Recent Literature.

bearing on the interesting and somewhat complex subject of the distribution of species within this State. Several of them, of course, must be regarded as stragglers: Polioptila carulea, Eremophila alpestris, Helminthophaga pinus, H. chrysoptera, Dendræca carulea, Icteria virens, Myiobius cristatus, Stelgidopteryx serripennis, Vireo noveboracensis, Lanius ludovicianus var. excubitoroides, Coturniculus passerinus, Pipilo erythrophthalmus, Icterus spurius, Empidonax acaulicus, Centurus carolinus, Strix flammea var. americana, Zenædura carolinensis, Åegialitis wilsonia, Nyctiadea grisea var. navia, Aruletæ exilis, Gallinula galeata, Somateria mollissima, S. spectabilis, Graculus carbo, Larus tridactylus, S. dougalli, and S. fuliginosa. It is interesting to note that the last-mentioned bird was killed ("September 20, 1876") about the same time that nine individuals of the same species were taken in Southern New England.

In conclusion, it is but just to say that "The Ornithological Four" have, in their "Revised List of Birds of Central New York," not only done themselves great credit, but have also made a contribution to our science which must long remain authority concerning the region of which it treats. I consider it the best list of the birds of any part of this State that has appeared for many years. — C. H. M.

Hallock's Sportsman's Gazetteer. — Mr. Charles Hallock, the author of several books on field sports, and the editor and founder of "Forest and Stream," the well-known sportsman's journal, has just issued a fifth edition of his "Sportsman's Gazetteer and General Guide." This book has become a recognized authority on all subjects of which it treats, having been already republished in England, France, and Germany. The naturalist, as well as the sportsman, may find in it convenient directions for reaching desirable localities for the prosecution of his field work. The ornithological portions were, we believe, prepared by Mr. George B. Grinnell. — J. A. A.

Coues's Bibliography of Ornithology. — In the January number of the present volume of the Bulletin (pp. 54-57), in reviewing Dr. Coues's "Birds of the Colorado Valley," we referred in terms of high praise to the "Bibliographical Appendix" of that work, comprising a "List of Faunal Publications relating to North American Ornithology." This, as was then stated, forms only the North American section of the "Faunal Publications" series of a general "Bibliography of Ornithology," upon the preparation of which Dr. Coues is well known to have been for a long time engaged. That our unreserved commendation of the work was well merited is evinced by the subjoined "Memorial," signed by the leading

zoolo\texttildelow s of England, and addressed to Dr. Coues as a testimonial not only to the value and importance of the work he has undertaken, but of their appreciation of the thoroughness of its execution, and of his fitness for the gigantic task he has undertaken. Besides being one of the finest compliments ever paid to an American scientist, it is an appeal to the "powers that be" for a recognition from our government of the importance of the work Dr. Coues is doing for the science of ornithology, with the hope that he may be afforded every necessary facility for the completion of the work under the most favorable circumstances. Furthermore, it is agreeable and conclusive proof that English naturalists are ever prompt to recognize American ones, and to extend to them a friendly, helping hand; and on this account cannot fail to be a gratification to American naturalists in general, as well as to American ornithologists.

In heartily seconding this appeal to the Surgeon-General of the United States Army, and to our government, we feel that we merely reflect the sentiment of all American ornithologists, as we but echo that of the memorialists, when we say that, aside from the great boon the completion of the work would confer upon working ornithologists the world over, it would redound greatly to the credit of our government, which has already an enviable reputation for the aid it has given science, if it could be completed under its auspices, since without its aid the completion of the work cannot probably be soon accomplished. — J. A. A.

"Memorial.

"To Elliott Coues, Esquire, Assistant Surgeon, United States' Army.

"We, the undersigned, beg leave to express our high appreciation of the 'Bibliographical Appendix' to your work, 'Birds of the Colorado Valley,' being No. 11 of the Miscellaneous Publications of the United States Geological Survey of the Territories, under the charge of Dr. Hayden. And at the same time we wish to place on record our gratitude to that gentleman, and to the authorities of the Department to which you are attached, for the liberality they have shown in granting you permission to stay at Washington for the completion of this and other important works upon which you have now been so long and so usefully engaged.

"The want of indexes to the ever increasing mass of Zoological literature has long been felt by all workers in every department of that science; but the enormous labor of compilation has hitherto deterred many from undertaking a task so appalling. It is with no small satisfaction that we recognize your readiness to devote yourself to work of this nature. Moreover, we feel justified in hoping that should the instalment now published in the volume above named be enlarged in a similar manner so as to include a complete Bibliography of Ornithology, this branch of science will possess an index to its writings perhaps more complete as to its scope and contents than any kindred subject of similar extent."
An undertaking of this sort is beset with formidable difficulties; not only is its extent enormous, and the works relating to the subject are widely scattered through many libraries, public and private; but the qualifications of a good bibliographer are not easily to be found united in one person. His application and industry must be untiring, and he must be thoroughly conversant with the art of Bibliography. In addition to these requirements, in a case like the present, an equally thorough knowledge of the subject under consideration is indispensable. You happily combine all these qualifications; your industry has long been approved, your knowledge of books is evident from what you have now put before us, your knowledge of Ornithology has long been known to us. We can well believe that the libraries of your own country are better stored than any others with works relating to the Ornithology of North America, and that therefore the 'List of Faunal Publications relating to North American Ornithology' could be nowhere better prepared than in Washington; but when the ornithological literature of the whole world has to be examined, it seems to us almost indispensable that the older libraries of Europe, and especially of England, France, Italy, Germany and Holland, should be consulted, if one of the chief merits of your work is to be maintained, viz: the consultation at first hand by yourself of every work mentioned therein.

This brings us to one of the chief objects of this memorial, which is to express our sincere hope that time and means will be found you to prosecute in Europe the great undertaking you have commenced so well, and bring it to a successful conclusion. Should the authorities who preside over the Department to which you belong — and especially the Surgeon-General of the United States Army — who have hitherto so liberally granted you facilities for the scientific work you have performed, be disposed to furnish you with these means of perfecting your undertaking, we are convinced that it will reflect great credit to them and the country to which you belong. We on our part, so far as England is concerned, are ready not only to welcome a brother Ornithologist, but also to render you every assistance in our power.

VOL. IV.
ODD BEHAVIOR OF A ROBIN AND A YELLOW WARBLER.—Newspaper ornithology is generally worthy of little attention, but an article entitled "A Robin's Persistency," published in the "Daily Times" of Watertown, N. Y., in the issue of May 24 of this year, comes to me with private indorsements of such a thoroughly trustworthy character, and the incident related is so strange, that it seems worth while to give the
