DOWN, KENT, 26th December 1851.

MY DEAR SIR,—I HAVE much pleasure in expressing my high opinion of your Zoological attainments; and your great zeal for every branch of Natural History must strike all who are acquainted with you.

Your papers in the scientific journals show how successfully you have worked out original materials. I have often had occasion to visit the working department in the British Museum, and I have invariably found you, permit me to add, most zealous and obliging in your endeavours to aid me in every possible way, and in giving me all the information in your power.

You are at full liberty to show this letter to any one; and I beg to remain, my dear Sir, yours sincerely,

CHARLES DARWIN.
