## Mr. Walker's descriptions of Chalcilites from Coquimbo. 185

## Closterocerus Pelor, Mas. Viridis, abdomen purpureum, antennce ni-

 gra, pedes fluvo-fulvi, femora nigra, ala sublimpida.Corpus angustum, sublineare, convexum, viride, nitens, scitissime squamoum, parce hirtum : caput transversum, brevissimum, impressum, thorace paullo latius; vertex latus; frons alrupte declivis : oculi picei, mediocres, non extantes: antemæ nigræ, subfiliformes, hirtæ, graciles, thorace non longiores ; clava fusiformis, acuminata, articulo precedente plus duplo longior: thorax ovatus: prothorax brevissimus, supra vix conspicuus : mesothoracis scutum longitudine latius; parapsidum suturae bene determinate, postice approximate; scutellum subconicum : metathorax mediocris, declivis, obconious : petiolus brevissimus : abdomen sublineare, depressum, læve, purpureum, basi viride, thorace paulio brevius et angustius: pedes fulvi, graciles, subwquales; coxæ nigrie; femora nigra, apice fulva; tarsi flavi, apice fusci: alæ sublimpidæ; squamulæ picew; nervi fulvi; nervus uharis hunerali duplo longior, radialis vix ullus, cubitalis brevissimus in alæ discum abrupte declivis; stigma minutum. (Corp. long. lin. $\frac{1}{2}$; alar. lin, 3.)

## XXXI.—Descriptions of Chalcidites discovered in Coquimbo by C. Darwin, Esq. By Francis Walker, Esq., F.L.S.

Lamprotatus Tubero, Fem. Ater, abdomen nigro-purpureum, antenne fuscce, pedes fulvi, femora picea, alce limpida.
Corpus breve, robustum, convexum, atrum, nitens, scitissime squamcum, parce hirtum: caput transversum, breye, thorace latius; vertex latus; frons impressa, abrupte declivis : oculi picei, mediocres, non extantes : antemnæ fusca, extrorsum crassiores, thorace non longiores; articulus $1^{143}$ niger, longus, gracilis; $2^{\text {us }}$ piceus, longicyathiformis; $3^{\text {u* }}$ et $4^{\text {us }}$ minimi; $5^{\text {ds }}$ et sequentes usque ad $10^{\text {um }}$ breves, approximati; clava conica, acuminata, articulo $10^{\circ}$ duplo longior : thorax ovatus : prothorax transversus, mediocris, antice angustus: mesothoracis scutum longitudine multo latius; parapsidum suturæ sat bene determinatæ; scutellum subconicum; paraptera et epimera magna : metathorax magnus, obconicus, declivis: petiolus sat lougus: abdomen subrhombiforme, leve, nigro-purpureum, supra planum, subtus carinatum, thoracis dimidio vix longius: pedes fulvi, simplices, subacquales; coxer nigre; femora picea, apice basique fulva; tarsi apice fusci: alæ limpidæ; вquamulæ picea; nervi fulvi; nervus humeralis ulnari multo longior, radialis ulnari vix brevior, cubitali multo longior; stigma minutum. (Corp. long. lin. $1 \frac{1}{4}$; alar. lin. 21 ${ }^{\frac{1}{2} \text {.) }}$

Var, $\beta$. Antennis articulus $1^{\text {ns }}$ viridis: abdomen ænewm : femora nigra; tibia piceæ.

Lamprotatus? Nevolus, Mas? Viridis, antenne picece, pedes piceovirides, tarsi flavi, ala limpide.
Corpus angustum, convexum, viride, nitens, scitissime squameum, parce hirtum: caput transversum, breve, thorace latius; vertex latus; frons impressa, abrupte declivis: antennæ subfiliformes, graciles, piceæ, thorace paullo longiores; articulus $1^{\text {us }}$ longus, linearis, nigro-viridis; $2^{\text {ns }}$ longicyathiformis; $3^{3 / 5}$ et $4^{143}$ minimi; $5^{\text {us }}$ et sequentes usque ad $10^{\text {um }}$ breves, approximati; clava longiconica, acuminata, articulo $10^{\circ}$ plus duplo longior: thorax ovatus: prothorax transversus, mediocris, antice angustus: mesothoracis scutum longitudine latius; parapsidum suture bene determinate, postice approximate; scutellum subconicum : metathorax mediocris, obeonicus, declivis: abdomen ademptum : pedes virides, graciles, subæquales; trochanteres picei ; genua flava; tibiæ piceo-virides; tarsi flavi, apice fusci : alx limpidx ; squamulx piceæ; nervi fusci ; nervus humeralis ulnari multo

## 186 Mr . Walker's descriptions of Chalcidites from Coquimbo.

longior, radialis ulnari non brevior, cuidali multo longior ; stigma minutum. (Corp. long. lin. 1?; alar. lis. 13.3.)

Gastrancistrus Polles, Fem, Viridis, abdomen nigro-cupreum, pedes piceo-virides, tarsi fulvi, ala limpida.
Corpus angustum, convexum, viride, nitens, lave, parce hirtum: caput transversum, breve, thorace paullo latius; vertex latus; frons impressa, abrupte declivis: oculi rufi, mediocres, non extantes : antenne nigre, clavate, submoniliformes, thorace non longiores, articulus $1^{\text {us }}$ longus, gracilis; $2^{\text {as }}$ longicyathiformis; $3^{\text {as }}$ et $4^{45}$ minimi; $5^{\text {us }}$ et sequentes breves, approximati, usque ad $10^{\text {am }}$ latescentes: thorax ovatus: prothorax transversus, brevissimus : mesothoracis scutum longitudine latius; parapsidum suturee bene determinatæ, postice approximatæ; scutellum subconicum : metathorax inediocris, obconicus, declivis: petiolus brevissimus: abdomen fusiforme, nigro-cupreum, basi viride, supra depressum, subtus carinatum, apice acuminatum, thorace paullo longius et multo angustius: pedes virides, simplices, subæquales ; trochanteres picei; genua fulva; tibis piceæ, apice fulve; tarsi fulvi, apice fusci : alæ limpidæ; squamulæ piceæ; nervi fusci ; nervus humeralis ulnari multo longior, radielis ulnari non brevior, cubitali multo longior; stigma sat magnum. (Corp. long. lin. $\frac{3}{3}$; alar. lin. 1 $1 \frac{1}{4}$.)

Platyterma Nephele, Mas. Viridis, aldomen eupreo-ceneum, antennac flave, pedes flavi, ala limpide.
Corpus sublineare, sat angustum, convexum, late viride, nitens, scitissime squameum, parce hirtum : caput transversum, breve, thorace paullo latius; vertex latus; frons abrupte declivis: oculi rufi, mediocres, non oxtantes: antennæ subclavate, flavæ, thorace paullo longiores; articulus $1^{\text {uts }}$ longus, gracilis; $2^{\text {us }}$ longicyathiformis; $3^{\text {us }}$ et $4^{\text {us }}$ minimi ; $5^{\text {us }}$ et sequentes breves, approximati, usque ad $10^{\mathrm{um}}$ curtantes; clava ovata, articulo $10^{\circ}$ multo latior et plus duplo longior: thorax ovatus : prothorax transversus, brevissimus: mesothoracis scutum longitudine paullo latius; parapsidum suture vix conspicuæ; scutellum subconicum: inctathorax brevis, declivis, postice angustus: petiolus brevissimus: abdomen depressum, leve, sublineare, capreoæneum, thorace paullo brevius et angustius: pedes flavi, simplices, subæquales; coxa virides; tarsi apice fusci : alæ limpidæ; squamula fulve; nervi flavi; nervus humeralis ulnari multo longior, radialis uinari vix brevior, cubitali multo longior; stigma minutum. (Cory. long. lin. $\frac{3}{3}-1$; alar. lin. $1_{\frac{1}{3}}-1 \frac{3}{4}$.)

## Pteromalus Toxeus, Fem. Cupreus, antenno nigra, pedes fulvi, femora nigra, ale limpide.

Corpus robustum, convexum, cupreum, parum nitens, seitissime squameum, parce hirtum : caput transversum, breve, thoracis latitudine; vertex latus; frons impressa, abrupte declivis : oculi picei, mediocres, non extantes : antenne nigre, subclavatæ, thorace non longiores, articulus $l^{\text {us }}$ longus, sublinearis; $2^{\text {us }}$ longicyathiformis ; $3^{\text {us }}$ et $4^{\text {us }}$ minimi; $5^{\text {us }}$ et sequentes usque ad $10^{\text {em }}$ breves, approximati ; clava conica, acuminata, articulo $10^{\circ}$ plus duplo longior: thorax ovatus: prothorax brevissimus: mesothoracis scutum longitudine latius; parapsidum suturee vix conspicuæ; scutellum brevi-obconicum: metathorax brevis, declivis, postice angustus: abdomen ademptum: pedes fulvi ; coxæ nigræ; femora nigra, apice fulva; tarsi apice fusci: alæ limpidæ; squamulæ piceæ; nervi fulvi; nervus humeralis ulnori duplo longior, radialis ultiari non brevior, cubitali multo longior; stigma minutum. (Corp. long. lin, $1 \frac{1}{2}$ ?; alar. lin. $2 \frac{1}{3}$.)

Pteromalus Sestius, Fem. Niger, abdomen cupreum, antenna nigra, pedes fulvi, femora nigra, alee limpide.
Corpus robustum, convexum, nigrum, parum nitens, scitissime squameum,

## Mr. Walker's descriptions of Chalcidites from Coquimbo. 187

parce hirtum : caput transversum, breve, thorace paullo latius; vertex latus ; frons impresse, abrupte declivis: oculi mediocres, picei, non extantes: antenne nigre, subclavate, thorace non longiores; articulus $l^{\text {us }}$ longus, gracilis; $2^{\text {us }}$ longicyathiformis ; $3^{\text {un }}$ et $4^{\text {un }}$ miuimi ; $5^{\text {v5 }}$ et sequentes usque ad $10^{\text {um }}$ breves, approxiniati; clava conica, acuminata, compressa, articulo $10^{\circ}$ latior et multo longior: thorax ovatus : prothorax transversus, brevissimus: mesothoracis scatum longitudine latius; parapsidum suturee sat bene determinata, postice approximate ; scutellurn subconicum : metathorax brevis, declivis, postice angustior : petiolus brevissimus : abdomen lougi-ovatum, cupreum, nitens, love, supra depressum, subtus carinatum, apice acuminatum, thorace paullo longius et angustius : pedes fulvi, simplices, subrequales; coxe nigra ; troehanteres picei ; femora nigra, apice fulva; tarsi apice fusci : alæ limpidæ; squamulæ piceæ; nervus humeralis ulnari duplo longior, radialis ulnari non brevior, cubitali multo longior ; stigma minutuun. (Corp. long. lin. $1 \frac{1}{4}$; alar, lin. 2.)

Pteromalus Rbœbus, Fem. Niger, abdomen nigro-eneum, antennce nigra, pedes fulvi, femora nigra, alee limpida.
Corpus convexum, nigrum, scitissime squameum, partum nitens, parce hirtum : caput transversum, breve, thorace paullo latius; vertex latus; frons impressa, abrupte declivis : oculi picei, mediocres, non extantes : antennæ nigra: thorax ovatus: prothorax transversus, brevissimus: mesothoracis scutum longitudine latius; parapsidum suturee vix conspicue; scutellum brevi-conicum : metathorax brevis, declivis, postice angustior: petiolus brevissimus: abdomen ovatum, jigro-æneum, nitens, leve, supra depressum, subtus carinatum, thorace paullo longius : pedes fulvi, simplices, subæquales; coxæ nigre; femora nigra, apice fulva; tarsi apice fusci : alée limpidæ; squamula piceæ; nervi fulvi, (Corp. long. lin. 1; alar. lin. $1 \frac{1}{4}$.)

Ptoromalus Vitula, Mas. Cupreus, abdomen viride, discus purpureus, antenne piceæ, pedes nigri, tarsi fulvi, ala limpida.
Corpus cupreum, convexum, parum nitens, scitissime squameum, parce hirtum: caput transversum, breve, thorace latius; vertex latus; fions abrupte dechivis: oculi picei, mediocres, non extantes : antennæ picew, subclavatex, thorace non longiores; articulus $1^{\text {us }}$ longus, gracilis; $2^{\text {us }}$ longicyathiformis; $3^{u s}$ et $4^{\text {ub }}$ minimi ; $5^{\text {us }}$ et sequentes breves, approximati, usque ad $10^{\text {uns }}$ curtantes et latescentes; clava conica, acuminata, articulo $10^{\circ}$ latior et duplo longior: thorax ovatus: prothorax transversus, brevissimus: mesothoracis scutum longitudine latius; parapsidum suture sat bene determinatæ; scutellum subconicum : metathorax brevis, declivis, postice angustus: petiolus brevissimus: abdomen sublineare, depressum, nitens, lave, viride, thorace angustius et paullo brevius ; discus obscure purpureus : pedes nigri ; trochanteres picei ; genua fusca; tibie apice fulve ; tarsi fulvi, apice fusci : ale limpidæ; squamulæ piceer; nervi fulvi; nervus humeralis ulnari fere duplo longior; ratialis ulnari non brevior, cubitali multo longior; stigma ininutum. (Corp. long. lin $\frac{3}{4}$; alar. lin. $1 \frac{1}{3}$.)

Pteromalus Cinoc, Fers. Nigro-ceneus, abdomen aneum, antenne nigra, pedes nigri, tarsi favi, ala limpida.
Corpus crassum, convexum, nigro-scncum, nitens, seitissime squameum, parce hirtum : caput transversum, breve, nigrum, thorace paullo latius; vertex latus ; frons impressa, abrupte declivis: oculi picei, mediocres, non extantes: antenna nigre, clavate, thorace non longiores; articulus $1^{\text {us }}$ longus, gracilis; $2^{45}$ longicyathiformis ; $3^{04}$ et $4^{400}$ minimi; $5^{\text {u8 }}$ et sequentes breves, usque ad $10^{\text {um }}$ curtantes et latescentes; clava ovata, articulo $10^{\circ}$ multo latior et plus duplo longior : thorax ovatus: prothorax brevissimus: mesothoracis scutum longitudine latius; parapsidum suture vix conspicue:

## 188 Mr . Walker's descriptions of Chalcidites from Coquimbo.

scutellum obeonicum : metathorax brevis, declivis, postice angustus : petiolus brevissimus: abdomen longi-ovatum, æneum, leve, supra planum, subtus profunde carinatum, apice acuminatum, thorace paullo longius et angustius; segmentum $I^{\text {um }}$ sat magnum ; $2^{\text {uts }}$ et sequentia brevia: pedes nigri, simplices, subrequales; trochanteres picei; genua fulva; tibiæ apice flavæ; tarsi flavi, apice fusci; propedum tibiæ piceæ, tarsi fulvi : alæ limpidæ, mediocres; squamule picea; nervi flavi ; nervus humeralis ulnari duplo longior, radialis ulnari brevior, cubitali longior ; stigma minutum. (Corp. long. liu. $1 \frac{1}{4}$; alar. lin. 2.)

Tetrastichus Narcieus, Fem. Niger, antennee nigra, pedes flavi, femora picea, ale limpida.
Corpus sat latum, convexum, nigrum, nitens, lave, parce hirtum: caput trunsversum, brevissinum, thoracis vis latitudine; vertex sat latus; frons impressa, abrupte declivis: oculi rufi, mediocres, non extantes: antennæ nigre, subclavatæ, thorace non longiores : thorax ovatus: prothorax transverses, supra non conspicuus: mesothoracis scutum longitudine vix latius; parapsidum suturæ remotæ, bene determinatæ, postice approximate; scutellum obconicum, bisulcatum: metathorax transversus, brevis, postice angustus: petiolus brevissimus: abdomen longi-ovatum, supra planum, subtus carinatum, apice acuminatum, thorace pauilo angustius et multo longius: pedes flavi, simplices, subæquales; coxæ nigre ; femora picea, apice flava; tarsi apice fusci: alæ latæ, limpidæ; squamulx picea; nervi fulvi; nervus ulnaris humerali duplo longior, radialis vix ullus, culitalis longus; stigma minutum. (Corp. long. lin. $\frac{3}{4}$; alar. lin. $1 \frac{1}{2}$.)

Platygaster Sylea, Fem. Atra, antennar nigra, pedes nigri, tarsi picei, ala subfusca.
Corpus convexum, atrum, nitens, lave, parce hirtum: caput transversum, breve, thoracis latitudine; vertex latus; frons abrupte declivis, non inpressa : oculi picei, parvi, uon extantes : antennee nigre, subfiliformes, graciles, ad os insertæ, thorace multo longiores; articulus $I^{\text {us }}$ longus, subclavatus; $2^{\mathrm{us}}$ longicyathiformis; $3^{\mathrm{us}}$ et $4^{\mathrm{us}}$ longi, subæquales; $5^{\text {us }}$ et sequentes usque ad $10^{\text {um }}$ breves, subrotundi: thorax longi-ovatus : prothorax brevissimus, supra vix conspicuus : mesothoracis scutum longitudine non latius; parapsidum suturee vix conspicuæ; scutellum subrotundum, non productum: metathorax mediocris, obconicus, declivis: petiolus brevissimus: abdomen subfusiforme, thorace longius et angustits; segmentum $1^{u m}$ magnum; $2^{\text {uns }}$ et sequentia brevia: pedes nigri, simplices, subæquales, femoribus tibiisque elavatis, trochanteribus genubus tarsisque piceis : ale subfusce; squamula piceæ. (Corp. long. lin. $\frac{3}{4}$; alar. lin. $1_{\left.\frac{1}{4} .\right)}$.)

Omaloderus intrepidus (Betthylo affine, n. g. Haliday MSS.). Niger,
antennce fusce, pedes fusci, ala limpide.
Corpus angustum, sublineare, nigruns, planum, lave, nitens, fere glabrum: caput oblongum, thorace paullo latius : oculi picei, laterales, anteriores, sat magni : ocelli 3 picei, capite postico insidentes, approximati, triangulum fingentes; medius perparum antepositus: antenne fusce, 14 -articulatze?, graciles, moniliformes, thorace non longiores; articulus I ${ }^{03}$ validus, $2^{\text {us }} \mathrm{mi}$ nor; $3^{115}$ et sequentes usque ad $\mathbf{1 4}^{1 \mathrm{~mm}}$ parvi, breves, subequales: thorax Iongiovatus: prothorax sat magnus, conicus, postice incurvus: mesothoracis sentum brevissimum, longitudine plns duplo latius; parapsidum suture bene determinatæ, parallelæ; scutellum obconicum, parvum: metathorax magnus, obconicus : petiolus brevis : abdomen longi-ovatum, thorace paullo brevins; segmenta transversa, subæqualia: pedes fusci, simplices, subæquales ; coxæ nigra; tarsis articuli $1^{\circ}$ ad $5^{u m}$ curtantes : ale angustex, limpidæ; squamula picere; nervi fulvi, proalis areolas cubitales 3 et subcubitales 2 fingentes. (Corp, long. lin. $1 \frac{1}{4} ;$ alar. lin. $1_{\frac{3}{4}}$.)
