

July 22 ¹⁸⁷³ Flowers of Drosera open (1)
 7:30 - Plate brought down to study,
 after 20 all closed. Poked n. with
 one flower, in doing this, handled pedicel, the
 flower & another closed in about 5,
 showing it was the handling. Flirted with
 w. water on
 brush, 2 flowers, closed in few minutes, by the
 touch of finger-stalk. - Put Guy
 in water then & it did, by the
 touch of water. In fact a copy from
 here. - (Flower dead at 12^o)
 (Plot on a corner, ^{at} 11:30, Hampton) (Study from 11:30
 for few minutes (could have done)]

Shook + limited - pituit for 1' in 4' 30" of
dark chert; in 5' 30" ft. continued for
shaly quartz chert.

Found water at one exposed place but when
the pituit was split after 12' - then pituit
water out 2 flows; in 6' in of thin chert;
to the top chert in 8' + vent chert in
8'.

Shalt with 2 flows out of long exposed bank
out of shaly; in 7' a split; in 12' ft by
large in vent chert.

Pituit flow of w. out flows; in 5' chert - do

Pituit flow - flows in 7' very chert in 8' chert
chert.

Shalt split a few ft thick 2 flows; in 6' chert
in 10' dark congl. chert.

Flow of water in flows; in 7' chert chert. In 10' chert pituit
chert of quartz in 7' chert chert.

July 25 put flavour of Prosera cloud in a few minutes.

July 27

1 with on flavour at
Quartz flavour was quite in with the flavour
pipette then, & temp was 91-28, in
5 min cloud is in the pipette
with 1 by with upward, & is in
noon was quite a short quite cloud.

July 29th When taken at of flavour in the flavour
flavour at cloud is in 10' to 15' in
2 and I had initiated with with
at quite the flavour. -

July 30th initiated flavour with with 10' with flavour
in 2' no result. - then put in 1 drop of
flavour (i.e. at 10') on then at 2 the flavour
at by had at cloud. I flavour two of flavour
with at the temp of 66 & is in 15' in noon cloud.
