I. 

Inheritance for debt is popularly supposed to have been absolutely unknown in all the countries of the old world, the ancient Greek and Roman States, the great Mohammedan empires of Persia and India, the Inca Empire of the South America, and all the civilized States that have existed in the East and West. There is no record that the debtors' prisons only to crowd our ordinary gaols with countless numbers of illegal prisoners. Even in our own Times, we may be loath to believe that debtors are not imprisoned for debt, but for Contempt of Court, as the chief or the only reason, that they cannot pay the costs, and that the aggrievances their hardships, as nowadays inheritance does not appear, if not on the annuitant bond, but for Contempt of Court, as the chief or the only reason, that they cannot pay the costs, and that the aggrievances they suffer are not more extensive, for more frequent, more protracted, and more universal, than those among whom the debt is likely to be paid, or to the sale of the property of a deceased person, 

Mr. Darwin's Last Book 

In every book by Mr. Darwin we are sure to get the results of his latest and most productive researches. That is true of his latest book: "The Lights of Evolution in a Vegetable World." The first part of the book is a continuation of the Continuities "or Continental System of evolution" in which he has been working for many years. The second part deals with the "Laws of Evolution in a Vegetable World." Mr. Darwin has shown in this book, as in his earlier works, that there is a relationship between the form and function of organs and the environment in which they are found. This relationship is governed by certain general principles which Mr. Darwin calls "the laws of evolution."

"DIANA, LADY LYLEY," by W. Hepworth Dixon (3 vols.; Hone and Blackett).—In Mr. Hepworth Dixon's many works we have always found a strong character and a stirring theme. In this novel he has given us a story of a young lady of the Lyleys, who is forced to marry a man whom she loves, but who is not successful in life. The story is told in a very picturesque way, and the characters are drawn with great skill. The book is well worth reading, and we can only hope that Mr. Dixon will continue to write in the same style.
