Justly Shilts Mr. Darwin

## ZOOLOGICAL JOURNAL.

In order to render this Work as complete as possible, Mr. G. B. Sowerby has printed a Table of Contents for the First and Second Parts of the Supplementary Plates, which may be had gratis, by the Subscribers to the Work and possessors of the copies of the Supplementary plates, upon application at Mr. Sowerby's, 50, Great Russell Street, Bloomsbury:— at the same place may be had

1. The ZOOLOGICAL JOURNAL, No. 1 to 20 and Supplementary Plates to ditto Part 1 to 5, coloured £14 3s. N. B. Only six complete copies of this Work can now be had; but the later numbers, and the Supplementary Plates may be had separately to complete copies or make up deficiencies.
2. The GENERA OF RECENT AND FOSSIL SHELLS, Nos. 1 to 42, £13 12s. N. B. Only one copy of this Work can now be had until the Plates are re-engraved.
3. SPECIES CONCHYLORUM. Part 1, £2 2s. N. B. The second and third parts are nearly ready.
4. CONCHOLOGICAL ILLUSTRATIONS, consisting of coloured figures of hitherto unfigured Recent Shells. Part 1 to 120, 1s. 6d. each.
5. The TANKERVILLE CATALOGUE OF SHELLS, with Appendix, containing Descriptions of 100 new species, and Nine Coloured Plates. Small 4to. 10s.
6. The MINERAL CONCHIOLOGY of GREAT BRITAIN, plain. No. 1, 1s. 3d.; Nos. 2 to 104, at 2s. 6d. each, and No. 105 at 3s. The first forty-five numbers can now be had. Nos. 97 to 104 must be paid for in advance, or upon payment of £11 17s. 6d. the numbers now-out will be delivered, and the continuation as it appears.
7. The MINERAL CONCHIOLOGY of GREAT BRITAIN, coloured. No. 1, 3s. 6d. Nos. 2 to 105, at 5s. each.
8. HISTORY and DESCRIPTION of the ROYAL MUSEUM of NATURAL HISTORY of PARIS, 2 Vols. 8vo. with Plates, 7s. 6d.
9. ENGLISH BOTANY. Small Edition. No. 1 to 120, at 1s. each.
10. LABELS for COLLECTIONS of MINERALS. 2s. per copy.
11. An extensive COLLECTION of RECENT SHELLS, comprising about 5000 Species, to be selected at fixed prices. Also, an extensive series of BARRETT'S SHELLS.
12. A small SELECTION of MINERALS, among which are some unique specimens.
13. A small COLLECTION of MINERALS, consisting of more than 1600 Specimens, all named, and comprising nearly all the known substances, many extremely rare.  
N. B. This Collection is extremely well suited for the study of Mineralogy, most of the substances showing distinctly the crystalline and other forms, as well as variations of colour, &c.
14. Specimens of METEORIC IRON, from Lenaxo, in Hungary.
15. Numerous ORGANIC FOSSILS.
16. Various CABINETS, suited for Minerals, Shells, or Fossils.
- ~~17. Supplement to ENGLISH BOTANY. Nos. 1 to 44, at 2s. each.~~
18. THOMPSON'S ZOOLOGICAL RESEARCHES. Part 1 to 5, at 3s. 6d. each.
19. CLEANINGS of BRITISH ALGÆ, by Rev. M. J. Berkeley. 3 Parts, 12s.
20. A SUPPLEMENT to the ENGLISH BOTANY, 42 Nos. at 3s. each.
