

Coffea Calliandra 1873

with narrow leaflets like a narrow - sport  
leaves very - in some places & leaflets -  
leaflets very leaflets & twisted - like leaves  
a part of leaf - by implying lying on both  
sides, & but on under side I think - a 4 inch  
aperture in web can take sides to be cut off.

96 leaflets under from base & from, in case  
open of leaf & from it to some time  
in-vented on - C. copulata, or in C. laevigata,  
which they find like C. copulata

Plants of 877 with very 4 leaves & 10 petioles at joint  
extra - [9' 4" to base has view of with a  
web of it, but to leaflets that & to leaflets long from middle,  
they twisted towards top of leaf - to twisted leaflets  
are up, in up with, which is in to first leaf  
base of leaf, - in to some species -

by 18" spread with width of 67" - main plant  
60 100 position, the red leaflets under  
2 eyes, is the black from Hesperis &  
that from - like leaflets.]

Copie in manuscript - I might like to see it; some of  
Lettice's letters struck me, but I don't see how  
near they are to the ones you found before  
me - however possible - I do not know  
what I have inserted - I hope it  
is (as you think) the length you <sup>like</sup> see, the length!  
All the letters were not really altered; I  
cannot understand you. -  
I like your letter to me - very
