GIR—I see that my letter on this exhibit has been read by one of the control of t

I cannot find a single fault with the practical and well-written lette of your correspondent "Indoots," more especially when he express himself so kindly towards me, and, moreover, when he so perfectly agrees with me in all the main leatures of my letter. I can only agrees with me in all the main leatures of my letter. I can only agree with the interest of my letter. I can only admit that I shall feel quite as much pleasure in spending a few months with him as he would with me: and this wish of his, so kindly expressed proves to me that although he says that all the accidents mentioned in my fetter were the result of "ground and unparticulation cardisants," him.

In conductor, I will only add that when I person duy chapter of halfbright designs, I did not wish to write a sensition strike for Till with respect to the property of the
