of the most respectable portion of the working classes, who entertained very strong objections to museums being opened on Sundays, and equally strong reasons and arguments why they should be opened on week-day evenings for the intellectual recreation of that part of the working classes who could not attend except after work hours. In conclusion, he observed that the same arguments that were urged in favour of opening museums on Sundays applied equally to the opening of theatres; and the one, it was to be feared, would be the necessary consequence of the other. Mr. Hill, the secretary of the association, then read the memorial, which set forth that at the present time most of the great national collections of works of art were virtually sealed from the working classes, who were deprived of the opportunity of making that intellectual advancement which they most earnestly desired. It referred to the fact that at the different industrial exhibitions held in 1853, '56, '57, and '58, the large majority were evening visitors, consisting of the respectable artisans who paid for their admission after their day's work was over; and that as many as 3,000,000 of the same class of persons had visited the Kensington Museum, notwithstanding its out-of-the-way situation. But while the large majority desired that these places of intellectual resort should be opened on week-day evenings they strongly objected to their being opened on Sundays, inasmuch as they believed it would interfere with their rest from labour, their religious exercises, and prove most disastrous to the moral welfare of the country. Mr. Kay, who had been sent by the Society of Arts to report upon the Paris Industrial Exhibition, said that the feeling in Paris on the part of the working classes was that they should be entirely freed from labour on Sundays. Mr. C. Reed, M.P., said he had had a great deal to do with the working classes, and he felt sure that the mass of the people desired rest on Sundays, and that there should be no change. Mr. Jennings (a wire-worker) had had a great deal to do with his fellow-workmen, and he could speak positively that their feeling was to have their rest on the Sabbath. The Home Secretary said that he should be misleading the deputation if he allowed them to go away with the impression that he entertained the same opinion as they did, on the contrary, he had voted for the opening of the British Museum on Sundays, and he confessed that he could not see that the opening of such a place would sow the seeds of evil. He could not see what harm it could do. Kew, Chiswick, and similar places were open, and had been open for years, and he knew of no evil resulting from them, and the same argument, in his opinion, applied equally to the museums. It was, however, a question of degree, inasmuch as some men looked upon it as a matter for a man to walk out with his children on Sunday. He could not see how religion would be injured by the opening of museums on Sundays. As far as the theatres were concerned, he, in common with a large majority of the people of England, should object to their being opened. But he was appealed to as a member of the Government, and not for an expression of his own views; and, as a member of the Government, he might say that he believed the feeling was to keep the Sabbath as it now is, and if that were so, he

would be the last man in the world to offer any opposition. He had no doubt whatever that Government would act in accordance with that feeling. Another deputation, consisting of a large number of gentlemen who are anxious to secure the due observance of Sunday, then had an interview with the right hon. gentleman on the subject of the Bill of Mr. Thomas Hughes, now before Parliament. The Hon. A. Kinnaird, M.P., in introducing the deputation, said the Bill was likely, in the event of its being passed in its present shape, to create a good deal of invidious feeling. The Home Secretary said they all knew what the feeling of the people of Scotland was, but this was a matter which dealt with the metropolis alone, and legislation was to be considered with reference to those to whom it was intended to apply. The Bill now before Parliament was mainly one of detail, and would have to be considered in committee. At present Sunday trading was a great evil, and the law was openly violated, so that he thought any measure would be useful which would tend to mitigate the evil, and to save as much as possible out of the general wreck. He thought some effort ought to be made in that direction, and it was on that ground that he authorised a member of the Government not to object to the introduction of the Bill. So much of the Bill as would tend to promote the sanctity of Sunday the Government would support, but would oppose the rest.

EXPERIMENTS AT SHOEBURYNES.—The first of a new class of rifled artillery, a 4-ton 9-inch rifled howitzer, throwing shells of 200 lb. weight, and combining the qualities of rifled gun and mortar, was tried on Friday at Shoeburyness. The practice as regards accuracy of vertical fire was very satisfactory, but it was found that as great sensitiveness is necessary in the percussion fuzes when the shells are required to burst on graze or on impact, some further modification of them will be necessary. A few days previously the 150-pounder American smooth-bore gun was fired against the Plymouth casemate, the English shot proving quite equal, and, indeed, something superior to the American spherical projectiles. The vibration of the blows of these heavy shot produced such a flaking of the iron armour as would tend rapidly to the disintegration of even this thick structure of solid iron. Colonel Shaw's muzzle-pivoting carriage for the 18-ton Fraser rifled gun was also further tested with 18 rounds of 400-pounder shot fired with 60 lb. charges, and endured the trial perfectly.

PROPOSED STATUE IN THE CITY TO THE PRINCE CONSORT.—At a recent meeting of the Court of Common Council, Alderman Causton gave notice that on a future day he will move that the sum of 3000 guineas be expended by the Corporation on a statue of the Prince Consort, as the "City memorial" of his Royal Highness.

ORANGE DEMONSTRATION AGAINST THE IRISH CHURCH BILL.—A demonstration of the Protestants and Orangemen of London, in defence of the Irish Church, and against the proposed endowment to Maynooth, was held on Wednesday evening at Exeter Hall. The admission was by ticket. The platform was well filled by members of the Orange Society, dressed in full regalia, while the body of the hall was about two-thirds full, a large proportion of the audience being ladies. Mr. Edward Harper, "Grand Master of the Loyal Orange Institution of Great Britain," took the chair, and was received with repeated rounds of "Kentish fire." The Rev. C. Jayard, incumbent of Wembley, moved the first resolution, declaring that the Irish Church Bill was a violation of the Constitution, and calling upon the House of Lords to reject the measure. The Rev. Mr. Spencer, incumbent of St. Matthew's, Marylebone, seconded the resolution, which was carried with loud cheering. Two other resolutions condemnatory of the proposed grant of 380,000*l.* out of the spoils of the Irish Church, and denouncing the release of the Fenian prisoners, were supported by Mr. Charley, M.P., Mr. B. Mason, Mr. Bull, Mr. Peters, Rev. Mr. Pope, and others, and carried unanimously. A petition to the House of Lords, calling on them to reject the Bill, and a memorial to her Majesty, asking her not to sanction the measure, were adopted.

GREENWICH HOSPITAL.—The Admiralty have ordered the closing of two of the three gates at which visitors and the inmates have hitherto been admitted to this hospital. This is calculated to effect a saving of about 600*l.* per annum, by reducing the number of the police employed from 17 to 7.

THE ST. ALBAN'S RITUAL CASE.—The legal charges in this case have been agreed upon between the proctors on both sides at 4,328*l.*, and a sum has been accepted and paid of 1,500*l.* in full satisfaction of the expenses of the promoter.

EXTRAORDINARY FOG IN LONDON.—On Thursday morning London was for several hours enveloped in a dense fog, equal in density, indeed, to anything ever seen in the proverbially foggy month of November. Between eleven and twelve o'clock the darkness was as intense as at midnight. All traffic was suspended both in the City and at the West End. At the latter hour the sun once more appeared, and London was relieved from the black pall with which it had been overspread.

PROPOSED EMIGRATION FROM THE EAST-END.—A public meeting was held a few days since at the Mill-wall Ironworks, Mr. Frederick Young in the chair, for the purpose of promoting the emigration of unemployed artisans and labourers to the British colonies. The first resolution expressed the opinion that the Government should be at once urged to give the subject its earnest consideration. The second resolution urged the working classes throughout the country, especially in the distressed districts, to organise emigration committees for the purpose of diffusing information upon the subject of emigration to British colonies. A petition to the Queen was adopted, embodying the spirit of the resolutions.

JUVENILE EMIGRATION.—Miss Rye is about to try the experiment of deporting the street Arabs of London and other large towns to Canada and the Western States. The Liverpool Workhouse Committee has already decided to entertain her proposal to take all their orphan girls on their supplying each girl with 8*l.* She is encouraged to make the experiment by the success which has attended the labours of Mr. Van Meter, who states that he has rescued 2000 children from the slums of New York, and has given them a fair start in the West. Miss Rye is prepared to start with a party of children for the West about August.

CONSIGNMENT OF TROUT FOR THE THAMES.—The last consignment of trout, to the number of 5000, was turned into the Thames on Saturday in various parts of the river from Sunbury to Hampton Court, by Mr. Ponder, in the presence of several members of the Thames Angling Preservation Society. The fish were in very fine condition, and though only a year old, showed a remarkable growth, many of them measuring from 6 inches to 8½ inches in length. Owing to the floods which recently inundated the nursery stream at Sunbury, it is calculated that 8000 or 10,000 were carried away by the overflow. Unfortunately, pike were carried into the stream also, and when they were caught numbers of the young trout were discharged from their mouths.

ARCHBISHOP MANNING AND THE FENIANS.—The English Amnesty Committee having applied to Dr. Manning for permission to leave for signature at the doors of the pro-cathedral in Moorfields the memorial to the Premier, praying for a free pardon for the Fenians still in prison, the Archbishop has returned the following answer to the Committee—"It is not possible to allow the Catholic churches to be used for any but religious purposes. The Catholic Church being the Church of all nations, and in London Catholics of at least 20 nations are united in it, cannot enter into any national questions. Any political or other petition must be signed at other places."

BETHNAL GREEN BOARD OF GUARDIANS.—In the list of persons nominated to serve as guardians of the poor of the parish of Bethnal Green, there appears, as one of the candidates for the West Ward, the name of Miss Burdett Coutts, as the owner of a large amount of property in the parish, including the model lodging-houses in Columbia Square, and the new Columbia Market she has recently erected.

CHARGE OF EMBEZZLEMENT IN THE CITY.—A warrant has been issued by the city magistrates for the apprehension of Benjamin Higgs, late assistant cashier in the office of the Great Central Gas Company, in Coleman Street, on the charge of embezzling several thousand pounds. A reward of 200*l.* has been offered—100*l.* to any person who will give such information as shall lead to his apprehension, and a further sum of 100*l.* on recovery of the money embezzled. He absconded upwards of three weeks ago, and has hitherto eluded arrest. He has resided for some time at Tide-end House, Teddington, where he has lived in a style of great extravagance. He has been in the service of the Great Central Gas Company for several years. His salary at the time of his disappearance was under 400*l.* per annum. His establishment at Teddington, however, was of an almost princely character. The house, which contained about 30 rooms, was fitted and furnished in the most sumptuous style. A large pleasure-ground ran down to the river, where he had built a massive river-wall. He had also a large kitchen garden and a model farm. He was building extensive stabling fitted with all modern appliances, kept two pairs of carriages, nine horses, and several ponies, and his family carriage and brougham were the most elegant in the neighbourhood. The domestic arrangements were in keeping with the general character of the establishment. There were eight female servants, five gardeners, a groom, a coachman, and under coachman; the household expenses requiring not less than 2000*l.* a year. The furniture, the sale of which took place last week, was of remarkable style and quality, as may be judged from the fact that a pianoforte (which originally cost 300 guineas) sold for 155 guineas, and was regarded as the greatest bargain of the sale. Mr. Higgs' personal tastes and habits were not less extravagant: his gold watch and diamond rings were the envy of connoisseurs. He was musical, too, and his weekly musical parties were attended by the most celebrated artistes, who were sumptuously entertained and sent to London by special train. His benevolent instincts were as large as his expenditure. On three occasions he gave concerts at the Clarence Hotel, Teddington, at which the most celebrated professional singers were engaged, and the programmes were marvels of artistic beauty, the entire proceeds being devoted to the building of new schools. On one occasion an insolvent received a cheque for 180*l.*, with which he effected a composition with his creditors. On another occasion a man who was seriously injured by an explosion of the kitchen boiler in Mr. Higgs' house was established in business with 300*l.* To the Free Church of England, at Teddington, which, however, Mr. Higgs never attended, he presented a new organ at a cost of 300*l.*, and promised a donation of 2000*l.* towards a new structure. On the morning of his disappearance there were 80 men employed upon a new mansion which was in course of erection on land he was to have purchased at a cost of 600*l.* per acre; the purchase, however, was never completed, although the buildings were in progress. The mansion was estimated to cost 50,000*l.* The contract for the brick and stone work was 12,500*l.*, and the contractors' sheds and out-buildings actually erected upon the ground cost 500*l.* The freeholder was informed on the Tuesday before Mr. Higgs' departure that there would be some difficulty and delay in the purchase and completion of the freehold, in consequence of the trustees of Higgs' wife having failed to meet their engagements. It appears

that he accounted to his wife and friends for this extraordinary expenditure by saying that he had received a legacy of 90,000*l.* from a relative. For several days before leaving he was making preparations for his departure. On Friday afternoon, the 5th ult., he entered the Waterloo train as usual, but instead of alighting at Twickenham, proceeded to Reading, thence to Liverpool, and that night went on board a steamer for America. He has left behind him a wife and eight children, who are said to have been ignorant of the source whence all the comforts and luxuries of their home were derived.

THE PUBLIC HEALTH.—The weekly return of the Registrar-General states that in the week that ended on Saturday, April 3, 4923 births and 3796 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 30 per 1000 persons living, being 27 per 1000 in London, 33 in Edinburgh, 33 in Dublin, 29 in Bristol, 20 in Birmingham, 34 in Liverpool, 32 in Manchester, 30 in Salford, 33 in Sheffield, 29 in Bradford, 27 in Leeds, 27 in Hull, 33 in Newcastle-upon-Tyne. The rate in Vienna was 34 per 1000 during the week ending the 27th ult., and in Berlin 30 per 1000 during the seven days ending the 1st inst. In London the births of 1132 boys and 1187 girls, in all 2319 children, were registered in the week. In the corresponding weeks of 10 years 1859-68, the average number, corrected for increase of population, was 2340. The deaths registered in London during the week were 1670. It was the 18th week of the year, and the average number of deaths for that week, corrected for increase of population, was 1630. The present return is therefore 40 above the estimated amount.

Provincial.

NORWICH.—The magistrates' clerk in this city has received a letter from Brighton, purporting to have been written at the dictation of Sheward's first wife, of whose murder he has been convicted, with some anonymous letters respecting a person called Worseldine, with whom she is said to have eloped and lived in London after the alleged date of the murder. The magistrates, considering the letters a hoax, are not disposed to initiate any action in the matter, but the convict's solicitor is making inquiries on the subject. The High Sheriff has fixed Monday, the 19th inst., for the execution. Application was made yesterday for a writ of error in the case, the Attorney-General having granted the necessary fiat. The grounds on which the application was made were that the jury which tried the case was not properly empanelled, and that the trial took place in the Court-house of the county, while it ought to have been held in the Guildhall of the city. A memorial, praying for a commutation of the sentence, signed by between 200 and 300 of the leading inhabitants of Norwich, was presented to the Home Secretary yesterday.

NOTTINGHAM.—The colliery of Messrs. Eastwood at Skegby, near this town, was inundated on Friday night, and four lives lost. On Friday, seven men, composing the night shift—a smaller number than was usually employed—were startled by a sudden irruption of water, which rose so rapidly that before they could reach a place of safety four were drowned, and the remaining three only succeeded in escaping when the water, which is supposed to have penetrated from some old workings, had risen to their chins. The inundation was caused by the bursting through from some old and unused workings.

PORTSMOUTH.—The Secretary of State for War has approved of the proposed volunteer review on the 26th inst., and has concurred with the First Lord of the Admiralty in granting permission for the military and naval forces to co-operate with the volunteers on that occasion.

PRESTON.—On Wednesday, at a large meeting of the associated masters, which lasted three hours, it was resolved to adopt a proposition from the spinners and minders, suggesting a reduction of 5 per cent. "all round" in the wages of those connected with both fine and coarse counts; and also to adopt a proposition from the weavers in favour of a 5 per cent. reduction. The masters however declined to agree to the proposal to refer the "wheel dividend" system to a joint committee, but resolved to make an alteration in the system amounting to an additional reduction of 3½ per cent. The first proposition was carried by a very narrow majority, 13 being for a 5 and 12 for a 10 per cent. reduction; the second proposition was carried unanimously. In the evening at an immense meeting of weavers the resolution of the masters as to changing the wheel system was objected to, and it was unanimously decided to strike.

SUDBURY.—A shocking case of starvation was recently brought to light in this town. The dead bodies of a woman named Ready, aged 70, and her daughter, aged 31, were discovered by the police in their cottage in Cross Street. The younger woman had probably been dead 48 hours, and the elder three weeks. The place was in a wretched and dilapidated condition, destitute of furniture and of all traces of food or fuel. The body of the mother presented the appearance of a skeleton merely covered with skin. It lay naked on the floor of the upper room, with a sort of coverlid thrown over it, and had apparently been "laid out" after death. No doubt was entertained that the unfortunate women were starved to death, but as it was possible that they might have died from poison, the inquest was adjourned to allow of a post-mortem examination. On Friday last the medical men reported that they had discovered no trace of poison, and that the cause of death was starvation and exposure to cold. The jury returned a verdict in accordance with this evidence.

WIGAN.—The inquest on the bodies of the colliers killed by the recent explosion in the Highbrook pit was

opened on Saturday, and after identification of the bodies, to allow of their burial on Sunday, the proceedings were adjourned. An examination of the workings has proved that the catastrophe was preceded by a blown-out shot—that is, that the bore-hole was insufficiently plugged, and on being fired simply blew out the tamping, instead of rending the coal, thereby igniting the fire-damp, of which there must have been an accumulation in that particular working. Thirty bodies have been recovered from the pit, and more have since died of their burns, making a total loss of 33 lives.

Ireland.

PRINCE ARTHUR IN IRELAND.—Prince Arthur arrived in Kingstown on Monday morning. At half-past 11 the Lord-Lieutenant and suite went on board the yacht, and the Kingstown Commissioners presented an address. At 12 o'clock a special train conveyed his Royal Highness to Dublin. At Westland Row an address was presented by the Corporation of Dublin. The Prince received a respectful welcome from the citizens, and proceeded along the northern line of quays to the Viceregal Lodge in Phoenix Park. On Tuesday morning the Prince, accompanied by the Lord-Lieutenant and a brilliant party left town for Punchestown, to witness the races. His Royal Highness was cheered by the spectators, who lined the way to the terminus, and by the crowd there assembled. He was also warmly received on the Course. The weather, however, was unfavourable, the rain falling in torrents, and the attendance was not so large as last year. In the evening Cardinal Cullen was among the guests at the Viceregal Lodge. On Wednesday the Prince again went to Punchestown, accompanied by the Lord-Lieutenant and a brilliant party, but the weather was again unpropitious, the rain falling without cessation during the whole day. On Thursday the Prince and the Viceregal party drove to Carton, and had luncheon with the Duke of Leinster. They afterwards visited Maynooth College, where the Prince was presented with an address. On their return to town his Royal Highness visited the Royal Hibernian School.

THE IRISH CHURCH.—The Diocesan Conferences terminated on Friday. The last of the series were held at Nenagh, Mullingar, Waterford, Armagh, Cavan, and Tralee. At all the meetings resolutions condemning Mr. Gladstone's Bill and repudiating all idea of a compromise were agreed to. On Tuesday a meeting of Protestants of all denominations in the County of Monaghan was held in the Assembly Rooms of the county town, and was attended by 2,000 persons. Resolutions similar to those adopted at the meeting of the Ulster Defence Association were passed, accompanied by a declaration that the meeting will continue to uphold the legislative union so long as the international compact is respected and held inviolable by the British Parliament; but, should the fifth article of the Treaty of Union—which is expressed to be essential, fundamental, and perpetual—be repealed, they will be forced to regard the Union as virtually dissolved. It is announced that the Central Synod will be opened in the Ancient Concert Rooms, Dublin, on Tuesday next, the 13th inst. The representatives of the several dioceses have now been elected, and the list is said to contain the names of the leading Churchmen in the country.

SUICIDE OF CAPTAIN M'DONALD.—On Monday afternoon Captain M'Donald, who was one of the candidates at the last election for the Queen's County, but did not go to the poll, committed suicide at his residence in Kingstown, by cutting his throat.

THE LATE ASSASSINATION IN TIPPERARY.—The jury, at the inquest on Mr. Toppin, returned a verdict that he was wilfully murdered at Buffiana by some person or persons unknown on the night of March 31. No arrest has yet been made, and the cause of the assassination is not known, but Mr. Toppin is believed to have had a dispute some time since about land.

ATTEMPT TO MURDER A BAILIFF.—Mr. Jeremiah Kelly, a respectable farmer, land bailiff over the Kerry estate of the Board of Trinity College, was fired at on Saturday when riding home from the town of Caheriveen, but escaped without injury. No cause is assigned, and no arrest has been made.

COMMITTAL FOR FENIANISM.—Patrick Neligan has been committed by the Bench at Tralee for trial at the next assizes, on the charge of inviting two soldiers of the 81st Regiment to take the Fenian oath and join the conspiracy.

Scotland.

LORD STANLEY IN SCOTLAND.—On Friday night Lord Stanley was entertained at a public banquet in Glasgow, the Lord Provost presiding. In responding to the toast of his health, Lord Stanley adverted to the foreign relations of the country, and said:—

"Although it was not easy to foresee what would be the course in future of Continental politics, and although some gloomy prognostications had been made, he looked forward, hopefully to the general maintenance of European peace. In the event of peace being disturbed, he confidently anticipated that this country would be able to maintain a neutral attitude. With regard to our relations with the United States, he owned there had been a failure in our negotiations, but he could not bring himself to take a gloomy view of the state of affairs. He thought that, in spite of the military glory the American people had attained in the late war, there was a good deal that might be annoying in the circumstances which resulted from the struggle, and when people were annoyed they were apt to be more than usually sensitive. But he had great faith in the good sense of the American people, and he did not think they could wish to increase their difficulties by getting into fresh quarrels. Great Britain had offered to submit to arbitration the question whether or not international wrong had been done; and, whatever might be the issue, they would have satisfied their own consciences, and placed their country unmistakably in the right."

On Saturday, in acknowledging an address presented by a crowded meeting of the Glasgow Working Mens'

Conservative Association, Lord Stanley spoke as follows on the Irish Church:—

"There is a question on which I should like, and which you will expect me, to say a word or two. It is a question which a great deal has been said and written in the last 12 or 15 months—I mean the state of Ireland. I have not had probably most of you seen with me, but I have seen the decision of the House of Commons as regards the Irish Church. My own opinion upon that question, as I have said, is not easily defendable, while I thought that the existing position of the Irish Establishment was not easily defendable, while I thought that the distinctions and marks of dignity which were attached to the Church, things worth fighting for or retaining, were not to any justly national purpose. While I do not think, that endowments which have after three centuries of possession, and which are not abused ought to be bound to speak frankly, and I must say that the late reversion of the decision which is passed, I think it possible that we may still have something out of the fire. I look at this as a matter quite as much as I do one involving any theory of property. To allocate the whole body of Irish property, in my mind, a serious matter. They are good friends, and they may be troublesome friends, and in Ireland, I must say it plainly, I do not think in a position in which we can afford to make any loss friends. I am not talking of the Fenian folly, always be met by force, and there is no doubt the strongest. But I fear that the desire for at independence, which it is not reasonable to ask for. The Act of Parliament actually established it in 1782, and the Act of Parliament took it away 20 years later. It is stronger and more general in Ireland than we are in the water are willing to admit. The Act of Union is productive of incalculable advantage to both countries. It was not at the time of its passing a popular measure. I do not believe that upon that point public opinion has in any way changed. I certainly would rather not indicate, what in my belief would be if a popular vote were taken upon it in that case. Now, that is rather an awkward state of things to be in, and when I hear people say, in perfect sincerity, and faith, that you must deal with Irish matters in accordance with what you suppose to be the wishes of the majority of the Irish population, separating them thereby as a country from England and Scotland, I am apt to ask myself what well-intentioned persons really mean or know what they mean, because, if they do not, they may find themselves surprised by being taken at their word, and being bound upon their own principles, to vote in favour of the Union. Well, the inference I draw from that is that we ought to take great care lest, without meaning the Catholics, we succeed in alienating the Protestants. I defer, as every man must, to what is the national decision, for it is idle to counsel against that the real decision on those principles was taken—measure was taken—not in the vote of the other day at the hustings in November last; and I would earnestly ask those who, whether they agree with me or not, question or not, or think that the danger I have mentioned is purely imaginary—I would entreat them, I say, whatever change may be pending at least as far as those who must, in any case, be losers by it. I am rather a perplexed one even at the best, and I think it will be still more perplexed before we see the result. Again, it is said, never mind the minority—you can get out them; you have emancipated and satisfied the masses. Well, I wish I could think that that was the case. I do not see how, on a very large scale, of which the question of education will serve as a type, you are to get the House of Commons, an eminently Liberal and Protestant, to work in perfect harmony with the Catholic hierarchy, influenced as it is with immense power an enthusiastic passion, and disposed to be always moderate in its pretensions, and claims. There is upon matters of that kind an antagonism, and, though statesmanship may be able to smooth it, it is a difficulty which, whether you have to face. But that is not all. You have to face the land question, as it began by being, of compensation for the inexhaustive improvements upon their holdings, was reasonable. The matter lay within comparative compass. Both parties, with only some differences, were willing to deal with it, and it appeared as if it was easily settled. But now a Celtic national party, a process of reasoning which, I confess, I cannot understand, have made the discovery that if one man occupies another man's land, he acquires by the fact of his occupation, and without any contract or agreement, a right to the possession of the land itself, subject only to some fixed and perpetual payment. Now, that seems to me very much as if you were to be a lodger in a house in Glasgow or anywhere else, and occupied the same lodging for a certain number of years, thereby acquired a right for himself and his heirs, irremovable, and never to pay more than his rent. I put it in another way; it is as if a working man were employed in any business for a certain number of years, acquired, by the fact of such continued employment, a right not to be dismissed without his own consent. I want a third analogy, which is, perhaps still more apt, a capitalist, who should have lent out his money, and the sums, were to be told one day by the Legislature that as he received punctual payment of the interest, he had got what any reasonable man ought to be contented with. He ought to give up all claim to recover the capital if he wanted it. Now, a claim of that kind is one which is apprehended, no British Parliament will ever be found to admit. It really is one for which there is no shadow of a moral justification. It is a claim that must be met, and I do the Liberal Government and the majority of the Liberal party this justice, that I believe they will not. But, absurd, as it seems to us, it is a claim which has been getting hold of the foreigner—that is, the English people, and leaving the soil exclusively in the hands of the peasantry. I don't want to go into that subject, but I must say, with the sight of all these rocks ahead, I think land, education, and I might name others, that are being carried out to any effectual purpose, is at present begun. All these things, I say, would in time be done by one whom my voice could reach, the inexperienced, and from you those upon whom, whatever their feelings may be, England has always been able to rely, and who were to turn them into opponents, will carry into effect a situation that spirit of perseverance and of determination, they have shown in all the active pursuits of life, in my belief, they owe a good deal to their Scotch

There is just one observation more I should like to make. I give to the present Government, to Mr. and to his colleagues—full credit for doing only what conscientiously think right. But I confess I regret, and I think I am not the only one who regrets that feeling, the step they have releasing so many of the Fenian prisoners, some of those who took a very active and part in the movement. It is a fatal and suicidal part in the movement. It is a fatal and suicidal part in the movement. It is a fatal and suicidal part in the movement.

On Saturday afternoon Lord Stanley arrived in Edinburgh from Glasgow, accompanied by Mr. E. S. Gordon, the late Lord-Advocate, whose guest he remained Tuesday, when he returned to London.

Railways.

COMPENSATION CASES.—At the Leeds Assizes on Wednesday, Mr. Trumble, paper-stainer in that town, was awarded 3000*l.*, as compensation for injuries received in an accident on the Midland Railway in Leeds Station, on the 16th April last. At the recent Assizes the jury gave the mother and widow of Capt. Lord Farnham's footman, who was burnt to death in the Abergele catastrophe, 500*l.* damages against the London and North-Western Company. At the Liverpool Assizes Mr. Henry Cole Silk, the Post Office clerk in charge of the mail van, in the same accident, recovered 1000*l.* damages from the company for the injuries he received in the collision.

Law.

GLOUCESTER.—The Bristol Murder.—A man was convicted of the wilful murder of a woman named Nurse at St. George's, near Bristol, under circumstances of great atrocity. Mr. Justice Hannen sentenced him to death.—The Attempted Murder at Cheltenham.—James Dow, painter, was convicted of wounding with intent to do grievous bodily harm, at Cheltenham, on February 20, and sentenced to 12 months imprisonment.—Bristol.—A man was convicted of the wilful murder of his sweet heart, Fanny Baines, in the parish of Balminster, on October 18, by pushing her into the Avon. Mr. Justice Byles sentenced him to death.

WARRINGTON.—CHIEF.—James McDonald, a man, was charged with the murder of James Nalley. The man and three other navvies, engaged in the construction of the Macclesfield Railway, went to a public-house and drank a glass of ale. On their way home Macdonald fell down, and Nally tumbled over him, which appears to have excited the malice of Macdonald, who, on reaching their lodgings, got a knife, and fatally stabbed Nally. The jury found him guilty but recommended him to mercy, because there was evidence of malice. The judge said that drunkenness was not an excuse for crime, and passed sentence of death in the usual form.

CRIMINAL COURT.—The Alleged Embezzlement at the Office of the Admiralty.—The late chief accountant of the Admiralty, Benjamin F. Works, was indicted for embezzling the sum of 1000*l.* of money. The evidence failed to show a conviction, and the jury returned a verdict of Not Guilty. The other charges against the prisoner were withdrawn.

The Bristol Mutual Assurance Co.—Ellen Cook was charged with assaulting her husband with extraordinary violence, and with putting a knife so as to endanger his life, and cutting him, by which the sight of one eye was destroyed and the other injured. The prisoner, whose personal appearance is such, is 44 years of age, for 18 of which she has been married to prosecutor, and had borne him five children. A defence was set up, and the jury returned a verdict of Not Guilty. Mr. Justice Brett sentenced her to 12 months imprisonment.

The Admiralty.—Richard Spriggs, a mason, and a carpenter, were charged with setting fire to the Office of 300*l.*, for which the furniture had been insured. Sherman was supposed to have acted under the instigation of the prisoner, who had not long before set his own house on fire and obtained the insurance. Sherman pleaded guilty, and was sentenced to 12 months imprisonment with hard labour.

Miscellaneous.

EXPLORATION OF AFRICA.—Letters dated in November last have been received from Herr Carl Kuchel, the German traveller who is making an expedition in Southern Africa, stating that he has accomplished a very important journey, although he encountered great dangers. He started northwards on the 1st of May, 1868, from the Potoschefs river, and arrived at Inyati on the 18th October, having explored a route which has never been traversed by Europeans. From this point he intends to penetrate northwards as far as the Equator.

Obituary.

THE HON. CHARLES MANT, died suddenly on Saturday by throwing himself from the window of his apartment at Lyons House, near Kildare. His lordship survived only for an hour. He had been mentally affected for some time, and at the inquest on Tuesday the jury returned a verdict that he met his death by falling from a window of Lyons House while of unsound mind, and unaccountable for his acts. His lordship, Edward Lawless, third Baron Cloncurry of Cloncurry, county Kildare, in the peerage of Ireland, and Baron Cloncurry in the peerage of the United Kingdom, an Irish descent, was born in 1816, and married in 1839 the only daughter of Mr. John Kirwan, of Castle Hacket, county Galway, by whom he leaves a numerous family. He succeeded to the title on the death of his father, in 1853, and is now succeeded by his eldest son, Valentine, born in 1840, educated at Eton and Balliol College, Oxford, where he graduated B.A. in 1861.

had been mentally affected for some time, and at the inquest on Tuesday the jury returned a verdict that he met his death by falling from a window of Lyons House while of unsound mind, and unaccountable for his acts. His lordship, Edward Lawless, third Baron Cloncurry of Cloncurry, county Kildare, in the peerage of Ireland, and Baron Cloncurry in the peerage of the United Kingdom, an Irish descent, was born in 1816, and married in 1839 the only daughter of Mr. John Kirwan, of Castle Hacket, county Galway, by whom he leaves a numerous family. He succeeded to the title on the death of his father, in 1853, and is now succeeded by his eldest son, Valentine, born in 1840, educated at Eton and Balliol College, Oxford, where he graduated B.A. in 1861.

SIR EDWARD MANT, Bart., died suddenly, from heart disease in New York, on Tuesday evening. He was 53 years of age, and a principal partner in the house of Messrs. Cheard, Burns and M'Yer, the steamship owners.

LADY GEORGINA CROFT, third daughter of the Marquis and Marchioness of Exeter, died on the 1st inst., at Burghley House from congestion of the brain.

LADY CAROLINE PECHILL died a few days since. She was the daughter of the Countess of Antrim, and married in 1826 the Rev. Horace Robert Pechill, Chancellor of Brecon and rector of Bix, near Henley-on-Thames.

THE HON. and REV. DIGBY WALSH, second son of Lord Ormathwaite, died suddenly on Friday last of scarlet fever. He had been curate of Trowbridge, Wilts, since 1853, and married in 1855 the daughter of Mr. Henry Stroud.

THE HON. MRS. DE RODES, sister of the fourth Lord Sealsdale, died on Friday, at her residence in Clarges Street, Piccadilly. She was born in 1835, and married in 1854 Mr. William Hatfield de Rodes.

ARCHDEACON MANT, Archdeacon of Down, died at his residence at Hillsborough on Tuesday, from inflammation of the larynx. He was the eldest son of the late Dr. Mant, Bishop of Down and Connor and Dromore, and was born in Buryton, Hants, in 1807, and was consequently nearly 62 years of age. He graduated in Oxford, where he took his degree of M.A. He was ordained in 1831, and subsequently appointed archdeacon of Connor. In 1834, in the same week as the great Protestant meeting was held in Hillsborough, he was appointed archdeacon of Down and rector of Hillsborough, which he held for more than 34 years. For several years he occupied the post of Provincial Grand Master of the Freemasons of Antrim and Down, and afterwards the office of Provincial Grand Chaplain. On Sunday morning he presided as usual in Hillsborough Church, and went to Divine service in the evening, but his strength failing him, he was unable to officiate, and was conveyed home, and from that time sank rapidly.

THE REV. CHARLES BRIDGES, M.A., rector of Hinton Martell, who has long held a prominent place among the Evangelical clergy, died at that place on the 2d inst., aged 75. He was ordained in 1817, and in 1823 was presented to the rectory of Old Newton, near Stourmarket, which he held until 1855, when he was nominated by the Earl of Shaftesbury to the rectory of Hinton Martell, Dorsetshire. He was the author of "An Exposition of the 119th Psalm," of an Exposition of the Book of Proverbs, and of works on confirmation and other practical subjects.

MR. MICHAEL D. HASSARD, who was M.P. for Waterford from 1856 to 1868, and has since been one of the "paid referees" of the House of Commons, died a few days since prematurely, at his seat, Glenville, near Waterford, from severe fever, aged 51. Ever since he entered Parliament, in 1856, he has worked hard in the public service, first as a chairman of committees year after year, and latterly as a referee. He was born in 1817, and graduated at Trinity College, Dublin, where he became "gold medalist," and obtained the highest honours of that university. He married in 1846 the daughter of Sir Francis Hassard, recorder of Waterford, and leaves four children. He was a firm Protestant, but was so much respected that he was returned at the head of the poll for the Roman Catholic city of Waterford, and for ten years continued to represent it.

MR. JAMES BECKFORD LAUDER, R.S.A., died on the 22d ult., in Edinburg, near which city he was born in 1812. His talent for drawing was shown at a very early age, and he studied with much success at the Trustees' Academy, under Sir William Allan and Mr. Thomas Duncan, and was also guided by the valuable counsel of his brother, Mr. Robert Scott Lauder, who was then beginning his career. Repairing to Rome, he devoted four or five years to the study of the Italian masters, and on his return to Edinburgh at once essayed with success the highest style of figure painting. For correct drawing and fine colouring he was soon acknowledged to have very few equals among Scottish artists. Several of his pictures gained great distinction. His "Ten Virgins" was engraved by the Association for the Promotion of the Fine Arts. For his two scriptural pieces—"Wisdom" and "The Unjust Steward"—he received a prize of 200*gs.* at Westminster Hall.

Markets.

GOVENT GARDEN.—April 10. We have but a short supply of produce from the open ground. Hothouse Grapes and Strawberries are sufficient for the demand, but business remains unusually dull. Cucumbers are very plentiful. Alneira Grapes are rather short now, and realise from 1*s.* to 3*s.* per pound. The Potato trade continues dull at reduced prices. Flowers chiefly consist of Orchids, Mignonette, Cyclamens, Calla aethiopica, Cytisus, racemosa, Lily of the Valley, Fuchsias, Violets, Wallflowers, Fairy Roses, Sparax japonica, Cinerarias and Pelargoniums, which are more plentiful, and Hydrangeas.

FRUIT.

Apples, per bushel, 5*s.* to 10*s.* Pears, per doz., 12*s.* Pine-apples, per lb., 8*s.* to 12*s.* Grapes, per lb., 12*s.* to 25*s.* Oranges, per 100, 4*s.* to 12*s.* Kent Cobs, per lb., 1*s.* to 1*s.* 6d. Strawberries, per oz., 1*s.* 6d. to 2*s.* 6d. Lemons, per 100, 4*s.* to 7*s.* Melons, each, 2*s.* to 4*s.*

VEGETABLES.

Artichokes, green, p. doz. 4*s.* to 6*s.* Leeks, per bunch, 4d. to 6d. Beans, Kidney, p. 100, 1*s.* to 2*s.* Mint, per bunch, 1*s.* to 1*s.* 6d. Beet, per doz., 1*s.* to 2*s.* Mushrooms, p. pott., 1*s.* 6d. to 2*s.* Cabbages, per doz., 1*s.* to 2*s.* Onions, per bushel, 8*s.* to 12*s.* Carrots, per bunch, 6d. to 10d. Parsley, per bunch, 4d. to 6d. Cauliflowers, Cornish, p. doz., 2*s.* to 4*s.* Peas, green, p. pun., 2*s.* to 2*s.* 6d. Celery, p. bund., 1*s.* 6d. to 2*s.* 6d. Potatoes, York Regents, p. ton, 10*s.* to 15*s.* Cucumbers, each, 4d. to 2*s.* — Flukes, do., 100*s.* to 160*s.* — new, 4d. to 1*s.* 6d. p. lb. Endive, per doz., 1*s.* 6d. to 2*s.* Sea-kale, p. pun., 2*s.* to 3*s.* Garlic and shallots, per lb., 8d. Spinach, per bushel, 2*s.* to 3*s.* Herbs, per bunch, 2d. to 4d. Radishes, p. doz., 1*s.* to 1*s.* 6d. Horse Radish, p. bund 3*s.* to 5*s.* Turnips, p. bunch, 6d. to 8d. Lettuce, p. score, 1*s.* to 2*s.* 6d. — French Cos, 8d. to 10d. each.

HAY.—Per Load of 36 Trusses.

SOUTHFIELD, Thursday, April 8. Best Green Hay .. 120*s.* to 130*s.* Prime Meadow Hay 110*s.* to 115*s.* Inferior do. .. 90 100 New do. .. 32 40 Straw .. 32 40

CUMBERLAND MARKET, Thursday, April 8.

Sup. Meadow Hay 118*s.* to 126*s.* Inferior do. .. 100 108 New do. .. 39 42 Superior Clover .. 124 132

POTATOS.—SOUTHWARK, Monday, April 5. During the past week the arrivals coastwise have been moderate, and more plentiful by rail, but owing to Easter or holiday time, the trade was dull at the following quotations:—York Regents, per ton, 60*s.* to 100*s.*; do. Flukes, 60*s.* to 120*s.*; Lincolnshire Regents, 60*s.* to 100*s.*; Dunbar and East Lothian do., 60*s.* to 120*s.*; Perth, Forfar, and Fifo do., 60*s.* to 100*s.*; do. Rocks, 60*s.* to 70*s.*; French and Belgian Whites, 40*s.* to 60*s.*

LEADENHALL POULTRY, &c.

Table with columns for Poultry types (Geese, Turkeys, Ducks, etc.) and prices (s.d., s.d.). Includes prices for Pigeons, Tame Rabbits, Wild Rabbits, Pheasants, Teal, Snipes, Hares, Plovers, English Eggs, Foreign do, and Fresh Butter.

ENGLISH WOOL.

Table with columns for Wool types (Fleeces—Southdown, Half-bred, etc.) and prices (per lb.—s. d., s. d.). Includes prices for Sorts—Clothing and Combing.

COALS.—April 7.

Cowpen Hartley, 15*s.* 8d.; Holywell Main, 16*s.* 6d.; West Hartley, 15*s.* 3d.; Walls End Wharfeduffe, 15*s.*; Walls End Haswell, 18*s.* 6d.; Walls End Original Hartlepool, 18*s.* 6d.; Walls End South Hetton, 18*s.*; Walls End Tunstall, 15*s.* 6d.; Walls End Hartlepool, 17*s.* 6d.; Walls End East Hartlepool, 18*s.*; Walls End South Hartlepool, 18*s.*; Walls End Tees, 18*s.*; Brancepeth Cannel, 18*s.* 3d.—Ships at market, 44; 8-11 31

HOPS.—BOROUGH MARKET, April 9

Messrs. Pattenden & Smith report the market in a very healthy state, with a limited supply of the best descriptions, which command rather higher rates.

METROPOLITAN CATTLE MARKET.

MONDAY April 5. We have rather a large supply of both English and foreign Beasts; trade is very active, and choice qualities are quickly disposed of at late rates. Sheep are more plentiful, and trade is scarcely as brisk as last week; there is, however, very little difference in prices, and a fair clearance is effected. Trade is still dull for lambs. Good Calves are in request. Our foreign supply consists of 2024 Beasts, 9550 Sheep, and 126 Calves; from Scotland there are 138 Beasts; from Ireland, 25; from Norfolk and Suffolk, 1300; and 440 from the Midland and Home Counties.

Table with columns for Cattle types (Best Scots, Herefords, etc.) and prices (s. d., s. d., s. d.). Includes prices for Best Long-wools, Do. Shorn, Ewes & 2d quality, Do. Shorn, Lambs, Calves, and Pigs.

THURSDAY, April 8

We have a good supply of Beasts; trade is dull, prices are lower, and a clearance cannot be effected. The number of Sheep and Lambs is much smaller than on Thursday last, the falling off being in the foreign supply; the demand is very limited, and prices are lower, with several lots remaining unsold. Lambs and Calves are also a dull trade at our quotations. Our foreign supply consists of 626 Beasts, 1135 Sheep, and 172 Calves.

Table with columns for Cattle types (Best Scots, Herefords, etc.) and prices (s. d., s. d., s. d.). Includes prices for Best Long-wools, Do. Shorn, Ewes & 2d quality, Do. Shorn, Lambs, Calves, and Pigs.

METROPOLITAN MEAT MARKET.—April 10.

Best Fresh Butter .. 16*s.* per dozen lb. Second do. do. .. 14*s.* Small Pork, 4*s.* 8d. to 5*s.* 6d.; Large Pork, 4*s.* 0d. to 4*s.* 4d. per 8 lb.

MARK LANE.—MONDAY, April 5.

The supply of Wheat from Essex and Kent to this morning's market was small. Millers were unwilling purchasers, and to affect sales it was necessary to submit to a decline of 1*s.* to 2*s.* per qr. on the prices of this day's night. There was a moderate attendance, and the business done in foreign was in retail only, at a reduction of 1*s.* per qr. on last Monday's rates. Barley met a slow sale. Beans and Peas were steady in value. Oats sold freely at fully late rates. Flour was difficult of sale.

PRICE PER IMPERIAL QUARTER. WHEAT, Essex, Kent, Suffolk. White 4*s.* 4*s.* Red .. 4*s.* 4*s.* — fine selected runs .. do. 4*s.* 4*s.* 4*s.* — Talavera .. 51—55 — Norfolk .. Red .. — Foreign .. 41—62 BARLEY, grind. & dist. 37 to 38*s.* Chev. 40—51 Malting .. 44—49 — Foreign .. grinding and distilling 20—26 Malting .. 34—43 OATS, Essex and Suffolk .. — — Scotch and Lincolnshire .. Boilers 40—42 Suffolk .. 37—44 — Maple 42*s.* to 46*s.* Grey 40—42 Foreign .. 37—44 MAIZE .. Foreign .. 29—31 FLOUR, best marks delivered, per sack 3*s.* 4d. — 2d ditto .. ditto 2*s.* 4d. Country .. 28—40 — Foreign .. per barrel 23—37 Per sack .. 30—40

FRIDAY, April 8.

The advance in the value of Wheat throughout the kingdom reported last Friday, caused chiefly by purchases by millers and dealers, who had allowed their stocks to run very low, has been quickly lost in the agricultural districts owing to increased supplies, while in some of our seaports (Liverpool, for instance), where foreign arrivals were forced on the market, even lower prices have been accepted than those

which ruled three weeks ago. The trade in Spring Corn has been slow, at barely former rates, excepting best samples of malting Barley and of very fine Oats, which were the turn dearest in some markets. Barley in Birmingham was 2s. per qr. cheaper. Flour has been a slow and difficult sale, at 1s. per sack decline. The arrivals of grain and seed laden vessels off the coast during the week consisted of 30 cargoes, of which, with those left over from last week, there remained for sale last night 23 cargoes. The floating trade has been slow, there being no buyers at late rates for either Wheat or Maize, and the business done was at a small reduction. Barley was steady; Rye unaltered in value. In cargoes on passage and for forward shipment hardly any transactions have taken place. Paris, April 8.—The trade in Wheat and Flour ruled very quiet. The six marks are quoted at equal to 34s. per 280 lb. The stock at the Halle is estimated at 9550 cwt.

The arrivals of all descriptions of grain during the week have been small. There was a very poor attendance at this morning's market. English Wheat met a slow sale at Monday's quotations. The business done in foreign was confined to retail sales at that day's rates. Spring Corn of all descriptions was steady, without alteration in value.

ARRIVALS FROM APRIL 3 TO APRIL 8, BOTH INCLUSIVE.

	Wheat.	Barley.	Oats.	Flour.

SEED MARKET.

We have had during the last few days a fair consumptive demand for agricultural seeds, but the business done has been rather of a retail character. New English Red Clover seed is offering more freely, and prices of this description are consequently declining. Foreign Clovers maintain their values, but do not for the moment meet with an active inquiry; for Alsike and White Clover seed the trade is firm. New Trefoil seed moves off in small quantities, at recent currencies. Fine new French Italian Rye grass is in good request; a few parcels of inferior quality are on offer on somewhat lower terms. Bird seeds are steady: Canary and Hemp seed both experience an improved demand, and realise higher rates. For spring Tares prices have given way 1s. to 2s. per qr. Of White Mustard seed there is scarcely any on our market, and what little there is held at long values. Sowing Rape seed is also tending upwards. English Linseed is in fair request at last Monday's quotations. The weather has lately been much against the seed trade; a spell of sunshine would, without doubt, cause a considerable increase of animation in our markets. JOHN SHAW & SONS, 16, Water Lane.

WANTED, to place a PUPIL, age 19, with a respectable practical FARMER and BREEDER, who farms not less than 400 Acres, for two years.—Address, stating terms, SAMUEL BRANDBOX, Cranbrook Farm, Lower Clapton, Middlesex, N.E.

To Cultivators of Soft-Wooded Plants. MESSRS. VEITCH AND SONS are in IMMEDIATE WANT of a thoroughly competent MAN to undertake the entire charge and Cultivation of the Soft-Wooded Department in their Establishment. Every convenience, with ample assistance, will be given. Wages to anyone thoroughly competent, will commence at 35s. per week, and increase in accordance with success.—Royal Exotic Nursery, King's Road, Chelsea, S.W.

WANTED, as PROPAGATOR, in a First-class Provincial Nursery, one who has had several years' experience amongst Hard and Soft-wooded Plants, Rhododendrons, &c. First-class references required.—Apply, stating age and wages expected, to B. B. P., Gardeners' Chronicle Office, W.C.

WANTED, an active MAN, accustomed to Work in the House.—Apply by letter, stating age, wages required, and further particulars, to Mr. CASTLEBROUGH, Hans Street, Chelsea, S.W.

WANTED, a married MAN, without family.—Must understand Budding and Grafting, and general Nursery work. Cottage found.—Apply to THOMAS THORNTON, Reatherside, Frimley, Surrey.

Gardener. WANTED, a GARDENER and his WIFE, without incumbrance, to live in a Lodge, in Staffordshire. The Man must be a good Working Gardener, understand the Management of Vines and Orchard-house. The Wife will be required to attend to the Lodge Gate.—Y. Z., Gardeners' Chronicle Office, W.C.

WANTED, a middle-aged MARRIED COUPLE without family; the Man to Work in the Garden, and be able to Nail Wall-Fruit Trees, Mow Lawns, &c.; to live in the Lodge, and Wife to attend to Lodge Gate. Wages 12s. per week.—Address, stating full particulars, to G. B., Post Office, Huntingdon.

WANTED, a DAIRYMAID.—Must be a person of experience, and good Butter-maker. Age about 35.—Mr. PEEL, Cambridge House, Twickenham, W.

WANT PLACES.—Letters to be Post Paid.

To Gardeners and Bailiffs (Head, Foremen, or Under). JAMES CARTER and CO. having many applications for the above request that those WANTING SITUATIONS will send NAME, ADDRESS, and COPIES of TESTIMONIALS for ENTRY in their FREE REGISTER. Only those who can send unquestionable references need apply. Any Lady or Gentleman requiring GARDENERS or BAILIFFS may rely upon J. CARTER & CO. adopting the most stringent regulations in reference to testimonials as to ability, honesty, &c. JAMES CARTER & CO., 237 and 238, High Holborn, London, W.C.

MR. WM. PAUL begs to announce that he has made arrangements by which he will be enabled in future to furnish Gentlemen with the NAMES, ADDRESSES, &c., of GARDENERS, and GARDENERS and BAILIFFS, of various qualifications, who are open to Engagements. The fullest particulars as to services required and wages given should be forwarded with application.—PAUL'S Nurseries, Waltham Cross, London, N.

Gardeners and Under Gardeners. WM. CUTBUSH and SON beg to state that they have at all times on their books MEN of various qualifications, whose characters will bear the strictest inquiry. Any Gentleman making application would save time by clearly stating the duties to be undertaken, wages offered, &c., so that suitable Men may be selected.—Highgate Nurseries, London, N.

EXPERIENCED GARDENERS (or as GARDENER and BAILIFF), of various qualifications, recommended to Gentlemen.—Further particulars given on application to Messrs. E. G. HENDERSON & SON, Wellington Nursery, St. John's Wood, London, N.W.

GARDENER (HEAD).—Scotch, age 26, married; has had good experience in England and Scotland. First-class reference.—G. G., 5, Warriston Place, Edinburgh.

To Noblemen and Gentlemen.

GARDENER (HEAD), where good general practical Gardening is required.—A thoroughly experienced Man.—G. H., Messrs. Robinson & Son's, The Nurseries, Tooting, Surrey.

GARDENER (HEAD).—Married, two children; thoroughly understands the profession in all its branches. Four years' good character from last Employer.—J. E., Post Office, Worpleston, near Guildford.

GARDENER (HEAD).—Age 32, married; has a thorough practical knowledge of Gardening in all its branches; also the Laying-out of Grounds, the Erection and Heating of Hot-houses, &c.—R. B., 40, Spencer Street, Chesterfield.

GARDENER (HEAD).—Age 26, married; has a knowledge of Pines, Vines, and Stove and Greenhouse Plants. Satisfactory references can be given.—T. S., 12, Bromell's Road, High Street, Clapham, S.

GARDENER (HEAD).—Age 29, married; understands the Management of Vines, Melons, and Cucumbers, Kitchen and Flower Gardening, and Early and Late Forcing.—T. S., Post Office, Enfield, Middlesex.

GARDENER (HEAD).—Age 32, single; thoroughly understands the profession in all its branches. Any part of Great Britain or Ireland. Good reference.—G. F., the Gardens, Wingerworth Hall, Chesterfield, Derbyshire.

GARDENER (HEAD), age 27.—WILLIAM SMYTHE, Gr. to the Right Hon. Lord Soudes, Elmham Hall, Thetford, Norfolk, has much pleasure in recommending his late Foreman to any Lady or Gentleman requiring a good Gardener.

GARDENER (HEAD).—Age 33, married; has had nearly 20 years' practice in first-class places, Indoors and Out, in all branches of the profession. Good character.—B. T., Belmont Hill House, Lee, Kent.

GARDENER (HEAD).—Age 29, married, one child; thoroughly understands the Management of Vines, Stove and Greenhouse Plants, Early and Late Forcing, and Kitchen and Flower Gardening. Good references from present employer.—W. SMITH, 8, Chestnut Grove, Twickenham Common.

GARDENER (HEAD).—Age 29; thoroughly understands Early and Late Forcing, Stove and Greenhouse Plants, Flower and Kitchen Gardening, &c.; has been 24 years Foreman in the Sheffield Botanical Garden. Excellent character.—Apply in the first instance to Mr. J. EWING, Curator, Botanical Gardens, Sheffield.

GARDENER (HEAD); married, no incumbrance.—W. KEMP, who has lived for the last five years with E. H. Bentall, Esq., M.P., begs to offer his services to any one requiring a thoroughly practical Man; is a first-class Fruit and Plant Cultivator, for which he has obtained numerous Prizes at the Metropolitan and Local Shows.—Mr. A. HENDERSON's, Malda Vale, Edgeware Road, W.

GARDENER (HEAD).—Age 40, married, no incumbrance; a thorough good working industrious Man, of many years' experience in all branches of Gardening, a capital Grower of Stove and Greenhouse Plants, also Grapes, Melons, and Cucumbers, and an excellent Flower and Kitchen Gardener. Wife a good Dairy-woman. Six years' excellent character from present employer for honesty, sobriety, and ability in his profession.—B. A., Longdon Lodge, near Tewkesbury.

GARDENER (HEAD), single.—J. HILL, Gardener to R. Hanbury, Esq., wishes to recommend his Son to any Lady or Gentleman in want of a Gardener. He is fully competent to undertake the Management of a first-rate situation, well versed in the Forcing of Early and Late Fruits, also the Cultivation of Stove and Greenhouse Plants, Ferns, Orchids, and Flower and Kitchen Gardening. Highest testimonials from present employer, and reference from previous one.—F. HILL, Jun., R. Hanbury, Esq., Poles, Ware, Herts.

GARDENER (HEAD, WORKING).—Married, no incumbrance; thoroughly understands Growing Grapes, Hot and Greenhouse Plants, Early and Late Forcing, and Kitchen and Flower Gardening. Six years' character.—H. M. SAFARER, Twickenham, S.W.

GARDENER (HEAD, WORKING), where one, two, or more, are kept.—Age 41, married; thoroughly practical in Vegetable, Fruit and Flower Culture. Good references and testimonials as to respectability and practicability.—D. J. L., 2, Wellesley Road, Snaresbrook, Essex.

GARDENER (HEAD), where several others are kept.—Has had many years' experience in Early and Late Forcing, and all branches of Horticulture; can Manage Land if required. First-class reference.—E. PRACKETT, 1, Carpenter Place, Carpenter Street, Mount Street, Grosvenor Square, W.

GARDENER (FIRST-CLASS), English, married, no incumbrance, Protestant.—To any Nobleman or Gentleman requiring the services of a first-class Gardener, the Advertiser, through the death of his noble employer, is at liberty to engage himself at once; is a thorough practical business Man, with a perfect knowledge of every department of his profession.—Barr, J. W. Mackey, Esq., 40, Westmoreland Street, Dublin.

GARDENER.—Middle-aged, married, no incumbrance; understands Vinery. Would not object to take care of a Horse and Cow, if required. A seven years' character can be given.—Address, Y. Z., Prospect House, Aokworth, near Pontefract.

GARDENER (SINGLE-HANDED, or otherwise).—Age 28, single; good practical knowledge of Vines, Wall Fruits, Stove and Greenhouse Plants, and Flower and Kitchen Gardening. Good character.—A. B., Mr. Thompson, Langley, near Maidstone, Kent.

GARDENER (or Second in Florist Department), in a Small Family.—A Young Man; three years' character from last situation.—JOHN JAMES, East Woodhay, Newbury, Berks.

GARDENER (UNDER), or IMPROVER.—Has had good experience; would not object to pay a small Premium. Two years' good character.—T. A., 21, Vernon Street, Hammersmith.

GARDENER (UNDER).—Age 20; four years' experience. Good character.—Mr. W. BRICE, 8, Teiney Cottages, Priory Grove, South Lambeth.

GARDENER (UNDER), or attend to Horse and Garden.—A young married Man, with good character.—A. B., Post Office, Hognor, Sussex.

GARDENER (UNDER).—Age 28, single; has been used to Early and Late Forcing, and Flower and Kitchen Gardening. Good character.—A. J., Post Office, Godstone.

GARDENER (UNDER), where he can further improve himself in all kinds of Forcing, and Gardening in general.—Age 22; good reference.—R. D., Post Office, Bentley, near Farnham, Surrey.

GARDENER (UNDER).—Age 22, single; steady and active; good experience in Growing Fruit, Flowers, &c. Four and a-half years' recommendation.—W. MARRIS, Church Street, Steyning, Sussex.

GARDENER (UNDER), where Early and Late Forcing is carried on.—Age 19; has had three and a half years' experience in the profession. Good character.—A. B., 2, Hume Place, Clapham, Surrey.

To Nurserymen.

GROUND FOREMAN and PROPAGATOR.—Thoroughly experienced. Satisfactory references as to character and ability.—H. R., 18, Arthur Street, Garston, near Liverpool.

FOREMAN, in a good Private Establishment.—Age 26, has served as above in first-class places; can be highly recommended by last and previous employers.—C. C., 3a, Clarendon Street, Camberwell New Road S.

FOREMAN, in a Nobleman's or Gentleman's Garden.

FOREMAN, in a Nobleman's Establishment.—Single; 15 years' practical experience in Early and Late Forcing, Pines, Vines, Peaches, Cucumbers, Melons, and all kinds of House Plants. Two and a half years' good character.—Post Office, Waltham Green, London, S.W.

ELECTRICITY IS LIFE.—SELF-ADJUSTING CURATIVE and ELECTRIC BELT.—Sufferers from nervous debility, indigestion, weakness, &c., now cure themselves by the only "Guaranteed Remedy" in the world, protected by Her Majesty's Great Seal.

Free for One Stamp, by H. JAMES, Esq., Medical Electrician, the London Hospitals, Percy House, Bedford Square, London, N.E.—Medicine and Fees superseded. A Test gratis. See details. Established 1840.

Galvanism and Medicine Superseded. NEW METHOD OF CURING DISEASE, without aid of doctors and their drugs, by studying the laws of Life and Nature. Invalids cannot too carefully avoid pills, purgatives, life drops, and other dangerous medicines, as they contain poisons, which act on the delicate coatings of the stomach, and destroy the receptacle of our daily sustenance. The Advertiser now offers, has, by God's blessing, been restored to his former strength; and with sympathy for like sufferers, the same will be sent, post paid, on receipt of address and two stamps.—PHILIP GASPEY, Esq., 20, York Buildings, Strand, London, W.C.

Freedom from Coughs in Ten Minutes after DR. LOCOCK'S WAFFLE.

From Mr. W. J. Dale, Chemist, 65, Queen Street, London, W.C. "From the immense sale I have had of Dr. Locock's Waffle, I consider this popular locality I must do you the justice to consider them invaluable for coughs, colds, asthma, &c. To Singers they are invaluable for clearing and strengthening the voice, as they have a pleasant taste. Sold by all Dealers. Price 1s. 11d., 2s. 9d., 3s. 6d., and 11s. per Box."

BILIOUS and LIVER COMPLAINT.—Indigestion, Sick Headache, Loss of Appetite, Giddiness, Spasms, and all Disorders of the Stomach and Liver, are quickly removed by that well-known remedy, FRANK'S PILLS OF HEALTH. They unite the recommendations of the most successful operation with the most successful effect, and where a cure is required nothing can be better adapted.

Sold by all Medicine Vendors, at 1s. 11d. and 11s. per Box, or obtained through any Chemist.

The Best Remedy for Indigestion. NORTON'S CAMOMILE PILLS are recommended as a simple but certain remedy for Indigestion. They act as a powerful Tonic and general Appetizer, and their operation is safe under any circumstances; and persons can now bear testimony to the benefits derived from their use. Sold in bottles at 1s. 11d., 2s. 9d., and 11s. per Box, in the Kingdom. CAUTION.—Be sure to ask for "NORTON'S PILLS," and do not be persuaded to purchase the nameless pills.

Works on Botany, by Dr. Lindley.

Lately Published.

SCHOOL BOTANY; OR, THE FUNDAMENTS OF BOTANICAL SCIENCE. In One Volume, 8vo, half bound, with 400 illustrations, price 6s. 6d.

DESCRIPTIVE BOTANY. OR, THE ART OF DESCRIBING PLANTS correctly, in Scientific Language, for Self-Instruction and the Use of Schools. Price 1s.

MEDICAL and ECONOMICAL BOTANY; or An Account of the Principal Plants employed in Medicine or Domestic Economy. In 1 vol 8vo, with numerous Woodcuts, price 7s. 6d.

Lately Published.

THE ELEMENTS of BOTANY, STRUCTURAL AND PHYSIOLOGICAL. With a Glossary of Technical Terms, and numerous Illustrations. 12s. cloth.

This completes the series of Elementary Botanical Works by Professor LINDLEY, of which "School Botany," and "The Vegetable Kingdom," form the other parts. The first two Parts of THE ELEMENTS OF BOTANY, comprising Structural and Physiological Botany, and a Glossary of Technical Terms, are published in one volume, price 12s. These three parts form a complete manual of Botany for Medical and other Students who have made themselves acquainted with the Author's "School Botany."

N.B. The Glossary may be had separately, price 6s.

THE VEGETABLE KINGDOM; OR, THE STRUCTURE, CLASSIFICATION, AND USES OF PLANTS. Illustrated upon the Natural System. In One Volume, 8vo, cloth, price 36s., with upwards of 600 illustrations.

EXTRACT FROM THE AUTHOR'S PREFACE.

"The Vegetable Kingdom contains, among a large quantity of plants of hitherto unexplored uses, many of the most important in medicine, the arts, and the various branches of industry. The principal part of those which can be brought by teachers in Europe under the notice of students, or which, from their great importance, deserve to be among the earliest subjects of study, are mentioned in the following pages, where they are arranged in the manner proposed in the 'Vegetable Kingdom' of the author, with the sequence of matter departed from in a few instances, when it was found that the convenience of younger students would be promoted by doing so. The author trusts that this selection will be found to have been made in such a way that all teachers who possess reasonably extensive means of illustrating their lectures, and all Botanic Gardens, may furnish the larger part of the species which are mentioned. A small selection was indispensable; firstly, because a greater work would have been beyond the reach of the majority of purchasers, and secondly, because experience shows us that those who have to study a science of observation, such as Botany, require to concentrate their attention, in the first instance, upon a limited number of objects."

HEADBURY, EVANS, & Co, 11, Boulevard Street, E.C.

In One thick Vol., the Eleventh Edition, price 16s.

MODERN DOMESTIC MEDICINE. A Popular Treatise, describing the Symptoms, Causes, and most efficacious Treatment of Diseases, with a large Collection of approved Prescriptions, &c. Forming a Comprehensive Medical Guide for the Clergy, Families, and Emigrants. By T. J. GRAMER, M.D., Member of the Royal College of Surgeons of England, and Fellow of the Royal College of Physicians, Edinburgh.

"To recommend a work like the present to our readers, is only to manifest a proper regard for their welfare. The author is everywhere conscientious and candid."—*Literary Journal*
 "Undoubtedly the best medical work for private families in the English language. It is invaluable."—*Literary Times*

New Ready.
THE QUINOLOGY of the EAST INDIAN PLANTATIONS. With Chemical and Microscopical Investigations. By J. E. HOWARD, F.L.S. F.R.S. Three Coloured Plates, 21s.
 L. REEVE & Co., 5, Henrietta Street, Covent Garden, W.C.

For the Best Practical Information
 On LAYING DOWN NEW or IMPROVING OLD GRASS LANDS.
 See the NEW ILLUSTRATED WORK,

PERMANENT PASTURES.

By R. M. H. SERRIS, F.R.H.S., &c.
 CONTENTS.—How to Prepare the Land—How to Sow the Land—Sowing with or without a Green Crop—The best Sorts to Sow—The After Management—The Breaking up of Grass Land—The Improvement of Pastures—The Mangers most Suitable—Which is added Notes on the Leading Grasses and Clovers, from personal observation, and 120 beautiful Illustrations of the most useful kinds.

"It will not do to let Grass come of itself in order to a good pasture. If you want to grow the right sorts of plants you must sow the right sorts of seed, and you cannot do better than procure and read Mr. SERRIS'S paper on Laying Down Grass, which you will get by sending to us at least a leading Agricultural Gazette, Nov. 3, 1867. Opinion of Professor Buckman:—"I do not know of anything to equal it."

Price One Shilling, post free. SERRIS & SONS, Reading, Berks.

Dr. Lindley's Theory of Horticulture.

In 8vo, with 98 Woodcuts, price 21s. cloth.

THE THEORY and PRACTICE of HORTICULTURE; or, an Attempt to explain the chief Operations of Gardening upon Physiological grounds, being the Second Edition of the "Theory of Horticulture," by Dr. LINDLEY, F.R.S., F.R.H.S., &c.

"The First Edition of this valuable work was issued in 1840, since which time it has had a large circulation, and has been translated into French, German, Italian, and Spanish. Being more particularly restricted to principles, however, the author at length resolved to render the work more general, interesting, and useful by more frequent reference to practical details. He has thus greatly extended the matter by supplying the physiological details with an appeal to facts from the most recent and reliable sources, and the result is a still more interesting and popular compilation of the principles and practice of the science and art of Horticulture."—*Banister*.

"This is a Second Edition of the 'Theory of Horticulture,' with the addition of a large quantity of practical matter introduced to show how entirely scientific principles and good cultivation correspond. The volume contains about four times as much matter as the first edition. Although very large plates are made to every chapter, while many passages in the first edition have been which struck out it may be proper to say that the greatest changes are those which relate to the habits of man, and the ventilation, preparation, packing, resting, and sowing and watering, such being the subjects in which practical men are most interested. The whole work has, indeed, assumed such a firm and permanent character that the great object of the author has been, not to produce a work suited to men of science, but one which every well-informed person may understand and apply. As the volume concludes with a very copious index of matter, there is no difficulty in finding where any given subject is treated of."—*Gardener's Chronicle*.

By the same Author

INTRODUCTION to BOTANY 4th Edition, greatly enlarged, with 6 Plates, and numerous Wood Engravings. Two vols 8vo 24s.

"It has been the Author's wish to bring every subject that he has introduced down, as nearly as possible, to the state in which it is found at the present day. In doing so, he has added so very considerable a quantity of new matter, especially in what relates to Vegetable Anatomy and Physiology, that this present Edition may be considered, in those respects, a new work.
 London: LONGMANS, GREEN & Co., Paternoster Row, E.C.

Crystal Palace, Sydenham, March 2, 1867.

Messrs. WARNER & SONS.
 "GENTLEMEN,—I feel great pleasure in stating that I was present at a trial of your small Crystal Palace Fire Engine, and was much pleased with its efficiency and simplicity. The Pump throws out a steady jet of water to a height of 50 feet with very little labour. The Pump we have is well made, very simple in its parts, and not likely, I think, to get out of order. The advantage of this pump is its being very portable. Besides being a good Fire Engine, it will make an excellent Garden Engine.
 "I remain, gentlemen, yours obediently,
 EDWIN ROSS, Engineer to the
 "Crystal Palace Company."

THE NEW METHOD of GROWING FRUIT. by the Rev. JOHN FOUNTAIN, Southacre, Brandon. A Full Description of this approved system of growing all kinds of Stone Fruit and Grapes, in the same house, of the very highest flavour and perfection—a desideratum hitherto considered quite unattainable. (It is addressed solely to Gentlemen.) May be had by enclosing five stamps to Messrs. RIVERS & SON, Sawbridgeworth, Herts, or to the Author.

Home News.

POSTPONEMENT OF THE QUEEN'S JOURNEY TO OSBORNE.—Her Majesty and the Royal family, who were to have left Windsor Castle yesterday for Osborne, will not leave for the Isle of Wight till next week. All the arrangements for the contemplated visit were in progress on Thursday, but the orders for the departure were countermanded at the last moment, in consequence of the ill health of Prince Leopold. It is now expected that the Court will leave Windsor for Osborne about Monday or Tuesday next.

THE COURT AT WINDSOR.—The Queen and the Princesses left Buckingham Palace on Saturday afternoon for Windsor. Prince Leopold left London at an early hour, and travelled to Windsor by road. Prince Albert Victor, Prince George, Princess Louisa, and Princess Victoria of Wales also left Buckingham Palace for Windsor, previous to the departure of her Majesty. Earl and Countess Russell and Lady Agatha Russell arrived at the Castle on a visit. On Sunday morning the Queen, Prince and Princess Christian, and the Princesses attended Divine service in the private chapel. The Rev. Dr. Monsell, vicar of Egham, preached the sermon. On Monday the Queen drove out with Princess Louisa. The Earl and Countess Russell and Lady Agatha Russell left the Castle. On Tuesday the Queen, accompanied by Princess Beatrice, drove to Bagshot Park, and visited Sir James Clark. The Duke and Duchess of Marlborough, and Lady Rosamond Spencer Churchill, arrived at the Castle on a visit. On Wednesday morning the Queen, with the Princesses, drove in the grounds, and visited Prince and Princess Christian at Frogmore House, Earl and Countess de Grey and Ripon arrived on a visit. The Duke and Duchess of Marlborough and Lady Rosamond Spencer Churchill left the Castle. In the afternoon the Queen held a Council. Earl de Grey and Ripon, the Duke of Argyll, and the Lord Chamberlain had audiences of the Queen. Mr. Michael Costa was introduced by the Lord Chamberlain and received the honour of knighthood. On Thursday morning the Queen went out with the Princesses Louisa and Beatrice.

THE ILLNESS OF PRINCE LEOPOLD.—On Saturday morning some improvement having taken place in the health of Prince Leopold, whose indisposition prevented the return of her Majesty and the Royal family to Windsor on Friday, it was arranged, in order that the Prince should obtain the repose necessary to his condition, that his Royal Highness should be conveyed as quietly as possible to Windsor. The Prince has of late been subject to an alarming hemorrhage, which comes on suddenly, and leaves him in a prostrate condition for a time—a state which requires the greatest care, attention, and repose. In these circumstances his Royal Highness left Buckingham Palace on Saturday morning in advance of the Queen, and travelled in a carriage by road to Windsor. On his arrival at the Palace the Prince was placed on an extemporised couch, and carried to his apartment.

THE DUKE OF GENOA (Prince Thomas of Savoy) has just entered at Harrow School. While there he will be in the family of Mr. Matthew Arnold, who is residing at Harrow. The young Prince brings no suite with him of any kind, but will be at liberty on Sundays to attend Roman Catholic service in London.

THE CABINET.—A Cabinet Council was held on Saturday in Downing Street.

THE CONSERVATIVE PARTY.—On Monday afternoon a numerous meeting of the Conservative members of the House of Commons was held at the residence of the Earl on Lonsdale on Carlton House Terrace. The meeting was convened by a circular from Mr. Disraeli, in order "to decide upon the amendments to be proposed in Committee on the Irish Church Bill." 183 members of the Conservative party were present, including all the members of the late Cabinet, with the exception of Lord Stanley. The meeting was addressed at great length by Mr. Disraeli, and lasted for nearly two hours. It was resolved that numerous amendments should be moved in Committee, the most important of which are that the glebe lands shall be preserved as a perpetual inheritance for the Irish clergy, and that all private endowments made between the time of the Reformation and the Restoration should be respected.

KNIGHTHOOD.—At the Court held by the Queen at Windsor on Wednesday, her Majesty conferred the honour of knighthood on Mr. Michael Costa, the composer of "Eli" and "Naaman," and for many years the conductor of the Royal Italian Opera.

TRIALS OF ELECTION PETITIONS.—The trial of the Northallerton petition commenced on Monday, and afterwards resolved itself into a scrutiny, the result of which failed to obliterate Mr. Hutton's majority, although it reduced it from 14 to 6. Mr. Justice Willes, on Thursday, gave judgment that Mr. Hutton had been duly elected, that neither bribery nor intimidation was proved, and there was no reason to believe that corruption prevailed, the costs to follow the result. The petition against the sitting members for South-West Yorkshire was withdrawn on Thursday, by permission of Baron Martin; each side to pay its own costs. The South Durham and the South Hants petitions have been withdrawn. In the Horsham

petition, "Hurst v. Aldridge," relating to the double return, the respondent has given notice that he does not intend to oppose the petition. The Irish Court of Common Pleas gave judgment on Thursday that Mr. Weguelin's election for Youghal was void on the ground of treating.

THE BUDGET.—The payments which will have to be made in respect of assessed taxes and licence duties, and House-duty, Land-tax, and Income-tax will be collected, under the scheme of the Chancellor of the Exchequer, as follows, after—1869—April 5, last payment of Income-tax, Land-tax, and House-duty for 1868-9, and of assessed taxes on 1867-8; Oct. 10, first payment of assessed taxes on 1868-69. 1870.—Jan. 1, Income-tax on schedules A, B, D, for financial year 1869-70; ditto on schedules C and E, paid by deduction in each quarter of the fiscal year; Jan. 1, payment of Land-tax and House-duty for 1869-70; Jan. 1, licence duties for articles to be kept in the year ending the 31st of December, 1870; April 5, payment of second moiety of the assessed taxes on 1868-69. 1871.—Jan. 1, same payments as January, 1870.

THE EXPERIMENTAL SQUADRONS.—Mr. Childers and Sir Sydney Dacres will go with the reserve fleet in the Agincourt, flying the Admiralty flag, and when they leave, the fleet will be commanded by Rear-Admiral Key. Rear-Admiral Hornby will be second in command, hoisting his flag in the Duncan. The flying squadron will leave England about the 10th of June for Bahia, where it will be joined by the Phoebe from the West Indies, and will thence proceed to Rio de Janeiro and the Cape of Good Hope, which it will leave about the end of September for Melbourne and Sydney, visiting New Zealand about the middle of January, reaching Japan in March, Vancouver's Island at the end of April, and proceeding thence to Honolulu, Tahiti, Valparaiso, and the Falkland Islands, so as to reach England by the middle of October of next year.

THE JUDICATURE COMMISSION.—The first report of the Judicature Commission will very shortly be published. Among its recommendations will be found a proposal for the consolidation of all the Courts, both of law and equity, into one Supreme Court, which will be divided, after the Scotch plan, into chambers or divisions. It will also propose that pleadings be simplified, and official referees attached to the various courts as scientific assessors, following the recommendations of the Patent Law Commission of 1864. The Home Circuit is condemned, and the remodelling of the other circuits is proposed. A new Court of Appeal is to be constituted, to take the place of the Exchequer Chamber, Privy Council, and Chancery Appeal Courts. All the recommendations of the House of Commons' Committee of last year on common and special juries are adopted.

Foreign.

FRANCE.—The *Journal Officiel* of Tuesday contains the following letter from the Emperor to M. Rouher, in reference to the centenary of Napoleon I.—

"M. le Ministre,—"On the 15th of August next it will be a hundred years since the Emperor Napoleon was born. During that long time plenty of ruins have been made, but the great figure of Napoleon has remained up-standing. It still guides and protects us—it has made me that which I am. To celebrate the centenary of the birth of the man who called France the Great Nation because he developed in her those masculine virtues upon which empires are founded, is to me a sacred duty, in which the whole country will willingly assist. According to my views, the best manner of honouring this national jubilee is to increase a little the well-being of the old companions in arms of the Emperor. The 2,700,000f. which the Legion of Honour distributes every year are insufficient to ensure them against privations. I have thought that the Bank of Deposits could be charged with the increased pensions to those old soldiers by assigning to it the credit allowed by the Chamber during the number of years necessary to replace the advances. By that means effectual aid would be given to those unfortunate but glorious men without in any way modifying the Budget. I desire that from the 15th of August next all soldiers of the Republic and the First Empire should receive an annual pension of 250f. The Corps Legislatif, I doubt not, will receive this proposition with the national sentiments which in so high a degree animate it. It will reflect with me that at an epoch in which complaints of the progress of scepticism are rife, it is good to recompense patriotic devotion, and to remind the new generations of it. To recall grand historical memories is to strengthen faith in the future—to do homage to the memory of great men is to recognise the most brilliant manifestations of the Divine will. I request you to consider the matter with the Minister of Finance and the Minister of my house in order to prepare a Bill to be submitted without delay to the Corps Legislatif after the advice of the Council of State. With this, Monsieur le Ministre, I pray God to have you in his holy keeping.—NAPOLEON."

In the sitting of the Senate on Friday, Vice-Admiral Count Bouet de Villaumez contended that the French armaments were not excessive. M. Michel Chevalier regretted the great European armaments, for which he held the Sovereigns responsible. M. Rouland refuted M. Chevalier's statements, and approved the measures taken for the defence of France. He said that perfect union existed between France and the Emperor. His speech was loudly cheered. Marshal Niel said that the present footing of the army was suited for a time of peace. The present budget, as it stands, and the budget to come in 1870, were both peace budgets, and it was the most imperative duty of the Government to secure the safety of the country. The number of men drafted for actual service amounted, on the 1st of March, to 330,000, whereas formerly it reached as high a figure as 400,000 men. In conclusion, he said that the army could, if circumstances demanded such a step, rapidly pass from a peace to a war footing. The contingent of 100,000 men was then unanimously voted. In the sitting of Tuesday, the agreement between the city of Paris and the Credit Foncier of France, after speeches from Baron Haussmann, M. Dumas, and M. Rouher, was approved by the House. In the sitting of the Legislative Body on Saturday, the Marquis de

Lavalette, Minister for Foreign Affairs, in answer to questions put by M. Jules Favre respecting the relations of France with Tunis, Prussia, and Greece, said:—

"With regard to Tunis, the situation is obscure. The revenue realised from the per annum. The interest upon the loan to the total amount of the revenue. Efforts to protect the rights of her subjects. Her influence cannot always be at the enterprises. We have not had negotiations with Germany. This attitude is a sincere desire to maintain good relations, reference whatever in affairs that are purely such as have occurred in Germany are complete tranquillity sets in, by an intelligent aspirations, misunderstandings, and I recommend what time has done. This state of motive to avoid every interference in affairs are not directly interested. Legitimate could lead us to depart from this position, and we do not foresee in the affairs any motive for our so long of our neighbours, and we have not been not be likewise respected. Our relations. The Italian Ministry has re-entered a conservative principles. On the other Government is also progressing in the forces, but the moment has not yet arrived, purely and simply, to the September evacuate the Pontifical territory. With France had but one policy in the East, which was the object and result of the difficulties which gave rise to the and Greece have not been settled, but they disarmed and have resorted to peaceful from having humiliated Greece, the grand spectacle of the whole of Europe several days for the decision of the question of peace or war. Greece is more powerful than before, for she has her flag respect for the principles of international are in vogue among all civilised countries abided by his resolutions, notwithstanding agitation which prevailed in Greece. Our are good. We may say that peace, the object is neither compromised nor uncertain, and we maintain it by all legitimate means. In do, under different circumstances, that should serve peace in the East. A fearful respect attach to whomsoever, giving way to should hurl two great nations one against policy of France is the policy of peace—we shall uphold with the aid of the great powers with the help of Almighty God."

The Marquis de Lavalette resumed his great cheering from all parts of the House. Favre arose to express satisfaction at the the Minister of Foreign Affairs. M. thanked the Government for its statement to Germany, and recommended absolute with the German movement, which, he said, allowed to develop itself. The slightest part of France would suffice to check it. However, it might repair the disasters which three years had brought upon Europe upon France. In the sitting of the Ministry of War commenced. Replying to Marshal Niel insisted upon the necessity of the present military divisions, and said:—

"The estimates are not of an amount which no reason to apprehend our entering upon a second portion of the contingent has been enough. Our military organisation affords us an advantage, for it will enable us to pass in a week to a war footing, without being forced to call contingents, and thereby warn foreign countries. Within eight or nine days we should have 600,000 men under arms. However, as the regular contingent, together with 11,000 volunteers allowed to return to their homes. Our months' furlough, and belonging to the year 1863, have been required to join their regiments. In the sitting of Tuesday Marshal Niel M. Garnier-Pagès, said that the effective the army would never exceed 400,000 men. months' furlough soldiers, who were recently for exercise, would be sent back to their having been inspected. An amendment, the suppression of the Imperial Guard, and of 200,000 men on the effective army, were adopted, and the discussion on the Algeria commenced. In the sitting of debate the Estimates of the Ministry of commenced. M. Dupuy de Lôme, Councillor of opposing an amendment of M. Pau. Bethmont that the present fleet and the supplies represent a value and a naval strength never before possessed at any period of The amendment was rejected. The Tuesday publishes a letter from the Duke in which he denies the rumours of his certain Ministerial combinations, or offered to join any such combinations.

SPAIN.—In consequence of the Fernando of Portugal to accept the Trunvirate has been proposed by the Chamber, to be composed of Práxedes Figueros, the Republican Deputy. The has been abandoned, because the consequences would have been in indefinite ment of the financial question, which cannot any longer. It is reported that the Dake pensier intends to maintain the throne, and that several members of the party have decided to advance to his subscription, on the express rendering himself responsible amount. The debate on the progress. On Wednesday the Bishop of a speech in opposition to the principle of liberty. In the sitting of Thursday consideration, by a majority of 129 to 4, the total abolition of capital punishment.

the Government if it was true that had taken the Carlist movement under her General Prim replied in the negative, the movement would certainly be suppressed by the Constitution as then... article of the Constitution, prejudging the form of government, was rejected. The was agreed to, after replacing the word by the word "nation." The directive of the majority has resolved to postpone on the question of the form of government more opportune time. Messrs. of Frankfurt, Messrs. Oppenheim, Paris, the Societe Generale, Paris banks, have undertaken the 5 per Cent Exterior Loan, recently approved by the Cortes. The this loan will shortly be announced.

The result of the elections is largely in Government. A rumour is current that de Sa da Bandeira intends tendering his owing to the had impression made by the telegram, communicating to Madrid the King Dom Fernando to accept the

The requisite conventions have been signed for running a through train, without... of carriages, from Ostend to Brindisi, by way of... and the Brenner Pass.

PARIS. — The rumour that the French Government had entered into an engagement to recall its troops from Rome after the elections is contradicted. The Pope has granted an amnesty, which includes political offences. The marriage of Duke Robert of Parma and Princess Maria Pia, daughter of the late King of Naples, was celebrated on Sunday the 19th inst. by Pius IX., who is god-father of the bride. The ceremony was performed in the Pope's private chapel, and the bridegroom afterwards performed their devotions before the tomb of St. Peter.

GREECE. — M. Rhangabé, the newly-appointed Greek Minister at the Porte, arrived at Athens on Tuesday from Paris.

SERVIA. — The engineers employed by Messrs. Oppenheim & Co. have commenced the works of the railway from Belgrade to Aluzina. The Roumanian Railway will join the Hungarian lines in Servia.

THE PRINCIPALITIES. — The new Chamber will meet on May 11. Prince Charles is about to visit Jassy for a few weeks, accompanied by the Minister of the Interior. The Common Council of Bucharest has been dissolved on account of its revolutionary attitude during the elections.

TURKEY. — The Sultan has received a telegram from Queen Victoria, thanking him for the reception given to the Prince and Princess of Wales on their visit to Constantinople. The Prince of Wales was present at an English cricket match at Constantinople on the 8th inst. An official dinner was given at the British Embassy in the evening. On Friday their Royal Highnesses paid a visit to the Grand Vizier, and lunched at his residence. On Saturday the Princess of Wales took luncheon in the palace of the Sultan, and afterwards started for the Crimea. Grand preparations for their reception had been made in Russia. The two expeditions... at Constantinople. OTTOMAN GOVERNMENT... Constantinople.

SYRIA. — Mrs. Burder's... has offered to provide Jerusalem with an... system of water supply at her own cost, and the scheme embodying the details of her offer has been laid before the Council of State at Constantinople, which has reported in its favour.

INDIA. — The Bombay papers emphatically affirm that the Duke of Argyll has ordered the withdrawal of the Bengal Bank Agency from Bombay. The Times of India of the 9th... publishes a detailed statement of the charges of the Abyssinian expedition in India. The total expenditure defrayed by the Bombay Government was... to which has to be added the cost of landing the troops, stores, &c., 200,000, thus bringing up the net total of expenditure in India to 6,800,000. The expenses for the hire and fitting up of the transports amounted to 3,250,000, and for coals, commissariat, and stores, to 850,000. The accounts were sent to the Home Government by the mail of the 10th.

CHINA. — Six Europeans have been attacked by natives, near Shanghai, and severely injured. Some native Christians, inhabiting villages 40 miles from Foochow, have been subjected to great persecutions.

JAPAN. — The Northern party have taken possession of the Island of Sado. It is considered that the late disturbances have not been so satisfactorily settled as was thought. The European Ministers are at Hong Kong. A sharp shock of earthquake has been experienced in different parts of Japan.

UNITED STATES. — The Senate rejected the Alabama Claims Treaty on Tuesday by a majority of 54 to 1, and on Thursday ratified the Naturalization Treaty with Great Britain, but rejected the Darien Canal Treaty. President Grant has appointed Mr. J. Lothrop Motley to succeed Mr. Revere Johnson as United States Minister to Great Britain; Mr. John Jay to be Minister to Austria; Governor Curtin, of Pennsylvania, to be Minister to Russia; Mr. Henry S. Sanford to be Minister to Spain; Mr. Horace Rublee to be Minister to Switzerland; Mr. Thomas Nelson to be Minister to Mexico; Mr. Freeman Morse to be Consul in London; Mr. William Thomson to be Consul at Southampton, and Mr. Meredith Reade to be Consul at Paris. The Senate has confirmed the appointments of Mr. Motley and Mr. Jay as Ministers to Great Britain and Austria. The House of Representatives on the 8th passed General Butler's Bill, authorising the President to submit to the voters of Virginia, Mississippi, and Texas, the constitutions framed by the Conventions of those States, and, when ratified, to order the election of their State officers. On the following day the Senate passed the Bill, with an amendment, providing that Virginia, Mississippi, and Texas must ratify the suffrage amendment before being admitted to representation in Congress. The House has concurred in this amendment, and the Bill, having been signed by President Grant, is now law. On Saturday the House passed with unanimity a joint resolution, authorising the President to recognise any de facto Government in Cuba, provided it be based upon Republican principles. This resolution did not reach the Senate. Congress adjourned on Saturday to the 7th December next.

BRASIL AND PARAGUAY. — Accounts from Rio to March 12 state that the war was not considered ended, Lopez being still in Paraguay. An expedition of 12,000 men was preparing to march into the interior, in search of Lopez, of whom nothing was positively known.

CUBA. — The British schooner, Jeff Davis, with five Cuban insurgents, who were endeavouring to escape to the Bahama, has been captured by a Spanish frigate. The captain and crew were thrown into prison at Caibarien, and the Cubans on board were taken from the guard and murdered in the streets. The British man-of-war Heron has gone to Caibarien to inquire into the matter. The Peruvian iron-clads that left Pensacola recently have taken service with the insurgents. They were in the United States service during the rebellion, and were then known as the Calcutta and Onota. Several filibustering expeditions are reported to have landed on the coast of Cuba.

Parliament.

IN the House of Lords on Friday, Earl Russell brought in a Bill to enable the Crown to make Life Peerages. He contended that the creation of such peerages would enable the Crown to secure for the State men illustrious by... or scientific knowledge, their political experience in public services, but who might be unable to maintain... more than four should be created in any one year, and that the judges of the superior courts, puisne judges after 10 years' service; persons who had filled the office of Attorney General or Lord Advocate; and members for 10 years of the other House of Parliament, should be eligible for... After some remarks from the Marquis of Salisbury, Lord Cairns, Lord Granville, Earl Stanhope, and Lord Colchester, the Bill was read a first time. Earl Grey brought in a Bill to amend the laws relating to the election of representative Scotch and Irish Peers. On Monday Lord Westbury brought in a Bill for consolidating and amending the law of copyright. At the instance of the Duke of Marlborough and Lords Dalhousie and Airlie, the Duke of Argyll consented to postpone the Committee on the Parochial Schools (Scotland) Bill until the 10th May. The Salmon Fisheries (Ireland) Bill, and the Railway Companies' Meetings Bill, were read a second time. On Tuesday the Railway Companies' Meetings Bill passed through... The Naval Stores Bill, the object of which was to... rules respecting the inscription of the... so as to enable the Admiralty to sell surplus goods to greater advantage, was read a second time. On Thursday the Earl of Shaftesbury moved the second reading of the Ecclesiastical Courts Bill, the object of which was to provide a superior judge, and judges for the diocesan courts; admit solicitors to practise on the same footing as proctors; establish a court of appeal, and a safe and proper register, to restore to the clergy their rights of provocation and proclamation, and to the laity their right to promote the office of judge by empowering three householders to originate a prosecution. The Archbishop of Canterbury moved the second reading of the Clergy Discipline and Ecclesiastical Courts Bill, stating that it had long been under the consideration of the episcopal bench, and that it resembled Lord Shaftesbury's Bill by abolishing the preliminary inquiry, and providing for the making of rules and orders, and differed from it in not dealing with the existing registers, or empowering the laity to originate suits. His Grace suggested that both Bills might very conveniently be referred to a Select Committee. Earl Granville on the part of the Government, concurred in the proposed reference to a Select Committee, and after some discussion, in which the Earl of Carnarvon, the Earl of Harrowby, and Lord Cairns objected to Lord Shaftesbury's provision for allowing three householders to originate a prosecution, both Bills were read a second time, and referred to a Select Committee. The Salmon Fisheries (Ireland) Bill, and the Naval Stores Bill, passed through Committee, and the Railway Companies' Meetings Bill was read a third time. Yesterday Earl DE GREY and RIRON, in reply to Earl COWPER, said that the Government had received information from the consul at Buffalo that an infectious disease, known as "hog cholera," was widely prevalent in that district. Lord HORTON called attention to the question of pauperism in this country, and suggested that a Royal Commission should be appointed to ascertain if... of an emigration rate, a system of pauper... could not be organised. Earl GRANVILLE admitted the importance of this great social question. The House was left sitting.

IN the House of Commons on Friday Mr. FAWCETT moved a resolution that in the opinion of the House all appointments to the civil and diplomatic services ought to be obtained by open competition. The CHANCELLOR of the EXCHEQUER said that the Government had not yet been able to consider the question, but it was clear that the general adoption of the competitive system must be preceded by a reorganisation of the civil service, and a separation of the intellectual and mechanical employments. He therefore hoped that the motion would not be pressed. Lord STANLEY also, as a warm friend to the competitive system, advised Mr. Fawcett not to go to a division. Lord STANLEY and Mr. DEKE supported the motion, and Mr. GLADSTONE concurred with Mr. LOWE and Lord Stanley in urging Mr. Fawcett not to press the motion. Mr. FAWCETT, however, insisted on going to a division, when the motion was negatived by 281 to 30. In answer to Mr. E. RICHARDS and Mr. B. CARTER, Mr. BRUCE said that he was ready to assent to a Select

where they could readily obtain a livelihood. There were 10,000 working men out of employment in the metropolis alone, and 45,000 others were dependent on them. The first resolution was moved by Mr. M. P., to the effect that emigration was one of the best methods of relieving the misery that exists. He gave an account of his own experience of emigrating and emigrants to Australia. Mr. M'Arthur, formerly a member of the Legislative Council of Adelaide, gave a highly favourable account of life in Australia, where, he said, any sober, steady, persevering man might speedily obtain the means of becoming, not a mere labourer, but an employer of labour. He proposed that the colonies should find one-third of the means required, that Government should give another third, and that the remainder should be supplied by the emigrants themselves, or by private means. The society encouraged emigration only to British colonies. He had found in travelling in the United States that the Irish, and in many cases the English, emigrants to that country were more hostile to England than native Americans, while the colonies were as loyal as any part of the Queen's dominions. He also proposed that every pauper sent out to a colony should be at once a customer for British manufactures. Lord Alfred Chichester moved the second resolution, requiring that the amount of relief necessary to produce any permanent improvement was beyond the means of private or local action, and required the aid and management of Government. He urged that while British manufactures to the value of about 17s per head were sent to the population of the United States annually, the exports to Canada were to the value of 5s per head of its population, and those to Australia 10s per head—New Zealand taking as much as 10s per head. He urged the necessity of providing for the proper and speedy transport of the emigrants up the country on disembarking at the seaport of the colony. Mr. Jenkins seconded the resolution, which was carried. Messrs. Young, Duddell, and Plummer spoke to the third resolution, that the society deserved support, and the fourth resolution, appointing deputations to wait on the Home and Colonial Secretaries, was moved by the Rev. A. S. Herring, seconded by Mr. T. Briggs, and carried by acclamation.

EAST-END EMIGRATION.—On Tuesday 320 men, women, and children left London for Liverpool on their way to Canada, under the auspices of the society formed a short time ago for the promotion of family emigration from the East-end of London. They had all been inhabitants of Poplar, Shadwell, Bethnal Green, and the Isle of Dogs. They were accompanied by a small contingent of 20 whose expenses had been paid by the Clerkenwell Emigration Fund. The promoters of the movement have been encouraged by their past experiences, which, though brief, has not been uneventful. In August, 1868, 17 families, numbering 64 persons, were sent out to Canada from the distressed districts of the East of London. On their arrival the adults obtained work almost immediately, and the extracts from their letters have testified effectually to the improvement of their condition. At 8 o'clock on Tuesday the first contingent of the emigrants arrived at the St. Pancras station, and were quickly succeeded by the rest. As the various sections entered the station they were invited to a substantial breakfast, provided by Messrs. Spiers & Pond in one of the unfinished rooms of the terminus. Several ladies who take an interest in the movement were present, including Lady Ducie, Lady De Grey, Lady Constance Morton, the Hon. Miss Waldegrave, Lady Burrell, the Hon. Mrs. Hobart, and the Hon. Mrs. A. Kinnaid, who all exerted themselves to make the occasion as happy as its circumstances would allow. The departure of the emigrants lacked many of the almost dramatic incidents which are witnessed when fathers and husbands are suddenly separated from their children and wives. Whole families were assembled together, and, though the associations of home must have been inevitably lost in the carriage of a railway train, the ties of kindred at least were left undisturbed. Instead, the loud swelling cheer from the emigrants as the engine gave the signal for departure contained in it more of joy than sadness. It may be added that when the emigrants reach Canada they will be supplied with funds to enable them to seek suitable employment. There are sufficient handicraftsmen of various trades among them to found a colony among themselves.

CLIFTON CLUB.—At the last general meeting of the Clifton Club it was decided to request the Earl of Lichfield and Mr. Disraeli to sit for their portraits, with a view to commencing a gallery of eminent Conservative statesmen, to be preserved in the Club.

NATIONAL RIFLE ASSOCIATION.—Lord Elcho, as President of the National Rifle Association, has issued a letter to its members, placing before them the position and prospects of the institution. His lordship reminds them that the tenth annual prize meeting is about to be held, and that although the existing deficit need not be viewed with alarm, there is only one way by which the Association can be placed on a secure basis—namely, by a large increase in the number of subscribing members.

JUBILEE OF PIUS IX.—On Sunday, the 50th anniversary of the first mass of the Pope was celebrated at the Roman Catholic Cathedral, Moorfields, by a 20th mass, at which Archbishop Manning delivered a sermon on the text, "What shall I render unto the Lord for all the benefits I have received from him." He said that this festival of jubilee was one of joy and praise throughout the whole world. This was the exact day of the year on which the Holy Father first offered upon the altar the sacrifice of Jesus Christ. The first mass of a priest was the greatest day of his life. The priesthood was the most dignified office on earth, and a poor priest, though in rags, had more dignity than any monarch. There was a day coming when this would be understood, but it would

be a day when all secrets should be revealed. There were few jubilees of the first mass ever celebrated. By the inevitable law which seemed to rule that the priests of the Church of Rome should die young, it was the rarest event; but when we considered what had been the life of Pius IX., and how long he had lived with the burden of the whole Church on Earth on him, it was almost a miracle that they should celebrate his jubilee; and there were reasons to render this festival a festival of joy to the whole world. He then referred to the events of recent years, and, in speaking of those of two years since, said they had been brought about by a man whom Italy, to her shame, had accepted as her greatest patriot. He read from an Italian paper an account of the number of offerings made to the Pope on his jubilee in consequence of a movement that had arisen in the revolutionary city of Bologna. Among these offerings were many from poor persons ranging from 20d. to 2s. in amount. He felt sure, he said, that he had acted in unison with the wishes of his hearers in giving the poorest of them an opportunity of adding their contributions to those of the rich on this occasion. Having given a sketch of the life of Pius IX., he said that he had stood invincible for 20 years, and that he would never yield one iota of the rights or position of the Church. He might die in exile, but if so, he would die unyielding, and the Vicar of Christ would not die. In conclusion he referred to the doctrinal and moral action of the present Pope on the Church as of the highest value to its strength and stability.

METROPOLITAN STREET TRAMWAYS.—The House of Commons Committee on these Bills announced on Tuesday that they had agreed to the following resolutions:—1. That a case for the promoters of the Bill had been established to the satisfaction of the Committee only so far as regards the construction of the southern line from Hercules Buildings to Kennington, Clapham, Brixton, and Stockwell, less the loop between Hercules Buildings and Westminster Bridge. 2. That some limitation must be placed on the proposed monopoly. 3. That after a period to be fixed the street authorities are to have the power of purchasing the tramways. 4. That the power of the police to regulate the traffic shall be reserved. 5. That the by-laws shall be subject to the approval of the Home Office. The chairman said that, subject to these regulations, the preamble of the Bill might be considered as proved. These were general resolutions, and must be considered as applicable to the three bills. Mr. Denison, Q.C., stated that after this decision the Metropolitan Omnibus Company did not intend to offer any opposition to the principle of the Bill, but would reserve their opposition for another place. Some discussion then took place as to the propriety of adjournment, in order that the promoters might have time to consider the effect of the resolutions before proceeding with the other bills, but it was eventually agreed that the bills should be proceeded with. Mr. Rodwell then called witnesses to prove the preamble of Bill No. 2, called the Pimlico, Peckham, and Greenwich Tramway Bill, observing that the Pimlico portion of the bill had been abandoned, and that the line would commence near the railway station in Upper Kennington Lane, and terminated at Blackheath Hill. On Wednesday the chairman announced that the Committee had passed the preamble of the Bill on the two following conditions:—1. That the tramway must be so constructed as to secure the maintenance of the level of the streets. 2. That the line shall be completed as a whole, and when completed shall be worked as a whole from terminus to terminus. The case of the promoters of the northern line, commencing at Whitechapel Church, and proceeding along Mile End Road, Bow Road, High Street, Bow, High Street, Stratford, to the Broadway, was then opened. After hearing several witnesses, the Committee decided that the preamble had been proved, and postponed the consideration of the clauses for a few days.

DISPUTES IN THE BUILDING TRADE.—The relations between the builders and their workmen are likely to be seriously disturbed this year by the attitude taken by both parties in respect to the hours of labour, rate of wages, &c., several notices and cross notices having been given by the masons and joiners and their employers. The stonemasons of Manchester struck on Saturday, their six months' notice having expired, and have since been requested by the masters to remove their tools from the places where they were working; and the carpenters' notice in that city expires on May 1. The operative masons of Leeds have determined to resist the proposed payment by the hour and the formation of courts of arbitration for the settling of disputes and preventing strikes. The employers have, however, come to the unanimous decision that the alterations should be carried into effect on the 1st of May next, according to the notice given.

LIEBIG'S EXTRACT OF MEAT.—On Saturday evening a number of gentlemen interested in this new article of diet, and several men of science capable of explaining the advantages to be derived from its general use, dined together at St. James's Hotel, where Mr. Francatelli had prepared a dinner in which the extract formed the basis of all the soups and made dishes, in lieu of the ordinary stock. The proportions in which it was used were exceedingly small, one ounce being equivalent to the stock produced from two pounds of lean beef. Mr. Boucher, chairman of the company, presided, and Mr. Gaucher filled the vice-chair. Among the company were Dr. Thudicum, Dr. Richardson, Dr. Routh, Dr. Riden Bennett, Dr. Dupré, and Mr. John Ruskin. The principal exponent of the good qualities of Baron Liebig's extract was Dr. Thudicum, who explained the nature of the operations at the company's works at Fray Bentos, on the River Uruguay, and spoke highly of the many advantages the public would derive from a general use of the extract. He asserted

that it was quite equal to fresh meat physiologically, that it was capable of keeping a man in health and ability to do his work, and that the great mass of the people could be supported by it at a much reduced cost. He also spoke of the advantages to be attained by the general use of the extract in hospitals, in many of which it was already adopted. Several other gentlemen bore strong testimony to the nutritious qualities of the extract; and Mr. Francatelli, on being called upon, confirmed all that had been said in its favour as an article of food. He considered it would be especially useful amongst the stores of the army and navy, looking to the difficult circumstances in which they were placed at times.

DESTRUCTIVE FIRES.—On Monday night the extensive warehouses of Mr. Frith, hop factor, and Mr. Leake, hop merchant, in Kentish Buildings, at the bottom of the Spur Inn and King's Head Yards, in High Street, Southwark, together with a great portion of the stabling and warehouses of the two Inns, and the warehouses of Messrs. Baker & Co. hop merchants, were destroyed by fire. The loss is estimated at 50,000l. On Monday morning a fire broke out in the Junior Carlton Club, in Begeot Street, by which the newspaper and writing-room on the ground-floor, the billiard-room and contents on the third floor, and part of the roof were destroyed.

ATTEMPT TO MURDER A MASTER AND MISTRESS.—On Monday Frank Pye, aged 16, an apprentice, was brought up on remand at Southwark Police Court, charged with attempting to murder Mr. and Mrs. Nicholls, his master and mistress. It appeared that the prisoner had been in the service of Mr. Nicholls, who is a tailor in the Old Kent Road, for about five months, and had been going on very well. On Saturday week his master spoke to him in a friendly way about his friends finding him some better clothes, and it is supposed the lad took offence at the subject being mentioned. About four o'clock on Sunday morning prosecutor and his wife were aroused from sleep by severe blows from a kitchen poker. Mr. Nichols was stunned, but his wife, who had also been wounded in the head, and was covered with blood, was able to get out of bed, rush to the window, and scream "murder." The police came, and, at her request, broke in the door. There was no other person in the house but the prisoner, who was found in his room half undressed. He did not deny the charge, but made no defence, and was committed for trial. Mr. and Mrs. Nicholls were both very seriously injured.

THE PUBLIC HEALTH.—The weekly return of the Registrar-General states that in the week that ended on Saturday, April 10, 4432 births and 3376 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 27 per 1000 persons living, being 26 per 1000 in London, 28 in Edinburgh, 25 in Dublin, 27 in Bristol, 20 in Birmingham, 30 in Liverpool, 28 in Manchester, 24 in Salford, 27 in Sheffield, 30 in Bradford, 26 in Leeds, 29 in Hull, 29 in Newcastle-upon-Tyne, and 37 in Glasgow. The rate in Vienna was 80 per 1000 during the week ending the 5d inst., and in Berlin 18 per 1000 during the seven days ending the 8th inst. In London the births of 1183 boys and 1092 girls, in all 2275 children, were registered in the week. In the corresponding weeks of 10 years 1859-68, the average number, corrected for increase of population, was 2278. The deaths registered in London during the week were 1550. It was the 11th week of the year, and the average number for that week, corrected for increase of population, was 1560. The present return is therefore 10 below the estimated amount.

Provincial.

BRIBERY HILL.—The jury at the inquest upon the man who was drowned by the great colliery inundation at Bribery Hill, have returned a verdict that he lost his life from the accidental bursting of a dam; and that a dam in such a place, and used for the purpose of keeping back any large quantity of water from any workings adjoining, should be subjected to supervision by competent persons, in order that from time to time the actual pressure on the dam should, if possible, be ascertained.

BRISTOL.—The sentence of death passed upon Henry Jenkins, for the murder of Fanny Reeves, at Bedminster Bridge, has been respited, pending the arguments before the Court of Criminal Appeal on the legal points raised at the trial. The convict continues to protest his innocence.

CARMARTHEN.—A girl called Sarah Jacobs, residing at Llanfihangel-ar-Arth, near this town, is said to have taken no food since October 10, 1867, and not even water since the end of December of last year. Dr. Lewis, of this town, in an article he has sent to the "British Medical Journal," says that the statements made respecting Sarah Jacobs are of such an astounding nature that belief is scarcely possible, yet accumulated evidence might produce conviction. Some attempt has been made to test the credibility of the parents of the girl by watching her closely, and the attempt came to an end for want of funds. The girl's parents are respectable farmers, not in needy circumstances. Dr. Lewis does not offer any explanation as to the manner in which life and growth can be maintained without ordinary food.

CLIFTON.—The ancient British encampment of Bur Wals, at the foot of Clifton Suspension Bridge, is threatened with complete destruction. This remarkable camp consists of an oval space, at one time entirely enclosed, and surrounded by an embankment and ditch. There is little doubt of its being of British origin, though Roman antiquities having been found there, it appears to have been subsequently occupied by the Romans. The building company are destroying this old embankment for the value of the limestone of which it is formed, and their picks and shovels have

Lincolnshire Regents, 60s. to 90s.; Dunbar and East Lothian do., 60s. to 120s.; Perth, Forfar, and Fife do., 60s. to 100s.; do. Rocks, 60s. to 55s.; French and Belgian Whites, 40s. to 60s.

HOPS.—BOROUGH MARKET, April 16.

Messrs. Pattenden & Smith report an active demand for Hops of all descriptions during the week, many speculators being induced to purchase at the present low rates.

METROPOLITAN CATTLE MARKET.

MONDAY April 12.

The supply of Beasts is short, and the sudden change of weather makes buyers cautious. Prices of all descriptions are lower, and several lots remain unsold. There is a large increase in the number of Sheep; almost all are now shorn, we therefore cease to quote in the wool; prices on the average are lower. There is more inquiry for Lambs; trade remains unaltered for Calves. Our foreign supply consists of 2449 Beasts, 13,880 Sheep, and 110 Calves; from Scotland there are 125 Beasts; from Ireland, 25; from Norfolk and Suffolk, 1000; and 390 from the Midland and Home Counties.

	s. d.	s. d.	s. d.	s. d.
Best Scots, Herefords, &c.	5	2 to 5	4	
Best Shorthorns	4	10 to 5	2	
2d quality Beasts	3	0 to 4	0	
Best Downs and Half-breeds	—	—	—	—
Do Shorn	5	2 to 5	4	
Beasts, 3990; Sheep and Lambs, 31,790; Calves, 110; Pigs, 65.				

THURSDAY, April 15.

We have a short supply of Beasts; however, it is quite equal to the demand, and Monday's quotations are not exceeded. The number of Sheep and Lambs is larger than on Thursday last; trade is not very brisk, yet they are all pretty well cleared off at Monday's prices. Calves are more plentiful; trade is very slow at lower rates. Our foreign supply consists of 480 Beasts, 3735 Sheep, and 211 Calves.

METROPOLITAN MEAT MARKET.—April 17.

Best Fresh Butter .. 16s. per dozen lb.
Second do. do. 14s.
Small Pork, 4s. 4d. to 5s. 0d.; Large Pork, 3s. 8d. to 4s. 4d. per 8 lb.

MARK LANE.—MONDAY, April 12.

There was again a short supply of English Wheat to this morning's market, which was sold at about 1s. per qr. decline upon the prices of this day se'night. For foreign the demand was very limited, and the sales made were at a similar reduction. Barley was a slow sale at last week's rates. Beans and Peas were unchanged in value. The Oat trade was quiet, and in some instances less money was accepted. Foreign Flour was neglected, and rather cheaper.

FRIDAY, April 16.

The expected extinction of the small remaining import duty on grain and flour has had no influence of moment upon the trade; the forcing weather, however, combined with good supplies, and the continued absence of a healthy consumptive demand for flour, have led to a very restricted business during the past week, and a further decline of 1s. per qr. on Wheat, both home grown and foreign, in the markets of the kingdom. Spring Corn of all descriptions has been slow to move, and the value of Beans, Peas, and Maize has been tending downwards. Barley declined 1s. to 2s. per qr. for best descriptions. Flour met only a retail demand, at 6d. per barrel and 1s. per sack decline; the reduction quoted at Birmingham was 8s. 4d. per sack. The arrivals of grain and seed-laden vessels off the coast during the week consisted of 49 cargoes, of which, with those left over from last week, there remained for sale last night 45 cargoes. Wheat off the coast met with a very limited demand, and prices for this article and for Maize and Barley were in buyers' favour, the business done being very restricted. Beans were 2s. cheaper to sell, Rye unaltered. Buyers of floating cargoes and for forward shipment are waiting for lower prices before operating. Paris, April 15.—The weather continues to be favourable, and prices of Wheat as well as Flour are pointing downwards. The eight marks are quoted at equal to 34s. 3d. per 280 lb. The stock at the Halle is estimated at 9500 cwt.

The arrivals of foreign Wheat during the week have been moderate, of other descriptions of grain small. There was a poor attendance at this morning's market, and English Wheat met a slow sale at Monday's quotations. For foreign the demand was quite in retail, at about the same terms. Spring Corn was steady, without alteration in value.

ARRIVALS FROM APRIL 10 TO APRIL 15, BOTH INCLUSIVE.

LIVERPOOL, Tuesday, April 13.—There was a good attendance at market. Wheat in limited request, at 2d. per cent decline since Friday. Flour very dull, and English 1s. lower.

Beans, Oats, and Oatmeal neglected; Indian Corn in small demand, and 6d. cheaper, round 28s. 9d.; mixed 29s.

SEED MARKET

The fine and genial weather of the last few days has had a favourable effect upon the agricultural seed trade, and we have consequently to report an increase of activity on our markets. Foreign Clovers are steady in value, and meet with a fair retail demand. Alsike and White Clover seed are without change; superior samples of the latter are for the moment very scarce, home-grown red having come forward more freely, is obtainable on easier terms. New French Italian Rye grass meets with a brisk inquiry; it is just now in very short supply. Canary and Hemp seed are in better request, at improved prices. Fine Mustard seed continues scarce, and dear. sowing Rapeseed is also tending upwards. Spring Tares are cheaper, some quantity have been taken for export to France. French Sainfoin seed has a ready sale at the late advance. JOHN SHAW & SONS, 15, WATER LANE.

WANTED, a MAN who understands the Cultivation of Fruit Trees, Roses and Evergreens. A permanent situation.—Apply to JOHN SEALE & SON, St. George's, Bristol.

WANTED, in a Nursery, a good PRACTICAL MAN, who understands the Propagating of Bedding and other Hard-wooded Plants, and to make himself generally useful.—Apply, stating terms, to Mr. ISAAC MATTHEWS, Milton Nurseries, Stoke-on-Trent, Staffordshire Potteries.

city, the Prince and Princess will go to be spanned by King George; and it is expected will arrive at Marseilles, on their way home, 7th and 10th of May.

DUKE OF EDINBURGH.—It is announced Duke of Edinburgh will visit Calcutta about of December, and that his stay in India will be about three months. It is expected to spend two or three weeks in Calcutta, and to Agra, where the grand durbar will be held, after which he will visit Cashmere.

THE HEALTH OF PRINCE LEOPOLD.—In the train of the Queen and Royal family to Portsmouth, a saloon carriage, furnished with rubber matting, was attached specially for the Prince Leopold, and the public were excluded from the terminus, in order that his Royal Highness should not suffer from any unnecessary excitement. He had so far recovered from the prostration of his recent attack as to be able to walk with ease to his carriage. Sir William Jenner attended upon him.

CABINET.—A Cabinet Council was held on Downing Street.

PARLIAMENTARY MOVEMENTS.—The Earl of March, the Duke of Richmond, was on Saturday at West Sussex, in the room of the Hon. H. now Lord Leconfield, without opposition. The eldest son of the Earl of Clarendon, and John Hamilton were put in nomination for Brecon, the former in the Liberal, the latter in the Conservative interest. The show of hands in favour of Lord Hyde, and a poll was demanded of Lord C. J. Hamilton. The Attorney-General, on Thursday, gave notice of an Address to the Queen, and a Commission to inquire into corrupt practices at the late election for Cashel.

OF ELECTION PETITIONS.—Mr. Justice Stirling gave judgment on Saturday on the Hastings petition, deciding that Messrs. Brassey and North had acted in good faith, and that no corrupt practices had been proved against them. Costs to be paid by the petitioners. The petition against the Messrs. Malcolm and Collins, the Conservative members for Boston, has been withdrawn. The petition for the return of Mr. Hurst for the constituency of the new Taunton petition against Mr. Gurney and Mr. Hoare, commenced on Saturday in that town, and terminated yesterday on the withdrawal of the petition. Messrs. Gurney and Hoare were thereupon declared duly elected, the petitioners to pay costs. It is stated that the Conservative party at Hereford have resolved to petition for the return of Colonel Clive and Mr. Hoskyns. A Bewdley petition against Mr. Cunliffe will be presented on the 27th inst. before Mr. Justice Stirling, and the new Taunton petition against Mr. Gurney will be heard before Baron Martin on the 28th inst.

APPOINTMENT.—Sir Michael Shaw Stewart has been appointed Lord-Lieutenant of Renfrewshire, in the room of the late Lord Glasgow.

EXETER.—Bishop Trower, late Bishop of Gibraltar, has accepted a commission from the Exeter diocese, empowering him to undertake the episcopal duties of the diocese.

SAVINGS BANKS.—The sum of £6,240 was received from depositors in the Savings Banks during the year ending on December last, and the total amount standing on that date was 11,666,655l. 8s. 3d. The amount deposited on that date was 252,897l. 4s. 3d. The cost of the establishment last year was 61,860l. 2s. 3d.

Foreign.

FRANCE.—In the sitting of the Legislative Body on Friday, the Budget for the Ministry of Commerce was discussed. MM. Gohier, Buffet, Kolb, and Brame made speeches, pointing out what was alleged to be the disastrous effects of the Treaty of Commerce with England on the industry of the departments of France. M. Gressier, the Minister of Commerce, in reply, stated that a Commission had been appointed to investigate the effects of the present system of the temporary admission of foreign goods into France without duty, adding that if this system was the cause of any distress, the Government would endeavour to put an end to it. M. Thiers asked that a Parliamentary inquiry into this question should be instituted. M. Gohier demanded that the right of fixing the tariff should be restored to the country, and that notice should be given of withdrawal from the different Treaties of Commerce. The general debate was closed. It is announced that at the meeting between the Marquis de Lavalette, the French Prime Minister, and M. Frère-Orban on the 11th inst., the representatives of France viewed the question from a different point of view than that taken up by Belgium, and that the latter did not permit it to modify the Treaty of Commerce. M. Frère-Orban thereupon declined to accept the French proposal, and his colleagues by sanctioning the same, have again done to France, and virtually a law has been passed by the Belgian Government to prevent such an encroachment. He then intended to leave Paris on Tuesday evening on the 12th inst., but subsequently deferred his departure, and it is now stated that before he leaves Brussels fresh proposals for the settlement of the question have been offered. It is said that the English Government has offered its mediation to France and Belgium. The French Government on Thursday sent a com-

munication to the papers saying that it had any knowledge of the reported convention between the Government of Tunis and a banking house in Paris for the conversion of the Tunisian debt. Prince Napoleon left Marseilles on Friday in his yacht, on a tour to Naples, Corfu, and the Adriatic. It is reported that the Empress will visit Egypt in October, in order to be present at the inauguration of the Suez Canal.

SPAIN.—In consequence of the encouragement given by the United States to the American Government, the United States Government has been ordered to the West Indies, the Cortes have given Admiral Topete full powers to man the Spanish fleet, and every available vessel will forthwith be sent to Cuba to aid in the suppression of the rebellion in that island. In the sitting of the Constituent Cortes on Monday Senor Figuerola presented his Budget. He estimates the receipts at 2,141,000,000 reales, of which 173,000,000 reales are derived from taxes on landed property, 120,000,000 reales from taxes on articles of commerce, and 45,000,000 reales from succession duty. He proposes to abolish the duty on direct inheritances, and to maintain the tax of 5 per cent. on incomes and salaries, and to suppress the salt monopoly in January, 1870, and the tobacco monopoly in July of the same year. The amount of the floating debt is not to exceed 600,000,000 reales. The tariff is to be reformed so as to remove all prohibitory duties, and establish three categories of extraordinary duties, one of 30 per cent., and in some cases of 35 per cent.; the maximum of the fiscal duties is 15 per cent., and those in the third category are of a minimum amount. The duties from 30 to 35 per cent. are to be levied upon those articles of merchandise which are at present subject to an excessively high tariff, and these duties are not to be modified for a period of six years, after which they will be gradually decreased. On Tuesday night there was an important meeting of the majority of the Senate, to discuss the motion of Senor Borguella, declaring all members of any branch of the Bourbon family ineligible to sit on the Throne of Spain. The proposition being opposed by Senor Rios Rosas and others, was ultimately withdrawn by Senor Borguella. In the sitting of the Constituent Cortes on Wednesday, the draft of the Constitution was resumed. Senor Igueras, a member of the Republican party, made a speech in which he argued that as the majority who wished for a Monarchy could not find a candidate who would accept the Crown, the only alternative that remained was to restore the Bourbon dynasty or to proclaim a Republic. Senor Zorilla, Minister of the Interior, in reply, declared that the restoration of the Bourbons was impossible, and that a Republic would be a national calamity. He added that the majority would succeed in coming to a satisfactory conclusion as to the sovereign to be chosen. In the sitting of Thursday the debate on the draft of the Constitution was continued. On Clause 17 an amendment was moved, with the object of establishing a censure over the Press, to be exercised previous to publication. This amendment was rejected, and the clauses granting liberty to the Press and freedom of public meeting, association, and petition, were adopted. It is believed that the Cortes will abolish the customs duties upon cotton and coal.

PORTUGAL.—A military rising is said to be imminent at Lisbon and at Oporto. The Government has taken precautionary measures. The Chambers will be convoked for the 26th inst. A mutiny has occurred among the soldiers of the Zambesi expedition, stationed at Mafra, 18 miles from Lisbon. Troops have been sent to suppress the tumult and bring back the regiment to Lisbon.

SWITZERLAND.—The inhabitants of the Canton of Zurich on Sunday adopted, by 51,441 against 22,551 votes, the new Cantonal Constitution, which is of a purely Democratic character.

BELGIUM.—In the sitting of the Chamber of Representatives, on Thursday, replying to some observations upon the means of communication with Switzerland by the railway managed by the French Eastern Railway Company, the Minister of Public Works said that that company had not complied with the wishes expressed by the Government on the subject of the present arrangements for the traffic to Switzerland. The Minister added—"Our relations with the Eastern Railway Company have naturally been affected by the opposition we have thought necessary to show towards certain of their plans." The riots among the Belgian workmen appear to be spreading. At a large village called Frameries, near Mons, the workmen have risen in great numbers, and have attempted to stop the railway traffic from Maubege to Mons by stoning the passenger trains, cutting off the supply of water from the engines, and taking possession of the railway bridges. The workmen in the Borinage, the Charleroi district, and at Antwerp have also struck. Advocate Springard, who delivered an exciting speech at Mons, the secretary and several members of the Workmen's International Society, have been arrested.

PRUSSIA.—It is said that the Prussian Government has instructed its ambassador in Paris to express its satisfaction at the late speech of M. de Lavalette as initiating a definitive policy of peace. In the sitting of the North German Parliament on Friday, a resolution was introduced by Herr Twesten and Count Munster, demanding the appointment of a responsible Federal Ministry. The resolution was strenuously opposed by Count Bismarck, but was adopted by a majority of 111 to 100. In the sitting of Thursday the estimates of the Ministry for Foreign Affairs were discussed. Herr Twesten made a speech, in which he called upon Count Bismarck to lay before the House copies of the diplomatic correspondence, in the shape of a Blue-book, as is done by other Governments. Count Bismarck replied that in countries where this custom obtained it pro-

ceeded from the necessities of the parliamentary system, but that it created mistrust among foreign Governments. Count Bismarck added that in Prussia the publication of official correspondence was not done with great diplomatic tact, but nevertheless with great care. It was well known that the publications made by the Government were not intended to attain their parliamentary object. He was not an advocate of this system, but in case the Parliament should insist upon it, he would not object to it.

He further remarked that the Governments which published Blue-books did not by any means give the correspondence of their Foreign Office. The International Conference of the German States, for the relief of the Wounded in the late war, and of other invalidated soldiers was opened in Berlin on Thursday in presence of the Queen of Prussia. 100 delegates attended. The journeyman carpenters of Berlin, to the number of 2000, have struck work. Public order has not been disturbed.

BAYARIA.—In the sitting of the Upper House on Monday, the debate on the School Bill was continued. Prince Hohenzollern energetically protested against party feeling within the House of the Church, so prevalent in modern times. He pointed out the stigmata such principles as were put forward by the *Syllabus*, the *Encyclica*, and other publications as contrary to the spirit of the age, and a cause why Church and State were unable to go hand in hand. The Chamber of Deputies on Wednesday approved the revised Rhine Navigation Act.

HANOVER.—A grand banquet was to have been given at the Odéon to celebrate the birthday of Queen Maria but it was prohibited by the Prussian police. The Hanoverian patriots thereupon sent to Hildesheim an address of congratulation and a bouquet. From 25,000 to 35,000 persons took part in this demonstration, preceded by about 100 carriages at the head of which were a vesper with four brass bands, occupied by members of the Hanoverian nobility. Prussia was represented by two carriages containing police functionaries, and a great number of subordinate police agents were dispersed among the crowd.

SAXONY.—The King of Saxony arrived at Prague on Monday, to pay a visit to the Emperor Ferdinand on the occasion of his Majesty's birthday. King John afterwards left for Brandeis on a visit to the Grand Duke of Tuscany.

AUSTRIA.—The official *Gazette* of Saxony publishes an Imperial autograph letter appointing Count Fidele to the post of the President of the Civil-List Council of Ministers. He retains at the same time the office of Minister of the Defence of the Country. The *Gazette* declares that this appointment was the result of deliberations on pending political questions, which resulted in proving a full agreement to exist among the members of the Ministry. On Tuesday the Lower House of the Reichsrath read and passed a Bill for the reform of the land-tax. The debate on the National Schools Bill commenced on Wednesday. On Thursday the Upper House passed the Landwehr Bill, and approved the Telegraph Convention with the North German Confederation, and the Frontier Regulation Treaty with Prussia. The official *Gazette* of Thursday published the law, which has received the sanction of the Emperor, for the organization of a supreme court of justice for the Empire.

HUNGARY.—The Emperor returned to Peth on the 18th inst., and to-day His Majesty will open the Diet in person by a speech from the Throne. The Lower House met on Thursday for a preliminary sitting, the senior member acting as president. Some members of the Extreme Left demanded that the Royal flag should be removed from the castle at Buda. Count Andrássy replied, that during the opening of the Diet the national flags of Hungary and Croatia would be hoisted over the Royal Castle. The committee of Hungarian and Croatian members on the question of the future position of the town of Fiume will commence its deliberations before the end of this month. Count Andrássy is to be appointed colonel of the H. and C. Corps. The ceremony of unveiling the statue of the Patriarch Archduke Joseph will take place to-morrow.

ITALY.—Count Cambray-Digny, the Minister of Finance, commenced his financial statement in the Chamber of Deputies on Tuesday, and concluded it on Wednesday. He showed that there had been a steadily progressive increase in the ordinary revenue, and decrease in the expenditure since 1867. In future years he anticipated that there would be a reduction both of the ordinary and of the extraordinary expenditure, and that a balance of the revenue and expenditure might be expected in 1875. The total deficit to be provided for was 788,000,000 lire. This sum included the amount necessary to pay the debt due to the National Bank, and to abolish the forced currency. The bank would resume specie payments six months after the repayment of the debt. To cover this deficit he proposed financial operations, by which he expected to obtain 734 millions. He proposed first to farm the sale of the ecclesiastical property to a reorganised company for the sale of the domainal property, the company to advance 300 millions of lire against domainal obligations, guaranteeing to pay the first instalment of 150 millions within six months, and the remainder upon bonds issued yearly, and redeemable in 20 years. Secondly, to farm the service of the Treasury to the National Bank and the Bank of Naples, the Bank paying a guarantee of 100 millions of lire. Thirdly, to raise a forced loan to the amount of 320 millions of lire at 6 per cent., payable in four years, from 1871, redeemable in 10 years from 1881. Fourthly, to call for the repayment of the 70 millions of Treasury Bonds advanced to the railways. Public works will be vigorously prosecuted without fresh burdens being imposed on the Treasury, and the expense of reorganising the army and navy

will be spread over a long series of years. The principle of the Ministerial Bill, rendering ecclesiastical pupils liable to conscription, was approved on Monday by a majority of 223 to 25. A Mazzinian conspiracy was discovered on Monday at Milan. The police have seized a number of Orsini bombs, arms, and cipher documents. The six principal conspirators have been arrested, including Giuseppe Nathan of London. Milan is perfectly tranquil. King Victor Emmanuel left Florence on Sunday for Naples, by way of Bologna and Ancona. The Bellini Theatre at Naples was destroyed by fire on Saturday night.

GREECE.—The Prince and Princess of Wales arrived at the Piræus on Tuesday. Their Royal Highnesses were received with great ceremony, and travelled to Athens by the new railway from the Piræus to the capital.

THE PRINCIPALITIES.—A proclamation in the Turkish language, and addressed to the Turks in Bulgaria, has been seized in a printing establishment at Bucharest. It is signed by Bulgarian party leaders residing on Turkish territory. The Minister of the Interior has ordered further investigations to be made into the matter, and the Turkish Governor of Rustchuk has been communicated with.

SERBIA.—The Porte has conceded to Servia the right of concluding commercial treaties with foreign countries.

TURKEY.—The Prince and Princess of Wales returned to Constantinople on Saturday morning from the Crimea. They paid a farewell visit to the Sultan, and left in the afternoon for Greece. An agreement was signed on Saturday by Daoud Pasha, the South Austrian Railway Company, and Baron Hirsch, granting to the latter the concession of all the railway lines of the Ottoman Empire, and handing over the working of these lines to the South Austrian Company. The new Finance Minister will shortly publish his budget, with a general report, recommending a regular redemption of the consolidated debt.

EGYPT.—A commission, composed of the English, French, Italian, and Greek consuls at Cairo, has examined into the late attempt to blow up the Viceroy's box at the theatre, and has come to the conclusion that it was intended to assassinate not only the Viceroy, but also his principal Ministers and other councillors who would have accompanied him to the theatre. M. Menasse, the Viceroy's theatrical *entrepreneur*, has been arrested on the charge of having planned the attempt. Another attempt was made on the life of the Viceroy, the Prince Heritier, and the Ministers, on the 18th ult., as they were returning by railway from Tomailia, and it was only owing to the intelligence of the driver of the pilot engine that the attempt to bring about a collision failed.

CAPE OF GOOD HOPE.—Her Majesty's ship Petrel arrived on the 8th of March at East London, with accounts of the 18th February from the Mozambique Channel, stating that Dr. Livingstone arrived at Zanzibar in January, and left for England by the overland route through Egypt. It is now known that the report is without foundation.

PERSIA.—A military revolt occurred at Teheran on the 29th of March, but was put down with great severity.

INDIA.—The loan for 5,000,000*l.* has been successful. The amount tendered for is 5,250,000*l.*, whereof a sum of 3,500,000*l.* is above the minimum. The minimum was fixed at 89. Tenders above 90, amounting to 1,670,000*l.*, will receive a full allotment.

CHINA.—The death of General Bruner, commanding the troops at Hong Kong, is announced.

UNITED STATES.—The Spanish authorities of Cuba, having seized an American ship called the Mary Lowell, which was hovering suspiciously on the coast, and attempting to communicate with the insurgents, the American Government have sent a squadron of eight ironclads to demand her restitution, and to reinforce the United States' squadron in the West Indies. It is said that there is a strong party in the States in favour of seizing Cuba, preparatory to a similar proceeding against the possessions of the other European Powers in the West Indies. The Senate has confirmed the appointment of Mr. Curtin, ex-Governor of Pennsylvania, as Minister at St. Petersburg, of Mr. Shellabarger as Minister at Lisbon, of Mr. Freeman Morse as Consul in London, and of Mr. Thomas Nelson as Minister to Mexico. Mr. Basset, a negro, has been nominated by the President as Minister to Hayti, and the nomination has been confirmed by the Senate.

CUBA.—Accounts from Havannah of April 21, state that the pacification of the insurrectionary districts is reported to be progressing.

BRAZILS.—The resignation of the Marquis de Caxias as commander-in-chief has been accepted, and the Emperor's son-in-law, Count d'Eu, has been appointed his successor, and left for A-scuncion on the 30th March. The Marquis de Caxias has been created a Duke for his services. Lopez was in the Corderillas with some irregular forces, variously estimated at from 700 to 5000 strong. The Maua Railway traffic was stopped on the 30th March, the Government having refused a subsidy.

Parliament.

In the House of Lords on Friday Lord HOUGHTON suggested the issue of a Royal Commission to inquire into the question of emigration in relation to the present state of pauperism, and into the expediency of empowering the Poor-law Guardians to raise the necessary funds by a rate, with a Government guarantee, to be supplemented by aid from Imperial resources. Earl GRANVILLE doubted the expediency of a Royal Commission, and was particularly opposed to any Imperial addition being made to local resources. The question, however, was before the Government, and

the President of the Poor-law Board had at present under consideration measures for improving the existing regulations for promoting emigration. Lord OVERSTONE and Earl GREY denied altogether the assumed fact that England was labouring under over-population, and contended that there were not more able-bodied men than there was capital to employ. The Earl of CARNARVON denied that there was any great demand for labour in the Australian colonies, and hoped that the Government would not promote an artificial movement which they would find themselves unable to control. Lord REDESDALE pointed out the ill effects of union rates in increasing pauperism. After a reply from Lord HOUGHTON the subject dropped. Several Bills were advanced a stage. On Monday Lord REDESDALE asked the Government to declare what were their intentions with respect to the coronation oath, and whether they contemplated proposing any alteration in it in the event of the Bill disestablishing and disendowing the Irish Church becoming law. Earl GRANVILLE replied that in the judgment of the Government the coronation oath was imposed on her Majesty in her executive and not in her legislative capacity, and that the Government did not think it necessary to propose any alteration in the language of the oath. The Duke of ARGYLL brought in a Bill to amend the constitution of the Indian Council, by limiting all future appointments to the Board for 10 years, with power to the Secretary of State to reappoint, if desirable, for a further term of five years, and to grant a pension of 500*l.* per annum under special guarantees. The Marquis of SALISBURY expressed approval of the Bill, but doubted whether the services of the best men for the Indian Council could be secured for 1200*l.* a-year without a pension. In answer to Lord LYVEDEN, the Duke of ARGYLL stated that Lord Mayo, the Governor-General of India, was acting on the policy of his predecessor, by the avoidance of all entangling relations with Afghanistan. Lord LAWRENCE observed that he could not see the slightest danger of an entanglement in Afghanistan affairs from what had been done either by himself or by his successor. For himself he had always eschewed a policy that was calculated to lead to such a result, and he hoped that the course he had adopted would continue to be followed. The Bill was then read a first time. On Tuesday the Marquis of CLANRICARDE moved the second reading of the Tenure of Land (Ireland) Bill, the object of which was to enact that hereafter leases should be in writing, and that after 1871 all leases by parole should be deemed null and void. Earl GRANVILLE said that the Government were not prepared to deal with the land question in the present session, and were of opinion that the Bill would be insufficient to satisfy the wishes of the Irish people. Earl GREY supported the Bill, and said that the Government ought either to accept the Bill or move its rejection. After some remarks by the Earl of KIMBERLEY, the Marquis of SALISBURY, Lord ATHLUMNEY, Lord WESTBURY, Lord CAIENS, and the Lord CHANCELLOR, the Bill was read a second time. On Thursday Lord LYTELTON moved the second reading of the Increase of the Episcopate Bill, the object of which was to enable the Ecclesiastical Commissioners to frame schemes for the foundation of new sees, subject to the approval of the Queen in Council, the incomes of the new bishops to be raised by voluntary contributions, and to be not less than 2500*l.* a-year. The Archbishops of CANTERBURY and YORK, Lord PORTMAN, the Duke of SOMERSET, the Bishops of LONDON and GLOUCESTER, the Lord CHANCELLOR and Lord CAIENS, objected to the principle of voluntary and subscription bishops, and Earls STANHOPE and GRANVILLE advised Lord Lyttelton not to press the Bill to a division. Earl NELSON and the Earl of CARNARVON supported the Bill, though objecting to some of its provisions. On a division the Bill was rejected, by a majority of 43 to 20. Seven Bishops and several lay Peers refrained from voting. Yesterday Lord MONCK called attention to the condition of our military force, and moved for a return of the number of militiamen who have passed through a course of musketry instruction. The House was left sitting.

In the House of Commons on Friday, on the motion for the consideration of the Metropolitan Railway Bill, Mr. SHERIDAN moved a clause repealing the exemption in the Act of last year, and compelling the company to provide smoking carriages in each train. The motion was opposed by the railway interest, but was carried on a division by a majority of 8, the numbers being 175 to 167. In reply to Sir G. JENKINSON, Mr. GLADSTONE said that the Government were not prepared either to legislate on the subject of local taxation, or to grant a committee of inquiry into the incidence of the poor rates in England and Wales. Mr. NEWDEGATE commented with some severity upon this mode of fulfilling the pledge which Ministers had given to Sir M. Lopes a few weeks ago, and contended that though the Government had the majority in the House the Conservatives represented the majority of the people of England, if not of the three kingdoms. The House then went into Committee on the Irish Church Bill, when the first clause, declaring the title of the Bill, was agreed to. On clause 2, providing for the dissolution of the legislative union between the Churches of England and Ireland, Mr. DISRAELI moved that it be omitted, stating that his object was to maintain the Royal supremacy, and to preserve the union between the Churches of England and Ireland in matters of doctrine, worship, and discipline. He contended that the omission of the clause would not prevent the accomplishment of the disestablishment and disendowment contemplated by the Bill, and that, unless it were struck out, the religious equality aimed at would not be gained. The ATTORNEY-GENERAL opposed the amendment, and said that the meaning of supremacy was that the Queen was supreme in all her

courts, and that supremacy was understood by Dr. BALL contended that the supremacy of the Crown was absolutely necessary for the authority of the Church in Ireland. Mr. DISRAELI expressed his entire and total dissent from Mr. Disraeli and Dr. Ball, which, he said, was upon a complete misunderstanding of the principles of the Constitution and of the law. Mr. WALPOLE, Mr. GRAVES, Mr. BAYLY, Mr. CROSS, Mr. GREENE, Mr. A. EGERTON, Mr. TELOT, and Mr. S. HILL opposed the clause, saying the obnoxious policy of disestablishment. The ATTORNEY-GENERAL for IRELAND, Mr. MONK, Mr. CANDLISH, Mr. SYMAN, Mr. LEX supported it as the keystone of the arch. Mr. GLADSTONE said that the Royal supremacy was affected by the Bill. He objected to the Bill, because it struck at the groundwork of the Church, and because, as far as he had been able to ascertain, it was diametrically opposed to the views of the Irish Churchmen, who desired, if the Bill were to be passed, to have perfect freedom of conscience and organisation. Mr. DISRAELI replied that his motive was to retain for the Episcopal Church the benefit of the Royal patronage, and that this could be done without any alteration in the general policy of the Bill. He gathered from Gladstone's last words the inference that the last aim of a system of Free Churches would not condescend to be prudent, he was of opinion that the case of Ireland should be postponed until the other countries could be dealt with together, and that in one common ruin. On a division the clause was carried by a majority of 123, the numbers being 221. On Monday Mr. H. SHERIDAN moved a clause in the Metropolitan Railway Bill, similar to the one introduced into the Metropolitan District Railway Bill on Friday for the purpose of providing smoking carriages. Mr. BRIDGES opposed the motion, which was negatived, on a division by 188 to 167. The House then went into Committee on the Irish Church Bill. Clauses 3 to 8, relating to the constitution and power of the Ecclesiastical Commissioners, were postponed. Clause 9, prohibiting appointments to any ecclesiastical benefice, and clause 11, providing that all property belonging to the Ecclesiastical Commissioners shall be transferred to the new Church body, and the existing body dissolved, were agreed to. On clause 10, providing that in the absence of Mr. Disraeli from the House, as an amendment, to prolong the transfer until the 1st of January, 1872, the effect would be to delay the transfer of the Church to the Commissioners for 12 months more. Lord OVERSTONE opposed the amendment, which was negatived on a division by a majority of 107, the numbers being 301 to 194. On the question that the clause should be carried, Mr. VANCE condemned the clause as founded on a principle of robbery and injustice. Mr. CROSS, amidst much interruption, declared the clause as a gross injustice to the laity. Mr. SHERIDAN said that the Opposition was not to be deterred by clamour, and would move to report progress. Mr. VANCE allowed a fair hearing. Sir H. HOARE moved that the right of the majority to resist the obstructive tactics of a minority be maintained. Mr. HAMILTON and others protested against this, and appealed to Mr. Gladstone to preserve among his followers. After some further discussion the clause was carried on a division by 214 to 111, the numbers being 214 to 111. On clause 11, providing for the dissolution of ecclesiastical corporations and cessation of rights to sit in the House of Lords, Mr. CHARLEY moved an amendment to preserve their rights of peerage to the Bishops, but on the advice of Mr. HARDY he withdrew it. On Mr. HARDY's motion an amendment was made to the clause preserving to the Bishops and deans the title and precedence of prelates and deans the title and precedence of prelates and deans. On clause 14, the compensation of curates, Mr. HARDY moved, as an amendment, that of that part which deducts the compensation of the curates from the income payable to the incumbent. Sir ROUNDELL PALMER, Mr. LEFROY, and others supported this amendment, which was opposed by Mr. C. FORTESCUE, the ATTORNEY-GENERAL for IRELAND, the Solicitor-General, and Mr. GLADSTONE. After a long and heated discussion the amendment was negatived by a majority of 330 to 232, and the further proceedings of the Committee were adjourned. On Tuesday Mr. W. H. GREGORY moved a resolution that it was desirable to reconsider the Carey Street new law courts, inasmuch as the present building, between the Temple and the Strand, now offered greater advantages for the erection of the Carey Street site, in that it would cost 3,150,000*l.*, while the present site would cost more than 1,500,000*l.*, and would be approached. He was informed that a plan was prepared to take the Carey Street site at the price of 1,500,000*l.* for it, so that no loss would accrue to the Government, as an amendment, it was desirable to proceed as soon as possible to the erection of the new courts on the Carey Street site, if additional land were necessary to that site, acquired in immediate proximity to that site. Mr. DENMAN seconded the amendment, which was supported by Mr. G. B. GREGORY, Mr. Lord JOHN MANNERS, while the Earl of BURY, Mr. TITE suggested that both sites should be taken, and that the courts of law should be erected on the Carey Street site, and the Probate Registry on the Strand. The CHANCELLOR of the EXCHEQUER estimated now made by the Commissioners

what he called a "Tower of Babel" and "Vanity Fair" was 3,200,000*l.*, and that, with branches and other accompaniments, we should not get out of the business for less than 4,000,000*l.*, whereas the original estimate was only 1,500,000*l.* He had nearly stopped all the expenditure on the present outlay of 600,000*l.* for additional land until the House could be taken. Having remarked that the Government intended to bring in a Bill to transfer the Sutor's Fee Fund to the revenue, he suggested that the better course would be to dissolve the commission and leave the work in the hands of the Government. The site in Carey Street might in some cases be disposed of without much loss, and a building in extent might be acquired between Carey Street in the Strand and the Embankment. The cost would be about 600,000*l.*, and a building which would contain all the courts and their offices might be erected there for 1,000,000*l.*; and he suggested that the site designed by Inigo Jones for the palace of Whitehall at Whitehall might be placed in front of it. Mr. HENLEY said that the Government had raised a new issue, and moved that the debate be adjourned. After some remarks from Mr. LOCKE, Mr. CRAWFORD, and Lord JOHN MANNERS, Mr. GLADSTONE consented to the adjournment of the debate, and it was adjourned accordingly until Monday next. Mr. O'REILLY moved for a Royal Commission to inquire into the existence of corrupt practices at the late election for the city of Dublin. Mr. COLLINS moved as an amendment that the Speaker be directed to issue a new writ for the election of a new member. After an animated discussion the motion was carried on a division by a majority of 72, the numbers being 192 to 120. On Wednesday Mr. T. CHAMBERS moved the second reading of the Marriage of a Deceased Wife's Sister Bill. Captain EGBERTON seconded the motion. Mr. SCLATER-BOOTH moved, as an amendment, that the Bill be read a second time on Friday six months. Mr. O'REILLY seconded the amendment. Lord BURY and Sir GEORGE GREY supported the Bill as a measure of religious freedom, and a boon to the poor man. Mr. BRIGHT said that the opposition to the Bill rested entirely on sentiment, and that the "ecclesiastical rubbish" urged against the change had failed to show that the prohibition had any foundation in nature, or any sanction from revelation. Mr. BERRSFORD HOPE and the SOLICITOR-GENERAL opposed the Bill, on the ground that it was an interference with the feelings of the great mass of English people, and was promoted at the expense of a few individuals who, having deliberately broken the existing law, sought to repeal it. On a division the second reading was carried by a majority of 99, the numbers being 245 to 146. On Thursday Mr. BRUCE, in reply to Sir JENKINSON, gave a long explanation of the manner in which he has exercised the prerogative of mercy since his accession to office, particularly in reference to the recent reprieve of the convict Wiltshire. In answer to Lord R. MONTAGU, Mr. W. E. FORSTER stated that two cargoes of sheep had arrived, one at Devon, and the other at Harwich, containing some sheep infected with the sheep-pox, but they had been destroyed, and measures had been taken to disinfect the wharves at which they had been landed. The House then resumed the consideration in Committee of the Irish Church Bill, taking up the 14th clause, which deals with the question of compensation. After some verbal amendments suggested by Mr. DEAR, which had been accepted by the Government, a long discussion arose on the distinction to be drawn between the permanent and temporary curate, and on the amount to be given them and deducted from the life annuities of incumbents. Sir R. PALMER moved an amendment, providing that the curate to be compensated out of the incumbent's annuity shall be a permanent curate. On a division the amendment was rejected by a majority of 93, the numbers being 221 to 128. On Clause 15, regulating the compensation to curates, Mr. LEFROY moved an amendment that compensation should be given to non-permanent curates at the rate of 10*l.* for every year they might have served. On a division the amendment was negatived by 220 to 107. Mr. PIM moved an amendment for the compensation of non-permanent curates by a gratuity calculated upon length of service. Mr. GLADSTONE accepted this amendment, and after numerous verbal amendments had been made in the clause, it was finally agreed to. On Clause 16, Mr. BRODBICK endeavoured, unsuccessfully, to obtain compensation on the footing of a permanent tenure for diocesan architects; and Mr. VAN ECKEN failed to place vicars-choral and chorists in the same category. On Clause 17, Mr. CHARLEY moved an amendment in favour of the organists, which was defeated by 314 to 199. In the middle of Clause 18 a motion was made to report progress, and defeated by a majority of 113, but Mr. GLADSTONE yielded to a second motion to the same effect, and the Committee was adjourned soon after. In Committee of the whole House resolutions were agreed to on which to found a Bill to transfer to the Civil Service Estimates certain expenses connected with the administration of justice, and to place the Treasury control over the fees levied in the Court of Justice. Yesterday the House again went into Committee on the Irish Church Bill. On the 15th clause, referring to the compensation to be made to curates, Mr. GOLDNEY moved that a minimum be fixed as to the number of years' purchase to be given as compensation for advowsons. Mr. GLADSTONE opposed the motion, which was negatived on a division by 274 to 161. The House was left sitting.

to 93½ for Account, New and Reduced Three per Cents, 91½ to 91¼; Bank Stock, 239 to 241. Exchange Bills, 3*l.* to 8*s.* pm.; India Five per Cents, 114 to 114½. FOREIGN: Turkish Five per Cents, 12½ to 12½. Ditto Six per Cents, 66½ to 66½; Spanish, 33½, 1*l.* 10*s.* 5½ to 5½; Tobacco Loan, 84 to 85; Brazilian, 80½ Russian Moscow, 79; Orel Vitebsk, 78½; Egyptian (1864), 85½ to 86½; Ditto Debentures, 98½ to 98½. Viceroy's Loan, 80 to 80½; Ditto (1868), 75½ to 76½. Peruvian, 78½ to 78½; Portuguese, 35½ to 36; Danubian Seven per Cents, 76 to 77. Ditto Eight per Cents, 88½ to 86½. United States 5-20 Bonds, 80 to 80½. Erie, 22½ to 23. Illinois, 28 to 29.

Metropolis and its Vicinity.

THE GOVERNMENT AND THE VOLUNTEERS.—A memorial, signed by many peers and members of Parliament, all members of the Volunteer force, was lately presented by Lord Elcho to the Secretary of State for War, suggesting an inquiry as to the sufficiency or insufficiency of the present capitation grant, and expressing an opinion that the organisation and consequent efficiency of the force might be greatly improved without any increase of the Parliamentary grant, and without imposing any additional tax upon the time and service of the Volunteers. Lord Northbrook, the Under-Secretary of State for War, has replied to Lord Elcho as follows:—

"My Lord,—I am directed by the Secretary of State for War to acknowledge the receipt of your letter, enclosing a memorial on the subject of the capitation grant to the Volunteer force, agreed to at a meeting of Volunteer peers and members of Parliament, and I am to request that you will have the goodness to inform the memorialists that the question whether any increase of the present grant ought to be asked for from Parliament shall receive the careful consideration of Her Majesty's Government in connection with the question, which is now also receiving their serious attention, as to what measures it may be expedient to take for the better organisation of the reserve forces as a support in a time of emergency to the regular forces of Her Majesty."

THE EASTER VOLUNTEER REVIEW.—The report of General Sir J. Hope Grant on the Easter Review of Volunteers at Dover was published yesterday. It speaks in the highest terms of all the arrangements, and particularly of those of the railway companies; but, while giving credit to the Volunteer force for willingness and intelligence, it expresses the opinion that it cannot be really serviceable if it be not placed, while under arms, under some more stringent military control. "Such a large body of armed men not amenable to any military discipline might," it adds, "be the cause of very serious embarrassment."

DR. LIVINGSTONE.—The statement in the Cape newspapers that accounts had been received of the safety of Dr Livingstone, and that he was returning home by way of the Red Sea appears to be untrue, and to have originated in this manner: A French trading vessel off the coast of Zanzibar communicated the rumour to an English vessel on the same coast, which gave the intelligence on its arrival at the Cape. Sir R. Murchison has received despatches from the vice-consul at Zanzibar, dated March 5, two months later than the date of the rumour, in which not the slightest mention is made of Dr. Livingstone. The last intelligence received direct from him was on December 14, 1867, at which time he was at Cazambe, 700 miles from Zanzibar, and no reliable intelligence has since been received as to his movements. It is believed that he is at present travelling in the mass of fresh water lakes beyond the explorations of Speke and Grant.

THE AMERICAN MAIL SERVICE.—The Postmaster-General has received intimation from Mr. John Burns that as the Cunard contract has been ratified, two powerful screw steamships of upwards of 3000 tons each, specially adapted for the requirements of the North American Mail service, have been contracted for. These vessels are to be named Abyssinia and Algeria.

LAMBETH PALACE GROUNDS.—The Archbishop of Canterbury has written to Mr. Arthur Arnold that so far as he is at present advised by those whom he has consulted, who are interested in the welfare of the people of Lambeth, he believes that the grounds attached to Lambeth Palace are more really beneficial to the inhabitants of the district, if used according to the wise and liberal arrangement of his two predecessors, than if a portion of them were marked off for a recreation ground, open at all times to the public. The archbishop states that his predecessors have for some time past given permission for the use of the grounds for cricket, school feasts, &c., and that a vast number of persons have enjoyed the use of the ground for purposes for which it would have become useless if the plan which Mr. Arthur Arnold has suggested were adopted. Mr. Arnold, in reply, has expressed his regret at the decision at which his Grace has arrived, and points out that such a limited use of the ground is of no benefit whatever to the over-crowded poor of Lambeth.

FINSBURY AND SOUTHWARK PARKS.—At the meeting of the Metropolitan Board of Works on Friday a report was brought up from the Parks, Commons, and Open Spaces Committee, recommending that the sum of 2000*l.* be advanced to Mr. Meston on account of his contract for the formation of the ornamental portion of Finsbury Park; that labels, showing the botanical and common names of the principal trees in Finsbury and Southwark Parks be provided, at a cost not exceeding 15*l.* for the former and 10*l.* for the latter; that, having regard to the condition of Southwark Park, no cricket be permitted to be played in it during the ensuing season; and that the estimates of Mr. Wood for the fencing of the corners of the plantations in Finsbury and Southwark Parks, amounting respectively to 133*l.* 15*s.* and 176*l.* 9*s.*, be accepted and the work carried out. All these recommendations were agreed to.

STATE OF BLACKHEATH.—At the weekly meeting of

the Metropolitan Board of Works a deputation from the residents of Blackheath and neighbourhood presented a memorial urging the Board to protect and improve the heath. General Lefroy, R.A., in support of the memorial, stated that the heath was rapidly being destroyed by the costermongers and others who took possession of it, and unless effectual measures were taken it would soon become a great nuisance. The grass was nearly altogether disappearing, and there was no adequate police control over the roughs who assembled upon it, and whose language was of the most disgusting character. The memorialists strongly urged the Board to use the powers they possessed and put a stop to what would render the heath no longer a place of recreation, but a great evil to the inhabitants of this district. The memorial was referred to the Parks and Open Spaces Committee for consideration and report.

PROPOSED NEW PUBLIC OFFICES.—Colonel Clarke, the director of Admiralty works, who laid before Lord John Manners a plan for a range of public offices from Charing Cross to Great George Street, has prepared a cardboard model of his design, which has been inspected during the week by the Duke of Cambridge, Mr. Childers, M.P., and other official persons interested in the matter.

HER MAJESTY'S THEATRE.—The contract between the Earl of Dudley and Messrs. Trollope was signed May 28, 1868, and the further contracts for the decorations and the stage were entered into at the beginning of the present year. Messrs. Trollope were bound under heavy penalties to complete the whole by the end of March, and confident predictions were made that the works would not be accomplished, and that Messrs. Trollope would be probably ruined by the penalties that would be enforced against them; but in the unprecedented short time of 10 months everything has been completed, and the building is now in a condition to be handed over to the lessees.

TOWER SUBWAY.—A party of scientific men and engineers visited, last week, the works of the new Thames Subway, which are now making rapid progress. They were received at the Tower Hill shaft by one of the directors, Mr. P. W. Barlow, C.E., with the engineer and contractors, who explained the nature of the works, and accompanied their distinguished visitors to the bottom of the shaft. The descent was effected in the old-fashioned way, as in the bucket of a draw-well, only that the bucket was worked by a powerful steam engine. The shaft, about 60 feet deep, is encased in strong iron tubing for a considerable distance down, its lower part being faced with strong cylindrical brickwork set in cement. At the bottom of the shaft a large circular opening forms the entrance to the tunnel, which has already been cut several yards onwards, and which will be rapidly pushed across the river. There appears, however, to be very little fear of an irruption of water, as the matter excavated is sound tenacious London clay, and there is every probability of this being continued across from shore to shore. The visitors expressed their complete confidence in the success of the work as a new engineering problem to be solved, and there can be little doubt that such a communication across the river will prove a great convenience to the public.

SOUTH KENSINGTON MUSEUM.—The Lord President of the Council has requested Sir Charles Wheatstone, Sir Michael Costa, Professor Tyndall, Lieut-Colonel Scott, R.E., Captain Donnelly, R.E., and Mr. Bowley, to report on the acoustics of the new lecture theatre. There will be three trials, one by a lecture, with demonstrations, on musical pitch, by Professor Guthrie; a second by voices, directed by Mr. A. Sullivan; and the third by instruments, directed by Mr. Ella.

THE NEW MEAT MARKET.—A special meeting of the Court of Common Council was held at Guildhall on Thursday, the Lord Mayor in the chair, to consider a memorial from the meat salesmen of the Metropolitan Meat and Poultry Market, praying that they may be exempted from the payment of rates and taxes upon their premises, the occupiers at the old markets of Leadenhall and Newgate having been always free. After a long debate the prayer of the petition was complied with.

ADMIRALTY CLERKS.—In compliance with the recent Admiralty circular respecting the retirement or superannuation of clerks, five first-class clerks, 12 second-class clerks, and three third-class clerks, in the department of the Accountant-General, have retired. Three who had volunteered to retire from the service are not permitted to go. The establishment, however, is to be further reduced.

CHURCH CONFERENCES.—The council of the Church Association, the real promoters of the suit "Martin v. Mackonochie," have resolved on holding a series of conferences next month. Among the business to be done will be—"To consider a memorial to the two archbishops, stating the precise points settled by the late judicial decisions, and praying that the same may be enforced, and further appealing to them on the question raised on the 24th and 25th February, 1869, on the subject of the Lord's Supper, in the Houses of Convocation of Canterbury and York, by Archdeacon Denison and Archdeacon Churton." A scheme for joint action between clergy and laity and other practical matters will be considered.

THE ST. ALBAN'S CASE.—The bill of costs in the case "Martin v. Mackonochie" having been sent in for taxation, an offer was made by the proctors to Mr. Mackonochie, to pay, without the expense of taxation, 1500*l.*, which, under the advice of the proctor and solicitor of the Church Association, the Council decided to accept. The sum of 1500*l.* has now been paid.

THE CASE OF SIR CULLING EARDLEY.—The Home Secretary, acting upon a previous decision of his predecessor, Mr. Hardy, has signed a free pardon for Sir Eardley Culling Eardley, who was a short time since convicted of bigamy, and sentenced to 18 months' im-

City Intelligence.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 93 to 93½ for Money, and 93½

the Singebys and his friends, and prevent the occurrence of any similar catastrophe.

TINTAGEL.—A fatal accident occurred on Wednesday evening at the Delabole Slate Quarries, on the north-west of Cornwall, about four miles from this place.

WIGAN.—On Friday the number of deaths by the explosion at Highrooks Colliery was increased to 36. On Monday the jury returned a verdict that the explosion was in all probability caused by a blown-out shot.

YORK.—An influential committee has been formed for the purpose of assisting the Rev. Charles Voysey, of Healaugh, in his defence against the proceedings instituted against him by the Archbishop of York.

Ireland.

PRINCE ARTHUR, who received last week a cordial reception at Cashel and other places in Tipperary, left on Monday morning for Lismore Castle, the seat of the Duke of Devonshire. The journey occupied five days over a bleak mountainous road.

Scotland.

EDINBURGH UNIVERSITY.—The Right Hon. John Inglis, Lord Justice-General of Scotland, was installed Wednesday as Chancellor of the University of Edinburgh.

Sporting.

THE OXFORD AND AMERICAN BOAT RACE.—The president of the Oxford University Boat Club (Mr. T. C. Tinné, of University College), has received a communication from Harvard College, United States, challenging the Oxonians to row a four-oared boat from Putney to Mortlake in August next.

Obituary.

THE EAR OF FINGALL was found dead in his bed on Thursday morning. The deceased peer, Arthur James Plunkett, Earl of Fingall, Baron Killeen, of Killeen Castle, county Wick, in the peerage of Ireland, and Baron Fingall, of Fingall, in the peerage of the United Kingdom, was the only son of the eighth earl, by the only daughter of John Honelan, of Ballydonelan, Gl. way.

Emancipation, he was always regarded as one of the Moderate party who adhered to Whig principles, and stood opposed to Ultramontane notions. He married in 1817 the only daughter of Mr. Elias Corbally, of Corbalton Hall, county of Meath, by whom he had two daughters and six sons.

LORD FAIRFAX died at Barnum's City Hotel, Baltimore, on the 14th inst., aged 40 years. The deceased, Charles Snowden Fairfax, 10th Lord Fairfax, was born at Vaucluse, Fairfax county, Virginia, in 1828, but for some years has resided in California, having served as Speaker of the House of Representatives of that State in 1854, and subsequently for five years as clerk of the Supreme Court of the same State.

SIR HUGH SEYMOUR BLANE, BART., of Blanesfield, Ayrshire, and Culverlands, Berks, died on the 14th inst., at The Pastures, his seat in Derbysire. He was the second son of Sir Gilbert Blane, M.D., one of the physicians of King George III., by the only daughter of Mr. A. Gardner.

JUDGE DOBBS, senior judge of the Irish Landed Estates Court, died a few days since in London. He was appointed in 1857, under the viceroyalty of Lord Eglinton.

THE DOWAGER LADY FARQUHAR died on Tuesday at her residence in Upper Grosvenor Street. She the mother of Sir Walter Rockliffe Farquhar, third baronet, and of Mrs. Grey, wife of the Hon. General Grey. She was the daughter of the Rev. Morton Rockliffe, of Woodford, Essex.

WILLS.—The will of General Sir Arthur Benjamin Clifton, Colonel of the 1st Dragoon Guards, has been sworn under 145,000l. personality; Right Hon. Elizabeth Lowther, 45,000l.; Hon. Catherine Georgiana Brown, 1,000l.; Lady Gilbert, 3,000l.; Mr. Arthur Heathcote, of Durdans, Epsom, 10,000l.; Miss Anne Wells, of Norwich, 4,000l.; Mr. G. H. Lawrence, of Mossley Hill, Liverpool, 140,000l.; Mr. Wm. Rand, of Bradford, worsted spinner, 40,000l.

Markets.

COVENT GARDEN.—April 24.

The trade here has been somewhat livelier during the past week. Rough vegetables are a heavy trade just now, but Cauliflowers and spring Cabbages realise good prices. Broccoli is also in fair demand. Fine forced Figs are making their appearance, and are sold at from 2s. to 3s. each.

FRUIT.

Apples, per bushel, 5s to 10s; Grapes, per lb., 10s to 12s; Kent Cobs, per lb., 1s to 1s 6d; Lemons, per 100, 4s to 7s; Melons, each, 2s to 4s.

VEGETABLES.

Artichokes, green, p. doz., 4s to 6s; Beans, kidney, p. 100, 2s to 3s; Beet, per doz., 1s to 2s; Cabbages, per doz., 1s to 2s; Carrots, per bunch, 6d to 10d; Cauliflowers, Cornish, p. doz., 2s to 4s; Celery, p. bund., 1s 6d to 2s 6d; Cucumbers, each, 9d to 2s.

HAY.—Per Load of 36 Trusses.

SMITHFIELD, Thursday, April 22. Best Green Hay .. 120s to 132s; Prime Meadow Hay 115s to 120s; Inferior do. .. 100 110; New do. .. 33 40; Straw .. 33 40.

CUMBERLAND MARKET, Thursday, April 22.

Sup. Meadow Hay 118s to 126s; Inferior do. .. 98 110; New do. .. 33 40; Superior Clover .. 118 130.

WHITECHAPEL, Thursday, April 22.

Fine Meadow Hay 110s to 120s; Inferior do. .. 95 105; Prime New Hay .. 30 34; Straw .. 30 34.

COALS.—April 21.

West Hartley, 14s. 6d.; Holywell Main, 15s. 6d.; Walls End Haswell, 18s. 3d.; Walls End Hetton, 18s. 3d.; Walls End Hetton Lyons, 14s. 3d.; Brancepeth Cannel, 18s.

LEADENHALL POULTRY, &c.

Table with columns for poultry types (Geese, Goslings, Turkeys, etc.) and prices (s. d. s. d.).

ENGLISH WOOL.

The continuation of a number of small failures amongst spinners and dealers in the manufacturing districts has produced a great disinclination amongst buyers to enter into any transactions until they see more clearly how matters are going to turn.

Table with columns for wool types (Fleeces, Sorts) and prices (per lb., s. d. s. d.).

POTATOS.—SOUTHWARK, Monday, April 19.

During the past week the arrivals coastwise, by rail, and from abroad have been more than equal to the demand. Owing to the extreme heat of the greater part of the week the consumption fell off more than one half, and prices are considerably lower.

HOPS.—BOROUGH MARKET, April 23.

Messrs. Patten & Smith report the market steady, quotations being unchanged.

METROPOLITAN CATTLE MARKET.

The number of Beasts is smaller, and more than half foreign; trade is brisk for choice qualities, but slow for second rate, yet prices are higher for all kinds. The supply of Sheep is much smaller, and they are quickly disposed of at higher rates.

Table with columns for cattle types (Best Scots, Best Long-wools, etc.) and prices (s. d. s. d.).

THURSDAY, April 22.

The supply today is shorter than on this day week, and we have a ready sale at fully Monday's prices. The Lamb trade is very brisk, and a little dearer. Veal is the turn dealer. The foreign supply is short, and consists of 235 Beasts, 750 Sheep, and 56 Calves.

Table with columns for cattle types (Best Scots, Best Long-wools, etc.) and prices (s. d. s. d.).

METROPOLITAN MEAT MARKET.—April 24.

Best Fresh Butter .. 16s. per dozen lb.; Second do. do. .. 14s.; Small Pork, 4s. 8d. to 5s. 4d.; Large Pork, 4s. 0d. to 4s. 8d. per 8 lb.

MARK LANE.—Monday, April 19.

There was again a short supply of English Wheat to this morning's market, which was sold at a decline of 1s. per qr. upon the prices of this day se'night. There was a poor attendance, and very little demand for foreign Wheat, the few sales made were at a similar reduction.

Table with columns for wheat types (Wheat, Barley, Oats) and prices (s. s.).

Table with columns for rye and other grain types (Rye, Beans, Peas) and prices (s. s.).

Table with columns for flour types (Wheat, Flour) and prices (s. s.).

FRIDAY, April 23.

The reports of the growing crops are very satisfactory from all quarters, from which no doubt millers and dealers look for a further decline, and we have to report for the past week a dull trade in the markets of the kingdom, resulting in a reduction of about 1s. per qr. in the value of home-grown and foreign Wheat. Excepting a little speculative movement in Beans at Liverpool, causing a recovery of 1s. per qr. in the value of this article, we had spring corn of all descriptions a difficult sale at receding prices.

whilst Maize and Beans continued their downward course, being about 1s. per qr. cheaper. For forward shipment hardly any business transpired.

The arrivals of English grain this week are small, but fair of foreign. There was a poor attendance at this morning's market, and but little English Wheat on offer, which was cleared at Monday's quotations. Millers showed but little disposition to purchase foreign, and the sales made were at that day's quotations. Spring Corn of all descriptions was rather cheaper.

ARRIVALS FROM APRIL 17 TO APRIL 22, BOTH INCLUSIVE.

	Wheat.	Barley.	Oats.	Flour.
English ..	610 qrs.	1050 qrs.	— qrs.	— sks.

	25,110	8270	31,130	2210 brls.

LIVERPOOL, Tuesday, April 20.—The market was fairly attended. Wheat in limited demand, and prices are 1d. to 2d. per cental cheaper than on Friday. Flour very dull, and 1s. per barrel and sack cheaper. Beans, Oats, and Oatmeal without change. Indian Corn in small request, and fully 6d. per qr. lower than last market; round, 27s. 6d. to 27s. 9d.; new mixed, 27s. 9d. to 28s. 3d.

SEED MARKET.

We have nothing new or important to report this week concerning the agricultural seed trade. Our season is now drawing to a close; the orders which come to hand are mostly for small quantities wanted for immediate use; the seed business is therefore getting every day more quiet, and until the consumptive demand has altogether ceased, we cannot expect much speculation in our market. There is a great deal more English Red Clover seed offering than was expected, and for this description there has consequently been a considerable decline in value. Of foreign Red clover stocks now held in London are very light; the same can also be said of fine new Trifolium and White Clover seed, good new French Italian is very scarce, and prices have advanced 1s to 2s per cwt. French Sainfoin seed is in short supply, at higher rates. For white Mustard seed there is a brisk demand, and the little that is on offer is held at enhanced values. English Rape seed is in fair request at the recent rise. Spring Tares are now very cheap. Canary and Hemp seed are both dearer. We have a good inquiry for Mangold and Lucerne seed. Home-grown Linseed is without alteration.

JOHN SHAW & SONS, 16, Water Lane.

WANTED, by a Gentleman residing in the suburbs of London, a respectable Married Couple, without family, the Man to act as HEAD GARDENER; he must have a good general knowledge of the profession, and will have two Men under him. CORNS and BUNIONS.—A Gentleman, tormented with Corns, will be happy to afford information by which he obtained their complete removal, without pain or any inconvenience.—Forwards stamped envelope to F. KINGSTON, Esq., Ware, Herts.

In the Spring

PARR'S LIFE PILLS ARE USED BY THOUSANDS. They clear from the body all hurtful impurities, and the medicine has such deserved reputation for preserving health, consequently insuring long life.

BILIOUS and LIVER COMPLAINTS.—Indigestion, Sick Headache, Loss of Appetite, Giddiness, Spasms, and all Disorders of the Stomach, are quickly removed by that wonderful medicine, PARR'S LIFE PILLS. They unite the recommended operation with the most successful effect, and where required nothing can be better adapted. Sold by all Medicine Vendors, at 1s 1/2 and 2s 1/2, or obtained through any Chemist.

The Best Remedy for Indigestion.

NORTON'S CAMOMILE PILLS are recommended as a simple but certain remedy. They act as a powerful Tonic and general Aperient, and their operation; safe under any circumstances, and persons can now bear testimony to the benefits to be derived from their use. Sold in bottles at 1s 1/2, 2s 1/2, and 3s 1/2, in all towns in the Kingdom. CAUTION.—Be sure to ask for "NORTON'S CAMOMILE PILLS," and do not be persuaded to purchase the cheap imitations.

ELECTRICITY IS SELF-ADJUSTING CURATIVE and ELIXIR. Sufferers from nervous debility, indigestion, weakness, and all other ailments, can now cure themselves by the only "Guaranteed Remedy" protected by Her Majesty's Great Seal. Free for One Stamp, by H. JAMES, Esq., Medical Electrician, the London Hospitals, Percy House, Bedford Square, W. N.H.—Medicine and Fees superseded. A Test given in details. Established 1840.

The Gardeners' Chronicle Newspaper.

SATURDAY, MAY 1, 1869.

HOT-WATER APPARATUS

Perfectly Complete, or the Materials Supplied for Heating GREENHOUSES, HOTHOUSES, CONSERVATORIES, CHURCHES, PUBLIC BUILDINGS, &c. HOT-WATER PIPES at wholesale prices, Elbows, T Pieces, Syphons, and every other connection kept in stock. WROUGHT and CAST IRON CONICAL, SADDLE, and IMPROVED PELLS and ELLIPTIC BOILERS, from 24s each. IMPROVED and EXTRA STRONG CAST IRON TUBULAR BOILERS, with or without Water Bars, from 62s. 6d. each. CAST and WROUGHT IRON PORTABLE BOILERS on WHEELS for use without brickwork, from 60s. each. PATENT and IMPROVED THROTTLE and other VALVES, PLUMBING DOORS, BARS, and FURNACE WORK of every description and size.

LYNCH WHITE,
Old Barge Iron Wharf, Upper Ground Street, London, S.E.
(Surrey side Blackfriars Bridge).
Price List on application.

GARTON and KING, IRONFOUNDERS, HOT-WATER ENGINEERS, &c., FOSTER CONSERVATORIES, GREENHOUSES, VINERIES, PINE-PITS, &c. HEATED by IMPROVED HOT-WATER APPARATUS, and G & K's powerful and economical Boilers.
G & K refer with confidence to their lengthened experience and extensive practice in Heating by Hot-water Circulation. Estimates and Plans furnished on application.

JAMES WATTS and CO., HOTHOUSE BUILDERS and HOT-WATER APPARATUS MANUFACTURERS,
10, Abchurch Lane, London, S.E.

200 CUCUMBER and MELON BOXES and LIGHTS, in sizes from 1 and 2 feet to 4 feet, ready for immediate use, packed and sent to all parts of the Kingdom. Strong ZINC HANDGLASSES, all sizes.
References to the Nobility, Gentry, and Trade in most of the Counties in England.

HOT-WATER APPARATUS of every description, fixed or portable in any part of the country, for Warming Greenhouses, Conservatories, Forcing Pits, &c. Plans and Estimates on application.
J. JONES & SONS, 6, Bankside, Southwark, London S.E.

J. C. and J. S. ELLIS, HORTICULTURAL BUILDERS and HOT-WATER APPARATUS MANUFACTURERS, for Heating Greenhouses, Conservatories, Hothouses, Churches, Public Buildings, Private Residences, &c. Plans and estimates sent on application.

General Ironfounders, Manufacturers of Iron Hoods, Wrought and Cast Iron Cisterns and Tanks, Water Rams, Stable Fittings, and every description of Iron Work.
New & Foundry, Doctors Fields, Shoreditch.

It is with great gratification that we announce our permission to refer upon any occasion to the various Heating Apparatuses at the above, where our "ONE BOILER SYSTEM" has for years been subjected to the most critical tests with every satisfactory result. It is matchless for efficiency, and is working the largest Apparatus on record. These are no theoretical statements, but positive facts, and it is not too much to add, that no boiler can boast a parallel.

For List of Details, see "ILLUSTRATED BOOK of DESIGNS" (12th Edition), which can be obtained by addressing a note to

Saturday the Lower House adopted the Bill. Before the discussion of the paragraphs commenced the Polish, Slavonian, and clerical members declined to take any further part in the discussion, and left the Chamber. The Upper House in the sitting of Saturday elected its members of the Delegation. It is stated in commercial circles that the quarter's revenue account, drawn up by the Ministry of Finance for the Cis-Leithan provinces, shows a reduction of 5,000,000 florins in the expenditure.

HUNGARY.—Both Houses of the Hungarian Diet were opened on Saturday by the Emperor Francis Joseph in person. The speech from the Throne stated that though the State organisation was regulated at the last session of the Diet, still the favourable results then arrived at were not in themselves sufficient guarantees for the welfare of the country. His Majesty, therefore, invited the Diet to co-operate with him in introducing domestic reforms, and promised that to that end Bills should be laid before it relative to the civil and criminal law, municipal reform, the reorganisation of the Upper House, a revision of the electoral and Press laws, as well as measures in reference to the right of public meeting, association, superior educational establishments, the University system, commercial regulations, joint-stock companies, new railways, public works, financial reform, and international treaties. With regard to foreign politics, his Majesty said that the friendly relations which subsisted between him and foreign Powers permitted him to hope for the maintenance of peace, so necessary for the execution of internal reforms. This speech was received with loud cheering. During the inaugural ceremony the Hungarian and Croatian tricolors were hoisted beside the Royal standard on the castle of Buda. The ceremony of unveiling the statue of the Palatine Archduke Joseph took place on Sunday. In the evening Count Andrassy gave a grand ball, at which the Emperor and Empress and three Archdukes were present.

GREECE.—The Prince and Princess of Wales, accompanied by the King of Greece, left Athens on Saturday for Corfu. By order of the Ministry of Finance, and with consent of the Bank, a considerable amount of paper money has been withdrawn from circulation, thus reducing the last loan by almost one-half.

ITALY.—From explanations which have passed between the principal members of the Cabinet and the leaders of the parliamentary parties—Right, Third, and Permanent—it results that no divergence of opinion exists among them on questions of foreign policy, finance, and internal administration. It is expected, therefore, that a coalition between these parties will shortly take place, and be followed by modifications in the Ministry, General Menabrea and Count Cambray-Digny, however, remaining at the head of the Cabinet. In the sitting of the Chamber of Deputies on Tuesday the Government Bill for the provisional exercise of the Budget until the end of June was passed by 175 votes against 54. Signor Ricciardi questioned the Government respecting the rumours of Ministerial modifications. General Menabrea and Count Cambray-Digny replied that at present the Cabinet remained unchanged, and that no modification could be made until the Parliament pronounced an alteration necessary or expedient. An animated debate followed, and Signor Ferrario declared that any change in the attitude of the Piedmontese Deputies would be solely dictated by the interests of the country. The High Court of Appeal has concluded its examination of the Penal Code, and has declared unanimously in favour of the abolition of capital punishment. General Menabrea has presented to the Senate a Bill prohibiting the illicit deportation of children as organ boys and wandering minstrels. The investigations concerning the conspiracy at Milan show that it was entirely confined to the Mazzinian party, without any participation on the part of the Garibaldians. A Mazzinian centre, in correspondence with the conspirators at Milan, was discovered on Sunday at Florence. A quantity of arms, bombs, and proclamation have been seized, and several arrests have been made. Prince Napoleon arrived at Naples on Sunday morning in the yacht Jerome Napoleon, and left on Wednesday for Messina, Tunis, and Corfu, visiting the Isle of Stromboli on his way. The King of Italy left Naples about an hour before his son-in-law's arrival.

PAPAL STATES.—The total amount of the gifts presented to the Pope on the occasion of the 50th anniversary of his entering the priesthood is estimated at 800,000*l*.

TURKEY.—The Viceroy of Egypt is shortly expected at Constantinople. A very smart shock of earthquake was felt on the 18th inst. at Constantinople, shaking sensibly the solidest stone houses, but doing no material damage. The shock was felt on both sides of the Bosphorus and as far as the Prince's Islands.

INDIA.—The Ameer of Badakshan and all the Sirdars of Turkestan have given in their allegiance to Shere Ali. The son of the ex-Ameer Azim Khan has fled across the Oxus. The Ameer, having expressed his warm thanks to Lord Mayo, left the British territory greatly elated at this news, which he attributes to the Umballah conference. All the heads of the Khyber tribes accompanied the Ameer from Jamrood.

CHINA.—A despatch from Sir Rutherford Alcock to the British Consul at Shanghai has been published on the subject of the introduction of railways and telegraphs into China. It says that, notwithstanding the promises made by the Burlingame Mission to Europe and America, the Central Government at Peking shows no desire for progress according to Western ideas and desires, but, on the contrary, will not yield to the introduction of any such projects except under pressure and coercion. It is reported that some Catholic missionaries and several hundred native converts have recently been murdered in the province of Se-Chuen.

AUSTRALIA.—The Victorian Parliament had

adjourned for the Easter recess, after having made good progress with the estimates, and voted half a million in supply. The New South Wales Parliament was to be prorogued on the 2d April. The Duke of Edinburgh had laid the foundation-stone of a statue to Captain Cook, and was to leave Sydney in the Galatea on the 1st April, for New Zealand.

NEW ZEALAND.—Advices from New Zealand state that the rebel natives have committed further outrages upon settlers, but have been severely punished. A great meeting had been held, at which it was resolved to petition the Queen for assistance against the rebels. The ship St. Vincent, of Glasgow, was lost at Cook's Straits on the 14th of February, and all on board, with the exception of the mate and carpenter, were drowned.

UNITED STATES.—Mr. Motley leaves for England on the 19th inst., and Mr. Washburne for France on the 1st inst. The Senate has rejected the nomination of Mr. Henry S. Sanford as United States' Minister to Spain. The Government will not interfere in the Cuban affair further than for the protection of American interests. Two weeks ago the belief was that some act of recognition would be made, but the views of Government changed on intelligence being received from Cuba that the insurrection could not sustain itself without active foreign aid. As recognition might involve America in a war, any idea of interference seems to be abandoned. The steamer Uselda was wrecked on the 24th ult. on the Missouri River. She ran over a snag, and her boilers afterwards burst. The passengers on board were troops. Fifty lives were lost. The Pacific Railway will probably be completed this week, a junction having been made at Promontory Point, Utah.

Parliament.

In the House of Lords on Friday Lord MONCK called attention to the present condition of the military force, and said that the organisation of the regular army was defective; that the reserve was a force mainly on paper; that the militia, which was the primary reserve of the country, required reform in all respects; and that the Volunteers could not be treated as part of the standing force of the kingdom, inasmuch as their voluntary origin prevented the cultivation of the docility essential to military efficiency. He suggested the adoption of the short service system, as exemplified in Prussia, and the abolition of the purchase system. Lord NORTHBROKE said, that the Government intended to take steps for the reorganisation of the forces by shortening the period of enlistment and making service in the reserve compulsory, and for improving the efficiency of the Militia by doing away with the property qualification for officers, and remedying defects in the billeting system. The Duke of CAMBRIDGE said that Lord Monck's system would lead to a conscription. After some remarks by Earl DELAWARE, Lord DALHOUSIE, and Lord TRURO the subject dropped. On Monday the Earl of LISMORE, at the request of Earl GRANVILLE, postponed the question of which he had given notice with regard to open-air assassinations in Tipperary. The Marquis of BATH insisted that as gentlemen were being murdered almost daily in Ireland, the Government ought to take an early opportunity of announcing the measures they contemplated with regard both to the peace of the country and the land question. The Marquis of WESTMEATH, Lord CAIRNS, and the Earl of MALMESBURY concurred in this opinion. The Marquis of CLANRICARDE moved that the House should go into Committee on the Tenure of Land (Ireland) Bill. Earl GRANVILLE suggested the withdrawal of the Bill. Earl GREY, Lord WESTBURY, Lord CAIRNS, the Duke of SOMERSET, and the Marquis of BATH contended that the Government ought at once to indicate their policy on the Irish land question. Lord MONCK and the Duke of ARGYLL concurred in the suggestion that the Bill should be postponed, and the LORD CHANCELLOR said that the Government would not take up the land question until the Irish Church question was settled. The Bill was ultimately postponed to the 25th May. On Tuesday Earl RUSSELL moved the second reading of the Life Peerages Bill. The Earl of DERBY said that although the measure conferred many advantages, yet as in these days the prerogative of the Crown had come to mean the will of the Minister, who was dependent upon a majority of the House of Commons, the point for consideration was the desirability of increasing the power over their lordships beyond that which the Minister already possessed. He was of opinion that the number of 28 was far too large, and would give too much power to the existing Government, notwithstanding the number would not be filled up for seven years. The proposal to make eminence in science, art, and literature, and the occupation for 10 years of a seat in the Commons, qualifications for a life peerage, he decidedly objected to, and would prefer vesting in the Crown the discretionary power of choice. Earl GRANVILLE could not agree that the Bill would give too great a power to the Crown or the Minister of the day, inasmuch as the Crown had at present the power of creating an unlimited number of hereditary peerages. On the whole, he was glad to find that the principle of the Bill was generally accepted by their lordships, and he had no doubt that in Committee they might satisfactorily settle the details. After some observations from the Earl of MALMESBURY in condemnation of the Bill, and from Earl RUSSELL in its defence, Lord CAIRNS pointed out that the measure was one which mainly depended upon its details, and he gathered from the course of the debate that, with certain modifications, their lordships would be glad to see it pass. After some remarks by Lords DENMAN and FEVERSHAM, in opposition to the Bill, the second reading was agreed to. Earl GREY moved the second reading of the Repre-

sentative Peers for Scotland and Ireland. The Duke of BUCKLEBUCH proposed, as an amendment, the appointment of a Select Committee to inquire into the status of the representative peers relating to it. The amendment was supported by Lords PORTARLINGTON, CAIRNS, LEITRIM, DENMAN, and COLCHESTER. The Duke of ARGYLL and Lords AIRLIE and GLENELG spoke in favour of the Bill. Lord GREY proposed a compromise, to send the Bill to a Select Committee, but the Opposition rejected the proposal by 77 to 33. The amendment of the Duke of BUCKLEBUCH was then agreed to. On Thursday the Duke of BUCKLEBUCH moved the second reading of the Dilapidations Bill; but on the appeal of Lord CAIRNS, and by the advice of the Archbishop of Canterbury, the Bishop of OXFORD, and Lord HALDANE, the Bill, and introduced another amendment, inquired into the subject. This subject was then read a first time. The Duke of BUCKLEBUCH moved the second reading of the Government Amendment Bill. Lord CAIRNS gave an explanation with regard to the proposal of the Secretary of State to his colleagues, whether the revenues of India, doubt being cast on the orders of the Secretary of State, could not be overruled by the votes of the council. The LORD CHANCELLOR said, that in his opinion no such doubt existed, and that in all matters the Secretary of State was supreme. Lord LYVEDEN, Lord CAIRNS, and the Marquis of SALISBURY said that they had no doubt on the subject, and that it ought to be settled up by some declaratory enactment. Lord CAIRNS thought the law would not be made clear by a mere definition. On the motion for going into Committee on the Militia Bill, suggestions for amendments were made by Lords HARDINGE, LIMERICK, and Lord NORTHBROKE. The Bill then passed through Committee. The Norfolk Island Bishopric Bill was read a second time. Yesterday Lord WESTBURY moved the second reading of the Fine Arts Copyright Amendment Bill, and said that its object was to give copyright in art, and give to foreigners the same benefits which Englishmen enjoyed. So far as concerned the protection of their works, the House was left sitting.

In the Commons on Friday in Committee on the Irish Church Bill on clause 18, concerning the compensation of the Commissioners to determine the compensation, Mr. GOLDNEY moved an amendment binding them to the same basis as the salaries and rentcharge are to be calculated upon. The amendment resisted the amendment, which was rejected by a division by 273 to 161. Captain ARDEN moved an amendment compelling the Commissioners to pay over this compensation, not to the trustees of the advowsons, but to the Church. After some discussion the amendment was withdrawn. Clause 18 was agreed to. On clause 19, concerning the prohibition on the holding of synods, Mr. ARDEN moved an addition, enabling the bishops to meet in General Assembly, and to make laws and regulations for the government of the Church. Mr. STONE and the ATTORNEY-GENERAL opposed the amendment, which was not passed. The clause was agreed to without amendment. SHERLOCK moved to omit the 20th clause, concerning the present ecclesiastical law binding on the members of the Church, but eventually withdrew. Clause 21 was ordered to stand part of the Bill. Clause 21st clause, abolishing the ecclesiastical law, was agreed to without discussion. On the 22nd clause, Mr. ARDEN moved an amendment, with a view to certain restrictions to prevent the Church from holding more than 30 acres for a see house, or any other ecclesiastical house. On a division the amendment was rejected by 259 to 157. Mr. ARDEN moved to amend the 23d clause, concerning the redemption and commutation of the tithes, by inserting words making the tithe compulsory at a capital sum equal to the years' income, such sum to be paid to the body. The motion was opposed by Mr. ARDEN and Sir J. GRAY as an indirect attempt to diminish the Church, and supported by Sir R. PALMER on the ground of simple justice to the laity. On a division the amendment was negatived by 294 to 194, and the clause was ordered to stand part of the Bill. Progress was made on the 24th clause, having been agreed to. On the 25th clause, when clause 24, providing that the charges for dilapidations, to which each parish may be liable, should be a charge on the parish, was agreed to without amendment. On clause 26, concerning the enactments with respect to the management of the ruined churches, Mr. DISRAELI moved an amendment that the ruined churches should be reserved for national monuments only, and not be used for public worship. After some discussion the amendment was agreed to. An amendment, moved by Mr. PIM, that the clause requiring the Commissioners to undertake to keep in good repair the churches which may require for public worship, was agreed to. Mr. PIM then moved to omit the section of the Bill providing that the Commissioners might be empowered to provide for the maintenance, as defined in the Bill, of not more than 12 churches which are large to be kept in repair by the Commissioners. The motion was strongly opposed by the Opposition, and was negatived by 252 to 132. After this division Mr. DISRAELI pressed his amendment enabling the Commissioners

hand over to the Church body for church repairs a sum equal to 14 times the average annual amount spent for the purpose by the Ecclesiastical Commissioners, and the clause was agreed to. On clause 26 Colonel GREVILLE-NUGENT moved an amendment to transfer the glebe-houses attached to churches to the new Church body to the local burial boards. After a long discussion the amendment was withdrawn, and the clause agreed to. On clause 27, containing the provisions with respect to the transfer of ecclesiastical glebe-houses, Mr DISRAELI moved the omission of part of the clause, in order that the glebe-houses might be handed over to the Church body free of the building and other charges which the clause imposed. Sir R. PALMER, Mr W. P. MARTIN, and Sir H. BRUCE supported the amendment, which was opposed by Mr GLADSTONE and Mr C. FORTESCUE. Sir G. JENKINSON moved to report progress, and Mr GLADSTONE, in resisting the motion, intimated that between this and Thursday the point raised by the amendment would be considered. After some discussion, Mr GLADSTONE gave way, and the further progress of the Committee was adjourned to Thursday. On Tuesday Mr LAYARD announced that he would introduce a Bill, if possible before Whitsuntide, to authorize the erection of the courts of law on the Thames Embankment, between the Temple and King's Cross, bounded on the south by the Embankment, and on the north by Howard Street and certain small lanes in continuation of that line. It was 6 acres in extent, and Mr Street was of opinion that all the law courts and their offices might be accommodated on it for 1,600,000. Mr LAYARD added that he had received a communication from Lord Chief Baron Kelly, conveying the opinion of all the Common Law Judges except one, that the Embankment would be the best site for the Bench, the Bar, the solicitors, and the general public. Mr TEVELYAN brought in a Bill to make better provision respecting Greenwich Hospital and the application of its revenues. The main provisions of the Bill was to empty Greenwich Hospital and the infirmary by transferring the confirmed invalids to Haslar and Plymouth Hospitals, to clear the country work-houses of discharged seamen of the Royal Navy by an extension of the system of out-pensions, and to accommodate the Dreadnought patients within the walls of the hospital. The Bill also proposed to deal with the grievance of the "Greenwich sixpence," by handing over to the Board of Trade a sum not exceeding 4000l. a year, to be expended in pensions to officers and seamen of the Mercantile Marine who had for ten years paid the sixpence. Mr CANDLISH and Mr LIDDELL gave a general sanction to the principle of the Bill, which was read a first time. Mr LOCH moved for a Select Committee to inquire into the Scotch Game Laws. After a long and desultory discussion the motion was agreed to. Mr MONSELL moved that the order recently agreed to by the House of Commons, on Mr Newdegate's motion, for the production of certain papers relative to the attempted assassination of the Duke of Edinburgh by O'Farrell, be rescinded. After some remarks by Mr NEWDEGATE and Mr WHALEY in opposition to the motion, and by Mr DUKE in its support, the motion was carried on a division by 123 to 15; Mr Newdegate and his friends withdrawing from the House and taking no part in the division. Sir SELWIN IBBOTSON moved the second reading of the Beerhouses Bill. Mr BRUCE, on the part of the Government, said that he would not oppose the Bill, but would propose in Committee to limit its duration to two years. The Bill was read a second time, after an attempt by Sir R. CLIFTON to adjourn the debate, which was defeated by 232 to 0. On Wednesday the Imperial Gas Bill was ordered to be re-committed for the purpose of considering clauses for testing audit of accounts similar to those contained in the City of London Gas Act, 1868. On the suggestion of Mr AYRTON, two members, without votes, were added to the committee. Mr DENMAN moved the second reading of his Evidence Amendment Bill, which abolishes the last restrictions on the competency of witnesses, by permitting petitioners and respondents in the Divorce Court, and plaintiffs and defendants in actions for breach of promise of marriage to be placed in the witness-box. Mr S. HILL moved an amendment that the Bill be read a second time that day six months. Mr WHEELHOUSE seconded the amendment. The ATTORNEY-GENERAL, Mr LOPES, Mr Serjeant DOWSE, Mr HARCOURT, and Mr AMPLETT supported the Bill, and the two latter treated it as a first step towards the examination of prisoners. Mr HILL did not press his opposition to a division, and the Bill was read a second time. Mr WHEELHOUSE moved the second reading of the Hospital Rating Exemption Bill, observing that it proposed to exempt those institutions from local taxation on property, and not to interfere with imperial charges. The Bill was supported by Sir H. CROFT, Mr M'LAREN, Mr BAINES, Mr P. W. MARTIN, and Mr COWLEY, and opposed by Mr GOSCHEN, Mr SCLATER-BOOTH, and Mr M. H. BEACH. The debate was ultimately cut short by the arrival of the hour for adjournment, and the second reading became a "dropped order." On Thursday Lord J. MANNERS asked the Government what steps they meant to take for the protection of life in Tipperary and Westmeath. Mr C. FORTESCUE replied there was nothing they would not do to suppress agrarian crimes. They had put the Peace Preservation Act into operation with unparalleled vigour, but, further than this, he declined, on the grounds of policy, to state what measures they were taking. Mr GRAVES held this reply to be unsatisfactory, and gave notice, amid loud cheers from the Opposition, that he would on the following night call attention to the condition of Ireland. The House then went into Committee on the Irish Church Bill,

resuming the consideration of the 27th clause relating to glebe-houses, and of Mr Disraeli's amendment on it, at the point where it was interrupted on Monday by Mr MARTIN's appeal to the Government not to press it in its present form. Mr Disraeli's amendment omitted all the conditions in the clause, and proposed to give the glebe-houses back without charge, and Mr Martin desired that no kind of repayment should be required, at least for those for which there was no building charge. Mr GLADSTONE now stated that the Government was unable to consent to any material modification in the clause, which he justified on the principle of religious equality. Lord J. MANNERS contrasted the different principles on which the Maynooth buildings and the glebe-houses were treated, and contended that Mr Gladstone had made out no case for this signal breach of faith. Mr BAGWELL, speaking from the Liberal side, expressed his regret that the Government had not made this concession as a message of conciliation to the Irish Protestants. Mr G. H. MOORE, as a Roman Catholic Liberal, took the same line, and urged his co-religionists to join in requesting the Government to hand over the glebe-houses as a mark of goodwill to the Protestant clergy. Mr O'REILLY, Sir J. ESMONDE, and the O'CONNOR DON, on behalf of the Roman Catholics, refused to join in this appeal. Mr BRIGHT, Colonel GREVILLE-NUGENT, and Sir J. ESMONDE supported the clause. Mr WARD HUNT, Mr RAIKES, and Mr J. S. HARDY supported the amendment. Sir G. GREY regretted that the Government had not freely given over the glebes, and hoped they would reconsider the point. On a division, Mr Disraeli's amendment was rejected by a majority of 91—318 to 227. This clause and the next was then agreed to with a few verbal amendments. On clause 29, regulating the conditions under which private endowments founded since 1660 were to be handed back to the Church, Mr DISRAELI moved the omission of the date 1660, so as to include in the restoration all endowments, without reference to date. Mr HARCOURT opposed the amendment, which was supported by Mr CHAPLIN in a maiden speech, which elicited cheers from both sides of the House, and was highly complimented by Mr GLADSTONE. After some remarks by Sir R. PALMER, the ATTORNEY-GENERAL for IRELAND, and Mr BALL, the amendment of Mr Disraeli was negatived without a division. Mr HARDY then moved to omit the year "1660" from the clause in order to insert the date "1500." On a division the amendment was rejected by 306 to 220, being a majority of 86 for Ministers. A proposal by Sir F. HEYGATE to return to the Church the glebe lands included in the Ulster grants was rejected on a division by 103—283 to 180. After the clause had been agreed to the CHAIRMAN was ordered to report progress. Yesterday, on the motion of Mr GLADSTONE, various rules in regard to the business of the House at morning sittings were agreed to. Mr GRAVES called attention to recent events in Ireland, and expressed his belief that the land question was at the root of the present disorganization in Ireland. He asked the Government for a declaration of their policy. Mr CHICHESTER FORTESCUE considered the hon. gentleman had drawn too dark a picture of the state of Ireland. The House was left sitting.

City Intelligence.

Metropolis and its Vicinity.

THE GOVERNMENT OFFICES. — Dover House, Whitehall, has been purchased by the Government and it is not improbable that it will form part of the range of buildings in connection with the Horse Guards, when that department is amalgamated with the War Office.

COVENT GARDEN THEATRE. — It is rumoured that the Government are now negotiating for the purchase of Covent Garden Theatre for the purpose of using it as a central station for the telegraph system, when the arrangements for transferring it to their control have been concluded.

VALUE OF PROPERTY IN REGENT STREET. — The old-established premises, known as Newman's Yard, covering about a quarter of an acre, and held on Crown leases for 54 years unexpired at about 200l. per annum, were sold by auction on Monday, after a brisk competition, for the sum of 14,000l.

EXPERIMENTS AT SHOEBOURNESS. — Trials for range and accuracy of the new brass rifled field guns, and wrought-iron carriages, for India, were made at Shoebourness last week, under the supervision of the Special Committee. The guns shot remarkably well, and the rifling promises good endurance. A modification of the plugging of the Palliser cored shot has also been tried, and found, so far as the practice went, a remedy for the breaking-up of the projectiles previously experienced, and which not unfrequently happened. Colonel Inglis's gun-carriage for heavy guns has also been tried with success.

THE CASE OF BENJAMIN HIGGS. — On Monday, at

the Judges' Chambers, the case of Benjamin Higgs was mentioned, in reference to some fixtures at Teddington, claimed by Mr Park, the freeholder. An injunction in Chancery had been obtained *ex parte*, and the present application was ordered to stand over until the injunction was heard. It appears, from the evidence given before the Select Committee of the House of Commons on the metropolitan gas works, that the total defalcations of Higgs amount to 71,214l. Mr Deinson, Q.C., said that the Central Gas Company had been unable to discharge a debt of 36,000l. in consequence of these defalcations, which had been going on since 1862. An accountant, named Chatteris, who was examined, stated that the actual truth of the arrears, represented by the books to be owing from the consumers to the Company, was never tested. Had the separate accounts been balanced, 66,000l. of the deficiency would have been at once detected. The Select Committee on Thursday presented the following special report to the House of Commons:—

"The Committee are satisfied on the evidence of the promoters that for many years there has been no sufficient audit or supervision of the accounts of the company, and that defalcations have occurred extending over a period of six or seven years, and exceeding in amount 71,000l."

ROTTEN ROW. — An important addition is now making to Rotten Row. The new Row starts from Albert Gate, and runs beside the carriage drive to Queen's Gate, where a loop joins it to the old Row.

THE METROPOLITAN STREET TRAMWAYS. — The Select Committee met again on Monday, and passed the preambles of three Bills before them, and thus terminated their labours.

THE CASE OF BISHOP COLENSO. — Sir Roundell Palmer, Sir J. D. Coleridge, and Dr. Deane have been consulted as to the probability of obtaining a judicial condemnation of Dr. Colenso. The case submitted to them is comprised in the single query, "Assuming that the present Bishop of Natal has been guilty of an ecclesiastical offence, what steps can be taken to bring him to trial, and before what tribunal?" The reply of Sir Roundell Palmer, the Solicitor-General, and Dr. Deane, is to the effect that there are no means whatever of bringing him before any competent tribunal known to the law. The Bishop of Capetown has no jurisdiction over him. The Archbishop of Canterbury is in the same position, and the Bishop can only determine in the case of an appeal from "a competent tribunal," such as does not exist in the present instance. It is therefore distinctly laid down "that no means exist for trying the question whether or no Dr. Colenso has advocated doctrinal opinions not in accordance with the doctrines held by the Church of England; and, assuming him to have been guilty of an ecclesiastical offence, no steps can be taken to bring him, as Bishop of Natal, before any tribunal."

THE PUBLIC HEALTH. — The Registrar-General's Weekly Report states that in the week that ended on Saturday, April 24, 4008 births and 3070 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 24 per 1000 persons living, being 23 per 1000 in London, 28 in Edinburgh, 25 in Dublin, 21 in Bristol, 16 in Birmingham, 26 in Liverpool, 26 in Manchester, 23 in Salford, 27 in Sheffield, 24 in Bradford, 29 in Leeds, 23 in Hull, 21 in Newcastle-upon-Tyne, and 37 in Glasgow. The rate in Vienna was 35 per 1000 during the week ending the 17th inst., and in Berlin 27 per 1000 during the seven days ending the 22d inst. In London the births of 1134 boys and 1074 girls, in all 2208 children, were registered in the week. In the corresponding weeks of 10 years 1850-63, the average number, corrected for increase of population, was 2230. The deaths registered in London during the week were 1377. It was the 16th week of the year, and the average number for that week, corrected for increase of population, was 1490. The present return is, therefore, 113 below the estimated amount.

Provincial.

BRECON. — A murder of a very brutal character was committed at a solitary farm-house, on the borders of Breconshire, between Saturday night and Sunday morning. The farm is called Nant-y-Derri, and the victim was a widow, who was generally known to her neighbours as Mary Nant-y-Derri, but whose proper name was Mary Morgan. She was last seen alive in a shop at Hirwan, the nearest village, at six o'clock on Saturday night, and, on the following morning, a neighbour going into the house found her lying on the floor quite dead, her body burnt, and the slumbering embers of a quantity of hay which had been piled on her body. Her head was covered with a piece of carpet, and when this was removed there was seen a deep hole on one side of her head, and the other side was completely charred from the effects of the fire, which had evidently been ignited for the purpose of destroying the body, and probably the house also. The deceased was of miserly habits, and was reputed to have a large sum of money in the house. This, no doubt, tempted the murderer, but he must have been foiled in the hope to secure it, for the sum of 35l. was found concealed between the bedstead and mattress. The murderer, who is at present undiscovered, must have entered the house through the window. The inquest was opened on Tuesday, and adjourned for a fortnight to enable the police to prosecute the inquiries they have in hand.

BRISTOL. — In the Exchequer Chamber, on Saturday, an appeal against sentence of death was successfully prosecuted. A man named Jenkins was condemned at the recent assizes to be hung, for the murder of Fanny Reeves, whom he had pushed into the River Avon. Her screams were heard, and she was rescued, but she died from the effects of the shock to the system. Meanwhile, while at the hospital, she made a statement, on which the prisoner was convicted, but the preliminary passage, which stated that she made the

deposition with no hope of recovery, had in it the words "at present." The Court held that these words were a qualification which rendered the deposition inadmissible. The conviction was therefore quashed. In consequence of this decision an order was received from the Home Office on Monday afternoon for the liberation of the prisoner—

On Saturday a police-constable called Hill was murdered in Gloucester Lane, St. Philip's, one of the low parts of this city, while struggling with a prisoner whom he had taken into custody. The prisoner is a youth named William Pullin, 19 years of age, in the employ of Mr. Harding, of the Redcross Street Saw Mills. The officer had taken him into custody for assaulting Mr. Curtis, of West Street, baker, who had remonstrated with him for ill-treating a donkey. A party of roughs attempted to rescue him, but as the constable refused to give way, the prisoner pulled a knife with a broad blade from his pocket and thrust it into the constable's left leg, just above the kneecap. The blow was aimed in such a savage manner that it divided some important arteries, and caused so much hemorrhage that the constable died in half an hour. At the inquest on Thursday the jury returned a verdict of Wilful Murder against the prisoner.

CAMELFORD.—It is now ascertained that no less than 16 persons have lost their lives through the shocking accident which occurred on Wednesday evening, the 22d ult, at the Delabole Slate Quarries. These include 13 men, two boys, and one woman. One man is reported to be dying from the injuries he received. Four bodies have not yet been recovered. It is estimated that the quantity of rock which fell the whole distance of 250 feet amounted to 150 tons. An inquest on the bodies was opened on Friday, and after some formal evidence had been taken, was adjourned to next Monday. The catastrophe has created great excitement throughout the district, and although 400 hands are employed in the quarry no work has been done since the accident.

GLoucester.—The convict Wiltshire, now that the commutation of his sentence is secure, has made a long written statement to the chaplain of the county gaol. In it he tells how, after leaving the public-house on the Saturday night, he and Milson found the woman lying in the mud, and he pulled her hair, and said he thought he knew her. He accuses Milson of inciting him to the first offence, and then brings against him a much more serious accusation. He says that they left her after the first abuse of her, but returned almost at once and pulled her about to see if she had any money. During the operation, he alleges, Milson's dog caught hold of either her clothes or her flesh, and Milson kicked the dog aside, and then hitched his fingers in her gown, and tore it down to her breast. They then lifted her on the bank, and fearing that some one was approaching, went away to his brother's. On the way there he says that Milson wiped blood off his hand on the grass. He admits that when he left his brother's he went back to the woman, as to which there was no evidence at the trial. He says—"I went on down to my home, and when I came some way down the line I heard something, and thought upon the woman. I went along about ten yards further, and I heard it again shout 'Murder!' I stopped and looked about, and went in through the gate after a bit of hay for my donkey, and there I saw the woman with her head hanging down inside the railings, and her hands down. She was lying across the palings on her stomach, with one foot caught by the shoe in the thorn, and the other foot on the rail, and her clothes all down over her head. I asked her to get up. She did not seem to move. I pulled her shoe out of the thorn, and let her fall over. She cried 'Murder!' three times, and I went away and left her, and went to my home." He then makes further accusation against Milson. He has not denied that the woman died from suffocation; but that when asked whether he placed his hand on her mouth, he replied, after a pause, "I can't say whether I did, and I can't say whether I didn't. I'd rather say no more about it. I'd rather talk about something else." On Saturday his wife received a letter he wrote to her, in which he says—"I am thankful to the Almighty that my life is to be spared, but am very sorry to think I shall be parted from you as long as I live. The chaplain tells me I am to be sent into penal servitude for life; but I am very thankful I have got this instead of being hung. Everything was got ready for me to be hung last Monday, and on Friday I gave up all the world to die; but I couldn't get my wife off my mind. I was in such trouble about you. I cannot tell you how very thankful I am for my life being spared till God shall see fit to call me instead of being hung." He then tells how he prays five or six times a day, and refers to the time when he and his wife served God, and says he thinks the trouble that has fallen upon him is a punishment for his desertion of religion. Most of the details in his written confession are so revolting that they cannot be published.

PORTSMOUTH.—The Volunteers of the southern and western counties, with the troops in garrison, were reviewed on Monday on Southsea Common by Lieut.-General Sir George Buller, the officer commanding the district. The Volunteers comprised corps from Guildford, Brighton, Salisbury, Weymouth, Christchurch, and other places. The first division included the Hants Volunteer Cavalry, two field batteries of Royal Artillery, the Marine Artillery, the 2d battalion 13th Regiment, 101st, and 67th, under Brigadier-General Carey. The 2d Division under Major-General Lysons, consisted of the 3d field battery of the 3d Hants Volunteer Artillery, followed by the 1st, 2d, and 3d Hants Volunteer Garrison Artillery. Six gunboats took part in the attack on Southsea Castle, which ended in the repulse of the assailants. In the evening there was a display of fireworks on Southsea Common, and a grand ball was given in the great drill-hall of the Artillery Volunteers on the Governor's

Green, to which a large number of invitations had been issued.

WINDSOR.—On Wednesday, relying upon the ordinances of Eton College, which forbid the performance of theatrical entertainments within 10 miles of that foundation, Dr Goodford, the provost, through the head-master, issued an order for the police of the College to prohibit theatrical entertainments at the Windsor Theatre. Accordingly, Inspector Pearman of the Bucks Constabulary proceeded to the theatre, and notified the decision of the College authorities to the lessees, Messrs Rivers and West, who had just taken the house under a license from the Lord Chamberlain, held by Mr. Townshend, of the Castle Hotel. In the course of the past 12 months the theatre was purchased by Mr. J. Freemantle, who, it is understood, spent about 4000*l.* in its renovation and decoration. On Tuesday afternoon a piece well known as the Strand burlesque of "The Field of the Cloth of Gold" was given, the performance taking place at four o'clock in the afternoon. This entertainment, it seems, was attended by about 350 of the noblemen and gentlemen at the College. The fact became known to the college authorities, who took immediate steps to put in action their presumed right under the ancient ordinance. In spite, however, of the prohibitory notice, the lessees of the theatre have continued their performances as usual. The fact of such a notice having been given was telegraphed on Wednesday to Mr. Freemantle, the owner, who at once procured permission from the Lord Chamberlain to proceed with the performance, and thus the matter rests at present.

WOLVERHAMPTON.—On Monday an Irishman, named Thomas Durham, was brought before the borough magistrates charged with an outrage upon a woman, who is lying at the point of death. A few nights ago he became so quarrelsome in a public-house that he was turned out, upon which he declared that he would show the English what the Irish could do. On turning the corner of the first street he came to he met a woman passing by, whom he assaulted. Her part was taken by Mrs. Fanny Churn, who remonstrated at his behaviour. He then left off assaulting the first woman, and, turning upon Mrs. Churn, pulled her back by her bonnet, which came off. He then laid hold of her back hair, and with what is believed to have been a razor he scalped her as skilfully as though he had been an Indian. Her depositions have been taken, and the prisoner, who was arrested in the corner of a cellar in which he had taken refuge, has been remanded to Stafford jail for a week.

Ireland.

PRINCE ARTHUR, accompanied by the Knight of Kerry, Colonel Elphinstone, and Mr. Pickard, visited the telegraph station at Valentia on Friday. He was received by Mr. Willoughby Smith, engineer of the Company, Mr. Collett, general manager, and Mr. J. Graves, local superintendent, who conducted him into the cable-room, and carefully explained the construction and working of the apparatus. Messages of mutual congratulation were interchanged between his Royal Highness and the Governor-General of Canada. Telegrams were also sent to London and Killarney on the printing telegraph. His Royal Highness expressed great pleasure at the visit. He then drove off to see the shore-end of the cable, and afterwards drove round the island. His Royal Highness left Valentia on Saturday for Killarney to join the Lord-Lieutenant and Countess Spencer. In the evening the Prince and his Excellency went upon the lakes and enjoyed some fishing. On Tuesday the Prince arrived again in Dublin, and immediately left by special train for Londonderry. At Balbragan, Dundalk, and other stations on the line, the inhabitants of the surrounding districts had assembled in considerable numbers to await the arrival of the train, and on the Prince being recognised he was cordially cheered. The train reached Londonderry about 3 o'clock. On Thursday the Prince visited Portrush and the Giant's Causeway. A grand ball was to be given by Lord O'Neill, at Shane's Castle, yesterday evening, and the Prince was to spend to-day and to-morrow with Viscount Templetown, at Castle Upton.

FATAL RIOT IN LONDONDERRY.—On Wednesday night, after the arrival of Prince Arthur, there was a collision between the Protestants and Roman Catholics in Derry. While the Prince was in the Corporation Hall part of the mob began groaning for Mr. Gladstone and Dowse, and cheering for the Duke of Abercorn; others cheered for Dowse and equality. A band of apprentice boys also played party tunes, thus causing excitement, which led to stone-throwing and more serious rioting. After a time shots were fired, and the police were compelled to return the fire. Two men were shot dead and several others badly wounded. One or two are not expected to recover. At midnight the town was quiet. The dead men have not been identified, but evidently belong to the labouring class. It is said that the shot of the police caused one of the deaths.

FENIAN DEMONSTRATION IN CORK.—On Tuesday night Colonel Warren and Captain Costello, the released Fenians, were entertained at a public supper by their political friends. The Mayor of Cork, Mr. O'Sullivan, presided, and said he believed the time was coming when no stranger nation, with her armies and navies, should be dominant in Ireland. There was at that moment in Ireland a young Prince of the English nation. (Cries of "He be d—.") When that noble Irishman, O'Farrell, fired at another Prince in Australia, he was imbued with as noble and patriotic feelings as Larkin, Allen, and O'Brien. (Vociferous cheering, and cries of "He was.") He believed that O'Farrell would be as highly thought of as any of the men who had sacrificed their lives for Ireland (deafening shouts of "Bravo"). They all saw how a noble Pole had fired at the Emperor of

Russia because he thought that the Emperor was trampling upon the liberties of the people. Weill, O'Farrell probably was actuated by the same noble impulses when he fired at the Prince, as true to his country, for each was impelled by the same sentiments to do what they did cheerfully. O'Farrell also addressed the company. He said he had friends thought they were getting rid of a bad man, but whether he would turn up again with some interest or not time would develop. Costello, Warren sailed on Wednesday from Queenstown for America. The magistrates of Cork have called a meeting in reference to the conduct of the Mayor. The municipal Council is also to take the matter into consideration.

ANOTHER MURDER IN TIPPERARY.—Mr. Bradshaw, a landed proprietor and magistrate, living at Cappawhite, in Tipperary, was shot dead on Saturday morning. He left home about half-past 7 o'clock, and gave directions to his workmen in the field, who seemed low-spirited and restless. He left to take a sequestered path, with a stream on one side and a road on the other. In a few minutes two shots were fired, but no attention was paid to them. About 9 o'clock some constables went to the house on Magdalen Street, and Mrs. Bradshaw, thinking it time her husband should be at home to breakfast, sent an old man to look for him. He went to the fields and heard some noise, but had left; and, following the path, found him lying by the stream. Six feet from it was a pool of blood. His injuries were horrible—10 pellet and 10 bullet wounds in the head. The police and the magistrates were sent to the spot, and their suspicion fell on a young man named Allis, the son of a small tenant. He could not be traced, but in the evening he walked boldly into Philipps House, and gave himself up to the police. His statements of where he had been which they were to be false. Mr. Bradshaw was 40 years old, had 4 children living, and was much respected. The inquest was held on Monday, when the jury returned a verdict. The murder is attributed, by those who are best acquainted with the deceased gentleman, to private revenge. The reasons for this suspicion, and circumstances, not to agrarian lawlessness, but to the course pursued at the inquest, have not transpired, but the line of examination taken by the jurors, and the earnestness with which they demanded that the female servants of the house should be examined, indicate the direction in which popular suspicion points. The farmers of the neighbourhood have subscribed 250*l.* as a reward for the detection of the murderer.

MURDER IN WESTMEATH.—Captain Bora Tarleton was murdered on Wednesday at Creggan, Athlone. He was on his way to his farm near Creggan. The assassin stood behind a wall, on which a flag had evidently been placed to steady the gun. He was charged with duck-shot. Captain Tarleton was dreadfully mangled. He had lately received threatening letters, and this caused him to carry a revolver, which was found in his belt underneath his coat. There is a report that Captain Tarleton had dismissed some of his employes. A verdict of Wilful Murder was returned at the inquest on Thursday. The deceased was much esteemed in the county. Six persons in custody.

ATTEMPT TO BLOW-UP A LANDLORD'S HOUSE.—On Friday night a daring attempt was made to blow up the house of Dr. Blunden, at Parkmore, Mullinabone, Tipperary. About 1 o'clock the house was alarmed by a loud explosion, which shook the building, and, on getting up to ascertain the cause, they found that a vessel contained a large quantity of powder, to which a fuse had been attached and placed at the door and ignited, but it resulted in smashing the fan-light over the door and the pane window into fragments. The police have been making active search for the perpetrators, but as yet have been unsuccessful.

ROBBERY OF ARMS.—On Tuesday the ship "The Trude, under repairs in the Royal Victoria Dock, Passage, Cork, was entered by a body of men and robbed of a large number of muskets, bayonets, and pistols. No arrests have been made.

Railways.

THE BROAD AND NARROW GAUGES.—The narrow gauge on the Great Western, as regards the middle districts of England, is now a thing of the past. The 1st inst. the Great Western Company have agreed to run any broad-gauge passenger trains between London and Birmingham and Wolverhampton. The travellers between London and Shrewsbury or the West have no longer to change carriages either at Wolverhampton or Birmingham, the trains now running through between Paddington and Birkenhead or the narrow gauge without any change whatever. The branch between Reading and Basing-toke the narrow rail has also been removed, thus converting it from a mixed gauge into an entirely narrow-gauge line, and connecting the Great Western system with the London and South-Western and the South-Eastern of England. In addition to this, the whole of the broad gauge lines north of Oxford will immediately be taken up, removing in the midland counties the last vestige of the system of one of the two great rival engines whose plans were so long hotly contested and which celebrated as "the battle of the gauges."

THE ATTEMPT TO UPSET TRAINS ON THE GREAT WESTERN.—A few days since, Mr. Joseph Lane, a landlord of the Plumbers' Arms beer-shop, Shrewsbury Lane, Battersea, was brought up at Wandsworth Police Court, in custody of Inspector Pitter, charged with the crime of maliciously placing six wooden sleepers on the up Windsor line, near Clapham Junction, with intent to endanger the safety of passengers.

slightly easier prices throughout the markets of the kingdom, but we notice towards the close a healthier tone in some quarters, and the reduction of 1s. per qr. in the value of Wheat has not been general. Spring Corn of all sorts has been neglected, and where a change in prices occurred it was adverse. Flour has been a difficult sale at a further slight reduction in value. The arrivals of seed laden vessels off the coast during the week consisted of 14 cargoes, of which, with those left over from last week, there remained for sale last night 19 cargoes. The trade in Wheat has been very inactive, and sales were restricted at a decline of about 1s. per qr.; the only feature worth noticing was the purchase of a few cargoes for the Continent. Maize continued dull, and prices were 1s. to 2s. per qr. cheaper. Barley remained unaltered, and of Rye and Beans there is nothing off the coast. Rapeseed meets with a steady speculative demand for French account, and prices are 3s. 6d. per qr. dearer. In cargoes on passage and for forward shipment business is at a standstill. Paris, April 22.—The weather continues fine, and the appearance of the growing crops is very satisfactory. The trade in Wheat and Flour remains inactive, with a downward tendency in prices. The eight marks are quoted at equal to 32s. 6d. per 280 lb. The stock at the Halle is estimated at 7719 cwt. The arrivals of English grain and foreign Barley this week are small, but fair of foreign Wheat. There was a poor attendance at this morning's market. English Wheat brought Monday's prices; for foreign the demand was very limited, and but few sales being made, we do not alter our quotations. Grinding Barley and Oats were 6d. to 1s. per qr. cheaper; other descriptions of Spring Corn unchanged.

ARRIVALS FROM APRIL 24 TO APRIL 29, BOTH INCLUSIVE.

LIVERPOOL, Tuesday, April 27.—There was a good attendance at market. Red Wheat sells more readily at a slight reduction from Friday's rates; white unchanged, and American 6d. decline. Beans steady; Saida, 34s. Oats and Oatmeal without change. Indian Corn in moderate request, and 6d. per qr. lower; mixed and round, 26s. 6d.

SEED MARKET.

As the time for sowing is now nearly over, we have had during the last few days only a small demand for agricultural seeds. A few retail orders come to hand, which are executed at unaltered currencies. There appears to be a large quantity of home grown Red Clover seed about, the quality of which is for the most part indifferent; this sort is offered at a considerable decline from the values ruling some weeks past; in fact, the quantity of English Red Clover seed which has come to market has astonished every one, the general opinion at first being that there would be very little seed saved. Of new foreign Clovers the stocks are light; for this description we have a good speculative inquiry to hold over till next year. Fine White Clover and good new Trefoil seed are both very scarce. Best quality French Italian is in short supply, and is held with firmness. For White Mustard seed we have an increased demand, at improved rates. Canary and Hemp seed continue to advance in price. Tares, on account of their scarcity have gone 2s. to 3s. per qr. dearer. Mangel seed is now in good request; the same can also be said of Swede and Turnip seed. Rape seed is very firm, and meets with a ready sale. We have a brisk inquiry for Lucerne seed.

JOHN SHAW & SONS, 16, Water Lane.

REEVES BROTHERS are in WANT of an active Man, as MANAGER of their Notting Hill Nursery. Character for honesty and sobriety indispensable.

WANTED IMMEDIATELY, 30 miles from London, a WORKING GARDENER, thoroughly competent to undertake the Management of Vineries, Cucumber and Melon House, Flower and Kitchen Garden. Man to assist him. Must be single. Address, stating wages required, age, length of time in last place, and reference, to G. A. W., Esq., The Lodge, Bereham, near Chelmsford, Essex.

WANTED, at Sydenham, as UNDER GARDENER, a Young Man, about 25 years of age, who has had practical experience, and thoroughly understands his business. Wages, 18s. a week, and cottage.—Apply by letter, stating references, &c., to F. M., care of Mr. G. Street, 30, Cornhill, E.C.

WANTED, a MAN who thoroughly understands General Out-door Nursery Stock, Budding, Grafting, Layering, &c.; must well understand Roses; also good Salesman. Need not apply unless reference good.—JAMES W. TODMAN, Eltham Nursery, S.E.

MESSRS. VEITCH AND SONS are in WANT of an ASSISTANT PROPAGATOR, about 20 years of age, who has had some experience in a good Nursery.—Apply, stating references and wages expected, addressed Royal Exotic Nursery, Chelsea.

WANTED, in one of the largest London Nurseries, a respectable Young Man as ASSISTANT CLERK, who would make himself generally useful in the Offices.—One who has some knowledge of Architectural Drawing and Ground Plan Making would be preferred, and remunerated accordingly.—Apply by letter, stating references and salary expected, addressed NURSERYMAN, Gardeners' Chronicle Office, W.C.

WANTED, as DAIRYMAID, a person of experience, about 35 years of age.—She must be a first-class Butter maker.—Mrs. PAUL, Cambridge House, Twickenham, S.W.

WANT PLACES.—Letters to be Post Paid.

EXPERIENCED GARDENERS (or as GARDENER and BAILIFF), of various qualifications, recommended to Gentlemen.—Further particulars given on application to Messrs. E. G. HENDERSON & SON, Wellington Nursery, St. John's Wood, London, N.W.

GARDENERS (EXPERIENCED).—JOSEPH MEREDITH, The Vineyard, Garston, near Liverpool, begs to intimate to Ladies and Gentlemen requiring the above that he has on his Register some excellent Men, for every class of situation, whom he can strongly recommend from his personal knowledge of them.

MR. WM. PAUL begs to announce that he has made arrangements by which he will be enabled in future to furnish Gentlemen with the NAMES, ADDRESSES, &c., of GARDENERS and GARDENERS and BAILIFFS, of various qualifications, who are open to Engagements. The fullest particulars as to services required and wages given should be forwarded with application.—Paul's Nurseries, Waltham Cross, London, N.

To Gardeners and Bailiffs (Head, Foremen, or Under). JAMES CARTER AND CO. having many applications for the above request that those WANTING SITUATIONS will send NAME, ADDRESS, and COPIES of TESTIMONIALS for ENTRY in their FREE REGISTER. Only those who can send unquestionable references need apply. Any Lady or Gentleman requiring GARDENERS or BAILIFFS may rely upon J. CARTER & Co. adopting the most stringent regulations in reference to testimonials as to ability, honesty, &c. JAMES CARTER & Co., 237 and 238, High Holborn, London, W.C.

Gardeners and Under Gardeners. WM. CUTBUSH AND SON beg to state that they have at all times on their books MEN of various qualifications, whose characters will bear the strictest inquiry. Any Gentleman making application would save time by clearly stating the duties to be undertaken, wages offered, &c., so that suitable Men may be selected.—Highgate Nurseries, London, N.

GARDENER (HEAD).—Age 35, married; understands Forcing, &c. Character will bear the strictest investigation. J. F., Coombe House, Croydon.

GARDENER (HEAD).—Middle-aged, married, no incumbrance; fully understands the profession in all its branches. No single-handed place accepted. Wife a good Dairy-woman. Good references.—H. H., Post Office, Faringdon, Berks.

GARDENER (HEAD).—Age 36, married, two children; 25 years' practice in all branches. Can be well recommended. No objection to take charge of Pasture Land if required.—J. W., Messrs. Lucombe, Pince & Co., Nurseries, Exeter.

GARDENER (HEAD).—Middle-aged, married; has lived in first-class places, and has given every satisfaction. Good references as to character and ability.—W. L. Z., 63, George Street, Newcastle-on-Tyne.

GARDENER (HEAD).—Age 30, married, one child; has a thorough knowledge of the profession in all its branches. Eighteen years' good experience; five years' good character from present situation.—M. H. S., Lyne, Horsham, Sussex.

GARDENER (HEAD).—Married, two children; thoroughly understands the profession in all its branches. Four years' good character from last Employer.—J. E., Post Office, Worplesdon, near Guildford.

To Noblemen and Gentlemen.

GARDENER (HEAD), where good general practical Gardening is required.—Middle-aged, married, no incumbrance; thoroughly experienced.—G. H., Messrs. Rollison & Son's, The Nurseries, Tooting, Surrey.

GARDENER (HEAD).—A thorough practical Man, who understands the Management of Vines, Pines, Melons, Cucumbers, &c., Kitchen and Flower Gardening, and Early and Late Forcing of Fruits, Vegetables, and Flowers. Good character.—E. B. A., 5, Bedford Road, Clapham Rise, Surrey.

GARDENER (HEAD).—Age 45, married; has had charge of a Nobleman's extensive Establishment for the last eight years, and was previously ten years in the Gardens of a noble Duke, by whom he can be recommended. First-class testimonials.—A. Scott, Post Office, Elstree, Herts.

GARDENER (HEAD).—Age 32, married; understands the profession in all its branches, including the Early and Late Forcing of Fruits, Flowers, and Vegetables, is also a good Flower and Kitchen Gardener, competent to undertake the Laying-out of New Grounds, and the Erection and Heating of Hot-houses. Four years' character.—J. S., Ringwood Gardens, Chesterfield.

GARDENER (HEAD).—Age 29, married, one child; thoroughly understands the Management of Vines, Stove and Greenhouse Plants, Early and Late Forcing, and Kitchen and Flower Gardening. No objection to a good single-handed place. Good references from present employer.—W. SMITH, 6, Chestnut Grove, Twickenham Common.

GARDENER (HEAD).—Age 45, steady and industrious (London Man); an excellent hand at Growing Grapes, Peaches, Melons, Cucumbers, Stove and Greenhouse Plants, all kinds of outdoor Vegetables, Fruits, and Flowers, Management of Pleasure Grounds, and can keep the Conservatory gay at all seasons.—A. B., 1, Belmont, Lower Broughton, Manchester.

GARDENER (HEAD), age 26, single.—JOSEPH DILLISTON, late Foreman to the Right Hon. Lord Vernon, after 10 years' practice in first-class Establishments, is desirous of taking a First-class Garden under his superintendence. All departments thoroughly understood, and theory combined with practice in all "modus operandi." Numerous first-class references.—Address, Market Hill, Royston, Herts.

GARDENER (HEAD, WORKING), where one or more are kept.—Age 41, married; thoroughly practical in Vegetable, Fruit, and Flower Culture. Good references and testimonials of character as to respectability and practicability.—D. T. L., 2, Welleley Road, Snarebrook, Essex.

GARDENER (HEAD, WORKING).—Age 30, married, no children; has a thorough practical knowledge of Gardening, Vines, Fruits, Greenhouse, and Flower and Kitchen Gardening in all its branches, also Cucumbers, Melons, and Mushrooms. Has been 13 years in last place, from which he can be well recommended by W. R. SKYMON, Esq., Crowood, Hungerford.

GARDENER (HEAD, or good SINGLE-HANDED).—Age 39, married, one child; thoroughly understands the Forcing of Vines, Peaches, Melons, Stove and Greenhouse Plants, and Flower and Kitchen Gardening. Two years' good reference.—W. F., 16, Railway Terrace, Ladywell, Lewisham, S.E.

GARDENER.—Married, no family; respectable, steady, and persevering; thoroughly acquainted with his profession.—ALBA, 74, Moray Road, Tollington Park, Holloway, N.

GARDENER (no family).—A Gentleman wishes to recommend a most respectable Man as above, whose Wife is a competent Laundress. A single-handed place would not be taken.—Apply by letter only, in first instance, P., Gardeners' Chronicle Office, W.C.

GARDENER (age 37, without incumbrance).—P. FRANK, Gardener, Ripley Castle, Yorkshire, is now leaving his situation owing to a reduction in the establishment, caused by the death of Lady Ingilby, and is at liberty to engage with any Nobleman or Gentleman requiring a thoroughly experienced Gardener. Satisfactory testimonials.

GARDENER, or GARDENER and MANAGER of LAND, &c.—A very trustworthy and competent Man in all branches is now open to an engagement where fair wages will be given. The highest testimonials.—D. V., Messrs. Felton & Sons, Birmingham Nursery, 56, Harborne Road, Edgbaston, Birmingham.

GARDENER (SINGLE-HANDED).—Age 25, married, no incumbrance; thoroughly understands Fruits, Flowers, and Kitchen Garden Work, &c.—W. H., Post Office, Circus Road, St. John's Wood, N.W.

GARDENER (SINGLE-HANDED), or where another is kept.—Married, no incumbrance, understands Greenhouses, &c. Good Kitchen Gardener. Good character from last place.—G. L., Mr. Balfour, Baker, 6, Abbey Road West, St. John's Wood.

GARDENER (SINGLE-HANDED, or SECOND).—Age 24; understands Early and Late Forcing, and Flower and Kitchen Gardening. Good character.—H., J. Major, Nurseryman, Oundle, Northamptonshire.

GARDENER (SINGLE-HANDED, or UNDER).—Single; four years' good character.—W. A., Riversfield, St. Neot's, Huntingdonshire.

GARDENER (UNDER, SINGLE-HANDED), where he can get a good insight into House-work.—Age 25; good character. T. M., 2, Nunhead Green, Peckham Rye, Surrey, S.E.

GARDENER (UNDER), in a Gentleman's Garden.—Age 23; has been used to Glass, but wishes to improve himself in Plant and Fruit Growing. Three years' good character.—F. J., Lacey's, Stationer, Eltham, S.E.

IMPROVER, under an experienced Gardener.—Has worked among Vineyards and Fruit Trees. Address given.—N., Bitterne, Southampton.

IMPROVER, under a Head Gardener.—Allow 1s. or 2s. per week as Premium. Good character. Post Office, Loughton, Hurst Green, Essex.

To Nurserymen. GROWER of Hard and Soft-wooded Plants.—Years with one of the leading London Firms.—Cottages, St. John's Wood, N.W.

To Nurserymen. PROPAGATOR.—Thoroughly understands the propagation and Cultivation of Hard and Soft-wooded Plants. Satisfactory references as to character and ability. Is likely to be permanent; referred.—E. Y., Post Office, Chelsea.

TWO good NURSERY and JOBBING WANTED EMPLOYMENT. Vicinity of London. W. C. B., Cambrian Nursery, Charlton, Chislehurst.

FOREMAN, in the Flower Garden, or First-class character and references.—Bury, Suffolk. Post Office, Fulham, S.W.

WORKING BAILIFF, or FOREMAN.—Understands Stock. Thoroughly trustworthy. Excellent Dairywoman and Laundress.—R. M., Post Office, Surrey.

To Gentlemen, Nurserymen, and Others. CARPENTER (GENERAL).—Twenty years' experience in Painting, Glazing, and Fixing Hot-water Apparatus. References.—S. BENNISON, The Nursery, Stratford.

Notice of Removal. WILKINSON and KIDD, Saddlers to Her Majesty and H.R.H. THE PRINCE OF WALES, have removed their Establishment from the Corner of Park Street, to 5, HANOVER SQUARE, W. (adjoining the Queen's Rooms). Established 1786.

SAMUELSON & CO.'S NEWLY PATENTED EDGE-CLIPPING SILENT LAWN MOWERS.

THE MOST IMPORTANT IMPROVEMENT EVER INTRODUCED.

MESSRS SAMUELSON AND CO. BEG TO DRAW SPECIAL ATTENTION TO THEIR NEW **LAWN MOWERS, for 1869,**

Which are fitted, when required, with a new Patent **EDGE-CLIPPING** arrangement, entirely superseding the old and tedious operation of Edge-Clipping by hand.

All Machines fitted with new Silent Gearing, ensuring perfect freedom from noise when at work.

Catalogues, with full descriptions and prices of the new Patent Edge-Clipping Silent Lawn Mower, on application to

SAMUELSON AND CO., BRITANNIA WORKS, BANBURY.

GREEN'S IMPROVED PATENT ROLLER,

FOR **LAWNS, DRIVES, BOWLING GREENS, CRICKET FIELDS, and GRAVEL PATHS.**
SUITABLE FOR HAND OR HORSE POWER.

PRICES OF HAND ROLLERS.

Diam.	Length.	£ s. d.
30 inches	32 inches	7 10 0
24 inches	26 inches	4 10 0
20 inches	22 inches	3 10 0
16 inches	17 inches	2 15 0

PRICES OF ROLLERS FITTED WITH SHAFTS, Suitable for Pony or Horse Power.

Diam.	Length.	£ s. d.
30 inches	32 inches	10 0 0
30 inches	36 inches	10 15 0
30 inches	42 inches	11 15 0
30 inches	48 inches	13 10 0
30 inches	60 inches	15 10 0
30 inches	72 inches	17 10 0
30 inches	84 inches	19 10 0

These Rollers possess many advantages over all others; they are made in two parts, and are free to revolve on the axis, affording greater facility for turning, and the outer edges are rounded off, or turned inwards, thus avoiding the unsightly marks left by other Rollers. They are manufactured of the best materials, and are got up in a manner surpassing any ever yet brought out. The Rollers 24 by 26 inches, 21 by 22 inches, and 16 by 17 inches, are also made in one part, at a reduced price; and, for Rollers of that size, will be found to answer many requirements, as the handle can be reversed to either side of the Roller at pleasure.

PRICES—24 in. by 26 in., £4; 20 in. by 22 in., £3 2s. 6d.; 16 in. by 17 in., £2 10s.

Agricultural Improvements.
MR. BAILEY DENTON undertakes the **UNDER-DRAINAGE OF LAND** at a charge of 5s. an acre; and will supply **PLANS and SPECIFICATIONS** for Farm-houses, Farm buildings, and Labourers' Cottages with or without Superintendence during Construction, on terms to be ascertained of him at 22, Whitehall Place, London, S.W.

THE GENERAL LAND DRAINAGE and IMPROVEMENT COMPANY.
Directors.
Thomas Chapman, Esq., F.R.S. The Right Hon. Viscount Combermere.
G. O. Thomas Clark, Esq. Edward John Hutchings, Esq.
John C. Cobbold, Esq. William Tite, Esq., M.P.
Henry W. Currie, Esq.

J. BAILEY DENTON, Principal Engineer
Agricultural Improvements of any kind are executed by the Company, or the outlay thereon repaid to Landowners who prefer executing the work by their own Agents.
Tenants may also, by arrangement with their Landlords, procure the execution of such improvements.
The outlay, with all official expenses, may be charged on the Estate, and paid off by a rent-charge in 31 years, or at the option of the Landowners in a shorter term.
No investigation of title necessary, and no legal expenses incurred. Application to be made to HORACE BROKE, the Secretary, at the Offices of the Company, 22, Whitehall Place, London, S.W.

THE LANDS IMPROVEMENT COMPANY.—(Incorporated by Special Acts of Parliament.)
Directors.
John Garton, Esq., 9, Whitehall Place, S.W.
Francis L. Deane, Esq., Kirtlington Park, Oxford.
Henry Farquhar, Esq. (Messrs. Herries, Farquhar & Co.), 16, St. James Street, S.W.

Home News.

THE COURT.—On Friday the Queen drove to Saturday the Queen drove out. On Sunday the Queen and Royal family attended Divine service at West-pingham Church. The Rev. James Drew preached a sermon. On Monday morning the Queen walked and drove in the grounds. Prince Lowenstein-Wartburg arrived on a visit. The Judge-Advocate-General had an audience of her Majesty. On Tuesday the Queen drove out in the morning with Princess Louise, and in the afternoon with Princess Christian. On Wednesday morning the Queen drove out with Princess Louise, and in the afternoon drove out with the Prince of Leiningen left Osborne. On Thursday morning the Queen went out in the grounds with Princess Louise. General Sir William Knollys arrived at Osborne on a visit. The Queen, with the Prince and Prince Leopold, will leave Osborne this afternoon and return to Windsor, where they are expected to remain until the 11th inst., when they will leave for Balmoral.

THE PRINCE AND PRINCESS OF WALES landed Brindisi on Sunday from Corfu. Their Royal Highnesses reached Bologna by the Southern Italian Railway early on Monday morning, and in the afternoon arrived at Turin. On Tuesday the Prince and Princess crossed Mont Cenis by special train, and arrived Paris on Wednesday morning, taking up their quarters at the Hotel Bristol.

RETURN OF PRINCE ARTHUR FROM IRELAND.—On Thursday morning, at 6.30, Her Majesty's yacht Vivid, with Prince Arthur on board, entered the Mersey from the Isle of Man. At 8.45 his Royal Highness landed at the Prince's Stage, and, as his arrival was much earlier than was expected, there was no formal reception. His Royal Highness drove at once to the Lime Street Station, and left for London by the 9.15 express.

LORD-LIEUTENANCY.—Sir Thomas Western has been appointed Lord-Lieutenant of Essex. It is said that the hon. Baronet is about to be raised to the peerage.

THE CABINET.—A Cabinet Council was held on Friday in Downing Street. Another was held on Saturday, and another on Tuesday.

PARLIAMENTARY MOVEMENTS.—The Right Hon. E. Horsman, Mr. Grenfell, and Sir John Lubbock, are candidates for the seat at Liskeard, vacant by the death of Sir Arthur Buller. Mr. Montague Guest is a candidate for Youghal in the room of Mr. Wexler, unseated; and is opposed by Mr. O'Sullivan, the Mayor of Cork, against whom a Bill to remove him from his office has been brought in by Government.

TRIALS OF ELECTION PETITIONS.—The Court of Common Pleas on Thursday decided the point of law upon which the petition against the return of Mr. Birley, the Conservative M.P. for Manchester, was based. The Court decided that, the contract which Mr. Birley's firm had entered into with the India Office having been completed, he was a mere creditor of the Government, whose claim was ascertained and whose right to receive the money due was undisputed. This did not constitute a disqualification under the Act of George III. The decision of the Court, therefore, was that Mr. Birley was entitled to retain his seat. The trial of the Stafford election petition commenced on Tuesday before Mr. Justice Blackburn. Mr. Chawcer, the defeated candidate, claims the seat, and the proceedings will, therefore, result in a scrutiny. Mr. Justice Willes on Wednesday consented to the withdrawal of the adverse petitions for Horsham, and to admit Mr. Hurst as duly elected. The question of costs was reserved for consultation with the other election judges.

THE CONSERVATIVE PARTY.—A meeting of Conservative Irish peers and members of Parliament is to be held at the Carlton Club this afternoon, to consider the propriety of immediately forming "and bringing into working order" a Conservative Registration Association for Ireland. The promoters of this movement are Colonel Taylor, Viscount Crichton, Lord Claud J. Hamilton, and Lord A. E. Hill-Trevor.

MEETING OF BISHOPS.—There was a large gathering of bishops on Thursday at Lambeth Palace. After Divine service in the private chapel, their lordships held a conference under the presidency of the Archbishop, at which the various questions affecting the Church which are now the subject of legislation and discussion, were considered. The subjects which form the agenda for the next meeting of Convocation were also discussed, and certain arrangements agreed on.

THE ARCHDEACONRY OF NORFOLK has been conferred upon the Rev. Ralph Blakelock, M.A., Rector of Gimmingham, near North Walsham, author of several mathematical works.

COLONIAL BISHOPRICS.—The Bishop of Victoria (Hong-Kong), who was consecrated in 1867, and went out to China in the same year, has returned to England. The Bishop of Sierra Leone intends to resign his see, his health being unequal to the climate of his diocese.

KNIGHTHOOD.—The Queen has directed letters patent to be passed under the Great Seal granting the dignity of a Knight of the United Kingdom to James Martin, Esq., late First Minister and Attorney-General in New South Wales; to Robert Officer, Esq., Speaker of the House of Assembly of Tasmania, and to Terence Aubrey Murray, Esq., President of the Legislative Council of New South Wales.

EVERY SATURDAY, OF ANY BOOKSELLER OR NEWS-AGENT, PRICE THREEPENCE.
Each Half-yearly Volume complete in itself, with Title-Page and Index.

THE ATHENÆUM

JOURNAL OF ENGLISH AND FOREIGN LITERATURE, SCIENCE, AND THE FINE ARTS, CONTAINS:

REVIEWS of every important New Book.
REPORTS of the Learned Societies.
AUTHENTIC ACCOUNTS of Scientific Voyages and Expeditions.
FOREIGN CORRESPONDENCE on Subjects relating to Literature, Science and Art.

CRITICISMS on ART, MUSIC and DRAMA.
BIOGRAPHICAL NOTICES of distinguished Men.
ORIGINAL PAPERS and POEMS.
WEEKLY GOSSIP.
MISCELLANEA, including all that is likely to interest the informed

THE ATHENÆUM

Is so conducted that the reader, however distant, is, in respect to Literature, Science and Art, on an equality in point of information with the best-informed circles of the Metropolis.

Subscription for Twelve Months, 18s.; Six Months, 6s. 6d. If required to be sent by Post, the Postage extra.

NEW PUBLICATION.

In the Press, and ready shortly, post 8vo, cloth,

CHOICE STOVE AND GREENHOUSE FLOWERING PLANTS.

By BENJAMIN S. WILLIAMS, Author of "Select Ferns and Lycopods," "The Orchid Grower's Manual," &c. &c.

This Work is intended for the use of Amateurs and Gardeners, and will contain descriptions of the best and most desirable Flowering Plants for the decoration of the Stove, Greenhouse, and Conservatory during Spring, Summer, Autumn, and Winter, together with their native countries, times of blooming, instructions for potting, and their general cultivation. Published and Sold by the Author.

VICTORIA AND PARADISE NURSERIES, UPPER HOLLOWAY, LONDON, N.

Also,
SELECT FERNS and LYCOPODS. 8vo, cloth, price 5s.; post free, 5s. 5d.
THE ORCHID GROWER'S MANUAL. Third Edition. 8vo, cloth, price 5s.; post free, 5d.

Foreign.

FRANCE.—In the sitting of the Senate on Friday the same came on for discussion. M. de Lavalette, in the name of the Government, said that the French Government had come to no determination relative to the question of leaving Rome when the Pope was assured. The protocol on the railway question has received the signatures of M. de Lavalette and M. Frère Orban, and has been placed in the official Government papers both in Paris and Brussels. The mixed Commission will be composed of men specially selected for the purpose, and diplomatic personages or officials of the foreign countries will take part in it. Up to the present M. Franquille is the only member of the Commission appointed on the part of France. The Public Opinion is no truth in the rumour that France has commenced any negotiations either of a political or financial character with Mexico. The France contra a rumour that Russia has sent a despatch to Constantinople, protesting against the recent measures of the Porte relative to the laws of naturalisation. It is not of that nature on the part of Russia to be in flagrant contradiction with the reiterated declarations of the Cabinet of St. Petersburg, which have never ceased since the Conference to act in harmony with the other Powers on the Eastern question.

SPAIN.—In consequence of rumours of a Carlist movement in the north, Deputy Arquiaga, in the name of the Cortes on Saturday, asked whether the Government had taken precautionary measures against a revolutionary outbreak. The Minister of Justice replied that the partisans of Don Carlos and Queen Isabella were incessantly at work with the object of exciting about civil war. The Government, however, was not without energy, and one of the bands had been dispersed on Sunday by the troops in Asturias. In the morning a Volunteer of liberty was assassinated by the Carlists on Saturday morning, and a Colonel Lagunery had been wounded. The Minister stated that the Government could vouch for the fidelity of the Volunteers and Volunteers, and held the ordinary means sufficient for preventing a breach of the peace. If, however, necessity should require it, they would call upon the House to grant them extraordinary powers. Senor Figuerola, the Minister of Finance, said the fall in the funds was due to unfounded apprehensions. He promised to lay before the House the contract for the loan concluded abroad, and contradicted the rumour that bonds given as security by former Governments had been recently thrown upon the market. These bonds, he said, would be redeemed. He, moreover, repeated that the half-yearly coupons would be paid, including those deposited in the Bank of Consignments, and said that the first instalment of the new loan would arrive on the next day. The Bill of Amnesty was then passed.

On the sitting of Monday the discussion of the paragraphs of the draught Constitution on the religious questions, which had been modified by the committee in a more liberal sense, was resumed. Deputy Pi y Suñer proposed the complete independence of Church and State. In the sitting of Tuesday the articles on the religious question were opposed by Deputy Capdepon. Admiral Topete protested against the doctrines promulgated by the Republican Deputies. Senor Sarrailh, Minister of the Interior, introduced a Bill authorising an English firm to lay a submarine cable between Portugal, Ferrol, and England. In the sitting of Wednesday Senor Vinader moved a resolution to the effect that the House had heard with satisfaction the declaration of Admiral Topete condemning the attitude of Senor Sunyer, a Republican deputy, with reference to the proposed Constitution. Admiral Topete opposed the motion, which, he said, would tend to restrict the freedom of the Deputies. He added that he should vote against it, and Marshal Serrano having made a similar announcement, the resolution was rejected by 119 to 20. The Cortes afterwards decided that from Friday sittings would regularly be held in the daytime and in the evening, with a view to abbreviate the debates on the Constitution. Senor Sarrailh then spoke on the religious question, and in the course of his speech stated that he had abandoned Catholicism for philosophy and reason. In the evening sitting on Wednesday, after a speech from Senor Gaxiola, in which he reviewed the debate on the religious question of the Constitution relating to religion, clause 20 was adopted by 178 votes to 75; and clause 21, concerning liberty of worship, was also agreed to by 178 votes to 40. As soon as the form of Government has been voted, Marshal Serrano will bring forward the question of the candidature to the Throne. A new Cabinet will then become necessary, in case the candidature should have been settled, or a dictatorship of three members should be formed. A Carlist conspiracy has been discovered at Barcelona, which has resulted in 30 persons being arrested. Several superior and commissioned officers, both on active service and on half-pay, are among the prisoners. Implicating documents have also been seized.

HOLLAND.—In the sitting of the Second Chamber on Wednesday the Minister of the Colonies, in reply to a question relative to the rumoured disturbances in Java, announced that the Government had received a telegram, in which, among other items, the following was stated:—At Bekasoi; troops were sent, disorder

BRITAIN.—In the sittings of the Chamber of Representatives on Friday, M. Frère Orban, in reply to M. de Brouckere, said that the negotiations with France had entered upon a phase most satisfactory for both countries, and the most sympathetic and cordial relations had been established. In the sitting of the Chamber of

Representatives on Tuesday, M. Coomans inquired of M. Bara, Minister of Justice, if there was any truth in the report of his resignation. M. Bara replied that he had no communication to make on the subject. The Budget of the Ministry of Justice for 1870 was adopted by 52 votes against 22. In reply to M. Dethoux, leader of the party of the Right, M. Frère Orban said that the Government had succeeded in their wish that their proposals should be taken into consideration, and they were likely to be accepted on purely economical grounds. They hoped, therefore, that the result arrived at would be found equally satisfactory by both countries. It has been proved by the evidence taken during the magisterial inquiry into the recent riots in the coal districts of Belgium that they originated from revolutionary rather than economical motives.

PRUSSIA.—In the sitting of the North German Parliament on Tuesday, in reply to an inquiry relative to the projected postal treaty with England, Herr von Philipborn, Director of the Postal Service, stated that the difference between the views of the British and North German Post Offices was solely connected with the high remuneration required by the Post Office of the North German Confederation for the carriage of closed parcels from England through the Federal territory to other countries. After the conclusion of necessary negotiations with the railway companies, the Government would make a communication to the British Government, and he hoped it would be attended with a satisfactory result. The assertion, that excessive demands on the part of the Southern States prevented the conclusion of the treaty, was unfounded.

TURKEY.—The project of admitting Christians into the army has been abandoned, owing to the serious loss the treasury would suffer by the abolition of the tax the Christian subjects of the Porte pay to be exonerated from military service. However, there is a project of forming a landwehr. The Cretan chiefs concerned in the late insurrection and sentenced to 15 years' imprisonment, were released from prison on Wednesday.

ITALY.—In the Italian Chamber of Deputies on Monday Signor Ferrari, the leader of the Piedmontese party, announced that it was the intention of his party to give its support to the Government, and he proposed an order of the day, consisting of three paragraphs. The first two—declaring that the Chamber was persuaded that the nation wished for the greatest union and concord in Parliament, in order to ensure the restoration of the finances to a sound condition, by strict economy, and a better organisation of taxation, and that the Chamber was convinced that the firm maintenance of these principles would ensure a natural and orderly development of constitutional liberty—were carried unanimously. The third, which stated that the Chamber, having heard the declaration of the Ministry, was confident that the Cabinet would conduct the public administration in that sense, was carried, on a division, by 168 to 20. It is expected that the support of the Ministry by the Piedmontese party will give Italy what she so much needs, a strong and stable Government. In the sitting of Tuesday General Menabrea and Count Cambray-Digny, in reply to a question of Signor Villa Tommasso, stated that the income-tax was deducted from the coupons of the Pontifical debt precisely in the same manner as from the other coupons of the Italian public debt. The semi-official *Correspondance Italienne* of Thursday denies that a special mission to the French and Italian Courts has been confided by the Spanish Government to Senor Montemar relative to a candidature of the Duke of Aosta to the throne of Spain. The same paper adds that the duke is not believed to have any ambition in that direction.

INDIA.—The Ameer of Affghanistan reached Jellalabad on the 28th ult. Authentic accounts state that Isha Khan, the son of Azim Khan, had been captured at the frontier.

UNITED STATES.—President Grant has notified to Mr. Motley, the newly-appointed Minister to England, that he expects him to be at his post in London, ready for duty, about the 1st June. In the Senate, on the 19th ult., Mr. Chandler offered a resolution to the effect that the President be directed to open negotiations with England for a settlement of all claims on the basis of a transfer of the British North American possessions to the United States. He declared that, as in the case of France with Mexico, Great Britain had staked the continuance of her empire in America on the success of the rebellion. The resolution was referred to the Committee on Foreign Relations. During the month of April the public debt of the United States has been decreased by six million and a quarter dollars.

BRAZILS AND PARAGUAY.—Count d'Eu, general in chief of the allied army, had left Rio for Paraguay. His appointment was cordially greeted by the allied Governments. Lopez was at Ascurra in the mountains, within reach of the allies; he was to be attacked in the beginning of April. Navigation and commerce of the rivers Paraguay and Parana were thoroughly free. The reported defeat of Brazilians on the Luque Railway by Paraguayan forces was completely false.

CUBA.—The latest intelligence received at New York from Havannah is favourable for the success of the Spanish arms, several bands of the Cuban insurgents having been compelled to surrender. The crew of the Mary Lowell have been liberated, but the Cuban authorities have refused to restore the vessel. The crew state that she was, at the time of her seizure by the Spaniards, within one mile of Ragged Island, and thus within British waters. The Government of the United States have called upon her Majesty's Government to demand from Spain the restitution of the vessel, and compensation to the owners and crew.

HAYTI.—Her Majesty's ships Doris and Jason had visited Hayti for a third time, to demand satisfaction for the insults offered to the British flag. Salvave

apologised, but Captain Aunesley informed him that the next time other reparations than apologies would be enforced.

Parliament.

IN the House of Lords on Friday, on the motion of Lord WESTBURY, the Fine Arts Copyright Consolidation (No 2) Bill was read a second time and referred to a select committee. On the motion of the Marquis of SALISBURY the Civil Service Pensions Bill was read a second time. Lord LIFFORD called attention to the speech of the Mayor of Cork at the late Fenian banquet in that city, and inquired what steps the Government contemplated in relation to it. Earl GRANVILLE said that the Government would take immediate steps to ascertain the accuracy of the words said to have been uttered by the Mayor of Cork, and if it were substantiated they would certainly not pass it over. The Marquis of BATH asked if it was the intention of the Government to adopt any measures, remedial or repressive, for the better protection of human life in Ireland, and called upon the Government to declare their general Irish policy, and particularly on land tenure. Earl GRANVILLE said that if they were now to introduce a reasonable measure on the land question it would be likely to cause more irritation than if they were to wait. The Government were doing their utmost to enforce the law; and were consulting with the Irish Executive as to the expediency of applying to Parliament for further powers. Lord CAIRNS said that if the Government were not satisfied with the powers they now had they should ask Parliament for larger powers, but the quartering of police, as the expense fell on the county cess, amounted to a fine on the family of a murdered landlord. Aftersome remarks by the Earl of KIMBERLEY, Earl GREY, the Earl of HARROWBY, the Marquis of CLANRICARDE, the Earl of CARNARVON, the Marquis of WESTMEATH, and the Earl of LEITCHAM, the subject dropped. On Monday Lord STRATFORD DE RED CLIFFE called attention to the negotiations between the British and Russian Governments as to the Turco-Persian boundary line, and expressed his opinion that the subject, which reopened in fact the Eastern question on the Persian frontier at the instigation of Russia, had not received the attention it deserved from this country and the Government. The Earl of CLARENDON said that the Government were quite alive to its importance. The Duke of SOMERSET asked if any arrangement had been made for replacing the three prelates of the Church in the south-western counties who had been for some time incapacitated by illness for the performance of their episcopal duties. The ARCHBISHOP of CANTERBURY said that as the House had last year declined to pass a measure to relieve disabled prelates from their duties, the Bishops of Exeter, Winchester, and Bath and Wells had been unable to retire, but they had taken such steps as were in their power to ensure the discharge of their duties. Communications had passed between the Government and himself with reference to a Bill which it was intended to introduce on the subject. After some remarks by Lord LYTTLETON, the Bishop of ST. DAVID'S, and the Duke of CLEVELAND, Earl GRANVILLE explained that the proposed Bill would be framed simply to meet the case of a Bishop incapacitated by infirmities. On Tuesday in reply to the Earl of STRATHMORE, Earl GRANVILLE stated that notice had been already given in the other House of a Bill which would apply to the case of the Mayor of Cork. In Committee on the Sea Birds Preservation Bill the Duke of RICHMOND moved an amendment to confine the prohibition to shooting the birds. The Archbishop of YORK and the Duke of NORTHUMBERLAND opposed the amendment, which was not pressed. The Duke of RICHMOND moved the rejection of the clause making it a penal offence to be found in possession of the eggs of birds intended to be protected, to which the Bishop of OXFORD and Lord HOUGHTON also objected in the interest of scientific collectors. On a division, the clause was struck out by 51 to 10, and the Bill finally passed through Committee. The Civil Service Pensions Bill also passed through Committee. On the motion for the third reading of the Militia Bill, Earl GREY advocated an increase of the regular army in preference to depending upon militia and reserves. Lord NORTHBROOK described at some length the services rendered by the militia, and assured the House that the country had never been in a better position of defence than it was at the present moment. The Duke of NORTHUMBERLAND and Lord DE ROS also defended the militia. The Bill was then read a third time and passed. The Earl of ALBEMARLE brought in a Bill to abolish the property qualification of justices of the peace, which was read a first time. On Thursday, being Ascension Day, the House did not sit. Yesterday the Reformatory Schools Amendment Bill and the Industrial Schools Bill were withdrawn by the Marquis of SALISBURY, at the suggestion of the Government. The Marquis of SALISBURY called attention to the statements concerning the Irish land question made by Mr. Bright in the House of Commons. The House was left sitting.

IN the House of Commons on Friday Mr. GLADSTONE endeavoured to prevail on Mr. Graves to defer his motion on the condition of Ireland, by urging that Ministers were not in possession of the information which would admit of their entering upon a full discussion of the subject. Mr. GRAVES declined, under a strong sense of public duty, to yield to the appeal of the Premier, and proceeded to show that the feeling of uneasiness and insecurity both of life and property now existing in Ireland, had never been surpassed; that false hopes on the land question, which never could be realised, had been excited in the minds of the Irish peasantry, and that Mr. Gladstone, Mr. Bright,

and Mr. Bruce were not guiltless of fostering these delusions. Mr. C. FORTESCUE said that the recent agrarian outrages had nothing to do with politics, and that it was absurd to connect them with the speeches of Ministers, which came to nothing more than this, that the land question ought to be dealt with. Lord STANLEY said that the state of Ireland was exceedingly grave, and that there had been nothing for years past like the insecurity and uneasiness which prevailed. The liberation of the Fenians was, in his opinion, a mistake; and those who were responsible for it must be convinced that it was so, now that they saw how their clemency had been abused. He did not blame Ministers for not bringing in a land bill this session, for that he knew to be practically impossible; but the House had a right to expect, that they should make such a declaration of their views and principles as would satisfy the reasonable expectations of those who wanted a settlement on a basis of justice, whilst it dissipated the wild hopes of a particular class of the population. Lord CLAUD HAMILTON attributed to Mr. Bright's inflammatory speeches and letters the delusions which existed on the land and other questions. Mr. BRIGHT said that the cardinal point of his creed on the land question was that there could be no settlement of it until by some means (and he was prepared to propose the means) the population, without doing injustice to any one, was placed in larger numbers in possession of the soil of their own country. Next session this land question must be dealt with. He would never be a party to an act of repression unaccompanied by measures of a remedial and consoling character, and he would be no party to a land measure which he would not support if he were an Irish landlord. Lord J. MANNERS asked what the Irish people would say when they heard that Mr. Bright had a Land Bill in his pocket and would not produce it. Mr. GLADSTONE asserted that the condition of Ireland was to be traced to long years of misgovernment, and to that baneful religious ascendancy which Parliament was now endeavouring to extirpate. After some remarks by Sir T. BATESON, Mr. DOWSE, Mr. CONNOLLY, THE O'DONOGHUE, Mr. BRODRICK, Mr. MAGUIRE, Mr. G. HARDY, and other members, the subject dropped. The Stannaries Bill passed through Committee. Mr. GLYN moved the issue of a new writ for Yonghal. The motion was opposed by Mr. COLLINS, Mr. FAWCETT, Sir M. BEACH, and others. On a division of 32, the writ was ordered to be issued by a majority of 102 to 70. On Monday Mr. GLADSTONE announced, amid loud and general murmurs, that the Whitsuntide holiday would be shortened practically to a week, dating from Thursday or Friday week, according to the day on which the Irish Church Bill was reported. The Committee on the Bill was resumed at clause 30, which, as well as clause 31, was agreed to without amendment or comment. On clause 32, regulating the conditions for the sale of the tithe rentcharge to the landowners, Mr. FAWCETT moved as an amendment to omit all that part of the clause which relates to the redemption by instalments. After a discussion of several hours, the amendment was negatived without a division. Mr. FAWCETT then moved the omission of the clause. On a division the clause was carried by a majority of 148-181 to 33. Clause 33, after some discussion, was agreed to. Clause 34 was postponed. Clause 35 was agreed to. Clause 36, providing the compensation to the Presbyterian ministers, after some discussion on the precise amount of support given by the Irish Presbyterians to the Bill, was agreed to. Clause 37, providing the compensation to the Professors of the Belfast College by annuities, was struck out. Clause 38, relating to the commutation of the annuities, was agreed to. On Tuesday, at the first morning sitting of the session, the ATTORNEY-GENERAL stated that the Government had ascertained beyond a doubt that what he called the "deplorable language" attributed to the Mayor of Cork had been actually used by him, and that it was his intention immediately to bring in a Bill to disqualify him from holding any office in connection with the administration of the law in Cork or in Ireland. This communication was received with loud cheers from all parties, which were renewed when Mr. GLADSTONE added that he should ask the House on Wednesday to give precedence to the motion for introducing the proposed Bill. Mr. LOWE, in answer to Mr. CANDLISH, stated that by the latest accounts the total cost of the Abyssinian Expedition would be 8,700,000. Mr. GLADSTONE, in reply to a question relative to the Whitsun holidays, confessed that he had misapprehended the feeling of the House, and if the Irish Church Bill was reported on Thursday, the 13th, he was prepared to move the adjournment to that day fortnight, the 27th. The Marquis of HARTINGTON announced that in consequence of the unexpected opposition to the Post Office Savings Bank Bill, the Government intended to withdraw it. The House then went into Committee on the Irish Church Bill, resuming at the first of the Maynooth clauses repealing the Maynooth Act, "except the first three sections thereof" which relate to the constitution and powers of the Maynooth trustees. Mr. WHALLEY moved the omission of this exception, which, he contended, was not in accord with the speeches and pledges of the Liberal leaders last year. Mr. GLADSTONE denied emphatically that he had given any pledge to repeal the Maynooth Act. Mr. NEWDEGATE charged Mr. Whalley with having made the Maynooth question a laughing-stock, and with bringing the whole cause of Protestantism into disrepute. Mr. J. FEILDEN contended that both in the House and on the hustings Ministers had pledged themselves not to apply any portion of the property of the Church to the endowment of any other religious body. Sir J. PARKINGTON and Lord J. MANNERS supported the amendment, and after some remarks by Mr. C. FORTESCUE and other

members, the amendment was negatived by 324 to 196. Sir G. JENKINSON then moved to expunge that portion of the clause which provided that 11 times the annual payment to Maynooth should be appropriated in a lump sum to the College. After some discussion the debate was adjourned. Before the Chairman left the chair Mr. GLADSTONE announced the names of the Commissioners—Lord Monck, Mr. Justice Lawson, and Mr. G. A. Hamilton. At the evening sitting, Mr. HEADLAM submitted a resolution condemning as unworthy of a great nation our present practice of charging on home and foreign shipping the cost of lighting and buoying the shores of the United Kingdom. The motion was opposed by the CHANCELLOR of the EXCHEQUER and Mr. BRIGHT, and after some discussion it was withdrawn. On Wednesday, the orders of the day having been postponed for the purpose, the ATTORNEY-GENERAL for IRELAND moved for leave to bring in a Bill to deprive Mr. O'Sullivan of his office as Mayor of Cork, and to render him ineligible to act as a magistrate in that city or in any other place in Ireland. The measure was rendered necessary by the conduct of Mr. O'Sullivan on the bench, his publicly-expressed sympathy with the Fenians, his eulogiums of O'Farrell, who attempted the assassination of the Duke of Edinburgh in New South Wales, and of the Fenians engaged in the Manchester murder and the Clerkenwell outrage. It had been determined to proceed by a special Bill rather than by an *ex officio* information in the Court of Queen's Bench, because the latter course would have led to delay, whilst the introduction of a general measure, applying to all *ex officio* justices, for the offence of one man, would have been unreasonable and unjust. The precedent which the Government had decided upon following was the Act of George II., removing the Lord Provost of Edinburgh from his office, in consequence of neglecting to take the requisite precautions during the Porteous riots. Mr. BAGWELL and Mr. BOUVERIE expressed their opinion that it would have been wiser to have introduced a general rather than an exceptional measure. Sir F. HEYGATE said that the Government were responsible for having made the Bill necessary by releasing the Fenian convicts. Mr. G. H. MOORE, Mr. WALPOLE, Mr. HARCOURT, and Mr. NEWDEGATE recommended that evidence should be taken on oath, and that Mr. O'Sullivan himself should be heard. Sir J. GRAY deprecated undue haste, and Mr. MURPHY and Mr. MAGUIRE said that Mr. O'Sullivan was really not aware that he had used seditious language, and entirely repudiated having expressed sympathy with assassins. Mr. DISRAELI said that under the late Administration O'Sullivan had been dismissed from the county magistracy for seditious talk, but since that time a revolution had been commenced in Ireland, the gaols had been thrown open, assassins and traitors had been let loose, and the Mayor, therefore, might have believed that his profligate folly would not be reprobated. If the Attorney-General for Ireland had done his duty by prosecuting him, the House of Commons would not have been called on to consider this extraordinary proposal, though he could not refuse his assent to its introduction. No Bills of Pains and Penalties had ever been passed for spoken words, and Parliament had never been asked to pass such an unconstitutional measure on the *ipse dixit* of an Irish Attorney-General. After some remarks by Mr. C. FORTESCUE in defence of the policy of Government in exercising the clemency of the Crown towards certain selected Fenian convicts, Mr. GLADSTONE warmly defended the Attorney-General for Ireland from the contemptuous language of the leader of the Opposition, and said that he had never heard a personal taunt in that House more entirely out of place. Dr. BALL said that it was an alarming doctrine to convict and punish a man for a legal offence on unsworn testimony, and that the Bill should have been introduced in the Lords, where evidence could be taken on oath. After some remarks from the SOLICITOR-GENERAL, Mr. HENLEY, and Sir S. NORTHCOTE, Mr. BERESFORD HOPE, for the independent Conservatives below the gangway, expressed the regret they would feel if the front Opposition bench should seem to tamper with treason for the sake of a party triumph. Mr. HARDY and Lord J. MANNERS admitted that there was no complete remedy in law for the necessities of the case, and said that there was no disposition on the front bench to impede the Government in removing a crying and outrageous evil. After some further discussion the Bill was brought in and read a first time. Resolutions were also agreed to for the communication of the Bill to Mr. O'Sullivan and the production of evidence at the bar. Mr. CARNEGIE moved the second reading of the Bill for abolishing the Scotch law of hypothec. Lord ELCHO moved to delay its further consideration until a Committee of the House of Lords sitting on the subject had reported. Mr. GRAHAM supported the Bill, and Mr. CAMERON was speaking against it when the hour of adjournment arrived. On Thursday the House resumed, in Committee, the consideration of the 39th clause of the Irish Church Bill, providing compensation for the cessation of the grant to Maynooth, and Sir G. JENKINSON's amendment, which raised the question whether the compensation shall be paid out of the funds of the Irish Church or from the Consolidated Fund. Colonel BARTLELOT supported the amendment, and said that Mr. Gladstone, when in Opposition, had distinctly declared that no portion of the surplus property of the Irish Church was to be devoted to the endowment of Maynooth. Mr. GLADSTONE disclaimed having used any expression which could bear such an interpretation, and taunted the Opposition with endeavouring to make use of a popular religious prejudice to deprive Maynooth of all compensation, after having voted about 800,000*l.* to the Presbyterians without

objection. Sir J. D. ELPHINSTONE declared that he had been known in Scotland that Maynooth was endowed out of the plunder of the Church. The views of the late general election in that country have been very different. Mr. H. A. HERRING said that the Establishment was to be supported for its religious purpose. Mr. J. LOWTHER said that he would rather see every shilling of the property of the Church shovelled into St. George's Church, than any portion of it to Maynooth. Mr. W. J. WILSON expressed his willingness, upon certain terms, to support the compensation out of the Consolidated Fund. Mr. M'LAREN and the LORD-ADVOCATE, of Scotland, strongly objected to such a course. Mr. HEYGATE said he felt bound to support the amendment after the House had sanctioned the proposal of compensating the Presbyterians. Mr. BRIGHT denied that it was an Irish purpose to give the British tax-payer a charge of over 800,000*l.* Mr. BRIGHT predicted that if the amendment were carried Maynooth would get no compensation, and denounced it as a special manifestation of hostility to the Roman Catholics which distinguished the Conservative party. Mr. BRIGHT claimed for the Conservative party the credit of proposing an increase in the endowment to 1,000,000*l.* and expressed his willingness to give any other form, although not the form proposed, to the scheme of the Government as tantamount to an endowment. Mr. C. FORTESCUE replied by pointing out the historical fact that when Sir Robert Peel proposed to increase the grant to Maynooth, he was rejected by Mr. Disraeli. After some further discussion on a division the amendment of Sir G. Jenkinson was rejected by 318 to 192, being a majority of 126. Mr. AYTOUN next moved an amendment to substitute for the grant of a lump sum a grant compensating the individual life interests of the students. He maintained that the endowment constituted a re-endowment, and that the Roman Catholics were treated with exceptional favour. The amendment was supported by Major W. W. WYNDHAM, and Mr. WHALLEY. Mr. GLADSTONE opposed it, and said that it was not possible to deal directly with the Roman Catholics and students. He denied emphatically that Roman Catholics had been treated more favourably than the Episcopalians and Presbyterians. He said that as Trinity College must avowedly be supported with next year, its friends should be careful not to lay down principles which might then be applied against them. Sir S. NORTHCOTE, Mr. NEWDEGATE, and Lord C. HAMILTON supported the amendment. The SOLICITOR-GENERAL opposed it, Mr. BRIGHT being unable to obtain a hearing, moved to suspend the progress, and, pressing his motion to a division, was beaten by a majority of 170-343 to 173. The amendment was rejected by 107-305 to 198. The amendments by Sir G. Jenkinson and Mr. W. J. WILSON were subsequently withdrawn, and the clause agreed to. Rapid progress was subsequently made, clauses from 40 to 57 inclusive were agreed to, reaching clause 53, relating to enactments respecting vacant sees, the Chairman, on the motion of Mr. BRUCE, was directed to report progress. The Regulation Bill was read a second time. The motion of the ATTORNEY-GENERAL for leave to attend on Tuesday next, of certain witnesses in the matter of the Mayor of Cork, and the Attorney-General was authorised to appoint counsel to attend on the occasion. Yesterday the House again went into Committee on the Irish Church Bill, and agreed to the 58th clause, after an amendment by Mr. C. FORTESCUE enabling spiritual peers to sit in the House until 1871, had been negatived without a division. The 59th clause, providing that the surplus of the 59th clause, providing that the surplus of the 59th clause, applied to hospitals, reformatories, and asylums. Mr. PIM moved an amendment that it be applied to purchase glebes and build glebe houses for the poor and clergy of the Episcopal, Roman Catholic, and Presbyterian bodies. Mr. GLADSTONE opposed the amendment, which, after a long discussion, was withdrawn. Other amendments, relating to the application of a surplus, were withdrawn. The House was adjourned.

City Intelligence.

BANK RATE OF DISCOUNT.—The Bank of England on Thursday, raised their rate of discount from 4 per cent., at which it was fixed on April 1, to 4 1/2 per cent.

MONEY MARKET, FRIDAY.—BRITISH CONSOLS closed at 92 1/2 to 92 3/4 for Money, and 92 1/2 for Account; New and Reduced Three per Cent. Consols at 91 1/2; Exchequer Bills, par to 5s. pm. has been received at the Foreign Office from Mr H. A. Churchil, C.B., her Majesty's political agent and consul at Zanzibar, dated Zanzibar, Feb 19, 1869. Sir—I have the honour to report that Mr Heale, the gentleman who was at Brava, has lately written to me to say that he has been unable to learn anything respecting the...

RAINFALL MARRIAGE PORTION.—The portion of 100l left by Mr. Henry Raines, the brewer, to be drawn for on the 1st of May by girls of good character in St. George's East, has been this year unclaimed. Neither drawing nor wedding will take place this year.

EMIGRATION OF WOOLWICH WORKMEN.—On Friday morning another batch of men, women, and children left Woolwich for Portsmouth to join her Majesty's ship Serapis, for Canada. Their number was 140, and they assembled at Woolwich Arsenal station at eight o'clock.

FIRE IN MINCING LANE.—A destructive fire took place on Monday morning in Mincing Lane. It broke out in the warehouse of Messrs. Brookes & Tait, colonial brokers, which, together with the offices of other merchants, were almost entirely destroyed or much injured.

THE MERCHANTS COMPANY (LIMITED).—At the Mansion House on Friday Messrs. R. S. Lane, Horace Edward Chapman, and Frederick John Helbert-Holbert, three directors of the Merchants Company, again surrendered to their bail before the Lord Mayor on the charge of conspiracy.

CENSATION OF THE 'EXPRESS'.—The Express evening paper appeared for the last time on Friday. A brief farewell to its readers informed them that the publication of an evening newspaper being found inconsistent with the arrangements called for by the extending circulation of the Daily News, the Express would cease to appear after that evening.

THE ENGLISH JOINT STOCK BANK.—Mr Finney, general manager of this bank, charged with making false entries in the books, &c., with intent to defraud, underwent a second examination last week before the Lord Mayor. A considerable amount of evidence was taken, and the accused was again remanded on bail.

THE CENTRAL GAS COMPANY.—At the Court of Common Council on Friday a motion for inquiry into the responsibility of the Corporation in respect to the audit of the Great Central Gas Committee, in connection with the recent frauds of Mr. Higgs, was discussed. It appeared that under the Act of Parliament the Corporation had the duty imposed upon it of appointing auditors, which had been regularly done, but in such a way as to render that duty a mere form.

THE COBNHILL BURGLARY.—In 1865 an extensive burglary was effected on the premises of Mr. Walker, Cornhill. The thieves were brought to justice, and in the chest of one of them were found 59 watches, and 340l. in notes and gold. Among the property stolen were 70 sovereigns, and after the trial the Recorder ordered the 50 watches and 70l. out of the money found in the chest to be paid to Mr. Walker. His loss, however, was very much larger, and believing the whole of the cash to form part of the proceeds of his robbery, he applied for that also.

THE PUBLIC HEALTH.—The Registrar-General's Weekly Report states that in the week that ended on Saturday, May 1, 1692 births and 2955 deaths were registered in London and in 13 other large towns of the United Kingdom, being 21 per 1000 in London, 30 in Edinburgh, 23 in Dublin, 20 in Bristol, 19 in Birmingham, 25 in Liverpool, 27 in Manchester, 22 in Salford, 27 in Sheffield, 31 in Bradford, 22 in Leeds, 25 in Hull, 28 in Newcastle-upon-Tyne, and 31 in Glasgow. The rate in Vienna was 33 per 1000 during the week ending the 24th ult., and in Berlin 32 per 1000 during the seven days ending the 29th ult. In London the births of 1092 boys and 1073 girls, in all 2165 children,

were registered in the week. In the corresponding weeks of 10 years 1859-68, the average number, corrected for increase of population, was 2233. The deaths registered in London during the week were 1288. It was the 17th week of the year, and the average number for that week, corrected for increase of population, was 1459. The present return is, therefore, 171 below the estimated amount.

Provincial.

ALBURY.—On Friday night a fire broke out at Albury Park, the Surrey residence of the Duke of Northumberland, which for many months past has been undergoing extensive repairs. The house is furnished with electric bells, and one of these, acted upon by the fire, first gave warning of the danger to the housekeeper, who speedily aroused the other domestics. It was then found that the roof of the south front was on fire, and that the flames were rapidly spreading. Assistance was promptly rendered by persons in the neighbourhood, and a good supply of water being obtained from a reservoir near the house, great exertions were made to subdue the fire. The Guildford Volunteer Fire Brigade, accompanied by their superintendent, speedily arrived with a powerful engine, but found that the fire had been got under by the exertions of those on the spot, though not before a great portion of the roof had been destroyed, and several rooms, recently rebuilt and finished at great cost, had been much damaged by fire and water. The Duke, who was staying at Northumberland House, was apprised by telegraph of the occurrence, and, accompanied by the Duchess and Lord Percy, arrived at Albury at 4 o'clock on Saturday morning, by special train, but all danger of a further outbreak or extension of the fire then appeared to be at an end. Another fire, however, broke out on Saturday night. The house watchman was going his rounds about 12 o'clock, when he heard a peculiar crackling noise, and on searching for its cause discovered that a bedroom filled with costly furniture was on fire. He immediately gave an alarm, and all the available assistance on the estate was promptly rendered. The Duke and his son, Lord Percy, took an energetic share in endeavouring to save the house from destruction. The Guildford Brigade, which had left early in the morning, under the supposition that all danger was over, was again summoned. Although greatly fatigued from their exertions of the previous night, the firemen, with their superintendent, were on their way to Albury with an engine in less than 20 minutes. On reaching the house they found the fire nearly subdued by those on the spot. They, however, made use of their engine to pump a supply of water into a reservoir, and also removed furniture from different parts of the house. Fortunately, the fire raged for only a short time, the building being for the most part fire-proof. A bed and a chest of drawers were consumed, and the apartment was charred and blackened by the action of the smoke. This second fire occurred in a different part of the building from that which was the scene of the first outbreak, with which it was in no way connected. This circumstance, coupled with the fact of a recent fire at Northumberland House, and another at Alnwick Castle, has induced a general belief that all these fires must have been the work of an incendiary.

BANGOR.—Mr. Eccles, chief detective of the London and North-Western Railway, assisted by the local Superintendent of Police, has discovered a nest of robberies which is likely to relieve the railway company of much anxiety for the future. Through Bangor pass much valuable goods from England to Dublin, and as several trains have to remain there for hours, it is of the greatest importance that the railway officials at that station should be honest. It has been found that a young man named Wilson, employed at the station, has been concerned in a series of railway robberies, and that a hitherto respectable tradesman of Bangor named Hughes has been an accomplice. The floors of his residence, within 50 yards of the Bangor station, were found last week to be receptacles of valuable property, consisting of gold and silver watches, to the value of several hundred pounds, watchguards of every description, ladies' and gentlemen's gold and silver articles of fancy; in fact, from the uppermost storey to the lowest basement the floors were found to be one great *entrepôt* of gold and silver articles, the result of several robberies. Among the articles found were portions of a box sent by Mr. Aronson, of Bangor, to Southampton, for exportation to Australia, containing nearly 6000l. worth of property, as follows:—Six gold hunting watches, 12 silver hunting watches with enamelled dials, 24 silver watches, plate glass enamelled dials, 29 silver hunting watches—all Geneva; 36 hunting watches, five gold hunting watches, a very small gold hunting watch—all gentlemen's watches; 13 gold hunting watches for ladies, 25 gold watchguards for the neck, 36 silver chains, 45 foreign made neck ornaments. The box also contained Hebrew and English prayer-books expensively bound in gold. The box was of wood, inlaid with tin, securely fastened, and weighed 60 lb. Mr. Aronson some time ago lost another box, containing various gold and silver articles, which he had sent to Birmingham for alteration and repairs. Among the result of the robberies were found pieces of coin of James I. and James II., spade guineas of George I., half-guinea piece, seals, &c., the property of Archdeacon Wynne Jones, Anglesey. The police are prosecuting their inquiries further both in Hughes' and Wilson's residences. Hughes, his wife, and Wilson have been lodged in the county gaol to await further investigation. It is alleged that Hughes' wife was in Paris at the time of Aronson's robbery.

BIRMINGHAM.—At the meeting of the board of guardians on Wednesday, an application was received from the Roman Catholic minister for permis-

sion for nuns to visit the workhouse to instruct the Roman Catholic children and read to the Roman Catholic patients. There are about 500 Roman Catholics in the workhouse. The general purposes committee had resolved, by a majority of 13 to 3, to recommend the board to grant the application. It was, however, rejected by a majority of 22 to 14.

BOLTON.—On Tuesday evening, at a circus performance in this town, the female Blondin was crossing a rope 60 feet high when she missed her footing. She fell, grasped the rope with her hands, and was afterwards caught by the crowd below. Ten thousand persons witnessed the spectacle amid intense excitement. She escaped with little injury.

CAMELFORD.—The adjourned inquest on the persons killed in the late accident at the Delabole slate quarries was held on Friday, before the county coroner. Among the witnesses examined was Captain Williams, of Charlestown United Mines, who had inspected the quarry since the accident. He stated that in his opinion the catastrophe occurred through faults in the stratification of the rock. He did not consider that any blame was attributable to the managers. The jury took this view of the case, and returned a verdict accordingly. It was stated that the mode of working the quarry is to be altered.

ISLE OF MAN.—On Monday night the weather at Douglas became so boisterous that it was feared Prince Arthur would not proceed on his voyage to this island, and messengers were frequently sent to Peel at an early hour on Tuesday morning to ascertain the state of the harbour at the east of the island, as landing at Douglas was quite out of the question. The governor set out in the *Snaefell* at 5 A.M., to look for the *Vivid*, intending to bring the Royal yacht to the breakwater at Port Erin for the landing; and, accordingly, at half-past 1 o'clock the *Vivid* steamed into port and the Prince disembarked. His Royal Highness met with a hearty reception from a large number of spectators, who had congregated at every available spot. The weather cleared up at the time, and the Prince, accompanied by the governor, went to Castletown, and thence to Douglas, where he was greeted with the greatest enthusiasm. There was a ball in the Castle Mona Hotel at night, and the town was illuminated. On Wednesday the Prince left for Liverpool. It was the intention of his Royal Highness to have left on Tuesday evening, but the roughness of the weather induced him to prolong his stay in the island, where he was most loyally and enthusiastically received.

LEAMINGTON.—Lord Somerville, who unexpectedly succeeded to the title in November last, in consequence of the death of his cousin from an accident in the hunting field, has just arrived in England from Australia, in which colony he has resided for several years.

MANCHESTER.—The Home Secretary has appointed Mr. Francis J. Headlam, of the Northern Circuit, to be the stipendiary magistrate for Manchester.

MERTHYR.—The Government have offered a reward of 1000l. to any person who will give such information as may lead to the conviction of the murderer, and a free pardon to any accomplice who will divulge the facts connected with the recent murder near this town. The police have not yet obtained the slightest clue to the murderer.

NEWCASTLE-ON-TYNE.—Mr. Rupert Kettle, county court judge, has succeeded in arbitrating between the masters and men in the north of England iron trade. The result was a small advance in the rate of payment of the workmen, which was to come into operation on Monday. The decision has been accepted by the Board of Arbitration and Conciliation, composed of both masters and workmen, who on Saturday passed the following resolution:—

"This board desires to record its sense of the great services rendered by Mr. Kettle to the manufactured iron trade of the north of England by his able and impartial investigation of the important question submitted to him, and by the suggestions and guidance which have led to an amicable adjustment of the matter."

TADCASTRE.—Bramham College for Dissenters, near this town, has been suffering seriously from the ravages of typhus fever. Numbers of the pupils are "down" from the disease, and two Leeds youths who were being educated there have died from it. The cause of this sickness is said to be the accidental percolation of deleterious matter through the earth into the well from whence water was drawn for drinking purposes in the college. There are about 100 pupils belonging to the college, of whom no fewer than 40 have suffered from fever, and four have died. The college is at present closed; but it is expected to be re-opened shortly.

THETFORD.—The Maharajah Dhuleep Singh has been adding considerably to a noble collection of rare and foreign birds which he has formed at his seat at Elveden. He has also been forming a menagerie, and a herd of antelopes has just been added to it. A member of the Barr family is still with the Maharajah as falconer.

TREURO.—The continued emigration of miners from Cornwall threatens to affect the future working of the mines in the county. Week after week for some time the exodus has been so considerable, that labour is now becoming scarce. The emigrants, for the past month or so, have consisted of miners in employment, but who have been much dissatisfied with the rate of wages; and there appears to be a growing feeling, among those engaged in the tin mines especially, that, considering the great improvement in the price of tin, they ought to have some share of the profits, whereas their wages have not been improved. Another inducement for the Cornish miners to emigrate is the reported prosperity of mining in Australia and America.

YORK.—The Government Bill before the House of Commons proposes to enact that at and after the next appointment of sheriffs, there shall be a sheriff for

West Yorkshire, consisting of the West Riding, the East Riding, and the West Riding, but is annexed to the West Riding, for the purpose of the election of members of the sheriff for that Riding, is, for all purposes of such election, to be within the jurisdiction of the sheriff of East Yorkshire alone, and be deemed to be his county. The castle of York may continue to be used as a prison for East Yorkshire and West Yorkshire.

Ireland.

PRINCE ARTHUR visited Belfast on Saturday, received an address from the Corporation of Queen's College, and received another address from the Corporation of the City of Belfast. He met with an enthusiastic reception at the Royal Highness visited the Brookfield Hotel at Belfast, dined at the Imperial Hotel, and the ball at the Ulster Hall in the evening. The Prince went on board the *Vivid*, and immediately left for the Isle of Man.

PROCLAMATION OF DERRY.—The city of Derry has been "proclaimed," in consequence of the Lord Lieutenant's proclamation, issued under the operation of the Peace Preservation Act, which appeared in an *Extra Gazette* of Saturday. The persons killed in the riot, in a verdict, after three hours' deliberation, were found to have been killed by the constabulary. The authorities were blamed for insufficient precautions for the preservation of peace. The constabulary, who received no treatment during the evening, were censured without warning on the crowd. An open return relative to the death of Craig.

THE MAYOR OF CORK.—At the week meeting of the Town Council on Friday Alderman Lyons suggested the Mayor in reference to the words about O'Farrell at the recent banquet. He repudiated the right of anybody, except the Mayor, to call him to account, but said he meant to convey that O'Farrell may have been a pure, high-minded, and honourable man. He did not know, but he durst say he was so. He repudiated any sympathy with assassination, and would not deny the possession of honourable motives by any countryman, not even to the men hanged at Chester, or to Barrett, the supposed author of the Clerkenwell explosion. Alderman Lyons said the Mayor repudiated the report of his speech in the possible way he could not continue to sit on the public board. After a warm discussion the meeting adjourned, deferring any further action pending the meeting of the Government. On Saturday, at the police Bench refused to acknowledge the Mayor's charge-sheet, and he refused to take it by force. A riotous uproar ensued, and the sheet was torn in pieces. The Mayor said he would get all the magistrates suspended, and a paid barrister appointed. In the evening a large meeting of the city magistrates, presided by Lord Fermoy, lord-lieutenant of the county, passed a unanimous resolution, representing the dangerous conduct of the Mayor, and requesting the Government to take immediate proceedings for the life and property, and to appease the now existing insecurity. On Sunday a large open-air meeting was held in the Park, to express sympathy with the Mayor, and about 2000 young men marched to it in a procession with band and colours. Two resolutions were passed, expressing confidence in the Mayor and his "persecutors." Placards were posted in the city, and Alderman Lyons as a traitor, spy, and infidel. At night the Mayor addressed a meeting in Messrs. Gladstone and Bright's Theatre, burnt in honour of the Mayor, and there were rejoicings. On Monday morning the Mayor appeared at the police-court at half-past nine o'clock, at the usual hour, and, in the absence of the Mayor, were the prosecutors, discharged the Mayor and his friends were in custody for drunkenness. During the night Alderman Lyons received a letter through the post, informing him that his opposition to the Mayor had brought upon him a decree that he should be taken to the public streets before the 15th of the month, and warning him of the fate of Bradshaw, who was executed for the same offence. On Thursday the Mayor served personally in Dublin with a copy of the Bill and the notice of the order for the second reading. He returned to Cork yesterday and discharged the persons imprisoned for drunkenness and disorderly conduct. A meeting in his favour is to be held tomorrow, and the Town Council have resolved to support the Removal Bill as unconstitutional by the bar of the House. The Mayor has announced himself a candidate for Youghal.

ROBBERY OF ARMS AT CORK.—On Saturday night, while the family were at church, Mr. John Paul, in Dean Street, was robbed of three burglars, who, having opened the door with a latch key, entered with revolvers in their hands. They threatened the female servant, and searched the house, carried off a seven-barrelled revolver and a double-barrelled pistol. Eugene Ferris was arrested at Cork on Monday night, on suspicion of being concerned in the robbery, but was surrounded by a crowd in the street, effected his escape in the confusion, breaking the handcuffs. On Tuesday, at midnight, a party of men entered the premises of Mr. Cooney, in Cork, and presenting revolvers, terrified the occupants, charge into giving them the keys. They then searched several other boxes with the same address, and

A ...named Horan, living about 10 miles from Ennis, ...at and wounded by another farmer named ...Kean, because he proposed to hand over to his son- ...a portion of unclaimed bog which had been in ...Kean's possession. M'Kean has absconded.—A ...outrage occurred near Virginia, Co. Cavan, ...on Tuesday night. As Mr. Hugh Brady, agent to Dr. ...atpatrick, of London, was returning home, accom- ...panied by two friends, he was fired at, and severely ...wounded. He fell to the ground insensible, but hopes ...to be recovered that his life may be saved. No clue to ...the perpetrator of the outrage has been obtained.

ROBBERY OF FIREARMS AT BELFAST.—A ...number of firearms recently stolen from the ...possession of Mr. O'Neil, in Belfast, were recovered ...on Saturday, through a boy having presented one of ...the pistols for pawn at a pawn-shop. A constable was at ...the time inquiring in the shop for other stolen prop- ...erty, and took the boy into custody. He endeavoured ...to escape, but was recaptured, and a search in his ...house discovered the weapons concealed under ...the floor of a room.

ROBBERY OF ARMS IN CORK.—Three ...men were arrested on Wednesday morning on a charge ...of taking a revolver from Professor O'Leary, of ...St. John's College, Cork, on Sunday evening.

ROBBERY OF A RIBBON LODGE.—The police on ...Saturday entered a house in Mullingar, where they ...discovered a Ribbon Lodge met. They discovered ...the documents and arrested one man, but the ...others escaped.

THE DERBY RIOTS.—Information has been sworn ...by William Murphy, one of the persons wounded in ...the Derby riots, in which he positively identifies an ...apprentice-boy named Barker as having fired the ...shot by which Craig was killed. Barker has been ...sentenced to jail.

THE DROGHEDA ELECTION RIOTS.—The trial of ...Private Rumble, 9th Regiment, for the manslaughter ...of James Woods during the election riots at Drogheda ...on Wednesday 20, took place on Thursday in the ...County Bench. A party of the 9th Regiment, with ...hussars, while escorting a body of ...electors, were violently attacked by a ...party of many of the soldiers and voters severely ...wounded. Two shots were fired by the soldiers without ...effect, one of which killed Woods. Private Bonello ...the traverser were originally arrested, but Bonello ...was discharged and Rumble sent for trial. He was ...sentenced by Mr. J. Butt. The evidence was conflicting, ...and the outrageous conduct of the mob was clearly ...proved by several witnesses. After five minutes' con- ...sideration the jury returned a verdict of acquittal.

SEVERAL CARRIAGES. Several passengers were seriously ...injured. Mr. Nimmo, a guard on the Great Northern, ...had a fractured leg and other injuries; his son had an ...arm and leg broken, and Mr. John Easton, clerk in the ...City of Glasgow Bank, sustained a compound fracture ...of the left leg, from the effects of which he died on ...Monday at York. The guard of the train was also ...seriously injured.

ACCIDENT ON THE GLASGOW AND SOUTH-WEST- ...ERN.—On Saturday morning, while a goods-train ...was shunting at the Greta Green Station, it ran off ...the line. Before it could be got back again, a pas- ...senger-train from Carlisle came up, and dashed into ...it, splitting several of the wagons to pieces. The ...passengers, although much shaken, were not seriously ...injured, but the engine and tender rolled down the ...embankment, and overturned. The engine-man and ...fireman escaped without injury. The fireman was ...found lying among the coals of the overturned tender, ...apparently very little the worse for his fall.

ATTEMPT TO UPSET TRAINS.—A reward of 10l ...has been offered by the North-Eastern Company, at Hartle- ...pool, for the detection of some person or persons who, ...on Friday last, placed a large stone on the connecting ...line between the towns, by which a passenger train ...narrowly escaped being thrown off the rails into Mid- ...dleton Slake. At the Shire Hall, Nottingham, on ...Saturday, two boys, named Morson, 13, and Bryan, 9 ...years of age, were charged with placing two chairs on ...the railway at Sutton Bonington, thereby endangering ...the safety of the trains. On Friday morning the driver ...of a train passing Sutton Bonington saw a chair on the ...line, and stopped the engine to take it off. On the ...evening of the same day another train was obstructed ...by something which was afterwards found to be a ..."chair." The prisoners, who had been seen near the ...line during the day, were suspected and subsequently ...apprehended, and, after some hesitation, they said they ...were guilty. In reply to the magistrate, the younger ...prisoner said his companion had threatened to "clink ...his ear-hole" if he did not put one of the "chairs" ...on the line. They were both committed for trial.— ...Joseph Lane, a beer-shop keeper in Sheepcote Lane, ...Battersea, was again brought up last week at Wand- ...sworth police-station, on the charge of having placed ...sleepers on the South-Western line, near Clapham ...Junction. The magistrate, after hearing all the ...evidence, said he did not think the defendant had ...anything to do with placing the sleepers on the line, ...but the charge of trespassing had been clearly proved. ...He fined the defendant 20s.

ATTEMPT TO AN EXPRESS ON THE NORTH- ...WESTERN.—On Sunday morning the Scotch express ...was derailed at Thirk station, smashing

several carriages. Several passengers were seriously ...injured. Mr. Nimmo, a guard on the Great Northern, ...had a fractured leg and other injuries; his son had an ...arm and leg broken, and Mr. John Easton, clerk in the ...City of Glasgow Bank, sustained a compound fracture ...of the left leg, from the effects of which he died on ...Monday at York. The guard of the train was also ...seriously injured.

Obituary.

THE DOWAGER LADY HENLEY died on Friday at Brighton, ...in her 67th year. She was the youngest and last surviving ...daughter of Sir Robert Peel, the first baronet, and sister of the ...late Right Hon. Sir Robert Peel, Bart., the Right Hon. ...William Yates Peel, General Peel, and the Very Rev. J. Peel, ...Dean of Worcester. She married, in 1823, the second Baron ...Henley, in the Peerage of Ireland, by whom she had two sons, ...both of whom are living, Lord Henley, M.P. for Northampton, ...and the Hon. and Rev. Robert Henley, perpetual curate of ...Putney.

THE ARCHDEACON OF CANTERBURY (the Venorable J. Croft, ...M.A.) died on Monday, at the age of 85. He was one of the ...oldest clergymen in England. He was educated at St. John's ...College, Cambridge, where he took his B.A. degree in 1807. ...He had among his college contemporaries Sir Frederic Pollock, ...the late Lord Chief Baron of the Exchequer, who was senior ...wrangler in the year before Mr. Croft came out. Mr. Bicker- ...steth, afterwards Lord Langdale Master of the Rolls, who was ...senior wrangler in the following year. Mr. Blinfield, after- ...wards Bishop of London, being the third, and Mr. Altham, ...afterwards a Baron of the Exchequer, who was senior wrangler ...in 1809. In 1812, almost immediately after his ordination, he ...was presented by Archbishop Manners Sutton, whose daughter ...he had married, to the rectory of Saltwood, worth about 800l ...a year; and in 1818 the same private presented him to the ...rectory of Cuffe at Haslemere, near Reigate, which is returned ...in the Clergy List as being worth 1,200l a year. In 1822 he ...was presented by the same private to a canonical residentiary in ...Canterbury Cathedral, worth 1,000l a year, with the Arch- ...deaconry of Canterbury annexed, the archdeaconry itself being ...of comparatively small value.

SIR EDWARD ROBERT WETHERALL, Secretary for Ireland, ...died suddenly on Tuesday evening, from disease of the heart, ...at his official residence in Phoenix Park. He was the son of ...the late Sir George Augustus Wetherall, G.C.B., Governor of ...Sandhurst and grandson of General Sir Frederick Wetherall, ...G.C.H., both of whom had distinguished themselves in active ...service. He was educated in early life at the Naval and ...Military Academy in Edinburgh, and afterwards went to ...Sandhurst. He entered the army in 1834, and was for some ...years in the Scots Fusilier Guards, of which he became ...lieutenant-colonel. From 1857 to 1859 he served in Canada, ...and was present at the actions of St. Charles, St. Eustache, ...and Pointe Oliviere. He was shipwrecked with the Royal ...Regiment, in the transport *Prinier*. He served in the 3d ...Cavalry in the Crimea as assistant quartermaster-general at ...headquarters, and was present at the battles of the Alma, ...Balaclava, and Inkerman, and the siege and fall of Sebastopol. ...He also served at Kerch as deputy quartermaster-general of ...the Turkish Contingent. Subsequently he was charged with ...the reorganisation of the Land Transport Corps, being ap- ...pointed director-general of that force. For his services in the ...Crimea he was nominated a Companion of the Bath, was made ...a Knight of the Legion of Honour by the Emperor Napoleon ...III., and received the order of the Medjide and Turkish ...medal, with a medal and four clasps. He was subsequently ...attached to the staff in India, and served as deputy quar- ...termaster-general to the forces in China in 1867. In the same ...year he returned to India, in consequence of the mutiny, and ...was appointed chief of the staff of the Central India Field Force, ...commanded by General Sir Hugh Rose (now Lord Strathnairn). ...He was present in the actions at Koonah, Muttra, Golowlee, ...where his horse was shot under him, and at Calpee. He com- ...manded the South India Field Force in the campaign of 1858, ...and the troops at the attack and capture of the entrenched ...camp of Rumpora Kassa, and in all the subsequent operations ...of the campaign. For his services in the field he was made an ...aide-de-camp to the Queen, and was subsequently appointed ...chief of the staff in North America, and after serving the usual ...period returned home. He was also nominated a Knight ...Commander of the star of India. Just before Mr. Durnell ...retired from office Sir Edward Wetherall was appointed Under ...Secretary for Ireland, on the resignation of Sir T. A. Larcum. ...He married in 1847 the daughter of the late Mr. John Dunne, ...of Astley Hall, Lancashire.

WILLIAM.—The will of Field Marshal Viscount George late of ...St. Helen's, Booterstown, Dublin, has been sworn under ...11,000l. personalty in Ireland, and 7,000l. in England, being ...together under 40,000l. Sir John Thomas Hulseon Selwin, ...Bart., of Down Hall, near Harlow, Essex, 45,000l. Sir John ...Hadley D'Oyly, Bart., of Stapleton House, Blandford, 25,000l.

DEATH.—On the 7th inst., in his 74th year, SAMUEL ...STAFFORD, Nurseryman, Hyde, Manchester.

Markets.

COVENT GARDEN.—May 15. Demand and supply are about balanced, the cold wind ...having somewhat interfered with the latter. Flowers consist ...of Orchids, Lily of the Valley, Fuchsias, Wallflowers, Polyan- ...thuses, German Stocks, Spiraea japonica, Pelargoniums, Erica, ...Cavendishiana, Hydrangeas, shrubby Calceolarias, Roses, ...Azaleas, Pansies, Narcissus, and Ranunculuses.

Table with 2 columns: Fruit and Price. Includes Apples, Figs, Grapes, Kent Cobs, Lemons, Melons, Nectarines, Oranges, Peaches, Pears, Pine-apples, Strawberries.

Table with 2 columns: Vegetables and Price. Includes Artichokes, Beans, Broad, Beet, Carrots, Cauliflowers, Celery, Cucumbers, Endive, Garlic and Shallots, Herbs, Horse Radish, Lettuces, Mint, Mushrooms, Onions, Parsnips, Potatoes, Turnips.

ENGLISH WOOL. Trade has been very quiet, with no present symptoms of ...revival, and the large quantity of colonial wool (230,000 bales) ...now offering at public auction in London, and selling at very ...low prices, tends to increase the general discouragement.

Table with 3 columns: Current Prices of English Wool, per lb.—s. d. a. d. Includes Fleeces—Southdown hoggets, Half bred ditto, Kent Fleeces, Southdown ewes and wethers, Leicester ditto, Sorts—Clothing, Combing.

HAY.—Per Load of 26 Trusses. SMITHFIELD, Thursday, May 13.

Table with 2 columns: Hay and Price. Includes Best Green Hay, Prime Meadow Hay, Inferior do., New do., Straw, Clover, Prime new Clover, Inferior do.

CUMBERLAND MARKET, Thursday, May 13. Superior New Hay 114s to 120s, Inferior do. 90 to 105, New do. 85 to 90, Superior Clover 120 to 128.

LEADENHALL POULTRY, &c. THURSDAY, May 13. The poultry market has been excellently supplied during ...the past week with everything but buyers; the growth of the ...young spring poultry is very rapid and satisfactory. Trade ...very dull and heavy.

Table with 2 columns: Poultry and Price. Includes Geese, Goslings, Turkeys, Turkey pullets, Ducks, Ducklings, Surrey Fowls couple, Do chickens, Barred Poultry, Lovelocks, Pigeons, Tame Rabbits, Wild Rabbits, Wild Ducks, Pheasants, Hares, Plovers, English Eggs, Foreign do., Fresh Butter, Eggs.

HOPS.—BURGESS MARKET, May 14. Messrs. Patten & Smith report the market steady at ...late rates, the demand being good for the time of year.

METROPOLITAN CATTLE MARKET. MONDAY, MAY 13. We have a large increase in the supply of beasts, and con- ...sequently prices are rather lower for all descriptions. There ...is, however, a fair trade doing, and certain qualities still ...realise high rates. Sheep are also more plentiful, and ...trade is not so brisk as of late; a pretty good clearance is ...effected at our quotations. Calves and lambs are rather ...lower than on Thursday. Our foreign supply consists of 3134 ...Beasts, 12,910 Sheep, 108 Calves, and 5 Pigs, from Scotland ...there are 100 Beasts; from Ireland, 80; from Norfolk and ...Suffolk, 900; and 400 from the Midland and Home Counties.

Table with 2 columns: Cattle and Price. Includes Best Scots, Herefords, Best Shorthorns, 2d quality Beasts, Best Downs and Half-breds, Do Shorn, Best Long-wools, Do Shorn, Fwes & 2 1/2 quality, Do Shorn, Lambs, Calves, Pigs.

THURSDAY, May 13. The supply of Beasts is small, and consequently Monday's ...quotations are pretty well maintained, although trade is by ...no means brisk. Sheep are more plentiful, the demand is, ...however, good, and prices are not much altered for best ...qualities. Lambs are selling lower, and several lots remain ...unsold. Trade is dull for Calves at our quotations. Our foreign ...supply consists of 546 Beasts, 4230 Sheep, 303 Calves, and ...80 Pigs.

Table with 2 columns: Cattle and Price. Includes Best Scots, Herefords, Best Shorthorns, 2d quality Beasts, Best Downs and Half-breds, Do Shorn, Best Long-wools, Do Shorn, Fwes & 2 1/2 quality, Do Shorn, Lambs, Calves, Pigs.

METROPOLITAN MEAT MARKET.—May 15. Best Fresh Butter 14s per dozen lb., Second do do. 12s, Small Pork, 5s. 6d. to 5s. 8d.; Large Pork, 3s. 6d. to 4s. 6d. per 8 lb.

POTATOS.—SOUTHWARK, Monday, May 10.

During the past week the arrivals coastwise, by rail, and from abroad have been more than equal to the demand. The trade continues in the same languid state. Quotations—York Regents, per ton, 50s. to 90s.; do. Flukes, 50s. to 120s.; Lincolnshire Regents, 50s. to 80s.; Dunbar and East Lothian do., 60s. to 110s.; Perth, Forfar, and Fifo do., 5s. to 70s.; do. Rocks, 40s. to 50s.; French and Belgian whites, 35s. to 50s.

MARK LANE.—MONDAY, May 10.

There was a moderate supply of Wheat from Essex and Kent to this morning's market, which was cleared at the extreme prices of this day so'nnight. The attendance was fair, but there was little disposition to purchase foreign; the sales made, however, were mostly at an advance of 1s. per qr. Grinding Barley was 6d. to 1s. per qr. dearer. Beans and Peas were unchanged in value. Oats sold at an advance of 6d. to 1s. per qr. Flour was firm, but inactive.

FRIDAY, May 14.

Much rain has fallen during the past week, the temperature being at times low for the season. A few complaints have been heard respecting the Wheat plant on heavy land, but it is too early to attach much weight to them. The Wheat trade since the 7th inst. has been under the influence of the weather, and we have to report that the buoyant feeling which manifested itself during the first few days of the past week has not been maintained, the advance then quoted being in some instances lost again, although farmers appeared inclined to hold back their supplies. Barley and Oats have met with increased attention at a slight advance. In the value of Beans, Peas, or Maize we have noticed no improvement. Flour has been a slow sale at former prices. The arrivals off the coast this week consisted of 66 cargoes, of which, with those left over from last week, there remained for sale last night 43 cargoes. At the beginning of the week 6d. to 1s. per qr. better prices were paid for Wheat arrived off the coast, but the improvement has been lost again. The value of Maize as well as Barley fluctuated slightly during the week, the trade closing dull. Rye was steady in value. In cargoes on passage and for forward shipment transactions were extremely limited, excepting in Maize and some hard Wheat, which latter was taken for Spain, but otherwise nothing of moment occurred. Rape seed was easier to buy.

The arrivals of all grain this week are small. There was a poor attendance at this morning's market, and English Wheat brought fully Monday's quotations; for foreign the demand was very limited, but the sales made were at the prices of that day. Barley, Beans, and Peas were unchanged in value. Oats were 6d. per qr. dearer than last Monday.

ARRIVALS FROM MAY 8 TO MAY 12, BOTH INCLUSIVE.

Foreign	2720 „	3140 „	8010 „	1130 „
	3310	3260	8030	— brls.

LIVERPOOL, Tuesday, May 11.—We had an average attendance at this morning's market, and for Wheat a fair inquiry, at an advance of 2d. to 3d. per cental on the rates of this day week. Flour steady at late rates. Indian Corn in moderate request, at a reduction of 3d. to 6d. per qr. below last Friday's quotations. Beans dull, and 6d. to 9d. per qr. easier. Oats and Oatmeal firm. Peas slightly lower.

SEED MARKET.

The speculative demand for new German Red Clover seed, of which we spoke in our last report, has continued during the present week; and the result of this inquiry has been an advance in values of from 2s. to 3s. per cwt; prices on the Continent are also on the rise. This fact, and the acknowledged lightness of the stocks now held in London, impart confidence to holders, and give great firmness to the trade. Yearling Clovers of all descriptions meet at present with no attention, English red is also still quite neglected; the quantity on offer far exceeds the anticipations formed at the beginning of the season, the universal opinion then being that there would be very little seed saved in this country. We have consequently had a great decline in the quotations of home-grown Clovers. Small orders continue to come to hand for French Italian Rye grass at unaltered currencies. Hemp seed is exceedingly scarce, and is 3s. to 4s. per qr. dearer. Canary seed is also creeping upwards. Spring Tares are scarce and dear; for the few remnants on the market higher prices are demanded than any which have obtained throughout the season. The Linseed trade is firm. White Mustard seed is in unprecedentedly short supply, and meets with a brisk demand at an advance of 2s. per bushel. It is generally believed that this article will be unusually high. Sowing Rape seed is scarce, and is also on the rise; we quote it 3s. to 4s. per qr. dearer on the week. Lucerne, Mangel, Swede, and Turnip seed are still in fair request.

JOHN SHAW & SONS, 16, Water Lane.

Particulars taken in any part of the Country. Plans and Estimates furnished. ILLUSTRATED CATALOGUES CAN BE HAD ON APPLICATION.

Aube. A circular has been sent by M. Forcade de la Roquette, the Minister of the Interior, to the prefects, in which he reminds them that, in virtue of the eighth paragraph of the electoral law, all meetings are to cease five days before the voting. He also calls attention to the fact that Article 32 of the same law confers upon the prefects the right of dissolving any meeting of a nature likely to disturb public order. Cardinal Billiet, Archbishop of Chambéry, has addressed to the clergy of his diocese a circular in which he instructs them to tell their parishioners in public to vote only for men recommendable from their principles and their moral and religious conduct. The *Debats* says that what strikes every one most forcibly in the various electoral circulars is the unanimity with which the candidates advocate the maintenance of peace and the development of the public liberties, and protests against personal government.

SPAIN.—In the sitting of the constituent Cortes on the 13th the discussion on the draft of the Constitution was resumed. Senor Orenso, in a speech which occupied three hours in delivery, moved an amendment proposing a Confederate Republic as the future form of government. The amendment was strenuously opposed by Senor Ulloa, who proved that the existence of a monarchy was compatible with all liberties of the people, and the amendment was finally rejected by 182 to 64. An amendment of Senor Garcia Ruiz in favour of a democratic republic as the future form of government, was rejected by 161 to 2. In the sitting of Friday, after several amendments had been moved and rejected, Senor Balaquer moved that the Government be a democratic monarchy, but he withdrew his motion after a speech from Senor Olozaga, who showed that the constitution as laid before the House was of a very democratic character. It was finally agreed that the article should be worded thus—"The sovereignty resides in the nation, from which all power emanates." An amendment requiring that the future monarch should be a Spaniard born in Spain was rejected by 121 to 60. A motion, demanding that the election of the Sovereign should take place by *plebisitum*, was also rejected. In the sitting of Monday, Senor Serrallara attacked the idea of a monarchy, which he considered incompatible with liberty. Senor Selvala defended the draft laid before the House, remarking that the Republicans themselves were the greatest obstacle to the establishment of a Republic. In the evening sitting Senor Figueroa, the Minister of Finance, laid before the House the estimates of the expenditure of the current year, which amount to 2987 millions of reals, being 800 millions of reals in excess of the revenue. In the sitting of Tuesday a resolution to take measures for putting a stop to mendicity was taken into consideration. The discussion on the draft of the Constitution was then resumed, and without the occurrence of any incident of importance. In the sitting of Wednesday the debate was continued, but the vote on the clause relative to the future form of Government was not taken, considerable time being wasted in replies to personal allusions made in the course of the debate. In the sitting of Thursday the discussion on the draft of the constitution was resumed by Senor Castelar, who attacked the idea of a monarchy as the future form of government in Spain. He predicted that at no distant date all European countries would amalgamate under one Government, as the United States of Europe. He then addressed the Ministers, and adjured Serrano in eloquent language not to accept a Regency. He elicited long applause, in which Serrano cordially joined. Senor Castelar further asked Topete with what purpose he made the September Revolution. Topete answered that he wished to save the Queen and the dynasty, but that after their expulsion he opposed all restoration. This statement was received with applause. He thought Montpensier the most desirable solution, but had no understanding with the Duke or Duchess. He had acted as subordinate to Serrano and Prim, and they all awaited the initiative and decision of the Cortes. He warned the Assembly that a Republic, a Monarchy, and Regency seemed equally impossible. "Beware," he added, "lest if you make every solution impossible some insolent, daring man undertake to cut the knot you are unable to solve. You will not applaud me now," he concluded, "but you will understand me." Senor Rios Rosas replied to Senor Castelar's speech by defending monarchical institutions and the members of the Orleans family; and finally the Chamber adopted the monarchical clauses by 214 against 71 votes. It is stated that 2000 partisans of Queen Isabella have assembled at Perpignan, and are preparing to enter Spain under the command of General Gasset and Pezuela.

SWITZERLAND.—The Germano-Swiss treaty of commerce and the literary copyright convention with the North German Confederation have been signed. They come into operation on September 1 next.

SWEDEN.—The King closed the Diet at Stockholm on Saturday. His Majesty, in his speech from the throne, expressed satisfaction that the Diet had shown itself inclined to legislate upon a closer union between Sweden and Norway, and promised that the question of a more extended religious freedom should be subjected to careful investigation. The speech made no allusion whatever to foreign relations.

DENMARK.—The Crown Prince left Copenhagen on Wednesday for England, where he will make a stay of one month. At a public banquet held on the 13th, General Raaslaeff, Minister of War, confidently expressed a hope that the sale of the Island of St. Thomas to the United States would be ratified by the Senate as soon as the history of the negotiations should be made sufficiently clear. The delay hitherto experienced was to be attributed to the differences between ex-President Johnson and Congress. Mr. Sumner was in favour of ratification.

BELGIUM.—The official journals give the following as the names of the members of the mixed Commission appointed to take into consideration the commercial relations of Belgium and France arising out of the working of the Belgian railways:—For France, M. Cornudet, President of the Agricultural Section of the Council of State, M. de Franqueville, Director-General of Public Roads and Bridges; and M. Combes, Director of Mines. For Belgium, M. Fastaux, Director of Railways and Telegraphs; M. Vandersweep, Inspector of Railways; and M. Belpaire, Engineer. From these names it will be seen that the dispute is reduced from a diplomatic question to its purely commercial basis.

PRUSSIA.—The King of Prussia, in consequence of a cold, has postponed his journey to Hanover, Bremen, and other places for several days, perhaps for a week. It is announced that a British squadron, consisting of the ironclad frigate *Warrior* and other men-of-war, are to assemble at Heppens, at the mouth of the Juhde, to salute his Majesty on his arrival. It is said that Prussia, counting upon the continued increase of the maritime commerce of the Northern Confederation, is seeking to obtain from the Dutch Government a cession of the Banda Islands, now occupied by Holland, and forming part of the Molucca Archipelago. The departure of the German expedition to the North Pole is fixed for June 7. If it should not succeed by the end of August in discovering an opening in the ice between the 74th and the 76th degrees of latitude, the vessels will pass the winter at Spitzbergen or at Gilsland, and resume the enterprise in 1870. The Flora Theatre at Cologne has been totally destroyed by a fire which broke out just after the performance had been concluded. The catastrophe is supposed to be the work of an incendiary, and the supposition is strengthened by the fact that the Grand Theatre was burnt down a few months back under similar circumstances.

WURTEMBERG.—A letter from Cronstadt, dated 11th May, mentions the death of Bernhard Molique, the violinist. He was born at Nuremberg in 1803, and from 1826 to 1849 was musical director of the Court and second director of the Opera in Stuttgart. In 1849 he settled in London, where he became very popular. He afterwards returned to Germany, and spent his last days in Cannstadt.

AUSTRIA.—The Reichsrath was closed on Saturday by the Emperor Francis Joseph in person, who delivered a speech from the throne, of which the following is an abstract:—

After alluding to the unhappy position of the country at the time of the convocation of the Reichsrath, his Majesty expressed his satisfaction and acknowledgments at the manner in which both Houses had, by their parliamentary labours, fulfilled the expectations of the Sovereign. It was necessary to found an entirely new order of things. This was accomplished by the establishment of the constitution, which, while uniting the Cis-Leithan provinces, had afforded a large field for the autonomous government of the country, and given the finishing stroke to the compromise with Hungary. The military organisation had not only drawn the bond of union more closely round the monarchy, but had also increased its power. His Majesty, together with the other Powers, was a guarantee for the maintenance of peace, which the empire absolutely required. Referring to the financial situation, his Majesty spoke of the large amounts made upon the tax-paying powers of the people, and said that, thanks to the joint efforts of the Government and administrative bodies, a way had been found by which it was hoped to place the finances upon a sound footing; adding that public economy, the reform of taxation, and the general improvement of commerce, afforded grounds for anticipating that the nation would soon recover from the sacrifices it had made. His Majesty then proceeded to enumerate the results of the legislation of the expiring session, mentioning especially the establishment of a supreme tribunal of the empire, the introduction of trial by jury for Press offences, the reform of the criminal law, the separation of the Government from the administration of justice, the abolition of imprisonment for debt, the repeal of the usury laws, and many other important measures. Allusion was then made to the numerous railway Bids which had been passed, to the conclusion of several commercial, postal, and telegraph conventions; to the adoption of the laws regulating the position of the religious denominations in Austria, by which equal rights were granted to all creeds; to the establishment of civil marriage, and the settlement of the relations between the schools and the Church. His Majesty in conclusion expresses his hope that these laws would endure as the basis of a peaceful organisation between the Church and State. The law relating to popular schools would elevate the education of the country to such a degree as must constitute the surest foundation for the welfare of the monarchy and the people. He hoped that in the next session of the Reichsrath those who still held aloof from their joint efforts would decide to participate in them. Austria must offer a great home to all her different nationalities, dispensing towards all equal justice and equal goodwill. The Constitution was the groundwork upon which this object was to be obtained. An understanding among the several races of the empire must certainly be arrived at, because this could not fail to be the ultimate result, and because Austria alone offered to all her peoples protection, freedom, and the preservation of their independence and peculiar institutions.

HUNGARY.—In the sitting of the Upper House of the Hungarian Diet on Saturday, the draft of the address as proposed by the committee on the address was after a short debate adopted unanimously. The departure of the Court is fixed for the 26th inst.

ITALY.—General Menabrea announced the formation of the Cabinet to both Houses of Parliament on Friday. He said that the programme of the Ministry was to uphold order and liberty, and to fulfil the financial engagements of the country. The Ministry was confident of possessing a solid majority, and he anticipated the promotion of a closer union between the Government and all the provinces of the monarchy. In the sitting of Monday General Menabrea, in reply to a question of Signor Bonfadini, stated that the Commission appointed to consider the question of a railway between Italy and Switzerland had decided in favour of the St. Gothard route. The Government, however, had not yet taken any final decision. In the sitting of Thursday, Count Cambrey Digny stated that he was compelled to delay for a few days the presentation of the financial conventions announced in the Budget.

The Senate adopted, by a majority of 7 to 4, a resolution rendering young men training for the profession liable to the conscription.

PAPAL STATES.—A report is current that the ex-Queen of Naples, having a villa built at Rome on the ruins of the Palace of the Popes, and the ground has been bought from the King for a sum of 50,000 f. Although he has nearly terminated excavations are still in the direction of M. Rosa, the conservator.

COAST OF AFRICA.—The town of Bazaruto was by fire on April 8. The shipping and the merchants on the beach were unharmed, or 20 natives are supposed to have lost their lives.

EGYPT.—The Viceroy left Alexandria on the morning for Venice, Florence, Vienna, and London, intending to arrive in Brussels on the 10th, and afterwards visit Brussels, the Baux-Bonnes to take the baths, and return to Constantinople at the beginning of August. The Viceroy has appointed Eugenie, the Viceroy has appointed Telwik, to act as Regent during his absence by Cherif Pasha. This regency causes great uneasiness.

PERSIA.—Mirza Hussein Khan has been appointed as Persian Envoy Extraordinary to Constantinople as Persian Envoy Extraordinary. Cholera has appeared at Ekum.

NEW ZEALAND.—The Maori rebellion, and once more assumed a formidable aspect. The leader on the east coast, and the leader on the west coast, have both reappeared. The colonists have sustained several disasters on the west coast. A body of 100 men has been attacked, and out of 10 men only escaped. Another body of European settlers, one clergyman, has been massacred at a place called Pukearuhe, near the White Cliffs, from New Plymouth, a town on the west coast. The settlement was on confiscated land, and a few settlers who were scattered around a place from which, however, the local constabulary originally garrisoned it had been withdrawn ago as March, 1868, two natives being posted of it instead. Lieutenant Gascoyne had to look after them and the redoubt as he was with his family only 30 yards off. It appears to have been perfectly misadvised arrangement, especially as the local authorities promised to warn them should they bear a threatening character. On Friday morning of February, or early on Saturday morning, of natives must have called at Lieutenant Gascoyne's house and tomahawked first his wife and three children. A party were found together—his fully dressed children in their nightclothes, and Mrs. Gascoyne partially so, as if she had been disturbed, and had attempted to dress herself in sequence. The bodies of two men, Edward and John Milne, were also found, and close to where the redoubt had been a party burnt it, that of the Rev. John Wesleyan missionary in New Zealand arrived in 1833. During the fiercest of his life seemed safe everywhere and the continuation of the rebels could not be more exemplified than in murdering and destroying coat and waistcoat. The supposed leader of the party who committed these murders was whom he stood godfather when he baptised the fact of the murders having been discovered until the Monday morning, and information reaching New Plymouth volunteers enrolled, the bodies brought in, such steps devised to protect the settlement from danger were promptly taken, and a company sent off to Wellington to urge the retention of the two companies of the 1st New Zealand Infantry, and immediate orders for removal, and a local effort by a force of armed men. Meanwhile the settlers around New Zealand regarding the murders as a menace to their homes and harvest work, as they had done many times since the war broke out in 1860. As soon, however, as it was known that troops were to be retained, and the settlement strengthened by two companies of the 1st New Zealand Infantry, the settlers, except those belonging to the Whitemore, with a force of about 100 men, the camp of Tito Kowaru, the leader of the Maories on that side of the island, and after being completely routed him. The attack was in the early morning, under cover of a mist, the firing at one of their sentries was the signal, and the Maories, about 100 of them, in their nakedness, and carrying nothing but their pouches, rushed into the open ground, and with such a tremendous fire that they were as quickly as they could into a steep wood, a terrible close fire was then kept up for several hours, the Maories tried to climb the trees, but were quickly brought down, the women were time carrying off the dead in the mist, and the fire, their cries being terrible. At the end of the day the Hau-haus had retreated through the growth, leaving the bush in our hands.

was captured, as well as guns, tomahawks, money, tents, axes, spades, and shovels—in the whole of the enemy's baggage. Seven dead were found, and two women were made prisoners. On the side of the attacking force one man was killed and 13 wounded. Colonel Whitmore immediately started in active pursuit of the fugitives, with a view of preventing their escape into the fastnesses of the interior.

TRIALS.—The Parliamentary committee of inquiry into the charges of bribery and corruption of members of the Legislative Assembly at Melbourne, are expected. A Roman Catholic member is expected to be expelled. A Roman Catholic member is expected to be expelled. A Roman Catholic member is expected to be expelled.

CHINA.—A placard has been circulated in China, warning missionaries and styling them as 'foreign devils.' It is rumoured that a high Chinese official at Peking has stayed the French Ambassador on the law, and that his Excellency has in consequence withdrawn his flag. It is believed that the Peking Government is in great fear of further encroachments.

CAPE OF GOOD HOPE.—The Governor, Sir Philip Sturt, returned to Capetown from the frontier. He has settled the Basuto boundary, and has assigned to the Basutos a tract of land on the eastern slope of the mountains between the mountains and the sea. Sir Sturt has settled this affair, proceeded to Nomans territory occupied by the Griqua chief, Adam, and arranged satisfactorily some disputed points of boundary between that country and Natal. He then rode southward through Independent Frontier, escorted by a detachment of the Frontier Mounted Police; visited the new extra-colonial Pingo territory, but gave great offence to Kreli and his adherents in the Transkeian territory, by passing them a law after they had been led to believe that he would not. The discovery of the great 83½ carat diamond, purchased by a colonial firm for exportation, and the accounts of its value published in the newspapers, have led the Griqua chief Waterboer and some Europeans, who had obtained by concession from all minerals found in Waterboer's territory, to set up a claim to its ownership, and Mr Justice Galt has granted an interdict for preventing its exportation to Europe. Accounts from Graaf Reinet state that there are reports of a still larger diamond being found.

UNITED STATES.—Mr. Motley sailed for England on Monday last in the Cuba. It is reported in official circles in Washington that large discretionary powers have been given to him in regard to the reopening of negotiations for a settlement of the Alabama claims, and that the Washington Government regard Mr. Sumner's speech as forming the basis for future negotiations on the subject. It is also stated that no immediate action will be taken by Mr. Motley, who will first endeavour to familiarise himself with British sentiment regarding the Alabama claims before initiating any negotiations for a new treaty. The unanimous tone of the English Press in reprobating Mr. Sumner's speech caused the war fever to moderate considerably. It is now said that the country does not support the extreme views of Senator Sumner, and that there is no general desire in America to make exorbitant demands on Great Britain; no such desire to press her to "the verge of national humiliation;" and no wish among the great industrial, trading, commercial, and financial interests, whose views always control the Government in international affairs, to indulge in the luxury of a war with England. General Lee paid a visit to President Grant at Washington on the 1st inst. President Grant has suspended Mr. Hale from his functions as United States Minister at Madrid, and has nominated General Sherman as his successor. He has also issued a proclamation ordering an election to take place on July 6, in the State of Connecticut has ratified the 15th Constitutional amendment prohibiting the denial or abridgment of the right to vote on account of race, colour, or condition of servitude. A riot between the troops and the people occurred at New Orleans on Wednesday. Several persons were more or less severely wounded. The troops restored order.

CANADA.—In the Canadian House of Assembly a motion has been adopted providing for the rescinding of a license issued to American fishermen during the past year. The debate indicated a general opposition in the House to the granting of any privileges to American fishermen, whose entire exclusion from Canadian waters was advocated by the Nova Scotian members.

BRAZILS AND PARAGUAY.—The latest news from Paraguay is to the 10th of April. The new commander-in-chief, Count d'Eu, had joined the Brazilian forces, and the first and second divisions of the expeditionary force had set out to attack Lopez in his last position.

circumstances detailed in our last number. Several witnesses were examined, who gave evidence of a formal character respecting the preparation of the power of attorney and the issue of the Bank notices relative to the proposed transfer, and it was also proved by a clerk in the Birkenhead Post Office, and by the manager of the local board of the Alliance Bank, that the letter of Mr. Maxted, the co-trustee, refusing to sanction any alteration in the mode in which the money was invested, had been delivered to the prisoner two or three hours before he called at the bank with the power of attorney as executed on the same morning. The Lord Mayor said that there was no doubt that sufficient evidence had been laid before him to warrant his sending the case to be investigated by another tribunal. The prisoner, having been cautioned, said he had nothing to say at present except to declare his innocence. He was then committed to take his trial at the Central Criminal Court, and was removed in custody.

THE HERCULES INSURANCE COMPANY.—On Friday Mr. John Everett, Mr. Samuel Green, Mr. Charles Greenwood, Dr. Frederick C. Jones, Mr. William Kemp, Mr. John Rossall, Mr. George Walter, and Mr. John Werritt, eight of the directors of the Hercules Insurance Company (Limited), were summoned before the Lord Mayor to answer a charge of issuing a false prospectus, and for conspiring to commit offences against the Companies' Act, 1862. When, however, the case came on, Mr. Lewis, on the part of the prosecutors, withdrew the summonses, and said that the prosecutors would proceed in the Court of Chancery. The allegations of the indictment were indignantly denied by the defendants, and the Lord Mayor said that as no evidence was forthcoming there was nothing whatever on which the Court could act. The defendants were thereupon discharged.

THE ENGLISH JOINT-STOCK BANK.—At the Mansion House on Monday Charles Edward Mangles, James Abbiss, and Thomas Bradshaw, three of the directors, and Samuel Greenway Finney, the manager of the English Joint-Stock Bank, surrendered before the Lord Mayor to answer the charge of having conspired to cheat and defraud the shareholders by issuing false reports and balance-sheets, and making improper entries in the books of the company. After several witnesses had been examined, including Mr. Howell, the accountant, who had examined the books on the part of the prosecution, the inquiry was further adjourned, Mr. Finney being liberated, as before, on bail, and the other defendants on their own recognisances.

FORGERY OF BANK CHEQUES.—On Monday Arthur Taylor, of Stafford Lodge, Brixton, was charged on remand with various acts of swindling in some districts of south London by means of fictitious cheques on the London and Suburban Bank. At the previous hearing the prisoner had been released on bail, but the gravity of the case appeared to Mr. Woolrich, the magistrate of Lambeth Police Court, on Monday, to be so much increased, that on directing a further remand bail was refused.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 93½ to 93¾ for Money, and 93½ for Account; New and Reduced Three per Cents., 91½ to 91¾; Bank Stock, 242 to 244; Exchequer Bills, 5s. dis. to 5s. pm.; India Five per Cents., 114½ to 114¾.—FOREIGN: Brazilian, 79½ to 79¾; Chilean, 96 to 97; Danubian Seven per Cents., 75½ to 76½; Egyptian (1864), 85 to 86; Ditto (1865), 75½ to 75¾; Viceroy's Seven per Cents., 79½ to 79¾; Ditto Nine per Cents., 97½ to 97¾; Italian, 56½ to 56¾; Tobacco Loan, 85½ to 86½; Peruvian, 76½ to 77½; Portuguese, 34 to 35; Russian (1862), 81 to 85; Orel-Vitebsk, 78½ to 78¾; Nicolas, 63½ to 64½; Moscow, 79½ to 79¾; Charkof, 76½ to 76¾; Turkish Five per Cents., 42½ to 42¾; Ditto Six per Cents., 65 to 65½; Honduras, 82 to 84; United States 5-20 Bonds, 78½ to 78¾; Erie, 18½ to 19; Illinois, 93½ to 94.

Metropolis and its Vicinity.

THE CRUISE OF THE RESERVE FLEET.—The gathering of the ships of the Reserve Fleet for their fortnight's training cruise at sea was completed during the night of the 12th inst. by the arrival in Portland Roads of the two screw line-of-battle ships Donegal and Royal George. The Agincourt arrived from the Great Nore on the previous afternoon, and immediately hoisted the flag of the Admiral Commanding-in-Chief, Rear-Admiral Astley Cooper Key, which up to the time of her arrival had been flying on board the St. George. The Duncan arrived a few hours previous to the Donegal and Royal George, from Spithead, carrying the flag of Rear-Admiral Phipps-Hornby, the officer second in command. The ships forming the fleet are:—The Agincourt, armoured iron screw frigate, 6621 tons, 1350-horse power, 26 guns, Captain T. Miller, carrying the flag of Admiral Key; the Duncan, unarmoured wooden screw line-of-battle ship, 3727 tons, 800-horse power, 81 guns, Captain C. Fellowes, carrying the flag of Rear-Admiral Hornby; the Hector, armoured iron screw frigate, 4089 tons, 800-horse power, 20 guns, Captain de Horsey; the Black Prince, armoured iron screw frigate, 6109 tons, 1250-horse power, 41 guns, Captain Gordon; the Valiant, armoured iron screw frigate, 4063 tons, 800-horse power, 24 guns, Captain Pullen; the Donegal, unarmoured wooden screw line-of-battle ship, 3245 tons, 800-horse power, 81 guns, Captain Turnour; the Royal George, unarmoured wooden screw line-of-battle ship, 2616 tons, 400-horse power, 72 guns, Captain R. Jenkins; The Trafalgar, unarmoured wooden screw line-of-battle ship, 2900 tons, 500-horse power, 60 guns, Captain Barnard; The St. George, unarmoured wooden screw line-of-battle ship, 2864 tons, 500-horse power, 72 guns, Captain Noloth; The Mersey, unarmoured wooden screw frigate, 3733 tons, 1000-horse power, 36 guns, Captain J. Secombe.

The fleet, which had on board 2000 men of the Royal Naval Reserve and 2000 Coastguard men, as thus composed of ten ships, having a total tonnage of 38,577 tons, with a nominal engine power of 52,000 horses, and carrying 513 guns. Two ships of the 'flying squadron,' the Cadmus and the Sylla, went to sea with the fleet, but were to return in a few days. Mr. Childers, First Lord of the Admiralty, Vice-Admiral Sir Sidney Dacres, and other official persons connected with the Admiralty, arrived at Portland from London on Friday afternoon, and at once went on board the Agincourt. Their lordships were received with the customary salute, and the Admiralty flag was hoisted at the main. On Saturday morning the vessels composing the squadron, accompanied by the paddle-wheel dispatch boat Helicon, put to sea shortly after 5 o'clock. The wind was blowing strongly from the eastward, but so great is the harbour accommodation that the ships had no difficulty whatever in taking up their assigned berths between the end of the great breakwater and the north shore. The iron-clads formed the starboard division, and the wooden two-deckers, frigates, and corvettes the port division. The spectacle presented on the squadron leaving the harbour was fine in the extreme. The atmosphere, unfortunately, became rather hazy shortly after they left, and the vessels were soon out of sight from the shore. Accounts have since been received from the fleet, 30 miles S.W. of Bexley, stating that the experiment so far has been completely successful, that the Reserve men have fallen easily into the general habits and discipline of the Navy, and have already made themselves at home both with their ships and their officers, while the greater independence to which they are accustomed has not prevented their being as respectful as any marines could desire. They appear to like their ships, display great quickness and energy in learning their duties, and exhibit singular proficiency in the rifle and cutlass drills.

EXPERIMENTS AT SHOOBURYNESS.—Further trials of the new bronze field gun for India were made on Monday and Tuesday at Shooburyness, with a continuation of the satisfactory results already reported. The light iron carriages were found to be perfect in their endurance. Case shot was also fired from the light Abyssinian steel gun at 200 yards, the effects of the bullets being severe upon the wood targets.

THE FOREIGN OFFICE.—The rooms in the Foreign Office will not be again opened for visitors until Friday, the 4th of June, on which day, and also on succeeding Fridays, they will be opened as heretofore.

SEVERE STORM.—On Wednesday the metropolis was visited by storm of lightning, thunder, hail, and rain, which extended for some miles, doing an incalculable amount of damage in various places. The early part of the morning opened with heavy showers of rain, the wind blowing hard, and shifting to various points. About noon vivid flashes of lightning were perceptible all over the metropolis, and were followed by loud peals of thunder. Hailstones of unusual size for this time of the year followed, accompanied by showers of drenching rain.

BLACKFRIARS BRIDGE.—At the Court of Common Council on Friday it was reported that all hopes of completing this bridge in time for opening by the 24th of this month are at an end. It was originally intended to open it on that day, which would have been peculiarly appropriate, inasmuch as it is her Majesty's 50th birthday, and exactly the 100th anniversary of the date on which old Blackfriars Bridge was first opened. It appears that the bridge cannot now be opened until the beginning of July next, and the improvement committee has been requested to report as to the public ceremonial to be adopted on the occasion. A suggestion that the Holborn Valley Viaduct should be opened on the same day was referred back to the committee.

METROPOLITAN BOARD OF WORKS.—At the meeting of the Metropolitan Board of Works on Friday a report was made from the General Works Committee, excusing all the clerks from guilty knowledge of the late defalcations; but Mr. Legge, one of the members, insisted that there must have been a great deal of negligence. A memorial from Clerkenwell complained of the danger of storing petroleum, but the inhabitants were informed that the law settled the matter, and that the Board had no authority.

CHURCH REFORM.—A public meeting was held at Wals's Rooms on the 13th inst., for the purpose of organizing a movement for a reform of the Church of England. Lord Alford presided, and was supported by Mr. C. Buxton, M.P., Mr. Allen, M.P., Mr. Briscoe, M.P., Mr. T. Chambers, Q.C., M.P., and others. The Rev. Carr J. Glyn, rector of Wychampton, moved the first resolution, which stated that the objects of the society would be as follows:—

- 1. The amendment of the Book of Common Prayer, under proper authority, by omissions and alterations, especially in the rubrics and occasional services. 2. The reform of the Ecclesiastical Courts, so as to procure a less expensive and more expeditious mode of remedying abuses. The lay element to be maintained in the constitution of such courts. 3. The reform of abuses connected with patronage, due regard being had to vested interests. 4. The modification of the Acts of Uniformity and the complete revision of the Book of Canons, together with the correction of such evils as hinder the extension, and mar the usefulness, of the Church of England.

Mr. T. Chambers seconded the resolution. The resolution having been adopted, Lord Ebury was elected president of the new society, and Baron Pigott, Mr. Allen, M.P., Mr. Buxton, M.P., and several other gentlemen, were elected Vice-Presidents.

THE WIDENING OF THE POTTRY.—At the Court of Common Council on Tuesday a letter was read from Mr. Lee, on behalf of the Bishop of London, stating that, in order to terminate the negotiation which had lasted so long, and which his lordship could not but feel was the means of impeding a great public improve-

City Intelligence.

THE CASE OF FORGERY ON THE BANK OF ENGLAND.—On Saturday Major Frederick Beswick, chief clerk of Birkenhead, was again brought before the Lord Mayor, on remand, charged with forging and uttering a power of attorney for the transfer of £50,000 Consols, with intent to defraud the Government and Company of the Bank of England, under the

ment, he was willing to accept 4000*l.* for the ground required to widen the public way in front of St. Mildred's Church, Poultry. It was understood that a much larger sum had been asked for the ground than the commissioners were willing to give, and the chairman congratulated the court on the fact that the ecclesiastical authorities had at last come down to their terms.

THE DOCKYARD EMIGRANTS.—Intelligence has been received at the Admiralty of the safe arrival of her Majesty's troopships *Crocodile* and *Serapis* at Quebec, with emigrants on board. The *Crocodile* arrived on the 7th inst., and left again on the 12th inst. The *Serapis* arrived on the 15th inst., and was to leave again on the 20th inst. The emigrants had all gone up West, and there had been no casualty. The Admiralty have given notice that the *Crocodile* will, on her return home, make a trip to New Brunswick, and that a limited party of discharged Government workmen will be taken in her.

TWO GOLD SHIPS BURNT AT SEA.—A telegram from Queenstown announces the total loss of the *Blue Jacket* and the *Omar Pasha*, by fire. Both were homebound, and the first, besides a number of passengers, had 130,218*l.* of gold on board, the produce of the Australian and New Zealand "diggings." The crew and passengers took to the boats, and after enduring great hardships for seven days, one of them was picked up; but two others, containing 32 persons, had not been heard of. The *Omar Pasha*, also homebound, from Brisbane, with a valuable cargo, 30,000*l.* in gold, and 43 passengers, took fire, and was abandoned, all lives being saved by the boats. Both ships and their cargoes were fully insured.

ASSAULTS ON THE POLICE.—At the recent Middlesex Sessions all the cases tried were cases of assault, and in each the victim was a policeman. The prisoners were six in number, and only two of them had been in custody before. The offence given by the police was that they were trying to stop, in two instances a fight, in a third a disturbance of the streets. The prisoners got the officers on the ground, and either kicked them on their heads with heavy boots or jumped upon them, in one instance making the outrage still more serious by attempting to draw a cart over the officer's body. They were all found guilty, and sentenced to various terms of imprisonment. On Monday a number of similar assaults upon the police were brought before Mr. Paget at the Thames Police Court, and the persons accused having been convicted, they were each sentenced to two months' hard labour. Some of the delinquents earnestly entreated to have the sentence commuted to a fine; but the magistrate declared that he never did, and never intended to punish assaults on the police, when they conducted themselves properly, with fines. They had dangerous and onerous duties to perform, and the interests of society required that they should be protected.

HIGHWAY ROBBERY IN THE STREETS.—A daring robbery was committed in Rosemary Lane, Whitechapel, about 9 P.M. on the 18th inst. A Greek merchant called Vreonius was being driven along the lane in a cab towards the City at the rate of between five and six miles an hour, when a young man, who must have seen him enter the vehicle two or three minutes previously, ran alongside the cab for a distance of 100 yards, thrust his arm into the cab, and made a violent snatch at M. Vreonius's gold chain, carrying away part of it and the watch to which it was attached. M. Vreonius directed the cabdriver to stop, and he alighted, but the thief got away with his booty. The watch was worth 60*l.*, and the portion of the chain taken with it 20*l.* more. M. Vreonius, who gave immediate information at the station-house in Leman Street, said that he had only been in London a few hours, and had been in all the capitals in Europe but had never been robbed before. On Thursday a well-known thief, called Gallagher, was brought before the magistrate at the Thames Police Court, and was identified by a tradesman who saw the robbery committed. He pleaded guilty, but so many convictions by juries and magistrates were proved against him that the magistrate said he could not dispose of the case summarily, and committed the prisoner for trial.

ATTEMPTED MURDER AND SUICIDE.—At the Clerkenwell police-court on Monday a house-painter, named Beech, aged 47, living in the Caledonian Road, was charged with attempting to murder his wife, and afterwards to commit suicide. They had been out drinking together, and, as the woman said, he was "crazed with drink." She offended him, upon which he inflicted a serious wound on her throat with a table knife. He then went out, and gave the alarm, and when the neighbours ran in to his wife's assistance he attempted to cut his throat, but was prevented. He was committed for trial on the charge of attempt to murder.

THE PUBLIC HEALTH.—The Registrar-General's Weekly Report states that in the week that ended on Saturday, May 15, 4552 births and 3010 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 24 per 1000 persons living, being 21 per 1000 in London, 31 in Edinburgh, 20 in Dublin, 23 in Bristol, 21 in Birmingham, 30 in Liverpool, 24 in Manchester, 21 in Salford, 26 in Sheffield, 30 in Bradford, 23 in Leeds, 25 in Hull, 28 in Newcastle-upon-Tyne, and 38 in Glasgow. The rate in Vienna was 37 per 1000 during the week ending the 8th inst., and in Berlin 32 per 1000 during the seven days ending the 13th inst. In London the births of 1024 boys and 968 girls, in all 2012 children, were registered in the week. In the corresponding weeks of 10 years, 1859-68, the average number, corrected for increase of population, was 2178. The deaths registered in London during the week were 1279. It was the 19th week of the year, and the average number for that week, corrected for increase of population, was 1409. The present return is therefore 130 below the estimated amount.

Provincial.

BOLTON.—An inquest was held on Monday on the body of Lady Firth, who was found drowned in the River Wharfe, at Bolton Bridge. It appears that her ladyship, with Sir C. H. Firth, her husband, and Mr. and Mrs. Haigh and family, were staying at the Devonshire Arms Hotel, near Bolton Abbey. On Saturday morning, after breakfast, the deceased and Mrs. Haigh were going out for a walk, but the latter, not having finished a letter she was writing, Lady Firth went out alone, and never returned. Search was immediately made, but it was not until Sunday afternoon that the unfortunate lady was discovered, drowned in a deep part of the river beneath a high bank, called "The Duke's Bathing Place," the late Duke of Devonshire having been accustomed to bathe there. Her watch had stopped at 42 minutes past 10, which was but a few minutes after she left the hotel. There were some rough steps down to the water, and it is supposed that she descended in search of flowers, and slipped into the stream. The jury returned a verdict of "Found drowned."

BRADFORD.—A monument to the memory of the late Mr. Richard Oastler, the successful advocate of the "Ten Hours' Bill," was inaugurated in this town on Saturday. Every factory district of Yorkshire and Lancashire was largely represented in the crowd of 100,000 well-dressed persons who filled the streets. A procession, composed of 30,000 persons, marched from the town to Peel Park, about a mile distant. An address was there presented to the Earl of Shaftesbury, who, as having been in years past prominently identified with the labours of Mr. Oastler, had undertaken to perform the ceremony of unveiling the monument. It expressed the gratitude of the working people of Yorkshire and Lancashire to his lordship for the disinterested, arduous, and successful labours he had undergone to secure the adoption of the Ten Hours' Bill, the beneficial results of which they had enjoyed for nearly 20 years, and which are now visible in the marked improvement of the physical and intellectual condition of factory workers. Lord Shaftesbury, in reply, expressed the gratification he felt in having been requested to take part in the proceedings. The procession was then reformed and returned to the town, a large proportion of those composing it gathering in the open space around the site of the statue in front of the Midland Railway station. On arriving at the site Lord Shaftesbury, who was publicly welcomed by the mayor, unveiled the statue. He addressed the crowd, congratulating them as Yorkshiremen on their mindfulness of old friends, and of one who left his retirement to maintain the cause of the worn-out adult and the cause of suffering children, and who brought to the work a force of talent, a vigour of mind, and an earnestness of heart that in any profession would have raised him to its highest rank. Addresses were then delivered by Mr. W. E. Forster, M.P., Mr. Ferrand, and Mr. Miall, M.P., after which the crowd dispersed. At 8 o'clock a public meeting was held in St. George's Hall, under the presidency of the Mayor, who was supported by Lord Shaftesbury, Lord F. C. Cavendish, M.P., Mr. Forster, M.P., Mr. Miall, M.P., Mr. Wheelhouse, M.P., Mr. A. Illingworth, M.P., &c. The memorial represents Mr. Oastler in the act of making an appeal on behalf of the factory children, two of whom, a boy and girl, are grouped at his side. The sculptor is Mr. Birnie Philip, of London. The entire cost of the work was 1500*l.*, contributed by the friends of the "short-time movement" in Yorkshire and Lancashire.

BURY ST. EDMUND'S.—The magistrates of Suffolk are about to unite the police forces, which have hitherto had a separate and independent existence, in East and West Suffolk, and a chief constable is to be appointed for the whole county. There are 52 candidates for the vacant office, to which a salary of 550*l.* per annum is attached.

GRIMSBY.—On Sunday morning two poachers were encountered by the gamekeeper and gardener of Mr. Henry Thorold, at Ravendale, near this town. One poacher fled, but the other fired at the gardener, and the shot took fatal effect. The two men made good their escape, but were subsequently captured. The jury at the inquest returned an open verdict of "Wilful murder against some person or persons unknown." The prisoners were brought before the magistrates on Tuesday, and remanded for a week.

HEXHAM.—On Wednesday, the 12th inst., the Countess of Derwentwater, after travelling express from London, arrived at Dilston toll-gate, and took possession of a hind's cottage almost directly in front of a pathway leading to the baronial residence to which she lays claim. On Friday the new hind put in an appearance to occupy the cottage vacated by his predecessor. No admission, however, could be obtained to any but the lower rooms, as the countess was duly installed in the upper apartments; and it was decided to eject the intruder without further delay. Mr. Thompson, the landlord, advanced to the door and peremptorily demanded admittance. This demand was refused, and after some parley a number of the farm servants were instructed to break open the door with a heavy hammer. The men then carried the whole of the countess's furniture into the middle of the turnpike, where it was deposited in a heap, after which they returned for her. No more opposition was made to the removal than was necessary to render it forcible, and, consequently, within a very few minutes her tent was for a second time transferred to the highway. She then remained under the surveillance of two policemen until four o'clock, when she proceeded in her carriage to Hexham; and, after transacting business with her solicitor, returned to the lodging taken for her at Corbridge. The furniture was also removed there in the evening.

JERSEY.—An attempt to level a piece of ground off

St. Aubin's Road, about a mile from the town, resulted in an interesting discovery. A stone structure, which had been directed to it. It was found to be constructed of 16 or 18 huge stones, and closed at each end, the floor being of sand. Eleven urns were discovered, some of them broken and imperfect, but all of approach each other in size, and some of them 9 or 10 inches in diameter. They are symmetrically shaped, and filled with earth and, it is believed, they are too brittle to be handled. A flint weapon was also among the contents.

LYNN.—After an investigation extending over several weeks Mrs. Langford was on Friday brought to trial on the double charge of poisoning her child and infant. From the respectable and occupied by the parties, the case has attracted considerable excitement in the district. The Langfords have resided in Lynn for many years, and have always enjoyed a good reputation. She appears to have been a very pretty woman, and children until this occurrence. She has laboured under the impression that the consequence of the failing health of her husband would come to nothing, and that the lives of eight children would be reduced to a mere feeling she discharged her servants, and applied herself to the conduct of the household, only the occasional assistance of a nurse being urged by her friends that the strain was thus to sustain was too much for her. She gave way, and that in a moment of weakness she administered strychnine to her child. On the other hand, it is not necessary to state given to her husband and child on a Monday the assistant who attended to the child by Mr. Langford not being on the premises greater part of the Sunday, so that she had an opportunity of procuring strychnine as a consequence of suspected suicide, instead of part of the prisoner, she has from the first night and day.

MARLBOROUGH.—The Overstone estate, town, which was purchased about three years ago by the Duke of Marlborough, by the late Mr. St. John, for about 140,000*l.*, has just been sold to a gentleman to Lord Ernest Bruce, a representative of Sir H. Meux, at a profit of 100,000*l.*

PRESTON.—On Monday a report was received from the executive of the power-loom weavers, that as they could hold out no hopes of a struggle to a successful issue, they felt it their duty to advise the operatives of Preston to make some amicable arrangement with the employers. It is considered that the strike is now at an end.

SOUTHAMPTON.—The Mayor of Southampton received the following letter from the Hon. Mr. Johnson, in reply to an invitation addressed to him of the Borough Council, on Saturday last, forwarded to London by special messenger on the evening of the 13th inst., requesting Mr. Johnson to banquet on the occasion of his departure to-day, in the steamship *Ohio*, for Baltimore.

"Sir,—The hospitality of the inhabitants of Southampton tendered me in a banquet to take place on the 13th inst., prior to my departure for Baltimore, which I gladly and gratefully accept if I could do so, and are such that I find it impossible to resist the invitation of my arrival in your country to the present time, I used my best efforts to contribute in your own feeling for the United States, and I feel that in this I have not failed. The present state of affairs firms me in this opinion. I shall, however, be a victim that her people and her Government are at war between the two countries would be as if as could befall them, and this, I believe, is also the conviction of my Government and the people of the United States. For a number of years to recent occurrences to which it is only too apparent apprehensions were entertained that such a calamity possibly occur. These I am glad to see have ceased to exist. I shall return, therefore, with the assurance that the amicable relations between the two nations are not to be seriously interrupted. The career of both will necessarily be determined in the future than it has been in the past, and I trust the Government be placed upon a firm and permanent basis. With my best thanks to you, Mr. Mayor, and to the authorities for the honour they have done me, I remain, high regard, your obedient servant, R. W. Johnson."

ULVERSTON.—The fasting girl, who has been said has abstained from food since last October, has begun both to eat and talk. She has, it is reported, been 25 weeks without any food, and her lips, and 16 without having her lips open.

WARWICK.—On Sunday afternoon a large portion of the Warwick and Napton Canal, midway between Emscote Bridge and the bridge at Emscote, was washed away, and the water escaped through a breach until it had completely washed away three adjoining fields, and some crops and property in that locality.

WIGAN.—A singular accident occurred on the morning of the 13th inst., in the Wigan Colliery, near the Norley Coal Company, near this town. A large quantity of coal had been left below to superintend the engine, a hopper, and 600 yards of rope, when, in consequence of the breach in the engine, a hopper, and 600 yards of rope precipitated into the shaft. It was supposed that three men had either been crushed or suffocated; but after nine hours' search they were brought alive to the pit, and were regarded as men risen from the dead, as they had been covered by the first fall, and was so saved, and another man was killed by a basket. The third was killed by a

sold fully as dear as on Monday, and there is scarcely a quotable difference in other descriptions. The number of Sheep is smaller, and there is a slight advance on choicest qualities, but trade does not finish briskly. Trade is dull for Lambs and Calves at Monday's rates. Our foreign supply consists of 648 Beasts, 4690 Sheep, 137 Calves, and 5 Pigs.

MARK LANE.—Monday, May 17.
There was a small supply of Wheat from Essex and Kent to this morning's market, which was sold at the prices of this day se'nnight. The attendance was small, and there was but little disposition to purchase foreign Wheat; the amount of business done was very limited, at rather under last Monday's rates. Barley, Beans, and Peas were unchanged in value. The Oat trade was steady at Friday's advance, being 6d. per qr. from this day week. Flour was dull, and difficult of sale.

FRIDAY, May 21.
The weather during the past week has been changeable, but, on the whole, wet has predominated in the southern districts, while in Scotland little rain has fallen, the temperature being at times chilly, and some nights frosty. Since the 14th inst. we have had throughout the markets of the kingdom a slow trade, and in some cases prices have been slightly in favour of buyers; but generally speaking former rates were insisted upon for both home-grown and foreign Wheat. Excepting Oats, which met increased attention at a small advance, the value of Spring Corn has undergone no alteration of any importance. Flour moved off slowly, and was written 6d. per sack cheaper in some cases. The arrivals off the coast this week consisted of 18 cargoes, of which, with those left over from last week, there remained for sale last night 24 cargoes. The floating trade exhibited symptoms of a slight improvement. Wheat off the coast commanded about late rates. Maize was easier at the commencement of the week, but prices closed unaltered. Barley not much sought after, and of Rye none offering. In cargoes on passage and for forward shipment hardly any business has been transacted. Rye was in demand on Continental account, and Cottonseed continued firm. Paris, May 20.—The trade in Wheat and Flour was somewhat more animated during the last week, the unsettled weather causing a better demand. The eight marks are quoted at equal to 36s. 3d. per 280 lb. The stock at the Halle is estimated at 6059 cwt.
The arrivals of all grain this week have been moderate. There was a fair attendance at this morning's market; the trade was without animation, and the few sales made of Wheat, either English or foreign, were at Monday's quotations. Spring Corn of all descriptions was unchanged in value.

ARRIVALS.

	Wheat.	Barley.	Oats.	Flour.
English ..	390 qrs.	— qrs.	— qrs.	— ska.
Irish .. .	— " "	— " "	1300 "	—
Foreign ..	10,650 "	3740 "	15,760 "	2510 "
	10,040	3740	17,060	— brls.

LIVERPOOL, Tuesday, May 19.—We had a moderate attendance at this morning's market, and Wheat met with a very limited demand, at a decline of 2d. to 3d. per cental on white, and 3d. to 4d. on red kinds for the week. Flour was in restricted inquiry, at late rates. Indian Corn was in fair request, at the prices of last market day. Oats firm. Oatmeal scarce, and 1s. per load dearer. Beans and Peas dull.

SEED MARKET.
The agricultural seed trade, as is usual at this time of the year, is now very quiet, the consumptive demand having altogether ceased. We have a speculative inquiry for new German Red Clover seed, of which there is not much remaining. Home-grown Red, as well as Alayke, White Clover, and Trefoil seeds, are at present quite neglected. Bird seeds continue to advance in price. For White Mustard seed we have a brisk demand at full rates; the same can also be said of Essex dwarf Rapeseed. Spring Tares are very scarce and dear.
JOHN SHAW & SONS, 16, Water Lane.

A YOUNG GENTLEMAN can be TAKEN on an extensive FARM in one of the best districts of Scotland. Draining and other extensive improvements going on. Can either work or not as desired. Good Hunting, Shooting, and Fishing. Only one hour from Edinburgh. Terms, £106 per annum, washing included.—JAMES MURRAY, General Post Office, Edinburgh.

WANTED, an ATTENDANT, having a knowledge of Gardening. Wages £22 per annum, with uniform.—Apply to the Superintendent.

Head Gardener (Working).
WANTED, by a Gentleman living about 10 miles from London, a practical HEAD GARDENER (married), quite able and willing to undertake the Management of large Flower and Kitchen Gardens, with Pineries, Graperies, Shrubberies, &c.; also the Management of Grass-land and Stock. No Perquisites. Exhibiting for competition strictly prohibited. Comfortable lodge, with accommodation for one Child. Duties of the Wife, ordinary duties of a lodge and the charge of the Poultry.—Applicants should state, as concisely as possible, the ages of self and wife, the number of children and their ages, salary expected, what experience they have had, &c., by letter addressed to A. B., 112, Fenchurch Street, London, E.C.

WANTED, a GARDENER (HEAD, WORKING), who thoroughly understands his business—Land and Stock. Wife to attend Lodge, and must thoroughly understand the management of Poultry. None need apply who cannot give unexceptionable references for ability and respectability. Wages £1 1s a week, with lodge, milk, and vegetables.—Apply to A. B., Messrs. Sutton & Sons, Reading, Berks.

WANTED, a GARDENER, and required to make himself otherwise useful. Unmarried, and not under 35 or 40 years of age; board and lodge in the house; and must have been used to Glass. The most satisfactory references for honesty, sobriety, &c., will be required.—Address, F. E. W., Post Office, Malton.

WANTED, a GARDENER, where one only is kept.—A single Man, who thoroughly understands his duties, and is industrious. There are two small Houses, and a range of Hot-water Pipes, and about half an acre of Lawn and Kitchen Garden.—Apply by letter only to A. Z., Mr. Fisher, Stationer, Angel Court, Tottenham Street, City, E.C.

Outdoor Propagator and Knifeman.
THE ADVERTISERS are in WANT of a thoroughly experienced MAN in Budding, Grating, and general Outdoor work. To save trouble, none need apply who cannot give satisfactory references as to ability.—Apply, in own handwriting, to SALTMARSH & SON, Moulsham Nurseries, Chelmsford.

FISHER, HOLMES, AND CO. are in WANT of a YOUNG MAN who thoroughly understands Propagating and the Management of Hollyhocks, Dahlias, and other Florists' Flowers, also Herbaceous Plants.—Apply, stating age, references as to ability and sobriety, and wages expected, Handsworth Nursery, Sheffield.

WANTED, a MAN and his WIFE, without incumbrance, nine miles from London.—The Man must understand Gardening, Horse, &c.; the Wife must be a good Plain Cook.—Apply by letter only, J. W., 21, Southwark Square, Borough, London.

WANTED IMMEDIATELY, a COUPLE without Children, to Live at a Lodge.—The Wife as Dairymaid and to Bake for the House. The Man as Labourer in the Garden or Farm.—Apply to J. RIBWAY, Esq., Fairlawn, Tunbridge, Kent.

WANTED, a HEAD SHOPMAN, in a Wholesale and Retail Provincial Seed Establishment. Must be thoroughly up to his business, and have a good address. To a suitable person the place will be permanent, and salary progressive. Unexceptionable references.—Apply, with particulars, age, &c., to Q. E. D., Gardeners' Chronicle Office, W.C.

WANTED a first-class FURNISHER and SALESMAN.—Good character for ability, sobriety, and honesty, indispensable.—Apply at 16, Maida Vale, W.

WANT PLACES.—Letters to be Post Paid.

EXPERIENCED GARDENERS (or as GARDENER and BAILIFF), of various qualifications, recommended to Gentlemen.—Further particulars given on application to Messrs. E. G. HENDERSON & SON, Wellington Nursery, St. John's Wood, London, N.W.

H. DOULTON & CO.'S GARDEN EDGING TILES

THESE TILES ARE MANUFACTURED IN
VITRIFIED STONE-WARE AND IN TERRA-COTTA OF THE BEST MATERIAL
WHICH IS BURNT TO AN EXTRA DEGREE OF HARDNESS,
AND WARRANTED IMPERISHABLE.

They will be found to be far preferable to Box and other Edgings, as they require no attention when
taken up less room, and do not harbour Snugs, &c.

PRICE LISTS of the above, and also of **TERRA-COTTA GARDEN VASES, FOUNTAINS, FERRIS
FLOWER-POTS, FERN-CASES, &c.**, may be had on application to
DOULTON AND CO., HIGH STREET, LAMBETH, S.E.

PAXTON'S STRAWBERRY CRINOLINE.

The **STRAWBERRY CRINOLINE** is in the
table, made in halves, so as to be used without
the plant. It is 16 inches in diameter, and stands
above the ground, galvanised. Its use is to prevent
berries from slugs, contact with the soil, frost,
moisture, and other nuisances. They are considered
10 years at least with care.

Price per Gross, £4.

The **STRAWBERRY CRINOLINES** are deemed
who use them to be of the greatest use in keeping
clean and assisting its growth—thus in the process
large crops. For particulars see Illustrated Catalogue
Testimonials sent to us by our patrons last year.

The contrivance is by the late Sir Joseph Paxton
after testing them for one season in his own garden.

"Hills," gave his approval of their usefulness. The right to Manufacture them was transferred to

The net Premiums, £27,711. The net Profit from 1843 to 1868, £11,122. The net Profit for the year ending in 1868, £1,412,400. The net Profit for the year ending in 1868, £1,412,400. The net Profit for the year ending in 1868, £1,412,400.

THE LANDS IMPROVEMENT COMPANY.

Incorporated by Special Act of Parliament. John Clinton, Esq., W. D. Frederick L. Dashiell, Esq., Henry Farquhar, Esq. (Messrs. Hennes, Farquhar & Co.), 16, St. James Street, S.W. John Horatio Lloyd, Esq., 1, King's Bench Walk, W. Charles Watkin Williams Wynn, Esq., M.P. (Chairman), 2, Lower Berkeley Street, Portman Square, W.

THE SOCIETY of PAINTERS in WATER COLOURS. THE SIXTY-FIFTH ANNUAL EXHIBITION IS NOW OPEN, at Pall Mall East (close to the National Gallery), from Nine till Seven. Admittance 1s.; Catalogue 6d. WILLIAM CALLOW, Secretary.

Home News.

THE COURT in SCOTLAND.—On Friday morning the Queen went out with Princess Beatrice, and in the afternoon drove to the Glassalt Shell with Princess Louise and Prince Leopold. On Saturday the Queen went out in the morning, and in the afternoon drove out with Princess Beatrice. On Sunday the Queen and Royal family attended Divine service in the parish church of Crathie. The Rev. Dr. Taylor, minister of the parish, officiated. On Monday, being the Queen's 50th birthday, her Majesty spent it quietly with the Royal family. Her Majesty invested Prince Arthur with the Order of the Thistle, and Prince Leopold with the Garter, and afterwards planted a tree in commemoration of the day. In the afternoon the Queen and Royal family were present at a dance given in honour of her Majesty's birthday to the servants, tenants, keepers, and others resident on the estates of Balmoral, Aberfeldie, and Birkhall. The dance was held in a large marquee close to the Castle, and commenced at half-past 5.

THE PRINCE and PRINCESS of WALES.—On Saturday the Prince returned to Marlborough House from Sandringham. On Sunday the Prince and Princess attended Divine service in the Chapel Royal, St. James's. The Hon. and Rev. R. C. Boyle preached the sermon. On Monday morning the Prince rode out. The Crown Prince of Denmark arrived at Marlborough House on a visit. The Prince and Princess met his Royal Highness at the Curving Cross, Piccadilly. In the evening the Prince was present at the anniversary dinner of the Royal Geographical Society at White's Rooms. On Tuesday the Prince went to Frogmore, and visited Prince and Princess Christian. The Princess drove out with the Crown Prince of Denmark. On Wednesday the Prince and Princess, accompanied by the Crown Prince of Denmark, went to Epsom races. On Thursday morning the Prince rode out with the Crown Prince of Denmark. Prince and Princess Christian visited their Royal Highnesses and the Crown Prince of Denmark at Marlborough House, and remained to luncheon. In the afternoon the Princess and the Crown Prince of Denmark drove to Kew, and visited the Duchess of Cambridge.

PRINCE and PRINCESS CHRISTIAN.—The health of Princess Christian being much improved, her Royal Highness, with Prince Christian and family, are shortly expected at Balmoral.

TRIAL of ELECTION PETITIONS.—The trial of the North Norfolk petition has resulted in the defeat of the petitioners. Mr. Justice Blackburn, on Monday, gave judgment that the sitting members, Sir E. Lecon and the Hon. F. Walpole, had been duly elected, and that there was no ground for departing from the usual practice as to costs, which the petitioners must pay. The Conservatives of Breton have presented a petition against the return of Lord Hyde, on the ground of bribery and corrupt practices.

PARLIAMENTARY MOVEMENTS.—The Conservatives of Marylebone have invited Mr. Roebuck to become a candidate for that borough, on the resignation of Mr. Harvey Lewis. Mr. Odger and the other Liberal candidates for Stafford have consented to a preliminary ballot for the purpose of deciding which two candidates of that party shall go to the poll.

THE COPPER COINAGE.—A proclamation has been issued by the Queen in Council, declaring that no copper coins, other than the bronze coinage issued in 1860, shall be allowed to pass or be current in any payment whatsoever within the United Kingdom after the 31st of December next.

THE ALABAMA and HER BUILDERS.—Messrs. Laird, of Birkenhead, have published an account of their connection with the Alabama, which they abstained from making public so long as negotiations were pending between the two Governments. They state that it was notorious to the Government, to the public, and to the Minister of the United States, that the vessel was intended to be employed as a vessel of war, although the real purchasers were not known. It was generally suspected that the vessel was intended for the Confederate Government, and though Messrs. Laird do not say that they entertained a different opinion, they take their stand on the opinions of the highest legal authorities, that such a knowledge on their part would not lay them open to the imputation of having directly or indirectly infringed the law. Munitions of war were openly supplied by merchants in this country to both belligerents during the war, and all that Messrs. Laird contend is, that they are no more open to animadversion for having built a vessel for the Confederate Government, than Messrs. Baring & Co. are for having built others of the same class.

Government, than Messrs. Baring & Co. are for having built others of the same class. The Alabama, however, was neither equipped nor armed when she left the Mersey, and Messrs. Laird were consequently innocent of any infraction of the law. The English Government thought that the evidence before them was insufficient to justify them in detaining the vessel, seeing that she had not even a signal-gun on board; but, as it now appears, it was open to the American Consul at Liverpool, if he had thought proper, to have taken action in the matter at his own risk. He declined to do so; and it has since been ascertained that if the Government had stopped her, they might have found the law against them, and been liable to damages, as happened in the case of the Alexandria.

Foreign.

FRANCE.—The General Election took place on Sunday throughout France. Forty-one Deputies have been elected who have never before had seats in the Assembly. The number of Opposition candidates elected, or re-elected, amounts at the present time to 28. They have gained six and lost three seats. Second ballots were necessary in 59 cases, none of the candidates having obtained a sufficient majority. The significant fact established by the results is not the number but the quality of the Opposition. The Constitutional and moderate Oppositionists have been signally defeated in Paris, Lyons, Marseilles, and other large towns by Red Republicans, Socialists, and Radicals hostile to the Imperial dynasty. In Paris M. Gambetta, an advocate at the Paris bar, who was brought into notice by a very violent speech against the Emperor in defending one of the prisoners in the Baudin prosecution, has been returned by a large majority. M. Thiers has defeated M. Devinck, the Government candidate (though a Liberal), but will have to undergo a second ballot; M. Bancel, one of the most advanced Republicans, has defeated the moderate reformer and old champion of progress, M. O. Auler. M. P. Paul, one of the famous "five," has been returned by a decisive majority; M. Garnier-Pagés must undergo a second ballot in a fortnight, and will probably be defeated if the two opposing candidates come to an understanding; when M. Raspail, the Red Republican, will be returned. The Socialist Republicans, or anti-dynastic party, have agreed to unite at the second balloting, and choose the most extreme man; and hence, though M. Jules Favre is at the head of the poll, if the other three candidates who opposed him agree, as is expected, amongst themselves, M. Rochefort, who has made himself notorious for his abuse of the Emperor in the Lanterne, will be returned. MM. St. Paul and P. Paul, of the old Opposition members, have been returned, while M. Guérout, one of the favourite Opposition Deputies of last session, and the editor of the Opinion Nationale, in consequence of his suspension and his friendly with Prince Napoleon, has been thrown over by a majority of the voters, who, if not Republican, are at least hostile to the Bonaparte family. Some of the Opposition candidates have suffered rather unexpected defeats in the departments, M. Jules Favre being in a minority at Marseilles, Laire, Summe, and Lyons, where he had M. H. H. another Republican candidate, have been rejected for men of more advanced opinions, the former having been replaced by M. Raspail, and the latter by M. Bancel. M. Thiers has likewise failed at Lisle and Poitiers, and M. Glais-Bizoin at St. Brieuc. M. Jules Simon has been elected at Bordeaux, but was rejected at Toulon and at Perpignan. With the exception of some rioting at Amiens, L. Etienne, Angers, Lisle, Dijon, and Toulouse, the elections passed off quietly, but the results, as far as they have transpired, have exercised an unfavourable impression on the Bourse. The semi-official journals express the opinion that the principal features of the elections are:—The substitution of Radical Opposition for Moderate Opposition, the check given to the Orleanist and Moderate Republican candidates, and the general extinction of intermediate shades of opinion. The France says:—

"The Empire must not become reactionary like preceding régimes. Relying upon its liberal tendencies, it must assert itself in the face of the Revolution, which, while triumphing in the ballot in Paris, is disavowed by the immense majority of the French people." The Emperor received General Dix, the United States Minister, in farewell audience, on Sunday. His Majesty also received Mr. Washburne, the new Minister, who presented his credentials. Mr. Washburne said that at no former period have the people and Government of America desired more than at present to cultivate and perpetuate the traditional friendship which exists between the two countries. He also gave expression to the friendly sentiments entertained towards France by President Grant. The Emperor replied in terms equally friendly, remarking that good relations between France and America had existed without interruption during a century, and he cordially hoped this amicable understanding would be maintained. It is announced in most of the French papers that the principal shops in Paris will henceforth be closed on Sundays. This important social reform has been brought about by the Society of the Employés de Commerce, who inform the public that, with few exceptions, all the linendrapers, vendors of ready-made apparel, silk mercers, and hosiers have consented to close their shops on Sunday, and the employés "appeal to the good-will of the public to aid them in making the measure general." The ironclad Belliqueuse returned to Brest on Wednesday from a voyage round the world. This is the first vessel of this description which has performed so long a voyage. The Belliqueuse has sustained no damage. SPAIN.—In the Constituent Cortes on the 20th inst.,

after the adoption of the monarchical clauses, Senor Castelar acknowledged the virtues of the Duke de Montpensier, but said that being a Bourbon it was impossible for him to be King. In reply to this Admiral Topete the Minister of Marine, declared that the Duke de Montpensier was the best candidate. Immediately before the close of the sitting a violent discussion arose in consequence of an assertion of Senor Ayala, Minister of the Colonies, that the Republicans had no share in bringing about the revolution. Senor Ayala subsequently tendered his resignation, which was at once accepted. In the sitting of Friday clause 34, which determines that all laws enacted by the Cortes should require the royal sanction, was adopted. All the other clauses up to 70 were passed. Senor Ortez, Minister of Justice, brought in a bill permitting civil marriages and legalising those already contracted. In the sitting of Saturday Marshal Serrano expressed the regret of the Ministry that Senor Ayala had resigned before the House had concluded the discussion on the draft of the Constitution. Senor Ayala declared that he would give his support to the Government. In the sitting of Sunday clauses up to 94 of the draft of the Constitution were adopted. In the sitting of Monday the 100th article was adopted. In the sitting of Tuesday Senor Castelar criticised adversely the colonial clauses, and said, alluding to Cuba.—“If Spain had followed the example given by England in her dealings with Canada, and granted the liberties which the colonies claim for themselves, it would have successfully prevented the outbreak of an insurrection.” Marshal Serrano replied that General Dulce had granted the liberties required, but that party passions had blinded the inhabitants to the intentions of Government. The insurrection, as regards its physical strength, was almost suppressed, and 600 filibusters had lately been defeated; nevertheless, the moral disorder was likely to disappear more slowly. As soon as the normal state of things should be re-established the Government would, in conjunction with the Cuban deputies, suppress slavery by a well-considered measure, and proceed with inexorable severity against all persons engaged in the slave trade. In the sitting of Wednesday the last clauses were agreed to, and the solemn promulgation of the Constitutional Charter was to take place yesterday. It is said that Queen Isabella has declared that she will not abdicate in favour of the Prince of Asturias. The Government has refused to admit that any indemnity is due to the crew of the *Tornado*, or to Mr. McPherson, on account of their detention or on account of their alleged ill-treatment by the Spanish authorities. It has also declined to open the case anew before a special tribunal, and maintains the former decision as definitive. 600 volunteers have embarked at Cadiz for Havana. An imposing demonstration in favour of the Duke of Montpensier is expected at Seville. The bark *Don*, of South Shields, having caught fire, was scuttled close to the shore at Gibraltar.

PORTUGAL.—It is currently reported in Lisbon that Prince Augustus, brother to the reigning King of Portugal, has been offered the crown of Spain, and that he will marry the eldest daughter of the Duke of Montpensier. Prince Augustus was born in 1847. The proposed financial measures of the Ministry cause great agitation throughout the country. Count Taipa, lord of the bedchamber, has died suddenly of apoplexy.

SWITZERLAND.—The Federal Council has proposed to the French Government to hold a conference on the subject of the adhesion of the Papal States to the treaty of Paris for the assimilation of coinage.

DENMARK.—The Crown Prince left Copenhagen on the 19th inst. for Lubeck, on his way to London. His Royal Highness will remain in England on a visit to the Prince and Princess of Wales for a month or six weeks. The 27th of July is the day fixed for his marriage with the Crown Princess of Sweden.

PRUSSIA.—A royal ordinance has been issued convoking the Customs Parliament for the 3d June. The Minister of Finance has informed the North German Parliament that last year's Prussian deficit amounted to 9,863,431 thalers, and that it will be impossible to establish an equilibrium between the revenue and expenditure in the Budget of 1869-70, unless new taxes be imposed to the amount of 11,268,000 thalers, of which the Prussian portion would be 9,541,780. It is said that the Government will convoke the Prussian Diet for the 15th of June, if no arrangement be effected with the North German Parliament on the subject of the new taxes to cover the deficit. It is rumoured that the Minister of Finance has tendered his resignation. King William intends to restrict his journey to Hanover, Bremen, and Oldenburg.

AUSTRIA.—It is stated that the Bill relative to the Landwehr has received the sanction of the Emperor, and will be immediately promulgated. Archduke Rainer will be appointed commander-in-chief of the force.

HUNGARY.—The Empress left Pesth on Sunday night with her children for Vienna. The Supreme Court has determined that Prince Karageorgiewich, on furnishing bail, shall be set at liberty, in order to be able to prepare his defence.

ITALY.—The Viceroy of Egypt arrived at Florence on Sunday, and is lodged at the Pitti Palace. The King of Italy left Turin in order to receive his Highness, who remained in Florence until Thursday, when he left for Venice and Vienna. The Austrian Consul at Leghorn was assassinated in that city on Monday night while walking with the Austrian General Crenneville, who was also wounded in the face. It is believed that the Consul was struck by mistake, the real object of the assassins, who were two in number, being to murder General Crenneville from motives of personal vengeance connected with his command of the city during the state of siege in 1849. In the sitting of the Chamber of Deputies on Tuesday

Signor Massari said he considered the Chamber bound to express indignation at the murderous outrage at Leghorn. Signor Malechiori, the deputy for Leghorn, fully concurred in this feeling, but pointed out that during the Austrian occupation in 1849 General Crenneville had excited a deep and terrible hatred. The Minister of the Interior stated that the authorities had warned General Crenneville that his visit to Leghorn might be dangerous to him, and on that account had endeavoured to insure his safety. The assassins attacked him when just about to leave by sea. Fourteen persons have been arrested on suspicion. In the sitting of the Chamber of Deputies on Wednesday, General Menabrea announced that Signor de Filippo, Minister of Justice and Public Worship, had tendered his resignation, and that the portfolio had been accepted by Senator Pronti, whom he introduced to the House. It is said that Mazzini has left Lugano for London. He has addressed a letter to his “enemies,” in which he reiterates his well-known idea in favour of Republicanism, and denounces Italians under the present system of Government as the slaves of tyrants, the fools of corrupt officialism, and labourers in chains. The excavations at Herculaneum, undertaken by means of the 30,000*l.* granted by King Victor Emmanuel, have led to the discovery of a large room, which must have served for a kitchen. It contained a wooden clothes-press, entirely carbonised; 14 vases, a candelabrum and a lamp, in bronze, several vessels in glass and terracotta; a small marble statue of a Faun, and two broken tables, one in marble and the other in slate.

PAPAL STATES.—On Wednesday, after mass, the Pope delivered a powerful discourse condemning the errors which menace the Church and society. On Thursday, being the Feast of Corpus Christi, there was a splendid procession through the streets. His Holiness carried the Sacrament, and gave the benediction in St. Peter's, a large concourse of people being present.

RUSSIA.—General Von Kaufmann, Governor-General of Turkistan, was entertained on Monday at a banquet in St. Petersburg. He made a speech, in which he declared that for Russia the period of conquest in Central Asia was at an end, and that a time of peace had now commenced. He added that the war with Bokhara was not in contradiction with this view, as it did not originate with Russia, but was rendered necessary as a defence against the hostility of the Emir of that country.

SERBIA.—The Porte has sanctioned the construction of the Eastern Railway *via* Belgrade in accordance with the express desire of the Servian Government.

THE PRINCIPALITIES.—In the sitting of the Senate on Wednesday M. Telle brought in a motion demanding that in future Government officials should abstain from interference in the elections, and that any person guilty of corrupt practices at elections should be punished. He, moreover, threatened to propose a vote of want of confidence if the Ministry did not take such cases in hand.

TURKEY.—Mr. Elliot, the British Ambassador at Constantinople, has handed to the Sultan an autograph letter from the Queen, thanking him for the cordial reception he gave to the Prince and Princess of Wales during their recent stay in Turkey. The Turkish Government is in negotiation with British firms for the building of three turret monitors.

INDIA.—Official reports from Peshawur state that the Ameer of Badukshan was collecting an army of 4000 men in the interest of Shere Ali, hoping to subdue Turkistan without the assistance of the latter. Shere Ali reached Cabul on the 10th inst., and had an interview with Yakoob Khan in the presence of all the Sardars and the army. Rumours from Bokhara state that the Russians were moving against Kokhand and Colob (?). Cholera is rife at Baroda. The Madras Railway has been opened as far as Gooty. One of the Somalis sent into the interior of Africa from Aden in March last, to inquire about the supposed survivors of the *St. Abb's*, has returned, after visiting a large number of the tribes. He expresses his conviction that no Europeans are now in the country.

AUSTRALIA.—The following is a copy of a telegram received by the Agent-General for South Australia on Saturday from the Government at Adelaide:—“Northern territory party arrived at Port Darwin, all well, February 5. Good port, good land, good water; survey proceeding actively; township lands ready middle of March. Climate healthy. Sent from Galle, May 15, 8.50 A.M.”

UNITED STATES.—Admiral Koff and the Government agents in Cuba report that the insurrection is weak and declining. The American revenue officers have been ordered by the Government strictly to enforce the neutrality laws, and to prevent the sailing of expeditions to aid the insurgents. Chief Justice Chase has decided that the United States Government cannot collect income-tax from foreigners who hold its bonds, and that the sums already collected must be refunded. The *New York Times* states that the Internal Revenue Department is preparing to carry out this decision, and that it will involve the reimbursement of several thousand dollars. It is said that Mr. Peabody is about to return to America, in order to end his days in his native place.

Parliament.

THE House of Commons reassembled on Thursday after the Whitsuntide recess, but the attendance of members, particularly on the Opposition side, was extremely meagre. On the order for going into Committee on the Customs and Inland Revenue Duties Bill, Mr. WARD MUNT commented on the inconvenience and hardship of forcing the taxpayers to pay five quarters' taxes in one year, and by making so many due at the same time. He also maintained that

the effect of the new plan on the balance of the Exchequer dry at one time and full at another would compel the Chancellor of the Exchequer to borrow to pay the public creditors, and thereby to disturb the natural operation of the money market. The CHANCELLOR of the EXCHEQUER, in reply, said that the quarters' Income-tax were always paid in the financial year, and that the Treasury business would be equalised either by borrowing of the Treasury or by reduction of the national debt, or by payment of annuities for the extinction of terminable annuities. With regard to the effect of his scheme on the money market and the Bank, it was not the intention of the Government to interfere in the “cocker up” the other. Mr. CRAWFORD, of the Bank, Mr. BARNETT, Mr. SAMUDA, Mr. FOWLER, condemned the language and the spirit of Mr. Lowe; while Mr. MORLEY and Mr. STANTON approved of his determination to make himself independent of the Bank. After some further amendments, the most important of which was an exemption of brood mares from licence duty, a motion by Mr. C. S. READ to exempt mares under 16 from duty was defeated on a division of 28. On the order for the committee on the Service Pensions Bill, Mr. FAWCETT proposed an amendment that the further consideration of the Bill be deferred until an inquiry had been made into the duties attached to the sinecure offices of Privy Seal and Chancellor of the Duchy of Lancaster, which would for the first time be entitled to be under the Bill. Mr. GLADSTONE opposed the amendment, which was eventually withdrawn. The motion then went into Committee, when Mr. BROOKS reported progress. The motion was negatived on a division of 15, and the Bill passed through Committee with amendments. Sir H. SELWIN-IBBEY'S Bill was considered in Committee, and on the motion of Mr. Alderman LUSK its operation was suspended in the metropolis. Yesterday Mr. CANDLISH moved on behalf of the hon. member for Brighton a motion upon the employment of women and children in agricultural pursuits would be postponed. MACFIE moved that, in the opinion of this House, time had arrived when the interests of trade, commerce, and the progress of the arts and sciences in this country, would be promoted by the abolition of the law for inventions. Sir ROUNDELL PALMER supported the motion. The House was left sitting.

City Intelligence.

MONEY MARKET, FRIDAY.—BRITISH CONSOLS closed at 93½ to 93½, both for Mortgage Account; New and Reduced Three per Cent. closed at 92½; Bank Stock, 241 to 246. Exchequer BILLS to par; Indian Five per Cent., 114½ to 114½; FOREIGN: Spanish, 28½; Italian Loan 1861, 57½; Tobacco Bonds, 86 to 87; Turkish Five per Cent., 43½ to 43½; Ditto Six per Cent., 66 to 66; Brazilian, 80½ to 81; Peruvian, 7½ to 7½; Egyptian Bonds (1864), 86 to 87; Ditto (1868), 78 to 78; roy's Seven per Cent., 79½ to 80; Ditto (1868), 92½ to 93½; Honduras, 83 to 85; United States Bonds, 79½ to 79½; Erie, 18½ to 18½; 95 to 96.

Metropolis and its Vicinity.

THE QUEEN'S BIRTHDAY.—Monday being the birthday of her Majesty, the event was celebrated by the usual demonstrations in London and Westminster.

THE SHRIEVALTY OF LONDON AND MIDDLESEX.—Alderman Causton and Mr. James M. Smithfield, will offer themselves as candidates for the forthcoming election of Sheriffs for London and Middlesex.

NATIONAL RIFLE ASSOCIATION.—The spring meeting of this association was held on Thursday at Cambridge in the chair. It was determined that the camp should be formed on July 3, and it was understood that a body of regulars would be attached to the Volunteers on this occasion.

ROYAL GEOGRAPHICAL SOCIETY.—The annual meeting of this society was held on Monday at the Royal Institution, Albemarle Street. The Founder's Medal had been awarded to Professor Nordenskiöld, of Stockholm, and the Victoria Medal to Mrs. Somerville, who, in her 89th or 90th year, has been occupied in solving abstruse mathematical problems. Sir Roderick Murchison delivered his annual address. The anniversary dinner of the society took place on Tuesday evening at Willis's Rooms, and was attended by the Prince of Wales, Prince Hussam of Egypt, the Duke of Devonshire, and other distinguished persons. Sir Roderick Murchison, the president, in proposing the toast of the Prince of Wales, said that his Royal Highness only came to them on that occasion as a traveller, but he had also brought with him the spirit of a true geographer; and if the great exertions contemplated by Sir S. Baker should be successful, it would be a successful issue if it had not been for the personal influences and the great exertions of the Prince. That proved that his Royal Highness was not only one of the active agents in bringing these

The Prince of Wales, who was loudly cheered, thanks in the following terms:—

I feel gratified and touched by the very kind... the president has been good enough to pro... in which you have been pleased to receive... instances, and at all times, it would give... to attend the interesting anniversary... Society, but I feel doubly proud at being... as the vice patron of the Society. The pre... kind enough to allude to me as a traveller... that I feel almost ashamed to be spoken of... when I see around me so many dis... who have travelled almost from one end of... I cannot but be grateful to the Queen... Mother for leaving at an early period given... of travelling and of seeing so many coun... some permission having been given to my... that neither they nor I can fail to derive... seen so many and such deeply interesting... No doubt much information in... may be obtained from the valuable... books that are now so frequently pub... at the same time I feel convinced—and I... every gentleman who is a member of this... with me—that there is no method of... exact, and lively acquaintance with... except by seeing them with your own eyes... touched by the kind manner in which Sir... has alluded to my name, in connection... upon which my travelling com... Baker, has entered. We must all miss... this evening, and I cannot but regret that... this country rather suddenly in order to... arrangements for his important enterprise, and... I was unable to be present here, and to... all his friends. Sir Roderick Murchison has... in some degree instrumental in helping Sir... planning his enterprise, which the Viceroy of... greatly at heart. I need hardly tell you that if I... of any use towards the accomplishment of... is a source of deep gratification to me. When... first arrived in Egypt the Viceroy had in... of a great object, namely, the... of the slave trade on the White Nile, a measure... with the ordinal approval, not only of all... of all free and right thinking persons in all... will. The difficulties of that enterprise must... under any circumstances, but they were... greater in the case of a European. But Sir Samuel... a man of energy, and determination, and it was... would go through any undertaking that he had... and would accomplish everything that was in... human endeavour.

THE CRUISE OF THE RESERVE FLEET.—On Friday... the fleet was tacked in order of succession... hauled to the wind in open order for the night... sail to topsails and topgallant sails, with... and north-westerly. On Saturday... after 7 o'clock, the fleet bore up to... order, and stood away on a south-... course for the next appointed rendezvous... miles south of the Lizard. On Sunday the fleet... the Cornish coast between the Land's End... and the Lizard in a magnificent line of 2½ miles... under all plain sail and low steam. At about... 11 1/2... the fleet, and at 3 P.M. the red and white... of the Eddystone Lighthouse became visible... service was performed on board all the ships of... at the usual time in the forenoon, all officers... that could be spared from constant duty... A few minutes before 5 P.M. the fleet... Head, close in with the shore, and shortly... opened to view from Plymouth, rounding... Point under reduced speed, but with all sail set... leading in with the fleet in splendid line... distance. Luffing round Penlee Point, the ships... slowly for a short time with their heads towards... light-house on the west end of the breakwater; but... Lawsand Bay had been half crossed, the Agincourt... the 11 war-ships astern of her in... procession along the outer face of the... water, until nearing the Mew Stone, when... the ships in succession hauled their wind... the southward and stood out into the Channel... two columns of divisions with their heads to the... ward for the night. As the last ship of the fleet... along the outer face of the breakwater, the... flag, flying at the main of the Agincourt, ... from a frigate in the Sound with 17 guns, ... from the flagship of the Port Admiral at Devon... and returned the salute with the same number of... The fleet lay off the land all night, and on... day was joined by the naval cadets from the train-... ship at Dartmouth, who had been sent for to... a day's exercise in evolutions under steam. The Agincourt proceeded to Portsmouth, ... the Lords of the Admiralty disembarked on... day and returned to London.

AFRICAN EXPLORATION.—Miss Alexandre Tinné, ... lady who became so well known a few years ... as an African explorer, has, according to letters ... Tripoli, reached Mourzouk in safety, and was ... the chief of the Tarouks to escort her and her ... retinue to the starting post of the annual ... for Soudan. Miss Tinné recently imported ... Barbary a velocipede of the latest Parisian manu- ... but finding it not adapted for the sands of the ... Desert, she presented it to the Pasha of Tripoli... READERS IN THE CHURCH OF ENGLAND.— ... of London has given practical effect to a ... which has long been discussed—viz., the ... of appointing laymen as readers for the ... of incumbents of overworked parishes, under ... from the bishop authorising the holder, ... the nomination of the incumbent, to conduct

services for the poor in school and mission rooms, and in the open air. At a service held in the bishop's private chapel at London House, eight readers have been formally admitted, four for the parish of St. John's, Hoxton, one for the mission district of St. Luke, Bethnal Green, one for Acton, and two for St. John's, Fitzroy Square. After part of the usual morning service the bishop delivered to each candidate a copy of the New Testament and a formal commission stating that it was granted at the request of the incumbent, and would remain valid until revoked by the bishop or his successors, or at the written request of the incumbent.

ROMAN LONDON.—The tessellated pavement in Bucklersbury attracted 3000 visitors on Thursday last, 12,000 on Friday, and 16,000 on Saturday.

THE INDIA MUSEUM.—The India Museum having been removed from Fife House to the new India Office, it is now re-opened for public inspection.

FRIENDLY SOCIETIES.—At the Odd Fellows A. M. C. at Sunderland last week, the Grand Master of the Order read a letter from the Earl of Lichfield, stating that his lordship, Lord Romney, the Hon. E. Stanhope, and other gentlemen interested in the subject of friendly societies propose to make arrangements for a deputation to wait upon Mr. Gladstone with a memorial, praying the Government to appoint a Commission to inquire into the various evils in connection with the management of many of the friendly societies, both certified and uncertified, established throughout the country, for the purpose of providing insurances upon lives, and relief in sickness and old age for members of the working classes. It was decided that the grand master, with three other members, to be selected by the court of directors, shall accompany the deputation to Mr. Gladstone.

NEW PARK AT HAMPSTEAD.—In consequence of the death of Sir Thomas Wilson, the late lord of the manor of Hampstead, a scheme has been proposed which, if carried into effect, will give the inhabitants of Marylebone, Kilburn, Belsize, Camden Town, Haverstock Hill, and St. John's Wood very great advantages. It is proposed by the Hampstead vestry to take on lease, at a moderate rental, with option of purchase, an area of between 50 and 60 acres in the neighbourhood of Finchley Road. It is expected that the new lord of the manor, Sir John Mayson Wilson, will not be indisposed to meet the wishes of the inhabitants if the parish of Marylebone should unite with that of Hampstead, and the Metropolitan Board of Works should co-operate in promoting the success of the scheme.

THE TRADES' UNION BILL.—The various trade societies have determined to hold an aggregate meeting of trade unionists of London and the provinces in Exeter Hall on the 23d June. Mr. Samuel Morley, M.P., has consented to preside, and Mr. Mundella, M.P., Mr. Harrison, and others will be present. The subject of this Bill has been warmly taken up by the various trade societies in the provinces. At Carlisle, Warrington, Leeds, Burton-on-Trent, Sheffield, Northampton, Cheltenham, the Potteries, and other leading towns, meetings have been held at which it has been resolved to use every means to support the Bill introduced into Parliament by Mr. T. Hughes and Mr. Mundella. In Birmingham, so desirous are the working men to give all the aid in their power to the measure, that the second annual congress of trades' councils and societies in that town, which had been announced for the 21st June, has been postponed until the 23d August. In Glasgow and Greenock the same feeling prevails, and has been effectively expressed by the working men. In Dublin also the strongest approbation of the Bill has been expressed, and at a public meeting held there in the Mechanics' Institute it was resolved to send deputations to wait upon the 20 or more members of Parliament resident in that city and neighbourhood to urge them to support the Bill. A large number of delegates from all parts of the country are expected to be present at the great meeting in Exeter Hall, which is to be held under the direction of the London Conference of Amalgamated Trades.

ESCAPE OF THE CAPTIVE BALLOON.—About a quarter past 4 on Tuesday afternoon this monster balloon broke loose from its moorings and sailed away in the direction of Harrow-on-the-Hill. It appears that the rope by which it was held captive became entangled round its roller, and this causing too great a strain upon the rope produced the accident, which might have been attended with the loss of many lives if there had been in the car at the time the usual number of passengers. To show the violence with which the balloon broke away it may be mentioned that the rope when broken coiled itself in an instant round a stout spar of wood nearly 5 feet long, which it tore out of the circus and carried with it into the air. In half an hour the great balloon was almost invisible. It passed near Tring and Aylesbury, and at length fell on Bernwood Farm, on the estate of Sir Harry Verney, where it was secured, though not without some injury.

THE PUBLIC HEALTH.—The Registrar-General's Weekly Report states that in the week that ended on Saturday, May 23, 3953 births and 2880 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 23 per 1000 persons living, being 21 per 1000 in London, 27 in Edinburgh, 24 in Dublin, 20 in Bristol, 17 in Birmingham, 27 in Liverpool, 24 in Manchester, 22 in Salford, 26 in Sheffield, 25 in Bradford, 20 in Leeds, 22 in Hull, 18 in Newcastle-upon-Tyne, and 35 in Glasgow. The rate in Vienna was 38 per 1000 during the week ending the 15th inst., and in Berlin 32 per 1000 during the seven days ending the 13th inst. In London the births of 950 boys and 961 girls, in all 1911 children, were registered in the week. In the corresponding weeks of 10 years, 1859-68, the average number, corrected for increase of population, was 2141. The deaths registered in London during the

week were 1281. It was the 20th week of the year, and the average number for that week, corrected for increase of population, was 1351. The present return is therefore 70 below the estimated amount.

Provincial.

BIRMINGHAM.—A public meeting, promoted by the Liberal-Conservative Association of this town, was held in the Town Hall on Tuesday, "with the view to petition the House of Lords against the disendowment of the Church in Ireland." The Earl of Harrowby presided, and the principal speakers were Mr. Newdegate, M.P., Mr. Charley, M.P., Mr. S. S. Lloyd, Dr. Evans, and the Rev. Brewin Grant. The meeting, to which admission was by ticket, numbered about 2500, and was comparatively orderly. Mr. S. S. Lloyd moved that the Irish Church Bill involved a violation of the Act of Union, an attack upon the security of property, and a renunciation of the principle that the Government of the United Kingdom is Protestant, and that the House of Lords will consult the best interest of the country by rejecting it. Mr. Newdegate seconded the resolution, which was carried by a large majority. A petition for presentation to the House of Lords was adopted.

BRADFORD.—The Right Hon. W. E. Forster met his constituents in this town on the 20th inst., and in the course of his speech made the following remarks on the relations of England and America:—

"Bear with me for a few minutes while I talk to you upon a question which I have very deeply at heart, upon which I have often spoken to you before our relations with our kinsmen on the other side of the Atlantic. Let it be clearly understood that I am speaking solely for myself. I am not a Cabinet Minister, and with regard to that question, I did not consult any of my colleagues, and no one is responsible for anything I shall say upon it except myself. You know how desirous I was for friendship with the United States. You know how I have struggled for it, and you know this because you have helped me in these struggles at the time when there was long to peace between England and America from what might have been done in England. You helped me with power, vigour, and earnestness to do what in my judgment was the right thing, so that England should not be responsible for any disagreement with our kinsmen in America. I do not wish to exaggerate that danger—I believe it is exaggerated already—but if there be danger at all, it is danger there. Well, it is a curious wish—I almost desire that you were all Americans. I wish, instead of talking to my Bradford constituents, I were talking to my American friends, for I believe I have friends in America. The chief reason why I at all allude to this subject this evening is on account of a speech which has excited a good deal of attention, made by a personal friend of my own Mr. Sumner. I need not say anything to you in praise of Mr. Sumner. Bradford people have studied American questions, before the civil war, and during the war, and afterwards. Mr. Sumner was a man who suffered for the cause of right, who suffered persecution, injury, and outrage in the course of the struggle which stood by his country in its great struggle as a patriot should have stood by it, and whose words therefore, even if I was not related to him, or terms of personal friendship, I should have spoken with respect and with the greatest possible attention. But Mr. Sumner has taken a ground which I greatly deplore. We in England had persuaded our Government to offer to submit to arbitration our dispute with America with regard to the injury inflicted by the Alabama and other vessels, it was not very easy to persuade Englishmen to do this, but we did persuade them. It was only right that we should do it, it would have been most wrong if we had not done it; we ought to have done it long ago. Mr. Sumner, in his speech, appears to reject this proposal of arbitration, and to demand instead of it an apology. Almost, I might say, an abject apology—and some untold sum of money besides. Why does he make this demand? Chiefly upon two grounds, on both of which I venture to think he is mistaken. He first says he demands it because the proclamation of neutrality that was issued in the Queen's name at the beginning of the civil war was uncalled for, and premature, and hostile to the United States; and because, secondly, having proclaimed neutrality, England broke it, and, to use his own words, threw her sword into the struggle. I am not here as an apologist for all that our Government or England has done. You know very well that I am not, for I was most earnest in deprecating much that was done. But I do say that in both these respects I venture to think that Mr. Sumner is mistaken. Now, with regard to the proclamation, that appears to be the great cause of offence against England in the mind of Mr. Sumner and of many influential and most excellent Americans at this time. I want you to look back to what was the position of England when she heard the news of the South having rebelled against the North, and the whole of the South being in the possession of the rebels. What was England to do? Why, it was her duty to declare that, however much she might lament that war, she would have nothing to do with aiding either side. It was the proclamation of our determination to have nothing to do with aiding either side that Mr. Sumner complains against. He says it was precipitate, premature, uncalled for, and hostile. Well, I believe it was necessary. It may have been issued two or three days earlier than it should have been issued. Mr. Adams had only just arrived, and perhaps it would have been better to have let him get thoroughly at home in the Embassy House in London before it was issued. But that is a mere matter of etiquette, and I cannot suppose a matter of that kind would really be thought to be a reason for disagreement between two great nations. That it would have been necessary within a few days I am perfectly sure. Just consider what was the state of things. There was this great war raging between these two portions of one country. The States of the South were in rebellion against the Union; there were a vast number of Americans—Southern Americans—in the Southern States and in England, trying all they could, using every possible exertion to, by some means or other, drag us into war. It was our business to prevent them doing so if possible. How could that be done? Simply and solely by the Queen issuing her orders that we should take no part in the struggle. It is said that there was war by land but no war by sea, and we made that war by proclaiming neutrality and recognising the South as a belligerent Power. Well, really that is not the case. It is true that the South had her ports locked up, and that very few vessels got out, although it is a fact which our American friends do not seem to remember that the four first vessels that came out with the flag of the South to prey upon Northern commerce came out of Southern ports, and that they came out a year before any vessel was built in England. And I believe that one of them—at any rate, a vessel—was adjudged by the North not to be a pirate, but to be a belligerent. But putting that out of consideration, there was war upon water, or else what was the meaning of blockade? The blockade was an act of war—sealing the seaports was an act of war. Mr. Sumner says, 'Do not consider

tions of this day week. There was no change in the value of Barley, Beans, or Peas, but Maize and Oats were rather cheaper. Flour remains inactive.

FRIDAY, May 28.

The trade during the past week has been disappointing, the predominance of unsettled weather and the limited arrivals having raised expectations of improved Wheat prices, while the operations of millers and dealers continued to be most restricted, and prices, excepting a trifling advance at Liverpool, Manchester, and Birmingham, remained unaltered. The Scotch reports speak of some slight concession in the value of Wheat. Spring Corn of all sorts has been held firmly, but we have no advance to quote. Flour was a retail sale at late rates. The arrivals off the coast this week consisted of 31 cargoes, of which, with those left over from last week, there remained for sale last night 13 cargoes. The floating trade has, on the whole, been steady. For Wheat arrived off the coast last week's prices were, in some few instances, slightly exceeded. Maize may also be called fractionally better, and Barley about unaltered. There appears to be more disposition to enter into engagements for forward shipment, but the high rates asked by sellers prevent business being done. Rapeseed and Cottonseed remain stationary. Paris, May 27.—The weather has been on the whole unfavourable for the growing crops, and prices of Wheat and Flour are stiffening. The six marks are quoted at equal to 36s. 6d. per 280 lb. The stock at the Halle is estimated at 7200 cwt.

The arrivals of all grain this week have been small. There was a poor attendance at this morning's market; the little English Wheat on offer was sold at an advance of 1s. per qr. There was more disposition to purchase foreign, and a considerable amount of business was transacted at a similar improvement. Spring Corn was unchanged in value. Flour was held for rather more money.

LIVERPOOL, Tuesday, May 25.—We had a fair attendance at this morning's market, and Wheat met with a moderate consumptive demand, at an improvement of 2d. per cental on the rates of this day week. Flour was in fair request, at an advance of 1s. per sack on the figures of Tuesday last. Indian Corn in good request, and 1s. per qr. higher on the week. Oats and Oatmeal quiet and unchanged. Peas in good demand, at Friday's reduction. Beans steady.

SEED MARKET.

Our markets being now very quiet, we have little to report this week concerning the agricultural seed trade. The small quantity of new foreign Red Clover seed which was left over has been bought up for speculation. White Clover and Trefoil seeds meet at present with no attention. There is a brisk inquiry for spring Tares, but as the stocks are quite exhausted, orders cannot be executed. A few small parcels have been sold at an advance of from 8s. to 10s. per qr. from the lowest point reached during the past season. Canary seed is in good demand at last Monday's quotations. French Hemp seed is 1s. per qr. dearer; of Dutch Hemp there is none offering. White Mustard seed is exceedingly scarce, and easily realises very high rates; prices are creeping upwards every week. Essex dwarf Rapeseed is firm, and is in good request. For Linseed values are well supported.

JOHN SHAW & SONS, 16, Water Lane.

METROPOLITAN MEAT MARKET.—May 29.

Best Fresh Butter ..	14s. per dozen lb.
Second do. do.	12s.
Small Pork, 5s. 0d. to 6s. 8d.; Large Pork, 4s. 4d. to 4s. 8d. per 8 lb.

Catalogues on application, Free by Post.

BY HER MAJESTY'S ROYAL LETTERS PATENT.
PATENT PLANT PROTECTORS.

THE GREATEST HORTICULTURAL NOVELTY OF THE DAY.

Terms of Prices can be had on application to the Patentee.

There are 12 kinds of UPRIGHT PROTECTORS Manufactured for growing Early Peas, Asparagus, Lettuces, Cauliflowers, and other Vegetables, and for raising Flower and Kitchen Garden Seeds; the prices varying from 8d. to 1s. 6d. per running foot.

DOUBLE-GROOVED AND DOUBLE GLASS-TOPPED PROTECTORS.

These are made with a double groove, for taking one sheet of glass over the other. The effect of this will be that the heat from the sun will be retained during the night, even if the wind blows cold and frosty.

No.	Height in Ft.	Ht. at Back.	Width of Glass.	Per Running Foot.
No. 14.	8 in.	11 in.	18 in.	2 6

UPRIGHT PROTECTORS FOR STRAWBERRIES.

No. 15.	8 in.	10 in.	12 in.	2 0
No. 16.	8 in.	11 in.	16 in.	2 6

These are made with Holed Tiles at the bottom for the Strawberries to grow through.

No. 17.	8 in.	10 in.	12 in.	2 6
No. 18.	8 in.	11 in.	18 in.	3 0

These are made with Glass and Wire Ropes.

CIRCULAR PROTECTORS FOR STRAWBERRIES.

No. 19.	Circular, 10 1/2 inches in diameter, Glass 10 inches wide	2 9
---------	---	-----

FOR GROUND VINERIES.

No. 20.	Upright Protector, Glass 18 inches wide, height in front, 8 inches, height at back, 11 inches; fitted with Radiating Tiles and Wire Ropes	2 6
No. 21.	Circular Protector, with Wire Rope, 12 inches in diameter, Glass 12 inches wide	3 0
No. 22.	Circular Protector, with Wire Rope, 16 inches in diameter, Glass 16 inches wide	4 0

Larger sizes can be made. Prices by Special Contract.

Estimates will be given for fitting up Vineyards on this system.

SPECIAL CONTRACTS FOR FITTING UP LARGE ESTABLISHMENTS WILL BE GIVEN.

In consequence of the Large Demand for these Protectors, it will be necessary TO GIVE ORDERS AT ONCE, in order to ensure a supply for the Autumn. All Orders will be executed in strict rotation.

Agents are immediately required. Only one will be appointed in each City or Town.

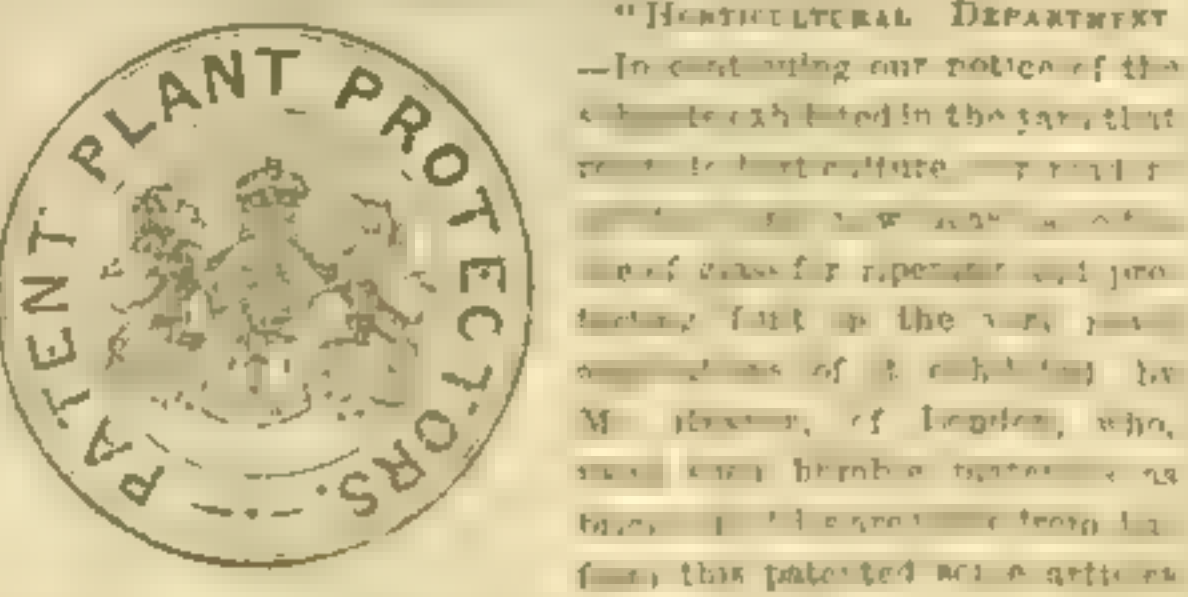

Application should at once be made to the Patentee.

Specimens can always be seen any day, at the Office of the Patentee, or at the Gardens of the Royal Horticultural Society, on application to Mr. J. C. Fox.

SPECIAL ANNOUNCEMENT.—In order that this valuable Invention may be universally adopted in all Gardens great or small—the Patentee has determined to supply the Protectors on the lowest terms. If 500 are taken at one time, they will be Sold at **THREEPENCE EACH**, so that they may be used by the acre. These will be made of one uniform size, and can be used with ordinary bricks, so that the Protectors can be made to any height or any width.

For further particulars, apply to the Patentee,
MR. W. E. RENDLE, 68, WELBECK STREET, CAVENDISH SQUARE, LONDON, W.
 Specimens will be exhibited on the grounds of the Royal Horticultural Society, at their Great Show at Manchester in July.

PATENT PLANT PROTECTORS.
 BATH & WEST OF ENGLAND AGRICULTURAL SOCIETY

From the "Hampshire Advertiser," June 3, 1869.
 "Horticultural Department"
 In continuing our notice of the above exhibition in the year that was last culture, we find that the most successful and profitable part of the year was the exhibition of a collection of plants, which were exhibited by Mr. Rendle, of London, who, we are glad to hear, has been successful in his application for a patent for these protectors.

PATENT PLANT PROTECTORS.
 BATH & WEST OF ENGLAND AGRICULTURAL SOCIETY.

From the "Hampshire Independent," June 3, 1869.
 "One of the most interesting objects to be seen at the Horticultural Society's Exhibition was the Patent Plant Protectors, exhibited by the Southampton Book Society. They are capable of a wide application, as they are suitable for growing Peas, Asparagus, Lettuces, Cauliflowers, &c. &c. There were other designs for raising Flower Seeds, protecting Plants in Ribbon Borders, &c. They can also be adapted for Strawberry cultivation, for Ground Vinerias, &c., as well as in many other ways. They appear to be comparatively inexpensive, while, with reasonable care, would be durable. Generally the Garden appliances produced at this meeting show that in this respect, as well as in many others, there is no lack of enterprise in the way of placing in the hands of practical Horticulturists ample means, well adapted for aiding the prosecution of their plans, and the securing the best possible results."

FRANCIS MORTON & CO., LIMITED.

ESTABLISHED OVER QUARTER OF A CENTURY.

HEAD OFFICES AND WORKS, LIVERPOOL.

LONDON BRANCH—35, PARLIAMENT STREET, WESTMINSTER.

GLASGOW BRANCH—145, QUEEN STREET, ROYAL EXCHANGE SQUARE.

AGRICULTURAL FIRE-PROOF IRON ROOFING, BUILDINGS, AND SHEDDING OF EVERY DESCRIPTION.

The special attention long given by F. M. AND CO. to the constructive details of IRON ROOFS, BUILDINGS, &c., enables them to offer the guarantee of a practical experience, extending over many years, in the Designing and Construction of Iron Roofs and Buildings for almost every variety of purpose, in all parts of the world, thereby avoiding the disappointment frequently arising from faulty execution. This Department of F. M. AND CO.'S business is placed under the special supervision of the Company's Architect, whose professional skill ensures the preparation and erection of Buildings in a style and completeness which such special supervision can alone accomplish.

FRANCIS MORTON & CO.'S

IRON BUILDINGS

ARE SPECIALLY ADAPTED FOR

VOLUNTEER DRILL HALLS;
ARCHERY AND PUBLIC GROUNDS;
CRICKET PAVILIONS; BOATHOUSES;
REMOVABLE AND PERMANENT BILLIARD ROOMS;
RIDING SCHOOLS; GYMNASIUMS, &c.

Illustration of Shooting Box, or Country House, &c., as erected for the Right Hon. Lord Hill.—Designed for remote situations or leasehold properties.

Illustration of F. M. & Co.'s Single Span Permanent Hay Barn, from 15 feet to 45 feet span. Fireproof, economical, efficient, quickly erected, and ensuring the Hay Harvest being housed and stored in the best condition for market or home use.

All inquiries should state span required, length of barn, height from ground line to eaves, and if timber uprights (which are the cheapest) could be found on the spot, or if iron columns are desired.

FRANCIS MORTON & CO.'S

IRON BUILDINGS

ARE SPECIALLY ADAPTED FOR

COVERED FARM YARDS; GRANARIES;
CATTLE SHEDDING; BARK HOUSES;
HAY BARNES; CORN SHEDS;
LABOURERS' COTTAGES; ENTRANCE LODGES;
SHIPPONS; STABLING, &c.

Illustration of Farmyard covered with F. M. & Co.'s Galvanised Iron Fire-resisting Roofs. The covering in of Stack and Rick Yards, though so strongly recommended by the highest practical authorities, has hitherto been attended with too much uncertainty and expense, owing to the costly and perishable roofing usually proposed, affording at the same time no security against fire. Our Iron Roofs are economical, easily and quickly erected, save all cost of future repairs and maintenance, cannot be injured by violent winds, are removable without injury, and, above all, fire-proof.

Crops thus housed are effectually protected from the disastrous ravages of vermin, wet, hailstones, snow, and general weather, and are brought to market in the best condition.

Illustration of a building, possibly a government building or warehouse, showing its structure and roof.

Attention to Gardeners.—When you ask for GARDENERS' WARRANTED PRIZE... and... also the Corporate Mark, Obtain...

THE COURT in SCOTLAND.—On Wednesday, the 26th ult. the Queen went out with Princess Beatrice...

THE PRINCE AND PRINCESS OF WALES had a dinner party at Marlborough House on Friday evening.

LEGAL and GENERAL LIFE ASSURANCE SOCIETY, 15, Fleet Street, Temple Bar, London, E.C.

THE SOCIETY OF PAINTERS, WATER-COLOURISTS... Author...

THE SOCIETY OF PAINTERS, WATER-COLOURISTS... Author...

Palace. On Thursday morning the Prince rode out with the Crown Prince of Denmark. The Prince and Princess, and the Crown Prince of Denmark, were afterwards present at the inspection of the Honourable Artillery Company at the parade-ground, Finsbury. In the afternoon the Princess drove out with the Crown Prince of Denmark. The Prince went to the House of Lords. In the evening the Princess, accompanied by the Crown Prince of Denmark and Prince Louis of Battenberg, went to St. James's Theatre. It is announced that the Prince has taken for the Ascot week Cooper's Hill, at Englefield Green, the residence of Mr. Albert Grant, late M.P. for Kidderminster, and formerly the residence of Sir John Cathcart.

PRINCE AND PRINCESS CHRISTIAN, with their infant children, left Frogmore House on Friday evening for London, for the purpose of proceeding to Balmoral by the limited mail. On their arrival at Euston Station, the Princess exhibited symptoms of fatigue and faintness, with the return of the hysteria from which she has suffered of late, and which prevented her accompanying the Queen to Scotland. Sir William Jenner, who was waiting to join the train, advised the immediate return of her Royal Highness to Frogmore. The Royal party, therefore, returned to Windsor, where they arrived at a quarter to 11 o'clock. On Monday, Prince Christian left Frogmore for Balmoral. The Princess will remain at Frogmore for the present.

THE CABINET.—A Cabinet Council was held on Saturday in Downing Street.

THE PEERAGE.—Mr. Alexander Hugh Bruce, of Kennet, Clackmannanshire, has been declared by the House of Lords to have established his claim to the ancient Scottish barony of Balfour of Burleigh, created in 1608 by James I., and forfeited by attainder shortly after the rebellion of 1715.

PARLIAMENTARY MOVEMENTS.—The death of Sir Robert Clifton has created a vacancy at Nottingham. Mr. Bernal Osborne, Mr. P. W. Clayden, and Mr. Charles Seely, who were unsuccessful at the last election, Mr. Roebuck, Mr. Milner Gibson, Mr. T. W. Evans, and Mr. G. Ward are mentioned as likely to become candidates for the vacant seat. There are six candidates in the field for Stafford—Messrs. Evans, Wentworth, Odger, and Jenkins (Liberals); the Hon. Captain Talbot, and Mr. Thomas Salt, jun. (Conservatives). The test ballot for the selection of the two Liberals who are to go to the poll was to take place yesterday.

Foreign.

FRANCE.—Several electoral meetings were held in Paris on Saturday, but they were conducted in the most orderly manner. The public interest is now fixed on the second balloting, which will take place on the 7th inst., and it is thought that the Corps Législatif will meet on the 22d. The *Journal Officiel* declares that the news published by the *Moniteur* relative to an agreement between France and Italy for the evacuation of Pontifical territory by the French troops is totally false. M. Bardel, the French agent at the island of St. Thomas, has been sent to Mexico to succeed the Clerk of the Consulate, M. Farne, who has been assisting the United States Minister in the task undertaken by him of protecting the interests of the French residents. M. Bardel will hold no direct or official communication with the Government of Mexico.

SPAIN.—The Constitution was definitely voted on Tuesday by 214 to 55. Before the vote was taken, Senor Figueras explained that though the Republicans would vote against it, as they could not accept the Monarchical principle, they would nevertheless respect and follow it. In the sitting of Wednesday all the deputies, except those belonging to the Carlist party, signed the draft of the Constitution. Each deputy retained the pen with which he signed his name in commemoration of the event. The promulgation of the Constitution will take place simultaneously in Madrid and the provinces to-morrow, and on Monday the proposition to confer the Regency on Marshal Serrano will be discussed by the Cortes. The death is announced of General O'Donnell, of apoplexy. The resignation of Senor Ortiz, Minister of Justice, has not been accepted. General Caballero de Rodas has been appointed Captain-General of Cuba.

PORTUGAL.—The Queen of Portugal intends leaving for Italy on the 8th inst. The loan contracted with Messrs. Frunling and Goschen meets with great opposition in the Chamber of Deputies, but it is expected to pass. The financial policy of Count Samodoe has already effected reductions in expenditure amounting to about 500,000*l.*, and it is expected that in another year a financial equilibrium will be established.

BELGIUM.—The Countess of Flanders on Thursday gave birth to a Prince. In the sitting of the Chamber of Deputies on Wednesday, the Bill relating to the repayment of the 4 per cent. loan of 30,000,000*fr.*, and modifying the plan for the redemption of the 4½ per cent. loan was adopted. The three officials of the Department of Public Works appointed to represent Belgium in the Franco-Belgian Commission left on Tuesday for Paris. The project of taking the Empress Charlotte to the thermal waters of Bagnère-de-Luchon has been abandoned for the present, owing to the low mental state of her Majesty.

PRUSSIA.—The King has been compelled to postpone for a fortnight his journey to Hanover and Bremen on account of indisposition. As his Majesty's health will not allow him to open the naval arsenal about to be created at the mouth of the Jahde, the complimentary visit of the English squadron to that port has been abandoned. In the sitting of the North German Parliament on Saturday, the Bill containing general regulations as to trade and the convention recently concluded with Switzerland for the protection of literary property, passed the third reading. The House

rejected the second reading of the Government Bill raising the duty on spirits. In the sitting of Tuesday the Bill for the taxation of the closing reports of the Bourse was rejected by 128 to 73. The Customs Parliament was opened on Thursday by the King in person. In his opening speech his Majesty said that the demarcation of the territory of the Customs Union will shortly be settled, when the legislation of the Customs Union will be introduced into certain portions of the Hamburg and Prussian territory. The draught of a new law relative to the Customs is announced, and also a Bill relative to the duty on sugar, regulating that on foreign sugar, and equitably proportioning it to the duty on home-grown sugar. Another revision of the Customs tariff will also be made. The commercial and customs treaty concluded with Switzerland will be laid before the House, as well as the commercial treaty with Japan. An ophthalmia of a contagious character prevails at Berlin, which medical men believe to be of the same nature as the Egyptian disease. Measures of precaution have been taken in consequence.

AUSTRIA.—The Viceroy of Egypt reached Vienna on Saturday evening, and was received with great state. It is stated the principal object of his Highness's visit to the different European Courts is to come to an understanding that the Suez Canal shall be declared a neutral passage to all nations; that the proposal has the support of Austria, Prussia, and England, but is opposed by France. The Emperor has presented to the Viceroy the Grand Cross of the Order of St. Stephen, and to Nubar Pasha, Egyptian Minister for Foreign Affairs, the Grand Cross of the Order of Francis Joseph. The *Official Gazette* of Wednesday publishes the law regulating the army contingent for the present year.

HUNGARY.—In the sitting of the Lower House of the Diet on Tuesday, the Government introduced Bills for the levy of this year's army contingent and for the coining of gold pieces of 10 and 20 francs. In the sitting of Thursday the address in reply to the speech from the throne, as proposed by the committee, was adopted by 255 to 142, after a debate of 11 days.

ITALY.—The Committee of the Chamber of Deputies on Monday rejected by a large majority the three financial conventions presented by Count Cambray Digny, and appointed a Select Committee of seven members to oppose these conventions. In the sitting of the Chamber on Wednesday, Signor Ferrari moved for a parliamentary inquiry respecting the circumstances connected with the concession of the Government tobacco monopoly to a private company. The motion owes its origin to the late action for libel brought by Deputy Civinini at Milan against a Milanese paper. The Chamber, by a majority of 127 to 94, adopted a proposal of Signor Bogni, requiring that before the inquiry takes place, the insinuations made in the evidence at the trial against a member of the House should be proved. The perpetrators of the murder of the Austrian Consul at Leghorn have been discovered. The object of the assassins was to take the life of General Crenneville, and it appears that the persons arrested had all suffered an ignominious beating by the general's order when he was commander of Leghorn, in 1849.

EGYPT.—The statement of a Paris paper that a coolness has sprung up between the Porte and the Egyptian Government is officially denied. The relations between the two Cabinets, on the contrary, were never better.

INDIA.—Ramtuhul Sing, of the late 17th Bengal N.I., a rebel of 1857, was hanged at Aziungurb on the 29th April, for the murder of Lieutenant Hutchinson, adjutant of the regiment, in that year. Cholera has broken out among the European troops at Gwalior, and several fatal cases have occurred. Another effort is to be made by the Government of India to rescue the Roman Catholic missionaries who are in captivity in Thibet.

CHINA.—Accounts received at Hong Kong of the fracas at Peking state that it originated in the French Charge d'Affaires, Count de Rochechouart, having jostled against a chair containing a brother of Prince Kung. The Prince struck the Charge d'Affaires across the face, and an apology having been demanded and refused, the French tricolour was hauled down. The other foreign ministers had taken up the matter, and had given the Chinese Government three days to apologise. Another account says that the Charge d'Affaires' pony ran into a chair containing the brother of Prince Kung, and that the Prince's outrider struck the blow; but whether he aimed at Count de Rochechouart, or at a member of his suite, is said to be uncertain.

JAPAN.—An extraordinary political change is announced. Several of the most influential Daimios have tendered to the Mikado their resignation of their rank, estates, and sea and land forces, for the purpose of strengthening, or rather re-creating a central and supreme government. A great council of Daimios will soon assemble in Yeddo for the purpose of settling the new Constitution of the country. A powerful naval force is being moved by the Mikado's Government against the rebels, who occupy Hakodadi. It is asserted that the latter are supported by French officers. The Mikado is expected to reside at Jeddo.

AUSTRALIA.—The death of "King Billy," the last man of the Tasmanian aborigines, a race which only half a century ago numbered 7000 souls, has been announced. There is still an aged woman left of the aboriginal population. An unseemly struggle has taken place for the skeleton of "King Billy," the head having been abstracted by the hospital authorities for the London College of Surgeons, and the rest of the body having been exhumed for the purpose of placing the skeleton in the Museum of the Royal Society of Tasmania.

UNITED STATES.—It is reported that President Grant has expressed his disapproval of the terms of

Mr. Sumner's speech on the *Ambush* reception of Mr. Motley at Liverpool has been commented upon in New York. The *Tribune* of his position as a distinguished man and a member of the United States; and that his reception is able to the desire of the British nation to see the *Tribune* endorse the tone of Mr. Motley's speech. It adds the hope that the friendly desires of the States will not be misinterpreted through the different views of the two countries on the question. It believes that the friendly and cordial speech of Mr. Forster opens the way for negotiations. A movement has been started of the establishment of a Constitutional Club in the United States. A weekly paper, the *Realism*, is published in New York for the advancement of realism, and a meeting is to be held in Washington, in which, it is said, they will carry a ticket in the field. The Indian war has been a collision between the troops and the Indians in Texas, near Fort Indians of the West are perpetrating massacres among the settlers.

CUBA.—General Duce left for Spain on Tuesday. It is asserted that his departure was made on of a hostile manifestation. The *Washington* correspondent of the *New York Herald* states that cargoes of war munitions have been sent to Cuba, and that a fourth will probably follow. This aid is already perceptible. The news of this nature is conflicting and indefinite. The Cuban policy of President Grant's administration is strictly pacific and neutral.

PERU.—Advices from Lima state that the Government of Peru has recognised the Cuban belligerents.

Parliament.

THE House of Lords reassembled on Monday the Whitsuntide recess. The Marquis of Lansdowne moved the second reading of the Newspaper Bill, the object of which was to repeal an Act of 1810, and certain other Acts, practically obsolete, and to take the taking out of licences for lectures at the Lord CAIRNS agreed in the propriety of repealing Acts if obsolete, but criticised the policy of the Secretary in putting in operation in March 1870, of 1799, for the purpose of stopping Mr. Murphy's intended lectures at Tynemouth, only for the introduction of the present Bill, which the Government proposed to repeal that Act. LORD CHANCELLOR said that the Home Secretary was perfectly justified in using any power he possessed to guard against the breach of two years' silence to follow from Mr. Murphy's lecture. He had acted not merely under the Act of 1799, but under an Act of the 8th and 9th of Victoria, answer to the Duke of SOMERSET the Marquis of LANSDOWNE said that a Bill pending in the House secured to the Museum a copy of every paper direct from the printers. The Bill was read a second time. On Tuesday the first Bill was read a first time, and the second reading fixed for the 14th of June. The Earl of GRANVILLE asked if the recent appointment of an Under-Secretary for Ireland was intended to be permanent. A military officer was to be considered disqualified. He censured the conduct of the present appointment to the late Sir E. Wetherall, whom the office while they intimated a want of confidence in his competence for the post. EARL GRANVILLE said that the appointment was permanent, and that a man, if otherwise qualified, would not be regarded as disqualified. On the part of the Government he disapproved of disparaging Sir E. Wetherall. The Earl observed that Sir Edward Wetherall had been especially to guard against the suspension of the appointment made at such a juncture was a matter of appointment. EARL GRAY asked if the Government intended to bring in a Bill to provide for the appointment of municipal functionaries possessing powers when found guilty of misconduct. LORD CHANCELLOR replied that the subject was under consideration, though it was not so simple as it appeared, for it involved some difficult points connected with the electoral powers of municipalities and the constitutional powers of the Government. On Thursday, before the Bill was introduced into Committee on the Life Peerages Bill, LORD CAIRNS said that he intended to propose an amendment to the preamble by striking out the words "of classes, and providing that only one peer should be created in any one year, and that the creation should take place unless the peerage should hold a particular office of State which would render him ineligible. The Earl of CAIRNS said that whether the amendment, instead of striking out the number of life peerages, would be to limit the number. LORD PENZANCE thought that the number of Lords should not only represent the party, but the active intelligence of the country, tried official capacity, and distinguished services of the great public departments of the State. He said some remarks by the Duke of CLEVELAND, EARL GRANVILLE, the House went into Committee. EARL STANHOPE moved an amendment to the grant in one year of any second peerage to any Cabinet Ministers or persons who had performed distinguished naval or military services. The discussion, in which the Marquis of SALISBURY took part, EARL ROSSSELL consented to a clause by providing that two peers only should be created annually instead of four, and that the number of such peers in existence at any one time

... exceed 28. Earl STANHOPE thereupon proposed his amendment, and the Bill, as amended by Mr. RUSSELL, passed through Committee. Yesterday Mr. STRATFORD DE REDCLIFFE called attention to the relations with the United States. The Earl of ... in reply, said that the British Government had gone as far as possible in the way of concessions. The demeanour of Mr. Reverdy Johnson in this country had evoked the most unmistakable manifestations of friendship for the United States, but Mr. Sumner's speech had elicited such a response as to show however much we desired peace, and however much we valued our good relations with the United States, there was one thing which we more highly prized than that was our national honour. The House ...

... Commons on Friday, in answer to Mr. ... Mr. GLADSTONE stated that the Government had no intention to meddle with the National ... Mr. MACFIE called attention to the Patent Laws, and moved a resolution that the time had arrived when the interests of the public would be promoted by an abrogation of the Patent Laws. Lord STANLEY, as Chairman of the Patent Commission, avowed that the inquiry had converted him to the opinion that the Patent Laws did more harm than good, and that there was inherent in a system of patents, apart from objections to the administration of the law. Mr. J. H. WARD, speaking as an inventor, a patentee, and a manufacturer, maintained that the abolition of patents would be a blow to the commercial greatness of England, for it was only by the perfection of our manufacturing processes that we could keep ahead of our foreign rivals. Mr. MUNDELLA treated this as a working man's question, and said that if the Patent Laws were abolished working men, who were the chief inventors, would carry their inventions to France and the United States. Mr. STAPLETON and Lord ELCHO also regarded the Patent Laws as beneficial to the working classes, and Mr. SAMUDA held that before any action was taken Parliament ought to have further information. The ATTORNEY-GENERAL said that the working of the present system could be remedied, and an attempt should certainly be made to amend and improve before abolishing. He entirely concurred in the recommendation of the Royal Commissioners that patent cases should be tried by a judge, with one or two scientific men as assessors, instead of by a jury, and he suggested that the subject should be referred to a select committee. Mr. DENMAN expressed his regret that the Government had not announced their intention of dealing with the subject next session. After a few words from Mr. SAMUDA in favour of amendment rather than abolition, Mr. MACFIE expressed himself satisfied with the discussion, and withdrew his motion. The arrival of the harbours of Falmouth, Plymouth, and Southampton, for embarking and landing the western mails was next brought under notice by Mr. R. FOWLER, and after a short debate, in which the members for those ports took part, the Marquis of HARTINGTON, on the part of the Post Office, said that as Plymouth had been selected after a full and impartial inquiry, he could not hold out any hope that the present arrangement would be disturbed. In answer to Mr. READ, Mr. BRIGHT said that the Government had no intention to discontinue the collection of agricultural statistics after the present year; and in answer to Mr. H. SELWIN-IRBISON, said that with a view to the prevention of accidents, the Board of Trade had issued a circular recommending all railway companies to adopt the "block system." The Irish Church Bill was recommitted, for the purpose of introducing a clause imposing a stamp duty on any order of the Commissioners of Church Temporalities in Ireland operating as a conveyance on mortgage of property. Mr. GOSCHEN moved the second reading of the Metropolitan Poor Acts (1867) Amendment Bill, the object of which was to provide for the better distribution of paupers in workhouses, the amalgamation of unions, the erection of lunatic asylums, and the establishment of district schools. The debate was then adjourned for a week. On Monday, on the motion for the third reading of the Irish Church Bill, Mr. HOLT moved, as an amendment, that the Bill be read a third time that day three months. Lord ELCHO seconded the amendment, which was opposed by Mr. CARDWELL, Mr. ALLEN, Mr. STAPLETON, Mr. MONSELL, Mr. BUTLER JOHNSTONE, and Mr. MILLER, and supported by Sir F. HENEGATE, Mr. ADDERLEY, Mr. J. G. TALBOT, Dr. BAILLIE, and Mr. W. JOHNSTONE. Mr. DISRAELI said that the result of the Irish policy of the English Government for many years past had been a continuous improvement in the condition of the country and the people down to the commencement of the Fenian movement, and if the same policy of conciliation had been permitted to go on working its gradual changes, in another 20 years Ireland would have been in the same condition as England and Scotland. He contended that the present Bill, aided by the measures on the land question, would produce tranquillity and disturbance, if not disaster, that the general organization and discipline of the Roman army would aim at the re-establishment of Papal supremacy, and that among other serious consequences of the struggle between Popery and Protestantism the policy of the Ministry would lead to a dissolution of the Union, followed by civil war, and another conquest of Ireland, a second siege of

Derry, and a second treaty of Limerick. The vote to be given that night was the most responsible which could be recorded, and he warned the majority that the day might come when they would have to admit that they had contributed to the disaster of their country. Mr. GLADSTONE, in reply, said that the maintenance of the State Church was a standing injustice to the people of Ireland, and constituted an inseparable portion of that system from which all the woes and miseries of the country proceeded. He contended that the Bill was erudite and just, and that it was about to be carried out with liberality, harshness, and rigour; and maintained that the provision made for the Church was ample and generous, regard being had to the numerical strength of its community and the work it had to do. He disbelieved the predictions that the Bill would permanently cripple Protestantism in Ireland, and expressed an earnest hope that the Church would pass triumphantly through the ordeal, and would emerge with a higher sense of her mission, and freed from the unjust privileges and the bitter memories which had been her unhappy heritage. The House then divided, when the amendment was rejected by a majority of 114; the numbers being 361 to 247. The Bill was then read a third time and passed. On Tuesday, on the motion of Mr. GLADSTONE, it was agreed that as the Queen's birthday was to be observed on Wednesday, the House at its rising should adjourn on Thursday. Sir H. VERNY called attention to the recent negotiations between the Canadian Government and the Hudson's Bay Company, and urged the Canadian Government to lose no time in completing the communication to the Rocky Mountains. Mr. R. N. FOWLER and Mr. KINNARD hoped that the interests of the native Indians would be considered in their transfer to the Canadian Government. Mr. SINCLAIR AYTOUN, Colonel SYKES, and Mr. SAMUELSON hoped that the scheme did not contain an Imperial guarantee. Sir S. NORTHCOTE said that the Hudson's Bay Company were unable to colonise this tract, because of its difficulty of access, their imperfect powers of government, and, latterly, because of the uncertainty of the Confederation scheme. He cordially eulogised the skill and temper displayed by Lord Granville in the negotiations. Lord BURY expressed great satisfaction at the termination of a long and tedious dispute, and advised the Canadians not to raise the question of the Hudson's Bay Company's right to this territory. Mr. MONSELL, in reply, said that it was the policy of the Government to call on the colonies to bear the cost of their own defence, and that the recent negotiations comprised an Imperial guarantee, which would be brought before the House in due time, and, as some excuse for it, he pointed to the undoubted Imperial advantages of the transfer. As to the natives, the Canadian Government had given the strongest assurances that their rights would be respected. Sir C. DICKER held it to be extremely improbable that the Cany trade would ever be diverted across the continent; and if the line from ocean to ocean were made for political purposes, the Canadians ought to pay for it. After some remarks by Mr. ELLICE, Mr. HADFIELD, and Mr. E. W. HAMILTON, Mr. GLADSTONE said he could give no other pledge on the matter of guarantees beyond this,—that they should only be employed to put an end to the state of relations between the colonies and the mother country which made them necessary. Mr. SEELY called attention to the report of the Select Committee on the American Mail Contracts, and after condemning the late Government for concluding the Cunard contract, moved a resolution to the effect that mail contracts should in future lie upon the table for 30 sitting days. The motion was seconded by Mr. BAZLEY, and supported by Mr. GRAVES. The Marquis of HARTINGTON opposed it, and said that we were bound by the convention with the United States to consider a reduction of rates at the end of the year, and he hoped that in a few years, even with the present contracts—if the correspondence went on increasing—the rate might be reduced to 3d. Mr. MOORE called attention to the case of Mr. O'Sullivan, of Kilmallack, who had been detained as a Fenian in Limerick Gaol for 18 months under a Lord-Lieutenant's warrant; and he moved for a Select Committee to inquire into the treatment of prisoners arrested under the suspension of the Habeas Corpus Act. Mr. C. FORTESCUE admitted that Mr. O'Sullivan had been treated with unnecessary severity; but the parties responsible were, not the Government, but the local authorities. After some discussion, the motion was negatived by 84 to 20. Mr. VANCE moved for a return of the number of petitions presented for and against the Irish Church Bill. On a division, the motion was negatived by 60 to 32. On Thursday the Government Bill for the creation of two High Sheriffs for the county of York, and the Burial Regulation Bill of Mr. Hadfield were withdrawn. The House went into Committee on the Bankruptcy Bill, when 28 out of the 132 clauses were agreed to. The Oxford University Statutes Bill was read a third time and passed. Yesterday, in answer to Mr. GOURLAY, Mr. CHILDERS said that he was entirely satisfied with the conduct and fitness for service of the Reserve, and that by the end of next year the whole of the Coast-guard Fleet would consist of iron-clad ships. The House was left sitting.

City Intelligence.

THE ENGLISH JOINT-STOCK BANK.—The three directors of the English Joint-Stock Bank, Captain Mandes, Mr. Ables, and Mr. Bradshaw, and Mr. Finney, the manager, were again brought before the Lord Mayor on Saturday. The case for the prosecution having been concluded, addresses were delivered by Mr. Metcalf on behalf of Mr. Bradshaw, and by Mr. Littler for Mr. Finney; after which the hearing was further adjourned to Tuesday, when the addresses of counsel for the defence were concluded. The Lord

Mayor then said that the arguments put forward for the defence were extremely weighty, and required consideration. He should therefore postpone judgment in the case until Monday next.

MONLY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 92½ to 92½ for Money, and 92½ to 92½ for Account; New and Reduced Three per Cents, 92½ to 92½; Exchequer Bills, 5s. dis. to par Indian Five Five per Cents, 111½ to 112½.—FOREIGN: Brazilian, 51 to 51½; Chilean, 96 to 97; Danubian Seven per Cents, 77½ to 78½; Egyptian 1861, 87 to 88; Ditto 1868, 77½ to 78; Venezuela's Seven per Cents, 82 to 82½; Ditto Nine per Cents, 91½ to 95; Italian, 56½ to 56½; Peruvian, 72½ to 79½; Portuguese, 35 to 35½; Ore! Vitebsk, 79½ to 80½; Nicolas, 64 to 64½; Moscow, 78 to 78½; Charkof, 77½ to 78½; Turkish Five per Cents, 44½ to 44½; Ditto Six per Cents, 67 to 67½; United States 5-20 Bonds, 80½ to 81; Erie, 18½ to 19½; Illinois, 91½ to 92½.

Metropolis and its Vicinity.

CELEBRATION OF THE QUEEN'S BIRTHDAY.—Wednesday being the day appointed by her Majesty for the celebration of her birthday, the official holiday took place at all the public offices; the guns of the Tower and the Park fired royal salutes, flags were hoisted on the public buildings and many of the churches, the bells of which rang out merry peals during the day. In the morning the usual parade took place in St. James's Park, at the back of the Horse Guards, in the presence of the Prince and Princess of Wales, the Duke of Cambridge, and Prince and Princess Teck. In the evening the clubs and shops at the West End were brilliantly illuminated, and the usual official banquets were given by her Majesty's ministers and the great officers of state.

ROYAL VISIT TO ST. BARTHOLOMEW'S HOSPITAL.—Monday being the day appointed for the annual visit of this hospital by the governors, the Prince and Princess of Wales, accompanied by the Crown Prince of Denmark, paid a visit to the institution, and took part in the ceremony, his Royal Highness in his capacity of president. The governors mustered in unusual numbers on the occasion. The Royal party were received at the entrance by the treasurer and a deputation of governors, who escorted them to the court-room, decorated with portraits of Henry VIII. and of several past governors and benefactors, and the interior of which has recently been restored and re-embellished. The Prince having taken the seat assigned to him as president, the minutes of a previous meeting of the governors were read and confirmed. A letter from Mr. Paget, the senior surgeon of the hospital, was read, stating that the Princess Louisa desired to present to the hospital a set of chromo-lithographs of the costumes of Raphael, to be placed in the ward under his charge. The thanks of the governors to her Royal Highness were voted by acclamation. After his Royal Highness had inspected the plans of a new storey which is about to be added to one of the wings of the hospital, the Royal visitors were conducted over the whole establishment, where they spent some time, visiting the various wards and seeing the whole of the patients, to several of whom the Princess said a kind word or addressed a sympathising inquiry. The physicians and their assistants were in attendance. During their tour of the wards the Prince recognised Sir Moses Montefiore among the company, and presented him to the Princess. While the inspection was proceeding the whole of the medical students at the hospital were assembled in the quadrangle. The Royal visitors took their departure shortly after 2 o'clock.

THE PRINCE OF WALES AND THE FREEMASONS.—At the quarterly communication of the United Grand Lodge of Freemasons, held in their hall in Great Queen Street on Wednesday evening, the Earl of Zetland, Grand Master, stated that he was authorised to announce that during his recent visit to the Continent the Prince of Wales had been initiated into freemasonry in Sweden, and that his Royal Highness had intimated his intention of immediately joining several English lodges. Under these circumstances he intended, in accordance with precedent, to propose at the next lodge that the rank of Past Grand Master be conferred upon his Royal Highness, with a seat on the dais. The Prince had intended to have honoured the Grand Lodge with his presence that evening, but, owing to the meeting falling on the day set aside for the celebration of her Majesty's birthday, he was, by the pressure of other engagements, unable to do so. His Royal Highness would, however, take an early opportunity of visiting the Grand Lodge, and being formally introduced to the brethren. The announcement was received with loud applause.

THE PEERS AND THE IRISH CHURCH BILL.—On Saturday afternoon about 500 delegates, representing the Protestant bodies of Ireland, had a conference with a number of Peers at Chesterfield House, the residence of the Duke of Abercorn, on the subject of the Irish Church Bill. The Peers present besides the Duke of Abercorn, were the Marquis of Salisbury, the Primate of Ireland, the Archbishop of Dublin, the Bishop of Derry, the Earl of Malmesbury, the Earl of Longford, the Earl of Huntingdon, the Earl of Bandon, the Earl of Erne, Lord Redesdale, the Earl of Harrowby, Lord Colville, the Earl of Verulam, Lord Gough, Lord Dunsany, Lord D. 23y, Lord Wharfedale, and Lord O'Neill. The Irish Church Conference was represented by the Archbishop of Canterbury, the Earl of Lanesborough, the Hon. David Parnet and others; the Central Protestant Defence Association for Ireland was represented by Viscount Barnard, Lord Guillamore, Mr. John Y. Burgess, &c. The Ulster Protestant Defence Association was represented by Sir William Johnson and others, while the National Protestant Union was represented by the Hon. Wm. Massey, Mr. Holt, M.P., General Lawrence,

Mr. Richard Nugent, Mr. M. Howard, the Rev. Samuel Short, Mr. W. Long, and General Bentley. The deputations were introduced by Lord James Butler, and an address from the Irish Church Conference was read, solemnly adjuring their lordships to reject the Bill as a revolutionary measure, and thereby to intervene between the Queen and a Bill which, in their opinion, violated the essential principles of the Constitution to which she owed her Throne, and involved a breach of the coronation oath. Dr. Trail, the Dean of Limerick, the Hon. David Plunkett, Q.C., the Rev. Dr. Bailey, of Monaghan, Mr. Spaight, of Limerick, Mr. Robert Hamilton, of Belfast, Mr. A. Mackroy, Sir Edward Grogan, and Mr. Gamble, Q.C., next addressed the meeting in opposition to the Bill. Sir John Steward then read an address from the Ulster Protestant Defence Association, asking their lordships not to sanction the principles of the Bill for various reasons. After some remarks from Captain Petre and Mr. C. Nugent, the Duke of Abercorn said:

"Gentlemen, am sure I may say on behalf of the Peers who have done us the honour of attending here to-day, that it has been very satisfactory to them, as it has been to me, to hear an expression of the views and feelings upon this highly important subject of gentlemen representing the deputations from the Church Conference of Ireland, the Presbyterians of Ireland, the Central Protestant Defence Association, the Ulster Protestant Defence Association, and the National Protestant Association. We fully appreciate the weight of those views and the importance of the occasion, although we are unable at this moment, as you can readily understand, to express any definite opinion on the subject. I can promise, however, that we shall take care that your views shall be fully represented to the meeting of Peers which will be held next week to consider the question prior to its discussion in the House of Lords."

The deputation thanked the duke for his courteous reception of them. On the same day a deputation from the same bodies had an interview with Earl Grey, who said that though he could not be expected to assent to all the views which the deputation had expressed, he would give his best consideration to the statements they had submitted to him.

THE ROYAL NAVAL RESERVE CRUISE.—The Lords of the Admiralty have issued the following note in reference to the conduct of the Naval Reserve during the recent cruise.—

"The First Lord of the Admiralty and the First Sea Lord, before leaving the Squadron of Reserve, commanded by Rear-Admiral Key, C.B., and Rear-Admiral Hornby, desire to express to the officers and men of the Royal Naval Reserve, who embarked for the Whitsuntide cruise, the satisfaction with which they have witnessed both the readiness of the Reserve to volunteer for this service, and the general willingness and good conduct of the men during the cruise. They have also noticed, with marked approval, the order and cleanliness of the force. They are glad to find that the officers and men of the coastguard, in respect both of efficiency and good conduct, thoroughly realise the expectations formed of a body of men especially selected from the navy to constitute its first reserve. They are also entirely satisfied with the behaviour of the officers and men of the fleet. The good feeling which has prevailed during the cruise between the three branches of the service enables the First Lord and the First Sea Lord to express their hope that in future years opportunities may be again afforded for the exhibition of this harmony, so essential to the strength of the British navy."

"H.M.S. Agincourt, Tersey, May 29, 1864."

THE PARK LANE IMPROVEMENT BILL.—The Select Committee of the House of Commons having refused to insert special clauses in this Bill to remunerate persons whose property would not be required for making the thoroughfare through Hamilton Place, the Marquis of Hamilton, on Tuesday, on the motion for the consideration of the Bill, as amended, moved that it be recommitted for the insertion of a clause declaring the lessees and occupiers of houses in Hamilton Place to be within the provisions of the Lands Clauses Consolidation Act, 1845. After some discussion the motion was negatived without a division, and the Bill was ordered to be read a third time.

EXTRAORDINARY ALLEGATION OF CONSPIRACY.—Mr. Rigby Wason, formerly M.P. for Ipswich, of Corwar House, Ayr, and 11, Pall Mall, applied to the magistrate of Marlborough Street Police-court on Wednesday either to grant a summons against Earl Russell, Lord Chelmsford, and the Lord Chief Baron, for conspiracy, or to bind him over to prosecute. Mr. Tyrwhitt, under the statute 22d and 23d Vic., cap 17, refused a summons, but, at Mr. Wason's request, bound him over to prosecute the charge at the Old Bailey.

THE PUBLIC HEALTH.—The Registrar-General's Weekly Report states that in the week that ended on Saturday, May 29, 1419 births and 2922 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 23 per 1000 persons living, being 21 per 1000 in London, 39 in Edinburgh, 24 in Dublin, 24 in Bristol, 17 in Birmingham, 28 in Liverpool, 24 in Manchester, 23 in Salford, 23 in Sheffield, 20 in Bradford, 20 in Leeds, 19 in Hull, 23 in Newcastle-upon-Tyne, and 35 in Glasgow. The rate in Vienna was 35 per 1000 during the week ending the 22d inst., and in Berlin 32 per 1000 during the seven days ending the 27th inst. In London the births of 961 boys and 963 girls, in all 1924 children, were registered in the week. In the corresponding weeks of 10 years, 1859-68, the average number, corrected for increase of population, was 2103. The deaths registered in London during the week were 1276. It was the 21st week of the year, and the average number for that week, corrected for increase of population, was 1342. The present return is therefore 66 below the estimated amount.

Provincial.

ABERDARE.—A fatal boiler explosion occurred on Monday morning at the Plough Colliery, the property of the Powell Duffryn Steam Coal Company, in the Aberdare Valley. The engines for raising the coal and pumping the water out of the pit were supplied with steam from three large flat-ended boilers, 36 feet long

and 7 feet in diameter, the plates being three-eighths of an inch thick. One of these, about half-past 6 o'clock, when the colliers were collecting round the pit's mouth previous to going down for the day's work, suddenly exploded. It rose from its bed to some height, and then broke into three pieces, which were thrown between the stack and engine-house, and fell across the fence of the Taff Vale Railway, 50 yards off. At the same time a great quantity of rubbish rose in the air, and was scattered in all directions. It fell upon the adjoining houses and passed through the roofs and ceilings till it reached the lower floors. George Rose, a stoker, who was firing one of the other boilers at the time of the explosion, was killed by the boiling water and mud which fell on him. David Richard, a collier, aged 16, was sitting when a stone fell on him and killed him on the spot; Daniel Griffiths, a collier, aged 32, was also killed on the spot; David Lewis, a labourer, who had just gone into the ash-pit when the accident happened, was scalded to death, and four other men were injured by the falling rubbish. The surgeons of the works were promptly on the spot, accompanied by neighbours, who rendered all the assistance they could to the injured.

LEICESTER.—On Monday evening a very crowded meeting in this town adopted a petition to the House of Lords against the Irish Church Bill. The Rev. Dr. Corvan and the Rev. W. Corvan attended as representatives of the Central Protestant Association in Dublin, and delivered lengthened speeches on the subject.

LIVERPOOL.—On Monday morning Mr. Motley, the new American Minister, received, at the Adelphi Hotel, addresses from the Liverpool and American Chambers of Commerce. Mr. Dudley, the American Consul, introduced the president of the American Chamber, who briefly welcomed the Minister, and presented the address, which warmly congratulated Mr. Motley on his appointment, and expressed an earnest desire for the maintenance of friendly relations. Mr. Motley, in reply, said:—

"Mr. President, and gentlemen of the American Chamber of Commerce in Liverpool, I thank you very sincerely for your kindly words of welcome on my arrival in England as the representative of the United States. You may be assured that it is the earnest hope and wish of the Chief Magistrate of the Union, of his Administration, and, as I believe, of the American people, to cultivate faithful, friendly, and equitable relations with her Majesty's Government and with the British people. The happiness of the world, the advancement of civilization, and the best hopes of humanity, are dependent upon an accord among all the branches of the human family, but more especially between two such leading nations of the earth as the British Empire and the American Republic, so nearly allied by blood, so closely connected by so many public and personal interests, so adjoined to commerce and to the cultivation of the arts of peace. That my strenuous efforts will be made towards the furtherance, so far as in me lies, of the most thorough and mutual good understanding between the two nations—the only basis of an enduring friendship and all kindly relations in accordance with those great principles of reason, honour, and justice which are immutable, and the only safe and unerring guides for nations and individuals, I beg you earnestly to believe. In conclusion, I have the honour to thank you once more, in the name of the United States Government, for the courteous and cordial address in which you have expressed your friendly feelings, and for my own part I ask you to believe that I am truly sensible of the very gratifying language in which you have been pleased to allude to myself."

Mr. H. Clarke, President of the Liverpool Chamber of Commerce, then presented an address, expressing an earnest desire for peace, and the hope that wisdom, moderation, and justice might animate the two Governments, and that all questions might be solved to the honour and interest of both nations. The address also alluded to the removal of the last vestige of England's protective policy, and expressed a hope that Mr. Motley would be the means of bringing about reciprocal free trade in America. Mr. Motley, in acknowledgment, said:—

"Mr. President, and gentlemen of the Liverpool Chamber of Commerce, I offer my respectful thanks for the cordial language of the address to which I have just had the honour of listening. I take pleasure in expressing my high appreciation of the friendly sentiments which you manifest towards my country; and you do me no more than justice in supposing that it will be my object, so long as I have the honour of holding the post of Envoy from the United States to her Majesty's Government, to do my best to promote a good understanding between two nations essentially of one race, bound to each other more closely, perhaps, by the ties of kindred, and by community of interests and pursuits, than two leading Powers of the world have ever before been connected in human history. Certainly it is superfluous for me to say that the best and highest purposes of these two great commonwealths, the British Empire and the American Republic, are best fulfilled when faithful friendship exists between them. The American people and the eminent Chief Magistrate whom they have so lately chosen to be depositary of their confidence and their power, are animated now, as always, by the hope and the desire of maintaining sincere and amicable relations with her Majesty's Government and with the people of this Empire upon the basis of entire justice and dispassionate regard for the rights and duties of both countries. That commerce between two such vast communities can thrive only when perfect confidence exists is certain, and it is earnestly the wish of the American people that our commerce with Great Britain and all the world should be intelligently extended and sustained. I have listened with attention to what you have said with regard to the commercial systems of Great Britain and America. You will, however, pardon me if I do not go beyond the limit of my official functions in order to enter into a discussion on fiscal policy, such important matters being regulated by the American people through their representatives in Congress, in accordance with what they believe to be required by the interests of the country. Mr. President and gentlemen, I thank you in the name of the United States Government for the courteous and kindly welcome you have given me as its representative; and I also express my sincere appreciation of the kindness of the language which you have been pleased to employ towards me personally."

Mr. Motley left for London by the 11.30 A.M. train, a special carriage being placed at his service by the London and North-Western Railway Company.

MAIDENHEAD.—The report that Earl Grosvenor has purchased Cliefden House, near this town, has been contradicted on authority.

MOLD.—A fatal riot occurred on Wednesday in the town, in consequence of the attempted rescue of a convicted collier by the mob. Large numbers were hurled at the police, and it became necessary to call in troops, and afterwards to send for more. The Riot Act. This proceeding had no effect upon the mob, who broke down the telegraph-office, and the troops were stationed, smashed the railway carriages, and threw showers of stones at the soldiers and police, who showed great forbearance. At length orders were given to the military to fire on the people, when two persons were shot dead, and several others were wounded. Numerous casualties are reported among the soldiers and the police, and one soldier is said to be mortally wounded. The jury at the inquest returned a verdict of justifiable homicide, and considered that the troops acted with great forbearance.

PRESTON.—The operatives of this town had a meeting last week to discuss the advisability of establishing a fund to assist weavers to emigrate to America and the British Colonies. A resolution was passed by the Association to the immediate establishment of a Weavers' Emigration Society.

SOUTHAMPTON.—A statue in honour of Lord Carnarvon was inaugurated in this town on Wednesday by the Earl of Carnarvon, with a grand ceremony and a banquet in the evening.

SOUTHSEA.—A public meeting was held on Monday evening in St. Luke's National School-room, to receive an address from Mr. Edward Harper, chairman of the National Protestant Institute, on "Mr. Gladstone's League with Popery so far as relates to the Church; 2. The Land; 3. Education and Moral Training." The Rev. B. D. Aldwell, incumbent of St. Luke's Church, presided, and the spacious room was crowded to the doors. At the conclusion of the address a resolution was passed by the Lords to reject Mr. Gladstone's Bill, and praying them all the support in their power, was carried.

TAVISTOCK.—Wheal Crebor Mine, near this town, was accidentally flooded on Friday morning in consequence of some men breaking into an old level. Only five men were at work in the low level at the time, one of whom, however, was drowned. His son was carried a considerable distance by the rushing water, but, though severely injured, managed to escape. Two of the others were rescued on Friday evening, and the fifth was not rescued until Saturday afternoon, when he was found still alive and sensible, but almost exhausted, having been incarcerated from 7 o'clock on Friday morning until 1 o'clock on Saturday.

TUNBRIDGE WELLS.—A four-horse coach has been placed on the road between London and this town, and is likely to prove a great success. It starts from White Horse Cellar, Piccadilly, at 10 A.M. daily, proceeds through Lewisham, Farnborough, and Havant, to the Sussex Hotel, Tunbridge Wells, where it arrives in 3½ hours. It is driven by an amateur, a wealthy gentleman, who is its proprietor, and has a general management of it.

WINDSOR.—A fast four-horse coach commenced running on Tuesday last from London to Windsor. It has been placed upon the road by Mr. Carington, who drove it in person, and it is understood that he will frequently take the team in hand. The passengers were the Marquis of Worcester, Hon. Capt. Carington, Capt. Johnston, Capt. ... and other members of the Four-in-Hand Club. The day at noon, Sundays included, it is to leave the White Horse Cellar, Piccadilly; commencing the journey from the Castle Hotel at Windsor each day at 4 o'clock. As in the olden days, there is an extra half-crown involved in the honour of the seat, in addition to the tariff of "5s. outside, 6s. in." It is expected that the novelty of the venture, and the picturesqueness of the journey compared with the rail, will cause the coach to be extensively patronized.

Ireland.

ORDER OF ST. PATRICK.—The Lord-Lieutenant held an investiture of the Order of St. Patrick at the Castle on Wednesday evening, when the insignia of the Order were conferred on the Earl of Gosford and Mr. Carysfort.

THE LORD-LIEUTENANCY.—The Earl and Countess Spencer intend leaving Ireland in the early part of next week for England. A rumour has been current that his Excellency does not intend to resign his office in Ireland in his official capacity, but it is believed to be without foundation.

THE IRISH CHURCH.—A large meeting of Protestants, not connected with the Established Church, was held on Friday evening in the Metropolitan Hall, Dublin, to protest against the Irish Church Bill. It was attended by great numbers of the most influential citizens, comprising many leading members of the Presbyterian and Independent denominations. Mr. Duncan presided, and addresses were delivered by Rev. Dr. Bryson, Rev. Mr. Kerr, and Rev. Mr. W. P. ... A petition to the House of Lords denouncing the Bill was adopted, with resolutions denouncing the Bill as calculated to undermine the principles of the Constitution, and to violate the Treaty of Union, and to establish the ascendancy of a foreign Orange hierarchy. A meeting convened by the Grand Orange Lodge, to protest against the passing of the Bill, was held at the Metropolitan Hall, in Dublin, on Thursday evening. 3000 persons attended, great numbers of whom wore orange sashes and similar emblems. Mr. W. P. ... occupied the chair, and the principal speaker was the Rev. Dr. Tresham Greer, who delivered a powerful address. Resolutions and a petition against the Bill were unanimously adopted. On the same evening a crowded meeting of Presbyterians was held at the ... gowan, county Down, in opposition to the Bill.

denounced the Bill because it favoured property which aspired to become the governing power.

THE MURDER OF MR. BRADSHAW.—No light has yet been thrown upon the mystery in which the murder of Mr Bradshaw is involved.

They have to contend with an almost insuperable obstacle in the reluctance of the peasantry to give the slightest aid in furthering the ends of justice.

THE IRISH BOYS AND BONS OF FREEDOM. "God save Ireland."

THE FENIAN PRISONERS.—The Corporation of Cork unanimously resolved on Friday to petition for the release of the rest of the Fenian prisoners.

ARRESTS OF FENIANS.—Joyce, the National schoolmaster, who was arrested in Westport on a charge of Fenianism, has been committed for trial at the assizes.

Scotland.

THE GENERAL ASSEMBLY AND THE IRISH CHURCH.—The Scottish General Assembly now sitting in Edinburgh has decided by 136 to 37 to petition the House of Lords against the Irish Church Bill.

MURDERS IN GLASGOW.—Janet Hay, widow, aged 60 years, residing in South Coburg Street, Glasgow, was murdered on Friday evening by her daughter, Agnes Hay, aged 37.

Law.

JAMES CHAMBERS.—The Duke of Newcastle.—Padwick v. the Duke of Newcastle.—Beyfus v. the Duke of Newcastle.—These were two interpleader applications on the part of the Sheriff of Middlesex.

Hall did not require any order. The Sheriff could proceed to sell the unclaimed property under the execution.

COURT OF ARCHES.—An anti-ritualistic prosecution, at the instance of the Bishop of Winchester, was commenced on Thursday in this Court, against the Rev. R. H. E. Wix, of Swanmore, Isle of Wight.

COURT OF CHANCERY.—(Before the Lords Justices).—In the matter of the London, Chatham, and Dover Railway Company.—This was an appeal from an injunction granted by Vice-Chancellor Stuart, restraining the directors of the Chatham and Dover Company to promote the Arbitration Bill now before Parliament.

Sporting.

THE JOCKEY CLUB.—One of the most numerous attended meetings of this Club for some years was held on Saturday evening at the offices of Messrs. Weatherby, in Old Burlington Street, to discuss certain resolutions moved by Sir Joseph Hawley, for the purpose of preventing the running of two-year-olds earlier in the year than July 1.

THE DERBY.—At the sitting at Tattersall's on Monday an extraordinary and unexpected interruption occurred. Sir Joseph Hawley lodged an objection to Pretender, the winner of the Derby, on the score that Mr. Sadler, his breeder and nominator, had died before the race.

Obituary.

LORD BROUGHTON died on Thursday evening at his residence in Berkeley Square, in his 33d year. His lordship, John Cam Hobhouse, was the eldest son of Sir Benjamin Hobhouse, and was educated at Westminster and Trinity College, Cambridge.

ADMIRAL SIR CHARLES H. W. FREMANTLE, G.C.B., died on the 25th ult., at his residence in Grosvenor Street, in his 68th year. He was the second son of Admiral Sir Thomas Francis Fremantle, G.C.B., and, consequently, brother of the Right Hon. Sir Thomas Fremantle, chairman of the Board of Customs.

SIR ROBERT CLIFTON, M.P. for Nottingham, died on Sunday morning, at his residence, Clifton Hall, near that town, in his 64th year. He was attacked nearly three weeks ago with typhoid fever, and gradually sunk, though his death was not apprehended by his medical advisers.

uncle, General Sir Arthur Clifton, the estate of Barton, a fine property adjoining Clifton, came into his possession, but this did not materially increase his income.

Markets.

COVENT GARDEN.—June 5. Business has somewhat improved again, the wholesale trade being much more active. Imports still continue heavy, comprising the usual varieties, the present favourable change in the weather suiting their transit from the south.

VEGETABLES. Lettuces, p. score, 1s to 2s. Mint, per bunch, 4d to 6d. Mushrooms, p. pott., 1s6d to 2s. Onions, per bushel, 15s. Parsley, per bunch, 6d to 6d.

ENGLISH WOOL. During the past week trade has been very dull, and the tendency is still downwards, farmers being more willing sellers now that the market is being gradually more and more supplied with the new clip.

HAY.—Per Load of 36 Trusses. SMITHFIELD, Thursday, June 3. Trade firm. Best Green Hay 110s to 128s.

CUMBERLAND MARKET, Thursday, June 3. Sup. Meadow Hay 106s to 116s. Inferior do. 95 to 100. New do. 80 to 95.

POTATOS.—SOUTHWARK, Monday, May 31. During the past week the arrivals coastwise have been lighter, and fresh samples made rather more money. Quotations: York Regents, per ton, 60s. to 110s.

LEADENHALL POULTRY, &c. THURSDAY, May 3. The close of the season in Plovers' eggs, they now make 4s. per dozen. A great scarcity of Leverets. Good supply of Surrey poultry, but not of poultry in general.

METROPOLITAN MEAT MARKET.—June 5. Best Fresh Butter 14s. per dozen lb. Second do. do. 12s.

METROPOLITAN CATTLE MARKET. MONDAY, May 31. We have a short supply of Beasts and a brisk demand. Prices are still high, and an early clearance is effected.

The Gardeners' Chronicle Newspaper.

SATURDAY, JUNE 12, 1869.

Count de Samodas, Minister of Finance, is deprecated by the great body of the people, who consider the system partial and impracticable. The prospects of the corn crops and of the coming vintage are very favourable, and promise an abundant yield. The vine disease appears to be nearly eradicated. The health of the Queen Donna Maria Pia continues to cause anxiety to the Court physicians.

BELGIUM.—The birth of an heir presumptive to the throne has caused general rejoicing throughout Belgium. The young Prince is to be christened Bau-douin, and his title will be the Count de Hainault. In the sitting of the Chamber of Representatives, on the 4th inst., the Bill relative to imprisonment for debt, as adopted by the Senate, was rejected by 51 votes to 33, and the Chamber afterwards adopted the original Ministerial Bill, by which imprisonment for debt is completely abolished.

HOLLAND.—The periodical election of members to the Second Chamber was held on Wednesday. Of 31 elections, the results of which are known, 20 of those returned are Liberals, 14 of whom sat in the last Chamber, and 11 are Conservatives, of whom three are new members. The results of six elections are not yet known. A second balloting will be necessary in five electoral districts. In Amsterdam the three Liberal candidates were all elected.

SWITZERLAND.—A telegram from Lausanne announces that a strike has broken out among the workmen in that town.

HESSE-DARMSTADT.—A Protestant Conference assembled at Worms on the 30th ult., and was attended by about 1000 delegates. The following declaration was adopted:—

"The Conference repels the supposition expressed in the Papal letter of the 13th of September, 1868, that Protestants would return to unity with the Catholic Church. It protests especially against the principles enunciated in the Encyclical letter and the Syllabus which are opposed to civilisation, and pernicious in their bearing upon political institutions. The Conference expects that all opponents of the common enemy of religious peace, national unity, and the free development of civilisation will closely unite at the present juncture. It declares hierarchical errors, and particularly the action of the Jesuits, to be the chief cause of the present deplorable religious differences. Only by the determined rejection of the hierarchical pretensions which have been renewed, and have been constantly on the increase since 1815—only by a return to pure Scripture, and by the recognition of the conquests of civilisation, can divided Christianity regain the peace which it has lost. Finally, the Conference declares that all efforts made within the Protestant Church to found a hierarchical power, or the supremacy of dogma, are a flat denial of the principles of Protestantism, and are simply so many bridges to Rome. All co-religionists are, therefore, exhorted to oppose with energy every tendency that may be dangerous to freedom of the mind or conscience."

With regard to the constitution of the Church the Conference took its stand upon the principle of the independence of each community. It desired that the direction of the Church should be constitutionally regulated, and that the Church administration should be responsible to the provincial synods.

PRUSSIA.—The King will leave Berlin on his visit to Hanover and Bremen to-morrow, and will probably be accompanied by Count Bismarck. The Viceroy of Egypt arrived in Berlin on Monday evening, and was received at the station by the Turkish Ambassador, the Commander of the Guards, Prince Augustus of Wurtemberg, the Commandant of the City, and the Prefect of the Police. His Highness proceeded to the Royal Palace. In the sitting of the Customs' Parliament on Friday, Dr. Simson was re-elected President by a large majority, and Prince Hohenlohe, the Prime Minister of Bavaria, Prince Shillingsfurst, and Duke Ujest were re-elected vice-presidents. In the sitting of Wednesday, the commercial and customs treaties with Switzerland, and the commercial treaty with Japan, were passed. In the sitting of the North German Parliament on Saturday, the budget for 1870 was definitely adopted. The revenue of the Confederation is estimated at 75,958,495 thalers, and the expenditure at the same amount.

AUSTRIA.—It is stated that the Emperor has accepted, under certain reservations, the invitation of the Viceroy of Egypt to be present at the inauguration of the Suez Canal next autumn. It is also stated that the Austrian Government will not take any definitive resolution touching the neutralisation of the Suez canal without previous agreement with France. The war budget for 1870 amounts to 7,496,600 of florins, or five millions more than in 1869, and is calculated on the basis of a strength of 800,000 men. The Minister of War will have to move for an extraordinary credit of five to six millions of florins. Bishop Rudigier, who had repeatedly refused to obey a summons of the Provincial Court of Justice on the alleged ground of a Papal brief enjoining him not to appear before a secular court, was conducted by the police before that Court on Saturday.

GALICIA.—Prince Czartoryski has declined the governorship of Galicia. Prince Sapieha has been prevailed upon to withdraw his resignation as Marshal of the Lemberg Diet. The Government has decreed that the Polish language shall be henceforth the only official and educational language through Galicia.

HUNGARY.—The leaders of the Opposition intend to ask for explanations from the Minister of War respecting the employment of Hungarian troops in repressing disturbances in Carniola. If the Minister does not furnish satisfactory explanations a motion will be made to the effect that all Hungarian troops be withdrawn from the Cis-Leithan part of the empire and removed to Hungary.

RUSSIA.—The Grand Duchess Marie Feodorovna, wife of the Czar, formerly Princess Dagmar of Denmark, gave birth on Monday to a Prince, who has received the name of Alexander. It is officially stated that the news published in Bombay of an advance of the Russians in Kokand is untrue. No warlike preparations are being made in the Russian possessions in

Central Asia. The Emperor intends sending an extraordinary envoy to Washington, to congratulate General Grant on his election to the Presidency, and to express the great value which his Majesty sets upon the maintenance of good relations between Russia and America.

GREECE.—Ahmet Rassim Pacha, the Governor-General of Epirus, has been deputed to deliver to King George the splendid jewelled sabre presented to his Majesty by the Sultan, as a token of restored peace.

ITALY.—In the sitting of the Chamber of Deputies on Saturday, Signor Lobbia declared that he possessed documents proving the corrupt participation of a member of the House in gains derived from the formation of the Tobacco Monopoly Company. After a long and animated debate, the Chamber referred to a committee the consideration of a proposal for a Parliamentary inquiry. On Thursday the committee recommended that an investigation be made by a committee of nine members to be chosen by the President, and that the inquiry should be conducted in two stages, of which the first would be private, and would be devoted to the examination of Signor Crispi and of the documents tendered by Signor Lobbia. If sufficient evidence should then be presented, the committee would prosecute the inquiry publicly, but if not, would discontinue the proceedings altogether. Signor Boughi opposed any secret action, and maintained that entire publicity was necessary from first to last. The debate was ultimately adjourned. The anniversary of the promulgation of the Constitution was celebrated on Sunday. In the morning the King and Prince Humbert, with Princess Margherita, reviewed the garrison, and in the evening there was a general illumination and fireworks. The King has left for Turin, and Prince Humbert and Princess Margherita have left for Milan and Monza.

PAPAL STATES.—The preparatory commissions for the Oecumenical Council continue their labours. Several bishops and missionaries and the Patriarch of Jerusalem have arrived. The Archbishop of Algeria is expected shortly. The postal treaty with the North German Confederation has been ratified and put in force. The desertions from the Pontifical army have again begun.

SERBIA.—The National Skuptschina has been convoked by a decree of the Regency for the 22d inst., to discuss the question of the reform of the Constitution.

THE PRINCIPALITIES.—The assertion of a French paper that the Minister of the Interior had threatened to drive the Jews out of the Roumanian villages is without foundation. In the sitting of the Chambers on Friday, the Minister of the Interior stated that certain measures would be laid before them relating to the Jewish question. At the same time he recommended that a Parliamentary commission should be appointed to investigate and report upon this difficult question.

TURKEY.—Daoud Pacha has left for Paris with the ratification of the Porte of the Roumelian railway contracts, which have been slightly modified.

EGYPT.—The Sultan has conferred the title of Pacha on Sir Samuel Baker, in order to give a proof of the interest he takes in the success of the latter's expedition. The Nile has begun to rise.

ABYSSINIA.—Mr. Thomas Powell, of Coldra Hall, Monmouthshire, eldest son of the late Mr. Thomas Powell, of the Gaer, the great colliery proprietor, and brother of Mr. Walter Powell, M.P. for Westbury, his wife, his son, his servant, a Swedish missionary just arrived from Europe, M. Macerer, and three native attendants, were murdered on April 17 and 18 by the Kirnama of the district Mika. Mr. Powell left England for the purpose of shooting elephants in Abyssinia, and proceeded to the country of the Bazaine tribe, contrary to the advice of the Consul at Massowah, who had told him that they were in a state of rebellion, and that Europeans would incur great danger in going near there. The Consul advised Mr. Powell to go to Ailette, a day's journey from Massowah, a quiet country, where there were numbers of elephants, lions, and rhinoceros, but as the elephants have small tusks, while those in the Bazaine country have enormous ones, Mr. Powell was persuaded by M. Macerer to enter the Bazaine district. It appears that M. Macerer had had a dispute with some of the Bazaine tribe; and that they took advantage of his going to reconnoitre a place where water was found, in company with Mr. Powell's servants and the Swedish missionary, to effect their murder, without their being able to defend themselves. Being fearful afterwards that Mr. Powell would punish them, they then murdered him, his wife, his son, and three Abyssinians in his tent. They then pillaged all that they could find, and spared seven or eight Abyssinian servants, two of whom have reached Kerim wounded bringing this intelligence. Mr. Powell was a magistrate for Monmouthshire and Glamorgan-shire, and married the daughter of the late Mr. John Jenkins, of Caerleon. There were five children living by the marriage, including the one they took out with them.

CAPE OF GOOD HOPE.—We have accounts from the Cape of the 4th May. Among the passengers by this mail are Isekelo, the son of the Basuto chief Moshesh, and Mr. Advocate Buchanan, the editor of the *Natal Witness*, forming a mission to the Imperial Government to represent the wrongs sustained by the Basutos in Sir Philip Wodehouse's late settlement of the frontier between them and the Free State. The Kaffir chiefs Macomo, Seyolo, and Xoxo, the political prisoners on Robben Island for several years, have been released and sent to Kaffirland, special lands being assigned to them. The packet also brings the 83-carat diamond, which is insured for 30,000*l.* Several more diamonds have been found and sent home, but secrecy has been maintained at the Cape about these discoveries through the royalty claims set up at Colesburg. According to news from Natal to the 17th April the results of the gold explorations were still unsatisfactory. Manch's

discovery has been denounced as a fabrication, if not altogether a fabrication. Many have persevered in their researches. Captain Zambezi expedition had been delayed by the death of Casement died.

INDIA.—News from the north states into the interior of Persia, and arrived despairing, it is said, of being able to introduce in Afghanistan are very gloomy. The reforms which Shere Ali's army is to be remodelled, and regular police Citizens will be forbidden to carry arms.

AUSTRALIA.—Accounts from Melbourne 25th April state that on the opening after the Easter recess a discussion took place of the bribery committee, when Mr. Minister for Railways, was expelled. Mr. also Mr. Butters, the ex-Mayor of Melbourne are expected to follow. A conference of the various colonial Chambers of Commerce place on the 3d May, with a view to bring about intercolonial free-trade quarter's revenue returns show an increase over the corresponding period last year revenue returns of the first quarter show 32,592*l.* from the corresponding quarter. At Brisbane extensive defalcations in the department have been discovered. Her Majesty Galatea, commanded by the Duke of Edinburgh from Sydney on the 3d inst. for Wellington.

NEW ZEALAND.—There is no news of respecting the New Zealand war, but the being very hard pressed by the colonial

UNITED STATES.—A railway train, on President and his party were passing, collision with a cattle train near Baltimore, and ran off the rails. One passenger and 20 others more or less severely injured well had a narrow escape. The President Mr. Charles Andrews as Minister at St. Mr. Russell Jones as Minister to Belgium sident has sent a special commissioner to investigate and report upon the general condition of the Dominican Republic sident has also appointed a commission members to investigate Indian affairs. tions to inspect the records of all Indian superintend the disbursement of annual report on the best means of civilising tribes. Constant Indian massacres are the Kansas frontier. Fifty soldiers have in the last two weeks. A panic excited settlers are flying eastwards. The focus ravaging Arizona. The troops fought Iveson, killing 30 and capturing eight. ment has been implored to send more Negro riots have occurred in Washington. cial election for that city, on Monday succeeded in returning most of the race of whom were negroes. The Radical mobbed a Democratic negro, and attacked who were protecting him, with so much the latter had to use their revolvers to negroes, killing one and wounding many sition recently put forward by some of the party, that the Alabama question should been widely discussed. No decision has been arrived at, many of the leading Rep. of the United States has given his opinion of the French Telegraph Company cannot with the territory of the United States permission of Congress.

CANADA.—The House of Commons of passed resolutions admitting Newfoundland Confederation.

NOVA SCOTIA.—The Nova Scotia Assembly, by a majority of 27 to 7, the resolution in reference to the annexed province to the Dominion of Canada. debate the Attorney-General delivered ing that Confederation was forced upon and favouring an appeal to England, or more extreme measure. It is considered however, that the question will be resolved John Tobin, ex-Member of the Nova Scotia, has committed suicide.

CUBA.—The insurrection is decreasing volunteers have forced General Dulce government of the island, which they hands of General Espinar until the arrival De Rodas.

Parliament.

IN the House of Lords on Friday, the for by Lord STRATFORD DE REDCLIFFE Alabama claims, and returns relative wheat, were agreed to. The Government Amendment Bill, after a few words ARGYLL and Lord HOUGHTON, was read and passed. The Religious, Education, and Incorporation Bill was considered in certain amendments by Lord BOWEN. On Monday the Earl of DEVON, a petition against the Irish Church Bill could not concur in its prayer, believing be a public misfortune if the House second reading, and thus presented amendments being introduced in committee for the third reading of the Man- triot Railway Bill, the Duke

... clause making it obligatory on the company to provide smoking carriages on their...
 On a division, the clause was rejected by 75 to 36.
 In reply to Lord COLCHESTER, Earl GRANVILLE said that if the Irish Church Bill became law, it would be necessary to propose a measure for the exemption of a free Protestant Church from the penalties of the Ecclesiastical Titles Act. On the consideration of amendments to the Parochial Schools Bill, the Duke of RICHMOND moved that the Board should consist of three instead of five commissioners. The motion was carried, on a division, against Ministers, by 84 to 49. The Duke moved the omission of clause 28, giving the Duke of half the members of the school committee to the larger heritors. On a division, the clause was retained by 73 to 45. The amendments were then agreed to.
 On Tuesday the Earl of HARROWBY gave notice on Monday next, on the motion for the second reading of the Irish Church Bill, he should move that it be read a second time that day six months. On the report of amendments on the Life Peerages Bill, the Duke of AROYLL expressed his opinion that the Bill would not increase the political strength of the House and that their lordships' House would never exercise the same influence as the House of Commons unless made elective. So long, however, as the leaders acted with prudence and conciliation, and kept themselves abreast of public opinion, they would always exercise their constitutional authority. The Marquis of SALISBURY said that the influence of the hereditary peerage was everywhere diminishing, and that this natural tendency could be checked only by making the House represent more the intellect and sympathies of the country. Lord MONTGOMERY thought that the House already sufficiently represented the intellect, wealth, and public services of the country. The Earl of MALMESBURY moved as an amendment that the report be received that day six months. Lord STRATFORD DE REDCLIFFE also opposed the Bill. Lord CAIRNS suggested that the Bill should not be rejected at the present stage. After some remarks by Earl RUSSELL, Earl GRANVILLE, and Earl GARY, the amendment was withdrawn and the report received. The Oxford University Statutes Bill, on the motion of the Earl of DERBY, was read a second time. On the motion of the Lord CHANCELLOR the House agreed to join in the addresses of the Commons, praying for a commission of inquiry into corrupt practices at elections in the cities and boroughs of Norwich, Oshel, Bridgewater, Beverley, and Sligo. On Thursday some private Bills were advanced a stage, but there was no public business to be transacted. Yesterday the Marquis of SALISBURY moved the second reading of the Beerhouse Bill, the object of which was to alter the character of the licensing laws in regard to beerhouses. The Earl of DERRY thought it ought not to be left to magistrates to give contrary decisions upon the granting of licenses. The House was left sitting.
 In the Commons on Friday, in answer to Sir J. GRAY, Mr. BRUCE said that O'Donovan Rossa, the Fenian prisoner, was for some time so violent and outrageous that he had been repeatedly punished, but that of late a marked change had come over him, and he was now reported to be the best behaved of all the Fenian prisoners at Chatham. Mr. HADFIELD complained of the expense and delays in the revision of the statutes, and moved a resolution to suspend entirely the present proceedings. Mr. GLADSTONE said that an unpaid committee was at work on the expurgation of expired and obsolete statutes, and that the only expense to the Treasury was the salary of the editor. Mr. L. KING and Mr. H. PALMER supported the motion, which was negatived, on a division, by 217 to 61. Mr. W. H. GREGORY moved a resolution declaring that the Kensington, Jermyn Street, and British Museums and the National Gallery ought to be opened to the public on Sundays after Divine service. He presented petitions signed by 47,000 working men in favour of the resolution, and contended that the whole teaching of the New Testament was in the direction of relaxing the Jewish Sabbath, and that the idea of the Jews and the Primitive Church pointed rather to prohibition of work than of recreation. Looking at the question on social grounds, he urged that, instead of being antagonistic to religion, the effect of opening the museums would be to check drunkenness and to promote feelings and ideas which must elevate the working classes. Mr. ALLEN and Mr. McARTHUR opposed the motion on the ground that it would increase Sunday labour, and that Sunday as a day of rest was essential in a sanitary point of view to the working classes. Mr. T. CHAMBERS asserted that the vast majority of working men were opposed to the movement, and that persons had been employed by the National Sunday League to get up fictitious signatures to petitions in its favour. Mr. BAINES spoke against when the House was counted out. On Monday in answer to questions by Mr. O. MORGAN respecting the Mold riots, Mr. BRUCE said that it was the order of one of the magistrates that the captain in command of the troops gave the word to fire, and that when this was done the Riot Act had not been read. That however, was not a necessary preliminary to committing a riot, and the firing in this case was justified by the fact that the soldiers and police were subjected to a dangerous attack, which would warrant any one using whatever weapons might be at his command. While Mr. BRUCE was speaking Mr. Gladstone entered the House, and was received by the Liberal party with loud and hearty cheers, which were kept up with unflagging vigour long after he had taken his seat. In answer to Alderman SALOMONS, Mr. CHILDERS stated that 1100 artisans from the dockyards and arsenals at Woolwich and Portsmouth had been conveyed to Canada in Government ships and had

found immediate employment in the colony. Mr. GOSCHEN moved the second reading of the Assessed Rates Bill, the object of which was to authorise the revival of the practice of compounding so as to sanction agreements between owners and overseers in consideration of a commission of 25 per cent., the faculty of composition being extended to all occupiers under 10/ in the provinces and under 20/ in the metropolis. Mr. CORRANCE moved as an amendment that the Bill be read a second time that day three months, but was unable to find a seconder. After some remarks by Mr. HIBBERT, Mr. HOLMS, Sir M. H. BEACH, Mr. C. S. READ, Mr. BRIGHT and other members, the bill was read a second time; Mr. H. SHERIDAN thereupon withdrew his Representation of the People Act (1867) Amendment Bill, which also dealt with the question of compounding and the abolition of the ratepaying clauses of the Reform Act. On the order for resuming the debate on the second reading of the Metropolitan Poor Act Amendment (1867) Bill Mr. McCULLAGH TOBBERNS moved that further legislation be deferred until there had been an inquiry into the sufficiency of the present accommodation. Sir C. DILKE seconded the motion. Mr. GARNER HARDY and Dr. BREWER supported the Bill; Sir M. LOPES, Mr. W. H. SMITH, and Mr. D. DALRYMPLE opposed it. On a division the amendment was negatived by 118 to 15, and the Bill was read a second time. On the motion for considering the Municipal Franchise Bill as amended, Mr. JACOB BRIGHT moved the insertion of a clause to extend the municipal franchise to women. The motion was seconded by Mr. RYLANDS, and accepted by Mr. BRUCE on the part of the Government as "unanswerable." The Beer-houses, &c., Bill was read a third time and passed. On Tuesday, at a morning sitting, the House devoted five hours to the Committee on the Bankruptcy Bill, which was considered from clause 28 to clause 53, but no amendments of consequence were made. Mr. CANDLEISH moved for a Select Committee to inquire into the great excess in the cost of the Abyssinian War over the estimates, and contrasted the calculations of the late Government, rising from three millions and a half to five millions, with the actual cost, now ascertained to exceed eight millions and a half. Sir STAFFORD NORTHCOTE seconded the motion, admitting on behalf of the late Government that the desire for inquiry was natural and reasonable, and could not but be useful in the public interest. After some discussion Mr. OTWAY assented to the Committee on behalf of the Government. Sir J. D. ELPHINSTONE urged that the inquiry should be extended so as to embrace the causes of the war. Mr. AYTON deprecated this extension of the inquiry, and after some further discussion the motion was agreed to. Mr. LAYARD obtained leave to bring in a Bill to acquire lands in the parish of St. Margaret's, Westminster, for the concentration of Public Offices. On the committee of the Marriage with a Deceased Wife's Sister Bill, Mr. T. COLLINS moved an instruction to the Committee to provide for the marriage of a widow with her husband's brother. Mr. SCLATER-BOOTH moved the adjournment of the debate. On a division the motion was negatived by 113 to 63. A subsequent motion by Colonel NORTH to adjourn the House was rejected by 98 to 63. The majority then gave way, and the debate was adjourned. The order for the second reading of the O'Sullivan Disability Bill was read and discharged. On Wednesday Mr. O'REILLY withdrew the Sale of Liquors on Sunday (Ireland) Bill, on Mr. C. FORTESCUE undertaking that the Government would consider the whole subject with a view to legislation next year. Mr. BLAKE moved the second reading of the Sea Fisheries (Ireland) Bill, the object of which was to remove the control of the Fisheries from the Board of Works to the Lord-Lieutenant, to abolish all existing restrictions on the modes of fishing, and to advance loans for the establishment of curing-houses and enabling fishermen to purchase boats, gear, &c. After some discussion Mr. C. FORTESCUE said that the Government were willing to allow the Bill to pass in its present state, but were opposed to the system of loans. They agreed that the fisheries ought to be placed under more efficient management and control, and if upon examination it appeared that a revision of the law was necessary the Government would themselves deal with the question. The Bill was then read a second time, on the understanding that it would not be pressed further. The House then went into Committee on the Sunday Trading Bill, but no progress was made when the hour of adjournment arrived. On Thursday Lord ELCHO moved a resolution declaring the establishment of a sufficient and reliable army of reserve is a matter of urgent necessity. He contended that the defects of our present system were caused by want of organisation, that the term of enlistment for the regular army should be for 21 years—seven years in active service in the Line, seven in the first reserve liable to foreign service if called on, and seven in the second reserve, only liable for home defence, if that, the militia, as the backbone of our military system, should be balloted for annually, while for the volunteers he recommended improvement of organisation, the division of England into districts, and more frequent drill in large masses. Colonel AKROYD seconded the motion, and after some remarks by Colonel C. H. LINDSAY, Lord BURY, Colonel NORTH, Mr. H. R. BRAND, and Colonel GILPIN, Mr. CARDWELL said that he could not concur in the adoption of the ballot except in the very last resort, and that 21 years would probably be too long a period for any man to commit himself to the military service. He enumerated the various changes now in progress, and others which were contemplated connected with the several staff establishments, the division of the country into military districts, with a staff in each, applicable to army, militia, and volunteers, the conversion of the yeomanry into a mounted

rifle force, the billeting system, and other minor matters. After some further discussion, Lord ELCHO expressed himself satisfied with Mr. Cardwell's statement, and withdrew his motion. The House then went into Committee of Supply, and agreed to the votes for militia, yeomanry, volunteers, army reserve, Greenwich Hospital, and a sum to complete the purchase of the Carey Street site. An attempt made by Sir H. HART to strike out the Yeomanry vote was defeated by 117 to 27. Yesterday the House went into Committee on the Bankruptcy Bill, when the 53d clause, the consideration of which had been adjourned from the 8th inst., was passed. The 54th clause, which provided for an audit of the accounts of the trustee by an officer to be called the Comptroller in Bankruptcy, and the clauses dependent on it, were struck out. Some other clauses were postponed, and the remainder, up to 83, with two exceptions, were agreed to. The House was left sitting.

City Intelligence.

BANK RATE OF DISCOUNT.—The Bank of England on Thursday reduced their rate of discount from 4½ per cent., at which it was fixed on the 6th ult., to 4 per cent.

THE ENGLISH JOINT STOCK BANK, LIMITED.—On Monday the Lord Mayor gave his decision in respect to the charges against Captain Mangies, Mr. Abbas, and Mr. Bradshaw, directors, and Mr. Finney, manager, of this bank. His lordship said that, fortunately, the case before him really related to facts only, and not to points of law; he, therefore, had had no difficulty in deciding that there was no evidence against the directors, but that Mr. Finney's conduct came within the terms of the 83d section of the Act of Parliament, and that he must, therefore, be committed for trial. On Saturday Mr. Finney was brought up on a new charge, which alleged that in the inquiries arising out of the winding-up of the Company he committed perjury in his evidence before the Examiner in Chancery. After a long hearing, the case was adjourned for a week.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 92½ to 92½ for Money, and 92½ to 92½ for Account; New and Reduced Three per Cents., 92½ to 92½; Exchequer Bills, 4s. dis. to 1s. pm., and 3s. dis. to 2s. pm.; Indian Five per Cents., 111½ to 112 — FOREIGN Argentine, 81 to 81½; Egyptian (1868), 57 to 58; Italian, 56 to 56½; Mexican, 12½ to 13; Peruvian, 79½ to 80; Russian Five per Cents., 85½ to 86½; Ditto (1866), 87 to 90; Orel-Vitebak, 80 to 80½; Charkof, 78 to 78½; Spanish, 29½ to 29½; Turkish Five per Cents., 43½ to 43½; Ditto Six per Cents., 66½ to 67; Honduras, 86 to 87; United States 5-20 Bonds, 79½ to 80; Erie, 18½ to 19; Illinois, 93½.

Metropolis and its Vicinity.

MEETING OF PEERS ON THE IRISH CHURCH BILL.—A meeting of Conservative Peers, exceeding 140 in number, was held at the residence of the Duke of Marlborough, in St. James's Square, on Saturday, to consider the course to be taken by the Lords as to the Irish Church Bill. It was almost exclusively a meeting of lay Peers, the Archbishop of Dublin and the Bishops of Peterborough, Bangor, Gloucester, Tuam, and Derry being the only prelates present. The expediency of throwing out the Bill on the second reading was vigorously supported by the Earl of Derby, Lord Cairns, the Earl of Harrowby, the Dukes of Marlborough and Rutland, the Earls of Ellenborough and Bandon, Lord Redesdale, and the main strength of the Conservative party. A great many Irish Peers—one, it is understood, a Roman Catholic—also spoke strongly against the Bill. The Marquis of Salisbury, the Earl of Carnarvon, and Earl Stanhope on the other hand, were in favour of allowing the Bill to be read a second time, and then proposing material amendments, and were followed in this opinion principally by younger members of the House. Throughout the meeting there was the strongest feeling that the Bill must be rejected, or altered in some essential points. Lord Cairns, who addressed the meeting at considerable length, suggested that the Earl of Harrowby, from his independent position, would be the best peer to move the amendment, and it was calculated that the majority in its favour would be 80.

DEPUTATION FROM IRELAND TO THE LORDS ON THE IRISH CHURCH BILL.—On Friday deputations from the Irish Church Conference, the Central Protestant Defence Association, the Ulster Protestant Defence Association, the Presbyterians of Ulster, the Irish Church Institution, and the National Protestant Union, waited on a number of peers at the Westminster Palace Hotel, for the purpose of urging upon them the desirability of rejecting the Irish Church Bill on the second reading. The deputations were introduced by the Earl of Carrick, and their lordships were addressed by Dr. Reichel, Mr. R. Hamilton, Mr. Macrory, Mr. O'Donovan, Mr. Gamble, Q.C., and others. The Duke of Marlborough then said that he and the other peers had listened with the greatest attention and interest to the statements which had been so forcibly put forward. The gentlemen who had come there to represent the feelings and views of a large portion of the people of Ireland would not expect any expression of opinion as to their future proceedings in this matter from the peers then present, but he only gave expression to the feelings of all around him when he said that the important observations which had been made by the deputation would receive a most anxious and respectful consideration.

DEPUTATION TO LORD DERBY ON THE IRISH CHURCH BILL.—On Monday a deputation from the National Union of Conservative and Constitutional Associations waited upon the Earl of Derby to present him with an address, urging the House of Peers to

reject Mr. Gladstone's Bill. The deputation, which was introduced by Lord Skelmersdale, consisted of Lord Colchester, Mr. Raikes, M.P., the Hon. E. Douglas, Mr. L. Sedgwick, and Mr. W. Bennett; Sir Thomas Gladstone, brother of the Prime Minister, was also present, on behalf of the Scottish Constitutional Association. Lord Skelmersdale having introduced the deputation, an address was read denouncing the Bill as a step in a wide scheme of revolution in Ireland, and expressing the conviction that the support accorded at the late general election to Mr Gladstone and his policy, as far as it was then divulged, would not be extended to the present measure, or to those which may be expected to follow it. The Earl of Derby, in reply, adverted to the meeting of peers held on Saturday last, of which he said reports more or less accurate had already appeared. He disclaimed any position beyond that of an individual peer, or the slightest wish to influence the course of others. After remarking upon the steady and consistent opposition with which he, during a parliamentary life of 45 years, had encountered all measures seeking the disestablishment of the Protestant Church in Ireland he passed on to say that while he knew there were some true and attached friends of the Church who were disposed to amend the Bill in committee rather than reject it on the second reading, he expressed his hearty concurrence with those who preferred the latter course, and his conviction that the Bill would be defeated by an adequate majority, adding his belief that in dealing with so revolutionary a measure the boldest was the safest course to adopt. He concluded by expressing his lively satisfaction at finding the peers supported at this critical moment by the numerous associations represented by the National Union, and trusted that in their resistance to the present measure, as well as to any subsequent attempt to force the consciences of the peers, the Upper House would have the support of the people.

CITY MEETING ON THE IRISH CHURCH BILL.—On Monday a meeting of the citizens of London and others opposed to the Irish Church Bill was held in the great hall of Cannon Street Hotel. Among those present were Mr. R. N. Fowler, M.P., Mr. R. Dimsdale, M.P., Alderman Gibbons, Mr. E. H. Mills, M.P., Alderman Sir W. Rose, Alderman Sir R. W. Carden, Lord Claud J. Hamilton, M.P., Viscount Crichton, M.P., Mr. Charley, M.P., Viscount Dunloe, Lord James Butler, the Hon. Colonel Annesley, &c. Mr. John Chubb, of St. Paul's Churchyard, a leading member of the Wesleyan body, took the chair, and said that they were met to protest against a measure which was in their belief dishonourable to Almighty God and dangerous to the throne and commonwealth of the kingdom. As a Nonconformist he maintained that if the Church of England was to be preserved and this country was to be saved from Popery they must join heart and soul in opposing the measure pending in Parliament. Alderman Gibbons, Mr. C. L. Bevan, Mr. H. Masterman, Mr. Morgan Howard, Mr. Robert Hamilton, of Belfast, Alderman Sir W. Rose, Mr. J. D. Allcroft, Mr. A. G. Macrorie, Mr. R. Wigram, Mr. R. N. Fowler, M.P., Lord J. Butler, and Mr. C. B. King, afterwards addressed the meeting, and resolutions denouncing the Bill as a severance of the State from religion, as prejudicial to the supremacy of the Sovereign, and as endowing out of the funds of the Reformed Church the Roman Catholic College of Maynooth, and certain philanthropic institutions which now are or hereafter may be under the control of ecclesiastics and religious orders of the Church of Rome, were unanimously agreed to. A petition to the House of Lords embodying the resolutions was then agreed to, and signed by the chairman on behalf of the meeting.

DEJUNER TO THE IRISH CHURCH CONFERENCE AND PRESBYTERIANS.—On Wednesday a *déjeuner* was given, in Willis's Rooms, to a deputation from the Irish Church Conference and the Presbyterian Church in Ireland, who had waited upon members of the House of Lords. The chair was taken by the Duke of Rutland, who was supported by a large number of peers and members of Parliament. His Grace proposed the first toast, "Church and State," which was responded to by the Archbishop of Armagh, the Bishop of Derry, and the Dean of Ripon. Sir John Pakington proposed the "House of Lords," which was responded to by the Duke of Abercorn. Mr. J. C. Colquhoun proposed the "House of Commons," which was responded to by Lord John Manners. The chairman proposed "The Irish Branch of the United Church," and the Deputies of the Irish Church Conference," which was acknowledged by the Earl of Carrick and Mr. Hamilton. The Earl of Harrowby proposed "The Irish Presbyterian Church and its Deputation from Ireland," which was acknowledged by Mr. Macrorie and the Rev. Dr. Cumming. Mr. Newdegate, M.P., proposed the toast of "The Chairman," which brought the proceedings to a close.

THE IRISH CHURCH MISSION.—The Hon. Arthur Kinnaird, who has for some years filled the post of treasurer to the Irish Church Mission Society, having given pain to the leading members of the Society by his votes in favour of the Irish Church Bill, has, at their request, resigned the office.

INCREASE OF THE EPISCOPATE.—An influential deputation from the Society for the Increase of the Episcopate waited upon the Prime Minister in Downing Street, a few days since, to represent that in consequence of the vast increase of the population in late years, there is great need of some general measure to permit the subdivision of sees and the appointment of additional bishops. The deputation more particularly pressed upon Mr Gladstone the revival of the Suffragan Bishop Act of Henry VIII. Mr. Gladstone, in reply, promised to bring the matter before the Cabinet; but said that the large number of colonial bishops residing in this country away from their dioceses was regarded by many as a proof that bishops were not so necessary as the deputation supposed, and that the

main difficulty in the way of practical legislation is the want of a general concurrence among those interested in the question as to the principle upon which it should be dealt with.

PROCEEDINGS OF THE CHURCH ASSOCIATION AGAINST RITUALISM.—On Tuesday an influential deputation waited upon the Archbishop of Canterbury at Lambeth Palace, for the purpose of presenting a memorial with reference to the recent decision in the case of "Martin v. Mackonochie," signed by 91 clergymen and 104 laymen, and unanimously adopted by a conference at which representatives of provincial associations numbering 7900 members were present. The deputation stated that their object was to have the law settled, and that they now intended to proceed further, and would institute, with the full sanction of the bishop, a prosecution against the Rev. Mr. Purchas, of St. James's, Brighton. The Bishop of London had approved of a similar course being adopted with reference to a clergyman of his diocese. The Archbishop, in reply, expressed his approval of the efforts made by the Church Association to obtain authoritative settlements of the law as affecting ritualistic observances, and said that he had great sympathy with earnestness and liberty, but none with any design which tended to make the Church of England different from what it was made at the Reformation, and what the vast majority of the Churchmen of the nation wished it to be.

ANOTHER RITUALIST PROSECUTION.—The Bishop of London has commenced a prosecution against the Rev. C. F. Lowder, vicar of St. Peter's, St. George's-in-the-East, in consequence of his violation of the directions laid down in the decision of the Judicial Committee of Privy Council, in the case of "Martin v. Mackonochie." Mr. Lowder objects to remove his lighted candles, or to consecrate the elements otherwise than he understands the Church to direct him; and for this he is to be prosecuted in the Court of Arches, if Sir Robert Phillimore consents to accept the letters of request.

CONFERENCE ON THE LIQUOR LAWS.—On Monday morning a conference on the general questions of the laws relating to the liquor traffic was opened in the rooms of the Society of Arts. The Archbishop of York presided, and there were present Lord Lattelton, Sir John Bowring, Mr. E. Baines, M.P., the Rev. H. J. Ellison, Alderman Carter, M.P., and other gentlemen. The chairman, in opening the proceedings, said the object of the gentlemen calling the conference was not to force their private convictions on the Legislature or the country, but to attempt to form a rational and sober public opinion, so that something might be done to limit the evils that flowed from the uncontrolled sale of drink. The Rev. H. J. Ellison, vicar of Windsor, opened a discussion on the desirableness of repealing or modifying the Beershop Act of 1830, and the relative advantage of one uniform license for all excisable liquors, as recommended by the parliamentary committee of 1854. Mr. Baines, M.P., Rev. J. N. Worsland, and Sir John Bowring took part in the discussion. On Tuesday the conference considered the functions of the licensing power, and the question whether the trade should be open, as recommended by the committee of 1854, or restricted; if the former, under what conditions.

THE FRENCH ATLANTIC CABLE.—The whole of this cable has been shipped on board the Great Eastern at Sheerness, and on Thursday a grand banquet was given on board in celebration of the event. As soon as the Great Eastern has completed the task of laying this cable she will return to Sheerness, and commence preparations for receiving the Anglo-India cable, which is intended to be laid between Suez, Aden, and Bombay, and is of exactly the same length as the French Atlantic cable—viz., 3250 miles.

THE BERMUDA DOCK.—The huge iron Bermuda Dock, constructed by Messrs. Campbell, Johnston & Co., will leave England on or about the 20th inst., conveyed by a squadron of men-of-war. It will be towed down Channel by the Terrible, probably assisted by some smaller steam-vessels. It will then be taken in charge by the Black Prince and Warrior, which will escort it to the latitude of Madeira, where, at a pre-arranged rendezvous, these ships will be relieved by the Agincourt and Northumberland, which will take the dock within a reasonable distance of its destination, where the Hercules will complete the operation, by tugging it into port.

ST. GEORGE'S HOSPITAL.—A meeting, which was numerous and influentially attended, was held on Saturday at Willis's Rooms, to consider the present financial condition of St. George's Hospital, and devise some means of augmenting the resources of the charity. The Duke of Devonshire presided, and said that for some years the expenses had exceeded the income, the deficiency last year having been upwards of 7000*l.*, and to meet this deficiency there had been no alternative but to sell out stock. The meeting was then addressed by the Duke of Cambridge, the Archbishop of York, the Bishop of Oxford, Lord Cairns, the Bishop of Peterborough, Archbishop Manning, Baron Rothschild, Lord Penrhyn, and Mr. J. A. Smith, who urged that it would be a scandal and disgrace to the wealthiest part of London if the efficiency of the charity was allowed to diminish for want of funds. A series of resolutions in furtherance of the objects of the meeting was unanimously adopted.

FATAL FIRE.—On Saturday evening a five-storey house, in the Pentonville Road, was set on fire by the accidental breaking of a bottle of paraffin oil, and two young women and a child in an upper storey were burnt to death, the house in front having a long forecourt, railed in on a dwarf wall, which made it impossible for the fire escape to approach it. The inquest was opened on Tuesday and adjourned.

MURDER AND ATTEMPTED SUICIDE NEAR HARROW.—On Sunday Lewis Midson, landlord of the Chequers

Tavern, at Alperton, shot his wife dead, and afterwards attempted to shoot himself. He had been drinking freely during the day, and became so quarrelsome with her husband that at length worked up to a pitch of violence. The first ball entered the back of his wife's head, came out at the forehead, causing instantaneous death. In attempting to take his own life he was in an excited state that the trembling of his hand caused him to miss his aim, and the bullet therefore struck his scalp, causing great loss of blood, but not fatal. At the inquest on Tuesday the coroner, who was up, expressed his opinion that the murder was an extreme provocation, and that the prisoner was worked up to such frenzy as had led him to do what, however culpable, was wholly excusable. The jury consulted together in private for some time, and ultimately returned a verdict of manslaughter against the prisoner.

THE PUBLIC HEALTH.—The Registrar-General's Weekly Report states that in the week ending on Saturday June 5, 1378 births and 219 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 24 per 1000 persons living, being 22 in London, 42 in Edinburgh, 22 in Dublin, 19 in Birmingham, 27 in Liverpool, 22 in Manchester, 29 in Salford, 25 in Sheffield, 20 in Bradford, 26 in Hull, 22 in Newcastle-upon-Tyne, and 21 in Glasgow. The rate in Vienna was 33 per 1000 during the week ending the 29th ult., and in Berlin 2100 children, were registered in the week corresponding weeks of 10 years, 1839-48, the number, corrected for increase of population, was 2114. The deaths registered in London during the week were 1355. It was the 221 week of the average number for that week, corrected for increase of population, was 1308. The present week is therefore 17 above the estimated amount.

Provincial.

BRADFORD.—A boiler explosion occurred on Friday morning at a bobbin turner's factory at Harrogate, near this town, by which 15 persons lost their lives, nine of whom were children under six years of age, were with others romping in the playground of an infant school close by. Amongst the killed was Joseph Town, wife of the junior partner in the firm, and a daughter, five years of age. Mr. James Town, subsequently of the injuries he received in the explosion, and his son, aged 12, were so injured that a fatal result is feared. Several houses in the neighbourhood were destroyed.

GRIMSBY.—The two missing coats worn by the brothers Traves, who have been committed to prison for the murder of the young man Goldy, were found last week by a searcher who formerly belonged to the metropolitan police force. The piece of cloth was picked up near the scene of the struggle, and fitted a rent in the coat of Charles Traves.

HILGAY.—The bones of a woman, of middle age, small stature, have been discovered in a field near Hilgay. Some clue has been obtained to a woman who had suddenly disappeared at Hilgay a few years since.

LIVERPOOL.—No less than ten steamers were despatched for the United States and Canada last week with nearly 7500 emigrants on board. The majority of the emigrants were from the German States, Denmark, and Norway, but 634 were from London, having been sent out under the auspices of the East London Emigration Fund. Some of the ships also carried a large number of Irish who were embarked.

MERTHAR TYDVIL.—An explosion occurred at Ferndale Colliery, about half-past 7 o'clock on Friday morning. Between 500 and 600 men were employed in the colliery, which is divided into several districts. The explosion occurred in the Duffry district, where 120 men were working, and 10 were killed. The men from other districts were unhurt, and many also escaped from the Duffry. Fifty-six bodies have been already recovered, and them so much burned as to make recognition impossible. The workings are so much damaged, and there is an accumulation of choke damp, that the recovery of the bodies is very difficult. The excitement in the neighbourhood is intense, and thousands of persons flocked to the scene on Thursday.

MOLD.—Elizabeth Jones, who was shot in the chest on Wednesday, died on Friday night, and on Saturday the coroner held an inquest on the body. The jury returned a verdict of "Justifiable Homicide." While the inquiry was going on the police made an appearance in the cottage of Mrs. Jones's husband, dead body lay, and took the deceased's husband into custody on a charge of having been concerned in the disturbances. On the same day a man was apprehended. Three other persons were arrested since Saturday. The prisoners now in custody are William Griffiths, formerly a colliery servant; Isaac Jones, colliery, and R. Williams, colliery. The two latter were apprehended while they were asleep in bed at two o'clock in the morning. They had to dress themselves on their way to County Hall at Mold, the object of the police being without giving the colliers the opportunity of making a rescue. On Monday the six prisoners were brought before the justices at the County Hall, and the court-room was densely crowded, and the excitement was manifested by the public outside the issue of the trial. Captain Blake gave evidence

did not fire until the magistrate ordered... cartridges were used, and the soldiers... to the station with arms raised. He did not... the Riot Act read. Stone-throwing was con-... more than a quarter of an hour before he had... to fire. The men fired into the mob, but not... to fire. They were irritated. Two... of the injuries inflicted, dressed the wounds of 20 soldiers, and... the police, 12 of whom were... occupied the magistrates for seven... was ultimately adjourned to Wednesday,... being admitted to bail. On that morning, after one o'clock, the police apprehended four... all colliers, named Richard Jones, William... Thomas Gibbons, and Gomer Jones. They... out of their beds in Leeswood and Tryddan, in the County Hall at Mold. All the... brought before the magistrates during... after some further evidence had been... the magistrates said they did not consider the... against Tatham and Gibbons, who... be discharged. Roberts would be... on bail, and the other prisoners would be... trial at the next Flintshire Assizes. A... of felony would not be proceeded with. They were afterwards removed from Mold to... after some further evidence had been... the magistrates said they did not consider the... against Tatham and Gibbons, who... be discharged. Roberts would be... on bail, and the other prisoners would be... trial at the next Flintshire Assizes. A... of felony would not be proceeded with.

THE FUNERAL OF THE LATE SIR R. CLIFTON... on Monday at Clifton under somewhat... circumstances. It is estimated that not... 30,000 people were present. The singular... that attached to the deceased baronet... the last few years of his life had expressed itself... every possible way in the interval since his... were drawn in hundreds of humble... large numbers of people, hav-... connection whatever with the deceased, the poorest made a sacrifice to... memorial of his death. The remains... at Clifton Hall on Saturday and Sunday, were visited by from 10,000 to 15,000 persons. In a convocation held on Tuesday... to the House of Lords against the Irish Church... was read and carried by a majority of 35; the votes... 63, non-placet, 27.

On Friday morning her Majesty's... Cadmus, 21 guns, 1500-horse power, Captain... went ashore during a fog, on the Eel Stone... Salcombe. She was afterwards got off and... but she made water so fast, that the pumps... to keep it under. The engine fires were all... and she was gradually settling down, when... arrived from this port, and placed her on... At 10 A.M. on Saturday the Sootin... with 50 men, including some divers, who by... and calked the broken part, while the guns,... and projectiles were placed in a lighter... by the Dec, which arrived with 150 men from... At 1.40 A.M. on Sunday morning the... was hauled off the bar and was towed by the... Plymouth, where she was placed in dock at... having 6 feet of water in her hold. The... part on the port bow, where the outer... stripped more or less for a space of 14 feet by 4, and was up a week in repairing.

On Tuesday afternoon a fall of coal... a pit at Prince's End, near Great Bridge, where three men who were at work there at the time... on the spot. Thomas Rosser, of Lydbrook, Forest of Dean, was taken up to the Herefordshire police on Friday... charging himself with the murder of a young... named Jane Edwards, at Usk, about two years... He stated that, being in company with the... from Usk to Monmouth, he beat... the head with an iron bar when they got to... He then rifled her pocket of 15s, and threw the body in the river. The prisoner... examined at the Guildhall on Saturday, and was... in order to give the police time to make... inquiries. The result of the investigation, so... it has at present gone, has elicited several facts... corroborative of the prisoner's statement, and... the woman will be exhumed forthwith, as... supposed that the skull will show the fracture... by the iron bar.

Ireland.

THE IRISH CHURCH.—A meeting was held in... on Saturday, to petition against the Irish... Bill, and was attended by about 4000 persons. The... resolutions were substantially the same as those... at Belfast and Dublin, with an appeal to the... to reject the bill on the ground that it was a... and perilous legislation, and fraught... of serious import to the future of... An Orange meeting was held on... at Killyman, county Tyrone. Seventy-four... attended, numbering 10,000 or 12,000. Resolu-... the Bill were unanimously adopted. THE ESMONDE WILL CASE.—The Court of Probate... made an order that the Esmonde will case... be tried in Carlow. ATTEMPTED MURDER IN TIPPERARY.—John Ryan, of... near Nenagh, was fired at and... by his stepson, named Burke, on Monday... It is alleged that Burke felt aggrieved at... the farm by his marriage. A printer named Johnson, from... was arrested on Monday at Cork for circulating... documents among the military and police, and... them to sack the gun shops and take arms, and

appealing to Roman Catholic soldiers not to serve... heretics. ACCIDENTAL POISONING.—An inquest was held on... Tuesday on the body of Mr Frederick Darley Grattan... Guinness, who died on Saturday in his office in Abbey... Street, Dublin, immediately after taking poison, which... had been sent from a chemist's shop in mistake for... medicine. The jury found that he died from taking a... dose of poisonous medicine compounded by mistake, and censured the chemist for negligence.

Scotland.

GLASGOW UNIVERSITY.—Mr. James Monteith, of... 38, Duke Street, St. James's, has invested with the... Senate of the Glasgow University the sum of 1000l. as... a bursary fund, with the view of assisting students in... attendance on the university, and encouraging the... study of modern languages. The bursaries are to be... three in number, each of the annual value of about... 16l. and tenable for three years.

VISITS OF COUNTS HERBERT AND WILHELM... BISMARCK TO EDINBURGH.—The two sons of the... Prussian Premier arrived in Edinburgh on Friday... morning, and attended by the Prussian Vice-Consul, visited the places of interest in the city, as well as... Roslin Chapel and Castle. In the evening they dined... at the Consulate, and were afterwards entertained by... the officers of the 42nd Regiment. On Saturday fore-... noon they visited the Industrial Museum, and left in... the afternoon for the Highlands.

THE SCOTTISH GOLDFIELDS.—The Duke of Suther-... land visited the Kildonan diggings last week, to... see a shaft sunk by Mr. Gilchrist on the level ground... bordering the Helmsdale river. The result, however, did not come up to the expectations of those inter-... ested, a few particles of gold being all that remained... in the dishes after the stuff was washed out. The... Duke did not consider the prospect sufficient to... warrant further proceedings, and accordingly intimated... that sinking would have to be discontinued, the... revenue derived from the diggings not being suffi-... cient to cover the expenses in connection with them. The Duke has been much gratified by the discovery of... gold on his estate, and has presented a valuable... gold watch to Mr. Gilchrist, the discoverer. Gold has also been discovered in the bed of the river... Cassley, on the property of Rosehall, Sutherlandshire, belonging to Sir James Matheson, Bart., where the... men have come upon a highly auriferous drift. Rosehall is a small estate at the junction of the... Cassley with the Oyke, a few miles above Inver-... shin railway station. Adjoining it are the Suther-... land estates of Sir Charles Ross of Balnagown, and the heir of the late Mr. Butler-Johnstone of... Novar. The Cassley flows from the foot of Ben... Mare, the highest of the Assynt range of hills (3281... feet), and runs nearly parallel to Strath Brora, Strath... Donan, and Berriedale, in all of which gold has been... found in considerable abundance. It is also stated that... gold has been found in small quantities in the vicinity... of the castle of Wasburgh or Kinnaird's Head Light-... house, on the estate of Lord Saltoun.

Railways.

FATAL EXCURSION TRAIN ACCIDENT.—An excur-... sion train of Wesleyan school children from Crewe ran... over and killed four boys on the deviation line at Crewe... about 12 o'clock on Thursday night. At the same time... and place an engine-driver, named Saville, had a leg... and arm cut off by the Normanton mail train.

COLLISION ON THE MIDLAND.—On Wednesday... afternoon a collision took place at Woodesford Junc-... tion, about five miles from Leeds. The fast train from... London to Leeds was run into by a London and York... goods train, which was moved out of a siding. None... of the passengers were injured, but the traffic was... delayed for nearly two hours.

ACCIDENT ON THE BEECON AND MEETHYR.—An... accident occurred on Thursday at Maesyowmmwr, the... engine having run off the line. Mr. Kendall, loco-... motive superintendent of the Rhymney Railway, who... was trying a new engine, and an engine-driver, named... Stokes, were killed, and three others were injured.

Law.

CENTRAL CRIMINAL COURT.—The Charge against a Chief... Constable.—Major Frederick Bewick, late chief constable at... Birkenhead, was charged with having forged and uttered a... power of attorney, for the transfer of Consols to the amount... of 431l. 5s. 3d. The details of the case have already been... noticed in our provincial news. The jury returned a verdict... of Guilty, but recommended him to mercy. Mr. Baron Pigott... expressed regret at having to pass sentence for such a crime... upon a man of high standing, but justice required that the... punishment should be a severe one. His lordship then... sentenced the prisoner to five years' penal servitude.

Sporting.

ASCOT RACES.

TUESDAY.—The races commenced to-day under very favour-... able auspices, and were attended by the Prince and Princess... of Wales, Princess Christian the Crown Prince of Denmark, the Duke of Cambridge, and Prince and Princess Mary of Teck, who arrived from Cooper's Hill shortly after one o'clock in that semi-state peculiar to the meeting. Trial Stakes.—Sir J. Hawley's Vagabond beat Fancy Boy, Perfumer, and 10 others. First Year of the First New Biennial Stakes.—Mr W. Beville's Blue Bell beat Mont Bate, Scotch cut, and 8 others. Gold Cup.—Mr. J. Johnston's Thorwalisen beat Morna, Lancet, and St. Mungo. Prince of Wales Stakes.—Captain Machell's Martyrdom beat Per Gomez, Typhon, and 2 others. Queen's Stand Plate.—Lord Falmouth's Gertrude beat King of the South Sea, and 7 others. Ascot Stakes.—Mr. Jacques Victor, Plaudit, and 7 others. King Alfred, and 10 others. Bate Noir beat Ambitious, King Alfred, and 10 others. Maiden Plate of 100 Sovs.—Sir J. Hawley's Waif beat Flyaway Jack, Sister to Polly Perkins, and 20 others. Third Year of

the Fifteenth Ascot Biennial Stakes.—Mr. Cookson's Formosa beat Reatitution, Bluekin and The Lady. Victoria Plate.—Colonel Astley's Winchelsea beat... Mass 100, and 8 others. Fourth Stakes.—Mr... beat Perfuma, Atlantic, and 4 others. Mr J. Hawley's Peru Gomez beat... Good Hope, and... Lord Wilton's Bee Nave beat Cook of the Walk, Border Knight, and 19 others. First Year of the Seventeenth Ascot Biennial Stakes.—Harcourt's Mchah's beat Kingcraft and Claudius. Second Year of the Eleventh Ascot Biennial Stakes.—Lord... beat... and 3 others. Coronation Stakes.—Sir J. Hawley's Martingale beat Cracovienne, Dentelle, and 2 others.

THURSDAY (THE CUP DAY).—The Cup Day was marked, as usual, with the presence of Royalty. The Prince and Princess of Wales, the Crown Prince of Denmark, Prince and Princess Teck, Duke of Cambridge, Prince Edward of Saxe Weimar, Imperial Pacla, &c., were in the Royal carriages, and were... cheered. The attendance of fashionable company was... unusually large. St. James's Palace Stakes.—Mr. T. Wadlow's Dunbar beat Duke of Beaufort, Tassan, and Strathairn. First Year of the Seventh New Biennial Stakes.—Mr. H. Chaplin's Pandora beat Bruce and Badsworth. Second Year of the Sixth New Biennial Stakes.—Count Bathyan's Typhon beat Antislava, Brother to Ravioli, and 2 others. Gold Cup.—Sir J. Johnston's Brigantine (the winner of the Oaks) beat Blue Gown, Farmosa, and 2 others. Betting—6 to 4 against Blue Gown, 4 to 1 against Brigantine, and 5 to 1 against Farmosa. Won very cleverly by a length from the favourite, Blue Gown, who defeated Thorwalisen by a neck for second honours, the other... Captain Macholl's Champag... and 2 others.

FRIDAY.—First Class... Typhon beat Bonnie Katie, Hamerton, and 15 others. Second Class... Cook of the Walk beat Victress, Wanderer, and 7 others. Alexandra Plate.—Reatitution beat Trocadero, Rumping Girl, and 2 others. Plate of 100 Sovs.—Pearlfeather beat Gordian and Empress and 1 other. Sixteenth Biennial.—Duke of Beaufort beat Standard Bearer, and Westminster. Queen's Plate.—Lancet beat Blue.

Markets.

COVENT GARDEN.—June 11.

A busy week, but prices scarcely maintained, excepting for forced Strawberries, which are now becoming scarce, and the out-door ones make slow progress. English Pines are abundant, and... Foreign produce active. Potatoes are coming in very fast from the Channel Isles, but they are not good, consequently prices for them are low. Flowers consist of Obelisks, German Stocks, Paeoniums, Heaths, Hydrangeas, Calceolarias, Roses, Rhododendrons, Mignonette, Fuchsias, Heliotropes, Larks, Carnations, and large quantities of bedding plants.

FRUIT.

Table with 2 columns: Fruit name and price. Includes Apples, Apricots, Cherries, Figs, Grapes, Kentish, Lemons, Melons, Nectarines, Oranges, Peaches, Pine-apples, Strawberries.

VEGETABLES.

Table with 2 columns: Vegetable name and price. Includes Asparagus, Beans, Kidney, Beet, Cabbages, Carrots, Cauliflowers, Celery, Cucumbers, Endive, Garlic and Shallots, Herbs, Horse Radish, Lettuce, Mint, Mushrooms, Onions, Parsley, Peas, Potatoes, Spinach, Turnips.

HAY.—Per Load of 36 Trusses.

Table with 2 columns: Hay name and price. Includes Best Green Hay, Prime Meadow Hay, Inferior do., New do., Straw.

CUMBERLAND MARKET, Thursday, June 10.

Table with 2 columns: Hay name and price. Includes Sup. Meadow Hay, Inferior do., New do., Superior Clover, Straw.

WHITESHAP, Thursday, June 10.

Table with 2 columns: Hay name and price. Includes Fine Meadow Hay, Inferior do., Prime New Hay, Inferior do., Straw.

LEADENHALL POULTRY, &c.

THURSDAY, May 10. The demand far below the Ascot average. The supply good, but much poultry spoiled by the sudden heat of Saturday and Sunday last.

Table with 2 columns: Poultry name and price. Includes Geese, Goslings, Turkeys, Turkey pullets, Ducks, Ducklings, Surrey Fowls, Do. chickens, Barn door Fowls, Leverets, Pigeons, Tame Rabbits, Wild Rabbits, Wild Ducks, Pheasants, Hares, Dotterel, Quails, English Eggs, Foreign do., Fresh Butter.

POTATOS.—SOUTHWARK, Monday, June 7.

During the past week the arrivals eastwise have been light, but rather mere from abroad, and the prices have advanced from 10s. to 11s. per ton. Quotations as follow:—York Regents, per ton, 7s. to 11s.; do. Flukes, 80s. to 130s.; Lincolnshire Regents, 70s. to 110s.; Dunbar and East Lothian do., 70s. to 120s.; Perth, Forfar, and Fife do., 70s. to 100s.; do. Rocks, 70s. to 90s.; Reds, 70s. to 80s.; French and Belgian Whites, 50s. to 70s.

ENGLISH WOOL.

During the past week trade has been very dull, and the tendency is still downwards, farmers being more willing

Sellers now that the market is being gradually more and more supplied with the new clip. We now quote as under:—

CURRENT PRICES OF ENGLISH WOOL.		per lb.—s. d.	s. d.
FLEECES—Southdown hoggets	1 1	to 1 2
Half-bred ditto	1 2	— 1 2½
Kent Fleeces	1 3	— 1 4
Southdown ewes and wethers	1 0½	— 1 1
Leicester ditto	1 2	— 1 3
SORTS—Clothing		0 10 — 1 6
Combing		1 0 — 1 8

METROPOLITAN CATTLE MARKET.
MONDAY, June 7.

There is a considerable increase in the supply of Beasts, and trade is dull; prices on all descriptions are lower. The number of Sheep is also larger, and there is an improvement in quality. The weather having set in suddenly hot, causes depression in all departments. There is very little demand either for Lambs or Calves. Our foreign supply consists of 2627 Beasts, 9430 Sheep, 263 Calves, and 15 Pigs; from Scotland there are 121 Beasts; from Ireland, 50; from Norfolk and Suffolk, 600; and 932 from the Midland and Home Counties.

THURSDAY, June 10.

We have not quite so many Beasts as on Thursday last, and there is a fair demand; prices are better on the average; choice qualities are scarce. There are a few more Sheep; they are, however, in demand, and a clearance is effected at rather higher rates. Trade is still dull for Lambs, and there is scarcely any improvement in prices. We have a large supply of Calves, prices are lower, and several lots remain unsold. Our foreign supply consists of 785 Beasts, 3715 Sheep, 505 Calves, and 10 Pigs.

MARK LANE.—MONDAY, June 7.

The supply of Wheat from Essex and Kent to this morning's market was again very short, and factors would have accepted the prices of this day se'nnight, but as the offers made by millers were 1s. to 2s. per qr. below those rates, scarcely a sale was made. There was a thin attendance, and the little business transacted in foreign Wheat was at about last week's quotations. Barley, Beans, and Peas fully supported late rates. The Oat trade was quiet, and in some instances a reduction of 3d to 6d per qr. was submitted to. Flour was firmly held at full prices.

FRIDAY, June 11.

Excepting one or two days' rain in Scotland, the weather here has been fine, hot, and dry during the past week, but since the 8th inst. the temperature was decidedly lower. The reports of the growing crops having been more favourable, owing to the warm dry weather, and millers as well as dealers having lately bought rather largely, the markets of the kingdom have once more relapsed into dullness, and prices of home-grown and foreign Wheat have given way fully 1s. per qr., business being very restricted. Spring Corn of all descriptions has met more attention, but we have no general rally in prices to report, still those of best Oats, Beans, and Peas were pointing upwards. Flour met very little attention, and quotations have not undergone any decided change. The arrivals off the coast since Friday last consisted of 17 cargoes, of which, with those left over from last week, there remained for sale last night 2 cargoes. Owing to the very small supply off the coast business in arrived cargoes has been restricted, but prices were in sellers' favour for Wheat and Maize. Cargoes in course of shipment, or to be despatched in June and July, continued to find ready buyers, a large business having been reported in Maize. The advance realised must be quoted 1s. to 1s. 6d. per qr. on Maize, and 1s. per qr. on Wheat.

The arrivals of English grain and foreign Barley this week have been small, and fair of foreign Wheat and Oats. There was a moderate attendance at this morning's market; the little English Wheat fresh up and remaining over brought Monday's quotations; for foreign the demand was limited, and the business transacted was at that day's quotations. Inferior Oats were rather cheaper; other descriptions of spring corn unaltered.

	15,880	950	34,160	3680 brls.

MANCHESTER, June 10.—With a favourable change in the weather since our last report, the trade has again become dull and in active, with a receding tendency in prices. There was a good attendance at this day's market, and the little English Wheat offering was taken at a decline of 1s. per qr. from the

currency of this day se'nnight. Foreign also sold to a fair extent, at a reduction of 2d. to 3d. per cental. Flour was in favour of buyers. Oats and Oatmeal dull at late rates.

SEED MARKET.

The attendance at our markets has this week been very thin, and but very little business has been passing. Values of all descriptions of agricultural seeds remain firm, although at the present moment buyers show no disposition to operate. Of new Red Clover seed the stocks during the past season were reduced quite low; for what little has been held over holders demand more money. Advices from Germany report an advance of some shillings per cwt. on red seed. Sowing Mustard and Rape-seed continue fully as dear. We have a fair inquiry for Canary and Hemp-seed. Feeding Linseed moves off steadily at recent quotations.

JOHN SHAW & SONS, 16, Water Lane.

METROPOLITAN MEAT MARKET.—June 12

Best Fresh Butter	14s. per dozen lb.
Second do. do.....	12s.
Small Pork, 5s. 0d. to 5s. 8d.; Large Pork, 4s. 0d. to 4s. 8d. per 8 lb.	

A YOUNG GENTLEMAN can be TAKEN on an extensive FARM in one of the best districts of Scotland. Draining and other extensive improvements going on. Can either work or not as desired. Good Hunting, Shooting, and Fishing. Only one hour from Edinburgh. Terms, £105 per annum, washing included.—JAMES MURRAY, General Post Office, Edinburgh.

WANTED, in a First-class Nursery, as FOREMAN, a Young Man who thoroughly understands the Propagation of all kinds of Plants, both Indoor and Outdoor, and who could be thoroughly recommended as such, and for honesty, sobriety, and steadiness of character. No other need apply. To such a person the terms would be progressive, and after a fair trial every encouragement would be given.—Apply (for a week) to ALEX. CAMPBELL & SONS, 7, Eden Quay, Dublin.

WANTED, by the Advertisers, for an Outdoor Nursery, a Person in the capacity of WORKING FOREMAN and PROPAGATOR. Must be a plain, intelligent, honest Man, very industrious, of good character, and a successful Budder and Grafter. Wages 21s. per week, with unfurnished cottage on the premises.—Apply, in own handwriting, to RICHARD BRADLEY & SONS, Nurserymen, Hatam, near Southwell, Notts.

WANTED, for a Retail Nursery, a FOREMAN, who can also undertake the duties of a FURNISHER and SALESMAN. Only those need apply who have filled a similar situation, and who can give the best references.—Apply, in own handwriting, to K. W., Mr. Fox, 56, Coleman Street, City, E.C.

WANTED, as SECOND GARDENER, a sober, honest, and industrious Man, who is well practised in Outdoor Gardening, especially the Cultivation of Roses, American Plants, Wall Fruit, Strawberries, Melons, and Asparagus. To reside at Twickenham. Wages, £1 1s.—Apply, by letter only, to HENRY G. BONS, Esq., 15, Henrietta Street, Covent Garden, London, W.C.

WANTED, THREE or FOUR expert and practised ROSE BUDDERS.—None but competent hands are requested to apply to Mr. L. Woodroffe, Munro Nursery, Sibthorp, Redingham, Essex.

CHARLES NOBLE is in WANT of a YOUNG MAN to assist the Propagator (Indoors).—Apply, stating terms, reference, &c., by post.—Bagshot, June 10.

WANTED, a TRAVELLER, with a Connection amongst Seedmen and Nurserymen. Only those need apply who have been successful in pushing Specifics Articles to the Trade. Apply, stating age, salary expected, experience, and full particulars, to Mr. SIMON, care of Moffat & Co., Publishers, D'Olier Street, Dublin.

WANTED IMMEDIATELY, a COUPLE, without children, to live at a lodge, the Wife as Dairymaid and to Bake for the house, the Man as Labourer in the Garden or Farm.—Apply to J. RIDGWAY, Esq., Fairlawn, Tonbridge, Kent.

WANT PLACES.—Letters to be Post Paid.

EXPERIENCED GARDENERS (or as GARDENER and BAILIFF), of various qualifications, recommended to Gentlemen.—Further particulars given on application to Messrs. E. G. HENDERSON & SON, Wellington Nursery, St. John's Wood, London, N.W.

MR. WM. PAUL begs to announce that he has made arrangements by which he will be enabled in future to furnish Gentlemen with the NAMES, ADDRESSES, &c., of GARDENERS, and GARDENERS and BAILIFFS, of various qualifications, who are open to Engagements. The fullest particulars as to services required and wages given should be forwarded with application.—PAUL'S Nurseries, Waltham Cross, London, N.

To Gardeners and Bailiffs (Head, Foremen, or Under). JAMES CARTER and CO. having many applications for the above request that those WANTING SITUATIONS will send NAME, ADDRESS, and COPIES of TESTIMONIALS for ENTRY in their FREE REGISTER. Only those who can send unquestionable references need apply.

Any Lady or Gentleman requiring GARDENERS or BAILIFFS may rely upon J. CARTER & Co. adopting the most stringent regulations in reference to testimonials as to ability, honesty, &c.

Gardeners and Under Gardeners. WM. CUTBUSH and SON beg to state that they have at all times on their books MEN of various qualifications, whose characters will bear the strictest inquiry. Any Gentleman making application would save time by clearly stating the duties to be undertaken, wages offered, &c., so that suitable Men may be selected.—Highgate Nurseries, London, N.

GARDENER (HEAD).—Age 36, married; has a thorough practical knowledge of Gardening in all its branches; Early and Late Forcing of Vines, Peaches, Figs, Melons, &c., Ferns, Stove and Greenhouse Plants, Flower and Kitchen Gardening, also the Management of Land and Stock. Home News.

RETURN OF THE COURT TO WINDSOR.—The Princess Beatrice, accompanied by Princess Louise, arrived at Windsor on the morning, shortly before 9 o'clock, from her journey, 591½ miles, was performed punctually to the time arranged. Princess Christian visited her Majesty soon after her arrival. The afternoon the Queen drove out to Windsor. Thursday morning the Queen walked across the grounds of the Castle with Princess Louise. Chamberlain had an audience of her Majesty in the evening, by command of the Queen a state dinner was given at Buckingham Palace, to which upwards of 1,600 was invited. Yesterday the Queen held a Privy Council at Windsor. The Court will remain at Windsor for the next or four weeks, and then proceed to Osborne.

THE PRINCE AND PRINCESS of WALES.—The Crown Prince of Denmark, Prince Arthur, Prince George, Princess Louise, and Princess Victoria of Wales, returned to Marlborough House on the morning of the 19th. The Princess and Prince of Wales returned from Cooper's Hill, near Ascot. The Princess and Prince of Wales were present at the morning concert of Madame Norman-Nesbitt at St. James's Hall. The Princess and Prince of Wales were present at the debate in the House of Commons on the evening of the 19th. The Princess and Prince of Wales were present at the annual dinner of the Rifle Brigade, at the Tavern. The Crown Prince of Denmark was to an evening party given by the Minister and Madame de Bismarck at their residence in Wimpole Street. On Tuesday the Princess and the Crown Prince of Denmark were present at the debate in the House of Commons on the evening of the 19th. The Princess and Prince of Denmark, dined with the Russian Ambassador and Baroness de Brunnow, at their residence in Chesham Place. On Wednesday the Princess and Prince of Denmark were out with the Crown Prince of Denmark to the honoured Lady Molesworth by his company. On Thursday the Prince was present at the debate in the House of Lords. In the evening the Princess and Prince of Denmark were present at the State Ball at Buckingham Palace. The Prince went to Wellington College on the 19th. The Princess and Prince of Denmark were present at the delivery of the speeches on the 19th. On the 19th the Prince and Princess will leave for Manchester, to attend the show of the Royal Agricultural Society, and will remain in the neighbourhood of the Earl of Ellesmere on the evening of the 21st, when they will proceed to the residence of the Duke of Devonshire. PRINCE ARTHUR arrived at Oban on the 19th. He will sail through Glasgow on Monday on his way to Westport, where he rejoined the Royal Artillery on Tuesday morning. It is stated that his Royal Highness will proceed to Canada in the autumn, and will be accompanied to the Rifle Brigade. On his return next spring he will probably join a battalion of the same regiment at Woolwich.

THE DUKE OF EDINBURGH was to leave Zealand in May for Fiji, and afterwards visit the Sandwich Islands. He proposes to visit Hong Kong in August, China in September and October, Singapore and Penang in November, and to arrive at the Cape of Good Hope before the end of the year. His Royal Highness is expected to be at Ceylon in April next, to visit Mauritius in May, the Cape of Good Hope in June, and July, and at St. Helena in August.

THE VICEROY OF EGYPT.—Lord Alfred Dufferin has been appointed by the Queen to attend on the Viceroy of Egypt, who will land at Dover on Tuesday next, and arrive at Buckingham Palace on the same day. The Viceroy will stop one night at Windsor Castle, and will be present at the review at Windsor on the 26th. On the 27th he will probably visit the Crystal Palace.

THE CABINET.—A Cabinet Council was held on Saturday in Downing Street.

PARLIAMENTARY MOVEMENTS.—The debate on Nottingham terminated on Tuesday in the evening. Mr. C. Seely, jun., the Liberal candidate, by a majority of 110 over Mr. Digby Seymour, the Conservative candidate, was elected. Colonel Nassau Lees and Mr. Potter had previously withdrawn from the contest.

THE BRECON ELECTION PETITION.—A petition has been given that the election petition in Brecon, which was appointed to be heard on the 17th inst., has been withdrawn.

CONVOCATION.—Both Houses of the Convocation of Canterbury assembled at Westminster on Tuesday last. The despatch of business. In the Upper House the Bishop of Ely presented a petition from clergy and laymen, including High, Low, and Broad Churchmen, praying that some modification might be made in the Athanasian Creed. After some discussion the motion was ordered to lie on the table. The Archbishop of Canterbury having presented various petitions in relation to the reform of Convocation, the Bishop of Gloucester moved that the Archbishop should be invited to communicate with Government on the subject. The Archbishop said he should be happy to do so, and that the consideration of the matter had been before a former Government, and was now being considered. The motion was agreed to. In the Lower House the report from the committee on the subject of the reform of Convocation, presented over by Archbishop of Canterbury, was considered. After some discussion, the House resolved to ask the Upper House to concur in an address to the Crown praying her Majesty to direct the Secretary of State to take the necessary steps for the reform of Convocation.

patible, that a just and firm Government can bear the existence of every liberty, but too much licence has been given to such men as... Government is too indulgent and wanting in firmness. It is said that there are more than 700 persons now in custody in Paris in connection with the riots. Among them are several Editors and writers on the *Reveil*, the *Republique Francaise*, the *Revue*, and other papers. The two sons of M. Victor Hugo and some other persons were sentenced to six months imprisonment, the latter to six months, and both to a fine of 1000 francs for the law to hatred and contempt of the Government. M. Schiller, printer of the *Reveil*, was sentenced to one month's imprisonment, and to a fine of 1000 francs. It is stated that Baron Haussmann has tendered his resignation, which has been definitively accepted.

SPAIN.—The Duke de Montpensier and his family arrived on Friday at San Lúcar Barrameda, their summer residence in Andalusia. His Royal Highness has sent a communication to the Government, in which, as a citizen of Spain and a captain-general of the army, he declares that he acknowledges and promises to respect the demand for a Regency as voted by the Constituent Cortes. In the sitting of the Cortes on Friday the discussion on the Regency question commenced. Two amendments, to wit, that the Regency should only be composed of three persons, were rejected. In the sitting of Saturday Senor Navarro, a member of the Progressist party, opposed the project of a Regency, and declared his preference for the immediate selection of a Sovereign. He eulogised the Duke de Montpensier, whom he declared to be the only acceptable candidate for the Throne. General Prim said that no King would come forward in the present state of uncertainty, which, however, would disappear when the Regency question was settled, and then there would be plenty of candidates willing to come forward. He regretted Don Fernando's refusal, but hinted that it was not irrevocable. His speech was much applauded by the Republicans when warmly defending the Mexicans, whom a Deputy had spoken of deprecatingly, calling them cowards. General Prim said a people who know how to maintain their independence against internal commotions and foreign aggression could not be cowards. Believing that they interpreted the sentiments of the country, the Government intended to re-open relations with the Mexican Republic and its worthy President Juarez. In the sitting of Monday Senor Ochoa spoke in favour of the speedy election of a Sovereign, the monarchical form of government being in consonance with the traditional feelings of the Spanish nation. He expressed his preference for Don Carlos as the candidate for the Throne. Senor Barria in reply, contended that the projects of the Cortes were untenable and could not be revived. In the sitting of Tuesday Senor Castelar spoke strongly against the French Empire, declaring that it would soon fall. Senor Olozaga defended it, saying it would last long. The Regency Bill was subsequently passed by a majority of 193 to 45. In the sitting of Wednesday a proposal was brought forward to deduct 33 per cent. from the coupons of the Public Rente, exclusive of the exterior portion, which is guaranteed by special treaties. Notwithstanding the opposition of Senor Figuerola, the Minister of Finance, this motion was taken into consideration by 87 votes against 63. During the day General Prim reviewed 20,000 troops, and administered the Constitutional Oath. In the sitting of Thursday there was a stormy scene between the Ministers and the Republicans. General Prim said that no prosecutions would be had against Generals and officers refusing to support the Constitution, but he, as Minister of War, would remove them from employ, and the Government would reserve a right to strike them off the rolls. The Minister Sagasta added that meetings in which were used banners with mottoes against Monarchy would be prohibited, as also "Irras" in favour of the Republic, as being subversive of and contrary to the Constitution. Senor Figuerola replied that the Republicans would sustain the rights gained by the Revolution, cost what it would. General Prim demanded the meaning of these words. Senor Figuerola replied that he meant within legal grounds, for to appeal to force while they remained was a crime, but when they became useless, and individual rights were attacked, mutilated, or prohibited, it was not only a right but a duty. The Cortes having appointed a committee of 15 to inform Marshal Serrano of his elevation to the Regency, they proceeded in State coaches to him, and afterwards returned to the Cortes and announced his acceptance. The ceremony of his swearing-in before the Cortes was to take place yesterday.

PORTUGAL.—It is reported that the intended marriage of Prince Augusto, brother of the King of Portugal, to the second daughter of the Duke of Montpensier, has been broken off. Don Fernando has married Countess Edla, formerly Madame Sensler. The Chamber of Deputies on the 10th inst., after a protracted discussion, passed the Bill for the new loan contracted with Messrs. Frères & Goshen. The Queen sailed for Nice on Tuesday in the corvette *Stephania*.

BELGIUM.—The Senate on Saturday rejected the fresh concessions made by the Government in the Bill relative to the abolition of imprisonment for debt, but adopted by a majority of 30 to 24 the amendment of the minority, the Committee on Legal Affairs declaring that the present law would be revised in the session of 1872. In the sitting of Monday the Bill, thus amended, was passed by 34 to 23. The Government has proposed to the King to dissolve the Senate in consequence of its having thus rejected the Bill for the second time.

SWITZERLAND.—The Italian Government has accepted the invitation of the Federal Council to a conference on the subject of the proposed railway line from Geneva to the Jura mountains.

PRUSSIA.—The King of Prussia, accompanied by Count Bismarck, left Berlin on Saturday morning on his journey to Hanover, and will arrive at Osnabrück. His Majesty will be accompanied at Osnabrück by the Duke of Brunswick, and the Duke of Saxe-Weimar. A banquet was afterwards given in the town hall in honour of the King's visit. His Majesty returned to Berlin on the following day.

At the conclusion of his speech, the King expressed his thanks for the reception he had met with, and drank prosperity to the city of Bremen. A brilliant illumination took place in the evening. On Thursday the King arrived at Heppens, named the docks and town Wilhelmshafen, and visited H.M.S. *Minotaur*, with a brief stay. In the sitting of the Customs Parliament on Wednesday the following resolutions were adopted:—

BOHEMIA.—The Emperor's visit to Prague has arrived at Prague after having had a visit to the Emperor Ferdinand at Pilsen. It is believed that, later on, he will take up his residence permanently in Austria.

HUNGARY.—In the sitting of the Lower House of the Diet on Saturday the Bill relative to this year's recruitment was adopted by a majority of 170 to 75. The extreme Left voted against the Bill. In the sitting of Monday, Count Andrássy was interrogated respecting certain reports as to the arming of troops on the military frontier for the conquest of Bosnia. The Minister denied that any preparations for war were being made, and added that the Austria-Hungarian monarchy desired the maintenance of peace, and would persevere in a policy of non-intervention so long as other Powers did the same.

ITALY.—In the sitting of the Chamber of Deputies on Friday, the discussion on the proposal for a parliamentary inquiry into the charge of venality against a member of the House was resumed. Signor Pasquelli moved that the committee should at once inform the Chamber against whom, and upon what grounds, the inquiry is to be conducted. General Mancini supported the motion, which was, however, opposed by the committee, and ultimately rejected by the House. The Chamber subsequently approved of the recommendations of the committee. In the sitting of Saturday the President of the Chamber of Deputies, and the members of the Right, voted on the 10th inst. on the charge. On Tuesday at midnight an individual, who has not yet been arrested attempted in the public street to assassinate Deputy Lobbia, by whom evidence was furnished before the parliamentary committee of inquiry in reference to the charge of venality. Signor Lobbia received two dagger wounds, which, however, are not dangerous. He saved his life by brandishing his revolver at the assassin. In the sitting of the Chamber of Deputies on Wednesday an order of the day, signed by 50 members of all parties, was adopted, expressing detestation of the attempt to assassinate Signor Lobbia, and the earnest sympathy felt by all the members towards their colleague. The President was requested to communicate to the Chamber a copy of a bulletin respecting Signor Lobbia's state of health. In the evening a demonstration was made in honour of Signor Lobbia, when the populace raised sedition cries, and windows were broken. In the sitting of Thursday, Count Cambray Digny communicated a Royal decree, authorising him to withdraw the three financial conventions which had already been rejected by a Parliamentary committee. The Minister of the Interior afterwards read a Royal decree proroguing the Parliament for an indefinite period.

PAPAL STATES.—At the Vatican there is a great uneasiness about the projected departure of the French troops, whose withdrawal seems so certain that the virtualing contracts have been passed only for very short periods. It is said that France and Italy will revert to the September Convention. The ex-King of Naples will not return to Rome, but will hereafter reside in Austria.

TURKEY.—The Porte has sent instructions to its Ministers abroad to protest against any demands given by the Viceroy to foreign sovereigns to attend the opening of the Suez Canal as his guests. The Porte says that such invitations should emanate from the Sultan, as the Suzerain of the Viceroy. One of the Sultan's wives has given birth to a Prince, who has been named Mehmed Chiket.

THE PRINCIPALITIES.—A Bill for a loan of 15,000,000 francs, to cover current expenditure, was taken into consideration by the Chamber on Tuesday. The session will be closed on the 21st inst.

INDIA.—A telegram from Calcutta states that on the 9th inst. a cyclone, which lasted 16 hours, burst over the city, and committed great destruction among the native craft in the river. The shipping in the port escaped with slight damage. Many houses in the city were damaged, and the telegraph lines were interrupted. The storm was still raging when the telegram was despatched.

CHINA.—Accounts from Hongkong of the 27th ult. state that intense indignation has been aroused throughout the foreign communities in China by the decision of the Home authorities regarding the disturbance at Formosa. The comments of the Duke of Somerset

have elicited most indignant denials from the Press, the Chamber of Commerce, and the public. The fracas between the French *chargé d'affaires*, Count Rochechouart, and Prince Kung has been settled, the Chinese authorities having apologised.

AUSTRALIA—The members of the Victoria Legislative Assembly who were lately expelled for bribery have been re-elected by their constituencies. The "associated bribers" were declared guilty of breach of Parliamentary privilege, and were committed to gaol. The Judges, however, declared the warrant of committal invalid, and ordered their release. Parliament intends to appeal to the Privy Council. A slave corvette, with 100 slaves on board, has been captured in the South Sea. The slaves have been released, and the vessel sent as a prize to Sydney.

NEW ZEALAND.—The Duke of Edinburgh had left Dunedin in the Galatea for Nelson, Canterbury, and Otago. Telegrams, dated April 15, have been received at Dunedin from Napier, stating that Ensign Lavin, his wife, and two children, and Messrs. Wilkinson and Cooper, all of them settlers at Mohaka, were massacred on the Sunday preceding by Te Kooti, with about 40 friendly natives, principally women and children. On the 14th, part of the force from Napier reached Mahaka, when Te Kooti was found to have retired with his plunder the day before, having lost about 10 of his party killed. He burnt the settlers' homesteads before retiring. After leaving some cavalry and a part of the force in the district, most of the militia returned to Napier, which was declared to be threatened. The settlers' families between Mohaka and the suburbs of Napier (a district of about 40 miles) had taken refuge in that town. Accounts from Australia state that the later news is more favourable.

UNITED STATES.—The Washington correspondents of several prominent journals state that President Grant has expressed his disapproval of the terms and tone of Senator Sumner's speech on the Alabama claims, and has given his opinion that if war with Great Britain is to be avoided the question must be settled through courteous diplomacy. The Government has sanctioned the publication of the following version of Mr. Motley's instructions:—He will explain to the British Government the circumstances attending the rejection of the Alabama Treaty, without committing America to any particular policy. Mr. Motley is not instructed to propose any settlement of claims, but to secure the temporary postponement of the question, hoping when the present excitement subsides that England will invite renewed negotiations. He is not authorised to announce the readiness of the United States to make any propositions, or to demand the payment of claims, but to assure the British Government of the sincere desire of the United States to have the dispute adjusted on terms honourable and satisfactory to both nations. He is also instructed to state that the Neutrality Proclamation is not in itself a cause for demanding compensation, or a separate ground of complaint, but that, taken with subsequent acts, it was unfriendly, as showing a feeling of hostility to America during the late war, and resulting in losses requiring reparation. The friendly reception of Mr. Motley in England has been favourably commented on by the American Press, which now admits that the probabilities of a rupture between the two countries were greatly over-estimated on both sides of the Atlantic. Mr. Reverdy Johnson was warmly welcomed at the courts in Baltimore. President Grant, accompanied by Mr. Boutwell, Secretary of the Treasury, and Admiral Farragut, arrived at Boston on Wednesday. They were received by the Governor of the State, and escorted to the Capitol by a military guard of honour. Complimentary addresses were delivered by the Governor, the Officers of the State, and members of the Legislative Body. The President briefly returned thanks for the cordiality of the welcome given him, acknowledging that Massachusetts had largely contributed to his elevation to the Presidency. On Thursday the President attended the Musical Peace Jubilee. The State Legislature of Florida have ratified the Negro Suffrage Amendment. The Supreme Court of Georgia had decided that negroes are eligible for office in that State. Mr. Seward is about to visit China and Japan. The Government have determined on vigorous war against the Indians, and General Sheridan has gone West to take the command. Additional troops will protect the Pacific Railway. Volunteers, to protect Kansas, are to be raised by General Schofield. The Indians have captured a Government waggon train in Arizona, burnt it, and killed three soldiers and wounded three. A vessel, equipped with warlike stores for the insurgents in Cuba, has been allowed to escape from New York. She sailed ostensibly for Jamaica, but had on board arms for 5000 men and 10 pieces of artillery. It is reported that a steamer with war material for the Cacos rebels of Hayti left New York on Wednesday night. Colonel Ryan and other Americans, and several Cubans connected with the Revolutionary Junta of Cuba, were arrested in New York on Wednesday, under the indictment of the United States Circuit Court, for organising expeditions against Cuba, in violation of the neutrality laws.

CANADA.—In the House of Assembly on Saturday a resolution proposing to grant an additional subsidy to Nova Scotia was defeated. In the sitting of Monday the House rescinded this resolution, and granted the subsidy in question.

NOVA SCOTIA.—The House of Assembly on Saturday passed a resolution authorising the Government to appeal to the British law courts, with a view to test the legality of the Confederation Act. The House, however, afterwards rescinded its resolution. On Tuesday Governor Doyle prorogued the Assembly, and delivered a speech, expressing his belief that the policy which had been adopted would perpetuate the feeling of loyalty to the Queen and of attachment to British

institutions, and would, moreover, remove the evils which had retarded the prosperity of the province. It is asserted that the Repeal League, established in Halifax, has resolved to make annexation to the United States the platform of their policy.

BRITISH COLUMBIA.—Mr. Frederick Seymour, the Governor of British Columbia, died on the 10th inst. whilst inspecting the coasts of the colony on board the gunboat Sparrowhawk. Mr. Hawken, the senior member of the Council, has assumed the government pending instructions from England.

CUBA.—According to advices from Havannah, cholera has assumed an epidemic character at Huevitas. The insurgents have burnt the towns of Niguas and Camerones. The agent of the Cuban insurgents at Washington has asked the Government to recognise the independence of Cuba, on the ground that, General Dulce having resigned, Spain now has no regular authority in Cuba. Secretary Fish has refused the request, on the ground that Spain controls Cuba until the latter actually achieves independence by driving out the Spanish troops, and that changing the Captain-General is not an abdication by Spain of the government of Cuba. The Spanish Minister has since notified to Secretary Fish that the Government of Peru had been guilty of a breach of faith towards the United States and Spain, by recognising the belligerency of the Cuban insurgents after accepting with Spain the mediation of the United States. Spain, therefore, now regards herself as released from the terms of her acceptance of the mediation.

BRAZILS.—The Brazilian Chambers were opened on the 11th May in a speech from the throne, in which electoral reforms and a better administration of justice were recommended. The Princess Augusta of Saxe-Coburg-Gotha gave birth to a Prince on the 21st inst. Advices from Paraguay to the 7th inst. state that the Brazilian iron-clads had proceeded up the river Manduvara, a distance of 60 leagues, and had reached Carignabatay, near the camp of Lopez, but, being short of coals and the water shallow, they had to suspend further operations. An attempt to obstruct the river and to board the ships had been made by the Paraguayans. The request of an English officer to carry despatches to Lopez through the lines of the allies has been granted, and he has returned with despatches from the American Minister, General M'Mahon.

MEXICO.—It is reported that extensive gold fields have been delivered near the city of Colima.

Parliament.

In the House of Lords on Friday the Parochial Schools (Scotland) Bill, and the Metropolitan Commons Supplemental Bill, were read a third time and passed. The New Parishes and Church Building Acts Amendment Bill, the Beerhouses Bill, the Customs and Inland Revenue Duties Bill, and the Election Commissioners' Expenses Bill, were read a second time. The Recorders' Deputies Bill, and the Oxford University Statutes Bill, passed through Committee. On Monday, on the order for the second reading of the Irish Church Bill, the House was crowded to excess in every part. The attendance of peers was unusually numerous, nearly all the members of the Episcopal bench, including the four archbishops, were present, the galleries were thronged with ladies; the diplomatic body mustered in great force, members of the Commons were literally packed in the space assigned to them, while the strangers' gallery was overflowing. The proceedings were commenced by the Earl of DERBY, who called attention to the 150 petitions presented against the Bill during the last few days, and said that those from Manchester and Liverpool represented more than a quarter of a million persons. Earl GRANVILLE then moved the second reading of the Bill, and described in detail the circumstances which had rendered it necessary. He admitted the value of the Act of Union, but submitted that it had already been impugned by the Church Temporalities Act, without any evil result; and that if the present measure were passed, Ireland would be placed in precisely the same position as Scotland. He emphatically denied that the Bill was an assault upon Protestantism, or that it was intended to lead to a similar measure against the Church of England. He fully acknowledged the power and independence of the House; but, powerful as it was, there was one thing than which it was less powerful, and that was a clear expression of the national will. The Government could not, it was true, surrender the principle of the Bill; but otherwise they were prepared not only to welcome any alterations in its details which might appear to be improvements, but would deem it their absolute duty carefully to consider any alterations their lordships might propose. The Earl of HARROWBY moved as an amendment that the Bill be read a second time that day three months. He objected to it on the ground that it was a revolutionary measure, in opposition to the coronation oath and the Act of Union, and that no circumstances existed to justify its introduction. The Earl of CLARENDON and Lord ROMILLY supported the Bill; the Duke of RUTLAND opposed it. The Archbishop of CANTERBURY said that upon the decision of the House depended issues which might affect not only the Church of Ireland and the Church of England, but even the destinies of the empire. The episcopal bench, though they did not approve of the Bill in its present shape, desired that it should be fairly considered, and, if possible, so altered and amended as to be converted into a good measure. He thought that the House, comprising as it did the heads of the law and the Church, the intelligence of the nation, and the great landed proprietors, was far more likely to come to a satisfactory conclusion on the Bill than any number of

tumultuous meetings in Manchester. Lord STRATFORD DE CECIL, Earl of CARNARVON, though objecting to the Bill, advised their lordships upon themselves the responsibility of the second reading, but to endeavor to get the Committee. The Bishop of DERRY, on the ground that it would reduce Ireland to a reliance upon the clergy and laity, violated the Royal supremacy in bringing Ireland under the dominion of the Pope. On Tuesday the debate was resumed, who said that while he hoped that the Bill a second time, he equally hoped to pass without undergoing substantial change. Regarding the verdict of the court in the general election as favourable to the Bill, he was prudent to set themselves in opposition, for if they rejected the Bill, it would be again presented to them in a more objectionable form. The Archbishop of DUBLIN, the Bishop of DERRY, and the Bishop of CANTERBURY had been treated, seeing what the Government's promises, as hard, ungenerous, and "robbery of God" were uttered in his opinion, as applied to the subject of the Church. He had long been of opinion that the Church, as an Establishment, had been a religion and political peace, and that, promoting brotherly love, it had engendered. He was, therefore, prepared to support the reading of the Bill, although it was a considerable improvement in Committee. Lord STRATFORD denounced the Bill as a violent and impolitic. Lord PENZANCE, on the other hand, contended that the Bill was constitutional in sense of the term, and that it was the duty of the House to defer to the judgment of the nation. The Earl of RICHMOND said that though he considered the Bill as violent, unjust, and spoliation, and the very reverse of Mr. Gladstone's amendment, he had nevertheless decided upon voting in favour of it, because he could not conceive that the country had pronounced its verdict upon the question of disestablishment, and that the House would be to endeavour to amend the Bill. The Bishop of PETERBOROUGH disapproved the Bill as necessarily a violation either of the coronation Oath or of the Treaty of Union, and himself an attack on the rights of private property. He warned the House against letting the property of the Irish Church be introduced as the very reason that it was corporate property that the attack on corporate property foreshadowed an attack on private property, and that the sacrifice of the Church naturally preceded the sacrifice of the justice and policy of the Bill, and that demanded by public opinion. The verdict of the general election, on the question of disestablishment, had been obtained by most unworthy means, and the most unfair and malignant representation. Lord GREY and RIBON spoke at some length in favour of the Bill, and the Earl of CANTERBURY. On Thursday, in a House which was again crowded to excess in every part, Lord CALVERT proposed a motion respecting the letter of the Board of Trade lately read at a public meeting in Birmingham. He said that it contained three propositions—that their lordships were in opposition to the will of the nation, that the Church Bill were rejected it might be a substitution, that the consequence of such a measure might be the overthrow of the Constitution, and that if by the rejection of the Bill these things should happen, it would be to the people. Such expressions as these could not have emanated from a Minister of the Crown, and he hoped that Ministers would not all participate in them. Earl GRANVILLE, no member of the Government, except the Earl of RICHMOND, had seen the letter before it appeared in the press, and the Government, therefore, could not be responsible for its views. Mr. Bright's discountenanced agitation on this Bill, and the outburst was the consequence of much previous agitation, and especially of a recent meeting in St. James's Square. Mr. Bright distinctly repudiated the expression of a threat against their lordships, and expressed his regret if he had wounded any of them. Earl GREY with some indignation said that the letter of Mr. Bright was the highest degree indecorous and improper any Minister of the Crown. The Earl of RICHMOND resumed the debate on the Irish Church Bill, and to the very principle of the measure, and that it despoiled the Church of its property, antagonistic to the Coronation Oath and the Act of Union, he attributed to the Liberal agitation which had been raised for the disestablishment of the Irish Church, with the view of destroying the union between Church and State in both countries. The Bill was an unconstitutional legislation, for its details were not contained in the preamble, and the application of a large part of the surplus to be obtained from the Church to the permanent endowment of the Poor Law, a flagrant breach of the engagement of the Government, and a part of these proceeds would be applied to religious uses. He distrusted the plea of expediency, and thought the Bill should be considered, and though he was no longer a member of the Conservative party, and expressed no convictions, he should, to his dying day,

that he had been enabled to lift up his... the adoption of a measure of which he... The Earl of KIMBERLEY, the Duke... the Duke of DEVONSHIRE, the... EARL STANHOPE and Mr... spoke in favour of the second reading... RYON, Lord BEDESDALE, Lord COLCHES... the Bishop of TUAM opposed the Bill... the debate was resumed by Earl RUSSELL... that he had always had in view the injustice... of the Irish Church, and rejoiced that the question had... been taken up in such a way as to awaken a feel-... ing of justice in the people of the United Kingdom... fact, which ought to settle the question, was... of the Established Church formed... of the population of Ireland. The... was sitting.

House of Commons on Friday the Bank-... Bill was again considered in Committee, and... made as far as clause 91, but no amendment... was made in any of the clauses. After... on a recent conviction of children by... magistrates, Captain GROSVENOR moved... declaring that certain third-class clerks in... were entitled to the scale of pay secured... generally by an Order in Council of 1855... Mr. CHAMBERS, the SOLICITOR-GENERAL and Mr... GLADSTONE opposed the motion, which was negatived... a division by 107 to 64. Mr. BRUCE, in answer to Mr... JOD, stated that the scope of the Judicature Com-... would be extended so as to embrace the County... Quarter Sessions, and other local tribunals... Hospital Bill was read a second time... the Oyster and... Fisheries Supplemental Bill were read a third... time and passed. On Monday the House went into... on the Endowed Schools Bill, when Mr... CHAMBERS moved an amendment on clause 9,

making it impossible for the Commissioners to alter... of any educational endowment without the... of the governing body. The amendment was... by Mr. FORSTER and others, and was ulti-... mately withdrawn. Mr. T. CHAMBERS next moved to... from clause 10, empowering the Commissioners... the constitution of governing bodies, all schools... connected with a city guild or corporation, unless the... Commissioners should report that they had been... managed. The motion was opposed by Government... and withdrawn. On clause 12 Mr. WINTERBOTHAM... amendment, empowering the Commissioners... to make provision for girls' education... equal to boys'. After some discussion the motion... was withdrawn. Clause 20, empowering the Commis-... sioners to apply to education charitable endowments... which have become obsolete or have outgrown their... objects, was agreed to, with the addition of... endowments for loans and apprenticeship fees to the... list of charities liable to be so dealt with. The remain-... ing clauses of the Bill were agreed to without any... material amendment. Mr. NOEL moved that a new... writ should issue for the city of Dublin in the room of... Sir A. Guinness, unseated on petition. Sir G. GREY... moved as an amendment, for leave to bring in a Bill... for enfranchising the freemen of the city of Dublin.

On a division the motion for the issue of the writ was... negatived by 215 to 169. A motion to adjourn the... House was then made and negatived by 178 to 76. Another motion for adjournment having been... made, the Government gave way, and the debate... on Sir G. Grey's motion was adjourned. On... Tuesday the House, at a morning sitting, resumed... the consideration of the Bankruptcy Bill in Committee, and... agreed to the remaining clauses, except the last, which... provided compensation for the holders of... offices. The discussion on this clause was... concluded when the Chairman reported progress. Mr. PRASER moved an address to the Crown, calling... attention to the expediency of obtaining an early report... from the Royal Commission, appointed in 1865, to in-... quire into the duration of our coalfields. Mr. H... BURNETT, as a member of the Commission, said that the... inquiry was nearly complete, and that in regard to the... question it had already proved that an ample... supply of good fuel would be forthcoming when our... present coalfields were exhausted, and that, practically, a... vast mineral wealth existed sufficient for count-... less generations. After some discussion the motion... was withdrawn. Sir W. GALLWEY then proceeded to... draw attention to the defective packet service between... Folkestone and Boulogne, when the House was counted... out. On Wednesday Mr. WELBY moved the second... reading of his Seeds Adulteration Bill, the object of... which was to make penal the manufacture of adul-... terated agricultural seeds, or the sale of them with... knowledge. Mr. BRIGHT admitted the reality of the... grievance, but urged that the Bill should be referred... to a Select Committee, as it would be difficult to... legislate without inquiry. After some discussion the... Bill was read a second time, and referred to a Select... Committee. Mr. BUXTON moved the second reading... of the Municipal Corporations (Metropolis) Bill, the... object of which was to carry out the idea of Mr... James Stuart Mill, by converting the 19 metropoli-... tan boroughs into a corporation for the whole... of London, with a representative council and an... executive administration chosen by the ratepayers.

Mr. C. BENTINCK moved that the Bill be read a... second time that day six months. After some dis-... cussion Mr. BRUCE said that the question could only... be satisfactorily dealt with on the responsibility of... Government, who were resolved to deal with it at the... earliest practicable moment. The Bill was then... withdrawn. Mr. C. REED moved the second reading... of the Sunday and Ragged Schools Bill, the object of... which was to exempt those places from local taxation... Mr. P. WINDHAM moved, as an amendment, that the... Bill be read a second time that day six months. Mr.

GLADSTONE opposed the Bill on behalf of Government... On a division the second reading was carried against... them by a majority of 157, the numbers being 223... to 71. On Thursday, in answer to Colonel NORTH, Mr. GLADSTONE said that Mr. Bright's Birmingham... letter had been written on his own responsibility, and... without communication with his colleagues, and... nothing could be farther from their intention to inter-... fere by threat, dictation, or otherwise, with the perfectly... free action of the House of Lords. The adjourned... debate on Sir G. GREY's motion for leave to bring in a... Bill for disfranchising the freemen of Dublin was... resumed by Mr. HENLEY, who objected to dis-... franchise a whole body for the offence of a few. The... Bill was supported by Sir G. GREY, Mr. HARCOURT, and Mr. WHITBREAD, and opposed by Mr. J. LEWIS and Colonel FRENCH. The motion was... then agreed to without a division, and the Bill was... read a first time. The House afterwards went into... Committee of Supply on the Army Estimates, and... agreed to several votes. The Endowed Schools Bill, as... amended, was considered and agreed to. The Salmon... Fisheries Bill was withdrawn. The Endowed Hospitals... (Scotland) Bill passed through Committee. Yester-... day the House went into Committee on the Bank-... ruptcy Bill, commencing with the clause provid-... ing for the payment of the Commissioners at a scale... equal to their full salaries. Mr. WEST moved... an amendment to strike out the words "during... good behaviour." Sir ROUNDELL PALMER op-... posed that the Commissioners had a freehold right in... their offices. Mr. GLADSTONE denied the existence... of a freehold, and expressed his hope that the close... of the discussion would witness the explosion of a great... superstition, which had been a burden to the public for... years past. That superstition was the supreme... independence of judges. He thought that the full... pension should be dependent on good tenure, length of... service, and the prospects of future re-employment. Mr. WARD HUNT concurred in this opinion. The... clause was then postponed, and the Chairman reported... progress. The House was left sitting.

consequences might result from going off the pave-... ment. He reminded the cabman who was brought... before him that the carriage-way was common prop-... erty, open alike to driver and pedestrian, and that... every man was bound to exercise his right with con-... sideration for the rights of others. EXPLOSION AT HOUNSLOW POWDER MILLS.—On... Thursday afternoon, shortly before 1 o'clock, an explo-... sion occurred at the powder mills of Messrs Curtis &... Harvey, at Hounslow near Hounslow. Three of the... workmen, a boy who was riding past, and the horse, were... killed, and upwards of 20 persons were wounded. Ten of the houses were destroyed, the trees were torn... from their roots, and the machinery was blown to... pieces. The concussion was felt 10 miles off, and in the... towns and villages adjacent to the mills considerable... damage was done to buildings. THE FATAL FIRE AT PENTONVILLE.—At the inquest... on Monday on the three persons who lost their life in... this fire, the jury returned a verdict that the deceased... were accidentally killed by the fumes of paraffin, and... appended the following note:— "And we are of opinion that part of the dangers to which... this old and densely populated neighbourhood is exposed to... from fire is mainly attributable to the fact that all the control... of fire-engines and escapes has been placed in the hands of the... Board of Works, and they have neglected for years past to... provide us with that protection from fire for which we pay, and... the necessity of the case demands at their hands—in... order to be properly prepared to stay the progress of these... lamentable disasters which have occurred so frequently during... the last three years, we respectfully suggest that the parish... authorities again memorialise the Metropolitan Board of Works... to forthwith take the proper steps to provide this parish with a... fire-engine and escape-station in an open, central, and elevated... spot, as near the vestry-hall as possible." THE HARROW MURDER.—On Monday Lewis Mid-... son, the landlord of the Chequers, at Alperton, near... Harrow, was brought before the Hammersmith police... magistrate, on the charge of murdering his wife. The... coroner's jury had returned a verdict of Manslaughter, chiefly, as it appeared, in consequence of the aggravat-... ing conduct of the deceased; but the magistrate... thought the circumstances so serious that he com-... mitted the prisoner for trial on the capital charge. MURDER IN THE BOROUGH.—An inquest was held... on Saturday on the body of Henry Johnson, who died... from injuries inflicted on him some days before by a... fellow labourer, called James Dalton, to whom, it was... said, he owed money. On Friday fortnight Dalton... called at the lodgings of deceased for some money, and... after remaining there for a short time the noise of a... struggle was heard, and on some neighbours going to... the room they found Dalton beating Johnson about... the head with a poker, and inflicting such serious... wounds that they have since proved fatal in the... hospital. A brother of deceased explained to the jury... that though it had been said that deceased owed... his assailant money it was not so in reality. The... deceased had merely promised to lend the other 18s., but had not kept his word. A verdict of Wilful... Murder was returned. THE PUBLIC HEALTH.—The Registrar-General's... Weekly Report states that in the week that ended... on Saturday, June 12, 4262 births and 2927 deaths were... registered in London and in 13 other large towns of... the United Kingdom. The annual rate of mortality... was 23 per 1000 persons living, being 21 per 1000 in... London, 35 in Edinburgh, 22 in Dublin, 21 in Bristol, 16 in Birmingham, 20 in Liverpool, 27 in Manchester, 21 in Saltley, 20 in Sheffield, 24 in Bradford, 20 in Leeds, 19 in Hull, 25 in Newcastle-upon-Tyne, and 37 in Glasgow. The rate in Vienna was 31 per 1000 during... the week ending the 5th inst., and in Berlin 35 per... 1000 during the seven days ending the 10th inst. In... London the births of 1002 boys and 928 girls, in all... 1930 children, were registered in the week. In the... corresponding weeks of 10 years, 1859-68, the average... number, corrected for increase of population, was... 2048. The deaths registered in London during the... week were 1305. It was the 23d week of the year, and... the average number for that week, corrected for... increase of population, was 1271. The present return, is... therefore 34 above the estimated amount.

Provincial. BIRMINGHAM.—A crowded meeting was held in the... Town Hall on Monday, to consider the present pros-... pects of the Irish Church Bill. The Mayor presided. The... Town Clerk read letters of apology from the borough... members. The letter of the Right Hon. John Bright was as follows:— "London, June 9. "Dear Sir,—I must ask my friends to excuse me if I am... unable to accept their invitation for the meeting on Monday... next. The Lords are not very wise, but there is sometimes... delay to the people even in their innovations. If they should... delay the passing of the Irish Church Bill for three months... they will stimulate discussion on important questions, which, but for their infatuation, might have slumbered for many... years. It is possible that a good many people may ask what... is the special value of a Constitution which gives a majority of... 100 in one House for a given policy, and a majority of 100 in... another House against it. It may be asked also why the... Crown, through its Ministers in the House of Commons, should be found in harmony with the nation, while the Lords... are generally in direct opposition to it. Instead of doing a... little childish tinkering about life passages it would be well if... the Peers could bring themselves—the one with the opinions... and necessities of our day, in harmony with the nation, they... may go on for a long time, but throwing themselves athwart... its course, they may meet with accidents not pleasant for them... to think of. But there are not a few good and wise men... among the Peers, and we will hope their counsels may prevail. I am sure you will forgive me if I cannot come to your meet-... ing.—Believe me, Sir, John Bright."

Mr. Thomas Lloyd then moved the following reso-... lution:— "That this meeting is of opinion that the Irish Church Bill... introduced by her Majesty's Ministers, being in policy... and just in principle, and having passed the House of Com-... mons by large majorities in accordance with the national will

It was the 23d week of the year, and... the average number for that week, corrected for... increase of population, was 1271. The present return, is... therefore 34 above the estimated amount.

Provincial.

BIRMINGHAM.—A crowded meeting was held in the... Town Hall on Monday, to consider the present pros-... pects of the Irish Church Bill. The Mayor presided. The... Town Clerk read letters of apology from the borough... members. The letter of the Right Hon. John Bright was as follows:—

"London, June 9. "Dear Sir,—I must ask my friends to excuse me if I am... unable to accept their invitation for the meeting on Monday... next. The Lords are not very wise, but there is sometimes... delay to the people even in their innovations. If they should... delay the passing of the Irish Church Bill for three months... they will stimulate discussion on important questions, which, but for their infatuation, might have slumbered for many... years. It is possible that a good many people may ask what... is the special value of a Constitution which gives a majority of... 100 in one House for a given policy, and a majority of 100 in... another House against it. It may be asked also why the... Crown, through its Ministers in the House of Commons, should be found in harmony with the nation, while the Lords... are generally in direct opposition to it. Instead of doing a... little childish tinkering about life passages it would be well if... the Peers could bring themselves—the one with the opinions... and necessities of our day, in harmony with the nation, they... may go on for a long time, but throwing themselves athwart... its course, they may meet with accidents not pleasant for them... to think of. But there are not a few good and wise men... among the Peers, and we will hope their counsels may prevail. I am sure you will forgive me if I cannot come to your meet-... ing.—Believe me, Sir, John Bright."

Mr. Thomas Lloyd then moved the following reso-... lution:—

"That this meeting is of opinion that the Irish Church Bill... introduced by her Majesty's Ministers, being in policy... and just in principle, and having passed the House of Com-... mons by large majorities in accordance with the national will

as declared at the late general election, ought speedily to become law."

He urged strongly that respect for the national will demanded that no obstruction should be placed in the way of the Bill being passed into law. Mr. Joseph Chamberlain seconded the resolution, and denied the assertion made as to the alleged Conservative reaction. Mr. S. S. Lloyd rose to propose an amendment, and for more than an hour stood in front of the platform without being able to obtain a hearing. The Mayor made repeated appeals in his favour without effect, and Dr. Evans, who was to have seconded the amendment, was ordered into custody for entering a protest against the order of proceeding. Ultimately the resolution was adopted by a large majority, as well as a petition to the House of Lords in favour of the second reading of the Bill. Mr. Murphy, the Protestant lecturer, had intimated his intention of being present, but he was arrested on a sworn information previous to the commencement of the meeting. Another large meeting was held at the same time outside the Town Hall, at which resolutions were carried in favour of the Bill. On Wednesday Mr. Murphy was brought before the magistrates, on a charge of attending the meeting with intent to create a disturbance. Mr. Kynnersley, the presiding magistrate, decided that the arrest had been improperly made, and dismissed Mr. Murphy, who intimated that he should take proceedings against the mayor, by whose order he was arrested.

BOLTON.—A great demonstration against the Irish Church Bill took place in this town on Saturday, and was attended by about 6000 persons connected with the various Orange Lodges and Constitutional Associations in the neighbourhood. The Rev. Canon Powell, vicar of Bolton, addressed the meeting, and said that the Bill was one of spoliation, confiscation, and robbery, and struck at the very root of the principles of the British Constitution. Mr. Gladstone never said a word about the disendowment clauses until after the election, and if the Bill passed it would strike a blow at the security of all property. Mr. Councillor Richardson moved the adoption of a petition urging the House of Lords to reject the Bill on the second reading. The Rev. T. T. Berger seconded the resolution, which was carried. Three cheers were given for the Earl of Derby.

CHEPSTOW.—On Saturday week a man named John Lane, the son of a farmer of the parish of Llanvibangel, who appears to have cherished a spirit of hatred against his brother-in-law, a small farmer residing at Kilgwrey, proceeded to the farm with a loaded gun, intent upon doing him some bodily injury. On arriving at the house he was disappointed to find that both his brother-in-law and sister had left for Chepstow market, and, to gratify his revenge, he turned out a servant girl who was in charge of the house, locked the door, and put the key in his pocket. He then drove his brother-in-law's cattle from field to field, and on meeting a labouring man named William Nicholls, who was going to work for his brother-in-law, he shot him dead on the spot. He then reloaded the gun, and fired at a butcher and dealer, named James Davis, a resident in the same locality, who came up at the moment, and so shattered his arm that it was necessary to amputate it. The gun was found in a hedge, re-loaded and capped, about five miles from the spot. The man was taken into custody, and the jury at the inquest returned a verdict of Wilful Murder against him.

DUDLEY.—On Tuesday, Fanny Frances Maria Oliver, widow of Joseph Oliver, boiler-maker, of Herts Hill, was charged before the magistrates in this town with the wilful murder of her husband by administering poison. The husband died on Whit Sunday, and was buried on the following Wednesday. After a certificate had been given by the surgeon who had attended him, that the cause of death was congestion of the liver, suspicions were aroused in the minds of neighbours that he had been poisoned, and the inquiries made by the police resulted in the arrest of the wife on the charge of wilful murder. The evidence showed that the parties were in a comfortable position of life, and that the accused was the daughter of a respectable artisan, living at Handsworth, Birmingham. The deceased was a shareholder in a building and investment society in Wolverhampton, and his wife had drawn out, in the past year, about 1000*l.*, in eight different sums, after having had letters, giving notice for the withdrawal of the money, written in her husband's name, but by a youth, whom she strictly charged never to tell her husband. Deceased became ill, and the prisoner nursed him, always preparing his food. About the time of his illness, she obtained arsenic from a druggist's, professedly for bonnet cleaning. Deceased was often very sick, and vomited greatly. Once when he was taking milk he complained that it was hot with pepper, and vomited very much, and so, too, did his mother and another person who tasted it. The body, on an order from the Home Secretary, was exhumed the second time, when the contents of the stomach, the intestines, the kidneys, and the liver were sent to Dr. Hill, of Birmingham, who found, on analysis, that deceased had died from arsenical poisoning. The prisoner, who is apparently only a little over 20 years of age, and who seemed to take the least interest in the proceedings of any one in the court, was committed for trial.

KENDAL.—On Wednesday morning the Westmoreland hills were covered with snow, and the drifts were three or four feet in depth. The snow fell as far down the valley as Stavely, a village occupying a most sheltered position between Kendal and Windermere.

LIVERPOOL.—A meeting in opposition to the Irish Church Bill was held on Saturday, in a field near Hail Lane, on the eastern outskirts of this town. Taking the different accounts, from 10,000 to 30,000 persons were present. Mr. Edward Whitley, an ex-Mayor, took the chair on the principal platform, and the speakers included Mr. Burland, the chairman of the

Liverpool Working Men's Conservative Association, Mr. Charles Groves, and several working men, all of whom denounced the Bill, its authors, and adherents in the most unmeasured terms. Three resolutions were passed, one declaring that the meeting regarded the Bill with indignation and alarm, as subversive of the Constitution in Church and State, as injurious to the cause of Protestant truth and destructive to the security of the rights of property; the second calling upon the House of Lords to reject the Bill, and the third moving the adoption of a petition to the Upper House. Each resolution was carried, and the form of petition was agreed upon.

MANCHESTER.—A monster demonstration was held in the Pomona Gardens, in this city, on Saturday, to petition the House of Lords against the Irish Church Bill. The number of persons present is stated at 250,000. The proceedings were of a very enthusiastic character. Eight platforms were erected, and from each of these a series of speakers addressed the assembly. Among the speakers were Mr. Sowler, Q.C., Mr. W. O. Mitchell, the Rev. Dr. Foley, Lord C. J. Hamilton, the Earl of Carrick, Sir Eardley Wilmot, the Rev. Dr. Massingham, Mr. E. Harper, Mr. Booth Mason, Lord J. W. Butler, Mr. A. Egerton, M.P., Mr. Birley, M.P., General Beattie, and Mr. A. Goldschmid. The following resolutions were passed as proposed from each of the eight platforms, and in almost every instance with scarcely a hand held up in opposition:—

"1. That we view the obligation imposed by the Coronation Oath upon every Sovereign of these realms since 1688 not as a mere compact between the Sovereign and people, revocable at pleasure, but as a most solemn pledge to the Almighty, from which the Legislature has no power to release; and any attempt to force on the Sovereign an act inconsistent with such pledge, on the plea that the nation is willing to forego the obligation, we deem to be an insult to the Sovereign, and an assumption of the power of dispensation which, as Protestants, we must ever repudiate. That the Bill for the Disestablishment and Disendowment of the Irish branch of the United Church of England and Ireland will if it become law, destroy the Protestant constitution of this Protestant kingdom, lead to Papal supremacy in Ireland, and shake the rights of property. And that we therefore call upon the House of Lords to reject the Bill. 2. That we protest against the confiscation of the property of the Church in Ireland, and against the proposal to hand over a large portion of such property to the Roman Catholics. That we feel grateful to our brother Protestants in Ireland for their firm and temperate stand against the combined forces of Popery, infidelity, radicalism, and revolution. That we heartily join with them in declaring our determination to uphold the Legislative Union between Great Britain and Ireland as long as the spirit of the international compact is respected and held inviolate by the British Parliament; but that should the 5th Article of the Treaty of Union, which is expressed to be essential, fundamental, and perpetual, be repealed, we shall be forced to regard the Union as virtually dissolved. And that we strongly condemn the conduct of the Government in releasing the Fenian prisoners, and thereby giving encouragement to Fenianism, the existence of which is made the pretext for despoiling the Church in Ireland. 3. That a petition embodying the above resolutions be signed by the chairman on behalf of this meeting, and forwarded to the Earl of Derby for presentation to the House of Lords on Monday next."

The following "rider" to the second resolution was also adopted, on the motion of Sir Eardley Wilmot, who said he had been asked to propose it—

"That we particularly request the Lords Spiritual of the Kingdom, and especially the Archbishop of York and the Bishops of the United Kingdom, to take part with the House of Lords in rejecting the Bill."

It is impossible in our space to give a summary of the 20 columns of speeches delivered by the hundred speakers during three hours, but the following outline of the proceedings at the principal platform, where Mr. R. H. Hutchinson, of Blackburn, took the chair, will give a fair idea of the others. Mr. W. O. Mitchell, of Newchurch, the mover of the first resolution, charged Mr. Gladstone with giving 380,000*l.* as a permanent endowment to the Roman Catholics, after having said in Lancashire that he would never appropriate the funds of the Irish Church to any religious body. At the same time he likened the House of Commons to a well-trained flock of sheep following the recreant steps of a great sacrilegious bell-wether.—The Rev. Dr. Foley, Prebendary of Cashel, described the policy and conduct of the Government as a combination of cursed Quakerism and concealed Romanism against the property and the religion of the nation.—Lord C. J. Hamilton said that Mr. Gladstone's avowed reason for endowing Maynooth was the rich endowment of Trinity College. But within a week after Mr. Gladstone gave that excuse, with that grim, horrible countenance of his—that sinister expression which overshadows his countenance whenever he alludes to any of the Protestant institutions of this country—he stated that when once the question of the Established Church of Ireland was settled it would be his turn to deal with the endowments of Trinity College.—The Rev. C. H. Wainwright, of Blackpool, asked why, if the Protestants were to be disendowed in Ireland because they were a minority, the Catholics in England should not be disendowed also as a minority here, if all were to be treated with "equality?"—The Earl of Carrick characterised the measure as a great national sin, the separation of the State from religion, the alienation of property which has been devoted to the service of God, and the giving over Ireland to the Catholic hierarchy and the political and religious supremacy of Rome, culminating in the accession of a Roman Catholic sovereign of that country.—The Rev. Dr. Massingham said that if they looked at Mr. Gladstone's face they could not wonder at the description given of him. If they could only clothe him in a Roman Catholic garb, he would make a very good Papist, and then he would appear before them in his true colours. He was doing the work of a Jesuit, why did he not avow it? As to the appropriation of the surplus "for the benefit of criminals, idiots, and lunatics," it had been prophesied that Mr. Gladstone would end his days in a lunatic asylum, and he wanted to

make a very handsome provision for the education of Edward Harper, Grand Master of the Orange Institution, Mr. Booth Mason, and other Orangemen with their full paraphernalia, how much more justice in front of the platform than in the House of Commons. Mason was called upon to second the resolution, and in doing so he made a conspiracy was concocted against the people. Gladstone was turning Papist, and no better; and, more than that, the people were to fight for their civil and religious liberties. In the House of Commons the opinions of the people were swamped by the representatives of Scotch—Sir Pertinax Macscoy, and of the Irish, who had not more of the man who gave his soul to the priest than a brute beast. Mr. W. H. Wood, of Manchester and Salford Trades' Committee, said Gladstone had been likened to all the loathsome in history. (Cries of "Isaac," "Isaac," "Isaac.") "Isaac was a good man to him; he repented the sin he committed, but this man has no repentance in him, he gloried in his proceedings at the platform, concluded thanks to the chairman, "God Save the King," and cheers for local favourites, Mr. Charles the greatest share.

MERTHYR.—One more body was recovered, making 54. Part of the workings are now making great exertions are making to wall it in, to get access of air. An open safety lamp has been used in heading where the gas exploded, and a man had opened the lamp to light his pipe, and exploded the fire-damp. A jury was sworn on Friday at Pontypridd, and the bodies were taken that certificates of burial could be given.

PLYMOUTH.—A court-martial was held in Hamoaze on Captain Gibson and Sergeant-tenant Phillips, of the Cadmus, for firing a vessel on shore near the Bolt. After the prisoners' defence, the court found that the charges had been partially proved, in that the prisoners were a grave error of judgment in standing in a thick fog at a considerable speed, without the ordinary precautions for the safety of the court in consequence adjudged Captain Gibson and Lieut. Phillips to be admonished to be more careful for the future.

SUNDERLAND.—The subscriptions in the neighbourhood on behalf of Mr. George H. amount to upwards of 1500*l.* A subscription commenced in York.

SWAFFHAM.—William George Davey, and Susannah, his wife, were apprehended recently on charge of feloniously administering to John Davey, of Swaffham, a large quantity of arsenic, with intent to kill him. The prisoner is brother-in-law of the prosecutor, who, it appears, is the heir to his mother's property. On the 5th ult. John Davey visited his brother at Pakefield, Lowestoft, and stayed two or three days, and made him a small currant cake. He had eaten three of these cakes, but felt no ill effects, but a few days afterwards, after partaking of part of another cake, he was vomiting and purging, and became dreadfully ill. Next morning a surgeon was sent for who analysed a portion of the cake, and found contained so large a quantity of arsenic that it was seen with the naked eye. The prosecutor, who yet recovered from the poison, is a single man, and possessed of other property, and has no other children. The prisoners, who are both young people, were only married at Christmas last, were brought before the magistrates on the 10th inst., and committed to trial at the assizes.

Ireland.

RUMOURED PERVERSION OF THE LORD-LIEUTENANT.—It was reported on Saturday that Lord-Lieutenant and Countess Spencer had received into the Church of Rome; but that a case of the Marquis of Bute, a dispensation was granted to prevent its premature announcement, and public generally discredited the report, and so it to the visits lately paid to the local convents.

MR. BRIGHT'S LETTER ON THE PEERS.—A meeting of the National Association in Dublin on Monday, Mr. Bright's Birmingham letter was read with marked satisfaction. Alderman M. Swiner remarked when he spoke of the "infatuation" of the House, also when he said "Reform the Upper House, it away altogether; they had implicit confidence in the genius of Gladstone and Bright."

THE IRISH CHURCH.—On Monday evening in opposition to this Bill he held a meeting at the Exhibition Palace, and is said to have had a gathering of Protestants of all denominations in the city. Though the idea of holding a meeting was entertained two days before, more than 3000 resolutions were issued. The building was fitted for every part, and there were three platforms, every part, and there were three platforms, Concert Hall, in the Great Transept, and the Hall. Sir Edward Grogan presided at the platform, and the principal speakers were David Plunket, Mr. Falkiner, Q.C., Dr. Foley, the Rev. Dr. Griffin, and Mr. Massingham. Resolutions earnestly calling upon the Government to out the Bill were passed amid repeated "No compromise," "No surrender," "No increase," but all passed off quietly.

LIVERPOOL, June 15.—We had a fair attendance at our market to-day, and Wheat met with an active consumptive demand, at an advance of 2d per cental. In Flour the transactions reported were not either numerous or important, but previous quotations were generally fully obtained. Indian Corn was in moderate request, at an advance of 3d. per qr. Oats dull. Oatmeal prices unchanged. Beans easier. Peas in fair request, at 6d. advance.

SEED MARKET.

The agricultural seed trade remains in a very quiet state, no disposition to operate being at present manifested by speculators. The unfavourable reports which come to hand, both of the English and foreign growing crops, give confidence to holders, all descriptions of Red Clover and Trefoil seed are consequently held with great firmness. We have a fair inquiry for sowing Mustard and Rape seed. These seeds are in very short supply, and continue to command advancing rates. Canary seed is in good request at recent currencies. Of Hemp seed there is but little on offer, and the late advance is well supported. Feeding linseed is firm both in tone and demand. For other kinds of seeds, values, in the absence of business, are nominal.

JOHN SHAW & SONS, 16, Water Lane.

WANTED, a HEAD GARDENER, where an Under Gardener is kept. He must be able and willing to work in the Garden as well as in the Houses. A married Man, without children, honest, sober, civil, industrious, and thoroughly acquainted with his profession. Wages 22s per week, and the lodge to live in.  1 1/2-in. ditto Delivery Hose, 1s. 4d.

Crystal Palace, Sydenham, March 2, 1867

Messrs. WARNER & SONS.
 "GENTLEMEN,—I feel great pleasure in stating that I was
 present at a trial of your small Crystal Palace Fire Engine, and
 was much pleased with its efficiency and simplicity. The
 Pump throws out a steady jet of water to a height of 50 feet
 with very little labour. The Pump we have is well made, very
 simple in its parts, and not likely, I think, to get out of order.
 The advantage of this pump is its being very portable. Besides
 being a good Fire Engine, it will make an excellent Garden
 Engine."
 "I remain, gentlemen, yours obediently,
 "Kewis Ross, Engineer to the
 "Crystal Palace Company"

Home News.

THE COURT.—The Queen and Royal family continue at Windsor. On Friday the Queen held a Council, at which Mr. Motley, the United States Minister, was introduced by the Earl of Clarendon, Secretary of State for Foreign Affairs...

THE PRINCE AND PRINCESS OF WALES.—On Friday afternoon the Prince was present at the debate in the House of Lords. In the evening the Prince and Princess, and the Crown Prince of Denmark, dined with the Duke of Cambridge at Gloucester House. On Saturday the Princess, accompanied by the Crown Prince of Denmark, visited the Queen at Windsor Castle.

ARRIVAL OF THE VICEROY OF EGYPT.—His Highness, Ishmael Pacha, Viceroy of Egypt, accompanied by Nubar Pacha, his Prime Minister, and a numerous suite, arrived at Dover from Calais on Tuesday afternoon, in the Admiralty yacht Enchantress...

THE DUKE OF GENOA, who recently became a pupil of Harrow School, is an inmate of Mr. Matthew Arnold's house at Harrow, and has also a house in London. His Royal Highness comes up to London every Saturday afternoon, accompanied by one of his suite, in order to attend to his religious duties...

PRINCE ARTHUR, who is about to join the 14th Battalion of Royal Engineers, now stationed in Canada, will leave the Mersey on Saturday, the 14th August, in the human mail steamer City of Paris, for Halifax. The Prince is expected to return to England next spring.

KNIGHTHOOD.—It is the intention of her Majesty to confer on Mr. Panizzi, late Principal of the British Museum, and now a Senator of Italy, the dignity of K.C.B.; and to confer the honour of knighthood on Mr. Tite, M.P. for Bath, to be followed hereafter by the civil Order of the Bath.

Admiral Kellett, C.B., will be appointed to the command of the China Station, in the promotion by the death of Admiral Lambert.

CONVOCAION.—On Friday, in the Upper House, the Archbishop of Canterbury, in opening the Lower House on the subject of intercommunion with the Eastern Churches, and it would be desirable to decide whether they would be admitted on the subject. After some observations by the Bishops of London, St David's, Ely, &c. &c. A gravamen from the Archdeacon of London, in the subject of the Irish Church, was brought forward.

THE HISTORICAL MSS. COMMISSION.—At a meeting of the Commissioners on Thursday last, held at the Rolls House last week, for the purpose of taking steps to carry out her Majesty's command. Since their first meeting the Secretary has received less than 100 letters from possessors of MSS. collections, offering their aid and co-operation...

"Her Majesty has been pleased to appoint a Commission to ascertain what subjects connected with ecclesiastical, literary, or scientific history are extant in the collections of private persons and other institutions. A copy of the Commission which will best explain the object of her Majesty's interest in this object, and will that view they desire to be taken of it, and will that view they propose to be taken of it, and will that view they propose to be taken of it, and will that view they propose to be taken of it..."

NEW QUEEN'S COUNSEL.—The Queen has granted a patent under the Great Seal of the United Kingdom conferred on the following members of the Bar the dignity of the silk gown.—Mr. F. Boyle, Mr. Fox Bristowe, Mr. F. Morgan, M.P., Mr. Thomas Hughes, M.P.

PRUSSIA.—The ceremony of inaugurating the port of Heppens for the navy of the North German Confederation, situated at the mouth of the river Jade, in the Grand Duchy of Oldenburg, took place on the 10th, in the presence of the King of Prussia. His Majesty, in his speech on the occasion, said:

My dear friends! ... the progress of the work would have been impossible. I have forward with cheerful satisfaction to the further development of the future of our young German nation.

The North German Parliament was closed on Friday. The speech from the throne enumerated in detail the Bills which had been passed during the expiring session, which it hoped would prove rich in beneficial influence on the future development of the confederation and the progress of North Germany.

Mention was also made of the completion of the first German war port as being a memorial of German activity and sagacity. The speech received with joyful satisfaction the expression of national consciousness manifested on this occasion by the inhabitants of the German littoral.

In conclusion it declared that the unanimous co-operation of the Federal Governments with the national representatives, in the common labouring for Germany's welfare, would, with God's help, strengthen, as heretofore, the general confidence with which Germany, in fortifying herself at home, reckoned upon the preservation of peace abroad.

Count Von der Goltz, Prussian Ambassador at the Court of the Tulleries, died on Thursday at Charlottenburg, near Berlin.

AUSTRIA.—The Press of Sunday mentions as a rumour circulating in diplomatic circles that Prince Coussa, ex-Hospodar of the Danubian Principalities, had suddenly and secretly left his residence in Vienna, and that his departure was connected with some vague reports of approaching complications in the Lower Danube.

HUNGARY.—In the sitting of the Lower House of the Diet on the 17th, the Central Committee proposed the adoption of the Bill respecting the appointment of judges and the exercise of judicial authority.

RUSSIA.—An Imperial ukase authorizes the establishment of a bank called the International Bank of Commerce, with a capital of 5,000,000 roubles, in shares of 250 roubles each. The promoters of this undertaking are bankers of St. Petersburg, Odessa, Taganrog, Warsaw, Hamburg, Amsterdam, Frankfurt, Paris, and London, who are to take the whole of the shares themselves.

ITALY.—The King of Italy returned unexpectedly to Florence on Sunday. His Majesty, it appears, considered his presence necessary to strengthen the Government in taking measures for restoring the tranquillity of the country, which has been much unsettled by riotous demonstrations at Milan, Turin, Naples, and other places.

At Milan on Friday night the disturbances were so serious that the military had to be called out. The rioters retreated before the troops without offering resistance, and order was restored after several arrests had been made.

The committee appointed by the Chamber of Deputies to inquire into the alleged malpractices respecting the tobacco monopoly on Monday took the depositions of Deputy Lobbia, who is recovering from his wounds. The Duchess d'Aosta, the wife of the King's second son, is dangerously ill of miliary fever at Spezzia.

Her Royal Highness received the last Sacraments on Sunday. The bulletin of Thursday announces a slight improvement. The Duke and Duchess of Saxony, while driving a few days since in the neighbourhood of Sorrento, were made prisoners by the hand of the brigand Fuoco, who, when he learnt the rank of his captives, politely handed them to their carriage, and gave a five-franco piece to the coachman, begging their Royal Highnesses to excuse the audacity of his men. The duke is said to have sent Fuoco a magnificent gold watch and chain, valued at 4,000 fr.

PAPAL STATES.—The report that France was endeavouring to re-establish the September Convention, with sufficient guarantees on the part of the Italian Government for the security of the Papal territory, is contradicted. The Pope, in replying to the congratulations addressed to him by Cardinal Patrizi, on the 17th inst., the anniversary of his succession to the Papal throne, said:

"The world is divided into two societies. On the one hand there is the revolution allying itself with socialism, and rejecting both religion and morality. On the other hand, we see the faithful calmly awaiting the triumph of religious principles. I trust in Providence for the protection of Rome against all assaults."

On Monday, being the anniversary of his coronation, the Pope, wearing the tiara, assisted at the mass which was celebrated in the Sixtine Chapel, and afterwards received the congratulations of the Sacred College and public dignitaries. The city was illuminated in the evening.

GREECE.—The Queen of Greece was safely delivered of a son on Thursday morning.

THE PRINCIPALITIES.—By a decree of the Prince the Chamber was prorogued on Tuesday, and the Senate dissolved. The Senate had previously adopted the Bill voted by the Chamber of Deputies ratifying a convention concluded with Austria and Russia for rendering the Pruth more navigable, and for establishing a common right of navigation on that river. Prince Charles laid the foundation stone of the new railway station in Bucharest on Saturday.

SERVIA.—The first Servian bank was established in

Belgrade on the 17th, in allusion to the Franco-Hungarian Bank with the view of obtaining a concession for the construction of the Servian Railway in connection with the South Hungarian line from Kiskunda to Belgrade.

TURKEY.—The Grand Vizier is engaged in preparing a comprehensive and liberal scheme of popular education for the whole empire. A communication from Pera states that the Christians who send their children to the Turkish College are treated with excommunication by the Pope and that the Porte will probably exact the Jesu from the Ottoman Empire by way of reprisal. The Porte has granted 2,000 fr. towards the restoration of the churches in Crete which were injured during the rebellion.

ABYSSINIA.—A telegram has been received through the Foreign Office stating that Donald Mr Powell's Scotch gamekeeper, who was said to have been killed with his master and family, is reported to have escaped, and to have returned to Massowah. It is therefore hoped that other parts of the first story may have been exaggerated.

WEST COAST OF AFRICA.—Advices from Senegal, dated the 31st May, state that cholera was raging on the banks of the River Gambia, and at Bathurst. It had also reappeared at some of the French stations, and at Dakar had become very fatal.

JAPAN.—Advices from Yokohama, dated May 29, state that the Mikado had arrived at Yokohama. Admiral Edmonstone remained fortified in the northern channel of Yesso, waiting for the Mikado's attack. He had attempted to capture the rama Sirovawa, but had failed. The Queen's birthday was celebrated enthusiastically by the British residents in Japan.

AUSTRALIA.—The cablegram cable connecting Tasmania with Australia has been successfully laid and is working satisfactorily. The International Commercial Conference has adopted resolutions recommending a federal confederation of the colonies.

UNITED STATES.—President Grant arrived at New York on the 17th, on his way to Washington. He met with a most enthusiastic reception in that city, as well as at Springfield and Worcester. Six other members of the Cuban Insurgent Junta were arrested in New York on Monday night, and so many arrests of Cuban filibusters have since been made that the filibustering business in New York is considered to be at an end.

On Wednesday night, Lowrey Colonel Ryan escaped from the custody of the United States Marshal, and is reported to have sailed with an expedition for Cuba. The State Department has assured the Spanish Minister that the neutrality laws shall be promptly enforced. The State Department does not sustain the course adopted by Mr. Webb, the United States Minister at Rio, in the embargo with Brazil. It is reported that General Necoan has not been favourably received in Mexico. The Republicans of Pennsylvania and Ohio have re-nominated the present Governors, who belong to their party. The New York Times, in an article on the relations between England and America, admits that the protest of the British nation against paying in cash for popular sympathy with the South is not unnatural. The Washington correspondents of several New York journals state that Mr. Motley will take no important action in the Alabama case until Congress meets in December next. Nearly 5000 Chinese arrived at San Francisco last week. The Supreme Court of Georgia has decided that the intermarriage of whites and negroes is illegal, null, and void, and that the Legislature cannot rightly define the social status of citizens. Numerous trade unions throughout the United States have recently expelled white members for working with negroes. A large body of Cheyenne Indians attacked a surveying party in Western Kansas a few days since, but were repulsed with a loss of ten killed and many wounded. Two winters also were wounded. The Sioux and Red tribes having quarrelled, there was a skirmish near Fort Buford. Eleven (chiefly Sioux) were killed, and 40 wounded.

CANADA.—The Parliament of the Dominion of Canada has been prorogued by the Governor, Sir John Young, who in his speech expressed his satisfaction at the wise measures which had been adopted to secure and consolidate the Confederation of British North America, and also the retrenchment which had been effected. He also said that the vigilant supervision of the public expenditure had obviated the necessity for increased taxation.

NOVA SCOTIA.—The Repeal League Convention at Halifax adjourned on Friday, after passing a resolution protesting against confederation, and recommending the formation of leagues throughout the province of Nova Scotia, with a view to pressure by honourable means annexation to the United States. The proceedings of the League are commented upon by numerous American papers as indicating the inevitable final annexation of Nova Scotia to the United States.

CUBA.—The American schooner Lalave, laden with war materials, ostensibly destined for Hayti, but supposed to be for the insurgents of Cuba, has been captured by the Spanish steamer Fernando, and sent by General Espinar to Jamaica for adjudication. The insurgents claim the victory in the recent battle at Puerto Padre. They have now secured communication with the seashore, and will be enabled to avail themselves more easily of the aid brought by filibustering parties.

BRAZIL.—In consequence of the intervention of the English Minister, diplomatic relations have been resumed between the Brazilian Government and the American Minister, Mr. Webb. Advices from Paraguay to the 15th inst. state that the army was in readiness to march into the interior. A rumour is current at Buenos Ayres, which, however, is regarded as very doubtful, that peace, through the intervention of the American Minister, has been concluded, Lopez had agreed to leave the country.

On the order for going into committee on the Greenwich Hospital Bill, Mr. LIDDELL moved that it be referred to a Select Committee. On a division the motion was rejected by 124 to 43, and the House went into committee and considered several of the clauses of the order for the consideration of the Greenwich Hospital Bill. Mr. MUNTZ moved that the time allowed to a bankrupt to effect arrangements should be extended from 7 to 15 days. The ATTORNEY-GENERAL opposed the amendment, which was negatived by 80 to 33. The third reading was fixed for Friday. The House then went into Committee on the Imprisonment for Debt Bill, and was left sitting.

City Intelligence.

THE TRIAL OF OXFORD, GURNEY, AND Co.—On the application of Mr. Gordon, one of the defendants, the Chief Justice Cockburn has directed that the trial of the directors of Oxford, Gurney, and Co. (limited) shall commence at Guildhall, on Friday, the 2d of July. The Home Office has declined to Dr. Thom's request that the prosecution should be undertaken by the law officers of the Crown, Dr. Thom, being unable to incur the expense of conducting his case in person, though the Lord Chief Justice has announced his intention to conduct his case in person, though the Lord Chief Justice has stated that he will not allow it. Dr. Thom, however, will proceed in what he considers his right as the prosecutor to conduct his case in person, having been bound over by the Lord Mayor in the sum of 5000*l.* to prosecute and give evidence against the defendants.

BANK RATE OF DISCOUNT.—The Directors of the Bank of England on Thursday reduced their rate of discount from 4 per cent., at which it was fixed on the 25th inst., to 3½ per cent.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 92½ to 92¾ for Money, and 92½ to 93 for Account; New and Reduced Three per Cents., 92½ to 92¾; Bank Stock, 241 to 243; Exchequer Bills, 3s. 6d. to 2s. 6d. for March, and par to 5s. pm. for June, India Five per Cents., 111½ to 112 ex div.—FOREIGN: Argentine, 80½ to 81; Egyptian (1864), 88 to 89; Ditto (1865), 78½ to 79½; Italian, 55½ to 56; Mexican, 12½ to 13; Peruvian, 79½ to 79; Orel-Vitebsk, 80 to 80½; Charkoff, 78 to 79; Spanish, 29½ to 30; Turkish Five per Cents., 44 to 44½; Ditto Six per Cents., 67 to 67½; Brazilian, 81½ to 82½; Honduras, 85 to 86; United States 5-20 Bonds, 80½ to 80¾; Erie, 19½ to 20; Illinois, 94 to 95.

Metropolis and its Vicinity.

HER MAJESTY'S ACCESSION TO THE THRONE.—Today was the anniversary of her Majesty's accession to the throne. The form of prayer for the occasion, towards the end of the Prayer Book, was generally read throughout London by all classes of clergy—high, low and broad—special reference was made to it in the sermons of those who are opposed to the disestablishment of the Irish Church, especially to passages in one of the prayers in which the congregations pray that the Queen may be made "a blessed instrument in protecting and advancing the truth wherever it is persecuted and oppressed," that it should not be allowed to "heresies and false doctrines to disturb the peace of the Church, nor schisms and unchristian divisions weaken it." Some of the clergy made some very strong remarks on these points, others made no reference whatever to them in their sermons. The Park and Tower guns were fired in the early part of the afternoon, and at some of the public buildings the royal standard was hoisted.

PROPOSED MEMORIAL TO PROFESSOR FARADAY.—A meeting was held on Monday at the Royal Institution for the purpose of considering the steps to be taken in promoting a memorial to the memory of Professor Faraday. The Prince of Wales presided, and said that on private and personal grounds it afforded him great pleasure to show all possible respect to the memory of Mr. Faraday, whom he had known personally and whose interesting lectures he had so often attended in that place. Early last year the Presidents of the Royal Society, the Royal Institution, the Royal Geographical Society, the Royal Chemical Society, the Geological Society, the Royal Astronomical Society, the Linnean Society, and the British Association held a meeting, and agreed to ascertain the views of the Government in regard to the erection of a monument to Faraday. In the following June Mr. Disraeli stated that he considered the erection of a monument to Professor Faraday to be a proper object to which to devote public funds; but that as the estimates for the year had passed, any vote for that purpose must be deferred to the following year. In May last the present Chancellor of the Exchequer wrote that, while fully concurring in the propriety of erecting a monument to Faraday, he could not, as Chancellor of the Exchequer, consent to the appropriation of any money for the erection of a monument to any private citizen, however eminent—adding that "he did not make that rule, but found it." General Sabine stated that it is desirable that measures should be taken to provide a public memorial to Faraday." He was sure he spoke the hearty concurrence of every member of the Royal Society when he said that due honour ought to be done to the memory of this great man for the services he had rendered in the promotion of science. M. Dumas, who had come over from Paris on purpose to attend the meeting, seconded the motion in a very long speech, in which he highly eulogised the talents and learning of Mr. Faraday. The motion was carried unanimously. Sir Henry Holland then moved, and Sir R. Murchison seconded, a resolution, "That a committee be appointed to take the necessary measures for the provision of a public memorial."

This motion was also adopted. Professor Owen moved, "That a public subscription be entered into, the subscriptions not to exceed five guineas in each case, in order to raise the requisite funds." Professor Playfair seconded the motion, which was also carried. Sir Henry Holland moved a cordial vote of thanks to his Royal Highness for his conduct in the chair. Professor Tyndall, in seconding the resolution, remarked upon the readiness with which his Royal Highness had consented to take the chair, and referred to the "most beautiful and feeling letter" of confidence his Royal Highness wrote to Mrs. Faraday upon the death of her husband. The motion having been adopted with acclamation, the Prince said he thanked them from his heart for the kind way in which they had supported him on that occasion. They must all feel grateful to M. Dumas for the terms in which he had spoken of the late Professor, and for the honour he had done the Society in being present. In conclusion, he assured the meeting that if anything more could be done in the matter by him, or there was any assistance he could give them in reference to it, he should always be at their service.

THE WIMBLEDON MEETING.—A strong party of the Royal Engineer Train left Aldershot by march route for Wimbledon last week to prepare the camping-ground and rifle ranges for the ensuing volunteer gathering. The Admiralty have given permission for a certain number of men belonging to the various divisions of the Royal Marines to compete for the Army and Navy Challenge Cup presented by the National Rifle Association.

STATUE OF LORD PALMERSTON.—On Friday afternoon Mr. Layard, M.P., Mr. Cowper, M.P., Mr. Barry, Mr. Woolner, and others, made a formal inspection of a new statue to Lord Palmerston, which has been placed on the northern green plot of ground facing New Palace Yard. A large crowd assembled as soon as the statue was uncovered. It has not yet been decided whether the statue shall permanently occupy its present site.

TRADES UNION BILL.—A large meeting of trades unionists was held on Wednesday night in Exeter Hall. Mr. Samuel Morley presided, and was supported on the platform by Mr. T. Hughes, M.P., Mr. Mundella, M.P., Mr. Anderson, M.P., Mr. Dalglish, M.P., Mr. Brassey, M.P., Professor Beasley, Mr. Lloyd Jones, Mr. Holyoake, Mr. Edmond Beales, Sir John Blennerhasset, M.P., &c. The chairman, in opening the proceedings, said he was present in the interest of peace, and as an employer to claim for working men the rights he claimed for himself, and he was therefore prepared to give a hearty support to the Trades Union Bill, and thought there ought not to be any time lost in making the future of the working men clear and distinct. He was anxious in all honesty to co-operate with the working man, but he deprecated the right of any—say 500 men—who might agree upon a point or object ill-using 50 other working men who might not agree with them or think as they did. With respect to trades unions, there was not, in his opinion, a class of men more alive to the use of the power which they possessed; but by interfering with the freedom of trade they lessened the products of labour, and in lessening the products of labour they brought upon themselves great prejudice and injury. He quite believed there was a greater need now than ever of the employer and the employed coming into closer intercourse, and he thought that every possible effort should be made to bring about a good feeling and a proper understanding between them, and by that result do away with strikes. Working men were no doubt growing daily in importance in the country; they were becoming too influential to be neglected by employers, and he sincerely hoped that the day was not far distant when they would more freely exchange opinions, and thus add to what he believed was the increasing prosperity of the nation. Mr. Newton, of the Amalgamated Engineers, moved the following resolution in a speech, in which he strenuously upheld trades unions, and denied that trades unions were in the slightest degree responsible for the recent trade outrages that had disgraced certain parts of the country:—

"That combination laws, or laws designed to check the free association of workmen, and to place them under a special criminal legislation, are at once impolitic and unjust, and call for immediate and complete abolition; that the doctrine of the common law which places trades unions outside the pale of law is a relic of feudalism which requires emphatic reversal, and that all trades unions which submit themselves to the general civil and criminal law of the land are deserving of complete legal recognition and ample protection from the State."

Mr. Druitt seconded the motion. Mr. T. Hughes, M.P., in supporting it, said he believed the Bill to be just, or he would never have introduced it into the House; nor would Mr. Samuel Morley be in that chair if he, too, did not believe that it was a just Bill. It was high time that the Conspiracy Law was repealed, nor did he think it would be long before they would see it repealed. They had a right to ask that class legislation should be swept away, and swept away at once. And he promised that if the influence of private members could be brought to bear, he would this session press the Bill to a division. Mr. Mundella said that while there were clauses in the Bill to which he could not give his assent, still he saw no reason whatever why he should not vote for the second reading. His object was peace, and he wanted to arrive at peace through justice, and God forbid that he should now do anything to detract from the important movement he had set going. He contended that combination laws stood in the way of a proper understanding between master and man, and he should therefore give the Bill his hearty support. The resolution was carried with acclamation. A second resolution was carried, on the motion of Mr. George Potter, seconded by Mr. Howell, to the effect, that the

Bill of Messrs. Hughes and Mundella, the aim of which was to remove exceptional legislation, and to protect trades unions in the enjoyment of their property, deserved the hearty approval and earnest support of the meeting, which pledged itself to continue every method of constitutional agitation to obtain the passing of a similar measure, and empowered the trades' conference and delegates to wait upon the Home Secretary to solicit the support of the Government to this Bill. A third resolution, tendering the warmest thanks of the meeting to the introducers into Parliament of the Bill, and calling upon the friends of trades societies to accept the sincere gratitude of the trades of London, and of the country generally, for their disinterested and valuable services, was next moved, seconded, and carried unanimously.

FINANCIAL REFORM CONFERENCE.—On Thursday a conference, convened by the Financial Reform Union, was held at the Westminster Palace Hotel, for the purpose of devising a method by which the questions of reduction of taxation and expenditure may be made to assume a practical shape, so as to be submitted in definite proposals to the House of Commons next session. Mr. John Holms, M.P., took the chair, and there were present, among others, Mr. E. Chadwick, C.B., Sir John Bowring, Mr. G. Anderson, M.P., Mr. Delahunty, M.P., Colonel Torrens, M.P., Mr. Brogden, M.P., Mr. Illingworth, M.P., and gentlemen from Birmingham and other provincial towns. The object of the conference was briefly explained by the chairman. Mr. E. Chadwick followed with some observations bearing upon the question of a reduction in the army. Sir John Bowring remarked on the moral effect which a repeal of the duty on tea would have on the population, and added that tea might then be sold for 8*d.* per lb. Mr. Partridge, of Birmingham, proposed the following resolution—"That, in the opinion of this conference, the repeal of the duties on tea, coffee, and sugar, as advocated by the President of the Board of Trade, forms a most desirable basis of action on the part of financial reformers." After some discussion between Mr. E. Chadwick, Colonel Torrens, M.P., Mr. Anderson, M.P., Mr. Brogden, M.P., and others, the resolution was carried, together with another moved by Mr. E. Chadwick—namely, "That it is expedient to proceed with questions of large reductions of expenditure concurrently with any questions of reduction of taxation." The proceedings were brought to a close by the adoption of a resolution, at the instance of Mr. Illingworth, M.P., authorising the raising of a fund of 1000*l.* for the purpose of continuing the supply of pamphlets, and for effective agitation of the question throughout the country.

OPENING OF SOUTHWARK PARK.—On Saturday the latest addition to the London parks was opened in the borough of Southwark. It is formed on about 63 acres of land, previously used as market gardens, situated between the Spa Road railway station between Paradise Row, Rotherhithe, the Deptford Lower Road, and Rotherhithe New Road, somewhat over a mile from London Bridge, and within easy walking distance from the crowded parts of the parishes of Southwark, Horselydown, and Bermondsey. The total cost up to March of the present year has been 95,162*l.* 11*s.* 3*d.* The cost of the freehold land was about 91*l.* per acre for 60 acres, and there are 16 acres reserved for building purposes, so as to recoup the ratepayers of the metropolis in respect of the expenditure referred to. The park has been constructed by the Metropolitan Board of Works.

THE DUKE OF NEWCASTLE.—The case of the Duke of Newcastle and his creditors is about to assume another phase. A petition was presented on Thursday to the Court of Bankruptcy by Mr. Morris, the bill-discounter, for an adjudication in bankruptcy, and notices were served on the Sheriff of Middlesex and others. Mr. Padwick was the only witness examined, and further proceedings were adjourned to Monday. The sale of the ducal property commenced at Carlton House Terrace on Monday last, and the application of the proceeds will raise the important question, whether the execution creditors will benefit from the sales, or whether the proceeds, after payment of the expenses, will be available for all the creditors. Until the application to the Court of Bankruptcy is decided matters will remain in *status quo*. In the event of an adjudication being obtained, a material alteration will take place with regard to the several issues directed to be tried in the Court of Exchequer.

THE FRENCH ATLANTIC CABLE.—The Great Eastern arrived at Brest on Sunday. A special train, conveying about 250 guests, comprising various Government officials and members of the Paris press, arrived in the morning from Paris, and proceeded at noon in three steamers to the Great Eastern. At 8 o'clock a banquet took place on board the vessel, when toasts were given for the Emperor, Queen Victoria, and the President of the United States. Viscount de Vougy, Director-General of French Telegraphs, proposed success to the undertaking, and spoke in eulogistic terms of the French Cable Company. Baron Erlanger returned thanks in the name of the latter. M. Kerjean, the deputy for Brest to the Legislative body, proposed the toast of the union of France, Great Britain, and America. General enthusiasm prevailed, and the weather was very fine throughout. At night the space of the cable was safely effected. On Monday morning the Great Eastern, accompanied by the Chiltern and the Scandaria, left at break of day, and proceeded with the submergence of the cable. The latest accounts state that the signals through the cable are perfect, that the electric tests are satisfactory, and that on Thursday nearly 800 miles of cable had been submerged.

ELECTION OF SHERIFFS.—On Thursday, being Midsummer Day, the Livery of London assembled in Guildhall, to elect Sheriffs for the ensuing year.

Alderman Causton, the next in rotation on the roll of aldermen, and Mr. James Vallentin, distiller, were unanimously elected.

LONDON IMPROVEMENTS.—The Merchant Taylors' Company have paid 90,000*l.* out of their corporate funds to the Governors of the Charter House, for 3½ acres of the land lately occupied by the Charter House schools, and intend to remove their school from Suffolk Lane to that locality. They have let a portion for building purposes, but they retain 3½ acres for the school and its playground. The Metropolitan Board of Works have purchased a slip of the ground in Wilderness Row for the purpose of widening the thoroughfare, intending at some future time to continue a carriage road through to St. John Street.

GREENWICH HOSPITAL.—The Act passed in 1865 reduced the number of in-pensioners at Greenwich Hospital at one bound from 1332 to 395. The improved comfort of the men from this change is shown by the fact that the number applying to be permanently re-admitted has been less than one in 32, and the death-rate, which when the average number of in-pensioners was 2370 amounted to 12.3 per cent., has been only 6.4 per cent. among the men who left. The great reduction in the expenditure at the Hospital has enabled the Admiralty to give a pension of 9*d.* a day to every seaman and marine over the age of 70 years, who has been 10 years a naval pensioner; and 5*d.* a day to those over 55, who had been five years naval pensioners. It is now intended to take a further step in so administering the revenues of the Hospital as to make the money applicable to the advantage of seamen incapable of service go as far as possible in the direction most agreeable to the navy itself. The number of in-pensioners will be further reduced by offering them such a grant as will, with their naval and Greenwich pensions, if any, make up a maximum annual sum of 36*l.* 10*s.* each case being dealt with separately on its own merits. Those who then remain will be so few that they can comfortably be lodged within the infirmary, and admission will thenceforth be open for any helpless and infirm naval pensioner who has been granted a life pension, or any helpless and infirm seaman or marine who has served with good character ten years, or any man discharged from the service on account of severe wounds or hurts received in action or in the execution of his duty. Every such applicant, if his claim is allowed, will be offered the alternative of entering the infirmary or of residing with his friends, and receiving such a sum as will make up his aggregate pension to an amount not exceeding 1*l.* 6*d.* a-day, or 27*l.* 10*s.* a-year. The public will have the assurance that no man who has long served his country at sea, or who has been invalided from the service, need become an inmate of a workhouse. In connection with this subject a memorandum has been issued from the Admiralty, stating as the result of the recent reforms, that in 1859 the establishment for 1600 in-pensioners cost 99,577*l.*, and nothing whatever was set aside for out-pensions. In 1868, in consequence of the changes effected by the Bill of 1865, the establishment of 400 in-pensioners cost about 40,000*l.*, and 62,977*l.* was given in out-pensions. Under the new system the establishment for 200 in-pensioners will demand about 15,000*l.*, and nearly 90,000*l.* a-year will be available for out-pensions.

THE THAMES EMBANKMENT.—The report of the select committee appointed to inquire into the roadway and viaduct proposed to be made on the Embankment from Hungerford Bridge to Wellington Street, has been issued. The committee are of opinion that the Metropolitan Board of Works ought to be relieved from the formation of the intended roadway, and that so much of the Act as applies to the formation of this roadway should be repealed. They consider the suggestion to erect a Natural History Museum in that locality, and to combine with it terrace walks and open ornamental ground, is deserving of the favourable consideration of Parliament, as best meeting the requirements of all parts of the metropolis, both north and south; and that in the event of any such building being erected due consideration should be shown for all private rights. They do not express any opinion on the probable cost of applying the sites in question to the erection of such a building. Mr. Walker, superintendent of the metropolitan police, has stated in evidence that a carriage approach from Parliament Street, by Derby Street, to the embankment roadway, is necessary to relieve the traffic at Bridge Street, going from the Embankment roadway of the Houses of Parliament and the west of London.

THE NEW LAW COURTS.—A deputation from some of the principal legal firms of the City and West-end of London, comprising members of the firms of Messrs. Freshfield & Co., Messrs. Dawes & Son, Messrs. Cotterill & Son, Messrs. Roy & Cartwright, Messrs. Tatham & Co., Messrs. Vallance & Vallance, Messrs. Baxter, Rose & Norton, Messrs. Burchells, Messrs. Ellis & Ellis, Messrs. Bircham, Dalrymple, Drake & Co., Mr. S. B. Robertson, and others, had an interview with the Chancellor of the Exchequer and the First Commissioner of Works on Monday, to express their views in favour of the Thames Embankment site as the site for the erection of the new law courts. Lord Bury, in introducing the deputation, said that the names of the gentlemen comprising it, who were of all shades of political opinion, would show that the present was no party movement, or representation of party or personal interest. Mr. Robert Baxter, Mr. Vallance, Mr. Freshfield, Mr. Ellis, Mr. S. B. Robertson, Mr. Dudley Baxter, and others, strongly advocated the Embankment site in preference to that of Carey Street, and stated that the deputation which recently waited on the Chancellor of the Exchequer in favour of Carey Street, was convened by the Council of the Law Institution without the sanction of the members of that society, and did not by any means represent the general opinion of the legal profession, though they did represent certain

parties in the Lincoln's Inn district, who had strong personal interests in upholding the Carey Street site. Mr. Layard, in reply, said that the interest of the public at large was paramount to that of the practitioners at Lincoln's Inn, and the Government had come to the conclusion that the Thames Embankment site was incomparably the best. It was removed from a noisy thoroughfare, and would have the very best supply of light and air that London could afford. He thought that in reference to private interests some amount of self-sacrifice might reasonably be called for, for the embellishment of London, and for erecting the courts of law on the finest site in London by reason of an opportunity which may never occur again, and ought not now to be sacrificed. The Chancellor of the Exchequer said it was a simple fact that the Government could not build on the Carey Street site without incurring an enormous expense in addition to what had been contemplated, and he believed that the adoption of that site would simply be the beginning of an enormous, continuing, and unknown expense, which would be a grievous fraud upon the public. It was also to be borne in mind that the mere inconvenience of carrying building materials along the Strand to the Carey Street site for the next 10 years or more would amount to an evil which, though it might be called temporary, was really of the first magnitude, and one for which he would not agree to be accountable. Taking into account all these considerations, he felt sure that all impartial persons would approve the Government plan, notwithstanding the great weight of influence which had been brought against them.

THE CAREY STREET SITE.—It is said that the London and North-Western Railway Company have made overtures to the Chancellor of the Exchequer for the purchase of the 7 acres forming the Carey Street site as a great central terminus, to communicate with the Metropolitan District system. The negotiations, however, have been suspended until the Bill for the acquisition of the new ground in Howard Street has been sanctioned by Parliament.

THE TOWER SUBWAY has now passed the nearest approach to the bed of the river, the top of the tunnel being 23 feet below the bed, and the engineer reports that at the present rate of progress the tunnel will reach high-water mark on the Surrey side in 10 weeks.

SOUTH KENSINGTON MUSEUM.—The Rev. Alexander Dyce has bequeathed to the South Kensington Museum his important dramatic library, with its unique editions of Shakespeare, and all his pictures, miniatures, antique rings, and other works of art, upon the condition that a suitable room is built to receive them.

NEW INDIAN MUSEUM AND LIBRARY.—The Secretary of State for India has resolved to appropriate the ground between the India Office and Charles Street to the building of a new museum, library, and chart office under one roof, from plans by Sir Digby Wyatt.

THE CHANNEL TUNNEL.—On Thursday a committee of the promoters of the project for a submarine tunnel between Dover and a point near Cape Blanc Nez, on the French coast, had an interview at the Board of Trade with the Right Hon. John Bright, President of the Board. Lord Richard Grosvenor, M.P., chairman of the committee of promoters, introduced the deputation, which included Admiral Elliott, Messrs. William Hawes, Stephenson Clarke, John Hawkshaw, C.E., James Brunlees, C.E., William Lowe, C.E., Thomé de Gamond, C.E., and William Bellingham, secretary. In introducing the deputation, Lord R. Grosvenor explained the steps that had been taken to promote the object. The subject had been brought under the consideration of the Emperor Napoleon and the Imperial Government of France, by whom a commission of scientific men had been appointed to examine and report. The commission had reported in favour of the scheme and its practicability. The promoters ventured to think that, in an important international work of this character, involving very large expenditure, it would not be considered unreasonable in them to look to the two Governments of England and France for a certain degree of material encouragement and support. They accordingly solicited the two Governments to guarantee each 2½ per cent. upon two millions sterling, to be applied to the driving of two parallel mining headings or drift-ways from shore to shore. The French Government were waiting to see what action the English Government would take in the matter, and the object of the deputation in waiting on Mr. Bright was to ask that Government would take the subject into consideration. Mr. Bright asked a number of questions, chiefly affecting engineering points and the practicability of the scheme. The questions were answered by the engineers and others of the deputation to the apparent satisfaction of the right hon. gentleman, who engaged to take an early opportunity of bringing the matter under the consideration of the Cabinet.

THE BERMUDA DOCK.—Preparations for the departure of the Bermuda dock from Sheerness were commenced on Tuesday by pumping out 1,000 tons of water which had been admitted into the lower chamber for working purposes, getting the chain cables ready for shipping, and lashing the powerful steam-tugs detailed to tow the dock from Stangate Creek down Sheerness Harbour to the Nore. The cables of the dock were shipped at 4.20 on Wednesday morning, and the dock thus made the first movement on her passage out. The progress was of necessity slow, but by 5.30 the dock and the convoy had rounded Garrison-point Fort, a distance of nearly four miles from the creek where she had been moored. Although the hour was so early, a great concourse of spectators had assembled. On arriving at the Nore the Azimourt and Northumberland, ironclads, commenced the task of towing the dock to Madeira, with the Terrible astern for steering. The dock was to all appearances towing very steady, and had averaged a rate of five or six knots from the

Nore, and was going about the latter rate on Tuesday morning when approaching the Nab Light. The Medusa and Buzzard were on either bow towing vessels as "look-outs."

CHESTERFIELD HOUSE, MAYFAIR.—The residence of the famous Lord Chesterfield, has been disposed of at a very large price, and will shortly be available for building purposes, being one of the most valuable sites now left uncovered in Mayfair. It is now in the occupation of the Duke of Abercorn.

THE WATER SUPPLY.—The report of the Commission on the water supply of the metropolis has been laid on the table. Its general principles condemn the extraordinary sources of supply which have been recommended, and to recommend a revision and control. The water now supplied is favourably spoken of.

PROSECUTION FOR HERESY.—The preliminary proceedings against the Rev. C. Voysey for heresy, published in a book called "The Sting and Scum," which he is the author, took place on Thursday at London House, before a commission appointed for the purpose. The case for the prosecution having been stated, and the passages complained of read, the court decided that there was *prima facie* ground for the proceedings, which will now be taken in the Court of Lincoln.

THE FATAL FIRE AT PENTONVILLE.—At the weekly meeting of the Metropolitan Board of Works on Friday Mr. Thompson called attention to the proceedings at the coroner's inquest on the persons who died in the fire on the 5th inst. on Pentonville Hill, and moved that the fire brigade committee be instructed to make better provision for the preservation of life and property from fire in Clerkenwell. The motion was agreed to.

THE GUNPOWDER EXPLOSION AT HOUNSLOW.—The inquest was opened on Friday before Dr. Lush, when several witnesses were examined. It was proved that the first explosion occurred in a glazing-house, but that nearly, if not all, the mischief was produced by the subsequent explosion of the bombproof-house which ignited by the explosion of the other house, and it is the opinion of the coroner that this could not have occurred if the door had been closed at the time of the explosion of the glazing-house. Mr. Curtis said that every precaution was taken, but workmen in the midst of danger were reckless, that on one occasion he found a man at work with a lighted pipe in his pocket. The inquest was adjourned for a week.

THE PUBLIC HEALTH.—The Weekly Return of the Registrar-General states that in the week that ended on Saturday, June 19, 4,336 births and 2,830 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 23 per 1000 persons living, being 20 per 1000 in London, 40 in Edinburgh, 20 in Dublin, 18 in Bristol, 18 in Birmingham, 25 in Liverpool, 25 in Manchester, 24 in Salford, 23 in Smeetheld, 21 in Bradford, 21 in Leeds, 23 in Hull, 25 in Newcastle-upon-Tyne, and 25 in Glasgow. The rate in Vienna was 52 per 1000 during the week ending the 12th inst., and in Berlin 45 per 1000 during the seven days ending the 17th inst. In London the births of 949 boys and 855 girls, and 1,784 children, were registered in the week. In the corresponding weeks of 10 years, 1859-68, the average number, corrected for increase of population, was 2125. The deaths registered in London during the week were 1236. It was the 24th week of the year as the average number for that week, corrected for increase of population, was 1272. The present rate is therefore 36 below the estimated amount.

Provincial.

ALDERSHOT.—Three batteries of Royal Horse Artillery, the 5th Dragoon Guards, 7th Dragoon Guards, 6th Inniskillings, and 10th Hussars, formed up under command of General White, near the Queen's Pavilion, for field movements, on Monday evening, and were told off in two brigades, the first, or heavy brigade, consisting of the 5th and 7th Dragoon Guards, and the 2d, or light brigade, of the 6th Inniskillings and 10th Hussars. The former were commanded by the Hon. Colonel Calthorpe, and the latter by Colonel Baker. They first attacked to the westward of the waterworks. General White worked their way to the waterworks. General White then changed position to the right, and attacked the long valley. In this movement the light brigade formed line and advanced, supported by the heavy brigade. A dashing charge was made by the advanced column, and when near the north end of the valley Colonel Baker ordered his brigade to retire by column of troops, the left. As this movement was being executed Colonel Calthorpe's brigade was coming on at a gallop, and before the rear squadron of Inniskillings was clear the front of the left squadron of the 7th Dragoon Guards fell upon the flank of the rear squadron, and a fearful crash was the result, and a large number of men and horses were injured. A private of the 6th Inniskillings had his skull and ribs so severely fractured that he died on Tuesday. Another private of the same regiment had his right shoulder dislocated, and many others received contusions and sabre cuts. A horse belonging to the regiment, having his legs fractured, was shot in the field. Several other horses were slightly injured. At the inquest on Thursday the jury returned a verdict of Accidental Death, caused by the want of foresight and forethought on the part of Captain George Baker, or two of the jury objected to the latter part of the sentence, and the court was cleared, when it was affirmed by a majority of 12 to 2. A court of inquiry was held on the same day under the presidency of Major Sir A. Horsford, but the result will not be known until it has been submitted to the Horse Guards.

prices. As all the old Potatoes will be finished soon, this will be our last report for the season. This day's quotations:—York Regents, per ton, 50s. to 55s.; do. Flukes, 50s. to 55s.; Lincolnshire Regents, 50s. to 70s.; Dunbar and East Lothian do., 60s. to 90s.; Perth, Forfar, and Fife do., —s. to —s.; do. Rocks, 50s. to 70s.; Reds, 50s. to 60s.; French and Belgian Whites, 30s. to 50s.

LEADENHALL POULTRY, &c.

An increasing supply, with demand hardly equal to that of last week.

Table with columns for s.d. and s.d. listing prices for Geese, Goslings, Turkeys, Ducks, Ducklings, Surrey Fowls, Do. chickens, Barn-door Fowls, Leverets, Pigeons, Tame Rabbits, Wild Rabbits, Wild Ducks, Pheasants, Hares, Dotterel, Quails, English Eggs, and Foreign do.

ENGLISH WOOL.

There has been a fair demand, and a general belief prevails that we are likely to have a fair amount of business at present rates, with some prospect of improvement should trade generally become more active.

Table with columns for s.d. and s.d. listing current prices for fleeces (Southdown hoggets, Half-bred ditto, Kent Fleeces, Southdown ewes and wethers, Leicester ditto) and sorts (Clothing, Combing).

METROPOLITAN MEAT MARKET.—June 26.

Best Fresh Butter .. 14s. per dozen lb. Second do. do. .. 12s. Small Pork, 5s. 6d. to 5s. 4d.; Large Pork, 4s. 4d. to 4s. 8d. per 8 lb.

METROPOLITAN CATTLE MARKET.

MONDAY, June 21.

We have rather a shorter supply of Beasts, and choicest qualities maintain late quotations; otherwise trade is dull, and a clearance cannot be effected. There are a few more Sheep, and it is with difficulty our quotations are realised. Trade continues very bad for Lambs. Calves are selling about the same as on Thursday. Our foreign supply consists of 2593 Beasts, 11,030 Sheep, 371 Calves, and 5 Pigs; from Scotland there are 40 Beasts; from Ireland, 50; from Norfolk and Suffolk, 250; and 1100 from the Midland and Home Counties.

Table with columns for s.d. and s.d. listing prices for Best Scots, Herefords, &c., Best Shortborns, 2d quality Beasts, Best Downs and Half-breds, Do Shorn, and Beasts, 4010; Sheep and Lambs, 29,520; Calves, 395; Pigs, 85.

THURSDAY, June 24.

The supply of Beasts is again short, especially of choice English; on the average prices are lower, and it is exceedingly difficult to effect a clearance. The number of Sheep is larger, and trade is very dull; prices are lower, and several lots remain unsold. The supply of Lambs considerably exceeds the demand. Calves are also lower. Our foreign supply consists of 329 Beasts, 5220 Sheep, 584 Calves, and 5 Pigs.

Table with columns for s.d. and s.d. listing prices for Best Scots, Herefords, &c., Best Shortborns, 2d quality Beasts, Best Downs and Half-breds, Do Shorn, and Beasts, 770; Sheep and Lambs, 15,300; Calves, 754; Pigs, 20.

MARK LANE.—MONDAY, June 21.

There was a poor supply of English Wheat this morning's market, which was sold at an advance of 3s to 4s. per qr. on the prices of this day at night. The attendance was good, and a fair amount of business transacted in foreign, at an improvement of 2s. per qr. on that day's rates. Barley was 6d. to 1s., Beans and Peas 1s., and Oats 6d. per qr. dearer. There was no alteration in the nominal top price of Flour, but second qualities, country, and American barrel Flour advanced 1s. per sack and barrel.

Table with columns for s. s. and s. s. listing prices for WHEAT, BARLEY, OATS, RYE, RYE-MEAL, BEANS, PEAS, MAIZE, and Flour.

FRIDAY, June 25.

The weather we have experienced throughout this month having considerably retarded the growth of the Wheat plant, which is only now coming into ear, puts the time for harvesting back to the middle of August, and we must therefore look to old stocks and near supplies to provide for about five weeks' more consumption than was at one time thought necessary. This circumstance, and the fact that a late Wheat crop is always exposed to greater risks in housing, &c., has given a strong upward tendency to prices, buyers for speculation and immediate consumption having come forward largely, and the value of Wheat has quickly advanced from 2s. to 4s. per qr., but during the last day or two the demand has been less active. The value of spring corn of all sorts has also improved, and we are enabled to write Oats 6d. per qr., and Beans, Peas, and Barley about 1s. per qr. dearer. Flour has followed the movement of Wheat, but the advance has been more limited, say 1s. per barrel, and 1s. to 2s. per sack. The arrivals of grain and seed-laden vessels off the coast

since Friday last consisted of 97 cargoes, of which, with those left over from last week, there remained for sale last night 51 cargoes. With some slight fluctuations the tendency of the trade has been for higher prices. Wheat improved about 1s. 6d. to 2s. per qr. Maize was in strong demand, in spite of large supplies off the coast, and commanded rather more money at the close of the week, whilst Barley was firm at late rates. Of Rye there were no offers of cargoes off the coast. Wheat on passage and for forward shipment met with attention at the commencement of this week, and prices improved about 1s. per qr.; within the last day or two, however, a quieter feeling prevailed. All other articles remained steady. Paris, June 24.—Under the influence of continued unfavourable weather both Wheat and Flour followed an upward tendency. The eight marks are quoted at equal to 38s. 3d. per 280 lb. The stock at the Halle is estimated at 6640 cwt. The arrivals of English and foreign Wheat and foreign Oats this week have been moderate, but of Barley none. There was a poor attendance at this morning's market, and but little disposition shown to purchase Wheat, either English or foreign; factors, however, were not disposed to give way in price, consequently very little business was transacted. Spring corn was unchanged in value.

ARRIVALS.

Table with columns for Wheat, Barley, Oats, and Flour, listing arrivals in English, Irish, and Foreign.

AVERAGES.

Table with columns for Wheat, Barley, and Oats, listing averages for May 15, 22, 29, June 5, 12, 19, and an overall average.

LIVERPOOL, June 23.—We had a fair attendance at our market to-day, and for Wheat there was an active demand, at an advance of 2d. per cental on Tuesday's rates. Flour met a better inquiry, at previous full rates. Indian Corn was in moderate request, at an advance of 3d. to 6d. per qr on last Friday's rates. Oats and Oatmeal quiet and unchanged. Egyptian Beans in improved request, at an advance of 6d. to 1s. per qr. Other articles unchanged.

SEED MARKET.

We have this week to report an increase of activity in the agricultural seed trade. The recent very unfavourable weather, and the exceedingly bad accounts which come to hand of the growing crops, have caused a fair amount of speculation on our market; there has consequently been during the present week a brisk inquiry for Red Clover, and especially for Trefoil seed; all descriptions of new red are held with great firmness, while for Trefoil seed we note an advance within the last five or six days of 2s. to 3s. per cwt. Sowing Mustard seed continues in short supply, and realises extreme rates. Of Essex dwarf Rape seed there is very little offering; we quote it 2s. per qr. dearer. Bird seeds move off steadily at recent prices. Feeding Linseed is in good demand, and is without change in value.

JOHN SHAW & SONS, 16, WATER LANE.

To Landscape Architects' Assistants.

MR. JOSEPH NEWTON, LANDSCAPE ARCHITECT and ESTATE IMPROVER, 74, Oxford Terrace, Hyde Park, is in WANT of a Young Man as an ASSISTANT, to go to New York. One capable of making Working Plans from rough sketches and Contour Plans to Working Scale, and to fill in the Planting of Trees and Shrubs in a way that the same can be carried out by a Gardener used to ground work either in Europe or America; he must also understand Horticulture. Wages to begin with, 1000 dollars per annum. Those desiring such a situation are invited to send Specimen Plans, with reference, to Mr. NEWTON, which will have his earliest attention as soon as he returns to London.

WANTED, TWO or THREE experienced MEN, in Budding, Grafting, Layering, and general Outdoor Work.—Address, stating age, wages, and reference as to ability, to FREDK. PERKINS, 2, Gold Street, Northampton.

WANTED, a GARDENER and his WIFE, the former to attend to Two Cows and a Pig, the latter Dairy and Laundry. The family is small. Wages for the two, 30s. a week, with a coal four-roomed Lodge.—Apply in person or by letter to DENHAM SMELLIE, Esq., Kenton Lodge, near The Hyde, Middlesex, N.W.

WANTED IMMEDIATELY, a thoroughly steady respectable COUPLE, without children.—The Man as Second Gardener, the Wife to undertake Laundry Work.—Address J. H., Mr. Dowle, Bootmaker, Strand (near Charing Cross).

WANT PLACES.—Letters to be Post Paid.

EXPERIENCED GARDENERS (or as GARDENER and BAILIFF), of various qualifications, recommended to Gentlemen.—Further particulars given on application to Messrs. E. G. HENDERSON and SON, Wellington Nursery, St. John's Wood, London, N.W.

MR. WM. PAUL begs to announce that he has made arrangements by which he will be enabled in future to furnish Gentlemen with the NAMES, ADDRESSES, &c., of GARDENERS, and GARDENERS and BAILIFFS, of various qualifications, who are open to Engagements. The fullest particulars as to services required and wages given should be forwarded with application.—PAUL'S Nurseries, Waltham Cross, London, N.

To Gardeners and Bailiffs (Head, Foremen, or Under). JAMES CARTER and CO. having many applications for the above request that those WANTING SITUATIONS will send NAME, ADDRESS, and COPIES of TESTIMONIALS for ENTRY in their FREE REGISTER. Only those who can send unquestionable references need apply. Any Lady or Gentleman requiring GARDENERS or BAILIFFS may rely upon J. CARTER & Co. adopting the most stringent regulations in reference to testimonials as to ability, honesty, &c. JAMES CARTER and CO., 237 & 238, High Holborn, London, W.C.

Gardeners and Under Gardeners. WM. CUTBUSH and SON beg to state that they have at all times on their books MEN of various qualifications, whose characters will bear the strictest inquiry. Any Gentleman making application would save time by clearly stating the duties to be undertaken, wages offered, &c., so that suitable Men may be selected.—Highgate Nurseries, London, N.

GARDENER (HEAD).—Married; understands Pines, Melons, Orchids, and the profession in all its branches.—W. W., Mrs. Perry's, Half Way Street, Eltham, Kent.

GARDENER (HEAD).—Middle-aged, married, two children; good general practice in Horticulture. Every information may be obtained by applying to Mr. D. THOMSON, The Gardens, Drumlanrig Castle, Thornhill, Dumfriesshire.

GARDENER (HEAD); married.—Mr. W. HILL will be glad to recommend a good practical Man to any Nobleman or Gentleman requiring a competent Gardener.—W. HILL, Kesle Hall Gardens, Newcastle, Staffordshire.

GARDENER (HEAD).—No incumbrance; a cultivator of Stoves and Greenhouses Plants, Grapes, and all kinds of Fruit and Vegetables, and Kitchen Gardener. A good character.—A. J., Weybridge Station, Weybridge, Surrey.

GARDENER (HEAD); age 25.—THOMAS Gardener to E. Greaves, Esq., M.P., can with pleasure recommend his Young Man to any Lady requiring the services of a good Gardener.—E. S., Avonside, near Warwick.

To Noblemen and Gentlemen. GARDENER (HEAD), age 35, married; Marquis of Downshire, is at liberty to engage in the services of a practical Working Man in the Growth of all kinds of Fruits, Flowers, and Vegetables.—18, Canterbury Terrace, Malda Vale, Paddington, W.

GARDENER (HEAD).—Age 40, married; all branches of Gardening; capital Grower of Stoves and Plants, Grapes, Melons, Cucumbers, Fera, and excellent Kitchen and Flower Gardener, Laying-out Grounds and the Management of Stock. Unexceptionable character; late employer for honesty, sobriety, and ability.—M. C. Terrace, Warrington.

GARDENER (HEAD), or good SURVEYOR. Age 27, single; understands Vines, Flowers, &c. Garden. Four years' good personal character.—R. Park, Beckenham, Kent.

GARDENER (HEAD), or GARDENER. Age 25, single; can take charge of Dairy or Poultry. W. Y., Mr. W. Rudd, Church Hill, Linstead, Kent.

To Noblemen and Gentlemen. GARDENER (HEAD), or GARDENER. The Advertiser, in the prime of life, begs to offer his trustyworthy servant. Has had long and extensive practice in Scotland and in England. Satisfactory references as to character and ability, &c. A personal interview if required.—H. A. House, Newport Road, Middlesborough, North Yorkshire.

GARDENER (HEAD), where about three years. Age 25, single; thoroughly energetic. Well up in all branches of Gardening, and is recommended by four scientific Gentlemen.—W. BAILEY, The Royal Nurseries, Slough, Bucks.

GARDENER.—Age 35, no incumbrance, a young working Man, who has had experience both in England and abroad. Can be highly recommended. Leaving present consequence of a change of ownership.—P. O. J. Brown, M.P., The Hoe, Sydenham Hill, S.E.

GARDENER; married, one child, five years of age. A. STEVENS, Head Gardener to the Right Hon. Ormskirk, wishes to engage in the above capacity; is expert in Early and Late Forcing in all its branches; to manage a Farm, if required.—Address, 3, Rampton St. John's Wood, London, N.W.

GARDENER (now at liberty, and happy to accept an engagement).—In the prime of life, married; has extensive experience in the production of Pines, Grapes, Melons, other Fruits, also Vegetable and Flower Gardening, Laying-out Altering Grounds, &c. Well known to some of the best of the day. Character every way satisfactory.—C. C. M. Weald Hall, Brentwood, Essex.

GARDENER (SINGLE-HANDED, or FOREMAN). Age 22; has a thorough practical knowledge of 50 years' good character.—J. W., 2, New Street, Woking.

GARDENER (SECOND).—Age 22; highly intelligent. First-rate teacher. THOMAS ARNOLD, The Gardens of the Marquis of Easthamstead Park, Wokingham, Berks.

GARDENER (UNDER, or SINGLE-HANDED). Active Young Man, who has done the country.—W. Library, 283, King's Road, Chelsea, S.W.

GARDENER (UNDER).—A respectable Young Man has a good knowledge of Early and Late Forcing, &c. references.—Y. Z., Perry Barr Post Office, near Birmingham.

GARDENER (UNDER), in a Nobleman's or Gentleman's Establishment, to work in the House under a Nobleman.—Age 21. Salary not so much an object as improvement of year's good character.—G. M., Mr. Wells, Clay Hill, Bury.

FOREMAN, PROPAGATOR and GROWER (WOODEN).—Good Grafter. Satisfactory references as to character and ability.—A. B., W. E. Dixon, Norwood Nurseries, Yorkshire.

To Nurserymen. FOREMAN, or FOREMAN and PROPAGATOR. Has a thorough knowledge of the Propagation and Stove and Greenhouse Plants, Ferns, Orchids, &c. and the routine of Nursery-work, and a most successful grower of all kinds of plants; good hand at Bouquets; can take and fix up Apparatus on the most improved principle, if required. Reference from previous employers both in Kent and London.—A. B., Messrs Witty & Son, Cottingham Nurseries, U.

To Nurserymen. PROPAGATOR and GROWER.—Age 38, many years' experience in Market Nurseries. Thoroughly understood Work.—W. SEVERN, 2, John's Cottages, Westfields, Bury.

PLANT GROWER (HARD-WOODEN), or GROWER and SALESMAN.—No objection to going to T. S., Royal Vineyard Nursery, Hammersmith, W.

FORESTER.—A Man of first-class experience and highest recommendations (having left his last account of a Forester's services being disposed with an anxious for another engagement. Writes well, and is a most accurate accountant.—For particulars, apply to Messrs. JAMES and SONS, "Newton" Nurseries, Chester.

To Noblemen and Gentlemen. ESTATE MANAGER, COLLECTOR, &c.—Advertiser, aged 30, who has just resigned an appointment as Accountant and Chief Clerk in a large Public Institution, upwards of 6000 men are employed, is desirous of obtaining an appointment on an Estate as Manager, Collector, or in any position where integrity and perseverance are required. First class references will be given.—W. L. B., 7, Park Road, Belvedere, near Deptford.

RESIDENT AGENT, or LAND SURVEYOR. Gentleman who for the last 16 years has had the management of a large Estate in one of the western counties, and is strongly recommended.—F. J. A., Messrs. T. & S. men to the R. A. S. of England, Half-Moon Street, London.

STEWARD, or BAILIFF.—Age 40, married; respectable; has a thorough knowledge of all branches of S. I. and Machinery, having had great experience of 20 years. Reference to late as well as present employers. Office, Reigate.

BAILIFF, or COWMAN.—Age 40, married; good character.—W. B., Mr. Gamson, Tobaccoist, Chappel, Norwood, Surrey, S.

SHEPHERD, or HIND.—Write as good Dairy Poultry Woman. Four years' excellent character.—Ranscombe Farm, Chudleigh, Devonshire.

SHOPMAN.—THOMAS KENNEDY & Co., Seed and Nurserymen, have in their employment a Young Man who is anxious to get into a good situation. They can highly recommend him.

To the Seed Trade. SHOPMAN (ASSISTANT).—Age 23; six years' experience. Last with Messrs. Veitch & Sons, of Chelsea. Post Office, Stanley Bridge, Fulham, S.W.

GRAY'S OVAL TUBULAR BOILER.

INTERNATIONAL EXHIBITION, CLASS IX., No. 2119.

MR. GRAY begs to call the attention of the Nobility, Gentry, Nurserymen, Gardeners, &c., to his

NEW OVAL TUBULAR BOILER,

as recommended by practical judges to be a great improvement on every form of Tubular Boiler yet introduced, and itself superior to all other Boilers for quickness of action and economy of Fuel, doing its work with less than the amount required by any other.

Extract from Report in GARDENERS' CHRONICLE of International Exhibition, May 24, 1862, page 476.

"The oval form of Boiler is usually made on a circular plan, rather than a square, it seems feasible that the Boilers on the oval plan should bring the tubes more completely within range of the burning fuel, and this being so, the change, though a slight one, is no doubt an improvement."

They are made of all sizes, which, with prices, may be had on application.

JAMES GRAY, HORTICULTURAL WORKS,
DANVERS STREET, PAULTON'S SQUARE, KING'S ROAD, CHELSEA, S.W.

CONSERVATORIES, ORCHARD HOUSES, &c., PLAIN OR ORNAMENTAL, PORTABLE OR PERMANENT.

Home News.

THE COURT.—On Friday afternoon the Duke of Cambridge, as President of Christ's Hospital, went to Windsor with the boys of the Royal Foundation of King Charles II., who exhibited their drawings and charts to Her Majesty. The Queen, accompanied by Princess Christian and Princess Beatrice, afterwards visited the Camp in the Great Park. On Saturday morning, the Queen, accompanied by Princess Christian and Princess Louisa, was present at the formation of a pontoon bridge by the Royal Engineers, between Datchet and the Home Park. In the afternoon, the Prince and Princess of Wales, the Viceroy of Egypt, Hassan Pacha, and Tousson Pacha, arrived at the Castle from London, and accompanied the Queen and Royal family to the Great Park, where Her Majesty reviewed the household troops. After the review, the Prince and Princess of Wales, and the Viceroy of Egypt, Hassan Pacha, Tousson Pacha, and the Prince and Princess of Teck, left the Castle for London. In

the evening the Queen, accompanied by Princess Louisa and Princess Beatrice, drove to the Home Park, to witness the battalions of Foot Guards crossing the pontoon bridge to Datchet on their return to London. The Lord-Lieutenant of Ireland, the Countess and Lady Sarah Spencer arrived at the Castle on a visit. On Sunday morning the Queen, with Princess Louisa and Princess Beatrice, attended Divine service at the camp of the troops in Windsor Park. The Rev. Henry Hawtrey officiated. In the evening her Majesty, with the Princesses Louisa and Beatrice, Prince Christian and Prince Leopold, paid another visit to the camp, and after driving round the encampment, which was thronged with visitors from Windsor and the surrounding district, the Queen alighted and inspected the tents and quarters of the 1st and 2d Life Guards, the 5th Dragoon Guards, and Prince Arthur's battery of Royal Artillery. On Monday morning the Queen and Royal family left Windsor for Buckingham Palace, travelling by special train on the Great Western Railway to Paddington, and proceeding thence in open carriages to Buckingham Palace, escorted by a detachment of the 17th Lancers. In the afternoon the Queen gave a breakfast to the Viceroy of Egypt, the Royal family, and a large party of the nobility, from half-past 4 to half-past 7 o'clock, in the gardens of Buckingham Palace, where tents had been erected for the occasion. During the breakfast selections of instrumental music were played by the bands of the 1st Life Guards, the Coldstream Guards, and her Majesty's private band, and a concert was given by the Tyrolese singers and the Swedish quartett singers. In the evening Princess Louisa and Prince Arthur were present at the Philharmonic concert in St. James's Hall. On Tuesday morning the Queen and Royal family returned to Windsor by special train on the Great Western Railway, escorted to Paddington station by a detachment of the 17th Lancers. Prince Arthur left the Palace for Hounslow to march with his Battery of Royal Artillery to Woolwich. On Wednesday the Queen drove out. On Thursday morning the Queen, accompanied by Princess Louisa, Prince Leopold, and Princess Beatrice, left the Castle for Aldershot Camp, and was present at a review of the troops in camp. The Prince of Wales met her Majesty at Aldershot, and took part in the review as Colonel of the 10th Hussars. Her Majesty slept at the Royal Pavilion on Thursday night, and yesterday morning, after going through the camp, returned to Windsor.

THE PRINCE AND PRINCESS OF WALES returned to Marlborough House on Friday morning from visiting the Queen at Windsor Castle. In the afternoon the Princess drove out. In the evening the Prince and Princess gave a dinner and concert in honour of the Viceroy of Egypt. On Saturday the Prince and Princess went to Windsor, and were present at the review held by the Queen in honour of the Viceroy of Egypt. On Sunday the Prince and Princess attended Divine service at the Chapel Royal, St. James's. The sermon was preached by the Hon. and Rev. Augustus Phipps. On Monday the Prince and Princess went to Redhill, where his Royal Highness laid the foundation stone of the new wing of the Idiot Asylum at Earlswood. In the afternoon their Royal Highnesses were present at the breakfast given by the Queen at Buckingham Palace. The Prince and Princess afterwards went to the Philharmonic Concert at St. James's Hall. In the evening their Royal Highnesses were present at a party given by the Duke and Duchess of Sutherland at Stafford House to the Viceroy of Egypt. On Tuesday the Prince inspected the corps of the Royal Body Guard of the Yeomen of the Guard in the gardens of St. James's Palace. Their Royal Highnesses afterwards went with the Viceroy of Egypt to the fête at the Crystal Palace. On Wednesday morning the Prince presided at a meeting of the governors of Wellington College, at the Palace of Westminster. The Princess drove out. In the evening their Royal Highnesses dined with the Duke and Duchess d'Aumale, at Twickenham, and were afterwards present at a ball given to the Viceroy of Egypt by Frances Countess Waldegrave, at Strawberry Hill. On Thursday morning the Prince went to the Charing Cross station of the South-Eastern Railway, and took leave of the Viceroy of Egypt on his departure from England. His Royal Highness afterwards left Marlborough House for Aldershot, where he took the head of his regiment, the 10th Hussars, in the review and manoeuvres of the troops in camp in the presence of her Majesty. In the evening the Prince dined with his regiment in camp. Yesterday his Royal Highness, with Prince Arthur, was present at a cavalry field day in the Long Valley.

DEPARTURE OF THE VICEROY OF EGYPT.—His Highness the Viceroy of Egypt left London on Thursday morning for Brussels. On Tuesday evening his Highness dined with the Prince and Princess of Wales at Marlborough House, and afterwards attended the Caledonian Ball. On Saturday the Viceroy went to Windsor, and was present at the review of the household troops by her Majesty the Queen. In the evening his Highness went to the French play at St. James's Theatre. On Sunday afternoon the Viceroy visited the Zoological Gardens. On Monday afternoon his Highness was entertained by the Queen at a garden party in the grounds of Buckingham Palace, and in the evening dined with the Duke and Duchess of Sutherland at Stafford House. On Tuesday his Highness, accompanied by the Prince and Princess of Wales, went to the Crystal Palace, where a fête, comprising a concert, a display of the great fountains, and illuminations had been prepared in his honour. During the fête his Highness and Royal party were entertained at dinner by the Duke of Sutherland. On Wednesday the Viceroy inspected the Metropolitan Fire Brigade, and witnessed the operations of the fire escapes and

steam fire engines in the gardens of Buckingham Palace. In the afternoon his Highness paid farewell visits to the Turkish and French Ambassadors, the Duke of Argyll, the Earl of Clarendon, and the Archbishop of Canterbury. In the evening his Highness went to Strawberry Hill, and dined with the Countess (Frances) Waldegrave and Mr. Chichester Fortescue. On Thursday morning his Highness left Buckingham Palace and proceeded by railway to Dover, where he embarked for Calais, on his way to Brussels. His Highness was received at Dover with full military honours, and was escorted across the Channel by a squadron of ironclads, which saluted him on embarking at Dover and on his arrival in Calais Roads. His Highness arrived at Brussels about 10 P.M.

THE CABINET.—A Cabinet Council was held on Saturday in Downing Street.

CONSECRATION OF COLONIAL BISHOPS.—On Tuesday three colonial bishops were consecrated in Westminster Abbey—the Rev. S. E. Marsden, M.A., vicar of Bengeworth, Worcestershire, as Bishop of Bathurst, in Australia; the Rev. Wm Garden Cowie, rector of Stafford, as Bishop of Auckland, in New Zealand; and the Ven. Walter Chambers, as Bishop of Labuan. The Archbishop of Canterbury officiated, and was assisted by the Bishops of Ely, Lichfield, Worcester, London, and Colombia; Bishop M'Dougal and Bishop Ryan. The sermon was preached by the Bishop of Lichfield.

THE PEERAGE.—The Queen has directed letters patent to be passed under the Great Seal, granting the dignity of a baron of the United Kingdom to Baron Rollo, and the heirs male of his body lawfully begotten, by the title of Baron Dunning, of Dunning and Pitcairns, in the county of Perth.

THE REVENUE.—The Revenue returns for the year and quarter ended the 30th ult. show an increase of 3,052,735*l.* on the year, and an increase of 563,011*l.* on the quarter. The year's account shows an increase in the Excise of 585,000*l.*, Property Tax, 1,969,000*l.*; Post Office, 60,000*l.*; Crown Lands, 15,000*l.*; Miscellaneous, 606,735*l.*; and a decrease in the Customs of 118,000*l.*, Stamps, 34,000*l.*; Taxes, 31,000*l.* The quarter's account shows an increase in the Customs of 62,000*l.*, Excise, 114,000*l.*; Stamps, 114,000*l.*; Property Tax, 220,000*l.*; Crown Lands, 1000*l.*; Miscellaneous, 98,041*l.*; and a decrease in the Taxes of 46,000*l.*

Foreign.

FRANCE.—The Emperor arrived at Beauvais on Sunday, to be present at the agricultural exhibition, and met with a splendid reception from the citizens and from 100,000 visitors in the town. In reply to an address from the Mayor, his Majesty said:—

"I rejoice that by coming here I am able to bear witness to the progress made in agriculture and manufactures, which progress is mainly due to the good order maintained during the last 17 years. I trust that the interests of agriculture will continue to progress. Don't let your confidence be shaken, for the good order now existing will assuredly never be seriously disturbed."

In reply to the Bishop of Beauvais, his Majesty said that he always received the addresses of the bishops with great marks of deference, because they invariably contained expressions of piety, and never failed to call to mind holy doctrines. Should his prayers be heard, religion would be held in honour, the people would be happy, and France great and prosperous. The newly-elected Legislative Body assembled for the first time on Monday, when M. Rouher, Minister of State, read the following statement:—

"The present extraordinary session is necessary in order to hasten the verification of the elections, and thus put an end to all uncertainty respecting the validity of the electoral proceedings. According to the Government's intentions the present session has no other object. The recomposition of the Legislative Body by the process of universal suffrage is a natural opportunity for the nation to manifest its thoughts, its wants, and its aspirations. But the examination of the political results of this manifestation on the part of the people should not be precipitate. At the ordinary session the Government will submit to the high consideration of the public bodies the resolutions and projects which seem to it the most calculated to realise the wishes of the country."

This declaration was received with marks of approval from several benches, and the Chamber adjourned. In the sitting of Thursday 69 elections were declared valid. It is asserted that MM. Emile Ollivier, Segris, Buffet, and other members of the Third Party, will to-day call the attention of the Government to "the necessity of satisfying the wishes of the country by letting it take part in a more efficient manner in the direction of public affairs." In consequence of M. David, Vice-President of the Legislative Body, having been raised to the rank of Grand Officer of the Legion of Honour, M. Schneider, the President of the Chamber, sent in his resignation to the Emperor, who declined to accept it, and stated that in conferring the rank upon M. David he had no intention of offending the dignity of M. Schneider, or of weakening the moral authority of the President of the Legislative Body. His Majesty, moreover, repelled the idea that M. David's appointment could possess a reactionary significance, and concluded as follows:—

"The policy of my Government is shown so clearly as to avoid any equivocal interpretation. Now, as before the elections, it will continue the task it has undertaken—namely, that of reconciling the existence of a strong power with that of sincerely liberal institutions."

M. Henri Rochefort has been sentenced, on the charge of complicity in the illegal introduction of the *Lanterne* into France, to three years' imprisonment, to a fine of 10,000 francs, and to the forfeiture of his rights as a citizen, including his right of voting and his eligibility to the Legislative Body, for the term of three years. The proceedings against the *Sicéle* have resulted in the condemnation of M. Limousin to one month's imprisonment and a 500 francs fine, and in that of M. Jourdan to two months' imprisonment and a 500 francs fine. In the case of the *Electeur Libre*,

M. Herbette has been sentenced to one month's imprisonment and a fine of 300 francs; and of the *Comité Nationale*, M. Poulet has been sentenced to one month's imprisonment and a fine of 500 francs.

SPAIN.—In the sitting of the Cortes on Tuesday Senor Sagasta, Minister of the Interior, and the Government would punish the abettors of constitutional manifestations. In the sitting of Wednesday the Minister of Justice declared that the Government would be ordered to swear fidelity to the Constitution. The sitting of Tuesday the proposed modification of the tariff was agreed to without modification. Amendments to the Article relating to the Customs duties have been rejected. A majority of confidence was passed in General Prim, and Admiral Topete. In the evening's sitting of the Cortes General Prim, in reply to Senor Sagasta, declared that the Government would never attempt a *coup d'état*, but would endeavour towards consolidating liberty.

In the sitting of Wednesday the Cortes definitively passed the Budget of revenue, and authorised the Government to lay out the sums necessary to be expended for the public service during the three months commencing the 1st inst. Admiral Topete declared he was not a public arsenals should be carried on by private enterprise if he found any firm who would undertake to do so. Senor Zorilla said he recognised the fact that a political revolution had been accomplished, and that an economical revolution had not yet been accomplished. General Dulce arrived at Madrid on Saturday from Cuba.

PORTUGAL.—The Chamber of Deputies on Wednesday voted the proposed augmentation of taxes. Cardinal-Patriarch of Lisbon is seriously ill.

BELGIUM.—It is generally reported that a difficulty has occurred in the negotiations with France on the railway question. M. Vandersweep, one of the Belgian Commissioners, returned to Brussels on Friday. M. de Beaulieu, the Belgian Minister in London, arrived in Brussels last week, and acquaint his Government with the desire entertained by the British Cabinet that Belgium should accede to the demands of France on the railway question. He asserted that M. de Beaulieu has returned to London with the assurance of the Belgian Government that it will act in the manner desired.

PRUSSIA.—Prince Gortschakoff arrived at Berlin on Tuesday, and on the same day had a long interview with Count Bismarck, who left for Varzin on Wednesday. A Royal Cabinet order was issued on Tuesday granting Count Bismarck leave of absence from the Presidency of the Ministry for several months, relieving him of the duty of attending the Prussian Councils.

ITALY.—The King paid a visit to the Duchy of Aosta on Saturday. Her Royal Highness is considered out of danger. At Bologna a severe undulatory earthquake was felt on Saturday afternoon, lasting 10 seconds, and taking a direction from N.N.E. to S.S.W. The clocks of the city were stopped and the bells rung by the shock. The Parliamentary Commission of Inquiry into the affair of the Turin Convention having heard the evidence of Brenna, Fambri, and Civinini, the Depu-tes rested, and having examined the documents in the case, it has decided to reserve its opinion on the case until after further investigations have been instituted. It has also determined that the inquiry shall be prosecuted at the public sittings of the Chambers. At the first of these sittings on Thursday, Deputies Crotti, Lobbia, Fambri, and Brenna were examined.

PAPAL STATES.—The Pope delivered an Allocution on Friday in a Secret Consistory held for the purpose of creating 14 Archbishops and Bishops. His Holiness deplored the new law adopted in Italy for sending clerical pupils to military conscription as being an infringement of the immunities, the rights, and the liberty of the Church. He dwelt upon the lamentable evils afflicting the Church in Austria and Hungary, and upon the just complaints of the bishops of those countries. The events in Spain also gave cause for sadness and mourning. In Poland the Russian Government continued its persecutions, which had led to the exile of Catholic bishops still the episcopate was undaunted by those trials, was a source of consolation. His Holiness said, in conclusion:—"Let the enemies of Christ consider how terrible will be the fate of those who do not bring them back from the way of perdition to the paths of justice, and to crown the Church with fresh triumphs." On Monday, being the Feast of St. Peter and St. Paul, the Pope performed High Mass in St. Peter's. The Austrian and French Ambassadors and the ecclesiastical, civil, and military dignitaries attended. The Pope read the usual protest against the invaders of the patrimony of St. Peter.

CAPE OF GOOD HOPE.—Accounts from Cape Town to the 19th May state that the elections that had been decided had placed the Conservatives in a considerable majority. Mr. Solomon, the leader of the Conservative party, and for 15 years a representative of Cape Town, had lost his seat. The returns of the revenue and expenditure for last year had been published, and showed no improvement in the financial position of the Colony. The President of the Free State, on the occasion of his inauguration for a second term of office, had shown a broader and more liberal policy than had hitherto prevailed. The *Transvaal Argus*, the only newspaper published within the extensive dominions of the Free State, had been suppressed for making the revelation to the prevalence of slavery in that State. Several small diamonds had been found. The Port Elizabeth prospectors had returned from Tatin, being enabled to find gold in payable quantities. The farmers who had fallen in the Western Provinces, and the farmers who were good. The Government have set free

at Allahabad.

The Imperialists have gained a signal
over the Mahomedan rebels, 20,000 of whom
A scientific expedition from Australia
at Hong Kong. A proclamation has been
at Soochow warning the authorities and
to modify their rancour towards Christians,
prisoners are allowed by treaty to propa-
gandize religion at any place they please, and that if
any church members they do so volun-
tarily are not forced. The proclamation enjoins
the people to mind his own business, and not
to meddle with things which are to no purpose, and only
to disturb the peace. It concludes by saying that if any
person should disobey the proclamation, such person will
be arrested and severely punished.

Advises from Japan state that further
aid had been offered to foreigners, and disturbances
are expected.

UNITED STATES.—The national monument at Gettysburg
in memory of all the soldiers who fell there,
was dedicated on Thursday. All the survivors of the
battle, as well as numerous civic societies, were invited
to be present. An address was delivered by Senator
Cass of Indiana. Mr. Henry Ward Beecher offered
prayer and a poem was recited by Mr. Bayard
Pierpont. General Stekes, the newly appointed United
States Minister at Madrid, sailed on Thursday. It was
announced on Thursday that the public debt of the
United States has been decreased by over 16,000,000 dols.
during the month of June. The State Department has
appointed a special agent to Cuba to ascertain the strength
and prospects of the insurgents. Two small steamers,
carrying 90 men of Colonel Ryan's expedition, in aid
of the Cuban insurgents, were captured on Tuesday
in Long Island Sound by a Revenue steamer.
The men have been lodged as prisoners in the Brook-
lyn Navy Yard. It is believed that the steamer carrying
the remainder of the expedition has been
captured. Several additional arrests of members
of the Cuban Junta in New York were made on
Thursday. Mr. Banks, member of Congress, is
opposing the recognition of the belligerent
status of the Cuban insurgents. The Spanish
Minister at Washington has informed the State
Department that he will demand his passports if any
insurgent be granted to M. Lemus, the
insurgent envoy. The ex-President, Mr.
Johnson, is in Washington. Mr. George
Johnson, formerly Attorney-General of New
York, has been appointed Secretary of the
succeeding Mr. Borie, of Pennsylvania,
Governor. The Republicans of Maine have nomi-
nated Mr. Joshua Chamberlin as Governor.
The Republicans have carried the municipal election
at Portland. The New Hampshire Legislature has
passed the 15th constitutional or negro suffrage
amendment. The registration in Virginia shows a
majority of 20,000 white voters. Irish Republican
clubs are being organized in all the principal cities of
the State. The Wheat crop now growing is the largest
ever has been raised in the United States.
The crops, however, are committing terrible ravages
in the Green Mountains in Utah and the adjoining territories.
The Arizona Indians have been renewing their depreda-
tions on Arizona.

Parliament.

In the House of Lords, on Monday, the Poor Relief
Act (1862) Amendment Bill was read a
second time and passed. Earl DE GREY and RUPON
briefly explained its object and provisions.
The Earl of NELSON supported the Bill, although he feared
it would go far enough. He lamented inci-
dentally the dissolution of the monasteries, which
had served as a basis for the education of the
poor. The Bishop of ELY objected to that part of
the Bill which empowered the Commissioners to
alter the character of the governing body, and to get
the Bill then passed through Committee, and after
remarks by Lord TAUNTON, the Earl of HAR-
ROLD, the Earl of CARNARVON, Earl FORTESCUE,
and the Bishop of GLOUCESTER, it was read a second
time on Tuesday the House went into Committee
on the Irish Church Bill, when Earl GREY moved the
amendment of the preamble of the words prohibiting
the application of the surplus for the maintenance of any
school or clergy, or the teaching of any religious
doctrine, and contended that Parliament was bound
to apply some portion of the surplus to the Roman

Catholics and Presbyterians. Earl GRANVILLE opposed
the motion, and said that the Government did not
think that the plan of concurrent endowment was now
practicable. The Bishop of OXFORD regarded the
question of disestablishment as irrevocably settled, but,
so far as endowments were concerned, he hoped their
lordships would deal generously with a Church which
had yet to learn the lesson of standing alone. No
Church which could not survive disestablishment
was worth being established. He deprecated the
protracting of the struggle as the most fatal of
all possible injuries to the Irish Church, and
thought that the residue might be properly applied
to the support of other denominations. The
Bishop of ST. DAVID'S expressed his satisfaction that
the Bishop of Oxford, though personally prevented
from taking part in the debate on the second reading,
agreed in spirit with the views he had himself
expressed on that occasion, and intimated his assent
to the principle of concurrent endowment. After
some remarks from Lord CAIRNS, Earl RUSSELL, the
Earl of DALHOUSIE, the Archbishop of CANTERBURY,
the Earl of KIMBERLEY, the Earl of BANDON, Lord
WESTBURY, and the Marquis of SALISBURY, several of
whom spoke in favour of the Duke of Cleveland's
amendment, Earl GREY withdrew his motion. The
preamble was then postponed, and the first clause,
defining the short title of the Bill, was agreed to. On
clause 2, providing for the dissolution of the legislative
union between the Churches of England and Ireland
on and after the 1st January, 1871, the Archbishop of
CANTERBURY moved to postpone the date of dissolu-
tion for another year, and, on a division, carried his
amendment by 130 to 70, being a majority of 56 against
Ministers. The clause as altered was then agreed to.
Clause 3, relating to the appointment of Commissioners,
was also amended at the instance of the Archbishop,
by requiring that the Commissioners should be members
of the Church of England or Ireland. In clause 4
Lord MONCK moved an amendment, giving the right
of appeal from the decision of one commissioner to the
three. The amendment was agreed to. The remainder
of the sitting was occupied with the discussion of the
clauses relating to the constitution and powers of the
commissioners, and prohibiting future ecclesiastical
appointments by the Crown, all of which were agreed to.
After clause 10 had been agreed to progress was
reported. On Thursday, after the Beerhouses Bill had
been read a third time and passed, the House went into
Committee on the Irish Church Bill. Clause 11 was
agreed to. In clause 12 the date 1871, in accordance
with the motion of the Archbishop of CANTERBURY,
was altered to 1872, on the understanding, suggested by
Lord CAIRNS, that the question of restoring the original
date should be subsequently considered. An addition
to the clause, moved by Lord CAIRNS, that property
should be transferred subject to the same rights of
renewal of tenants' leases as were possessed by tenants
of lands belonging to sees suppressed by the Act of
William IV., was accepted by the Government. In
clause 13 the Duke of SOMERSET suggested the aboli-
tion of the existing restriction on the election of Irish
clergy as members of the House of Commons. The
Earl of CLANCARTY moved an amendment to preserve
to the present Irish prelates their right to sit in the
House of Lords. The Earl of DERRY, the Marquis of
SALISBURY, Lord CAIRNS, Lord HOUGHTON, and
other peers, supported the amendment, which was
ultimately agreed to by the Government. Lord COL-
CHESTER moved an amendment, authorising the
bishops to use their territorial titles without incurring
penalties under the Ecclesiastical Titles Act. Earl
GRANVILLE opposed the amendment, which was
negatived without a division. In clause 14 the Bishop
of PETERBOROUGH moved an amendment to enable
the holders of bishoprics and preferments to deduct
from their yearly income the tax on clerical incomes
now paid to the Ecclesiastical Commissioners. Earl
GRANVILLE and the Duke of ARGYLL opposed the
amendment as repugnant to the principle of the Bill.
On a division, the amendment was carried against the
Government by 91 to 50. The Marquis of SALISBURY
moved an amendment that curates' salaries should
not be deducted from the life annuities of incumbents.
After some discussion the amendment was agreed to,
with a qualification suggested by Lord KIMBERLEY,
excepting cases where there existed a legal obligation
to employ a curate. The Bishop of PETER-
BOROUGH moved an amendment that incomes
below 200l. a year should be raised by the Com-
missioners to 200l. The motion was opposed by
Ministers, and was ultimately withdrawn. On reaching
clause 23, the Earl of CARNARVON moved an amend-
ment providing for the commutation of life interests,
and fixing 14 years' purchase of the aggregate yearly
income as their value. The Archbishop of YORK said
that as this amendment embodied his views to a great
extent, he would withdraw in its favour the amend-
ment of which he had given notice. Lord CAIRNS
supported the motion, which was opposed by the Earl
of KIMBERLEY and Earl GRANVILLE, who offered a
compromise on the part of the Government. On a
division Lord CARNARVON'S amendment was carried
against the Government by 155 to 86. Clauses 23 and
24 were then agreed to, and progress was reported.
Yesterday Earl RUSSELL announced his intention to
move the third reading of the Life Peerages Bill on
the 8th inst. The House then went into Committee
on the Irish Church Bill, when the Duke of CLEVE-
LAND stated that in reference to the amendment which
stands in his name, he had decided to let the Marquis
of Salisbury take precedence, entirely concurring in
his amendment, and with the justice and expedi-
ency of his proposal. The Marquis of SALISBURY
then proceeded to move his amendment, and was left
speaking.

In the Commons on Friday the Bankruptcy Bill,
the Imprisonment for Debt Bill, the Insolvent Debtors

and Bankruptcy Repeal Bill passed through Com-
mittee, and the Courts of Justice (Salaries and Funds)
Bill was read a second time. Colonel FRENCH and Sir
R. ANSTRUTHER made some remarks on the dis-
courteous reception given to the Pacha of Egypt on
his landing at Dover and on his arrival in London.
Mr BRUCE said that a suitable vehicle was in waiting
at Dover, but that his Highness, as many an English
prince had done before him, preferred to walk from the
pier to the railway station. Mr CARDWELL expressed
his regret that the escort intended to have accom-
panied the Viceroy from Charing Cross Station to
Buckingham Palace had not arrived in time, and said
that the officer in command had been reprimanded for
his inattention. Mr FAWCETT called attention to the
report of the Commissioners appointed to inquire into
the condition of women and children employed in agri-
culture, and moved a resolution that the education of
labourers was in general in so unsatisfactory a condition
that immediate legislation upon the subject was
imperatively demanded, and that the Government
ought to legislate upon the subject during the next
session of Parliament. Lord F. CAVENTISH seconded
the motion, which was supported by Mr. M. WHITE-
RIDLEY. Mr BRUCE agreed that Parliament must
take up the question, and that in some way compulsion
must be employed similar to that which had been
applied to the manufacturing population. He declined,
however, to pledge the Government to legislate next
session, but promised that when the Commissioners
had concluded their labours, their recommendations
should be carefully considered. After some remarks
by Mr HENLEY, Mr SCOURFIELD, Mr G. GREGORY,
and Colonel BRICE, the resolution was withdrawn.
The motion to go into Committee on the Metropolitan
Poor Act (1867) Amendment Bill was opposed by
Mr. McCULLAGH TORRENS, Mr. LOCKE, and Mr.
M'ARTHUR, who divided the House on the question,
and was defeated by 137 to 29. A subsequent
motion to report progress was agreed to by Mr.
GOSCHEN, and the Speaker resumed the chair.
The House then went into Committee on the
Sunday and Ragged Schools Bill, and after a long dis-
cussion the further progress of the Bill was adjourned,
in order that a new clause might be printed, giving the
authorities imposing a rate power to exempt these
schools from them. The Marquis of HARTINGTON, in
reply to a question from Mr. GRIFFITH, stated that the
Bill for the purchase of the telegraphs was ready and
would shortly be introduced, and that it would con-
tain a clause giving the Government a monopoly of
telegraphic communication. The ATTORNEY-GENERAL
for IRELAND gave notice of a Bill for authorising the
issue of a Royal Commission to inquire into the exist-
ence of corruption among the Dublin freemen. Sir G.
GREY thereupon postponed for a fortnight his Bill
for disfranchising the freemen. The Bankruptcy Bill
was read a third time and passed amid cheers from the
Ministerial benches. On the motion for going into
Committee of Supply, Mr. CANDLISH called attention
to the imperfect audit of the public accounts, and
to the failure of the departments to lay their
accounts before the Auditor-General. Mr. AYTON
and Mr. GLADSTONE explained that the new Act was
in its infancy, and that every effort would be made to
prevent failure in future years. Mr. TAYLOR called
attention to the system of importing South Sea
Islanders into Queensland, and said that this importa-
tion was practically no better than a legalised slave
trade. Mr. MONSELI admitted that there had been
cases of kidnapping Polynesians by vessels sailing
under the English flag, but that a law had been passed by
the Colonial Legislature, by which the whole scheme
of emigration from the Polynesian Islands had been
placed under strict regulation. The House then went
into Committee on the Civil Service Estimates. On
the vote for the Royal Parks, Mr. GOLDNEY com-
plained of the expenditure on the West-end Parks,
and moved that it be reduced by the sum
of 28,251l. Mr. LAYARD defended the vote,
and said that it had become absolutely necessary
to expend 26,000l. in reducing the depth of the
water in the Serpentine, and laying down a con-
crete bed. On a division the vote was carried by
98 to 42. The item for the clothing and wages of the
gate-keeper at Clarence Gate, Roehampton, whose
duty appeared to be to exclude the public from enter-
ing or leaving Richmond Park by that gate, was
opposed by Mr. A. GUEST, and struck out of the vote
after a statement from Mr. LAYARD that he himself had
been refused admittance. A subsequent attempt was
made by Mr. BROGDEN to omit 400l. from the vote of
10,000l. for the furniture of public buildings, but was
defeated on a division by 112 to 52. An attempt by
Mr. MONK to reduce the gas bill in the Palace of
Westminster, and another by Mr. LOCKE-KING to
reduce by 500l. the vote on account of the restoration
of St. Stephen's crypt, were also unsuccessful.
The votes for the acquisition of land for West-
minster Palace and the Houses of Parliament were
agreed to. The Civil Offices (Pensions) Bill was
read a third time and passed. On Tuesday, on the
order for going into Committee on the University Tests
Bill, Mr. BENTINCK moved as an amendment that
the House should go into Committee that day three
months. After some discussion the motion was with-
drawn. On clause 1, on the motion of Mr. STEVENSON,
the University of Durham was included in the scope
of the Bill. On clause 6, which repeals the obligation
on all collegiate officials to take the declaration of the
Act of Uniformity, Mr. RAYNES moved to retain it for
masters of colleges and tutors. On a division the
clause was carried by 216 to 95. The further pro-
gress of the Bill was then postponed until Friday.
Mr. G. H. MOORE called attention to the case of
the Fenian prisoners, and moved that it was the
duty of the Government to institute a public inquiry
into the penal discipline of our prisons, and whether

political offenders should be regarded as a separate class. Mr. BRUCE and the ATTORNEY-GENERAL for IRELAND opposed the motion, and after some discussion it was negatived on a division by 171 to 31. Mr. HIBBERT moved a resolution in favour of giving county court judges additional remuneration to the extent of 300*l.* per annum each, in consideration of the new jurisdiction conferred upon them. The motion was opposed by Government, and rejected on a division by 102 to 50. A motion made after two o'clock by the ATTORNEY-GENERAL for IRELAND to bring in a Bill to issue a commission of inquiry into the corruption of the Dublin freemen gave rise to a sharp discussion. Colonel TAYLOR, Mr. HENLEY, and Sir R. PEEL objected to going on with the Bill at that late hour. One motion to adjourn was defeated by 100 to 52, but the Government gave way to a second, and the debate was adjourned to Thursday. On Wednesday Mr. BRUCE stated, in answer to Mr. EYKYN, the reasons which had induced the Government to decline to undertake the prosecution of the Overend, Gurney & Co. directors. The subject had been considered by the Cabinet, which had come to the conclusion that there was nothing to take the prosecution out of the usual cases of fraud. The adjourned debate on Mr. PEEL's motion, that the agricultural returns, now made annually, should after this year be discontinued, and collected every fifth year, was resumed, when Mr. LEFEVRE opposed the motion on behalf of the Government, and said that the returns would be of no value unless they were collected every year. The motion was ultimately withdrawn. Mr. M'LAREN moved the second reading of the Edinburgh Annuity Tax Bill, the object of which was the reduction of the number of ministers chargeable upon it in Edinburgh, from 13 to 10. Sir G. MONTGOMERY moved as an amendment that the Bill be read a second time that day three months. After some discussion the Bill was carried, on a division, by a majority of 9, the numbers being 151 to 142. The adjourned debate on the second reading of Mr. W. Johnston's Bill for repealing the Party Processions Act was resumed by Mr. C. FORTESCUE, who said that the Government could not assent to the Bill, but would institute a careful inquiry into the working of the Act to ascertain whether it required amendment, abolition, or more stringent execution. The debate was again adjourned to a day to be hereafter fixed, Mr. Johnston raising a laugh by expressing a hope that it would not be the 12th of July, as he could not be present on that day. On Thursday the adjourned debate on the motion of the ATTORNEY-GENERAL for IRELAND for leave to bring in a Bill appointing Commissioners to inquire into the existence of corrupt practices among the freemen electors of the city of Dublin was resumed, and after a long debate, leave was given to bring in the Bill by 239 to 136. Lord ELCHO called attention to the adulterations of feed stuffs and manures, and moved a resolution calling on the Board of Trade to take some action in the matter. After a short discussion the motion was negatived without a division. Mr. EYKYN again called attention to the possible failure of the prosecution of the Overend-Gurney directors, and urged the Government to let the case be conducted by the law officers of the Crown. Mr. BRUCE and Mr. GLADSTONE contended that there was nothing in the case to warrant the Government in departing from the usual course, and after some discussion the subject dropped. The Imprisonment for Debt Bill was read a third time and passed. Mr. GOSCHEN withdrew his Valuation of Property Bill. The House then went into Committee on the Sunday and Ragged Schools Bill, when Mr. BAGLEY's amendment, that the exemption of such institutions from local rates should be left to the discretion of the municipal and parochial authorities, was carried on a division by 104 to 67, thereby undoing the principle affirmed by 3 to 1 on the second reading. Eventually the House resumed without further progress being made. Yesterday the Assessed Rates Bill, as amended, was considered, when an amendment by Mr. VILLIERS in clause 1, to substitute the words "rateable hereditaments" for "dwelling houses," was accepted by Mr. GOSCHEN, and carried by 219 to 121. The House went into Committee on the University Tests Act, when a long discussion took place on Sir R. PALMER's proposed clause, imposing a test on Professors and others. The clause was ultimately withdrawn. The House was left sitting.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 92½ to 92¾, both for Money and Account; New and Reduced Three per Cents, 92½ to 92¾; Bank Stock, 242 to 244; Exchequer Bills, March, 3*s.* dis. to 2*s.* pm.; June, par to 5*s.* pm.; India Five per Cents, 111½ to 112.—**FOREIGN:** Brazilian, 83 to 83½; Chilean (1867), 93½ to 94 ex div.; Danubian Eight per Cents, 87½ to 88½ ex div.; Honduras, 83 to 84 ex div.; Egyptian (1864), 88½ to 89½; Ditto (1863), 79 to 79½; Viceroy's Seven per Cent., 52½ to 52¾; Ditto Nine per Cent., 95 to 95½; Italian, 53½ to 53¾; Peruvian, 75½ to 75¾; Portuguese, 33½ to 34½; Russian (1862), 84½ to 85; Orel, 80½ to 80¾; Nicolas, 65 to 65½; Moscow, 78½ to 78¾; Charkof, 78½ to 79½; Spanish, 28½ to 28¾ ex div.; Turkish Five per Cent., 44½ to 44¾; Ditto Six per Cent., 65 to 65½; United States 5-20 Bonds, 80½ to 80¾; Erie, 19½ to 20; Illinois, 94½ to 95½.

Metropolis and its Vicinity.

FETE TO THE VICEBOY OF EGYPT AT THE CRYSTAL PALACE.—On Tuesday a magnificent fete was given at the Crystal Palace in honour of the Viceroy of Egypt and the Prince and Princess of Wales. The crowd of visitors was immense, the admissions by season tickets having been 19,946; those on payment, 13,682; making a total of 33,628. The entertainment commenced with

a concert, in two parts, under the management of Sir Michael Costa, assisted by a body of more than 3000 singers and players. The Royal party did not arrive in time for the first part of the concert, but at 6 o'clock they took their seats in the central box—the Viceroy occupying the central chair, the Princess of Wales sitting on his right hand and the Prince on the left. At the close of the concert the Duke of Sutherland entertained the whole of the Royal party, to the number of 42, at a banquet, while the great fountains were playing, and at a chosen point of view from which the guests could look from their plates to where the whole series of basins were flowing in wreaths of snow-like foam. At 10 o'clock there was a display of fireworks. The grounds and the water temples were illuminated with coloured fires of varied hue, and the magnesium balloons made the gardens as light as day. The set pieces first shown were those in honour of the Prince of Wales and the Crown Prince of Denmark, and consisted of their respective badges displayed in variegated fires, and after a flight of brilliant asteroids, the shield of his Highness the Viceroy was displayed in gorgeous coloured fires, and the whole length of the terrace was occupied by soldiers, placed at stated distances, who at a given signal gave a salute of coloured lights. The display concluded with a grand girandole of rockets.

DINNER TO HER MAJESTY'S MINISTERS AT THE MANSION HOUSE.—On Wednesday the Lord Mayor gave his annual dinner at the Mansion House to her Majesty's Ministers. The principal speakers were the Prime Minister, the Lord Chancellor, the Home Secretary, and the Chancellor of the Exchequer. Mr. Gladstone, in responding for the toast of "Her Majesty's Ministers," spoke as follows:—

"I may presume to say that I have not been unfortunate in the nature, in the qualities, and stamp of men whom I was not only enabled but constrained to associate with me in the work of government, and I do not think, so far as the experience of the last six months is concerned, there has been any disposition on the part of the country to complain of the manner in which either the administrative or legislative duties of the great departments of the State have been generally conducted. Also I may venture to discharge a debt of duty to the House of Commons. That House was elected under circumstances novel and peculiar. It sprang fresh from the heart and breast of the people. It bears upon it more the marks of contact with the masses of the nation than any House of Commons ever gathered within the venerable halls of Westminster, and it would appear that in proportion as the scope of its contact with popular sentiment has been extensive its capacity for the discharge of particular duty has been increased. At least I must presume to say that, after having sat for very many years as a member of that assembly, and never without a present and, if I may say so, a fuller admiration of its great qualities, yet at no period I think have I known a body of representatives of the people gathered together with so clear a consciousness of the purposes for which they were sent there, or with so little disposition to waste either in pettiness of intrigue or in idle and self-seeking discussions the precious time that ought to be devoted to the noble task of building up the happiness of the people. I beg to refer to one peculiar subject with which official relations long connected me. For the first time during many years I see a House of Commons more disposed to take a strict measure of its duties, particularly on one cardinal and testing subject—that of public economy than is taken either by the public out-of-doors, or even by that daily Press by which the interests of the public in general are so well represented and defended. Nor can we omit at a juncture like this, to refer to that special purpose of great and transcendent interest which, rising high above the mass of public questions, involving such great interests and results, attracts to itself and claims for itself a special character—I mean that great question connected with the condition of one of these three kingdoms, to a main portion of which it has been our duty during the present session to address ourselves. This company is well aware, as the whole country is aware, that the House of Commons, and her Majesty's Government in the House of Commons, have at least bestowed their best endeavours in the conduct of a measure which, as they hope, both by what it is in itself, and by what it promises for the future, forms a vital and essential portion of the work of peace for Ireland and of security for the empire. During three months we spent the chief of our care upon the maturing of that measure, and on such a measure three months were but a short time to spend. Since it passed beyond our portals there has been, I am told, great excitement in the country. We have read of meetings here and there, and there has been a blaze of sky rockets repeated from point to point around the whole horizon. We are told of the indignation of the people. We are told of reaction in the public sentiment. The course we have pursued and the measure we have proposed have been branded in language more severe than it would be convenient on this festive occasion to recall. Sangline anticipations were entertained, in the first instance, that our measure would elsewhere meet with a speedy doom. Since these anticipations have been disappointed others have been raised up to serve the same turn, to the effect that if the Bill, as a phantom, might be allowed to escape legislative condemnation, yet it would come back to us so altered that we should not know it, so that we should have no choice except either total and utter failure, in both the name and substance of our work, or else the acceptance of the name with the loss of the substance. Under these circumstances, and amid this tumult of excitement which we are told prevails, we have remained—I speak for my colleagues, I speak as an observer for the House of Commons—in a state of great tranquillity. We have remained tranquil for this reason,—in the first place, it is not matter of grudging or of jealousy, but of satisfaction, that our work should be reviewed elsewhere. We can honestly say that we have bestowed on it the best of our care and pains, and that we have laboured with no stint of our time or faculties to perform the duty committed to us by the country. But, at the same time, no doubt, there may be faults in our work, and we shall be grateful for every improvement that may be effected in our measure, and every change proposed shall be respectfully considered, even though at the first moment, nay, it may possibly be, at the last moment, we shall not be able to regard it as an improvement. But every change proposed shall have our respectful consideration. It shall have that consideration subject, also, to the recollection of the position in which we stand, of the words we have spoken, of the pledges we have given, of the commission we have received. Those pledges were few and simple. We told the country in language intelligible enough that in our opinion if the Irish Church was to be removed from that position of legal prevalence it has so long enjoyed, it must be removed subject to those conditions; above and before all, there must be a most careful and liberal attention paid to every just and equitable

claim. The second of these pledges was equitable claims must be considered where they are proved on the part of ministers of the disestablished Church, or by consequence, they must be the arrangements connected with the ancient system, and must be made on behalf of every denomination of the arrangement growing out of the exceptional state of ecclesiastical affairs existing in Ireland; but this, that it was a plan of general disendowment, not less momentous nor less desirable than the one which was freely tendered to Parliament, and which, I do not hesitate to say, would have been freely tendered, would have been sense and opinion, — namely, that equitable claims or principles of religious denominations remain the property of the Church of Ireland, the benefit of the Irish people, but not a Church, nor the support of the conditions which, as a matter of historical fact, us and the country. We tendered the terms of Opposition. We stated it now that we are installed in the seat of power, that both branches of the Legislature will the adjustment of this great controversy perception of what the time and circumstances sanguine enough to believe that within a work, which in my opinion is like a work of will have reached its final term and accom-

THE MASTERSHIP OF THE TEMPLE.—The resignation of Archdeacon Robinson, has been upon the Rev. Dr. Vaughan, vicar of Dunstable, brother-in-law of Dr. Stanley, Dean of Westminster.

THE FRENCH ATLANTIC CABLE.—A telegram received at Minou on Saturday morning, stated that Gooch, stating that during the night there was every indication of a slight fault, which was possible to localise; and that it had been proceeded. A subsequent telegram stated that the cable was removed from the cable inboard on Wednesday noon. Another telegram stated that the cable, and that the operations had been during the hours cutting out a third fault close to the electric condition of the cable afterwards was found to be for two or three days the test was made, and the fault was said to be very near the buoy it. It has since been ascertained that the cable discovered on Wednesday morning. A fault came on suddenly, and obliged them to cut the cable. The cable has been recovered, and is going well yesterday on board the Great Eastern ship was in latitude 47° 55', and in longitude 12° 15' when this news left.

THE BERMUDA FLOATING DOCK.—The floating dock in tow of her Majesty's ships Agincourt and Vanguard, with the paddle-frigate Terra Nova, and the hawser astern as a "drag" for steering, and the out steamers on the port and starboard, passed down Channel off Plymouth on Friday afternoon, at a long distance from land. It was proceeding at four and a half knots per hour. The dock contains 10,000 tons of iron, and some idea may be formed of the magnitude of the enterprise of taking it to the Indies from the fact that the squadron consists of nine ships of war, representing an aggregate of 149 guns, and 7022-horse power. The first stage will be from England to Madeira, the second from Madeira to the Bermuda Channel, the third, from the Bermuda Channel to the Bermudas. At Madeira the Northumberland will be in charge, and at Lapwing, the Terrible going out to sea. At Bermuda Channel the Commander-in-Chief of the West Indies will be on the spot, or send a ship of force, and this last stage is thought by many to be the most critical part of the voyage.

THE EXPLOSION AT HOUNSLOW.—The explosion of the four workmen killed at the gunpowder explosion at Hounslow has terminated in a case of Accidental Death, coupled with a recommendation that Government inspectors should be appointed to powder-mills.

SHOCKING TRAGEDY IN THE CITY.—On Monday morning a whole family, consisting of a mother, and six children, were found dead in Hosier Lane, Smithfield, under circumstances which left no doubt that they had died from poison. The names of the father and mother were William Dugzen, 33 years of age, and Emma Dugzen, 33 years of age, and three children, three boys and three girls, respectively 13, 12, 6, 4, 3 years, and 14 months. The father was a working silversmith in the employ of Messrs. Chawner and Co., who have an extensive manufactory and office in Hosier Lane, and the family occupied an adjoining house belonging to the firm, living rent free. He had been in the city about seven years, and came from Bristol. He had fallen into ill-health, and had been advised by medical advice to relinquish his employment, and to go to the house he occupied. A letter in his own hand, dated the day of the discovery of the tragedy. It was posted at the police station in Smithfield, and addressed to the police station in Hosier Lane, on Monday morning. On the evening of the discovery of the tragedy, the door of the house was locked on the inside, but was opened through a window at the back. On a bed in the room lay the dead bodies of the mother and the father, and the youngest children, one on each side of the other across the foot of the bed. The bodies of the two eldest daughters were stretched on

 The Prince of Wales laid the foundation-...
 an additional wing to the Earlswood Asylum...
 on Monday. The Prince and Princess

arrived at the Earlswood Station at 12 o'clock, by...
 special train on the London and Brighton Railway...
 The mayor of Reigate presented an address on behalf...
 of the corporation, to which the Prince returned a...
 gracious reply. Their Royal Highnesses were then...
 conducted to the royal carriages in waiting, and pro-...
 ceeded at a walking pace to the asylum, which is about...
 a mile from the station. The people for miles round...
 had assembled to see the Prince and Princess, and in...
 enthusiastic cheers, which were so constantly renewed...
 as to be almost continuous, they gave expression to...
 their delight at the compliment paid them by their...
 Royal Highnesses in coming among them in so stately...
 a manner. On arriving at the tent where the stone...
 was to be laid, the officers of the asylum read an...
 address, to which the Prince replied in a brief speech...
 in which he said that the fact of his late father having...
 taken so great an interest in the charity gave it an...
 increased value in his eyes. The stone having...
 been laid with the usual ceremony, the...
 Archbishop of Canterbury offered an appropriate...
 prayer. The Prince and Princess then took their seats...
 and about 300 ladies ascended the dais, and deposited...
 on the foundation-stone a scarlet leather purse contain-...
 ing five guineas, making an obsequious to the Prince on...
 ascending, and one to the Princess on descending. A...
 procession of gentlemen followed, each of whom also...
 deposited a purse containing five guineas. In all, 100...
 purses were laid on the stone, but it was not until...
 this portion of the ceremony had come to an end that...
 the company were informed that after he had fixed the...
 stone the Prince handed the treasurer a check for...
 100 guineas as his contribution to the charity. After...
 a *déjeuner*, at which their Royal Highnesses honoured...
 the governors of the institution with their company...
 the Prince and Princess planted a tree each on the...
 lawn in front of the building, and then took their...
 departure for London amidst the cheers of a vast...
 crowd of people.

WINDSOR.—The review of the Household troops on...
 Saturday in the Great Park, was a very brilliant and...
 successful spectacle. The ground chosen was nearly...
 a mile long, and half a mile broad, situated between...
 the Long Walk and Queen Anne's Ride. The...
 Alexandra Stand, from Ascot, was erected on the right...
 of the Royal enclosure at the saluting point, and was...
 occupied by a large number of fashionable spectators...
 On the left of the saluting point there was an en-...
 closure for carriages belonging to the Royal household...
 To the left of this, again, there was another enclosure...
 for carriages; and, from a position to the left of these...
 equestrians could command a good view of the pro-...
 ceedings. To the right of the Alexandra Stand there...
 was a smaller one for the accommodation of the...
 Windsor garrison. The spectators on foot had ample...
 room in the front of the carriages and all along the...
 line of sentries. The troops were drawn up in line of...
 centinels as columns in quarter distance parallel to the...
 Long Walk, facing Queen Anne's Ride. On the right...
 of the line was the C Troop, C Brigade Royal Horse...
 Artillery, under the command of Major Durham...
 Colonel Light commanding the whole of the artillery...
 The Household Cavalry were next, consisting of the 1st...
 Life Guards, and numbering 275 officers and men, the...
 2d Life Guards, numbering 250; and the Royal Horse...
 Guards, numbering 262. The B Battery, 4th Brigade...
 Royal Artillery, numbering 112, was the left of the...
 line. Next to the cavalry were the 2d Battalion...
 Grenadier Guards, numbering 680; the 3d Battalion...
 of Grenadier Guards, 663; the 1st and 2d Battalions...
 of Coldstreams, 688 and 613 respectively; and the 1st...
 and 2d Battalions of Scots Fusiliers, numbering 707...
 and 650. There were therefore present about 250...
 artillery, 790 cavalry, and 1000 infantry.—in all, 5000...
 officers and men, irrespective of the 5th Dragoon...
 Guards and detachments of the 5th, 7th, and 23d...
 Fusiliers, which kept the ground. The whole force...
 was under the command of the Earl of Lucan, the...
 artillery under Colonel Light, the cavalry under Lord...
 George Paget, and the infantry under Major-General...
 Hamilton. At about 20 minutes past 4 o'clock...
 the Queen's departure from the Castle was an-...
 nounced by the firing of a royal salute, and...
 almost to the appointed minute, the proces-...
 sion, headed by an escort of the 5th Dragoon...
 Guards, drove up amidst the cheers of thousands of...
 spectators to the saluting point, which was kept by...
 a guard of honour composed of a company of the...
 5th Fusiliers. The first carriage contained her...
 Majesty, the Princess of Wales, the Princess Christian...
 and the Viceroy of Egypt. In the second carriage...
 were the Princess Mary of Cambridge the Princesses...
 Louisa and Beatrice, and Prince Leopold. The third...
 carriage was occupied by Hassan Pacha, Tousson...
 Pacha, Nubar Pacha, and the lord in waiting. The...
 fourth, fifth, and sixth carriages contained the Royal...
 and viceregal suites. Accompanying the procession on...
 horseback were the Prince of Wales, the Duke of Cam-...
 bridge, Prince Teck, Prince Christian, and Prince...
 Edward of Saxe Weimar. The rear was brought up by a...
 troop of the 5th Dragoon Guards. When her Majesty had...
 taken up her position at the flagstaff, the line of troops...
 gave a royal salute, after which the Queen and the Viceroy...
 inspected the whole line, driving slowly from right to...
 left along it, accompanied by a very numerous staff...
 The manoeuvres then began, and comprised the usual...
 incidents of a sham fight, in which infantry, cavalry...
 and artillery were employed to repel the attack of an...
 enemy supposed to be advancing from the side of...
 Queen Anne's Ride. At the conclusion the Guards...
 threw out covering points to the front to take up line...
 preparatory to the grand salute. The force was now...
 in three lines—two of infantry, and the third of cavalry...
 in rear of the second line. Then, with bands playing...
 the General and his Staff in the centre, and in advance...
 of the line, the Guards, with that grand composure of...
 step and uniformity of front which convey such an...
 impression of irresistible solidity and strength, advanced

and saluted the Queen, and the Windsor review and...
 manoeuvres were at an end.

Ireland.

THE IRISH CHURCH BILL.—A demonstration...
 against the Church Bill took place on Wednesday at...
 Lurgan. Five thousand orange sashes were worn, and...
 lifes played. The speeches were temperate, and exhorted...
 Orangemen to obey the law. The resolutions denounced...
 the Bill, and condemned levelling.
FATAL ALLEY AT PORTADOWN.—On Thursday...
 night the police at Portadown extinguished a bonfire...
 which some children had lit and were attacked by the...
 people with such violence that they were obliged to...
 fire upon them, killing a young lad and dangerously...
 wounding one of the rioters. The people then lit a...
 large bonfire, and were not interfered with.

HOPS.—BOROUGH MARKET, July 1.
 Business in Hops has been limited in extent, but no change...
 has taken place in prices. Rather more favourable accounts...
 have been received from the plantations. Mid and East Kents,
 2s 10s. to 6s 10s.; West of Kents, 2s 5s. to 4s.; Sussex, 2s...
 to 3s 15s.; Farnham, 3s 10s. to 6s.; Country 3s 10s. to...
 4s 10s.; Bavarians and Belgians, 2s to 3s 10s.; Yearnings, 2s...
 to 3s 10s.

ENGLISH WOOL.
 A fair business has been transacted at steady prices. At...
 Leicester Wool fair 9632 tons of wool were pitched, and about...
 8700 sold. Prices, as compared with this time last year...
 averaged 37s 3d per ton, against 39s 6d. at that period. The...
 clip throughout the country appears to be considered as...
 decidedly lighter than that of 1868, and it is anticipated that...
 rates will keep up.

METROPOLITAN CATTLE MARKET.

MONDAY, JUNE 28.

The supply of Beasts is much smaller than on Monday...
 last; the demand has also increased considerably, and prices...
 are lower. There are more Sheep, the trade is in a very...
 depressed state, and it is difficult to effect a clearance at...
 reduced rates. Trade continues very bad for Lambs. Calves...
 are lower than last week. Our foreign supply consists of...
 100 Beasts, 100 Sheep, 200 Calves, and 100 Pigs from Scot-...
 land there are 27 Beasts, from Ireland, 100 from North...
 and Suffolk, 150; and 1362 from the Midland and Home...
 Counties.

Best Scots, Here- fords, &c.	5 8 to 5 8	Best Long-wools	5 0 to 5 4
Best Shorthorns	5 2 to 5 6	Do. Shorn	—
2d quality Beasts	3 4 to 4 4	Ewes & 2d quality	4 0 to 4 6
Best Downs and Half-breds	5 6 to 5 8	Do. Shorn	—
Do. Shorn	—	Lambs	4 8 to 5 8
Beasts, 3120, Sheep and Lambs, 30,030, Calves, 455, Pigs, 220.		Calves	3 4 to 5 4
		Pigs	3 6 to 5 4

THURSDAY, July 1.
 We have rather a larger supply of Beasts, and trade is...
 dull, choice descriptions are, however, scarce, and make...
 dual, higher prices. There is also a plentiful supply of...
 Sheep of Lambs, there is rather more demand for them, but...
 prices are not much altered. Choice Calves are scarce and...
 dear. Our foreign supply consists of 566 Beasts, 4670 Sheep...
 578 Calves, and 45 Pigs.

Best Scots, Here- fords, &c.	5 6 to 5 10	Best Long-wools	5 0 to 5 4
Best Shorthorns	5 4 to 5 6	Do. Shorn	—

Fresh Butter 1s. 0d. to 1s. 2d. per lb!

MARK LANE.—MONDAY, June 28.

The supply of wheat to this morning's market being extremely small, factors were enabled to realise about the prices of this day se'nnight. There was a fair attendance at market, but little inclination was shown to purchase foreign wheat, and the business transacted was limited to a few needy purchasers, who were compelled to pay last week's rates, excepting where factors were anxious to clear vessels, in which cases they accepted 1s. per qr. decline. Barley brought an advance of 1s. per qr. There was no change in the value of Beans or Peas. The Oat trade was quiet, at 6d. per qr. reduction. Flour was unchanged.

FRIDAY, July 2.

Since the 26th ult. we have had dry weather, but the sky has generally been cloudy and the nights cold. Miders and dealers, who have lately bought in excess of their immediate wants, were easily influenced by the favourable weather (which has much improved the growing crops), and held back in the expectation of some concession in price, which was but reluctantly made, and the wheat trade throughout the kingdom has ruled exceedingly slow, at a decline of fully 1s. per qr from the late highest rates for best foreign and home-grown. Barley was the turn dearer in most markets, but in the value of all other grain we notice no quotable change. Flour was neglected, and barrels were easier to buy. The arrivals of grain and seed laden vessels off the coast since Friday last consisted of 23 cargoes, of which, with those left over from last week, there remained for sale last night 24 cargoes. The floating trade ruled quiet, principally on account of the improved state of the weather. Holders of arrived wheat and maize were more willing sellers, at from 1s. to 1s. 6d. per qr lower rates. Barley remained steady, and of rye there was nothing on offer. For forward shipment of wheat the demand was very limited, the few transactions entered into show a slight decline. Paris, July 1.—Wheat is in short supply, and prices for this article as well as flour are about unaltered. The eight marks are quoted at equal to 37s. 6d. per 280 lb. The stock at the Halle is estimated at 7380 cwt.

Of foreign barley we have no arrivals this week, of other grain the supplies were small. There was a poor attendance at this morning's market, and factors generally held wheat, both English and foreign, for Monday's prices, excepting where vessels were coming on demurrage, in which case they were willing to submit to some decline; the business transacted was unimportant. Spring Corn was unchanged in value.

MANCHESTER, July 1.—Since our last report the weather has gradually improved; the trade has consequently assumed a quieter tone for all articles, and the value of wheat and flour has somewhat receded, though not to the extent that might have been expected, owing to the smallness of stocks. There was a limited attendance at our market this morning, and, owing to the fineness of the weather, buyers held aloof; at the same time, holders evinced no particular anxiety to sell at any material reduction. English wheat may, however, be quoted 1s. per qr. and foreign 3d. per cental lower than on this day se'nnight, while flour was 8d. to 1s. per sack cheaper. Oats and Beans ruled firm. Indian Corn declined 1s. per qr.

SEED MARKET.

The speculative demand for Clover and Trefoil seed, of which we spoke in our last report, has continued throughout the present week. Of good new Red seed the stocks are reduced quite low; for the little on hand holders appear determined to obtain more money. For Trefoil seed we have a very brisk inquiry. The reports of the growing crops, both at home and abroad, are extremely unfavourable, and prices con-

sequently are still advancing. We have more doing in Alsike and White Clover seed; in fact, there is at the present moment a great deal better feeling in the agricultural seed trade. Sowing Rapeseed continues scarce and dear. For White Mustard seed we have a ready sale at full prices. Canary and Hemp seed are without change in value.
 JOHN SHAW & SONS, 16, WATER LANE.

WANTED, as LAND AGENT, on an extensive Property in Devonshire, an active, intelligent Person, between 30 and 45 years of age, having a thorough knowledge of the Value and Management of Light Land, including Draining, Fencing, Planting, &c., and fully competent to prepare Plans, Specifications, and Estimates for, and to Superintend the Erection and Repair of, Farm Buildings. Home News.

THE COURT AT WINDSOR.—On Saturday the Queen drove out with Princess Louisa and Princess Beatrice. On Sunday morning the Queen and Royal family attended Divine service in the private chapel. The Rev. F. W. Farrar, one of the Masters of Harrow School, preached the sermon. On Monday the Queen and Royal family went out. Prince and Princess Christian, Princess Louisa, and Prince Leopold, drove to the Home Park, and distributed the prizes at the annual meeting of the Prince Consort's Association. On Tuesday morning the Queen went out with Prince Leopold and Princess Beatrice. In the afternoon the Queen held an investiture of the Order of the Bath, at which General the Earl of Lucan, Lieut.-General the Hon. Sir James Yorke Scarlett, Lieut.-General Sir George Buller, and Vice-Admiral Sir Augustus Leopold Kuper were invested with the insignia of Knights Grand Cross; Vice-Admiral William Ramsay, Lieut.-General Viscount Templeton, Vice-Admiral the Right Hon. Lord Clarence Paget, Major-General Frederick Horn, Major-General Arthur Cunynghame, Major-General Lord George Paget, Major-General Arthur Lawrence, Major-General Horatio Shirley, Vice-Admiral Hastings Yelverton, Major-General William Jones, Rear-Admiral Bartholomew Sullivan, Major-General John St. George, Major-General Edward Warde, Major-General James Brind, Major-General the Right Hon. Percy Herbert, Major-General John Simmons, Major-General Archibald Little, and Dr. Thomas Logan, Director-General of the Army Medical Department, were knighted and invested with the insignia of Knights Commanders. Her Majesty also held an investiture of the Order of the Star of India, at which Major-General George Le Grand Jacob was invested with the insignia of Knight Commander of the Order. The Queen also held an investiture of the Order of St. Michael and St. George, at which Viscount Monck, Earl Grey, and Earl Russell were invested with the insignia of Knights Grand Cross. Colonel Gore Brown, Count P. E. de Strzelecki, Lord Lyttelton, the Right Hon. Frederick Peel, the Right Hon. Charles B. Adderley, Sir Frederick Rogers, Henry Taylor, Esq., and T. F. Elliot, Esq., were invested with the insignia of Knights Commanders. On Wednesday morning the Queen went out with Prince Leopold and the Princesses. Prince Albert Victor, Prince George, Princess Louisa, and Princess Victoria of Wales arrived at the Castle on a visit to her Majesty. In the afternoon the Queen drove out with Princess Beatrice. The Count and Countess of Paris, the Prince and Princess de Joinville, and the Right Hon. Chichester Fortescue arrived at the Castle on a visit. On Thursday morning the Queen went out with Prince Leopold and Princess Beatrice. In the afternoon her Majesty, accompanied by Princess Louisa, went to London, and visited the studio of Mr. Foley, R.A. Her Majesty afterwards returned to Windsor. Yesterday the Queen held a Privy Council. It was expected that her Majesty would leave Windsor to-day for Osborne, but the departure has been postponed.

STATE BALL.—By command of the Queen a State Ball was given on Friday evening at Buckingham Palace, to which a party of 1800 was invited.

THE PRINCE AND PRINCESS OF WALES.—On Friday the Prince returned to Marlborough House from Aldershot. In the evening the Prince and Princess were present at the State Ball at Buckingham Palace. On Saturday the Princess drove out. In the evening the Prince presided at a banquet given by the Corporation of the Trinity House. The Princess went to the Royal Italian Opera, Covent Garden. On Sunday their Royal Highnesses attended Divine service at the Chapel Royal, St. James's. On Monday the Prince and Princess gave a ball at Marlborough House. On Tuesday afternoon the Princess was present at a juvenile party given by the Countess of Derby, in St. James's Square. In the evening the Prince and Princess went to the St. James's Theatre. On Wednesday their Royal Highnesses left town for Lynn, when the Prince opened the new dock, and afterwards went on to Sandringham. On Thursday afternoon their Royal Highnesses, on the receipt of a telegram from London, left Sandringham for Marlborough House, where they arrived shortly before 10 P.M.

THE CABINET.—A Cabinet Council was held on Saturday at the private residence of Earl Granville, in Bruton Street.

MEETING OF THE IRISH PEERS.—Circulars were issued on Thursday requesting the attendance of the Irish Peers at a meeting to be held at the Duke of Abercorn's residence, in South Audley-street this morning.

PARLIAMENTARY MOVEMENTS.—The report that Mr. John Jones, the senior member for Carmarthen-shire intended to resign his seat, in consequence of the death of his brother, the late Mr. David Jones, of Pantglas, is contradicted. A petition was lodged on Wednesday against the return of Mr. Charles Seeley, for Nottingham, on the ground of bribery, treating, and undue influence.

THE ARMY.—The colonelcy of the 43d Foot, vacant by the death of Sir R. Garrett, has been conferred on Lieut.-General the Hon. Sir A. A. Spencer; and the colonelcy of the 96th Foot, vacated by this promotion, has been conferred on Major-General G. T. C. Napier.

THE NAVY.—Rear-Admiral Astley Cooper Key has been appointed Admirals Superintendent of Portsmouth

Dockyard, in the room of Admiral Wellesley, who has been appointed Commander-in-Chief on the North American station, in the room of Sir Rodney Mundy, promoted.

Foreign.

FRANCE.—It is asserted that M. du Miral, one of the Vice-Presidents of the Legislative Body, and other members of the majority, are engaged in drawing up an interpellation relative to the necessity of strengthening the institutions of the empire, by giving a greater development to the action and control of the Legislative body. The interpellation asks the Government to re-establish the address in answer to the speech from the throne, to organise on a larger scale the right of interpellation, to extend the right of amendment, and to give to the Chamber the power of electing its president. A meeting of deputies was held on Sunday at the residence of M. Jules Brames, a member of the Third Party, at which rather a warm discussion took place on the question of bringing forward in the Legislative Body an interpellation demanding Ministerial responsibility. M. Louvet proposed to add, after "Ministerial responsibility," the words, "coupled with that of the Sovereign." This addition was rejected, but it is believed that if the resolution in favour of a responsible Ministry and the freeing the Chamber from its present restrictions be put to the vote, the Government will find itself in a minority of 22. M. Rouher, Minister of State, had a long interview with the Emperor on Monday, and it is rumoured that he tendered his resignation. In the sitting of the Legislative Body on Thursday seven more elections were declared valid. During the sitting M. Jules Favre urged upon the Chamber the necessity of electing the Bureaux and otherwise carrying out the formality of constituting the House, in order that it might approach the discussion of the great political questions which preoccupy the mind of the Chamber and of the country. He added that all the delays which had been demanded had no other object than to allow time for a reconstruction of the Ministry. M. Rouher replied that the Government was ready to discuss all public affairs, adding—

"A Ministerial crisis is spoken of, but the great questions to which allusion has been made do not relate simply to a few individuals. They affect our institutions and the future of society, and are bound up with the question of the barrier which must be raised up against revolution. I do not know when or by what men an agreement will be arrived at, but I know perfectly well on what vital forces the Chamber will rely in order to preserve society."

This speech was received with much cheering from the right. The *Peuple Francais* of Thursday evening publishes an article, signed by its chief Editor, M. Clement Duvernois, in which it says that the Deputies who have signed the "interpellation" of the Third Party are friends of the Government, and do not wish that the Emperor should renounce his initiative, but that he should cause the Chamber to share in it. The *Peuple* believes that the Emperor is not disposed to refuse the demands of the interpellation, and adds— "The situation is not disquieting, for while one side does not desire to put forward exaggerated claims, the other is equally resolved not to oppose an exaggerated resistance. The crisis will finish by a compromise, satisfaction being given to public opinion." The *Public* says that the reported changes in the Ministry are devoid even of the semblance of truth. The *France* also gives denials to certain reports current in Paris. It says that the Government has no intention of shortly recalling its troops from Rome, that the Emperor and Empress of Austria are not about to visit Paris; that the Emperor has not given an audience to M. Buffet, a member of the Third Party; and that Baron Talleyrand-Perigord, the French Ambassador at St. Petersburg, has not been recalled, and that M. Poujade, French Consul-General at Alexandria, has not resigned, but is only coming to Paris on leave of absence. The sittings of the Franco-Belge Commission were brought to a close on Saturday. An understanding has been effected on all points, which is said to be entirely satisfactory to the French Government.

SPAIN.—A Ministerial crisis occurred on Monday in consequence of Senor Herrera, the newly-appointed Minister of Justice, and the Ministers of Public Works and the Colonies, having tendered their resignations. Senor Zorilla (Progressist) was appointed Minister of Justice; Senor Martos (Monarchical Democrat), Minister of Public Works; and Senor Becerra (Monarchical Democrat), Minister for the Colonies; but fresh complications have since arisen, and it is thought possible that the whole Ministry will resign, and that Senor Rivero, at present President of the Cortes, will be entrusted with the Presidency of the Cabinet. In the sitting of the Cortes on Monday, Senor Figuerola, Minister of Finance, brought in Bills ordering the sale of the patrimonial property of corporate bodies, and the suppression of the salaries and pensions of individuals who refuse to swear fidelity to the Constitution. In the sitting of Thursday it was proposed to pass a vote of censure upon Senor Herrera. The motion was, however, rejected by 163 votes against 94. General Prim expressed regret that the Democratic party were separating themselves from the majority. Senor Figueras asked the Minister of War what motives had led to the abrupt dismissal of the Captain-General of Catalonia. Senor Zorilla, in the absence of General Prim, the Minister of War, replied that the Captain-General of Catalonia had been superseded in the regular way. Troops have been sent against some bands of Republicans and Carlists in Andalusia and Arragon.

PORTUGAL.—In the sitting of the Chamber of Peers on Wednesday the measure authorising the Government to contract a new loan was passed by a small majority.

MADEIRA.—A rumour is current of a conflict having

taken place at Funchal between the military, in connection with the increase of the Swiss contingent.

SWITZERLAND.—The President of the Council, M. A. O. Aeppli, of St. Gallen, on the opening of the sittings of the Confederation against giving the inhabitants of the canton of Berne a large majority in favour of the new Constitution had been submitted to them for ratification.

BELGIUM.—The *Independance Belge* announces that the final obstacles to the Franco-Belgian railway question were removed the previous day, and that it has reason to believe an arrangement arrived at by the Commission to include the Grand Luxembourg line.

AUSTRIA.—It is announced that the Government rigidly adheres to the provisions of the law for the payment of the interest on the public debt in Vienna only. It is added, however, that the Ministry of Finance, without infringing upon the principle, perhaps be in a position to give, for certain facilities to foreign bondholders for the payment of the coupons.

HUNGARY.—The Lower House of the Legislature engaged for 12 days in discussing a Bill for the appointment of judges. The debates terminated on Tuesday, when the Bill, which entirely embodied the principle of election, was passed by 265 votes.

RUSSIA.—An Imperial ukase has been issued sanctioning the foundation of an Imperial University at Warsaw, which is to replace the Warsaw University. The curriculum of study will embrace the faculties of Law, Medicine, and Theology. Intelligence from Omsk reports that 600 Chinese, while pursuing their way to Kirghiz, had approached the frontier of Saisank. They were driven back, with a detachment of Russian troops. An architect to the Ministry of the House of the Emperor, is to construct, on the model of the Louvre Palace, the building for the exhibition to be taken place at St. Petersburg next year. A sum of 27,000*l.* is allowed for this structure; the workmen employed is at present 400, but will be speedily augmented, for the building is completed externally by September 1, and internally by May 1 next.

ITALY.—The examination of witnesses by the committee appointed to investigate the venality against a member of the Chamber of Deputies was concluded on Tuesday, when the President declared the Parliamentary inquiry closed. A witness from Siniscola, in Sardinia, states that the plague is making terrible ravages in that locality. It attacks both children and adults, even those who have been vaccinated. The mortality is in some places proportionally, and a general feeling of alarm prevails.

HANOVER.—The Supreme Tribunal of Cassation rendered judgment on the 25th ult. in the trial of the Hanoverian Legion. The Court, taking into consideration extenuating circumstances, condemned the accused to 15 months', and the remainder of the year's imprisonment.

POLAND.—A curious discovery has been made at Cracow, during the renovation of the tomb of King Casimir the Great, the last member of the Jagiello dynasty, known in Polish history as "the King of the Peasants and the Jews." One of the workmen struck the pedestal with his hammer in order to test its strength, several bricks fell out, leaving a hollow through which the interior of the pedestal was clearly visible. On enlarging the hole it was found that Casimir's coffin, which had been enclosed in iron bars, had rotted away, and that the body had fallen to the ground. On the skull was a copper, in the shape of a plain circle containing five lilies. Near this was a silver-gilt spoon, and to his feet a pair of large copper spurs. The coffin was covered with a shroud of thick silk, which was in tolerably good condition. A subscription has been opened in order to make a new coffin for the body of this celebrated Polish hero, and the remains already been received for the purpose from the Russian, Prussian, and Austrian Governments.

SERVIA.—The draft of the Constitution proposed by the Skuptschina proposes, among other things, freedom of the Press, equality of all citizens before the law, the autonomy of the communes, and the independence of the judges from Government. The Senate is to remain a consultative body, and the Skuptschina sharing with the Prince the domestic administration. The members of the Skuptschina are chosen for three years. The Government is to have the power of contracting loans without the consent of the Skuptschina.

EGYPT.—The Viceroy is said to have the intention of creating a foreign legion, to be recruited principally in France. The legion is to be stationed at Suez and Ismail, and its duty will be to guard the canal and the Suez Canal. The Viceroy has committed the dramatic duties of the Cairo Theatre to M. Lablache, jun. He has also commissioned M. Camban to paint the scene of the "Elixir d'Amore," M. Chevalier to paint the "Muette," and M. Desplechin; that for the "Bulla," "Crispino," and "Comare." The artists are to have their work delivered by the 31st of August, at a fine of 20 guineas per day.

CAPE OF GOOD HOPE.—By the Cape mail we learn that the Rev. F. S. Robinson, Bishop of Natal, created Archdeacon of Durban by Bishop Robinson. Nearly all the Australian gold-diggers have returned to Australia. Herr Maunz has continued to believe the goldfields were

one-third of the Fellows of a College to call a meeting at which a majority of the Fellows present might alter or repeal any statute imposing a religious test. It was opposed by the SOLICITOR-GENERAL and Mr. BOUVERIE, and supported by Mr. WALTER, Mr. DENMAN, and Mr. WINTERBOTHAM. On a division the clause was rejected by 234 to 147. The Bill then passed through Committee. The rest of the sitting was occupied with the Committee on the Contagious Diseases (Animals) Bill, in which progress was made up to clause 11, clause 7 being postponed. At the evening sitting the House was counted out before any business was done. On Monday Mr. GLADSTONE stated, in answer to Mr. M'Evoy, that the Government were not unfavourable to the Bill for repealing the Ecclesiastical Titles Act, and that in the event of the Irish Church Bill passing into law some legislation on the subject could not be delayed beyond next session. On the motion for the second reading of the Dublin Freeman Bill, Sir F. HEYGATE moved as an amendment that it be read a second time that day three months. The amendment was supported by Mr. E. W. VERNER, Dr. BALL, Mr. LOPES, and Mr. HENRY; and opposed by Mr. C. FORTESCUE, Sir P. O'BRIEN, Mr. DENMAN, and the SOLICITOR-GENERAL FOR IRELAND. On a division the amendment was rejected by 246 to 126, and the Bill was read a second time. On the motion for going into Committee of Supply on the Civil Service Estimates, Mr. FAWCETT called attention to the case of Overend, Gurney & Co., and to the grave evils which might result to the public from a system which allowed the law officers of the Crown to be retained as counsel for the defendants in such cases. The SOLICITOR-GENERAL warmly resented the interference of Mr. Fawcett, who had, he said, neither mastered the facts of the case nor the very elements of the subject he had ventured to rake up. As to himself, it was true that he had received an ordinary retainer for Messrs. Gurney so long ago as September, 1866, and he had received the Queen's license to act on their behalf. He had done nothing inconsistent with the rules of the profession, of common sense, honour, and good feeling. He did not desire to be taught his duty by Mr. Fawcett, and when he did desire it he would come to him and attend his lectures. The House then went into Committee of Supply, and agreed to 11 votes for Public Works and Buildings in the Civil Service Estimates. In Committee of the whole House, the Marquis of HARTINGTON brought in his Money Bill for completing the purchase of the telegraphs. He stated that the total sum to be paid to the telegraph companies was 5,715,047, being 1,320,940 less than had been demanded, and concluded by moving a series of resolutions on which a Bill would be founded. Mr. WARD-HUNT, Mr. CRAWFORD, and Mr. MACFIE expressed their approval of the Bill, and the resolutions were agreed to. The Assessed Rates Bill was read a third time and passed. The Sunday and Ragged Schools Bill passed through Committee. On Tuesday the House went into Committee on the Contagious Diseases (Animals) (No. 2) Bill, when Mr. C. S. READ moved, and Mr. M'COMBIE seconded, the insertion of a proviso to the 15th clause, requiring the slaughter at the port of landing (with certain exceptions) of all cattle imported from countries in which the disease has existed within the last 18 months. On a division the proviso was rejected by 220 to 160. Progress was then made with the Bill up to clause 14. Mr. H. RICHARD called attention to the recent proceedings of certain Tory landlords in Cardiganshire and Carmarthenshire towards their tenants on account of their votes for Liberal candidates at the last election, and moved a resolution condemning them as unconstitutional, oppressive, and an infringement of popular rights. Mr. O. MORGAN seconded the motion, which was opposed by Mr. SCOURFIELD, Sir W. W. WYNN, and Lord SANDON, and supported by Mr. LEATHAM, Mr. O'REILLY DEASE, and others, who contended that the only remedy was the ballot. At the suggestion of Mr. BRUCE the motion was withdrawn. Mr. T. CHAMBERS called attention to a correspondence between the Poor Law Board and the Marylebone Guardians in reference to the separate education of Roman Catholic children, and moved a resolution declaring that where guardians have made provision for the religious instruction of Nonconformist children within the workhouses, the Poor-law Board ought not to order their removal to schools not under the control of the parish authorities. Mr. GOSCHEN said that it was his intention to carry out the law in order to prevent, if possible, the system of proselytising Roman Catholic children in workhouses, of which many complaints had reached the Poor-law Board. After a short discussion the motion was negatived by 71 to 29. On Wednesday Mr. T. HUGHES moved the second reading of the Trades' Unions Bill, the main object of which, by repealing the combination laws, was to legalise all agreements as to conditions of labour, and all combinations of employers and workmen; to abolish, in any future prosecution or civil action in regard to Trades' Union societies, the plea that they are in restraint of trade, and to give them the privileges of friendly societies. Mr. T. BRASSEY, Mr. CHARLEY, Sir C. W. DILKE, Mr. MUNDELLA, and Lord GALWAY supported the Bill, on the condition that ample protection was given to the non-unionists. Mr. E. POTTER opposed it, on the ground that it was an anti-free-trade measure. Mr. BRUCE said that it would not be wise entirely to repeal the combination laws without providing something in their stead. The Government had not been able to legislate on the subject this year, but a Bill should be laid on the table at the very commencement of the next session. After some remarks from Lord J. MANNERS, Mr. W. E. FORSTER, and Mr. HENLEY, the Bill was read a second time. On Thursday Mr. OTWAY stated, in answer to Mr. BAZLEY, that the

Spanish Government had offered to negotiate a treaty of commerce with us, one of the bases of which was a reduction of our wine duties, and that the offer was now under consideration. Mr. GLADSTONE appealed to Sir H. Bulwer, who had a notice on the paper to call attention to our relations with the United States, to relinquish altogether the idea of raising a discussion on the Alabama claims this session. He had reason to believe that the United States' Government, though the recent treaty had been negatived, did not consider the subject definitively dropped, but thought it would be wiser that some interval should elapse before it was renewed. He pointed out also that there had been no discussion in the United States' Legislature. Sir H. BULWER reluctantly yielded to the appeal, but threw on the Government the responsibility of what might happen in consequence of the subject not being discussed in time. On the report of the Committee of Supply, Mr. DILLWYN moved that the vote for altering the Houses of Parliament and decorating the wall of the central hall with mosaics be reduced by 5,500/. Mr. LAYARD admitted that he had sanctioned the expenditure for mosaics on his own responsibility and without the authority of the Treasury. Mr. WARD-HUNT, Mr. WHITE, Mr. BENTINCK, Mr. MUNTZ, and others, censured the principle of expending public money without the authority of Parliament, or even the consent of the Treasury, while he vote was supported by the CHANCELLOR of the EXCHEQUER, Mr. BOUVERIE, and Mr. GLADSTONE. Eventually Mr. Layard expressed his willingness to strike 3000/. off the estimate, but Mr. DILLWYN insisting upon a division, his amendment was negatived by 187 to 97, and the vote, in the reduced form proposed by Mr. LAYARD, was agreed to. On the motion for going into Committee of Supply, Mr. AYTON moved a resolution condemning, as a contravention of the Canada Railway Act of 1867, the application of the loan raised under Imperial guarantee for the Intercolonial Railway to the redemption of a portion of the Canadian debt. Mr. WARD-HUNT, Mr. T. BABING, and Mr. GLADSTONE opposed the motion, which was withdrawn. The House went into Committee of Supply on the Civil Service Estimates, and agreed to a number of votes in the class of Public Works and Expenses of Departments. The third reading of the University Tests Bill was opposed by Mr. CROSS, but was carried on a division by 116 to 65. Yesterday, in answer to Sir H. VERNEY, Mr. MONSELL said that the Canadian Government had practically acceded to the terms agreed to by the Hudson's Bay Company for the cession of their territories. In answer to Alderman SALOMONS, Mr. OTWAY regretted to say that the Government had recently received information of renewed outrages against the Jews in the Danubian provinces. The Insolvent Debtors and Bankruptcy Repeal Bill passed through Committee with a few verbal alterations. The House went into Committee on the Contagious Diseases (Animals) (No. 2) Bill, commencing with clause 45, and was left sitting.

City Intelligence.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 93 to 93½ for Money, and 93½ to 93¾ for Account; New and Reduced Three per Cents, 93½ to 93¾; Bank Stock, 241 to 243; Exchequer Bills, 2s. to 7s. pm. for March, and 5s. to 10s. for June; India Five per Cents., 111½ to 112.—FOREIGN: Argentine, 78½ to 79½; Brazilian, 83½ to 84; Egyptian (1864), 90½ to 91½; Ditto (1868), 80 to 80½; Viceroy Seven per Cents., 80½ to 80¾; Ditto Nine per Cents., 96 to 96½; Italian, 53½ to 54; Mexican, 12 to 12½; Peruvian, 76½ to 77; Russian (1866), 90 to 91, Ore! Vitebsk, 81 to 81½; Charkof, 79½ to 80½; Spanish, 28½ to 28¾; Honduras, 83 to 84; Turkish Five per Cents., 45½ to 45¾; Ditto Six per Cents., 65½ to 66½; United States 5-20 Bonds, 81½ to 82; Erie, 18½ to 19; Illinois, 95½ to 96.

Metropolis and its Vicinity.

THE WIMBLEDON MEETING.—The Volunteer Encampment at Wimbledon this year is considerably larger than in any of the nine which have preceded it, and many improvements in the arrangements have taken place. The business of the meeting commenced on Monday with a salvo from the cannon in front of the Council tent. The shooting, in consequence of the strong south-westerly breeze which was blowing, was on the whole rather below the average. Quarter-master-Sergeant Nicholls, 10th Stafford, made the greatest number of points for the 1st stage of the Alexandra, at 500 yards, and carried off the 20l. prize, by scoring 19 out of a possible total of 20. Twelve of the other competitors made 18 points, and twenty-nine 17. The Prince of Wales's Prize, value 100l., with 100l. added by the Association, was won by Corporal Peake, of the 6th Lancashire, who won the Queen's Prize last year, but was declared to be disqualified, on the ground that he had loaded with an extra wad, which he denied. On Tuesday the programme began with the first stage of the St. George's Challenge Vase, with other prizes amounting to 623l. Sergeant Lowe, 16th Lincoln, won the vase, gold jewel, and 25l., and Corporal Wyatt, 13th Salop, won the silver jewel and 20l., each scoring 20 points. The principal of the Enfield Nursery Prizes was won by Sergeant Liversidge with 18 points. Sergeant Pace, of the 26th Kent, in the breech-loader competition at 200 yards, with the Henry rifle, fired 43 shots in three minutes, making 6 bull's-eyes, 16 centres, and 21 outers, making a total score of 114. This was 4 points below Mr. Frazer, of the Edinburgh Rifles, who made on the previous day, with a Henry rifle, 118 points, being 3 bull's-eyes, 18 centres, and 20 outers. On Wednesday Sergeant Toplis, of the Robin

Hoods, carried off the "Daily Telegraph" 18 points, and various other competitions took place. The event of the day, however, was an accident by which Corporal Peake, of the 6th Lancashire, one of the best mark-men in the country, forfeited his right to shoot again during the meeting. It appears that he was in his tent handling his rifle it went off, driving the several regimental tents, the Queen's Westminsters, one of the tents of the 1st and finally through the fence to the ground, the ball having passed close to the ground. On Thursday the great event was the shooting in the presence of a brilliant assembly, including Mr. Disraeli and the Countess of Devonport. Mr. Fordyce, M.P. for Aberdeen, scored 55 out of 60 bull's-eyes and a centre, scoring 55 out of 60. Lord Elcho and Mr. Bass, who is in the field, scored 51 each; and the Marquis of Salisbury. Although some of the Lords shot very well, Mr. Spencer and the Earl of Denbigh were defeated on the total score by 35 being—Commons, 353; Lords, 315.

BANQUET AT THE TRINITY HOUSE.—A banquet at the Trinity House took place on Monday. The Prince of Wales, who was accompanied by the Elder Brother, presided for the Duke of Edinburgh, the Master, and there were also present Prince Teck, Prince Christian, Prince Edward of Weimar, Mr. Gladstone, Mr. Lowe, Mr. Stansfeld, and others of her Majesty's Ministers, Mr. Justice, &c. The principal speeches were made by the Prince of Wales, Messrs. Gladstone, Childers, Lowe, Bright, Disraeli, Sir S. Lubbock, Mr. Gladstone, in returning thanks for the services of her Majesty's Ministers, expressed his confidence in the good opinion of the country. The Prince of Wales, Messrs. Gladstone, Childers, Lowe, Bright, Disraeli, Sir S. Lubbock, Mr. Gladstone, in returning thanks for the services of her Majesty's Ministers, expressed his confidence in the good opinion of the country. The Prince of Wales, Messrs. Gladstone, Childers, Lowe, Bright, Disraeli, Sir S. Lubbock, Mr. Gladstone, in returning thanks for the services of her Majesty's Ministers, expressed his confidence in the good opinion of the country. The Prince of Wales, Messrs. Gladstone, Childers, Lowe, Bright, Disraeli, Sir S. Lubbock, Mr. Gladstone, in returning thanks for the services of her Majesty's Ministers, expressed his confidence in the good opinion of the country. The Prince of Wales, Messrs. Gladstone, Childers, Lowe, Bright, Disraeli, Sir S. Lubbock, Mr. Gladstone, in returning thanks for the services of her Majesty's Ministers, expressed his confidence in the good opinion of the country.

"I think the House of Commons is entitled to sympathise as a suffering body at the present moment. Had I uttered ourselves that we had done a great deal, traced a broad and clear outline—we laid in what we took to be neutral tints—we took infinite pains and pains in our performance, and satisfied ourselves well with the artistic character. But now we are in an exciting order. We see our performance in friendly eyes, criticised, altered, and re-arranged. The notions of our critics. The real truth is, we give place to the most violent lights and shadows, and definite outline we had drawn becomes a faint tinct—all sorts of, I will not say tricks and artifices, but on our performance, and we are called upon to try our arms, to watch this execution, to see if we are being allowed to interpose a word. That is the position for the House of Commons to be in. A period of night is nearest the dawn, and with the reflection that after these alterations in our performance it will return to its original state, give it the final touch, and we are enabled to see the outline, and make the picture, if not exactly before, yet so much the same at least as to be satisfactory on all points of view. That such may be the result of a remarkable production I have no doubt you will be in anticipating."

Mr. Disraeli, in returning thanks for the House Brethren, said:—

"The honour conferred by the toast on the members is one of which they are at all times sensible, but especially so in the circumstances under which we are when before our banquet we held a Court in which the subject of our Sovereign and the Prince nearest to us came to inscribe his name on the ancient records of fraternity. Nor can we doubt that, however our engagements, you, sir, will fulfil your duties in connection with this corporation with the same cordial and the same happiness of manner, and the same felicity of which you have fulfilled all your other duties which have obtained for you the kind feelings of your countrymen. Perhaps, sir, in the execution of your duties you may at times experience cares and anxieties less than those which the Chancellor of the Exchequer with so much tact and taste recalled to our recollection. I am that whatever may be your public duties will encounter them successfully with the temperance which generally in public affairs meet their duties and you will feel sure that it is more sedulously to observe than this—that it is unwise to introduce subjects upon which men may differ when it is to intrude them on public notice."

ROYAL COMMISSION ON WATER SUPPLY.—Following are the conclusions contained in the report of the Commissioners, which was published last week:—

"As to the Plans for obtaining Water for the Metropolitan Area.—The various schemes, in an engineering point of view, are all practical, and that by a large amount of water obtained for the metropolis, but that the greatest caution in judging of the merits of any scheme of such magnitude. That the water would be satisfactory as regards its purity and its softness and clearness, and its dependence on its softness and clearness."

mitted no offence against the laws. He intended to bring the matter before the House of Commons, while others were fully determined to submit it to the consideration of the courts of law.

Mr. Holt, M.P., moved the first resolution viz "That this meeting is alarmed at the interference of the present Home Secretary with the right of lawful assembly and free discussion."

Mr. Kydd, barrister, seconded the resolution, which was carried unanimously. The Rev. S. A. Walker, rector of Maryport, Bristol, moved the next resolution "That a strong attachment to the principles of freedom, as intended by the constitution, and as hitherto protected by the law when fairly administered, and a firm determination to resist all attempts to violate the right of peaceful assembly and of free discussion, prompt this meeting to reprobate the conduct of the Home Secretary as inconsistent with this right, and to repudiate the pretexts advanced in palliation of his conduct."

Mr. James Bateman seconded the resolution, which was carried unanimously. Mr. Fielden, M.P., moved the third resolution, as follows:—"That this meeting further expresses strong disapprobation of certain local authorities who have proceeded without adequate cause or legal sanction to interrupt persons proceeding to attend a lawful assembly."

The resolution was carried unanimously. On the motion of the Rev. G. Badenoch, seconded by General Beattie, a petition to Parliament embodying the resolution was agreed to. Mr. Murphy was called, but he declined to come forward.

ROYAL ACADEMY.—At a general assembly of the members of the Royal Academy, held on the 30th ult., Mr. E. M. Barry was elected a Royal Academician.

THE REFORM CLUB.—Mr. John Bright and Mr. W. E. Forster have resigned their memberships of the Reform Club, in consequence of an American gentleman, Mr. Smalley, of the *New York Tribune*, recommended by them for the usual honorary membership granted to distinguished foreigners for three months, having been blackballed.

Consequent upon these resignations a requisition, signed by nearly 100 members of Parliament, and about 20 other members of the club, has been forwarded to the committee, requesting them to call a general meeting to consider the circumstances under which the resignations have taken place.

DIocese of London.—The Bishop of London has appointed the Rev. Robert George Baker to be rural dean of the deanery of Fulham, the Rev. John North Ouvry-North to be rural dean of the deanery of Ealing, and the Rev. George Goodwin Pownall Glossop to be rural dean of the deanery of Hampton.

NEW ROMAN CATHOLIC CHURCH AND HOSPITAL.—Archbishop Manning on Friday opened a new church at Newland Terrace, Kensington. It is to be the temporary cathedral church of the diocese (a position hitherto held by St. Mary's, Moorfields), till the permanent cathedral shall be built.

A new hospital at Hanwell, founded by the Baroness Weld, was opened by Archbishop Manning last week. The ceremony commenced with a procession, which marched through the grounds to the hospital, when the building was blessed and formally opened.

The procession then entered the adjoining church, where the Archbishop made an appeal in behalf of the new institution. The hospital is 49 feet long by 27 feet wide, Mr. Welby Pugin being the architect. There were present on the occasion a large number of priests and of the Roman Catholic aristocracy.

THE VICARAGE OF ST. PANCRAS.—The vicarage of this important parish has become vacant by the resignation of the Very Rev. Dr. Champneys, now Dean of Lichfield. Formerly it was what is called "a fat living;" but the parish has been split up into ecclesiastical districts, which diminish the receipts of the vicar, who has, however, in every case been the most active promoter of these districts.

The last two vicars, Mr. Dale and Mr. Champneys, held canonries at St. Paul's worth 1000*l.* a year, which made the receipts from St. Pancras comparatively unimportant to them. Mr. Gregory, who succeeded Mr. Champneys in the canonry at St. Paul's, is said to be unwilling to take St. Pancras, as it would render it necessary for him to leave a very poor district in the worst part of Lambeth, which he has worked with extraordinary success during the last 17 years.

SMITHFIELD MARTYRS' MEMORIAL CHURCH.—The ceremony of laying the foundation-stone of a new church, dedicated to the Protestant martyrs who were burnt in Smithfield, took place on the 29th ult., in the presence of a large number of spectators. The site of the church is in St. John Street Road, Clerkenwell, and when built it will serve as the district church of St. Peter's. The proceedings were opened with a hymn sung by the Sunday-school children, and followed by a prayer for the Queen. The Earl of Shaftesbury then laid the stone, and delivered a long address on the state and prospects of the Church. The company afterwards adjourned to a luncheon, which was presided over by Mr. William Leaf.

segment shells having in 15 rounds planted no less than 240 bats upon the six rows of targets, representing six companies of soldiers of the line advancing in quarter-distance column to deploy.

PALESTINE EXPLORATION FUND.—The annual public meeting of the association formed in 1885 for the accurate and systematic investigation of the archaeology, topography, geology, physics, geography, and manners and customs of the Holy Land for Biblical illustration, was held on the 1st ult. The Archbishop of York presided. Mr. Tate, M.P., Mr. MacGregor "Red Row", Captain Wilson R.E., Messrs. Prosser, Field and Deutsch, Professor Owen, General Walker, Canon Birch, and Dean Alford were on the platform.

The report stated that the income that could be relied upon was only 2000*l.* a year, while at least 5000*l.* was required. The Freemasons had contributed 300*l.* to the fund. The success of the society's exhibition of pottery, glass, and other things found during the excavations was satisfactory. The total receipts of the year had been 4630*l.*, the exploration expenses 3268*l.*, publication expenses, 583*l.*, and the balance in hand was 370*l.* The report was adopted, and resolutions in furtherance of the objects of the society and appealing for pecuniary help to carry on the work with greater vigour were adopted.

THE FRENCH ATLANTIC CABLE.—A telegram from the Great Eastern on Saturday stated that all was going well with the cable, and that the ship had done half the deep water distance between France and the Great Bank. The report on Tuesday stated that the signals were perfect, and that the ship was then in American waters. On Thursday the report stated that 1977 miles of cable had been paid out, and that the ship would be in shallow water yesterday morning.

THE BERMUDA DOCK.—A telegram from Capt. Boys, of H.M.S. *Warrior*, was received on Wednesday afternoon, by way of Lisbon, stating that the Bermuda Dock arrived at Porto Santo at 2 P.M. on the 4th inst., and left the same evening for Bermuda. The breeze had been light and the sea calm all the passage, and no difficulty whatever had been experienced.

THE PRISON PHILANTHROPIST.—At a meeting of the Common Council last week, a deputation of the Thomas Wright Memorial Fund, headed by the Earl of Shaftesbury, was received for the purpose of presenting to the City of London a portrait of the prison philanthropist. Lord Shaftesbury briefly reviewed the generous and Christian exertions of Mr. Wright in visiting and striving to bring prisoners to repentance, and the Lord Mayor in accepting the portrait on behalf of the City bore testimony to Mr. Wright's devoted and self-sacrificing labours. The portrait, which is painted by Mr. Mercer, was then presented and formally accepted.

PROSECUTION OF BETTING HOUSES.—The police having been instructed to carry out the Betting House Act, which empowers them to apprehend and detain on premises where betting is carried on, Mr. Wright, of York Street, Covent Garden, whose name is so conspicuous in many newspapers as the furnisher of "Wright's Telegrams," and 26 other well known "commission men," were recently arrested, and taken to Bow Street, where they were bound over to appear on a future day. When they were again brought before Sir T. Henry for examination, the specific charge preferred against Mr. Wright was that he received remittances of money to be laid as bets on certain horses, and the extent of his transactions was inferred from a receipt-book which had been seized upon the premises, the counterfoils of which represented a sum of between 30,000*l.* and 40,000*l.* Mr. Sergeant Sleight, on behalf of the defendant, contended that there had been no contravention of the law; and eventually the hearing was adjourned that a case might be presented to the Court of Queen's Bench. Another charge against Mr. Morris, of Cork Street, Bond Street, and a third against Mr. Sydney Smith, were adjourned for similar reasons. While these proceedings have been going on against the "commission men," the keepers of the "tobacconist's betting houses" in Oxford Street have also been brought before the magistrates at Marlborough Street Police Court. In one case Mr. Mansfield expressed his opinion that the law should be impartially administered by proceeding against Tattersall's also, and that the small flies should not be caught in the legal cobweb while the greater ones were allowed to slip through unharmed. In another case in which there was no doubt as to betting having been practised on the premises, as the detective police had actually made bets in the house, and received money which they had won, Mr. Tyrwhitt dismissed the charge, stating that he felt constrained to do so, because he believed a conviction would not have been confirmed on an appeal to the Sessions.

THE LOSS OF THE BLUE JACKET.—The ship *Blue Jacket*, from Lyttelton, New Zealand, to London, was burnt at sea March 9. The *Antonia Vinent*, on April 3, brought to Stanley, Falkland Isles, nine of the crew and 14 bars of gold, valued at 15,000*l.* The men were in the boat from the 9th March to the 29th March. Four died in the boat, and three on board the *Antonia Vinent*. The boat was for one day in company with a yacht, in charge of the master, White, and one life-boat in charge of the second mate, after which they parted company. According to the captain's report there were 31 men in the two missing life-boats. The value of the gold saved is supposed to be exaggerated, as the captain stated that each boat only contained one box of gold, valued at about 4000*l.*

FATAL ACCIDENT WITH AN HOTEL LIFT.—On Saturday an inquest was held at the Charing Cross Hospital, on the body of John Darley. The deceased was a porter at the Charing Cross Hotel, and on the 22d ult. was employed on the second floor attending to a customer who had just arrived. After he had done so he entered the "hall-porters' lift," for the purpose of being let down into the lower storey. The lift sud-

FREEDOM OF SPEECH AND PERSONAL LIBERTY.—Monday evening a public meeting was held at St. James's Hall, "in vindication of freedom of speech and liberty of the subject violated by the late arbitrary proceedings in connection with Protestant meetings, and by the illegal imprisonment of Mr. Murphy and other lecturers. Mr. Newdegate, M.P., took the chair, and, after approving of the object of the meeting, was seconded by Viscount Sandon, M.P., Mr. C. E. Cawley, M.P., Lord Harrowby, Lord G. Hamilton, M.P., Mr. Keble, Q.C., Mr. W. H. Beach, M.P., Mr. J. C. Gwynne, and other gentlemen. The chairman summarised strongly on the conduct of Mr. Bruce in justifying the arrest of Mr. Murphy, who had com-

denly gave way, and went down to the bottom of the shaft. The leg of deceased was broken, and he sustained such other injuries from the fall that he died a few days afterwards in the hospital. It was supposed that the breaking of a small steel bolt had caused the lift rope to give way suddenly, but though the jury were an hour investigating the case, they could not agree as to what was the cause of the accident. They, therefore, returned a verdict of "Death from injuries caused by the fall of a lift, but what caused the said lift to fall there was no evidence to show." The Coroner said that out of evil sometimes good arose, as Mr. Easton, the manufacturer of the lift, on the suggestion of one of the jury, had said that he would in future use wrought-iron bolts instead of steel. Nevertheless, the inquiry was a very unsatisfactory one.

THE "QUEEN'S MESSENGER."—At the Marlborough Street Police Court on Wednesday, Lord Carrington appeared before Mr. D'Eyncourt to answer two charges, the first of assault, and the second of challenging to fight a duel, preferred against him by Mr. Grenville Murray. It appeared that Mr. Grenville Murray was supposed to be the writer of certain scurrilous articles which had appeared in the *Queen's Messenger* on Lord Carrington's father, that the present Peer went to the Conservative Club, of which Mr. Murray is a member, and struck him with a stick, stating that he knew where to find him, thereby inciting him to fight a duel. The cross-examination of Mr. Murray established the fact that his son was the registered proprietor of the *Queen's Messenger*, and that he himself had often written for it. After a long inquiry, Mr. D'Eyncourt decided on the first charge to bind over Lord Carrington to keep the peace, in two sureties of 2000*l.* each, and himself in 5000*l.*, and with regard to the second charge, to send it for trial at the sessions. The Duke of Beaufort and Lord Colville were the sureties. At the close of the case a determined fight, such as was never before seen in a court of justice, took place for the possession of a tin box containing the MSS. copies of the articles which occasioned the assault on Mr. Murray, but Lord Carrington's friends succeeded in retaining possession of it. On Thursday Colonel Archibald Campbell Campbell surrendered to his bail, before Mr. Knox, at Marlborough Street police-court, to answer the charge of assaulting William Bowden, one of the officers of the court, and with conducting himself in a disorderly manner during the affray. After hearing evidence at some length, Mr. Knox said that a most dastardly attempt had been made by a number of ruffians to get possession of a box containing papers which had been subpoenaed by the court, and spoken to in evidence. He believed the defendant was under the impression that he was assisting, rather than opposing, the officers of the court in restoring order, and assaulted the officer (who was in plain clothes) by mistake. He should therefore discharge him on his making an apology to the officer. The apology having been made, Mr. Knox added that he would be glad to grant warrants for the apprehension of any person against whom suspicion rested of having been instrumental in making the attack upon the box, and if the case were proved against them he would at once send them for trial.

THE PUBLIC HEALTH.—The Weekly Return of the Registrar-General states that in the week that ended on Saturday, July 3, 4406 births and 2738 deaths were registered in London and in 13 other large towns of the United Kingdom. The annual rate of mortality was 22 per 1000 persons living, being 20 per 1000 in London, 32 in Edinburgh, 20 in Dublin, 17 in Bristol, 19 in Birmingham, 27 in Liverpool, 22 in Manchester, 23 in Salford, 18 in Sheffield, 20 in Bradford, 20 in Leeds, 20 in Hull, 18 in Newcastle-upon-Tyne, and 33 in Glasgow. In Paris the rate in the week ending the 1st inst. was 31 per 1000, and in Vienna 30 per 1000 during the week ending the 26th ult. In London the births of 1045 boys and 973 girls, in all 2019 children, were registered in the week. In the corresponding weeks of 10 years, 1859-68, the average number, corrected for increase of population, was 2135. The deaths registered in London during the week were 1231. It was the 26th week of the year, and the average number for that week, corrected for increase of population, was 1327. The present return is therefore 95 below the estimated amount.

Provincial.

DEVONPORT.—On Friday Lieut. E. H. Cunningham, of H.M.S. *Himalaya*, was tried by court-martial, in Hamoaze, for playing cards with Mr. Ross, an invalid midshipman, in the saloon, after the lights had been reported out, being officer of the watch at the time. The prisoner admitted his guilt and was adjudged to be severely reprimanded, and dismissed his ship.

KENDAL.—Three sheep were found buried in a snow drift last week in one of the recesses of the mountain High Street, in Westmorland. They were recovered alive. Snow was still lying in some of the shaded parts of Skiddaw last week.

LLANBERIS.—The latest telegrams from the scene of the nitro-glycerine explosion state that two more of the persons injured have died. The total loss of life is therefore seven. The jury at the inquest returned a verdict of Accidental Death from the explosion of nitro-glycerine.

LYNN.—The Prince and Princess of Wales visited Lynn on Wednesday, for the purpose of opening the new dock. The weather was fine, and the town was the scene of a general holiday. After receiving addresses from the Town Council and the Grammar School, their Royal Highnesses went in procession through the town, and, embarking in a steamer, made a trip down the Norfolk Estuary Channel, returning to the new dock on the top of the tide. The Prince

landed at one of the stages on the south side, and declared the dock open. Their Royal Highnesses then drove to the Town Hall, where they were entertained at a banquet, over which Mr. L. W. Jarvis, chairman of the dock company, presided. In the evening the Prince and Princess left for Sandringham, where they will stay a short time at the residence of General Knollys.

NUNEATON.—On Monday afternoon, while about 40 persons were at work at the saw-mills belonging to Mr. C. N. Newdegate, M.P., in the Griff Colliery, near this town, one of the boilers suddenly exploded. Some of the men and boys were struck with the falling bricks, some of them had very narrow escapes, but no injury of a serious character was sustained.

PENZANCE.—On Friday night it was discovered that a horrible murder had been perpetrated in an empty house at the Land's End. Some bricklayers found in it the body of a middle-aged woman, with her head nearly severed from the body. It appeared that she had left her home with a considerable sum of money in her possession, and when the body was discovered the money was gone. The police are investigating the matter.

PLYMOUTH.—The ship *Cavalier*, of Aberdeen, from Quebec, with timber, for London, put into the Sound on Monday, water-logged, having been cut down several feet below the water line by a steamer running into her on the previous day. The steamer, which is believed to be the Bremen mail boat, left her figure-head on board the *Cavalier*, and proceeded, after refusing to tow the latter into harbour.

ROCHDALE.—On the 28th ult. a pleasure party, including four young women and two young men, from Todmorden, left the Fisherman's Inn, Hollingworth, near this town, to drive round Hollingworth Lake. At the toll-gate the horse backed, and slipped down the embankment into the lake. One young woman jumped out before the vehicle reached the water, and another was recovered in an insensible condition and restored to life. The two young men were saved. Two other young women, called Holt and Brooks, were drawn out of the lake dead. The horse was also drowned. The jury at the inquest returned a verdict of Accidental Death, and censured the unsafe condition of the embankment.

SUNDERLAND.—The amount collected in this town for the purpose of buying Mr. George Hudson an annuity has reached 1500*l.* The report that the British residents in Paris had subscribed 6000*l.* in aid of the fund is contradicted.

USK.—At the Petty Sessions, on Friday, Thomas Rosser, who was charged with the murder of Jane Edwards, in this town, in June, 1867, was committed for trial by the magistrates on his own confession. The evidence of Dr. Boulton, who made the *post-mortem* examination of the exhumed body, showed that there was no fracture of the skull, but the woman might have sustained concussion of the brain without the skull being fractured.

UXBRIDGE.—On Tuesday evening a man of weak intellect, named Frederick Redrup, aged 32, who is respectably connected in the town, was murdered by William Murray, described as a bricklayer, though he has done no work for some time, and has generally been seen loitering in the streets or drinking in taverns. On Tuesday the prisoner and deceased were drinking at several public-houses, but no one saw them quarrelling or knew that there was any animosity between them. Murray was seen leading Redrup through the streets towards the house of the former, both being tipsy. At half-past 6 he left the house alone and went to the market-place, where he said that he had killed deceased. Several persons at once went to the house, and found Redrup on the floor, covered with blood. A razor was found lying on a chair near deceased, engraved with the name "Murray." The deceased's throat was cut from side to side. Murray was at once apprehended, and taken before the magistrates, who remanded him to Thursday, when he was committed for trial. The only apparent motive for the crime was the desire to obtain a few shillings which the deceased had, though he had been heard to threaten vengeance on some one a few days previously. On Wednesday evening another very sad case of homicide occurred at Uxbridge. Two lads about 14 years of age, were errand boys at a fish shop, and are stated to have always been good friends. On Wednesday evening, one of them named Parr was handling a clam on the stall, when the other, Jockham, told him to let the fish alone. Parr then playfully gave Jockham a blow and ran away, upon which the latter threw a knife after him. The blade unfortunately entered his side, and inflicted a wound which almost immediately proved fatal. The magistrates on Thursday committed his assailant for trial on the charge of Manslaughter.

YARMOUTH.—A young man called Edward Hastings Forder, very respectably connected, was brought before the magistrates last week, charged with the murder of his aunt, Susanna Hastings. It appeared that the prisoner, who had led a dissolute life, went to the residence of his relative and demanded money. The demand was refused, whereupon he struck Miss Hastings a fearful blow under the right ear with his fist, from the effects of which she died a few hours afterwards. The prisoner was remanded for a week. The jury at the inquest returned a verdict of Manslaughter against him.

YORK.—Edward Simpson, more widely known as "Flint Jack," is said to be driving a good trade in Yorkshire just now. A few days ago he called at Pumber, when he told Mr. Mortimer that he had within a few days converted about 60 flint splinters (flakes) into arrow-heads, besides making about a dozen stone axes from the hard blue whinstone. These he had mostly sold in York. Another individual has commenced the trade, and has carried more than 50 arrow-heads into Melton, where the trade seems to be very brisk.

Ireland.

CARDINAL CULLEN ON THE IRISH UNIVERSITY.—Cardinal Cullen, in an address at the University on Friday, condemned the present state of education, and said that if the Government were to mutilate by the Lords as to render the education of the nation, they would have a further reason for their unpopularity.

THE FENIAN PRISONERS.—A number of Fenian prisoners have been held in Ireland to demand the release of all the Fenian prisoners. Meetings were held at Cork, Mullingar, Drogheda, and other towns, and a procession marched to them in military hue, carrying flags. In the Rotundo at Dublin they assembled, where they were addressed by Butt, Q.C., who said that the motto of the Fenians should be—"Bide your time, put your powder dry." If Government were to retain the prisoners any professional assistance was useless. Mr. Williams, of Dunmore, said that justice of the English Government was refused let the blood be on their own heads, and not advocate a resort to the sword, that was out of time.

THE LATE FENIAN RAID FOR ARMS.—was held at Cork last week on Andrew Gray, who was shot by Mr. Gray on the 15th ult. in a Fenian raid for arms. The jury returned a verdict of Justifiable Homicide and praised Mr. Gray for their bravery and humanity.

THE MONAGHAN RIOTS.—At the Petty Sessions on Wednesday, the trial of John M. H. for the murder of James Clark, at Monaghan last, was concluded. The jury, after some time in deliberation, returned a verdict of murder, but found the prisoner "guilty of homicide." His lordship stated that he was "Not guilty." The people cheered for his release.

THE RIOT AT PORTADOWN.—The funeral of a man named Watson, shot by the police at Portadown, they had been stoned and driven back by the 1st inst., took place on Monday last. 8000 persons joined in the procession. The men, although the deceased was not one of them, were draped in sashes. There were great numbers of spectators present, all of whom were quiet. The funeral was postponed until after the inquest, and opened on Wednesday before the coroner, magistrates and adjourned.

ANOTHER OUTRAGE IN TIPPERARY.—Mr. Bradshaw, brother of the gentleman who was assassinated at Cappawhite, narrowly escaped the victim of a deliberate outrage last week. He was about entering his house, in the town, when he was followed by two men inside the gate, who flung with great violence two large stones at him, between 1 lb. and 2 lb. each, at him. Mr. Bradshaw, with two other men, pursued the assailants and discharged a shot from a revolver at them without effect. Both men, after a long chase, were taken and their pursuers got away.

THE MURDER AT MULLINGAR.—The trial of the Exchequer, on Monday, was occupied with the charge against the *Daily Express*, which it is stated occasioned much interest. The charge was the murder of Mr. Anketell, the Midland Railway Company's station-master. This letter addressed to the Exchequer made from the altar of the Protestant chapel by the Rev. Mr. Gogerty, the parson of Mullingar, to Mr. Anketell, and, as it was imputed that Mr. Gogerty had "committed murder." The damages were placed at 1000*l.* strong bar was engaged, Mr. Butt leading the case, and Mr. Macdonogh for the defendant. The witnesses for Mr. Gogerty were Captain Nugent, son of Sir Percy Nugent, high sheriff of the county, and the manager of the National Bank, who both corroborated the plaintiff's case to the words used by him on the occasion, which they said, amounted to a statement that a porter on the line, had been dismissed because he was a Roman Catholic. The jury returned a verdict for the defendant, but exonerated him from any attempt to injure Mr. Anketell. The police were pelted with stones by the crowd, whom were arrested.

MURDER IN DOWNSHIRE.—A singular murder took place at Bellaghy, in the county of Down, last week. A farmer, residing there, was charged with the murder of a female servant, and proceeded to his trial. On his return he found all the doors of his house closed, and a girl lying insensible on the kitchen floor, with her skull blown away, and the brain protruding. He never rallied. It is said that some persons removed a gun from above the fireplace, and fired a shot cap on it, shot the girl, and replaced the cap.

Scotland.

ELECTION OF A SCOTCH PEER.—On Wednesday an election of a Scotch representative peer took place at Holyrood Palace, when the Earl of Kellie was unanimously elected. The Duke of Buccleuch and the Earl of Kellie were the only peers present. The Duke sent proxies.

THE SUTHERLAND GOLD-FIELDS.—The prospect on Kildonan burn were deserted last week by the diggers, who, on the expiry of their respective licences, packed everything up and left for their respective homes. A good many of the diggers have left for the purpose of preparing for the herring fishing, but many of the old colonists

of the small yield of gold at the burn, to extend the ground so as to give them...

At Salsburgh, however, many were obliged to make fair earnings, and as they ran out a good many went for renewals...

		Pigs	.. 3 8-5 8

THURSDAY, July 8

The number of Beasts is small, but the trade is very slow, and a clearance cannot be effected, notwithstanding a disposition to take rather lower than we quote. There are a few more Sheep and Lambs than last week, and the demand is less, consequently prices are lower. Choice Calves are in demand. Our foreign supply consists of 424 Beasts, 3950 Sheep, 494 Calves, and 5 Pigs.

Best Scots, Herefords, &c	5 4 to 5 6	Best Long-wools	5 0 to 5 2
Best Shorthorns	5 0-5 2	Do. Shorn
2d quality Beasts	3 0-3 8	Ewes & 2d quality	4 0-4 4

METROPOLITAN MEAT MARKET.—July 10.

Best Fresh Butter	14s. per dozen lb.
Second do. do.	12s.
Small Pork, 4s. 8d. to 5s. 2d.; Large Pork, 4s. 0d. to 4s. 8d. per 8 lb.		

MARK LANE.—MONDAY, July 5.

We had again a very short supply of English Wheat to this morning's market, and there being a good attendance, it was quickly disposed of at the extreme prices of this day so far, and in some instances brought an advance of 1s. per qr. For foreign there was a better demand at fully last week's rates. Barley was 6d. per qr. dearer. Beans and Peas unchanged in value. The Oat trade was quiet, and in order to effect sales it was necessary to submit to a decline of 6d. per qr. American Flour was 6d. per barrel, and country marks 1s. per sack, dearer.

FRIDAY, July 9.

The weather since the 2nd inst has been fine and warm, with but little sun. Although the weather has improved the growing crops, and was favourable to the Wheat in bloom, the short supplies both of homegrown and foreign in the markets of the kingdom (except Liverpool, where the arrival of foreign Wheat was large), have had a strengthening influence upon the trade generally, and as millers showed a disposition to increase their stocks, we have to report an advance of 1s. to 2s. per qr. on Wheat, but the business transacted was not very extensive. Excepting London, where Oats were rather lower, this article, as well as Spring Corn of all descriptions, has improved in value. Flour was a better sale and the turn dearer. In some markets an advance of 1s to 3s per sack is quoted. Since Friday last the arrivals of grain and seed laden vessels off the coast consisted of 62 cargoes, of which, with those left over from last week, there remained for sale last night 37 cargoes. The amount of business transacted has been large the tone of the market was, on the whole, steady. American, and some of the best descriptions of Russian Wheat, improved 1s. to 2s. per qr. Maize met with a slow sale, Barley remained firm. For forward shipment of Wheat there was more inquiry, at 1s. 8d. per qr. advance. Maize and Barley were not materially altered in value, but Rye was rather cheaper. Beans continue scarce. Paris, July 8.—There is no quotable alteration this week in either Wheat or Flour, but the trade remained firm. The eight marks are quoted at equal to 37s. 3d. per 280 lb. The stock at the Halle is estimated at 7290 cwt.

There was scarcely any English Wheat on offer this morning, and Monday's quotations were fully maintained. The attendance at market was poor, but foreign Wheat met with a fair inquiry, and an advance of 1s. per qr. was generally established upon American and Russian qualities. There was no change in the value of Barley, Beans, or Peas. Oats were a trifle cheaper.

LIVERPOOL, July 6.—We had a fair attendance at our market to day, and a large consumptive business was done in Wheat at an advance of 4d. per cental since Friday. Flour in fair request, and in some cases rather dearer. Indian Corn in moderate request, at prices rather lower than on Friday. Oats firm. Oatmeal in good request at previous rates. Beans and Peas unchanged.

SEED MARKET.

Our markets during the past week have been poorly attended, which is usual at this time of the year. The reports of the growing crops of Clover seed from Germany and France are very bad, and it is predicted there will be very little seed saved. Trefoil is also spoken very badly of, and it is expected we shall have very high prices for this article. Red Clover and Trefoil is in much request for speculation, and we must again report their values gradually advancing. Germany, which supplied us with so much Red this last season, is now importing at fully 16s. per cwt. more to hold on speculation. Dwarf sowing Rape is again 2s. per qr. dearer, it is in good demand and short supply. The demand for Mustard is not so good, but prices are firm. New Trifolium is offering at moderate prices. There is no change in the value of Canary and Hemp.—JOHN SHAW & SONS, 16, WATER LANE.

NOTICE.—MANCHESTER EXHIBITION.

ORMSON'S NEW PATENT ECONOMIC BOILERS,

CONSISTING OF

- ORMSON'S CONCENTRIC SADDLE BOILER,
- ORMSON'S CONVOLUTED BOILER,
- ORMSON'S TUBULAR BOILER.

These three new forms of Boiler, made of the best Wrought Iron, in which the flame is concentrated on the largest amount of direct heating surface, in the smallest cubical space of any Boilers before the public, will be exhibited in the Royal Horticultural Society's Show Ground, Manchester, during the forthcoming exhibition.

FROM THE "SCIENTIFIC REVIEW,"
 of April 1, 1869.

ORMSON'S PATENT CONVOLUTED WELDED WROUGHT-IRON BOILER.—Mr. Henry Ormson, of Stanley Bridge, Chelsea, has recently patented a Hot-water Boiler, the great merit of which is the retention of the fire, and consequent exhaustion of its heating power on the various heating surfaces of the boiler between the water spaces

allowing it to pass up the chimney. On looking at the boiler from the back end, which is closed by a water chamber or jacket, forming the outer case and top of the boiler, it has the appearance of an elongated cube, slightly rounded at the top; but, from the front, it not only shows the outer water-chamber, forming the fire-box, in direct contact with the fire, but two convoluted surfaces, between which the flame must pass; besides the furthest end, which has already been explained, being terminal, it not only checks the heat from passing away direct, but receives its full force, whilst the inner water-chamber is subjected in every part to the maximum of heat, and so is the inner surface of the other parts of the boiler. Being set in a chamber of brickwork, it is evident that no appreciable loss of heat can ensue, consequently it must be most economical in consumption of fuel. These boilers vary somewhat from the illustration, according to their size. They are adapted for heating horticultural buildings, mansions, churches, public buildings, &c., and, being made of wrought-iron, on the most improved system of welding that material, are very safe, and extremely powerful boilers.

GREEN'S IMPROVED PATENT ROLLER

FOR **LAWNS, DRIVES, BOWLING GREENS, CRICKET FIELDS, and GRAVEL PATHS** SUITABLE FOR HAND OR HORSE POWER.

PRICES OF **HAND ROLLERS.**

Diam.	Length.	£ s. d.
30 inches	32 inches	7 10 0
24 inches	26 inches	4 10 0
20 inches	22 inches	3 10 0
16 inches	17 inches	2 15 0

PRICES OF **ROLLERS** FITTED WITH SPACINGS Suitable for Pony or Horse Power.

Diam.	Length.
30 inches	32 inches
30 inches	36 inches
30 inches	42 inches
30 inches	48 inches
30 inches	60 inches
30 inches	72 inches
30 inches	84 inches

These Rollers possess many advantages over all others; they are made in two parts, and are free from the axis, affording greater facility for turning, and the outer edges are rounded off, or turned inwards, thus removing the unsightly marks left by other Rollers. They are manufactured of the best materials, and are of a construction surpassing any ever yet brought out. The Rollers 24 by 26 inches, 20 by 22 inches, and 16 by 17 inches, are made in one part, at a reduced price; and, for Rollers of that size, will be found to answer many purposes, the handle can be reversed to either side of the Roller at pleasure.

PRICES—24 in. by 26 in., £4; 20 in. by 22 in., £3 2s. 6d.; 16 in. by 17 in., £2 15s.

Delivered Carriage Free to all the principal Railway Stations and Shipping Ports in England.

GRAY'S OVAL TUBULAR BOILER.

INTERNATIONAL EXHIBITION, CLASS IX., No. 2119.

Mr. GRAY begs to call the attention of the Nobility, Gentry, Nurserymen, Gardeners, &c., to his

NEW OVAL TUBULAR BOILER,

acknowledged by practical judges to be a great improvement on every form of Tubular Boiler yet introduced. It proves itself superior to all other Boilers for quickness of action and economy of fuel, doing its work with less the amount required by any other.

Extract from Report in GARDENERS' CHRONICLE of International Exhibition, May 24, 1862, page 476.

The oval form of Boiler is usually made on a circular plan, rather than a square, it seems desirable that the Boilers on the oval plan should bring the tubes more completely within range of the burning fuel, and this being so, the change, though a slight one, is no doubt an improvement.

They are made of all sizes, which, with prices, may be had on application.

Home News.

THE COURT.—The Queen and Royal family continue at Windsor Castle. On Friday morning Prince Albert Victor, Prince George, Princess Louisa, and Princess Victoria of Wales, left the Castle for London. In the afternoon the Right Hon. H. A. Bruce, Secretary of State for the Home Department, had an audience of the Queen, and presented to her Majesty the following gentlemen, who received the honour of knighthood:—Mr. William Tite, Mr. Thomas Duffus Hardy, Mr. James Meek, Mr. Peter Coats, Mr. Joseph Heron, and Mr. Richard Davis Hanson, late Chief Justice of South Australia. The Queen afterwards held a Council. Earl de Grey and Ripon and the Right Hon. J. Bright had audiences of her Majesty. Sir Andrew Buchanan had an audience of the Queen, on returning to his post as Ambassador at St. Petersburg. Mr. Charles Alison, Minister at Teheran, had an audience on his return from Persia. The Duchess of Cambridge, M. de Beaulieu, the Belgian Minister, and Viscount Sydney, arrived at the Castle on a visit. On Saturday the Queen, accompanied by Princess Christian, drove out and visited the Ladies Murray at Ashurst Lodge. Princess Louisa drove to Twickenham, and visited the Duke and Duchess d'Aumale at Orleans House. The Duchess of Cambridge and the Belgian Minister left for London. Prince Arthur arrived from Greenwich Park. Earl Granville arrived on a visit. On Sunday morning the Queen and Royal family attended Divine service in the private chapel. The Rev. F. Pigou, incumbent of St. Philip's, Regent Street, preached the sermon. On Monday morning Prince Arthur, Earl Granville, and Viscount Sydney left for London. In the afternoon the Archduke Rainer and the Archduchess Marie of Austria visited her Majesty, and afterwards drove in the Park with Prince and Princess Christian. Princess Louisa went to London, and was present at the debate in the House of Lords. Her Royal Highness afterwards returned to Windsor. On Tuesday Princess Beatrice drove to Bushey Park, and visited the Duke of Nemours and Princesses Marguerite and Blanche of Orleans. In the afternoon the Queen went out with Princess Louisa, Mdle. Musurus and the Mdles. Balouka and Cassandra Musurus arrived from London on a visit. On Wednesday the Duke of Argyll and the Right Hon. A. Layard arrived on a visit. On Thursday afternoon Mademoiselle Titiens, Signor Gardoni, and Mr. Santley sung before her Majesty and the Royal family.

THE PRINCE and PRINCESS of WALES.—On Friday evening their Royal Highnesses dined with the Marquis and Marchioness of Hamilton at their residence in Green Street. On Saturday evening the Prince and Princess went to the Royal Italian Opera, Covent Garden. On Sunday the Prince and Princess attended Divine service at the Chapel Royal, St. James. The sermon was preached by the Rev. Canon Harvey. On Monday morning the Prince and Princess were present at the marriage of Viscount Downe with the Lady Cecilia Molyneux, at St. Paul's, Knightsbridge. Their Royal Highnesses were afterwards present at the *déjeuner* given by the Earl and Countess of Sefton at their residence in Belgrave Square. In the evening the Prince and Princess were present at a ball given by Lord and Lady Rendlesham, at their residence in Grosvenor Square. Prince Louis of Battenberg arrived at Marlborough House on a visit to their Royal Highnesses. On Tuesday the Prince and Princess went to Watford, where his Royal Highness laid the foundation stone of the London Orphan Asylum. In the evening the Prince dined with the Marquis of Huntly. The Princess, accompanied by the Princess Teck and Prince Louis of Battenberg, went to the Royal Italian Opera, Covent Garden. On Wednesday morning the Prince and Princess, accompanied by Prince Louis of Battenberg, were present at the marriage of the Marquis of Huntly to Miss Cunliffe Brooks at Westminster Abbey. The Prince was afterwards present at the wedding-breakfast given by Mr. Brooks at his residence in Grosvenor Square. In the afternoon the Prince and Princess, accompanied by Prince Louis of Battenberg, were present at a party given by Lady Holland, at Holland House. In the evening their Royal Highnesses went to a ball given by the Duke and Duchess of Wellington at Apsley House. On Thursday Prince and Princess Christian visited the Prince and Princess at Marlborough House, and remained to luncheon. In the evening the Prince and Princess dined with Maria Marchioness of Ailesbury at her residence in Hertford Street, Mayfair. Prince Louis of Battenberg left Marlborough House for Portsmouth. Yesterday afternoon the Prince and Princess visited the Queen at Windsor, and afterwards returned to town.

THE DUCHESS d'ALENCON, wife of the eldest son of the Duke of Nemours, and sister to the Empress of Austria, was safely delivered of a princess on Friday morning at Bushey House, Bushey Park.

THE CABINET.—A Cabinet Council was held on Saturday in Downing Street.

THE CONSERVATIVE PEERS.—A protest against the third reading of the Irish Church Bill, including eight reasons why the Bill should not pass, has been signed by the Earl of Derby and 46 other Peers.

Foreign.

FRANCE.—A Council of State was held at St. Cloud on Monday, and in the sitting of the Legislative Body, on the same day, M. Rouher, Minister of State, read the following message from the Emperor:—
"Messieurs les Députés, — On the 18th of June my Government informed you that on the opening of the next ordinary

session it would place before the representatives of the resolutions and projects which it considered to be answering the wishes of the country. It appears to be anxious to know immediately decided on by my Government. I therefore intend to anticipate its aspirations. The Government is convinced that my firm intention is the extension compatible with the Constitution, and I hereby make known that we have decided on in council. The Government will soon as possible to examine the Right of the Corps Législatif to make its committees. Simplification of the and examining amendments charged to submit to legislative propositions which in future may be submitted. 4. Voting of the budget to render the control of the Chamber more effective of the constitutional enactment. I qualify a deputy from becoming a Minister, fulfilling certain other public functions, right of interpellation. My Government will more efficacious solidarity which will establish Government and the Chambers the same time the functions of minister and the presence of all the Ministers in the Chamber, Council of the affairs of the State and with the majority, constitute for the country which we in our common solicitude have already shown you several times to the public, I am disposed to give up which belong to me. The modifications on proposing are the natural level of successively been made in the institutions they must, however, leave intact the people have more explicitly confided to are the essential conditions of a power and society. Done at the Palace of St. Cloud, July, 1896.

This message was favourably received, and concluded the reading of it amid cries of "the Emperor!" MM. Martel, Bourgeois, Beauchamp, Terme, and Payresse, all majorities, were elected secretaries of the large preponderance of votes. After the been read, the Ministers placed their hands of his Majesty, by whom they were The Ministers will, however, continue to duties of their respective offices until they shall be appointed. In the evening the the *tiers-parti* held a meeting at the Grand. Nearly all who had signed the intended were present. A resolution was unanimous to the effect that under the present circumstances was no necessity to press their interpellations. Tuesday two Imperial decrees were published, convoking the Senate on August 2, for a session, and the second proroguing the Legislative Body. The time for the re-assembly of the Legislative Body will be fixed subsequently the sitting of the Legislative Body on Tuesday report of the previous day's proceedings. read, M. Jules Favre protested against the relation between the Imperial Message and the proroguing the Chamber. He said—"The itself an impropriety." This statement caused loud protests and cries of "Order." Thereupon called M. Jules Favre to order. continued, however, and was cheered by the Left, but the noise prevented him from The President again called him to order. "I am astonished that on the morrow of a act a protest should be raised not only regulations of the House, but contrary to the interests of the country." A conversation ensued between M. Giraud, Pelletan, and others, relative to the conditions which had not been declared valid, and the President had read the decree proroguing the deputies separated in silence. With regard to Ministerial resignations, it is said that the of M. Rouher is absolutely definitive, and that he has gone to Sercey. It is stated that the M. de Lavalette, Minister for Foreign Affairs; M. de Minister of Public Worship; and M. Grévy, Minister of Public Works, will also leave the Ministry. reference to their successors, it is rumoured that Napoleon will be appointed President of the of Ministers; that the Prince de la Tour will succeed M. de Lavalette, who will succeed M. Ollivier has refused any portfolio. M. de Roquette the Ministry of the Interior, M. de Genouilly the Ministry of Marine, and Niel the Ministry of War. Amongst the mentioned as likely to figure in the new Ministry, MM. Segrès, Louvet, Chevandier de Boisjoly, MM. Busson-Billault, Nogent Saint-Laurent, de Lhuys, and the Marquis de Talhouët. It is thought that other portfolios will be offered to three of the Left Centre, and that M. Rouher will retain the Presidency of the Senate. The Journal comments on the reforms promised in the Message, thinks it is impossible to understand the meaning, and says that it would be ungrateful for them.

SPAIN.—The New Ministry has been constituted. Senor Ardomez will enter the as Minister of Finance, Senor Zorrilla as Minister of Justice, Senor Ecebagaray as Minister of Works, and Senor Becerra as Minister of Mines. The other members of the present Ministry retain their portfolios. On Wednesday presented the members of the new Cabinet to the Cortes. He remarked that the new Ministry constituted from the ranks of the majority, and declared, on behalf of the new Ministry, that it would uphold at any cost public respect for the Constitution. The Minister of Finance, has ordered that the Deferred Debt shall be considered the Internal Consolidated Stock, and that shall be but one quotation for both.

In Birmingham, 23 in Liverpool, 26 in Manchester, 19 in Salford, 19 in Sheffield, 21 in Bradford, 21 in Leeds, in Hull, 21 in Newcastle-upon-Tyne, and 30 in London. In Paris the annual rate of mortality in the week ending Saturday the 10th inst., was 22 per 1000. In Vienna was 28 per 1000 during the week ending the 8th inst. In London the births of 1022 boys and 973 girls, in all 1995 children, were registered in the corresponding weeks of 10 years. The average number, corrected for increase of population, was 2047. The deaths registered in London during the week were 1279. It was the 27th week of the year and the average number of deaths for the week, corrected for increase of population, was 2047. The present return is therefore 71 below the average amount.

Provincial.

BIRMINGHAM.—Two more bodies were got out of the pit on Friday. They were those of Matthew Long and George Long, married men, who were among the sufferers at the great explosion in December, 1867.

BRISTOL.—A conviction under the Sea Birds Act occurred in this town on Saturday. Mr. Frazer, a rubber manufacturer, of Sheffield, was charged before a bench of East Yorkshire magistrates with having shot 23 seagulls at Flamborough Head. The defendant was fined in the mitigated penalty of 2s. 6d. per bird, and 9s. costs. The full penalty for each bird is 14s.

MANCHESTER.—The approaching visit of the Prince and Princess of Wales is exciting great interest in this city. In consequence of the wish of their Royal Highnesses that their visit should be considered as much as possible a private one, triumphal arches and similar demonstrations of loyalty will not be encouraged. The route has also been changed for the visit to Manchester on Tuesday to Wednesday. Their Royal Highnesses will arrive at Worsley, the seat of the Earl of Ellesmere, on Monday. On Tuesday they will go by barge on the Bridgewater Canal to the Royal Agricultural Exhibition at Old Trafford, and partake of a luncheon, at which the Earl of Selson will preside. Afterwards their Royal Highnesses will return to Worsley, by the route to dinner. In the evening a party, consisting of leading members of the Royal Agricultural Society, and of the corporate authorities of Manchester and Salford, will be invited to meet them. On Wednesday morning for Peel Park, Salford, where the Mayor of Salford will present an address. They will proceed thence to Manchester, and visit the monument erected to the late Prince Consort. At the Town Hall they will receive an address from the Corporation, and then pay a final visit to the Exhibition. In the afternoon evening their Royal Highnesses will leave by rail for Hull.

NOTTINGHAM.—Pursuant to a judge's order to the effect of Notts, a series of sales took place last week. The seat of the Duke of Newcastle. There was an exceedingly numerous attendance of buyers from all parts of the country, and the bidding was spirited. Upwards of 6000 bottles of wine were sold, but the prices were not particularly high. A pig was very valuable, and created great interest in competition. There were about 20 silver cups, and for poultry, which fetched from 7s. 6d. to 10s. 6d. The Brighton Race Cup, weighing over 500 lbs., and valued at 500l., only made 64 gs. The Wood Cup, 1868, was bought for 131 gs. The Winstley Water Cup, at Shrewsbury, was sold for 60 gs., and the Warwick Cup, 1868, fell for 60 gs. A pair of spaniels were disposed of, making 121 2s the pair. Two fine ewes fetched 100 gs. The furniture was very costly, and realised high prices.

WYNDHAM.—The Queen has deputed the Princess Louise to lay, in her Majesty's name, the foundation stone of the second pair of buildings of the National Hospital for Consumption and Diseases of the Lungs, in this place, on Wednesday, the 28th of July. Preparations are making by the committee, and many noblemen and gentlemen interested in the cause are announced as stewards for the ceremony and the luncheon, at which Lord Eversley, Governor of the Isle of Wight, and president of the committee, will preside.

LONDON.—On Tuesday the Prince and Princess of Wales visited this town, when the Prince laid the foundation stone of the London Orphan Asylum. The Prince has been removed to this neighbourhood. Their Royal Highnesses arrived by the Clapton train at 2 o'clock, and a few minutes afterwards approached the site through a series of triumphal arches, and amid the cheers of a vast number of persons who had assembled in the villages around. The carriage was escorted by a troop of the Hertfordshire Yeomanry, and the Prince and Princess were received by the first battalion of the 1st West Surrey Volunteers, and the ceremony was accompanied by the Earl of Verulam, lord of the county. Their Royal Highnesses were in procession to a dais in a large marquee, which was nearly filled with ladies and gentlemen, and James Capel, one of the original supporters of the Asylum, read a long address to the Prince and Princess, in which he thanked the managers for this new proof of their liberality. His Royal Highness having made a few remarks, the Prince laid the stone with the appropriate rites, and the Bishop of Rochester offered prayers, and pronounced the benediction. The ceremony afterwards laid purses on the stone, and the ceremony concluded with the National Anthem. The Prince and Princess were subsequently entertained at a dinner in an adjoining marquee, at which the Earl of Verulam presided, supported by

the Earl and Countess of Essex, Lord and Lady Chesham, Lord and Lady Ebury, Lord Rokeby, the Bishop of Rochester, and other gentlemen and ladies.

Ireland.

THE ORANGE ANNIVERSARY.—The 12th of July passed over without bloodshed or serious disturbance, though some rioting has taken place since at Belfast, Newry and Lurgan. Besides the three great meetings at Killyman, Tandragee, and Newbliss, smaller but still imposing assemblages were held at Lambeg, Sunfield, Massereene Park, Irvestown, Dromore, and Coleraine. At Killyman 25,000 persons were present—an immense procession, with flags, and bands playing "Boyne Water." Shots were fired. Many ladies were present, wearing Orange colours. The platforms were decorated with lilies and banners. Mr. Johnston and others spoke. At Sunfield, near Belfast, more than 30,000 Orangemen from the north of county Down assembled to protest against the Irish Church Bill and Party Processions Act. The Earl of Roden was announced to preside, but from failing health could not do so, and in his absence Mr. William Beers, Grand Master, county Down, took the chair. A long letter was read from Lord Roden, expressing his attachment to the cause, and denouncing the Government manifestoes. Mr. William Keown, M.P. for Downpatrick, announced his intention of supporting Mr. Johnston's bill. At Lambeg, over 20,000 persons assembled, under the presidency of Mr. Crommelin Irwin. At Antrim, 8000 to 10,000 assembled, under Lord Massereene and Ferrard, who thought that at this crisis every Protestant should become an Orangeman. At Grey Abbey, 5000 assembled, under the Chancellor of Down Cathedral. At Derry there was no public demonstration, but in the evening the opposite parties paraded the streets, and a scuffle occurred. The constabulary, however, soon restored order. At Irvingstown, Enniskillen, a great demonstration was held at the Lake Erne Hotel; 10,000 persons were present. The processions marched with flags and 20 bands, playing party tunes. Shots were fired and speeches delivered. No police were present. The Lodges marched home in procession, with colours. Strong resolutions against the Government and the Irish Church Bill were passed at all these places, and at each place reported on. The brethren marched to the ground with flags flying, drums beating, and insignia donned, the Party Processions Act being openly treated with contempt. At night there was a crowded and enthusiastic meeting in the Rotunda at Dublin, where there was a great display of Orange insignia. Mr. Thomas F. Calbeck, District Grand Master, was in the chair. Several exciting speeches in favour of "No surrender" were delivered. The meeting passed off peaceably, but there was some disturbance in the streets; a gentleman and two ladies wearing Orange emblems were stopped, and the ladies' bonnets torn off, and the windows of St. Bride's Church were broken.

ATTEMPTED ASSASSINATION IN GALWAY.—On Saturday evening, as Captain Lambert, of Castle Lambert, near Athenry, county of Galway, was close to his residence, he was fired at five times and dangerously wounded by a man lurking among the trees. Captain Lambert received four shots—two in the stomach; one broke his watch chain and indented his watch, and the fourth struck him in the temple. It is expected that he will recover. The slug has been extracted. The revolver was imperfectly charged. The supposed assassin, Peter Barrett, was arrested at Woodlawn Station, and fully identified by Captain Lambert. He was a clerk in the General Post-office, London, and son of a farmer who was lately evicted from the estate.

THE REPEAL AGITATION.—Placards were posted at Cork on Friday, advising the Orangemen of the North to sink party differences, unite with the people of the South in the common cause, and wear orange and green. A letter appeared simultaneously in the *Evening Mail* from Mr. T. W. Macartney, Sheriff of Armagh county, boldly urging a union of Roman Catholics and Protestants with the object of procuring "an Irish House in College Green."

Sporting.

THE ETON AND HARROW CRICKET MATCH.—This match commenced at Lord's on Friday, in the presence of a most brilliant assemblage, there being not fewer than 12,000 persons present, many of whom were members of the highest circles of rank and fashion. It was the 45th match, and out of those played previously Harrow had won 21, Eton 19, and four had been drawn. On Friday Eton had the first innings, and made the large score of 237. Harrow having only obtained 91, had to go in against the 145 yet remaining to be rubbed off, and when the play ceased for the evening they had obtained 23, with the loss of one wicket. The match was renewed on Saturday in the presence of nearly 5000 visitors, when Eton won in a single innings.

Obituary.

LORD TAUNTON died suddenly on Tuesday afternoon, after an illness of only a few hours. On Tuesday of last week he spoke in the debate on the Irish Church with even more than his usual impressiveness and authority: he spoke again shortly on Friday. Although he did not attend the House on Monday, he drove out in an open carriage, and it was only on Tuesday that the fatal attack appeared. Although never in the first rank of poets, Lord Taunton's career had been distinguished by one of high distinction. Born in 1799, he took a first class in classics at Oxford in 1820, and was early initiated into the study of law. He was a Lord of the Admiralty from 1832 to 1834, Vice-President of the Board of Trade from 1835 to 1838, and then for a short time Under Secretary of the Colonies, and then, returning to his former office, but with augmented rank, President of the Board of Trade from 1839 to 1841. He was Chief Secretary for Ireland from July, 1840, to July, 1847, and including, therefore, a large portion of the famine period, and including, therefore, a large portion of his old place at the Board of Trade, which he filled from 1847 until 1852, during which he took a leading part in the repeal of the Navigation

Laws. In 1855 he became Secretary of State for the Colonies, which office he held until 1858, and in the following year he was raised to the Peerage as Lord Taunton, a title which he assumed in compliment to the borough he had represented for nearly 30 years. His last public employment was as Chairman of the Endowed Schools Commission. Although he sat 10 years in the House of Lords, Lord Taunton will be best known as Mr. Labouchere, under which name the longer as well as the more active portion of his political life was spent. Before entering Parliament he travelled in the United States and in Canada with the Earl of Derby and the present Speaker of the House of Commons, and both by material interests and by sympathy he was largely connected with America. He was twice married; first to a daughter of Sir Thomas Baring, and sister of Mr. Thomas Baring, M.P., and, secondly, in 1852, to Lady Mary Howard, daughter of the sixth Earl of Carlisle, who survives him. He had several daughters by his first marriage, but his left no son. The title, therefore, is extinct.

LORD KENYON died on Wednesday last at Eastbourne. He was the eldest son of the second peer, by the only daughter of the late Sir Thomas Hamner, Bart., and was born in 1803. He was educated at Christ Church, Oxford, where he graduated B.A. in 1826, and M.A. in 1829. He married in 1833, the fourth daughter of the 4th Lord Walsingham, and leaves by her a numerous family. He is succeeded in the honours and estates by his grandson, born in 1864, and the only child of the Hon. Lloyd Kenyon, who died in 1865, by the daughter of Mr. J. R. Ormsby Gore, M.P.

LADY DUFF-GORDON died at Cairo on the 14th inst. She was the wife of Sir Alexander Cornwallis Duff Gordon, Bart., and the only daughter of Mr. Austin, Q.C., and Mrs. Sarah Austin, the well-known authoress. She had long been unwell, and intended to reside in Egypt, the air of which was considered favourable to her health. It will be recollected that during the late excursion of the Prince and Princess of Wales up the Nile their royal Highnesses paid her a visit at her kloek near the First Cataract.

MR. WILLIAM JERDAN, formerly for many years editor of the "Literary Gazette," died on the 11th inst. at Bushey Heath, in his 88th year. A native of Kelso, and educated at Edinburgh for the Scottish law, he came to London to push his way in literature. Of his varied fortunes in this precarious profession he has given a record in his *Autobiography*, published about 15 years ago. With most of the literary and scientific men of the last 50 years he had personal acquaintance, and with some of the highest mark in literature and politics he was on terms of intimacy. An interesting volume of personal recollections, entitled "Men I have Known," appeared two years ago, inscribed to the then Chief Baron, Sir Frederick Pollock, also a Borderer, with whom Mr. Jerdan since boyhood had maintained an unbroken friendship. It was Mr. Jerdan, who, in the lobby of the old House of Commons, scolded Bellingham, the assassin of Mr. Perceval. He was at that time one of the reporters for the Press, so that his connection with periodical literature continued for half a century. In recent numbers of *Fraser's Magazine* are contributions from his pen, and the last two parts of the *Gentleman's Magazine* contain an article on the celebrated Beef-Steak Club, which no other living man could have written from personal knowledge. For several years recently he has contributed to the *Leisure Hour* a series of reminiscences of distinguished men, illustrated by characteristic letters. Of the Royal Literary Fund in its early days he was a zealous advocate, and by his influence greatly aided its prosperity. Late in life he received a pension of 100l. a year for his services to literature.

Markets.

COVENT GARDEN.—July 17. The prices for best fruit have somewhat receded, as the supply has been much heavier again during the past week, and the demand is much slower from the northern and midland markets. Vegetables are abundant and good. Flowers consist of Orchids, Pelargoniums, Hydrangeas, Calceolarias, Roses, Mignonette, Heliotropes, Fuchsias, Pinks, Carnations, Cooks-combs, Kalosantes coccinea, Rhodanthe Mangleaif, Campanulas, and Lilliums, &c.

FRUIT.

Apricots, per doz., 2s to 3s	Melons, each, 3s to 6s
Cherries, per lb., 6d to 1s	Nectarines, per doz., 8s to 12s
Figs, per doz., 6s to 10s	Oranges, per 100, 8s to 14s
Grapes, per lb., 3s to 8s	Peaches, per doz., 12s to 24s
Kent Cobs, per lb., 1s to 1s 6d	Pine-apples, per lb., 4s to 6s
Lemons, per 100, 6s to 10s	Strawberries, p. lb., 1s to 3s

VEGETABLES.

Artichokes, green, p. doz., 2s	Lettuces, p. score, 1s to 1s 3d
Beans, Kidney, p. 100, 1s to 2s	Mint, per bunch, 4d to 6d
Beet, per doz., 6s	Mushrooms, p. pott., 1s 6d to 2s
Cabbages, per doz., 1s to 2s	Onions, green, p. bun, 9d to 1s
Carrots, per bunch, 9d to 1s	Parsley, per bunch, 2d to 4d

Leicester ditto	1 2 to 1 3
Sorts—Clothing	0 10 to 1 6
Combing	1 0 to 1 8

METROPOLITAN CATTLE MARKET.

MONDAY, July 12.
The supply of Beasts is smaller, and two-thirds of it is foreign, consequently choicest English are in demand, but we cannot quote higher prices on the average. There is a very considerable increase in the supply of Sheep, and except for

choicest qualities prices are lower. Choice Lambs are more in demand, but inferior qualities are a heavy trade. Calves are selling about the same as on Thursday last. Our foreign supply consists of 2848 Beasts, 11,710 Sheep, 462 Calves, and 155 Pigs, from Ireland there are 50 Beasts; from Norfolk and Suffolk, 150; and 1250 from the Midland and Home Counties.

	a. d. s. d.	s. d. s. d.
Best Scots, Herefords, &c.	5 4 to 5 6	Best Long-wools 5 0 to 5 2
Best Shorthorns	5 0 - 5 2	Do. Shorn
2d quality Beasts	3 0 - 3 8	Ewes & 2d quality
Best Downs and Half-breds	5 4 - 5 6	Do. Shorn
Do. Shorn	Lambs
Beasts, 4300; Sheep and Lambs, 30,110; Calves, 505; Pigs, 255.		Calves
		Pigs

THURSDAY, July 15

The number of Beasts is about the same as on Thursday last; the trade is more active, and in some instances rather higher prices are obtained. The supply of Sheep and Lambs is smaller, yet quite sufficient for the demand; prices are the turn better for choicest qualities. There is a large supply of Calves, yet choicest kinds are not over plentiful, and command high rates. Our foreign supply consists of 425 Beasts, 3790 Sheep, 602 Calves, and 50 Pigs.

Fresh Butter	1s. 0d. to 1s. 8d. per lb.	

MARK LANE.—MONDAY, July 12.

The very short supply of Wheat to this morning's market enabled factors to obtain an advance of 1s. to 2s. per qr. upon the prices of this day se'nnight. There was a moderate attendance, and foreign Wheat was generally held for 1s. per qr. improvement, at which a fair amount of business was transacted. Barley, Beans, and Peas were unaltered in value. Fine stout Oats brought last week's quotations, but Russian qualities were 6d. per qr. cheaper. The nominal top price of Flour was unchanged, but town household and country marks were 1s. to 2s. per sack, and American 6d. per barrel dearer.

FRIDAY, July 16.

The weather since the 2d inst. has been remarkably favourable for the growing crops. The supplies of both home-grown and foreign Wheat have been small in the markets of the United Kingdom (excepting the arrivals from America into Liverpool, which were very large), and the trade, owing chiefly to the desire of country millers to get into stock, has been strong, at a further advance of 1s per qr. Since the 13th inst. some of our leading markets showed symptoms of weakness, and any desire to realise produced a slight reaction from the late highest rates. We estimate the advance on Wheat realised early this week, compared with the lowest rates of June, at nearly 5s. per qr. Russian Oats in London have declined about 1s. per qr., but in most other markets this grain, and all other sorts of Spring Corn, have been slightly dearer. Flour was a fair sale at 6d. per barrel and 1s. per sack advance, but the trade was far from active. The arrivals of grain and seed laden vessels off the coast since Friday last consisted of 78 cargoes, of which, with those left over from last week, there remained for sale last night 30 cargoes. The floating trade was steady early in the week, but during the past day or two it was dull, and prices of Wheat were against sellers, whilst Maize and Barley off the coast improved slightly in value. In Rye there was nothing doing. Wheat on passage and for forward shipment was a very quiet trade, at barely late quotations. Maize and Rye met with a strong demand, and Barley remained at about the former value. The arrivals of all grain are moderate, with the exception of foreign Oats, which are liberal. There was a very thin attendance at this morning's market, and but little business transacted either in English or foreign Wheat; the few sales made were generally at a slight reduction upon Monday's quotations. Spring Corn of all descriptions was unchanged in value.

LIVERPOOL, July 13.—We had a fair attendance at our market to-day, and white Wheat was sold to a moderate

extent, at the prices of Friday last; but red kinds were rather easier. Flour quiet, at last Friday's rates. Indian Corn in fair request, at an advance of 3d. to 8d. per qr. Oats firm. Oatmeal inactive, but prices unchanged. Peas slow to sell, at recent extreme rates.

SEED MARKET.

There is but little to report this week concerning the agricultural seed trade, our markets now being very poorly attended, and an exceedingly small amount of business doing. Clover and Trefoil seeds are held with great firmness, and the impression continues to gain ground that especially for the latter description much higher prices must prevail. Sowing Rapeseed is still advancing in value, and fine parcels are unusually scarce. For white Mustard seed small orders come to hand, which are executed at full rates. Canary and Hemp seed move off steadily at last week's currencies. Trifolium incarnatum of the new crop is offering at reasonably low prices, but we do not anticipate this season the unprecedented demand for this article which prevailed last fall. For other kinds of seeds values, in the absence of business, are nominal.

JOHN SHAW & SONS, 16, WATER LANE.

WANTED, a NURSERY GROUND FOREMAN.—Apply by letter only, stating age, salary expected, and previous engagements, to S. GLENDINNING AND SONS, Chiswick Nurseries, W.

WANTED IMMEDIATELY, a First-rate FOREMAN, at Meadow Bank.—A Man of general activity and intelligence is in request. Terms on application.—Apply, with references or testimonials, to Mr. ANDERSON, Meadow Bank, Uddingston, N.B.

WARNER'S CRYSTAL PALACE FIRE ENGINE, or PORTABLE FORCE PUMP.

Price on Barrow, with Branch Pipe, Spreader, Unions, and Suction Rose, £5.
1 1/2-in. 2-ply Rubber Suction Pipe, per foot, 2s. 2d.;
1 1/2-in. ditto Delivery Hose, 1s. 4d.

Crystal Palace, Sydenham, March 2, 1869.
Messrs. WARNER & SONS.
"GENTLEMEN,—I feel great pleasure in stating that I was present at a trial of your small Crystal Palace Fire Engine, and was much pleased with its efficiency and simplicity. The Pump throws out a steady jet of water to a height of 50 feet with very little labour. The Pump we have is well made, very simple in its parts, and not likely, I think, to get out of order. The advantage of this pump is its being very portable. Besides being a good Fire Engine, it will make an excellent Garden Engine. I remain, gentlemen, yours obediently,
"EDWIN ROSS, Engineer to the Crystal Palace Company."

PORTABLE PUMP With Improved Valves for Liquid Manure, £2 15s.
2-inch Flexible Rubber Suction Pipe, in 10, 12, and 15 ft. lengths, per foot, 2s. 6d.

JULY 21 1869

Price 12s. Two Vols., foolscap 8vo, cloth, bound in red leather. BRITISH BUTTERFLIES and MANIC... THE NEW GERANIUMS... ORNAMENTAL-FOLIAGED PELARGONIUMS... THE NEW METHOD OF GROWING FRUIT... SOCIETY'S SECOND VOLUME for 1868... ROBERT HARLWICKE, 192, Piccadilly, W

the entire passage from England under sail, with the exception of the Bristol and Endymion, which had to get up steam to reach the anchorage, a calm having prevailed for 18 hours. On the 21st the squadron was joined by the Barossa, and sailed in the evening for Bahia. The Endymion proved herself the worst sailor in the squadron, and caused much detention. The Bristol was nearly as bad.

THE NEW COLONIAL ORDER. A supplement to the London Gazette of the 25th ult., announced that the Queen had extended the Order of St. Michael and St. George to persons who may have rendered important services to the Crown within or in connection with any of her colonial possessions, and had made the following appointments in the Order—H.R.H. the Duke of Cambridge to be Grand Master; H.R.H. the Duke of Edinburgh; Viscount Monk, late Governor-General of Canada; Earl of Derby; Earl Grey; and Earl Russell, formerly Secretaries of State for the Colonies, to be Knights Grand Cross. Colonel Thomas Gore Browne, C.B., late Governor of Tasmania; Francis Hincks, Esq., C.B., late Governor of British Guiana; James Walker, Esq., C.B., Governor of the Bahamas; General Charles Hastings Doyle, Lieutenant-Governor of Nova Scotia; Paul Edmund de Strzelecki, Esq., C.B., Lord Lyttelton, the Right Hon. Frederick Peel, the Right Hon. Charles Bowyer Adderley, and Sir Frederic Rogers, Bart., late Under Secretaries of State for the Colonies; Sir Hercules George Robert Robinson, Governor of Ceylon; Alexander Tillock Galt, Esq., late Minister for Finance in the Dominion of Canada; Henry Taylor, Esq., of the Colonial Department; and Thomas Frederick Elliott, Esq., late Assistant Under-Secretary of State for the Colonies, to be Knights Commanders. Charles Cowper, Esq., late Chief Minister of New South Wales; William Charles Gibson, Esq., late Colonial Secretary of Ceylon; Felix Bedingfield, Esq., late Colonial Secretary of Mauritius; John Bayley Darvall, Esq., late Attorney-General of New South Wales; John Sealey, Esq., Attorney-General of Barbadoes; John Lucie Smith, Esq., Attorney-General of British Guiana; Thomas Skinner, Esq., late Civil Engineer and Commissioner of Roads for Ceylon; Theophilus Shepstone, Esq., Secretary for Native Affairs in Natal; George Macleay, Esq., of New South Wales; and Dr. Ferdinand Mueller, M.D., Government Botanist for the colony of Victoria, to be Companions of the Order.

Foreign.

FRANCE.—Imperial decrees have been published appointing the following as members of the new Ministry:—M. Duvergier, Minister of Justice, Prince de la Tour d'Auvergne, Minister of Foreign Affairs, M. Forcade de la Roquette, Minister of the Interior, M. Magne, Minister of Finance, Marshal Niel, Minister of War; Admiral Rigault de Genouilly, Minister of Marine; M. Bourbeau, Minister of Education; M. Gressier, Minister of Public Works; M. Alfred Leroux, Minister of Agriculture; Marquis de Chasseloup Laubat, President of the Council of State; Marshal Vaillant, Minister of the Imperial Household. The Ministry of State has been suppressed. At a Council of Ministers held on Monday it was decided that the prorogation of the Legislative Body should be maintained. No date was fixed for its re-assembling, but it is rumoured that it will meet again on October 26. An Imperial decree dated on Tuesday appoints M. Rouher President of the Senate for the session of 1869. MM. Duruy and Vuity have been appointed members of the Senate. The Marquis de Lavalette has been definitively appointed Ambassador to the Court of St. James's. Count Armand, First Secretary of Embassy at Rome, has been appointed Chef du Cabinet of the Minister for Foreign Affairs, and M. Mure, Secretary in London, has been nominated Sous-Chef of the same Ministry. The Empress and the Prince Imperial left Paris for Berck-sur-Mer on Sunday. A meeting of the Left was held on Tuesday, when M. Thiers presented and explained a protest which he had drawn up against the attitude of the Government towards the Chamber, and at the same time developed a political programme, which was, however, rejected by the Democratic Deputies present, as being of too Monarchical a tendency. M. Jules Favre spoke in favour of preserving for the present a silent attitude. MM. Picard, Keratry, and Tachard advocated a dissolution of the Legislative Body. This view was, however, opposed by M. Grevy, and no conclusion was arrived at. The *Moniteur* says that the meeting not only led to no result, but revealed, on the contrary, germs of division, antagonism, and rivalry between the Deputies who incline to Parliamentary Government and those who desire a Democracy. A meeting of the members of the Tiers Parti who signed the recent interpellation was held on Tuesday, when it was unanimously resolved to adopt the views and principles laid down in their proposed interpellation, and to adjourn until the re-assembling of the Chamber. The Tribunal of Commerce gave judgment on Monday in the case of the Société Immobilière, declaring the directors responsible to the shareholders, to whom they are to reimburse the whole amount of the bonds bought by them from April, 1865, to April, 1867. The judgment also dissolves the company, and appoints three liquidators to wind up its affairs.

SPAIN.—A plot to assassinate the Regent Serrano, General Prim, and Senor Rivero on a certain day, was discovered on Tuesday. A judicial inquiry is being actively pursued. Tranquillity has not been disturbed. The Regent has left Madrid for the former Royal summer residence at La Granja, and will remain there as long as the state of political affairs will admit. Don Carlos, accompanied by General Eho, has left Paris, and entered Navarre, pursued by the French police to

the frontier. An agitation prevails among the inhabitants of the mountains of Catalonia, and several battalions of Chissours have been sent to preserve order. A Carlist conspiracy has been discovered in Madrid, and 11 officers and serjeants of the Catalonia Regiment were arrested at night on the 19th, and found in possession of appointments from Don Carlos. Arrests have also been made at Valladolid, Burgos, and Cordova. Generals Yucatan, Yucatan, and Orona, and Colonels Alhambra and Carlomagno, and several priests are among those who have been arrested. The Generals will be exiled to the Canary Islands. It was asserted on Wednesday that the Carlists had postponed the execution of their designs. The Madrid journals state that overtures have been made to General Lersundi by the party of Queen Isabella, but that the General has refused to take any share in the projects of that party. In the sitting of the Cortes on the 19th, the proposal to prorogue the session until October was unanimously agreed to. The Cortes thereupon nominated a permanent commission of eight members, in which all the different political fractions are represented.

BRITAIN.—The Court of Assizes of Brussels on Tuesday condemned M. Bachelier to six months' imprisonment and a fine of 200 francs for offences against the person of the Emperor of the French.

HOLLAND.—The Netherlands International Exhibition was opened on the 1st inst. by Prince Henry. An address was delivered by Baron Mackay, President of the Central Committee at the Hague, explanatory of the origin and progress of the exhibition, and the satisfactory manner in which it had been supported in foreign countries. The Prince, in reply, congratulated the commissioners upon the success of their several sections, which his Royal Highness then visited in the order of their arrangement in the palace. The British department being the most forward attracted the greatest attention, and after the British Commissioners and jurors had been presented to the Prince by Baron Mackay, his Royal Highness was conducted by them throughout the British section, and appeared to take a deep interest in those manufactures in which we excel. In the evening a grand banquet was given in the Park Lozale, at which the Prince presided. Covers were laid for 350, and the usual loyal and "Exhibition" toasts were given. The proceedings of the day terminated with a brilliant display of fireworks. There are 14 countries exhibiting, the Netherlands numbering 928, Belgium, 438, France, 308, Great Britain, 201; Austria, 144, North Germany, 129, out of a total of 2325 exhibitors. Mr. Thurlow, attached to her Majesty's Legation at the Hague, has been instructed by the Foreign Office to draw up a detailed report on the Exhibition for presentation to Parliament.

SWITZERLAND.—The National Council, on Wednesday, after a long debate, ratified by a large majority the treaty of commerce with the Zollverein, the convention for the protection of literary property with the North German Confederation, and the treaty with Wurtemberg respecting the law of naturalisation. The Baden Government has signified its willingness to send a representative to the Conference which is to be held at Berno on the St. Gothard Railway question.

AUSTRIA.—The Emperor received on Saturday the members of both the Austrian and Hungarian Delegations. The two Presidents—Prince Carlos Auersperg and Count Majlath—delivered addresses, in which they expressed sentiments of attachment and fidelity to the Emperor. His Majesty, in reply to Count Majlath, said he hoped the Hungarian Delegation, which had been summoned to exercise the influence which the Hungarian kingdom possessed over the common affairs of the State on an equal footing with the Cis-Leithan provinces, would, by its united co-operation, lead to the result of practically maturing the institution of the Delegations by adding to the credit of the monarchy, strengthening peace and confirming the public confidence. In reply to Prince Carlos Auersperg, his Majesty said it would give him sincere satisfaction to see the Delegation of the Reichsrath harmoniously coalescing with the Hungarian Delegation to preserve the power and honour of the Empire, and to develop the welfare and contentment of the different peoples of the Monarchy. His Majesty added that this would always be the surest guarantee for the maintenance of peace at home and abroad, for every State institution required respect and confidence in order to win friends and pre-serve tranquillity. The Archduke Wilhelm has been appointed Commander-in-Chief of the Landwehr in that portion of the Empire which is represented in the Austrian Reichsrath. General Baron Schmerling has been appointed his deputy in command. The German Railway Congress was opened in Vienna on Monday, under the presidency of Privy Counsellor Fournier.

HUNGARY.—The Bills relating to the appointment of judges, the Hungarian Western Railway, and the Hungarian-Galician Railway, have received the Royal sanction. The sittings of the Diet have been adjourned until October.

TURKEY.—The *Levant Herald* states that the French Minister of Foreign Affairs has forwarded a protest to the Porte against the abrogation of the capitulations. Preparations are being made for the reception of the Empress Eugénie at the Beglerbeg Palace. It is asserted that negotiations for the issue of a loan of ten millions sterling are still pending.

GREECE.—The Chamber has assembled, and on the first vote taken on the subject of the election of the members for Corinth the Ministry had a majority of 92 to 53. The Chamber has since concluded the verification of the elections, and the majority of the Government is confirmed.

RUSSIA.—A letter from St. Petersburg announces that Komissarow, who in 1866 saved the life of the Emperor Alexander by turning aside the arm of an assassin, has hanged himself in his hotel, at the age

Home News.

DEPARTURE OF THE COURT FOR OSBORNE.—The Queen accompanied by Prince and Princess Christian, Princess Louise, Prince Leopold, and Princess Beatrice, Prince Christian Victor and Prince Albert of Schleswig-Holstein, left Windsor at 9 o'clock on Tuesday morning for the Isle of Wight, and arrived at Osborne at noon. On Wednesday the Dean of Windsor officiated at a visit.

COURT AT WINDSOR.—On Friday the Prince and Princess of Wales visited the Queen, and remained at Osborne. Their Royal Highnesses left the Castle in the afternoon for Marlborough House. Madame de Meurville and Mademoiselle de Cassandre Musurus were at the Castle for London. The Marquis and Marchioness of Ailesbury and the Marquis of Lansdowne arrived at the Castle on a visit. The Right Hon. W. E. Gladstone had an audience of the Queen. On Saturday Prince Arthur arrived at the Castle at Greenwich Park. Mons, Madame, and Miss Van de Weyer and Miss Alice Van de Weyer also arrived on a visit. On Sunday morning the Queen, Prince Arthur, Prince Leopold, and the Princesses, attended Divine service in the private chapel. The Rev. Naunton Southam, vicar of Scawby, preached the sermon. In the afternoon the Queen drove out, with Princess Louise and Prince Arthur. On Monday morning the Queen went out with Prince Leopold and the Princesses. Prince Arthur left the Castle for Greenwich Park. Mons, Madame, and Miss Van de Weyer and Miss Alice Van de Weyer also left the Castle. In the afternoon the Queen drove in the grounds with Princess Beatrice.

THE PRINCE AND PRINCESS OF WALES.—On Friday the Prince and Princess visited the Queen at Windsor, and in the afternoon visited the Grand Duchess Marie of Russia at Claridge's Hotel. In the evening the Prince and Princess, accompanied by the Grand Duchess Marie of Russia, went to the Royal Opera, Covent Garden. On Saturday the Prince, accompanied by Prince Arthur, went to Wimbledon, and was present at the review. The Princess drove out. On Sunday the Prince and Princess attended Divine service at the Chapel Royal, St. James's. The sermon was preached by the Rev. Canon Melvill. On Monday the Prince and Princess left Marlborough House for Worsley Hall, on a visit to the Earl and Countess of Ellesmere. On Thursday the Royal Highnesses left Manchester for Hull, where the Prince opened the new docks, and returned in the evening to Marlborough House. It is understood that the Prince and Princess will not be present at the Woodstock Races this year, as it is their intention to go shortly to go to Wildbad for the benefit of the Princess's health.

THE GRAND DUCHESS MARIE OF RUSSIA was called at Claridge's Hotel on Saturday by the Duke of Cambridge, the Duchess of Cambridge, and numerous members of the aristocracy. On Sunday her Imperial Highness attended Divine service at the Russian chapel in Whitehall Street, and afterwards visited the Prince and Princess of Wales and Earl Granville. The Grand Duchess afterwards took a drive in the parks. On Monday her Imperial Highness left Claridge's Hotel for the Isle of Wight.

THE CABINET.—A Cabinet Council was held on Monday in Downing Street. Another Council was held on Wednesday.

THE NAVY.—Admiral Sir George Sartorius has been appointed Admiral of the Fleet, Admiral Sir Fairfax Moresby has been appointed Vice-Admiral, and Admiral Sir Provo William Parry Wallis has been appointed Rear-Admiral of the United Kingdom.

OFFICIAL APPOINTMENT.—Mr. Gladstone has appointed Mr. J. C. O'Dowd to be Deputy Judge-Advocate-General of the Army, in succession to Mr. Arthur Lushington, Q.C., appointed Secretary of the Admiralty.

DECEASE OF BISHOP JENNER.—It is understood that Dr. Jenner, who was consecrated Bishop of Exeter by the late Archbishop of Canterbury, is about to return to England, the synod of the diocese being unwilling to recognise him, and both clergy and laity being opposed to his high ritualistic views. Dr. Jenner for many years prior to his consecration held the vicarage of Preston, Kent, and as he was not compelled to resign it, he will probably take up his residence there as vicar on his return to England.

THE FLYING SQUADRON.—Admiral Hornby's Squadron, consisting of the frigates and corvettes *Porpoise*, *Thetis*, *Lifey*, *Endymion*, *Scylla*, and *Bristol*, arrived at Madeira on the 1st inst., having performed

of 35. A mere journeyman hatter, he owed to the chance which placed him in the path of the Czar's elevation, at one stroke, to the highest pinnacle of fortune. His plebeian name was replaced by that of Kostromski, and the Emperor's munificence gave him a landed estate. He was named colonel of a regiment of the Guard, and the Emperor authorised the opening for him of a national subscription, which produced nearly 2,000,000*l.* In spite of this abundance of honour and riches he has committed suicide. The abuse of spirituous liquors is said to have been the cause of his lamentable end.

ABYSSINIA—Information has been received which removes all doubts respecting the fate of Mr. and Mrs. Powell and party. Mr. Walter Powell, M.P., the brother of the deceased gentleman, has just returned from Alexandria, where he had gone to deliver a firman granted by the Viceroy of Egypt, directing a strong military escort to be provided for Mr. Henry Powell and Mr. Jenkins, who have gone in search. It has been ascertained that Mr. Powell and party were attacked and massacred by the Tekali tribe, and not by the Bezan tribe as first reported. Mr. Powell was speared on his bed as he was lying awake at early morning. His wife, who was standing a short distance off, was speared also, and managed to stagger to the body of her husband, when she fell. The murderers then speared Mr. Powell's little son, and finished the butchery with stones. Mr. Powell shot two of the assassins before he died. The Bezans afterwards came upon the murderers, and compelled them not only to relinquish the booty, but to deliver up the bodies. The Bezans then conveyed the bodies to the Swedish missionaries, by whom they were properly buried.

INDIA—It is confidently expected that the Kirghese tribes south and south-west of Orenburg have risen *en masse* against the Russians. Turkestan is believed to be in a disturbed condition. The fugitive Sirdars of Cabul, Azim Khan and Abdool Rahman Khan, have been hospitably received in Persia, but are treated simply as refugee princes, and have been told that Persia will do nothing towards aiding them in any attempt to re-establish themselves in Afghanistan. The men concerned in the well-remembered "Prema conspiracy," shortly before the first Sikh war, and who have been in prison ever since, have been released by the Government of India. Cholera has made its appearance among the Royals at Nusseerabad, though, it is hoped, not in a malignant form. The Artillery and Native Infantry at the station are free from the scourge. The re-marriage of a young Hindoo widow was celebrated in Bombay last month, under the auspices of the Widow Remarriage Association. It is stated that 300 men of the 100th Foot at Secunderabad have seceded from the Church of England, in consequence of the ritualistic practices of the chaplain at Trimulgherry.

CHINA—A proclamation hostile to foreigners has been posted by secret societies along the Yangtse river. A picnic party at Harkow, including the British Consul and his wife, had been driven away by a mob upon the pretence that they had come for the purpose of boiling and eating children. The Government has promised to investigate the affair. Meanwhile the gun-boat Opossum has anchored at Ichang. A conspiracy has been discovered at Soo-chow to open another Taeping rebellion; the conspirators number, it is reported, 50,000, and it is part of their plan to capture Soo-chow, Huchow, Hanghow and Shanghai. Several Chinese Hongs have combined together to establish an agency in London. The Yangtse exploring party have returned to Shanghai.

JAPAN—The Mikado was preparing to leave Yeddo for the purpose of avoiding a public reception to the Duke of Edinburgh. An ample apology has been made to Captain Stanhope and Mr. Robertson, her Majesty's Vice-Consul, for the insult to which they were recently subjected in being compelled to dismount before a passing noble. The Mikado's forces have captured Hakodadi, which was occupied by the rebels. An earthquake has occurred at Yokohama. Little damage was done. A steam-ship, formerly the Confederate cruiser, Tallahassee, has been wrecked near Yokohama; 22 lives, including the captain, were lost, but the greater part of the passengers and crew were saved.

UNITED STATES—Warren and other leaders of the Fenian party waited upon several Cabinet Ministers on Wednesday, and urged immediate action to secure the release of Halpine and other Fenian and Irish-American prisoners in Great Britain. It is reported that Mr. Boutwell and Mr. Robeson promised acquiescence, while Mr. Hoar declined, and strongly denounced Fenianism, declaring that the Fenian raiders against Canada were principally composed of thieves and desperadoes. The United States' Marshal at New York on Monday night captured the remnant of Ryan's Cuban filibuster expedition, near Hoboken, New Jersey. Ryan, with a few others, escaped. The Marshal has telegraphed to the President that this is supposed to be the end of Cuban operations at New York. No expedition has succeeded in leaving New York for many weeks, and President Grant has ordered the naval and military commanders of New York fully to sustain the United States' Marshal in enforcing the neutrality laws. The Government opposition to the landing of the French cable on American shores has been removed. The Company have promised to abide by future Congressional legislation on the subject.

CANADA—Intelligence from Ottawa announces that the Government has pardoned the Fenian Father M'Mahon. The 1st of July, the second anniversary of the Dominion of Canada, was kept generally as a holiday.

CUBA—Insurgent prospects in Cuba are dim. Scarcely any fighting is now reported, and there is much sickness in both armies. General Caballero de Rodas has issued a proclamation declaring that all vessels transporting insurgents shall be treated as pirates. The Prussian

Consul-General at Havannah has cautioned Germans against joining the filibustering expeditions to Cuba, and stating that the insurrection in the island is rapidly subsiding since the enforcement of the neutrality laws by the United States.

BRAZILS AND PARAGUAY.—The former news of the two victories of the allies is confirmed. A body of 2000 Brazilian horsemen had succeeded in crossing the Upper Parana and effecting a junction with the army, and the position of Lopez in the Cordilleras had been completely surrounded. The French and Italian consuls had been declared deserters by Lopez. The revolution at Montevideo continues, and the northern departments have declared in favour of the movement.

Parliament.

In the House of Lords on Friday, on the motion to go into Committee on the Bankruptcy Bill, Lord ROMILLY moved that the Bill be referred to a Select Committee. Lords WESTBURY and CHELMSFORD also objected to proceed with the Bill at once, and Lord CAIRNS insisted especially on the necessity of weighing carefully the provisions as to the trader debtor and judgment debtor summons. The LORD CHANCELLOR hoped that the House would not adopt a course which would be tantamount to postponing to another session the reform of the Bankruptcy Law, the state of which had been for years a great scandal, while the appointment of a Select Committee would seriously prejudice the interests of litigants who had suits before the House. Lord ROMILLY's motion was then carried without a division. Several Bills were advanced a stage, and at 7 P.M. a suspension of business occurred, but the House was kept formally sitting to receive the Irish Church Bill from the House of Commons. On that being brought up, at 20 minutes past 1 o'clock, Earl GRANVILLE gave notice that on Tuesday he would move that their lordships do not insist on the amendments from which the Commons disagreed. On Monday Earl RUSSELL moved the second reading of Sir J. D. Coleridge's University Tests Bill, which had passed the House of Commons by a considerable majority. The Earl of CARNARVON moved as an amendment the "previous question." The Bishop of GLOUCESTER and BRISTOL supported the amendment; the Earl of MORLEY, the Earl of CAMPERDOWN, and Lord LYTTLETON opposed it. On a division the Bill was thrown out by 91 to 54. The Earl of LICHFIELD brought up the report of amendments to the Municipal Franchise Bill. The clause permitting female voting for local offices was resisted by Lord REDESDALE, but it was defended by Lords KIMBERLEY and CAIRNS, and the report was received. The Archbishop of CANTERBURY brought up the report of amendments to the Bishop's Resignation Bill. After some discussion, in which Lords LIMERICK and LYTTLETON, the Duke of SOMERSET, and Lords REDESDALE, HARROWBY, and DENMAN took part, the report was received, with some additional amendments. Several Bills were advanced a stage. On Tuesday, on the consideration of the message from the Commons respecting the amendments in the Irish Church Bill, Earl GRANVILLE suggested reasons why the House should adhere to the main provisions of the original Bill. Of the 62 amendments introduced by the Peers, 35 had been adopted by the other House, 14 re-amended, and only 13 positively rejected. The Government considered that it would be a breach of faith with the constituencies to accept the principle of concurrent endowment, and that the proposed plan of endowment was altogether impracticable; while the postponement of the application of the surplus would be utterly unstatesmanlike, tending to the destruction of all independent energy in the Irish Church itself, and to one continued battle of rival creeds. He moved that the House should not insist on its amendment by which it had struck out the prohibition in the preamble against applying the surplus for the maintenance of any Church, or for the teaching of religion. Lord CAIRNS contested the propriety of severing the discussion of the two amendments, and moved that the House do insist on its amendment in the preamble. He denied that the House of Commons had paid due respect to their amendments. In adhering to the amendment on the question of the surplus, he believed that their lordships would carry with them the opinion, if not the votes, of the majority in the Commons, and certainly the opinion of the country. The amendments which he considered vital, were the scale of commutation and the curates' compensation; and those on which he should advise the House not to insist, as there was some difference of opinion on his own side of the House concerning them, were the date of Disestablishment, and even the right of the Church to retain the Ulster glebes. The Earl of KIMBERLEY and Lord HALIFAX defended the proposal of the Government to consider the two amendments in the preamble separately. Earl GREY feared, considering the manner in which the amendments had been treated, that the Government attached less importance to passing the Bill than to degrading the House, and bringing it into collision with the Commons. He felt that it was now impossible to carry a measure of concurrent endowment, but the responsibility would rest with the obstinacy of Government in insisting on all the details of its own particular scheme, in preference to a modification which would be found to be really favoured by a majority in the country. The Marquis of CLANRICARDE supported the reservation of the surplus. The Earl of SHAFESBURY regarded the Bill as the most violent and revolutionary measure submitted to Parliament since the Reformation, but thought it prudent not to insist on the amendments. Earl RUSSELL thought the Government ought to have been satisfied with carrying a measure of practical disestablishment and disendow-

ment, without inserting in the preamble the dogmas, which might be interpreted as a trap for entrapping the Legislature into an admission of the inexpediency of all religious endowments. EARL ARGYLL said that Earl Grey, though the "libertine of debate," had exceeded the bounds of violating the decencies of debate as to the object of the Government was to bring a measure between the two Houses. He also censured a speech of Earl Russell's. The Marquis of SALISBURY said that his reason for opposing the project for appropriating the surplus was not false and that it was foolish. In the first place it implied a partial application of the surplus to the teaching, and in the second place it was a violation of the House of Commons, which distinguished itself, like a drunkard taking the pledge, by its ing its mind in the future. The only argument was that the House of Commons had passed the only reason why that House had done so was that the Prime Minister had bid it. Why the House should bid it he could not search deep enough in the rithine recesses of that mind to detect, but that Mr. Gladstone had desired to give a slap on the face. He believed that it was an occasion as the present which made it the House of Lords to interpose between the arrogant will of one man. After some remarks the Bishop of LONDON in favour of the amendment on the ground of his objections to the secularisation of Church property, a long discussion arose on the question whether the vote should be taken on the negative and the positive part. The debate was terminated by a motion of the Duke of MARLBOROUGH that the House should insist on the amendments to the preamble. On this motion the LORD CHANCELLOR addressed the House, and delivered a very warm and bitter rebuke to Earl GRANVILLE and the Marquis of SALISBURY for their personal attacks against the Government, particularly Mr. Gladstone. A scene of extraordinary confusion then ensued. The Duke of MANCHESTER and the Earl of WINCHESTER condemned the speech of the Lord Chancellor. Earl GREY, while accepting the expansion of the Government, repeated his accusations against the House divided when Lord Cairns' amendment of the House should insist on the amendments to the preamble, was carried by a majority of 75, the vote being 173 to 95. The debate was then adjourned. On Thursday Earl GRANVILLE, who declared that a division he could not take the responsibility of moving further without consultation with his colleagues. On Thursday Earl GRANVILLE stated that he had consulted his colleagues with regard to the amendments to be pursued after their lordships' decision on Tuesday and that they were anxious that the discussion of the other amendments should be conducted in a spirit of peace and conciliation. He then moved that their lordships should not insist on the amendment of the date of the Bill from January, 1871, to May. Lord CAIRNS stated that since the adjournment on Tuesday he had had a conference with Lord GRANVILLE and that they had both agreed that the amendments which remained were not many in number, and that they were incapable of solution. The date at which the Bill was to come into operation was of secondary importance; he was therefore ready to accept the date originally proposed. On the question of curates, too, he advised their lordships not to insist upon their amendments, and to take the same course with respect to residences; but with regard to the commutation of annuities the Government suggested a compromise which he thought might be accepted, and which was, that if three-fourths of the clergy in a diocese resolved to commute their annuities, they should practically have 12, instead of 7 per cent. The only question then remaining would refer to the 68th clause, dealing with the surplus, and the compromise offered by the Government on that point was that the clause should be amended so as to provide that the surplus should be applied to the relief of an unavoidable calamity, in such manner as the Government should hereafter direct; but not a sum of money it would be applied without the separate sanction of Parliament. He apologised for having entered on such a negotiation without the authority of his party, and intimated that he was of opinion, much as he disliked the whole business, that concessions were preferable to leaving the controversy in suspense for months. The Bishop of CANTERBURY, the Earl of CARNARVON, the Marquis of SALISBURY, the Earl of MANSFIELD, and the Duke of MARLBOROUGH expressed their willingness to accept the compromise. Lord RUSSELL declared that he was more disposed to credit to the leader of the Opposition than to the Government a satisfactory result. Earl GREY, the Duke of LANCASTER, Lords HALIFAX, HARROWBY, and ARTHUR CLIVE also expressed their assent to the compromise. The Earl of Bandon and the Bishop of Exeter protested against it and the Bill. They stated that their lordships should not insist on their amendment as to the date was then agreed. The other amendments were also disposed of in accordance with the compromise. On the motion assenting to the Commons' reasons for rejecting the Lords' amendments to the 27th clause, relating to ecclesiastical residences, a division was called for, the motion being carried by 17 to 17. In consequence of Earl GREY's objection to the insertion of the words "and to attempt to bind future Parliaments," but he did not press his objection. A committee was then appointed

JULY 21, 1869.

up reasons in respect of those of the Commons' amendments from which the House had disagreed. Yesterday the Bill was ordered to be reported. Yesterday the Duke of ARGYLL laid on the table despatches from the Governor-General of India on the question of the construction of railways, and made a financial statement respecting the Indian Empire. The House was

in the Commons on Friday, Mr. GLADSTONE moved that the House should agree to the first part of the Lords' amendment in clause 29 of the Irish Church Bill, the capitalisation of private endowments for the sum of half a million, but should disagree to the second part involving the gift of the Ulster glebes. Mr. DISRAELI, in supporting the Lords' amendment, said that the Church in Ireland, when disestablished, would have to compete on unequal terms with the Roman hierarchy in the world, and with a clergy unaccustomed in their discipline, and owing allegiance to a temporal as well as spiritual Power. Under the circumstances, he asserted that religious equality could not be established unless the humiliated Protestant Church were started in its new career with a substantial endowment. Mr. C. FORTESCUE, Mr. WATER, Mr. SERJEANT DOWSE, and Mr. M'CLURE remained on the idea that the Church would be unable to stand on its ground without assistance. Colonel W. PATTEN, Sir F. HRYGATE, Sir S. NORTHCOTE, Mr. BOUNDALL PALMER, Mr. CHARLEY, and Mr. NEWDEGATE supported the Lords' amendment as an act of justice, and Mr. CONOLLY declared that to take the glebes away would destroy the title of most of the Ulster landowners. Mr. GREGORY, on the other hand, contended that every glebe in the country ought to have been sold, and Mr. HADFIELD protested against the endowments. The House then divided, when the Lords' amendment on the Ulster glebes was defeated by a majority of 104, the numbers being 344 to 240. The amendment capitalising the private endowments was agreed to. All the Lords' amendments on the subsequent clauses up to 67 inclusive were, with trifling exceptions, struck out of the Bill. On reaching the 68th clause, providing for the ultimate application of the surplus, Mr. GLADSTONE moved that the House should disagree to the Lords' amendment reserving the appropriation to Parliament, and that the clause be restored to its original shape, whereby the surplus would be applied to the support of infirmaries, hospitals, lunatic asylums, and other charitable objects in Ireland. Mr. DISRAELI objected to the motion, on the ground that the views of the Government and public opinion were not sufficiently matured in reference to the appropriation of the surplus. An animated discussion ensued among the Irish members as to the most beneficial mode of applying the funds. Mr. G. H. MOORE said that not five out of the 105 Irish members approved the clause, which would lead to endless jobbery and waste, and was a simple concession to British bigotry. Several others concurred in this opinion, and Mr. W. H. GREGORY urged that the fund should be devoted to advance the material interests of the country in railway enterprise. Mr. BRIGHT defended the scheme as that which the Government, after the most minute inquiries, had found to be least objectionable. The only other plan was concurrent endowment, which the House had decisively rejected, and the opposition to which was growing, not only among Nonconformists, but even in the Church. It was repudiated, moreover, by the Roman Catholic bishops and Irish members, and to send back the surplus under the idea that endowment in Ireland might be extended at some future time would be to leave an embarrassing legacy to a succeeding Parliament. Mr. WALPOLE urged a postponement, on the ground that the Government could not possibly have consulted the feelings of those not interested, and that the use proposed to be made of the money—the relief of landlords and occupiers—was most improper. On a division, the Lords' amendment was negatived by a majority of 72—290 to 218. The result seemed to be hailed as a victory by both sides, and the contest in cheering was prolonged for some time. The clause was then restored to its original form, with a few amendments, and the addition of the proposed compromise on the Commutation clause (23), adding 7 per cent. to the value of the life interests where four-fifths of a diocese decided on commutation, was next considered, when Dr. BALL accepted it, with a few verbal criticisms. On the question that the Bill be returned to the Lords, Mr. DISRAELI expressed his deep regret that the House, under Mr. Gladstone's advice, should have repudiated the amendments of the Lords after the magnanimity they had displayed in reading a second time a Bill to which they were notoriously adverse. One of the inducements offered to them was the promise of Earl Granville that their amendments would be seriously considered. But though the Government on the Lords had accepted some of these amendments, the imperious spirit which guided the fortunes of that House in defiance of his colleague's pledges, had insisted on their rejection, with a few exceptions too trivial to be remembered, while Mr. Bright had gone so far as to threaten the House with dissolution if they did not obey the Government. Mr. GLADSTONE indicated his course in regard to the amendments, and expressed his deep conviction that, though there might be trials to be passed through, the Irish Church would at some future day look back to the passing of this Act as the day of her regeneration. Mr. HARDY repeated Mr. Disraeli's charge that Mr. Bright had actually threatened a dissolution, and contended that there had been throughout a want of generosity to the House of Lords and a contempt of equity and justice towards the Irish Church. Mr. BRIGHT disclaimed the threat of dissolution, and charged Mr. Disraeli and Mr. Hardy with violating the ordinary rules of Parliamentary warfare. After some further altercation, a

Committee was appointed to draw up reasons for differing from the Lords' amendments. These reasons were afterwards read from the chair and formally approved. The Telegraphs Bill was read a second time, and referred to a Select Committee. On Monday the House went into Committee of Supply, when Mr. W. E. FORSTER moved the remainder of the vote for education. He said that the total amount required for the year was \$40,711, an excess over the previous year of 59,387. This excess was almost entirely in England and Wales, and consisted for the greater part of additional grants to day and evening schools. In the past year there had also been a considerable increase in the number of pupil-teachers, as well as of admissions to training colleges. But, on the other hand, of the children of the working classes proper, only one-fourth of those between six and 10 years, and one-fifth between 10 and 12 were receiving a real education. A long and desultory conversation ensued, not so much on the merits of the vote as on suggestions for the Education Bill, which the Government will introduce next year. The other votes taken were Science and Art Department (225,253*l.*) and British Museum (113,203*l.*). Sir G. GREY withdrew his Bill for the disfranchisement of the Dublin freemen in favour of the Government measure for proceeding by Commission. On the order for going into Committee on the Dublin Freemen Commission Bill, Mr. COLLINS moved an instruction with the view of including Yougal in the inquiry. Mr. MAGUIRE opposed the motion, which was negatived on a division by 184 to 78. As soon as the House had gone into Committee Mr. LOWTHER moved that the Chairman leave the chair. After an animated discussion the motion was negatived by 187 to 75, and the Bill then passed through Committee. The County Administration and the Mines Regulation Bills were withdrawn. The Trades' Union Protection of Funds Bill was read a second time. On Tuesday Mr. Ayrton moved the second reading of the Metropolitan Board of Works (Loans) Bill, the object of which was to empower the Board to raise money for the completion of the works entrusted to them, and to consolidate the loans they have already raised into a stock, with the same privileges of transfer, investment, &c., as Government stock, always under the control of the Treasury. After a long discussion the Bill was read a second time and referred to a Select Committee. In answer to Mr. MAGUIRE, Mr. BRUCE said that the Prison Ministers Act, brought in by Sir George Grey some years ago for providing religious teaching to Roman Catholic prisoners, had been a failure in the metropolis, and he saw no remedy but to give the Secretary of State power in certain cases to compel the appointment of paid Roman Catholic chaplains. On the order for resuming the adjourned debate on the Marriage with a Deceased Wife's Sister Bill, Mr. J. G. TALBOT moved that the order be discharged. Mr. BERESFORD-HOPE suggested that the Bill, at this late period of the year, should be withdrawn for the session. Lord BURY supported this suggestion. Mr. GLADSTONE opposed it, and said that he had come to the conclusion that these marriages ought to be legalised, and that it should be left to each religious denomination to determine their religious character. After some further discussion the motion that the order be discharged was defeated by a majority of 86—143 to 57. Sir JOHN HAY then moved the adjournment of the debate, which was defeated on a division by 145 to 48. Two instructions moved by Mr. COLLINS and Mr. MONK—one to extend the Bill to marriages with a deceased husband's brother, the other negatived without a division, and the House went into Committee. The first clause, extending the retrospective effect of the Bill to Scotland and Ireland, met with strong opposition, which was prolonged until 2 o'clock, when the Committee was adjourned before the clause was agreed to. On Wednesday Mr. F. A. MILBANK, referring to the language used on the preceding evening in the House of Lords by the Marquis of Salisbury, asked the Speaker whether any apology or redress could be demanded from a peer who had used language insolent towards the leader of a great party, and insulting also to the dignity of the House of Commons. The SPEAKER said that the question was neither one of "order" nor of "privilege," and could not with propriety be put in the House of Commons, which was not supposed to be cognisant of what had taken place in the House of Lords. The second reading of the Hypothec Abolition (Scotland) Bill, after a long discussion, was carried on a division by 127 to 91, on the understanding that the measure would not be proceeded with further this session. The Adulteration of Food or Drink Act (1860) Amendment Bill, the County Coroners Bill, the Suburban Commons Bill, and the Special and Common Juries Bill, were withdrawn. The adjourned debate on the third reading of the Married Woman's Property Bill was resumed by Mr. C. RAIKES, who moved as an amendment that it be read a second time that day three months. Mr. JESSEL supported the Bill, Mr. BERESFORD-HOPE opposed it. On a division the third reading was carried by 131 to 32, and the Bill was read a third time and passed. The Railway Construction Facilities Act Amendment and Cinque Ports Act Amendment Bills passed through Committee. On Thursday Mr. SARTORIS asked whether the University Tests Bill would be included in the general education measure of last year. The SOLICITOR-GENERAL, in reply, said that after the contemptuous treatment his Bill had met with at the hands of the Lords he had not taken upon himself to ascertain the intentions of the Government. Mr. BRUCE withdrew the Petroleum Bill, but contradicted the report that the Habitual Criminals Bill was to be dropped. Lord BURY called attention to the disturbed state of New Zealand, and earnestly pressed the Government not to withdraw from it the sympathy

and countenance of the mother country. Mr. MONNELL defended the action of the Government on the general ground of policy, and said that, having given the colonists the complete management of their own affairs, we ought to leave them to carry it on without assistance. Mr. ANDERLEY strongly deprecated the smallest step backwards towards the old meddling system, which was at the bottom of all the misfortunes of New Zealand. The House then went into Committee of Supply, and agreed to several votes in the class of salaries and in that of Education, Science, and Art. The Irish Church Bill, as amended, was brought down again from the Lords and laid upon the table, amid cheers from below the gangway. Yesterday, on the order for the consideration of the Lords' Amendments and Reasons in the Irish Church Bill, Mr. GLADSTONE moved that the House should agree to the Bill as amended by the Lords, without exception or alteration. He described the manner in which the Government had assented to the amendments and said that considering the interests affected by the Bill, and the mischief which would result from its not being passed, they had concluded to recommend the House to make sensible and substantial concessions. Mr. DISRAELI expressed his opinion that the compromise had been effected on a fair, wise, and conciliatory principle, but now the Bill had been passed, he hoped that this would be the last occasion on which the right hon. gentleman would attempt to deal with political questions on abstract principles. After some discussion the amendments were considered and adopted amid loud cheers. The House was left sitting.

City Intelligence.

MONEY MARKET, FRIDAY.—BRITISH FUNDS: Consols closed at 93½ to 93¼, both for Money and Account; New and Reduced Three per Cents, 93¼ to 93¼, Bank Stock, 243 to 245, Exchequer Bills, 3s. to 7s. pm. for March, and 7s to 11s pm for June; India Five per Cents, 111½ to 112.—FOREIGN—Argentine, 79½ to 80½, Egyptian, 1864, 92 to 93, Ditto (1868), 78½ to 78½ ex div., Viceroy Seven per Cents, 81½ to 82½, Ditto Nine per Cents, 97½ to 98½, Mexican, 12½ to 12½, Italian, 55½ to 55½, Peruvian, 77½ to 78; Russian (1866), 94 to 95, Orel, 83½ to 83½, Charkof, 82 to 82½; Moscow, 81½ to 81½, Nicolas, 67½ to 67½; Spanish, 29½ to 29½, Turkish Five per Cents, 44½ to 45; Ditto Six per Cents, 44½ to 45, United States 5-20 Bonds, 82½ to 83; Erie, 18½ to 19½, Illinois, 94½ to 95.

Metropolis and its Vicinity.

THE WIMBLEDON MEETING AND REVIEW.—The rifle competition at Wimbledon was completed on Friday. The Commander-in-Chief paid a visit to the camp, and the flying column from Aldershot, including infantry, cavalry, and artillery, arrived and encamped within the enclosure. A grand display of fireworks and a dinner took place at night, in honour of the Belgian visitors. On Saturday the meeting was brought to a conclusion with the distribution of the prizes to the successful competitors by the Princess Christian, and with a grand review of the volunteers and the flying column from Aldershot. The weather was very hot, but with a pleasant breeze, and the crowds were enormous, larger, it is said, than on the occasion of the Sultan's visit two years ago. The distribution of prizes was only relieved from tedium by the presence of the Princess, but the result that followed made up for all that was wanting. The Duke of Cambridge was accompanied by the Prince of Wales, in the uniform of Colonel of the Rifle Brigade, by Prince Arthur, in the uniform of the Royal Artillery, and by Princes Christian and Teck. Among the staff were Generals Lord W. Paulet, Sir H. Grant, Sir A. Horsford, Hamilton, and Russell. The total number of troops engaged was between 12,000 and 13,000, the flying column from Aldershot numbering 4,000, and the volunteers being rather more than twice as many; but this number was made up of a variety of separate corps, most of the regiments who in the early days of volunteering were the great corps of the force being scarcely represented at all, the Wimbledon review having, it is said, become unpopular among them. A march past the Commander-in-Chief and the Prince of Wales concluded the business of the day.

DR. LIVINGSTONE.—Mr. H. A. Churchill, her Majesty's Consul at Zanzibar, who has just arrived in this country, speaks with confidence as to the safety of Dr. Livingstone, from whom he has had letters of a date more recent than that of his reported murder. It is his opinion that Dr. Livingstone, having heard of the discovery of the northern portion of Lake Albert Nyanza by Sir S. Baker, has directed his route in search of the southern boundary of that lake, and that in the course of a few months further news will be heard from Dr. Livingstone himself.

THE FRENCH ATLANTIC CABLE.—The following is the text of the telegram sent from St. Pierre on July 14 to the Emperor Napoleon—

"Sire.—We have the honour to forward to your Imperial Majesty the first telegram passed through the French Atlantic Cable, announcing the satisfactory completion of the main section of that important work, and to congratulate your Imperial Majesty on the establishment of telegraphic communication between France and the island of St. Pierre by a cable of 2583 knots long, laid in water in some parts 2760 fathoms deep. The remaining short section, from St. Pierre to Duxbury, in shallow water, will be laid in the next eight or 10 days, thus completing direct telegraphic communication between France and the United States. May this great work contribute to the welfare and happiness of your Imperial Majesty, and of the two great countries which are brought into closer connection by its means.—D. GOUGH, J. ANDERSON."

The Emperor replied:—"Je vous felicite de l'heureuse réussite de votre grande entreprise, et je vous remercie de m'en avoir fait part."

WOMAN SUFFRAGE.—On Saturday afternoon the

It was stated that the amount of the subscription was 1350l., and that the amount realised was 1400l. An annuity for Mr. Hudson was purchased in the North British Office at 12 1/2 per cent, and 1000l. invested in the same office would produce 51 1/2 per annum. It was agreed that the subscription be in the name of an annuity for Mr Hudson's benefit, and that there be no power of anticipation of the amount becoming liable for the benefit of other persons.

Wearmouth Colliery strike, by the stoppage of the workings of the colliery have been suspended for two months, and about 1200 men have been out of work.

William Hall, who was convicted for the wilful murder of Eliza Bowen, was executed at this town, under a sentence of remarkable atrocity, the bill was read by the grand jury at the assizes on Wednesday.

Fatal colliery explosion occurred on Monday morning in the 9-foot mine at the colliery, Haydock, belonging to Messrs. Evans and Co. from this town, at the same pit there was an explosion in December last, when 100 colliers went down in the mine.

Explosion at 11 A.M., about one-third of the shaft; one man has died since he was taken out, and the searchers are groping in the shaft for others who are believed to be there.

Thomas Rosser, who stands charged on his indictment with the murder of Jane Edwards, in the County of York, was re-examined on the 8th inst. The evidence having been read over, and some corroborating the prisoner's statement, the magistrate decided to send him for trial.

The Prince of Wales has intimated to Sir Wombwell, Master of the York and Ainsty Hunt, to hunt with the Yorkshire hounds. His Highness will bring his own stud of hunters, and will take up his quarters at the North-Eastern Hotel in this city.

Ireland.

ROYAL VISITS TO IRELAND.—It is announced by a journal that the Lord-Lieutenant has received notification of her Majesty's intention to pay a visit of some duration to Ireland next year. It is also stated that the Prince and Princess of Wales will be present at the National Horse Show, in Dublin, on the 27th of August and three following days; and that the Royal Highnesses will be the guests of the Lord-Lieutenant.

ATTEMPT TO ASSASSINATE A HIGH SHERIFF.—On Monday morning, Mr. Warburton, High Sheriff of the County, was fired at while driving to Maryborough to swear in the grand jury. The assassin was concealed in a wood at Killeen, behind a wall 7 feet high, and fired in an oblique direction 10 yards' distance into Mr. Warburton's face. The shot penetrated his eye, and wounded the side of his head. The man was raised too high, and the greater part of the charge riddled his hat. Richard Kenny, his driver, who was seated behind him in the two-horse carriage sprang beside his master, drove furiously into Maryborough, and placed Mr. Warburton under the care of Dr. Jacob, the medical officer of the County. The constabulary searched the wood, and recovered some old clothes and two sacks, which they formed the assassin's bed. The outrage is being investigated. Mr. Warburton is doing well, and hopes of recovery are entertained. The magistrates of the County have offered a reward of 500l., and the grand jury at the assizes have offered a similar sum, for the discovery of the assassin.

Railways.

RAILWAY COLLISIONS.—On Saturday morning a collision occurred at the Lostock Hall Junction of the Lancashire and Yorkshire and East Lancashire. At this point there is a loop line upon which a goods coal train was standing. An express train was approaching the junction line at the moment when another train was also approaching it. The driver of the latter, owing to the curve, could not see the goods train, and the excursion train consequently ran into it at a rather rapid rate. Five trucks were crushed to fragments, and their contents scattered over the line. Fifteen persons were cut and bruised, but fortunately no very severe injuries were sustained. A fatal accident occurred on Saturday to an excursion train from Crewe to Liverpool. The train was one of about 600 members of the Crewe Railway stores and their friends, the train being composed of 22 carriages. Just after passing Winsford a coal train of 20 trucks was shunting to clear the line, but had not got quite clear, when the goods train of the excursion train came into collision with it. The third-class carriage was entirely destroyed, and the girl 7 years of age, daughter of Mr. Anderson, of Liverpool, who was returning home from Crewe, was killed, and several of the other passengers were severely injured.

Law.

COMMITTEE OF THE PRIVY COUNCIL: The Bishop of Capetown.—Judgment in this case was given on Tuesday by Lord Justice Giffard, in the presence of Sir James W. Colville, and Sir J. Napier. It was an appeal of the Bishop of Capetown against the judgment of the Supreme Court of Natal, which decided that the Bishop of Capetown was the rightful possessor of the cathedral of Peter Maritzburg. The cathedral had been vested in 1854 in Dr. Gray as Bishop of Capetown. In 1858 the House of Capetown was split into two parts. One part went with the Bishop of Natal, and the other with the Bishop of Capetown. The latter part was sold to the Bishop of Natal, and the former part was sold to the Bishop of Capetown. The Bishop of Natal, however, claimed that the cathedral was his by right, and that the Bishop of Capetown had no right to it. The Supreme Court decided in favor of the Bishop of Natal, and the Bishop of Capetown appealed. The Privy Council, however, decided in favor of the Bishop of Capetown, and the Bishop of Natal's appeal was dismissed.

was an appeal of the Bishop of Capetown against the judgment of the Supreme Court of Natal, which decided that the Bishop of Capetown was the rightful possessor of the cathedral of Peter Maritzburg. The cathedral had been vested in 1854 in Dr. Gray as Bishop of Capetown. In 1858 the House of Capetown was split into two parts. One part went with the Bishop of Natal, and the other with the Bishop of Capetown. The latter part was sold to the Bishop of Natal, and the former part was sold to the Bishop of Capetown. The Bishop of Natal, however, claimed that the cathedral was his by right, and that the Bishop of Capetown had no right to it. The Supreme Court decided in favor of the Bishop of Natal, and the Bishop of Capetown appealed. The Privy Council, however, decided in favor of the Bishop of Capetown, and the Bishop of Natal's appeal was dismissed.

OXFORD CIRCUIT: WORCESTER.—The *Bellefleur* case was heard on the 27th inst. The prisoner was charged with the wilful murder of her husband, Joseph Oliver, at Berkeley. The prisoner was a milliner and also in the course of her business cleaned bonnets, for which purpose she used poisonous drugs. The death of the husband was attributed to arsenical poisoning, and the motives by which it was presumed the prisoner was actuated in committing the crime were twofold. First, that she had contracted an improper intimacy with a man named Bree, and secondly, that her husband had money in a building fund, and that she had been drawing it out without his knowledge, and had exhausted the fund. It was proved that she purchased arsenic in April last, and gave a false name and address. She also bought some vermin powder used for killing mice, and mixed part of it with some tapioca pudding, which remained in the house for three weeks, until it became mouldy. A servant girl ate some of the pudding and became ill afterwards, when the prisoner blamed her for taking it, and said she had put the vermin powder in it to kill the mice. A witness was called who gave evidence that he had seen the prisoner give him his medicine. The doctor was called in on the 27th of April, and for six weeks the deceased continued ill, and eventually died. On one occasion some milk was given to the deceased, after which he was sick. Deceased's mother also tasted the milk, and was not ill. Dr. Hill who made a small quantity of the pudding, and the witness who died from arsenical poisoning. A few days before the death of the deceased, prisoner said to one of the witnesses, "If a little extra drop (or dose) would take him off, I'd give it him." These facts being proved, the jury returned a verdict of *Guilty*, with a recommendation to mercy. The prisoner then addressed the Court in a long and incoherent statement, in which she called God to witness that she was innocent. Baron Pigott, having put on the black cap, passed sentence of *Death* in the usual form.

WESTERN CIRCUIT: DORCHESTER.—The *Portland Murder.*—*Joseph Liddell*, the convict at Portland, was convicted on Thursday of the murder of one of the warders, and sentenced to *Death*.

Sporting.

THE INTERNATIONAL UNIVERSITY BOAT RACE.—The Harvard College crew arrived in Liverpool on Monday, in the City of Paris steamer from New York, and reached Putney on Wednesday evening. They have temporarily taken up their abode at the Star and Garter, until they can suit themselves with a furnished house in the village or its neighbourhood. They have brought with them two four-oared racing boats, of the unusual length of 48 feet, about 6 feet longer than the average of English fours. The crew are a powerful set of men, all of them exceeding 12 stone, and one of them being nearly 13, thus giving them an average of nearly 12 stone and a-half. They have declined the challenge of the London Rowing Club, but the race with the Oxford University Boat Club will probably be rowed between August 16 and 31.

Obituary.

PRINCE ALESSANDRO ANDREA GONZAUA, Duke of Mantua, Prince Castiglione, &c., died on the 14th inst., at Norwood, in his 69th year.
BAYON BERTON died on the 8th inst., in Chester Street, Grosvenor Place. He was taken ill late on Wednesday night, and died of congestion of the brain. He was for many years in the civil-military service of the Danish crown, and Chamberlain to the King of Denmark. He married in 1847, the fourth daughter of Mr. John Gage of Rogate, Hants, and niece of the third Viscount Gage.
SIR ARTHUR C. H. RUMBOLD, BART., Governor of the Virgin Isles, died on the 12th ult. He was the third son of the third baronet, by the daughter of the first Lord Ranelagh, and was born in 1820. He succeeded his brother, Cavendish Stewart, as fifth baronet in 1853. He entered the army in 1837 as ensign in the 51st Regiment, with which regiment he served in New South Wales and Tasmania, and afterwards exchanged into the 21st Fusiliers, with which he served in Bengal, the Mauritius, and Cape of Good Hope. In 1844 he exchanged into the 1st West India Regiment, and afterwards removed to the 7th, till he held out in 1846. In 1849 he was appointed stipendiary magistrate at Jamaica, and held that office till 1855. He served with the Osmanli Cavalry during the late Russian war, and was brigade-major to Major-General Havelock, and held the rank of colonel in the Imperial Ottoman army, and received her Majesty's license to accept and wear the Order of the Medjidie. He was appointed President of Nevis in 1857, President of the Virgin Isles in 1862, and Administrator of St. Kitts and Anguilla from January 7 to April, 1867. He married, first, in 1848, the only daughter of the late Commandant de Kerouan; and, secondly, in 1868, the eldest daughter of Mr. E. Hopewell, of The Grove, Essex. Having no male issue, the baronetcy devolves on his brother, Charles Hale Rumbold.
SIR HENRY BOYNTON, BART., died on the 2d ult., at his seat, Burton Agnes, Yorkshire. He was the 10th baronet, was born

in 1811 and succeeded to the baronetcy on the death of his father, in 1874. He was twice married—first in 1835 to the second daughter of Mr. Walter Sturtevant of Southorpe Hall, Co. Down, and secondly in 1852 to the daughter of Mr. Thomas Hamilton of St. James's Palace, London. He was a member of the House of Commons from 1841 to 1852, and of the House of Lords from 1852 to 1874. He was a member of the Privy Council from 1852 to 1874. He was a member of the Council of the University of Cambridge from 1852 to 1874. He was a member of the Council of the University of Durham from 1852 to 1874. He was a member of the Council of the University of London from 1852 to 1874. He was a member of the Council of the University of Oxford from 1852 to 1874. He was a member of the Council of the University of Edinburgh from 1852 to 1874. He was a member of the Council of the University of Glasgow from 1852 to 1874. He was a member of the Council of the University of Aberdeen from 1852 to 1874. He was a member of the Council of the University of St. Andrews from 1852 to 1874. He was a member of the Council of the University of Perth from 1852 to 1874. He was a member of the Council of the University of Dundee from 1852 to 1874. He was a member of the Council of the University of Aberdeen from 1852 to 1874. He was a member of the Council of the University of St. Andrews from 1852 to 1874. He was a member of the Council of the University of Perth from 1852 to 1874. He was a member of the Council of the University of Dundee from 1852 to 1874.

THE DEAN OF DURHAM (the Very Rev. George Wainwright) died on Tuesday aged 76. He graduated at Trinity College, Cambridge, and gained honours at the University of Cambridge. He succeeded Dr. Jackson as the Dean of Durham in 1844, and was included on the 23rd of September of that year. On the death of Archbishop Henry he succeeded to the office of Warden of Durham University, and an Order in Council of the same date appointed him to the Deanery. He was Dean of the Cathedral of Durham from 1844 to 1874. He was a member of the Council of the University of Durham from 1844 to 1874. He was a member of the Council of the University of London from 1844 to 1874. He was a member of the Council of the University of Oxford from 1844 to 1874. He was a member of the Council of the University of Edinburgh from 1844 to 1874. He was a member of the Council of the University of Glasgow from 1844 to 1874. He was a member of the Council of the University of Aberdeen from 1844 to 1874. He was a member of the Council of the University of St. Andrews from 1844 to 1874. He was a member of the Council of the University of Perth from 1844 to 1874. He was a member of the Council of the University of Dundee from 1844 to 1874.

WILLS. The will of the Earl of Glasgow has been sworn under the personal seal of the late Viscount John Stuart, Bart., of Hackney Road, Yorkshire, and 34, Belgrave Square, London, the late Lord of Sturton, North, the Hon. Charles Fitzroy, 8th Lord, &c., the Hon. Martha Sophia Austen, 3rd Countess of Dowager Countess of Albemarle, Lady North, Countess of the Ven. James Croft, Archbishop of Canterbury, rector of Cliffe, and Saltwood, Kent, 10,000l.; Mr. James Sturm, of North Villa, Hampstead, 25,000l.; Mr. Peter Mass, of Portland Place, 550,000l.; Miss Jane Morris, Connaught Place, Hyde Park, 14,000l.; Mr. Adam Spillmann, late of Hereford House, West Brompton, 100,000l.; Mr. George Hall Lawrence, of Liverpool, 140,000l.; Mr. Henry Stanley Robert Pearce, of Winchester, 80,000l.; Mr. Edmund Robinson, of York, 100,000l.; Mr. Edward Lloyd, of York, 50,000l.; and Mrs. Martha Elizabeth Clark, of Addison Road, Kensington, 30,000l.

Markets.

COVENT GARDEN—July 24. There is a marked decline in the general trade, the London season being now virtually over. The supply of both home-grown and foreign produce is well kept up. Small Pork, 4s. 8d. to 5s. 6d.; Large Pork, 3s. 8d. to 4s. 4d. per 8 lb.
METROPOLITAN CATTLE MARKET.
MONDAY, July 19.
There are not so many beasts as on Monday last; the demand has, however, considerably decreased, and lower prices are taken for all descriptions, several lots remain unsold. The number of Sheep is nearly the same as last week, trade is exceedingly dull, at lower prices; a clearance cannot be effected. Lambs and Calves are also lower. Our foreign supply consists of 2258 Beasts, 650 Sheep, 34 Calves, and

165 Pigs: from Ireland there are 80 Beasts; from Norfolk and Suffolk, 70; and 1692 from the Midland and Home Counties.

Best Scots, Herefords, &c.	5 2 to 5 4	Best Long wools	4 10 to 5 2
Best Shorthorns	4 10 - 5 0	Do. Shorn

Beasts, 4100; Sheep and Lambs, 29,700; Calves, 431; Pigs, 285.		Calves	3 4 - 5 2
		Pigs	3 8 - 5 6

THURSDAY, July 22.

The supply of fresh Beasts is very short, and they are readily disposed of, but trade generally is dull, and on the average prices are not better than on Monday. The number of Sheep and Lambs is larger than for some time past; trade is slow for Sheep. Lambs are rather dearer. Trade is heavy for Calves. Our foreign supply consists of 258 Beasts, 3920 Sheep, 528 Calves, and 75 Pigs.

Best Scots, Herefords, &c.	5 2 to 5 4	Best Long-wools	4 10 to 5 2
Best Shorthorns	4 10 - 5 0	Do. Shorn

MARK LANE.—MONDAY, July 19.

The supply of English Wheat to this morning's market was small, but a reduction of 1s. to 2s. per qr. being required by millers, sales were restricted, holders not being inclined to give way in price. There was a fair attendance, and foreign Wheat was taken to a moderate extent only at a decline of 1s. per qr. since this day se'nright. Barley is firm. Beans and Peas 1s. to 2s. per qr. dearer. In fine qualities of Oats there is no alteration, other descriptions 6d. per qr. cheaper. Flour is unaltered in value.

FRIDAY, July 23.

Excepting one or two cold nights we have had hot and forcing weather since the 16th inst. Under the influence of a bright sun, and reports of rapid progress towards maturity of the growing crops, we have had very dull markets for Wheat throughout the kingdom, and prices have given way from 1s. to 3s. per qr., buyers generally holding back in hopes of buying at a still greater reduction; but we notice that in some of the leading places holders preferred looking on, and would not submit to the offers made by millers. Barley was a moderate sale at full rates. Beans and Peas, from scarcity, advanced about 2s. per qr. Oats moved off slowly, and prices were against importers. Flour gave way 1s. per barrel, and 1s. to 2s. per sack. The arrivals of grain and seed-laden vessels off the coast since Friday last consisted of 19 cargoes, of which, with those left over from last week, there remained for sale last night 14 cargoes. Business in Wheat arrived off the coast has been inactive during the past week, and the few sales made were at a reduction of from 1s. to 2s. per qr. Maize and Barley showed an improving tendency, and were firm throughout. In Rye no business transpired. In cargoes on passage and for forward shipment there was but little doing in Wheat; Maize continued in demand at a slight advance; Barley unaltered, Rye firm in tone.

The arrivals of all descriptions of English grain are small, of foreign Wheat and Oats good. There was a very small attendance at this morning's market, and only a moderate quantity of Wheat offering. Sales progressed to a fair extent at barely Monday's prices, both for English and foreign. Spring Corn of all descriptions was firm, and Maize rather dearer.

26,400	300	37,980	

MANCHESTER, July 22.—The weather since our last report has continued of the most favourable character, which, together with the Royal Agricultural show and the Royal visit, has completely put a stop to business for the moment. There was only a slender attendance at our market this morning, and but little disposition was manifested by buyers to operate in either Wheat or Flour without a greater concession than sellers were willing to submit to; a portion of the advance quoted last week must, therefore, be considered as lost, but in the absence of business it is difficult to give exact quotations. Oats and Oatmeal ruled steady. Beans were fully as dear. Indian Corn was 6d. to 1s. per qr. higher.

SEED MARKET

Our markets have been very thinly attended during the past week, and the amount of business transacted has been

exceedingly limited, indeed, as is usual at this time of the year, the agricultural seed trade is now quite inactive. All descriptions of red and white Clover seed are held with great firmness, and higher values are confidently anticipated. Of the new crop of Trefoil seed, the accounts which reach us both from home and abroad are exceedingly bad, the stocks of yearling Trefoil, in consequence of the failure of the new crop, will come out a good deal better than was expected. New English Rape seed will, it is stated, be in short supply; as yet no sample has been shown at Mark Lane. White Mustard and all other kinds of seeds are without change in value. New Trifolium is offering at moderate rates.

JOHN SHAW & SONS, 16, Water Lane.

Home News.

THE COURT at OSBORNE.—On Friday afternoon the Queen drove out with Princess Beatrice. On Saturday her Majesty walked in the morning in the grounds with Princess Louisa, and drove out in the afternoon with Princess Christian.

THE PRINCE AND PRINCESS OF WALES.—On Friday the Prince lunched with the Lord Mayor at the Mansion House, and afterwards unveiled the statue erected near the Royal Exchange in honour of Mr. Peabody.

PRINCE HASSAN, third son of the Viceroy of Egypt, who has been living at London for his education, has arrived at Alexandria from England, having been suddenly ordered home by his father.

THE CABINET.—A Cabinet Council was held on Saturday in Downing Street.

PARLIAMENTARY MOVEMENTS.—There is a vacancy at Salisbury, caused by the retirement of Mr. Hamilton. Mr. A. Seymour is a candidate for the vacant seat in the Ministerial interest.

ILLNESS OF THE PREMIER.—Mr. Gladstone was suffering from severe indisposition when he delivered his speech on the Lords' amendments on Friday last, and has since had a smart attack of diarrhoea, which has prevented him from attending Parliament this week.

LETTER OF THE QUEEN TO MR. PEABODY.—Boston Post of July 13 publishes the following letter addressed by Queen Victoria to Mr. Peabody.

"The Queen is very sorry that Mr. Peabody's departure has made it impossible for her to see him in bad health. She now writes him a line to express that he may return to this country quite as soon as she may then have the opportunity of what she has been deprived of, seeing and offering him a letter for all he has done for the people."

The note was transmitted by Mr. Arthur H. of the Privy Council, who adds that the Queen commanded him "to be sure and charge Mr. Peabody to report himself on his return to England."

THE DEANERY OF DURHAM.—Mr. Gladstone offered the Deanery of Durham to Dr. T. W. master of Rugby School, who has deceased on ground that the Endowed Schools Bill will be into operation, and that he ought to withdraw from the institution over which he presides.

KNIGHTHOOD.—The Queen has conferred the order of Knighthood on Peter Coats, Esq., of Paisley James Cockle, Esq., Chief Justice of the Court of Queensland.

ORDER OF THE BATH.—The Queen has appointed Anthony Panizzi, Esq., late Principal Librarian of the British Museum, and Lieut. Edward Sabine, to be Knights Commanders of the Order of the Bath.

THE METROPOLITAN-ELECT OF MONTREAL.—Thursday a meeting of the Society for the Propagation of the Gospel was held, for the purpose of electing a Bishop of Montreal and Metropolitan of Canada.

well of the Rev. Ashton Oxenden, who has been Bishop of Montreal and Metropolitan of Canada, the place of the late Bishop Fuiford. The election was taken by the Archbishop of Canterbury, supported by the Bishop of London, the Bishop of Gloucester and Bristol, the Bishop of Columbia, Bishop Smiley, Ryan, Rev. Canon Gregory, Canon Harvey Grezett, &c.

to undertake its duties; but in the presence of God a great difficulty had been solved by personal considerations, and agreed to enter on the office of the bishop-elect had already spoken; in fact, nothing else could have been appointed. It was the earnest desire of the new bishop will take place in Westminster Hall to-morrow morning.

TRIAL OF AN ELECTION PETITION.—The Birmingham election inquiry opened on Thursday morning, it will be remembered, occurred on the vacancy, it will be remembered, occurred on the death of the late Sir E. Clifton, and the candidates were of the late Sir E. Clifton, and the candidates were Mr. Seely, son of the M.P. for Lincoln, and Mr. Seymour, Q.C.

COURTS-MARTIAL COMMISSION.—The second report of the Commissioners appointed to inquire into the constitution and practice of courts-martial, in the present system of punishment for military offences, has been published. The following summary of the chief alterations recommended:

- 1. That the Mutiny Act and Articles of War should be fully re-drawn. 2. That a text book on military law be prepared for the convenience and instruction of officers for the use of courts-martial. 3. That a stricter examination of officers in military law be enforced, such examination to be conducted before a board of officers by a deputy judge-advocate, or some one deputed by the judge-advocate-general, either at his own discretion or on the requisition of the prosecutor or prisoner, to require the attendance of the judge-advocate. 4. That for this object the present number of deputy judge-advocates be increased. 5. That the powers of reducing the number of regimental courts-martial be given to commanding officers. 6. That the services of a shorthand writer can be dispensed with. 7. That the examination of witnesses before a general court-martial be conducted as in the ordinary criminal tribunals, where facilities for so doing. 8. That in certain cases a list of witnesses, together with the charges, and that the prisoner as a matter of right be allowed to cross-examine also have reasonable notice of any additional witnesses in the course of the proceedings. 9. That the practice of re-assembling a court-martial for the purpose of revising their proceedings be discontinued. 10. That the practice of re-assembling a court-martial for the purpose of revising their proceedings be discontinued. 11. That a regulation be made only be had recourse to when a court-martial is not fully assembled, and that it be composed of not less than three years standing. 12. That the proceedings of all regimental courts be forwarded to the commanding officer of the district. With regard to the amendments, we have recommended—1. That one of the

be established, in which an improved system... can be carried on, in which separate... form an indispensable part, and that until... arrangements should be made with the authorities... for the reception of the requisite number of... care being taken to separate them as far as... the other prisoners. 3. That the term habitual... as applied to the fourth offence be abolished... of fines be substituted for the present system... for this offence. 4. That such fines substitute... the benefit of the army generally. 5. That the... of non-commissioned officers need not necessarily... to the ranks. 6. That great... of men of bad character... be abolished when altered... in the report will admit of it."

Foreign.

FRANCE.—The Council of Ministers and the Privy... held a sitting on Wednesday. The Emperor... the same day the first telegram through the... Atlantic Cable to President Grant. The... were the terms of the message:—

"I inaugurate the new telegraphic line which... to America, by sending you the expression of my... for yourself and the prosperity of the United...

The Pasha of Egypt arrived at Toulon on Friday morn-... embarked in the evening for Egypt on board... Maroussa. The official journals contradict... reports that the Government had determined to... the Legislative Body; that the Prince de la... Auzerque, the new Minister of Foreign Affairs... sent a note respecting the Ecumenical Council to... French Ambassador at Rome; that the troops in... had received orders to hold themselves in readi-... to embark for France, that Marshal MacMahon... arrived in Paris, and that M. Benedetti was... to replace M. de Talleyrand as the represen-... of France at St. Petersburg. All these state-... are declared to be wholly without foundation. It is semi-officially announced that after the inspection... of the troops is at an end the half-yearly furloughs... be granted, as is usually done each year, to about... men. Of the contingent of 1863 also about 18,000... be furloughed on the 1st of October, in anti-... of the regular time. According to the Figaro... the Senatus Consultum will contain the following... forms, but doubts are expressed as to the statement... having any official origin:—

The abolition of the law which makes it incompatible for a... to hold a seat in the Chamber of Deputies, the... of the Ministry to the Legislative Body, to getar... ministerial solidarity; the re-establishment of the... in reply to the Speech from the Throne; the concea-... the Legislative of the right to introduce Bills, to move... absolutely without the intervention of the... of each State to propose direct interpellations untrammelled... reference to the Bureau, and to vote orders of the... the abolition of the system of transfer in order... to complete the new arrangement of voting the... chapter; the President, Vice-President, and Secre-... of the Chamber, to be elected by the Legislative Body... the position of Secretary-General and Director-General of... of the Ministries, General of the Army, and Vice-Admiral of the... President of the Court of Appeal, Procurator-General or... of the Court of Cassation, to be compatible with the... of a seat in the Chamber. The Senators will, it is... longer be able to hold any office paid by the State in... their post as Senators. The proposal that the... should be elected by the Conseils Généraux has been... but the number of members of the Upper Chamber... be increased."

The Monitor of Monday evening says that Don Carlos... succeeded in eluding the vigilance of the French... and has entered Spain near Arena. A suit... to obtain a judicial separation has just been brought... before the Civil Tribunal of the Seine by Madame... Arenen Scoll, wife of the journalist of that name. The plaintiff is a daughter of Mr. Perkins one of the... partners in the firm of Barclay, Perkins & Co., the... known London brewers. Her demand is based... on charges of cruelty, abusive language, &c., some... which are of such a nature that the Paris law... papers refrain from publishing them. The court... decided that as, up to the present time, no sufficient... reasons had been given to warrant the separation... course must be refused; but it ordered that... Madame Scoll should be admitted to furnish proofs... of her allegations, and appointed a judge to hear the... evidence.

SPAIN.—An engagement occurred on Saturday night... near Ciudad Real, between a band of 500 or 600... Carlists, under Brigadier-General Sabaruge, and the... troops under Commandant Formaseti. The Carlists... were defeated and dispersed, with considerable... in killed and wounded. A Carlist con-... to gain possession of the fortress of Pampe-... has been discovered and defeated by Colonel... Laguera. The principal Carlist agent was killed... a marquis, was severely wounded and made... prisoner. An artillery captain, only 15 days on retired... another retired army official, a priest, and a... government writer, were made prisoners. A Carlist... party has appeared at Tarascon, and been defeated by... the Volunteers. Another Carlist conspiracy has been... discovered in Guipuscoa, one of the Basque provinces. A... of disorders took place at Lerida on Wednesday... and tranquility has been restored. The rest of the... and band in the province of La Mancha, which were... defeated, fled to the Sierra Morena mountains on... Wednesday, and are believed to be returning to their... homes. The Spanish Consul at Perpignan telegraphs... that Don Carlos and Generals Tristany and Elio have... secretly left that town.

PORTUGAL.—The session of the Cortes has been... prorogued by Royal decree to August 15. It is... rumoured that a modification of the Ministry is... imminent. The papers of Friday mention a rumour... that Queen Maria Pia, being no better in health, was... by her physician's advice, indefinitely prolong her stay... abroad, and fix her residence at the Court of King... Victor Emmanuel.

SWEDEN.—The King of Denmark and the members... of the Danish Royal family, accompanied by their... suites, arrived at Stockholm on Friday, and were... received with great ceremony. The city was decorated... with flags, and immense enthusiasm prevailed. On... the arrival of the Royal party salutes were fired by the... ships in the harbour, which included some English... men-of-war. The marriage of the Crown Prince of... Denmark and the Princess Louise, daughter of the... King, was celebrated on Wednesday afternoon. Their... Royal Highnesses left Stockholm in the evening for... the Castle of Haga, where they will remain some time. An... immense number of persons were present at the... festivities, which were celebrated amid great rejoicing. A... grand fête was to be held yesterday at the Castle of... Drottningholm.

SCHLESWIG.—The present which the partisans of... Denmark, in Northern Schleswig, have been to the... Prince Royal and the Princess Louise on their marriage... is an enormous silver cup, on a column 3 feet high. The... pedestal is surrounded with the ciphers of the bride... and bridegroom and the arms of the principal towns of... North Schleswig, Sweden, Denmark, &c. The total... weight of the vase is 14 lb.

HOLLAND.—Rumours have been current at the... Hague that several Dutch officers and sailors had been... massacred by natives on the coast of New Guinea. Intelligence... has been received which proves these... reports to be incorrect. It appears that one officer has... been drowned by accident, and that another officer with... some sailors is in safety. The natives, however, have... demanded a ransom for some others who are in their... power. Three sailors have already returned on board a... Dutch steamer off the coast.

SWITZERLAND.—In the sitting of the National... Council on Saturday the Government was interrogated... respecting the course it had pursued in forbidding... Mazzini to reside within certain distances from the... Italian frontier. The Government justified its con-... duct by the revolutionary doctrines professed by... Mazzini, and the duty imposed upon it by international... law. The Council of States has postponed the con-... sideration of the concession for the St. Gothard Splügen... Railway until the meeting of the Federal Assembly, which... is to be convoked for a special session in Sep-... tember or October.

AUSTRIA.—In the sitting of the Foreign Budget... Committee of the Hungarian Delegation on Monday, Count... Beust spoke on the foreign relations of the... Empire, and specially stated that the best possible... relations existed between Austria and France. Since... Austria had relinquished her Italian territories the... interests and intentions of both countries had become... identical. In reference to Eastern politics, Count... Beust stated that he did not strictly insist on his pro-... gramme of the year 1867, but would rather leave it to... the option of Turkey to follow his counsels as regarded... concessions to the Christian inhabitants. He would... exercise no pressure in this respect. Speaking of... Prussia, Count Beust declared that he had honestly... striven to establish more cordial relations with that... Power, but had hitherto been unsuccessful, as he had... not been met by Prussia in a similar spirit. The... speech was received with satisfaction by the Com-... mittee, and the estimates of the Foreign Budget were... agreed to with scarcely any reduction.

GALICIA.—In consequence of an anonymous letter... a judicial commission, assisted by the clergy, forced... an entrance on the 21st inst. into the Carmelite Con-... vent in Cracow, where they found a nun who had been... locked up in a dark filthy room for 31 years. She had... been utterly neglected, was quite naked, and half mad. Bishop... Galecki, who was present as Papal delegate... overwhelmed the abbess and the nuns with the most... vehement reproaches, asking them whether they were... women or furies, and thanked the judge charged with... the inquiry for his timely and energetic interference. The... confessor of the convent was at once suspended by... the bishop. This intelligence created the greatest... excitement throughout the city. The door and... windows of the convent were broken open, and a... strong body of military had to be called out to disperse... the rioters. On Saturday evening the disturbances... were renewed. The people again endeavoured to break... into the convent, but were driven back, and thereupon... proceeded to other convents and to the house of the... Jesuits, the rector of whom was insulted. Forty-one... rioters were arrested.

RUSSIA.—Prince Charles of Roumania is expected... at Livadia, in the Crimea, on the 14th of August. Large... numbers of influential Jews of St. Petersburg have... addressed petitions to the Minister of the Interior... and to the Minister of Public Instruction, praying for... an extension of religious and educational rights.

PRUSSIA.—For some time past an organised gang of... English pickpockets have been committing depredations... at Ems, Homburg, and Frankfurt-on-the-Maine, and other... German towns. One of them, a man named Henry Keen, attempted to rob Fazil Pasha, the... brother to the Viceroy of Egypt, of 2500*l.* while he was... at Homburg, but was immediately apprehended, and... sentenced to 18 months' imprisonment, with hard... labour. The police at Frankfurt-on-the-Maine, under... the direction of Dr. Rumpff, have been most energetic... in their efforts to catch the members of the gang, and... have succeeded in taking 16 of them. The names they... have given are Deniston, Milson, Gross, Paget, Wan-... have given are Deniston, Milson, Gross, Paget, Wan-... cliffe, Garnier, Leroy, Roberts, Middleton, &c., but... the most important capture is that of a man named... William A. Davis, the head of the band. Among the

promoters are two women, and they are all now lodged... in the great Frankfurt prison awaiting their trial. ITALY.—The report of the Parliamentary Committee... of Inquiry was issued on Friday. It declares that the... Deputies, Messrs. Baccarelli and Cava, have had no... share of the shares of the... The statement that a... compromise, negotiated and guaranteed by France, was... about to be signed between Italy and the ex-king of... Naples, according a fixed revenue to the ex-king in... settlement of his claims, proved to be a... look up his residence out of Italy. It is... to be without the slightest foundation. Instruments of... the observatory of Vesuvius indicate that a fresh... internal disturbance is commencing in the interior of... the mountain.

PAPAL STATES.—Count Mastai-Ferretti, the Pope's... elder brother, died suddenly last week at Sinigaglia, near... Ancona, where Pius IX., who was warmly attached... to him, visited him some years ago. On receiving the... intelligence of his death the Pope performed the... fatiguing ceremony of ascending the Scala Santa at the... Lateran on his knees, for the repose of the Count's... soul.

GREECE.—M. Christides, the Ministerial candidate... was elected President of the Chamber of Deputies on... Sunday by a majority of 161 to 17.

TURKEY.—Mustapha Pasha, Pasha of the... Viceroy of Egypt, has been received with great dis-... tinction by the Sultan and his Ministers, and has been... appointed a member of the Council of Ministers.

EGYPT.—The Viceroy arrived at Alexandria from... Toulon on Wednesday. The foreign consuls were... present at his reception, and presented an address to... his Highness. An illumination of the city took place... at night. It is rumoured that the Viceroy will only... stay in Egypt for a few days, and then proceed to Con-... stantinople. M. Lesseps, during the progress of the... canal works at Suez, despatched a number of engineers... to the Desert of Sahara to ascertain the exact differ-... ence between its level and that of the Red Sea. The... surveying party found a declivity of 27 metres, which... is presumed to be still greater further inland. M. Les-... seps now suggests the possibility of letting the waters... of the Red Sea into the interior of Africa by means of... a canal, and thus converting this almost unexplored... desert into a large inland lake, which would afford easy... access to the fertile countries surrounding it.

CAPE OF GOOD HOPE.—Accounts from the Cape... to the 20th ult. state that difficulties were thickening... on the northern border of the colony. The Koranna... bushmen, excellent marksmen with firearms, were be-... coming very daring. Two engagements had occurred... between them and the police. In the first the Korannas... lost 30 killed and several prisoners; but in the second... the police retreated before overwhelming numbers, and... lost seven killed. Doubts were entertained whether... the police would be able to chastise the Korannas. An... agitation for an amendment of the Constitutional... Charter, by introducing in a modified form the prin-... ciple of responsible government, had commenced in... Natal, and had been taken up by its Legislative... Council. The prospects of gold digging were said to be... improving. A Natal mining company had fitted out... 40 Australian diggers to work. The arrival of the... steamer bringing out a German exploring expedition, formed... under the auspices of the Prussian Govern-... ment, was hourly expected. Sir John Swinburne was... busy quartz-crushing. Herr March had arrived in... Potchefstroom, and although very near at one time to... the supposed site of the ancient Ophir, the natives... would not permit him to go there. Diamonds were... being constantly received at the frontier towns of the... colony from the up-country districts, and had become... a staple of auction sales. The Transvaal Government... claimed to have secured, through Mr. M'Corumale, a... harbour on the East coast. How obtained was not... known. The Boer Commandos against the natives... continued. The prisoners thus made were distributed... among the farmers, and remained enslaved. The... Orange Free State had declared it high treason for any... of its subjects to promote annexation or federation... with Cape Colony. The colonial Parliament was to... meet on the 23d of June.

INDIA.—It is believed that Mr. Maine will leave... India in October for Europe. The Supreme Govern-... ment is believed to have resolved to pass at least half... of every year in Calcutta. It is said that sanction will... shortly be given to the construction of a railway from... Calcutta to Darjeeling. A gentleman has arrived in... India, deputed by the Government of South Australia... to make arrangements with the Government of India... for a systematic importation of Australian horses for... remounts, &c. The through train from Amalabad to... Bombay met with an accident on the 25th ult. between... Ahmedabai and Baroda, by which 11 native... passengers were killed and seven wounded. The... accident is said to have been caused by the engine... coming in contact with a buffalo. Reports from Nus-... seerabad show that cholera was disappearing among... the troops there.

JAPAN.—The recapture of Hako ladi by the Mikado's... troops is confirmed. The finances of the country are... very disorganised, and paper money is being forced on... the people under pain of death. Trade, both native... and foreign, is paralysed. The steamer Havmaro has... been totally lost near Yokohama. Several Europeans... were drowned.

UNITED STATES.—President Grant and Mr. Fish... have gone to Washington from Longbranch to attend... a special Cabinet Council. The Radicals of Mississippi... are organizing opposition to Mr. Dent, who is... reported to be receiving support from the Democrats. One... hundred and forty of Colonel Ryan's men have been... discharged under parole not to violate the neutrality... laws. The Press generally throughout the country... express great satisfaction at the success of the French... Atlantic Cable, and strongly

condemn the efforts made to embarrass the enterprise. The Californian Republican Convention met on the 29th ult., and adopted resolutions endorsing the action of Congress in rejecting the Alabama Claims Treaty, and declaring it to be the duty of the Government to demand full reparation for the injuries done by the British Government and people of America during the rebellion, and also for the Chinese immigration, but opposing Chinese immigration. A fearful disaster occurred on Tuesday on the Memphis and Ohio Railroad, near Clarksville, Tennessee. A passenger train fell through a bridge, and all the cars but one were burnt. Six persons were killed and 30 wounded.

CANADA.—Mr. Rose, the Canadian Finance Minister, has resigned.

MEXICO.—General Vega, supported by Lozada's troops, is organising an independent Confederacy in the Northern States of the Republic.

WEST INDIES.—The yellow fever is decreasing in the West Indian Islands. A few cases still occurred in Guadaloupe and Martinique, but the epidemic character of the disease was nearly extinct.

CUBA.—Telegrams from Havannah say that the insurgents are active in the Central Department, and have destroyed much property about Trinidad. Recently a large insurgent force attacked Puerto Principe, but were repulsed with a heavy loss. The conscription will soon be enforced throughout Cuba. The newspapers there insist on it. The Catalonian volunteers who were ordered to guard the Urebitas Railroad have mutinied, refusing to guard the road any longer, and demanding active service. General Letona refused to accede to the application, and ordered the colonel to be arrested. The volunteers then marched to Puerto Principe, where they liberated the colonel and imprisoned General Letona. It is expected that they will endeavour to shoot him.

CHILI AND PERU.—The contract for working the Megillones guano beds had been rescinded by the Chilean Government. A new proposition by Senor Gama was likely to be accepted. Messrs. Clark & Co. are to construct a telegraph line across the Andes, privileged for nine years and subsidised by Government, the telegrams to be transmitted free; and the line at the expiration of the term to become State property. The public works and buildings destroyed by earthquakes at Arica and Iquique, were being actively rebuilt.

Parliament.

In the House of Lords on Friday, the Duke of ARGYLL made his annual statement on the Indian revenue. He showed that in the ten years since the Mutiny the revenue had increased by more than 15 millions sterling, about half of which was due to increased or new taxation, and the remainder to the increase of returns from old sources, such as opium, the land revenue, and the Customs, the increase of profit to the State having been accompanied by a reduction of the burden on the taxpayer. Lord HALIFAX, the Marquis of SALISBURY, Lord LAWRENCE, Lord LYVEDEN, and Earl FORTESCUE expressed a general approval of the Government policy in respect to public works, and especially railways, but agreed that there was little expectation of any material reduction of expenditure. The Assessed Rates Bill and the Endowed Hospitals (Scotland) Bill were read a third time and passed. On Monday the Royal assent was given by Commission to the Irish Church Bill and other measures. Lord DE LISLE and the Earl of WINCHILSEA asked for information respecting three pictures bought for the National Gallery, on the supposition that they were by Rembrandt, Giorgione, and Michael Angelo, but which were now believed to be spurious. Lord OVERSTON, as a trustee of the National Gallery, said that the supposed spurious pictures had been purchased on the judgment of the director, with the acquiescence of the trustees, who were therefore jointly responsible, and adduced a great body of positive evidence in favour of the genuineness of the three pictures. These explanations were received as satisfactory by the Earl of MALMESBURY, Earl GRANVILLE, and Viscount HARDINGE, who expressed a high opinion of the general management of the National Gallery by the director and trustees. The Marquis of CLANRICARDE called attention to the inefficiency of the police and magisterial arrangements for the prevention of crime, or detection of criminals, in Ireland, and contended that the Government should place themselves more in communication with the local resident gentry. Lord DEFFERIN, in reply, regretted that he could do no more than repeat what he had said on a former occasion, that the Government would neglect no measure to bring the perpetrators of the recent crimes to punishment. On the motion of Lord PENZANCE the Evidence Amendment Bill, after a short discussion among the law lords, was read a second time. The Bankruptcy Bill and the Imprisonment for Debt Bill passed through Committee. The Endowed Schools Bill, the Medical Superannuation (Ireland) Bill, and several other measures were read a third time and passed. On Tuesday the Tenants' Purchase by Instalments (Ireland) Bill and the Tenants' (Ireland) Bill were withdrawn; and several Bills were advanced a stage. The Earl of CARNARVON called attention to the state of affairs in New Zealand, and expressed his opinion that the policy which had been pursued by several successive Secretaries of State would ultimately be acquiesced in by the colonists as the best and only one that could be adopted. He recommended that a Commissioner, armed with powers like those with which Lord Durham, Sir H. Storks, and Mr. Gladstone were invested, when they were sent respectively to Canada, Jamaica, and the Ionian Islands, should be sent to

New Zealand. Earl GRANVILLE accepted the criticisms of the noble earl as calculated to strengthen the policy of the Government, and insisted on making the colony feel that it must adopt for itself a decided course, whether that course were war, or, what he should advise, a system of wise conciliation of the natives. The Bishop of LICHFIELD said that in his judgment advantage should be taken of the "King movement" to assign a certain district to the native king, accompanied by legal powers to frame laws for the government of his people. He believed that the colonists were powerless to suppress the bands of natives now in rebellion, and that they had, therefore, a clear claim on the mother country for maintaining peace and the supremacy of the Crown. Lord LYVEDEN deprecated any deviation from the non-intervention policy, and said that so long as the colony could rely on subventions of money and troops from England it would never put forth its full strength for its own defence. On Thursday, Earl DE GREY moved the second reading of the Contagious Diseases (Animals) Bill. He explained that it consolidated and strengthened existing enactments, empowered the Corporation of London to provide a market to which all foreign cattle from suspected countries would be sent, and removed the restriction on the removal of home-bred animals beyond the metropolitan limits. The Bishop of GLOUCESTER suggested an extension of the clauses respecting the treatment of animals in transitu, a suggestion in which Lord ROMNEY concurred; and, after some remarks from Lords COLONSAY and EGERTON of TATTON, the Bill was read a second time. The Bankruptcy Bill was read a third time and passed, after some remarks by Lord ROMILLY, who pointed out that the liability of future earnings, in cases where the dividend did not amount to 10s. in the pound, would operate as a temptation to dishonest practices. The Bishop of GLOUCESTER, on behalf of the Archbishop of Canterbury, moved the second reading of the Presentation to Benefices belonging to Roman Catholics Bill, the object of which was to repeal an old enactment limiting incumbents presented by Universities to 60 days' non-residence in a year, under penalty of forfeiture of their preferments, and to allow them, like other clergymen, three months' holiday. Lord CAMOYS, as a Roman Catholic patron, urged the propriety of abolishing altogether an invidious disqualification which did not apply to Jews or Dissenters, and of allowing Roman Catholics to present to benefices; but the Bishop of GLOUCESTER, in the absence of the Primate, refrained from giving any opinion on this point, and the Bill was then read a second time. The Earl of SHAFTESBURY withdrew his Ecclesiastical Courts Bill, and a large number of measures were advanced a stage. Yesterday Lord PENZANCE moved the second reading of the Married Women's Property Bill. The Duke of NORTHUMBERLAND moved that the Bill be read a second time this day three months. Lord CAIENS, while avowing himself a supporter of the Bill, expressed a hope that it would not be carried beyond the second reading this session. Lord ROMILLY denied that the Bill revolutionised the marriage laws. The House was left sitting.

In the Commons on Friday, after the Lords amendments in the Irish Church Bill had been agreed to, Mr. NEWDEGATE called attention to the recent arrest of Murphy, the No Popery lecturer, and moved a resolution condemning the action of the Home Secretary in reviving an obsolete statute for the purpose of forbidding, under penalties, the right of free speech, and the holding of meetings of a controversial character, on the ground of their being calculated to lead to a breach of the peace. Mr. BRUCE, in reply, said that he had acted in accordance with the advice of the law officers of the Crown, in forbidding the opening of rooms for Murphy to lecture in, because wherever he went his presence was the sure forerunner of violence and outrage. After a long discussion, in which Mr. DIXON, Mr. MUNTZ, Mr. WHALLEY, Lord SANDON, Mr. DOWNING, Lord C. HAMILTON, the ATTORNEY-GENERAL, Mr. T. CHAMBERS, Mr. T. E. SMITH, Mr. HOLT, and Mr. HENLEY took part, the motion was negatived without a division. Mr. MUNTZ asked for information respecting the recent changes in the system of making contracts for the navy. Mr. BAXTER, in reply, said that a great saving had already been effected in various departments by the new system of contracts and purchase. With regard to contracts, he had discovered an extensive system of "tipping" both at Somerset House and in the dockyards, and his short official experience had convinced him that, without putting down a single ship or sailor, immense reductions might be made in our overgrown establishments. Sir J. HAY and Sir J. ELPHINSTONE suspended their judgment on the expediency of the new system until it had been tried. Mr. CANDLISH, Mr. RATHBONE, and Mr. MUNDELLA recommended the infusion of a greater number of business men into the management of these departments. Mr. LIDDELL congratulated the Government on their economical success, and Mr. CHILDEES, in defending his administration of the Navy, said that it had given England a stronger fleet than she had possessed since the French War. Mr. MUNDELLA said that the Army purchase system was devised for corruption. Mr. CARDWELL, in reply, showed that it was virtually the model for the changes being made at the Admiralty. Mr. HENLEY concluded the debate by predicting that private purchase would speedily make the Government as unpopular as any one could desire. Several Bills were forwarded a stage. On Monday the Royal assent was given to the Irish Church Bill, and the SPEAKER'S official announcement of the fact on his return was loudly cheered by the Ministerial benches. Mr. BRUCE appealed to members who had preliminary
