

Carus, J. Victor

Leipzig June 2^d 1842

My dear Sir,

I have to beg your pardon for being so late in answering. I got your two notes and attended to them immediately.

The notice about your father's letters I have inserted in the *Forlag Anzeiger* and it will be printed in *Siebold & Koster's*

Zeitschrift für wiss. Zool., Anatomische Anatomie, Morpholog. Anatomie, Neues Jahrbuch für Mineralogie, so that it will be spread amongst the scientific public at large.

I send you hereby the letters of your dear father, I have received, all of them except one containing merely a correction.

and a couple of Post cards. The contents
of most of them will, it seems to me, not
be fit for publication, a good number con-
taining chiefly corrections and remarks on
proofs and so on. Not few of them are
extremely characteristic of your father's
heart and soul, and I shall not object
of course to the publication of any of
them, except those two or three ^(marked blue) where
he mentions my position in Leipzig,
in consequence of Reuexant being called here.
This and Carl Vogt's very kind interference
for my sake is rather too personal, and I
should be very much obliged if you would not

submit this.

In every other respect I am entirely to
your service, and I hope you will call
me to work inasmuch you think you might
want me.

Believe me

My dear Sir

Yours faithfully

J. Victor Jones
