

Saturday. Jan 15 - 1812.

Two other species of disease, with much greater
lean sleep of being laid out by a broken vessel
eyes of face - - Squint with with at 92,
as if that was - - with patient of them &
very lean with with, that at some time.

Redness - purple - ... - Squint with (at 100)
with with at 90° - The patient of a red lashed
and a little with eyes of leaf, a red lashed
to be found a white 1/2 red. - is this in
good position for they off with - both.
with
with
very with face, with to be found a red with of patient
with to with with with at about with - very
by to opposite lashed with (the) lashed on
much above horizon - for 16' shall they can be
with (at they are with with they at to be found) a found
with at 65° & 95° with it a squint it with at with at 92°, but
as if that. - Shelly, however, - and very leaf could to
Copper, with -

I have now taken 3 new grey lenses of
also containing violet iron light transmission
but it is much as when using,
must be that of Oxidation
of my own in of transmission

be in case that the stone of the island is also
in the case of being of / had, - must be to
the of the island. Since however there is
in the eye an object the other being
which is not of nature of the light &
lighter contents - also not to think
to what the eye
