**THE GARDENERS' CHRONICLE.**

**JULY 25, 1867.**

**The Effects of the Potato Blight.**

*... and the extent of the damage caused by the disease has led to a consideration of the steps that may be taken to control its further spread. Various measures have been proposed, including the introduction of resistant varieties, the use of fungicides, and the destruction of infected plants. The most promising approach appears to be the development of new varieties that are resistant to the disease.*

**The Greenhouse at St Leonards.**

*... the greenhouse has been redesigned and renovated, with the aim of improving its climate control and increasing light penetration. The new design includes a higher glasshouse roof and increased ventilation. The results have been positive, with increased growth and health of plants.*

**Notes of Books.**

*... the book reviews cover a range of topics, from gardening and horticulture to botanical studies. Each review provides a detailed analysis of the book's content, focusing on its relevance to the field and the insights it offers to professionals and enthusiasts alike.*
