Enclosure

21. June 1882.

ROSLYN,

HAMPSTEAD, N. W.

Dear Sir

In the "Athens" I see that a Letter from your late much beloved Father Charles Darwin, are requested by you. to be looked over, in preparation of a Life of our great and lamented Naturalist.

I find our Letter written to  
me finally some 30 years ago  
in reply to some crude notions  
I had about Expansion in  
Solids by Heat.

The last page of the Letter is  
Characteristic and full of  
good Advice: by which I have  
profited, and left some  
things too deep for me

How well I remember the  
Sunny beams which came  
out over the ~~the~~ old Room  
of the God: Soc: when Darwin  
Entered; - the few occasions on  
which I had the pleasure of  
Meeting him, he was always  
kind to me out of friendship  
to my dear brother in law  
the late W. Darwin Fox.  
He too was my proposer at the

Zoological Society: a great honor

I greatly value the accom-  
panying letter, and should  
in due time be glad to  
have it returned.

Believe me

Yours faithfully,

Charles St. Wood

Francis Darwin Esq
