THE ZOOLOGICAL GARDENS.

Now tape for some time, and I am sure that the public is beginning to form an idea of the extent of the Zoological Gardens. It is not the time yet to speak of the improvement that has taken place in the last few years, but I am sure that the public will be the first to acknowledge the fact that the Zoological Gardens are taking a more prominent place in the world. The collection of animals is increasing every year, and the new buildings are being erected with great care and attention. The public is becoming more and more interested in the Zoological Gardens, and I am sure that the collection will continue to increase in the future.

THE GORILLA.

A recent visit to the Zoological Gardens was very interesting. The gorilla, which is an interesting animal, was the chief attraction. It is a large, powerful animal, with a thick, brown coat, and a long, thick tail. The gorilla is a very intelligent animal, and is very fond of playing with children. It is a very fine animal, and is a great favorite with the public.

EXHIBITION OF GORILLAS.

Mr. De Chantell, who has exhibited the gorillas, is a great lover of animals, and has spent many years in the study of their habits. He has a large collection of animals, and is always ready to show them to the public. His exhibition of gorillas is very interesting, and is a great attraction to the public.
