## NEW BOOKS.

---

We have received from D. Appleton & Company, New York, through A. Waldteufel, the following new books:

The Movements and Habits of Climbing Plants.  
By Charles Darwin, M. A., F. R. S. Second edition revised. With illustrations. D. Appleton & Company.

Darwin brings to the consideration of this subject—especially interesting to all botanists—the same vigor of thought and fine line of reasoning that characterize his writings on the evolution of the human race. He is always fascinating, always instructive.
