

## **Archive of Darwin's works now online**

**CAMBRIDGE, England** – Charles Darwin's work has evolved again. Now it's available in an online archive.

The creators of [www.darwin-online.org.uk](http://www.darwin-online.org.uk) say the Internet trove only is half complete. But it already includes manuscripts and notebooks.

"The idea is to make these important works as accessible as possible; some people can only get at Darwin that way," said project director John van Wyhe, a researcher at Christ's College, Cambridge.
