

Aug 12/1897/ Waddy - Capri

A nice day but with hazy lead ^{at} about 1
leaf steady + 31° above horizon, ^{at} leaf
was steady - with some horizontal plane; that is
for 2' or 3' - then 1/2 against the leaf for
below it was at 88° - 90°, moving away with
in leaf, a 5' about of latitude then stood a
of 14° above horizon, to be later 17° (with
washed away sleep). The leaf went to end of
leaf & became cloudy. Settled. In the position
with the leaf since the side of leaf in
near horizontal

1877 Copie mostly - Days & Days

Aug. 28: 9⁰ A.M. - I kept piling down, and
traced into top of water on. South, east
& I turned on a little up in middle

[Sept 11⁰ second leaf - no injury - it is
scattered with old can is yellow to
leave. They are black, so the yellow to
keep ^{longer} it, get the surface remain not for
a time. - leaf marked red work. -

Sept. 18⁰ 9⁰ 10 - get leaf ^{with} under my, (and a few
yellowish spots) along leaf. - Height of leaf 7/10 over

Sept. 19⁰ 11⁰ 3 that from and day with it on leaf

Sept. 24. second leaf page work. - I am I make a middle
first drop on leaf to then a middle: a 1'
leaf a good way from edge with it, of edge
to then is by the line a part, is in from
along with it of 2' leaf; (the 2' leaf with the
page is) Sept. 25. then on and black marks to
leave, but along a side, white line to leaf I have also

(over)

Cepic vally Terminal

Oct 1 9th P. M. ft =, leaf on paper

leaf under the leaf

Oct 8th The terminal part of leaf on which
with thickened & outside of edge
leaf to. -

Oct 10th 4 P. M. - I can see some inhabited space
(The inhabited - on the of the
thickened part of edge)

Oct 19th 11th Took away part of space the leaflet,
which from with seen in part of the leaf and
yellow with

25 } to 2 clipped leaves look better than the
