ment for children, the aged and infirm, and would not diminish the amount of labour on plantations.

J. H. H. J. H. H. To the Editor of THE GARDENERS' CHRONICLE:

Dear Sir,—You have already pointed out the advantages of the new varieties of sweet potatoes, but you have not stated what is the percentage of the crop of sweet potatoes in the United States. This is a matter of some importance, as the demand for sweet potatoes in this country is much greater than the supply, and it is desirable that we should cultivate them in as large quantities as possible. It is difficult to say just how much the demand is, but I am inclined to think that it is about one million bushels per annum.

Yours truly,

[Signature]

[Some part of a letter discussing the cultivation of sweet potatoes in the United States, mentioning the need for new varieties to meet the demand.]

Notes of Books.

We have received a volume of the Gardeners' Chronicle, containing the 1863 edition of Gardening for Pleasure and Profit, which is an interesting and well-written book. It contains many practical hints and suggestions for the successful cultivation of various plants, including vegetables, flowers, and fruit trees. The book is well illustrated with numerous plates, and it is a valuable addition to the library of every gardener.

[Discussion of the book, highlighting its contents and usefulness for gardeners.]

The Gardener's Chronicle [Dec. 29, 1863].
